PREFACE BY THE EDITORS

The subject of this double-volume publication is an inventory of the holdings of the Topkapı Palace book treasury in Istanbul, commissioned by the Ottoman sultan Bayezid II from his royal librarian 'Atufi in the year 908 (1502–3) and transcribed in a clean copy in 909 (1503–4). Preserved in the Oriental Collection of the Library of the Hungarian Academy of Sciences (Magyar Tudományos Akadémia Könyvtára Keleti Gyűjtemény, MS Török F. 59), it was introduced to scholarship by İsmail Erünsal in articles that announced his auspicious discovery of this invaluable primary source.¹ Erünsal focused only on the prefatory folios of the inventory, which precede its catalogue of book titles, and on the librarian's entries on Turkish literature. He expressed the hope that future studies would take up the task of scrutinizing this unique manuscript in greater detail:

[A]s a list of Sultan Bayezid II's Palace library it can offer us much useful information not only on literary and scientific tastes of the Ottoman rulers but also on the subsequent movement of books which were relocated from the Palace library to other libraries. It will also allow us to confirm the existence of certain books which are no longer extant. It is hoped that further articles will deal with these aspects of this important catalogue.²

Our collective study seeks to fulfill his hope, while at the same time inspiring further research.

Without reference to Erünsal's previous articles, another preliminary study on MS Török F. 59 was published in 2003 by Miklós Maróth, who discussed only its "history books and related historical topics."³ We would like to express regret that neither of these pioneering scholars accepted our invitation to participate in this collaborative publication. In 2004, with the precious help of András Riedlmayer, a microfilm of the 365-page

manuscript of MS Török F. 59 was obtained from Hungary to be consulted by Gülru Necipoğlu while preparing her keynote lecture for an exhibition-related conference on "Bellini and the East." Published, with a delay, in 2012, her study briefly analyzed some books in Bayezid II's palace library inventory that were collected by his father Mehmed II.⁴

Realizing that MS Török F. 59 deserved a detailed study of its own, Gülru Necipoğlu and Cemal Kafadar decided to co-edit it as part of an interdisciplinary group project that would be published under the auspices of the Harvard University Aga Khan Program for Islamic Architecture. In 2010 permission was obtained to publish this primary source in *Supplements to Muqarnas*, a series largely dedicated to sourcebooks on the cultural and artistic history of the Islamic lands. Simultaneously and independently, Cornell Fleischer had begun an informal project to work through the same document with students and colleagues. Hence, it was decided to join forces and pursue this undertaking as a Harvard University and University of Chicago collaborative project, carried out mostly by contributors affiliated with these two institutions or closely associated with the same academic circles.

The important task of transliterating and preparing an edition of the Arabic manuscript, which also features an Ottoman Turkish preface, was undertaken by another Harvard University colleague, Himmət Taşkömür, in cooperation with Hesna Ergun Taşkömür. Their transliteration of the document is published in the second volume, together with a reduced-scale facsimile; these are accompanied in the first volume by essays and a critical apparatus consisting of annotated lists of entries, authored by a team of scholars from diverse

disciplines. The published essays are expanded versions of papers presented by invited scholars in a three-day interdisciplinary workshop convened April 4–6, 2014 at Harvard University.

Following introductory observations on the work as a whole by the editors, the workshop lectures were organized according to the subject categories under which the books are catalogued in MS Török F. 59, echoing the exact sequence of the library inventory itself, as if participants were reading the document together as a group. We asked the participants to evaluate the contents of the inventory in specific disciplines, appraising what was collected in the Ottoman palace library as well as commenting on what was omitted. The primary focus of the workshop, then, was an assessment of Ottoman intellectual and book culture from the viewpoint of the royal palace library collection as it existed at the turn of the sixteenth century, exactly fifty years after the conquest of Constantinople and, presumably, the creation of the palace library. The first group of lectures departed from this norm as the sole art historical talks, which attempted to contextualize and interpret the wider artistic and cultural ramifications of the document.

With a few modifications, the same format has been adopted in the present publication. The first volume begins with a section titled “Overview and Significance of the Palace Library Inventory,” comprising more extensive essays by the three editors that interpret and contextualize the inventory as a whole. The second section, “The Palace Library as a Collection and the Book Arts,” features essays discussing the contents and aesthetic dimensions of the book collection. The essays in the last section on “Book Titles and Their Disciplines in the Palace Library Inventory” closely conform to the order of the workshop presentations, but each is accompanied by a list of entries identifying the book titles cited in the inventory within specific disciplines. The volume ends with appendices on “Some Identified Manuscripts Stamped with Bayezid II’s Seal” (Appendices I–III) and “English Translations of the Librarian ‘Atufi’s Ottoman Turkish and Arabic Prefaces to the Palace Library Inventory” (Appendices IV–V). The color plates that accompany Appendix III illustrate selected pages and bindings from some manuscript copies of works listed in ‘Atufi’s

inventory that survive at the Topkapı Palace Museum Library.

The first volume of this publication includes additional essays not presented in the workshop itself, by the three editors and by Noah Gardiner, Christopher Markiewicz, Judith Pfeiffer, Jamil Ragep (with the McGill Astral Science Team: Sally Ragep, Sajjad Nikfahm-Khubravan, Fateme Savadi, Hasan Umut), and Aleksandar Shopov. Unfortunately, two invited speakers were unable to contribute to this publication. One of them was Snježana Buzov who, due to health problems, could neither attend the workshop nor send us her planned paper on “Books of Prayers and the Science of Talismans.” Guy Burak kindly accepted our request to write an essay evaluating that section of the library inventory. Shahab Ahmed, who delivered a superb paper in the workshop, titled “Books on Interpretations of the Qur’an and the Science of Qur’anic Recitation,” tragically passed away in the meantime. It is especially meaningful that one of his esteemed graduate students at Harvard, Mohsen Goudarzi, agreed to cover this subject with an essay written in grateful memory of his mentor. We would like to use this opportunity to express how deeply we mourn the demise of our dear colleague, a major loss to scholarship on Islamic Studies.

The preparation of this two-volume publication required a prolonged period of gestation. We editors would like to extend thanks to all the authors who participated in our collective enterprise with patience and enthusiasm. Without their learned contributions this interdisciplinary project could not possibly have been realized. In editing their individual contributions to volume one, we decided not to impose a unified transliteration system, given the multiplicity of languages involved (Arabic, Persian, Turkish/Turkic) and the personal preferences of authors. Authors were afforded some degree of flexibility in transliterating and translating the book titles in their essays, and in their organization of accompanying lists of entries. In the essays and lists of entries, cross references to book titles cited in MS Török F. 59 are specified with page and line numbers (e.g., 3 {4–5}, referring to page 3, lines 4 and 5). Some overlaps in content were inevitable, and desirable as

well. Rather than aiming at standardized uniformity throughout volume one, then, we aimed at consistency within each author's contribution, treated as an autonomous piece (following the *Muqarnas* article style). Standardized principles observed in transliterating MS Török F. 59 have been explained at the beginning of volume two, which contains the transliteration and facsimile in reduced scale.

Our special thanks go to Kinga Dévényi, former Keeper of the Oriental Collection Library of the Hungarian Academy of Sciences, who granted us permission to publish this document and provided its high-resolution digital scan for the facsimile edition. We also thank Peri Bearman, who helped standardize and proofread the transliteration of MS Török F. 59, as well as checking the internal coherence of lists of entries appended to essays in volume one. We are particularly grateful to Maria Metzler, our copy editor, and to Damla Özakay and András Riedlmayer, who provided editorial assistance in checking endnotes and transliterations. Gürzat Kami translated Appendices I and II from Turkish into English, along with transliterating the book titles cited therein, which were subsequently edited by the editors. Manuscript references added to Appendix I later in the process were transliterated by Eda Özel, to whom we are also indebted for many other forms of kind assistance, including proofreading the appendices and the lists of entries appended to essays, after Peri Bearman's preliminary suggestions to authors for internal consistency. Finally, we extend our appreciation to the Aga Khan Program for Islamic Architecture at the History of Art and Architecture Department of Harvard University for sponsorship of both the 2014 workshop and the present publication.⁵

3. Miklós Maróth, "The Library of Sultan Bayazıt II," in *Irano-Turkic Cultural Contact in the 11th–17th Centuries*, ed. Éva M. Jeremiás (Piliscsaba, Hungary, 2003), 113–32.
4. Versions of Necipoğlu's lecture were delivered at two international conferences, one in Boston and the other in London, in conjunction with the traveling exhibition at the Isabella Stewart Gardner Museum and the National Gallery; exhibition catalogue: Caroline Campbell, Alan Chong, et al., *Bellini and the East* (Boston and London, 2005). Due to the postponed publication of the joint conference proceedings, Gülru Necipoğlu opted to publish her article (submitted in 2007) with new bibliographic references as "Visual Cosmopolitanism and Creative Translation: Artistic Conversations with Renaissance Italy in Mehmed II's Constantinople" in *Muqarnas* 29 (2012): 1–81.
5. Many thanks go to the program administrator Cecily Pollard for her invaluable help in organizing the meeting. We are also grateful to the former administrator of the Harvard History of Art and Architecture Department, Deanna Dalrymple, for her administrative support, and to our research assistant Zeynep Oğuz who was present throughout the workshop to assist anyone who needed help.

THE SPATIAL ORGANIZATION OF KNOWLEDGE IN THE OTTOMAN PALACE LIBRARY: AN ENCYCLOPEDIC COLLECTION AND ITS INVENTORY

This essay interprets the objectives and intellectual horizons of an inventory of books once kept at the Inner Treasury within the private residential third courtyard of the Topkapı Palace (figs. 1a–b).¹ It considers the implications of the inventory for the imperial library as a building and as a collection shaped under two successive sultans, Mehmed II (r. 1444–46, 1451–81) followed by his son Bayezid II (r. 1481–1512). Focusing on the encyclopedic classification of knowledge in this document, which was commissioned by the latter sultan from his court librarian, I draw attention to the spaces and organization of books in the library, the cataloguing principles implemented in its inventory, and some of its telling holdings with remarkable titles.

A close reading of the inventory promises to yield macro-perspectives. This unparalleled document sheds light on the hierarchies of knowledge and the beginnings of textual canon formation in diverse disciplines at the time of its compilation. It provides invaluable information on epistemological categories prevalent during the formative stages of the palace library collection, the subsequent dispersal of volumes to other libraries, and the titles of unknown or no longer extant manuscripts. I argue that the Inner Treasury was not merely a storehouse but the site for an ongoing production and classification of knowledge, as organized in the systematic subject catalogue of its books, which corresponded to the spatial ordering principles of the library itself. The book treasury constituted the nexus for the compilation, codification, and preservation of a distinctive corpus of manuscripts with simultaneously indigenous and trans-regional dimensions. The lacunae of the inventory must have informed subsequent acquisition strategies for a still expanding encyclopedic collection, which ar-

guably laid the foundation for future directions in the cultures of knowledge, books, and libraries within the imperial palace and beyond. The primary agents of this legacy were the two sultans under whom the core collection of the palace library was assembled, their teachers and intimate circle of courtiers, their librarians, as well as the universalistic ambitions behind the collection itself.

Written in Arabic, with some Arabized Persian and Turkish entries, the library inventory in oblong format (length: 367 mm, width: 145 mm) has a late nineteenth-century European leather binding, possibly added in Hungary. During the rebinding process it lost some folios, and the order of a few others was mixed up (see Transliteration and Facsimile in volume 2). Currently featuring 365 pages, the inventory was prepared during the year 908 (1502–3) and transcribed in a clean copy in 909 (1503–4). It begins with a page containing two Arabic chronograms that provide the latter date, and a table of contents (*fihrist*) whose initial pages are missing. Two prefaces, the first in Ottoman Turkish dated 909, and the second in Arabic giving the date 908 (translated into English in Appendices IV and V at the end of this volume), are followed by the book catalogue itself.² The author indirectly identifies his name in the entries of some treatises he authored, as “the weakest slave al-‘Atufi, the keeper of books at the imperial treasury of Sultan Bayezid Khan” (*aḍ‘aḍi al-‘ibādi al-‘Aṭūfi al-khādimi li-kutubi al-khizānati al-‘āmirati al-Sultān Bāyezīd Khāniyyati*, 151 {14–17}), “the weakest slave of God al-‘Atufi” (*aḍ‘aḍi ‘ibādi Allāhi al-‘Aṭūfi*, 166 {10}); and “the weakest slave al-‘Atufi” (*aḍ‘aḍi al-‘ibādi al-‘Aṭūfi*, 303 {17–18}).

Figs. 1a–b. The Topkapı Palace in Istanbul. [1a] View from the Marmara Sea, with the Inner Treasury (Treasury-Bath complex). (Photo: Gülrü Necipoğlu) [1b] Close-up view of the Inner Treasury (Treasury-Bath complex). (Photo: Doğan Kuban, *Ottoman Architecture* [Woodbridge: Antique Collectors' Club, 2010], 186)

Despite limitations possibly due to the relative speed with which it was completed, the inventory-cum-catalogue titled “Register of Books” (*defter-i kütüb, kitāb al-kutub*, hereafter the “inventory”) is a document of considerable historical interest, being the only surviving example of its kind from the Ottoman period. It seems to be the sole comprehensive catalogue of the imperial library that was ever attempted, assuming there were no updated later versions of it that are lost. Further, it is the single known catalogue of an Islamic library that spells out in two prefaces the principles adopted in its own idiosyncratic classificatory system, partly colored by practical concerns. Two surviving pre-1500 public library catalogues from the Arab Middle East that have been identified thus far lack preambles explicating how and why they were prepared.³ Moreover, no original inventory of books has come to light from the palatine libraries of other early modern Islamic dynasties, or from earlier palaces for that matter.

Besides testifying to a previously unknown attempt at the classification of knowledge, the “Register of Books” prepared for Bayezid II by his librarian was tailored to suit the circumstances of a specific architectural space, containing not only the palace library but also the private treasury collection of the Ottoman sultans. With the exception of sporadic references to some manuscripts in chests and cupboards, contemporaneous registers (*defter*) of this “Imperial Inner Treasury” (*hizāne-i ‘āmiri-i enderūnī*) exclude the vast collection of Islamic books that were kept in the same building as an autonomous collection. The library holdings were placed alongside prized artifacts inherited, collected, and commissioned by the sultans, or seized as booty and presented as gifts. Therefore, the inventory of the palace library complements surviving early examples of registers comprising lists of objects stored at the Inner Treasury, the subject of an ongoing book project of mine.

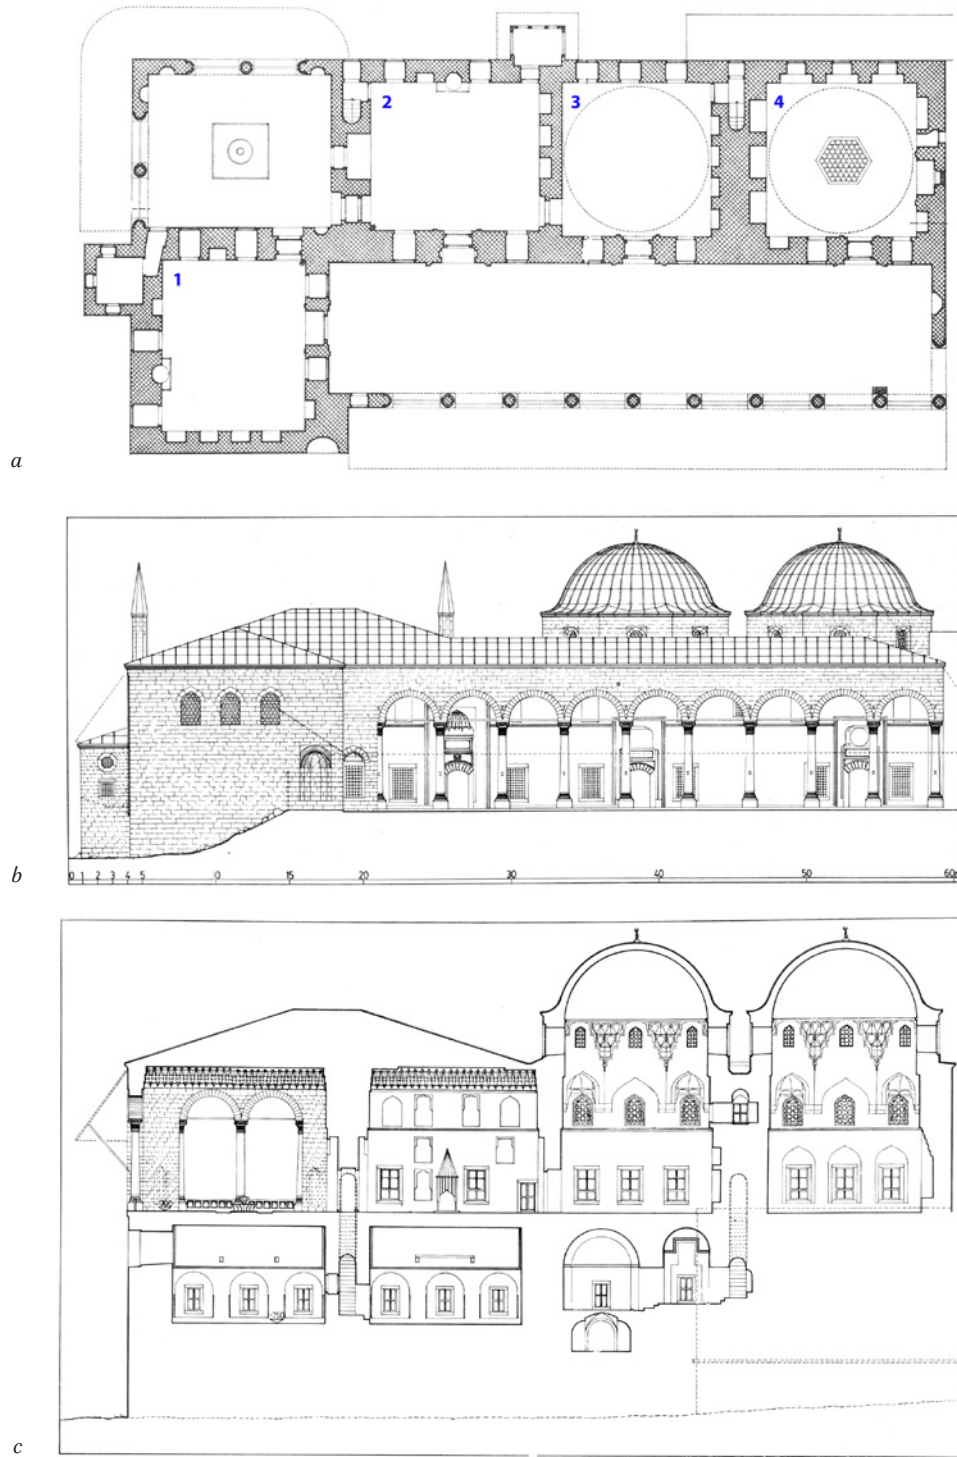

While the co-editors of this volume have contributed multiple essays, I preferred combining several lines of inquiry in a longer essay with three parts. The first part focuses on the palace library, the second part turns to the inventory itself, and the third part considers some outstanding volumes of the book collection. Starting with the architecture and diverse contents of the Inner Treasury, accompanied by a comparison to contemporary palatine libraries elsewhere, I then turn to the mo-

bility of books in the palace’s reading spaces and readership practices. This is followed by a reconstruction of the inventory’s “classification of the sciences” (*taşnīfal-‘ulūm*) and an analysis of cataloguing methods adopted by the librarian, in conjunction with the codicological examination of some extant volumes. The concluding part highlights selected inventory entries along with their surviving manuscript copies that can be associated with Mehmed II, Bayezid II, and the contexts of their court cultures (see my Appendix III at the end of this volume). It thus complements lists of entries provided in other essays that assess the strengths and weaknesses of the library collection in specific disciplines.

PART I: THE PALACE LIBRARY

The Inner Treasury, Its Spaces, Collections, and Librarians

The Inner Treasury is an imposing ashlar masonry building, with its L-shaped suite of three halls abutted by a fourth hall that functioned as the undressing chamber of a vanished bathhouse for the sultans and their male households (figs. 2a–c). This Treasury-cum-Bath complex is believed to have been the first royal edifice constructed by Mehmed II (ca. 1462–63) at a view-commanding corner of the third courtyard of the Topkapı Palace.⁴ Raised above a series of subterranean vaults, each of the four halls has a portal opening to a stately round-arched marble colonnade with Italianate composite “Ionic” capitals extending along the right wing upon entering the courtyard. The muqarnas portal of the second hall, referred to in a mid-sixteenth-century archival document as the throne room or reception hall (*dīvānhāne*), is more monumental than the accompanying three portals.⁵ Its privileged status is further marked by a pair of green porphyry columns that are aligned with the portal along the otherwise white marble courtyard colonnade. This hall communicates with a projecting balcony and a spectacular loggia featuring a central water-jet fountain. The round arches of the loggia rest on white marble columns whose purpose-made Italianate composite capitals are identical to those facing the third courtyard (figs. 3a–c).⁶ Commanding breathtaking vistas at the conjunction of two seas (the Black

Sea and the Mediterranean) and two continents (Europe and Asia), the interior of the throne room boasts a tall pointed-arched alcove for the royal throne, extending from floor to ceiling, and a bronze fireplace (fig. 4a). The fountained loggia that functions as a belvedere also communicates with a protruding latrine and with the first hall, which features another bronze fireplace (fig. 4b).

The Frenchman Jean-Claude Flachet (d. 1775), who was granted access to the Inner Treasury as premier palace merchant, described the “*casné, ou trésor imperial*” as an immense building lit by windows facing the Marmara Sea with many subterranean chambers in which objects resistant to humidity were stored. He observed that in its upper halls, “they hang on planks (*planches*) in multiple tiers, or in cupboards (*armoires*), all kinds of textiles, harnesses of infinite value, and precious stones raw or worked; in one word, everything valuable that the sultans possess.”⁷ Now completely denuded of their original painted decorations, the three main upper halls are lit by double-tiered windows. They have many built-in wall niches with “Bursa-arched” profiles, some arranged in multiple levels that were once reached by no longer existing wooden galleries and perhaps movable ladders (figs. 5a–b).⁸ The underground chambers are lit by a single row of windows, their walls lined up with spacious alcoves whose height extends from floor to ceiling.⁹

It is clear that the upper and lower halls were intended from the very beginning to display and store treasured possessions, including books. Soon after Bayezid II ordered the library holdings to be catalogued in 1502–3, the magnificent Treasury-Bath complex underwent extensive repairs following a catastrophic earthquake in 1509. This earthquake particularly damaged the fourth hall belonging to the adjacent bathhouse. At that time, a huge buttress was added along the garden façade of the structurally weak bathhouse, extending from the domed fourth hall up to the curtain wall separating the third and second courtyards of the palace complex. The original twin wooden domes of the Treasury-Bath complex, crowning the third and fourth halls, is seen in a copy of Cristoforo Buondelmonti’s city map from the early 1480s. These domes accompanied the colossal wooden hipped roof that covered the rest of Mehmed II’s multifunctional edifice, identified by a late-Ottoman

palace tradition as “Fatih Köşkü” (Mehmed the Conqueror’s Pavilion). The presently lower, modern hipped roof covers internal flat ceilings, namely the domeless rectangular first and second halls, which are the only ones provided with a fireplace, and the fountained belvedere communicating with both (fig. 6). An Ottoman elevation drawing made ca. 1509–11 of the massive new buttress built along the outer garden façade identifies the hall adjacent to the domed fourth hall of the damaged bathhouse as the “imperial treasury” (*hizāne-i ‘āmiri*), thereby confirming its function at that time.¹⁰

The suite of three intercommunicating halls, or at least the domed third hall adjacent to the bathhouse, must have already functioned during Mehmed II’s reign

as the private Inner Treasury (differing from the public Outer Treasury of the palace’s second courtyard). This is implied by an archival document dated 881 (1476), which refers to the “new treasury” (*hizāne-i cedīd*), where gold currencies were deposited inside large jars (*küp*), barrels (*varıl*), and chests (*şandūk*) at the “lower treasury” (*aşağa hizāne*) in the basement. Barrels full of silver currencies, a chest containing jewels (*şandūk-i cevāhir*), and gold and silver objects were placed at the “middle treasury” (*orta hizāne*). A note refers to a separate “detailed register” (*defter-i mufaşşal*), itemizing the contents of the jewelry chest.¹¹

The underground treasuries mentioned in this document most likely refer to the interconnected

subterranean spaces beneath the domed third hall, reached from that hall via a locked iron door and a staircase (fig. 2c). These basements consist of two rectangular halls covered by barrel vaults. The inner hall provides access via an additional staircase to the lowermost third space crowned by a quatrefoil vault. This lowest space featured an inbuilt clover-shaped marble baptismal font reused as a repository for treasures. As for the more accessible first rectangular space reached from the upper floor, both of its longer sides are entirely lined with identical "Bursa-arched" alcoves extending from floor to ceiling. As opposed to the other two superimposed spaces protected with a bolted iron door, where gold and silver currencies were apparently locked up, the narrow hall with Bursa-arched alcoves may well have functioned as a book treasury.

These three spaces are independent from a pair of larger rectangular underground treasuries with barrel-vaulted ceilings, which are reached from the throne room via another locked iron door connected to a staircase. Located underneath the throne room and the fountained loggia, these two intercommunicating basement treasuries feature walls spanned by capacious built-in alcoves with round arches also extending from floor to ceiling. These were probably intended for storing certain humidity-resistant items, including furnishings, clothing, objects, astrolabes, and some books in chests.

The 1509 earthquake apparently initiated the gradual transformation of the Inner Treasury into a storage space, which became increasingly cluttered with accumulating treasures toward the end of Bayezid II's reign. This sultan's son and successor Selim I (r. 1512–20), who spent most of his short reign in military campaigns, is said to have willed the lock on the courtyard gate of the third domed hall to be sealed by his own round treasury seal in perpetuity to commemorate his unsurpassable augmentation of its contents. Thereafter, the Inner Treasury appears to have been visited by the sultans only rarely, during special events such as accessions and other festivities, or upon the arrival of annual revenues from Egypt when the sealed lock of the domed third hall was opened ceremonially.¹²

Mehmed II's Treasury-cum-Bath complex fused the pleasures of the mind and body. In this luxurious build-

ing the sultan must have gazed upon his expansive domains and delightful palace gardens, bathed with his companions, contemplated his treasures, engaged in discussions with select scholars and courtiers, and read books from his library. The building's unique blend of Ottoman, Timurid-Turkmen, Byzantine, and Italian Renaissance architectural elements echoed the cosmopolitanism of the treasury collection and multilingual library housed therein.¹³ One may even speculate that Mehmed II temporarily resided at this monumental multifunctional mansion with a few intimates between military campaigns prior to the completion around the mid-1470s of the multi-domed Privy Chamber complex at the opposite corner of the same courtyard, both of which are depicted in the Buondelmonti map from the early 1480s (fig. 6).¹⁴ The well-protected first hall of the Inner Treasury, featuring only a few ground-level windows and conveniently abutting the toilet accessed via the fountained belvedere, could have functioned as the royal bedchamber in the mid-1460s (figs. 4b, 5b).

Also depicted in the Buondelmonti map is the small freestanding private audience hall (Chamber of Petitions) in front of the gate leading from the second courtyard into the third. Constructed shortly after 1477, it inaugurated Mehmed II's newly instituted ceremonial seclusion codified in his book of ceremonies or "Law Code" (*Kānūnnāme*).¹⁵ Before the Chamber of Petitions was built, the sultan may have held private audiences in the second hall of the Inner Treasury, which functioned as a reception hall or throne room. He likely met there with privileged courtiers and guests to whom he would display some of his treasures and library collection (figs. 4a, 5a). One such visitor appears to have been the last reigning Anatolian Seljuq prince, Kılıç Arslan, from whom Mehmed II seized Alanya in 1471, in return for offering him the governorship of Gümülcine (Komatini) in Rumelia. The deposed prince was honorably received at the imperial palace and was showered with gifts by the sultan who, in appreciation of Kılıç Arslan's expertise in gemology, appointed him to assess the value of precious stones and jewels entering the imperial treasury. During one of their private conversations, which likely took place at the Inner Treasury, the sultan showed Kılıç Arslan a slightly flawed jewel, which the prince promised to repair. Before returning this piece to

the royal treasurer, however, Kılıç Arslan defected to the Mamluk court on a merchant's ship from Gümülçine. It is recounted that in order to seek forgiveness from Mehmed II, the prince dispatched the superbly restored jewel with other gifts to Istanbul via the sultan's vizier. When Mehmed II was shown that jewel, he is said to have immediately recognized it, as only a seasoned connoisseur would, to the astonishment of those present.¹⁶

As I have pointed out elsewhere, Mehmed's cherished collection of Byzantine relics was kept at his "palace library" (*dārü's-salṭanatlarında olan kitābhāne*). He was greatly distressed on one occasion when Molla Lutfi (d. 1495), his intimate (*muṣāhib*) and librarian (*ḥāfiẓu'l-kütüb*, lit. "keeper of books"), stepped on a block of marble to reach for a book that the sultan had requested.¹⁷ That marble slab happened to be the purported Cradle of Jesus Christ, which, according to an inventory of the relics, Mehmed II had refused to sell when the Venetians offered 30,000 ducats for it, announcing that he would not sell it for even 100,000 ducats. The Italian translation of that inventory is preserved in a letter of Bayezid II, dated 1488, in which he offered to the king of France all the relics his late father had assembled in the royal palace after the fall of Byzantine Constantinople in exchange for holding his younger half-brother Prince Cem (d. 1495) hostage, so that the prince could not revive his claim for the throne. The inventoried relics included a manuscript as well, the miracle-working Gospel of St. John the Evangelist, written in the hand of St. John Chrysostom.¹⁸

We learn from the Greek chronicle written by Kritovoulos and dedicated to Mehmed II (ca. 1467) that, while resting from military campaigns at his newly completed palace in the summer of 1465, the sultan "occupied himself with philosophy, such as that of the Arabs and Persians and Greeks, especially that translated into Arabic. He associated daily with the leaders and teachers among them, and... held philosophical discussions with them about the principles of philosophy, particularly those of the Peripatetics [Aristotelians] and the Stoics."¹⁹ As is well known, among Mehmed's companions in those years was the Greek scholar-diplomat George Amiroutzes of Trebizond (d. ca. 1470), a relative of the aristocratic Byzantino-Serbian-born grand vizier Mahmud Pasha Angelović (g.v. 1456–66, 1472–74). Knowledgeable in Aristotelian philosophy, theology, medicine, mathe-

matics, geography, and rhetoric, this polymath was honored by the sultan with "frequent audiences and conversations." Amiroutzes had been ordered in the summer of 1465 to combine in a single large-scale world map the charts scattered in Ptolemy's book of geography, which was skillfully completed and inscribed with Arabic names provided by his son, "who was expert in the languages of the Arabs and the Greeks."²⁰ Amiroutzes described how he became one of the "intimates" (*familiars*) of the sultan who "distracted himself with the study of letters and philosophy," so as "to be continually near him" and to accompany him in campaigns behind his army. Mehmed frequently discussed with Amiroutzes "philosophy as well as the dogmatic differences between our two peoples."²¹ Some of these theological, philosophical, and scientific discussions may well have taken place in the recently completed "Fatih Köşkü" (Conqueror's Pavilion) that incorporated the sultan's library. It is probably not a coincidence that the earliest group of manuscripts produced for Mehmed II in his new capital Constantinople/Istanbul date from around the mid-1460s, corresponding to the completion of the Treasury-cum-Bath complex.²²

The episode with Molla Lutfi reveals that the library collection was accompanied by antiquities and marvels kept in the same building, where books and objects engaged in silent conversation. When Mehmed II asked his personal tutor and vizier Sinan Paşa (d. 1486) to suggest a trustworthy scholar for his "book treasury/library" (*khizānati kutubuhu*), the latter had recommended Molla Lutfi, who was a pupil of his. Thus, both of these erudite men who were disciples of Shaykh Vefa (d. 1491) obtained access to the imperial treasury's "exquisite books and rare sciences" (*laṭā'if al-kutub wa-gharā'ib al-ʿulūm*) during the second formative stage of the palace library collection in the 1470s, the first being in the mid-1460s. Not surprisingly, several works of the influential Shaykh Vefa are featured in 'Atufi's inventory. Sultan Mehmed II built a mosque and bathhouse next to the dervish lodge constructed by the shaykh in Istanbul that contained his impressive library, which was endowed in 1485. I am tempted to speculate that among the numerous amulets and talismans listed in 'Atufi's inventory were those prepared by Shaykh Vefa, said to have been coveted by grandees who were his disciples. When Mehmed II urged Sinan Paşa to study

mathematical sciences with the Timurid astronomer-mathematician ‘Ala’ al-Din ‘Ali b. Muhammad Qushji (hereafter ‘Ali Qushji, d. 1474), who had joined the Ottoman court sometime before 1472, the busy vizier sent Molla Lutfi to attend this scholar’s classes on his behalf, thereby indirectly perfecting his own mathematical knowledge.²³ ‘Ali Qushji is reported to have arrived in Istanbul with a large retinue and a vast book collection. ‘Atufi enumerates in the palace library inventory Arabic and Persian works by this renowned Timurid scholar, some of which are known to have been dedicated to Mehmed II.²⁴

To turn to the author of MS Török F. 59, the Ottoman scholar Hayreddin Hızır b. Mahmud b. Ömer el-‘Atufi (d. 1541) was from Merzifon, a town in the region of Amasya where Bayezid II had been stationed as a prince between 1454 and 1481. He refers to himself in the section on medical books as having written two treatises on prophetic medicine and one on preventive healthcare, all bound together in a single volume (151 {14–17}); he also cites a second copy of the latter (166 {10}). Another work by ‘Atufi on dream interpretation is listed in the inventory’s extensive section on occult sciences (303 {17–18}). According to Ottoman biographical dictionaries, ‘Atufi received a broad general madrasa education in the religious and rational sciences. After having served as royal librarian and tutor (*mu‘allim*) of Bayezid II’s palace pages, he became a preacher (*vā‘iz*) in Istanbul’s mosques and wrote books of his own.²⁵

Although it is unclear when exactly ‘Atufi was a palace tutor, I find it worth noting that this position is mentioned alongside that of the royal librarian in an undated wage register attributed to Bayezid II’s reign (for which I propose a date before ca. 1504). The register lists as a self-contained group of inner palace staff “The corps of the royal imam, and the two teachers of the inner palace pages, and the keeper of royal books, four persons” (*Cemā‘at-i imām-i ḥāṣṣa ve mu‘allimān-i ḡulmān-i enderūnī ve ḥāfiẓ-i kütüb-i ḥāṣṣa dört neferdür*).²⁶ Except for ‘Atufi, the tutors and royal librarians employed in Bayezid II’s palace, who likely managed the acquisition of books for the palace library, remain relatively unknown.

Another source reveals that, as “keeper of books” (*ḥāfiẓ-i kütüb*), Mevlana ‘Atufi received a reward of 2,000 aspers and a robe (*cübbe*, worn by the ulema) for a

“book” (*kitāb*) he presented as a gift to Bayezid II in 1503 (16 Jumada II 909). The unnamed book mentioned in this Register of Rewards (*İn‘āmāt Defteri*) could have been a preliminary copy of ‘Atufi’s library inventory, whose Arabic preface, dated 908 (1502–3), glorifies Bayezid II with pompous titles. In the only surviving “clean copy” of ‘Atufi’s inventory, this Arabic preface is preceded by a later one in Ottoman Turkish, dated 909 (1503–4). Several months thereafter, in 1504 (15 Ramadan 909), ‘Atufi received another sultanic donation of 3,000 aspers as a “preacher” (*vā‘iz*). This reveals that upon completing the inventory, ‘Atufi left the palace service with a promotion in the ulema ranks and was no longer Bayezid II’s keeper of books. Nevertheless, ‘Atufi continued to receive regular annual donations of 3,000 aspers as a preacher until the end of the sultan’s reign, with the latest reward given in 1512 (19 Dhu’l-Hijja 917), when he presented a book and received a higher donation of 5,000 aspers plus a *cübbe*. ‘Atufi was subsequently awarded 3,000 aspers for the gift of another book he authored as “preacher” at the beginning of Selim I’s reign in 1512 (5 Rabi‘ II 918). He was still a preacher in 1519 (Muharram 926) during the penultimate year of Selim’s rule, when he was given two houses from the Aya-sofya (Hagia Sophia) endowments.²⁷

The approximately fifteen works ‘Atufi authored ranged in subject matter from Qur’anic exegesis and hadith to theology, medicine, and logic, and consisted mostly of commentaries or glosses. Compared to Mehmed II’s librarian Molla Lutfi—a witty, freethinking intellectual who eventually became a high-ranking madrasa professor but was executed for alleged heresy in 1495—‘Atufi appears to have been a scholar of middling stature.²⁸ Though less famous than the notorious Lutfi, ‘Atufi’s encyclopedic madrasa education prepared him to fulfill the basic criteria required of book keepers (*ḥāfiẓ-i kütüb*) as listed in the endowment deed (*waqfiyya*) of Mehmed II’s mosque complex in Istanbul and that of Bayezid II in Edirne. The former deed required the holder of that position to “know the names of esteemed books and be knowledgeable in details pertaining to books needed by professors, tutors, and capable individuals,” whereas the latter deed expected the book keeper to be “pious, a believer, and trustworthy.” ‘Atufi’s successor as palace librarian is not mentioned in the primary sources. He may have been a Maliki scholar

from the Maghrib (North Africa or Spain), Husain b. Maya al-Maghribi al-Maliki, who dedicated an Arabic manuscript interpreting the Qur'an's first sura (Appendix III: 1) to Bayezid II in the year 911 (1505–6).²⁹ In that manuscript the author identifies himself as “keeper of the book treasury of the lofty noble [sultanic] residence” (*khādiman bihi khizānati kutubi al-maḡarri al-ashrafi al-‘ālī*), nearly the same title by which ‘Atufi refers to himself in the palace library inventory (*al-khādimi li-kutubi al-khizānati al-‘āmirati al-Sulṭān Bāyezīd Khāniyyati*, 151 {17}). This suggests that Husain b. Maya may have been appointed as the successor of ‘Atufi, who had left the post of court librarian by 1504; alternatively, he could have been one of the library scribes.

As indicated earlier, the preacher ‘Atufi continued to present his own works to Bayezid II after he completed the inventory. One of the examples preserved at the Topkapı library is an Arabic commentary concerning hadith on the subject of belief and jihad (Appendix III: 5). Dated 916 (1511), it features a dedication to the sultan and is described as a gift “offered to the Ottoman imperial treasury of Sultan Bayezid Khan” (*fī khidamāti khizānati ‘uthmāniyyati khāqāniyyati Sulṭān Bāyezīd Khāniyyati*). However, this volume lacks impressions of the sultan's almond-shaped sovereignty seal, with which the imperial library books were stamped in their opening and final pages. Moreover, it is missing from ‘Atufi's library inventory, which was prepared earlier (ca. 1502–4) and does not appear to have been updated thereafter except for a few insertions, as we shall see.

The collection of books inventoried by the librarian ‘Atufi was primarily formed over three generations, starting with Mehmed II's father Murad II (r. 1421–44, 1446–51), but it may have also included items belonging to their forebears. Books collected by Mehmed II in the Inner Treasury were not stamped with his seal; nor did those he inherited from his father bear seal impressions of any Ottoman sultan. Bayezid II had all manuscripts accumulated in the Inner Treasury stamped with his own almond-shaped sovereignty seal, featuring his imperial monogram (tughra). This seal was never again used after the death of Bayezid II, given the common practice of annulling the sovereignty seals of deceased sultans by engraving a line over them. Since manuscripts at the palace library were generally stamped

twice with Bayezid's seal on their first and last pages, it may be deduced that those featuring only one seal were repaired at some point, or simply lost their beginning or final pages.³⁰

MS Török F. 59 exclusively catalogues books in Islamic languages that were kept at the Inner Treasury founded by Mehmed II, whose library collection was inherited and expanded by Bayezid II, a keen collector of books like his father.³¹ Mehmed's collection of Byzantine and other manuscripts in non-Islamic languages has not been incorporated into this inventory, even though some of them were produced for him and feature bindings comparable to their Islamic counterparts. Nor were European printed books (incunabula) belonging to the royal library included in ‘Atufi's inventory. Late fifteenth- and early sixteenth-century registers of the Inner Treasury record furnishings, robes, objects, and scientific instruments stored in the same building. They also list the number of books in non-Islamic languages as a self-contained group, without enumerating any titles. None of the extant copies of those books at the Topkapı library bear Bayezid II's seal impressions, an absence that seems to signify their different status as treasury items independent from the library collection.³²

The earliest surviving register of the Inner Treasury known to me is dated 901 (1496). This document from the middle of Bayezid II's reign lists unidentified manuscripts and documents stored in certain chests (*şandūk*). Those on the upper floor of the Inner Treasury (*der bālā-i ḥizāne-i ‘āmiri-i enderūnī*) consisted of a chest with sections of the Qur'an in *maghribī-kūfī* script; a chest full of book pouches (*kīsehā-i kitāb*); a chest containing letters, almanacs, and other documents (*mekātīb ve taḳvīm ve sā'ir evrāk*); another chest with figural representations and other documents (*taṣvīrāt ve bākī evrāk*); a chest of paper documents and other miscellanies (*evrāk-i kāğıd ve bākī ḥurdavāt*); a chest of miscellaneous paper documents (*evrāk-i ḥurdavāt*); and three chests holding a total of 59 non-Islamic books (*kitābhā-i ‘imrānī*). The contents of the Inner Treasury's basement (*zīr-i ḥizāne-i enderūnī*) included sections of the Qur'an written in Kufic script by “His Highness ‘Ali” (i.e., the Prophet's cousin and son-in-law); parchment scrolls (*ṭomār ‘an pōst*) in the handwriting of ‘Ali; a volume in

the handwriting of 'Ali; and a chest containing 20 non-Islamic (*imrānī*) books.³³

A larger number of books in foreign languages is catalogued in the next surviving Inner Treasury register, dated Sha'ban 907 (1502). Compared to the 79 non-Islamic books stored in four chests that the previous register lists, this one consolidates the category into a single entry, mentioning a total of 161 unidentified volumes with no reference to chests. These are defined as "non-Islamic books and others" (*kitābhā-i imrānī ve ğayrihā*), thereby setting them apart from the Islamic books catalogued in 'Atufi's inventory a year later in 908 (1502–3).³⁴ One wonders whether non-Islamic volumes would have been classified as treasury rather than library items during the reign of Mehmed II, who collected them with an enthusiasm apparently unshared by his successor. In addition to giving away the Inner Treasury's Byzantine relic collection as diplomatic gifts, Bayezid II is reported to have auctioned off his late father's European paintings at the bazaar, where they were largely bought by the Venetian community of Istanbul. The auctioning and gifting of some contents of the Inner Treasury, however, is also documented in later periods as a common practice that was counterbalanced by the steady inflow of new items. In my interpretation, Bayezid II, who came to power with support from traditionalist factions opposed to Mehmed II's radical imperial project, was making a conspicuous public statement by "deaccessioning" select items from his father's Inner Treasury collection soon after his enthronement.³⁵ Yet, the new sultan would perpetuate Mehmed II's enduring cosmopolitan imperial legacy in many other ways.

The only other manuscripts and works on paper or parchment mentioned in the 1502 Inner Treasury register are sections of the Qur'an in Kufic script stored in a chest; 61 diverse scrolls of written or illuminated papers (*derchā-i ʔomar-i mütenevvī'a*), and a chest full of various maps and documents (*ḥarīṭahā-i mütenevvī'a ve evrāk*). Another Inner Treasury register dated Sha'ban 910 (1505) refers to what is probably the same chest as "one chest with written or illuminated scrolls, maps, and papers by painter-designers" (*bir ʃandūk dercler ve ḥārtalar ve naḳḳāʃ kāğıdlarıdır*), the "papers" presumably being loose sheets with paintings and drawings.³⁶ A later Inner Treasury register from the end of Selim I's

reign (ca. 1518) lists booklets of annual almanacs with prognostications (*eczā'-i taḳvīm*); Samarqandi, Indian, and Herati papers; figures of the climes and a single map (*ʃuver-i eḳalīm, pāre-i ḥarīṭa*); chests containing scrolls of letters and miscellaneous documents (*ʔomar-i mekātib ve evrāk-i ḥurdavāt*); as well as a hugely increased collection of holy books: *ʃūrat al-An'ām* manuscripts in small chests (82 volumes), sections of the Qur'an in *maghrībī* script in boxes (68 volumes), sections of the Qur'an in *naskh* script in six small chests (180 volumes), and two old worn-out volumes of Qur'an sections.³⁷

To sum up, early Inner Treasury registers from the reigns of Bayezid II and his successor Selim I demonstrate that some Qur'ans and paper or parchment items, generally without bindings (such as scrolls, maps, archival documents, and annual prognosticative almanac booklets), were deliberately excluded from 'Atufi's book inventory even though they were kept in the same building, much like the non-Islamic books with bindings belonging to the Inner Treasury collection. The latter books may have been omitted from 'Atufi's inventory not because they were undervalued, but because they were categorized as being of the same order as treasured objects that were not expected to be regularly requested or circulated. The number of 161 "non-Islamic books and others" cited above in Bayezid II's 1502–3 register drops to 149 volumes of "non-Islamic books" (*kütüb-i gebrī*) in Selim I's ca. 1518 register.

I have not come across any further reference to this group of foreign-language books in later registers, which implies that they perhaps faded into oblivion in the Inner Treasury basements. Indeed, the modern cataloguer of the non-Islamic manuscript collection (Gayri İslami, G.İ.), Adolph Gustav Deissmann, reported that these manuscripts were brought out from a cellar of the Inner Treasury (*aus einem der Keller des Schatzhauses*), where they had been stored in chests. In 1927 he was shown these mostly Greek and Latin codices, along with non-Islamic parchment and paper scrolls, loose sheets, and maps. During 1928 he examined these works belonging to the "legendary Serai-Bibliothek," and in 1929 he was shown the underground cellar of the Inner Treasury, where "most books" were once held, but which at that time were kept in cupboards in the ground floor. Some of the non-Islamic items, which had been damaged by

moisture and unfavorable storage conditions, were restored by conservators sent from Berlin in 1929.³⁸

An Inner Treasury register from the end of Sultan Süleyman I's reign (r. 1520–66), dated 971 (1564), shows that some books from the imperial library collection were housed in the throne room (*dīvānhāne*) at that time, possibly in accordance with former tradition. Besides two large coffer (*anbār*) containing palace furnishings and royal garments, the register lists 262 books stored within four cupboards (*dolāb*) in this hall. The itemized volumes are grouped according to language: "Register of Persian books" (*defter-i kitābhā-i fārisī*) with 55 volumes; "Register of Turkish books" (*defter-i kitābhā-i türki*) with 118 volumes; and "Register of the cupboard of Arabic books" (*defter-i dolāb-i kitābhā-i 'arabiyyāt*) consisting of 89 volumes.³⁹

It is striking that the number of Turkish books, which filled two cupboards, surpasses the works in Arabic and Persian, which were kept in a single cupboard each, as the latter languages are predominant in 'Atufi's inventory. This difference in proportion reflects a notable cultural transformation during the Süleymanic age, which ushered in a growing process of Ottomanization in various domains, including language.⁴⁰ Clearly, the 262 books listed in Süleyman's Inner Treasury register do not represent all of the books kept inside that building, but were likely a selected corpus of precious or commonly consulted manuscripts stored in the throne room. The remaining volumes were probably distributed on the upper and lower floors of the Inner Treasury in chests and cupboards subdivided by shelves. Other books could have been stacked on top of one another according to diminishing size—as was common practice in medieval Islamic and later Ottoman libraries—inside some of the "Bursa-arched" built-in wall niches of the upper halls (figs. 7a–c).

The Topkapı Book Treasury and Other Palatine Libraries

Constituting the nerve center of the Ottoman royal workshops overseen by the chief treasurer, the Inner Treasury was not only a site for collecting, but also for commissioning the production of artifacts in multiple media, including manuscripts. Unlike the Timurid and Turkmen institution of the *kitābhāna/kutubkhāna*, which is believed to have combined a treasury/library

(*khizāna*) for storing books and a scriptorium/book workshop for copying and producing them, the Ottoman royal library in the Inner Treasury was spatially separate from, yet institutionally connected to the court scriptorium (*naḳḳāṣhāne*).⁴¹ Most likely established by Mehmed II as a dependency of the Topkapı Palace built between 1459 and 1478, the scriptorium was housed in a converted Byzantine church at the nearby Hippodrome. It boasted figural gold mosaics and its basement curiously functioned as the royal menagerie.⁴² The relatively loose organization of court workshops under Mehmed II would be systematized and amplified by Bayezid II and later sultans.⁴³ An undated wage register from Bayezid's reign shows that his palace staff included a group of eight "book calligraphers" (*kātibān-i kütüb*), another group of nine consisting of "book binders" (*mücellidān*) and their assistants, and painter-decorators (*naḳḳāṣān*) with their assistants consisting of twenty-two persons," adding up to a total of 39 employees.⁴⁴

The no longer extant Timurid-Turkmen palatine libraries were succeeded by libraries in the sixteenth- and seventeenth-century royal palaces of Safavid Iran and Mughal India, which have also disappeared without a trace. The latter seem to have been pavilions or halls, whether or not they incorporated workshop facilities. For instance, one of three buildings constructed in 1534 for the Mughal emperor Humayun (r. 1530–40, 1555–56) at a waterfront garden in Agra was a two-story octagonal pavilion whose upper chamber housed a royal library. Called *Khāna-i Dawlat* (House of Felicity), it was furnished with "prayer carpets, books, jeweled pens, beautiful folders, and fine albums with pictures and calligraphy." Upon regaining Delhi, Humayun created a similar library at the Purana Qil'a palace complex. Once again a two-story octagonal pavilion, this extant red sandstone edifice popularly known as Sher Mandal is generally believed to have been the site of a fatal accident. In 1556 Humayun passed away after falling down the slippery stone staircase of his palace "library" (*kitābhāna*), which had recently been constructed.⁴⁵ The emperor had just engaged in astronomical observation with a group of mathematicians on the roof terrace of that building before starting to descend. When he reached the second flight of steep steps, his foot slipped

as he respectfully bowed upon hearing the call for the evening prayer.

The “illiterate” Mughal emperor Akbar (r. 1556–1605) inherited and enlarged his father Humayun’s book collection through gifts, conquests, commissions, and translations. By the time of his death, Akbar’s library in the Agra fort had expanded from about 4,000 volumes to 24,000, from which selected works were read aloud to him daily. According to the *Ā’in-i Akbarī* (Regulations of Akbar), the imperial library collection was divided among several locations rather than being housed in a single purpose-made building. Some books were kept within and others outside of the private royal residence (harem): “Each part is subdivided, according to the value of the books and the estimation in which the sciences are held of which the books treat. Prose books, poetical works, Hindī, Persian, Greek, Kashmīrian, Arabic, are all separately placed. In this order they are also inspected.”⁴⁶ As we shall see, ‘Atufi’s inventory, too, organizes books by subject matter, separating prose works from those in verse, with the latter category subdivided into specific languages: Arabic, Persian, Turkish, and “Mongolian.” Books in non-Islamic languages are excluded from his inventory.

The Safavid royal library in Isfahan was a hall with built-in wall niches, apparently not unlike the extant octagonal *Chīnīkhāna* (House of Porcelain) at the dynastic shrine of Shaykh Safi al-Din in Ardebil. The latter functioned as a “library-repository” to which Shah ‘Abbas I (r. 1588–1629) donated manuscripts and a collection of Chinese porcelain.⁴⁷ The French jeweler Jean Chardin (1660s–70s) described a library staffed with bookbinders and a librarian among the court workshops (*kārkhāna*) of the Safavid palace complex in Isfahan, which were grouped around a courtyard. He states that the library was a rectangular hall, 22 by 12 “paces,” whose walls were pierced with niches from bottom to top, each of them 15 to 16 “fingers” deep. In those niches, volumes were piled up on top of one another according to size and thickness, regardless of their subject matter, with the names of authors mostly inscribed on the edges of books written in Persian, Arabic, Turkish, and “Coptic.” Double curtains covered the niches, such that no books were visible upon entering the hall, but only the curtains and a double row of chests lined up along the walls, each of them four feet high and containing fifty to sixty vol-

umes. Only two chests stored volumes in “Occidental languages,” which were on Catholic rituals, history, and mathematics and had been pillaged from the conquest of Hormuz and from the ambassador of Holstein’s house, where the learned secretary Adam Olearius (d. 1671) had collected fine books. In 1684 the German physician-botanist Engelbert Kaempfer also portrayed the royal library in Isfahan as a storage space or manuscript treasury (*Hofbücherei*). Its 9,000 to 10,000 volumes were kept in shelves and chests, and its staff included binders, calligraphers, and gilders. Kaempfer described the workshop of court painters (*Hofmalerwerkstatt*) as a distinct space.⁴⁸ The spatial detachment of the royal library (*kitābkhāna*) from the workshop of painter-decorators (*naqqāshkhāna*) is also implied by a late Safavid source (ca. 1725), which refers to the separate heads of these two institutions.⁴⁹

While this spatial separation finds a parallel in Ottoman Istanbul, what makes the royal library at the Inner Treasury of the Topkapı Palace special is its survival as a multifunctional building dating from the mid-1460s, along with its partially intact book collection. The earliest developmental stages and contents of this collection can now be reconstructed thanks to the fortunate discovery of ‘Atufi’s inventory. Conceptually, the Ottoman Inner Treasury comes close to its counterparts in fifteenth- to early sixteenth-century palaces in Central Europe, where the private royal treasury (*Schatzkammer*) combined long-prized possessions with “books and reliquaries, including objects that might be called works of art” before the emergence of the *Kunstskammer* from the 1550s onward, when separate libraries became more common.⁵⁰ Not unlike the scenic treasury-cum-library at the Topkapı Palace, the palatine Corviniana library in Buda comprised two vaulted halls overlooking the Danube. Its precious books were arranged on gilded wooden shelves, with less valuable volumes stored in chests. A sofa extending between two windows was utilized by the king of Hungary, Matthias Corvinus (r. 1458–90), for reading and holding discussions with scholars.⁵¹

In an article on Bayezid II’s library inventory, Miklós Maróth has observed that the famous Corviniana library, which was created around the same time, featured only about 2,500 volumes and was the largest private royal library in Europe. By contrast, Maróth counted

about 5,700 volumes with approximately 7,200 titles in the inventory of the Ottoman sultan's library.⁵² It must be noted, however, that the actual number of titles was certainly higher because 'Atufi did not systematically list all items that were bound together in compendiums. Moreover, the palace library collection would expand considerably in the last decade of Bayezid II's (d. 1512) reign and beyond.

The holdings of the Corviniana library were rivaled only in Western Europe by the semi-public papal library at the Vatican. By the end of Pope Nicholas V's pontificate (1447–55) the Vatican library contained 1,160 books, a number Pope Sixtus IV (1471–84) raised to 2,527 in 1475, and to 3,650 at the end of his pontificate.⁵³ Fewer books existed at the celebrated palace library built between 1465 and 1472 for the Duke of Urbino, Federico da Montefeltro, who at the time of his death in 1482 had accumulated over 900 sumptuous manuscripts.⁵⁴ The number of books (about 1,136) removed from the library of the Palazzo Medici at the time of the family's expulsion from Florence in 1494 was not much larger than that of its counterpart in Urbino.⁵⁵

According to İsmail Erünsal, the only contemporaneous Ottoman library that came close to matching the number of manuscripts kept in Bayezid II's Inner Treasury was the private library collection of Mü'eyyetzade Abdurrahman Çelebi (d. 1516), the sultan's former intimate companion when he was a prince in the Amasya palace. After escaping from Amasya in 1479 following Mehmed II's order to execute him for allegedly having corrupted Prince Bayezid with addiction to alcohol and revelry, Mü'eyyetzade spent several years in exile in Mamluk Syria and Aqqoyunlu Iran. During those years he studied with celebrated scholars, including Jalal al-Din Dawani (d. 1502) in Shiraz. Upon returning to the Ottoman empire, Mü'eyyetzade became one of the foremost scholar-statesmen of Bayezid II's reign and was said to have collected 7,000 books, which is probably an exaggeration.⁵⁶ His agency in the transmission of rare books from the Timurid-Turkmen lands to Bayezid II's library must have been considerable. Only 2,112 volumes are recorded in an inventory of Mü'eyyetzade's books, which was prepared by a committee in 1516 upon the order of Sultan Selim I, who commanded that books dispersed after his death be gathered together. There were probably unretrieved items that would have raised

the total count recorded in the inventory, though not to the extent claimed. A note in this inventory explains that some books were marked as being worthy of the sultan, implying that these items could potentially be incorporated into the palace library, while the rest would be sold to pay the debts of the deceased owner.⁵⁷

The books Mehmed II endowed as a *waqf* to the public library of his grandiose mosque complex in Istanbul (featuring eight madrasas, eight preparatory schools, a hospice, and a hospital, built between 1463 and the 1470s) were fewer than those contained in his palace library. Moreover, they had a narrower subject range, with entire areas of knowledge missing or underrepresented. The public library's holdings consisted of 1,241 endowed books, of which only 839 were donated by the sultan and the rest were given by scholars and grandees, according to an updated catalogue prepared during Bayezid II's reign.⁵⁸ Compared to his father's donation, Bayezid II endowed an even smaller number of books to his own mosque-madrasa-hospital complex in Edirne (ca. 1488), merely 42 volumes intended for use in the single madrasa where they were stored in a chest. Thus, the Ottoman palace library surpassed in size and diversity the *waqf* libraries belonging to public religious institutions, as was also the case in the Mamluk Sultanate and most other Islamic polities.⁵⁹

Erünsal notes that the endowed holdings of public libraries in the early modern Ottoman world barely exceeded five to six thousand volumes. According to inflated accounts, their medieval Islamic counterparts boasted fifteen to twenty thousand books, not to mention the legendary proportions of some early medieval royal and semi-royal libraries, whose stock reportedly reached several hundred thousand volumes. The palatine library of the Umayyad caliphs in Cordoba is said to have featured 400,000 to 600,000 books, while that of the Fatimid caliphs in Cairo had 1,600,000 to two million volumes.⁶⁰ These "outlandish" numbers cited in Arabic narrative sources have recently been characterized as "symbolic and of no factual value," having a "topos-like quality."⁶¹

Reading Spaces and the Mobility of Books Stamped with Bayezid II's Seal

In an undated *Relatione*, the Jewish court physician of Sultan Murad III (r. 1574–95), Domenico Hierosolimi-

tano, refers to two large libraries (*libreria*) in the third courtyard of the Topkapı Palace, where the sultan was “served by men.”⁶² Born in Safed in Ottoman Palestine, Domenico held this post for “about twelve years in Constantinople” and then left for Italy upon converting to the Catholic faith in 1593. In my interpretation, the first library can be identified as that of the Inner Treasury and the second library as the one within the Privy Chamber complex in the same courtyard of male palace residents, where the sultans slept until Murad III’s reign. This sultan moved into a new bedroom pavilion at the women’s harem quarters, which was built by the chief architect Sinan in 986 (1578–79).⁶³

Domenico describes the first library (at the Inner Treasury) as “a communal one (*una commune*) behind the rooms of the servants (*camerieri*) and pages” who served the sultan, a library to which Domenico may have had access in his capacity as court physician. He locates the non-Islamic manuscript collection of Mehmed II in this “communal” library,

where there are books in all kinds of languages, of great beauty, all written by the pen, and in particular 120 items from those of Constantine the Great, each one two cubits (*braccia*) long and not more than three palms (*palmi*) wide, made of parchment fine as silk. In them are written the old and new testaments, and other histories and lives of the saints, all in letters of gold, covered [bound] with silver gilt, with jewels of inestimable value. No one is permitted to touch them.⁶⁴

The 120 Byzantine codices of “Constantine the Great” mentioned by Domenico come close in number to the 149 “non-Islamic” books listed in Selim I’s Inner Treasury register (ca. 1518) discussed above, though somewhat reduced. A further attrition occurred when the French ambassador in Istanbul, Pierre de Girardin, acquired fifteen rare Greek manuscripts and one in Latin from the Topkapı Palace collection in 1687 for the library of Louis XIV (now at the Bibliothèque nationale in Paris), with the aid of an Italian renegade employed in the service of the “seliktar” (Silahdar or Swordbearer at the Privy Chamber).⁶⁵ It was apparently the same Italian renegade from Livorno, a former royal page called Mustafa Agha, who, with the help of his friends at the palace, sold to Count Luigi Ferdinando Marsili (1658–1730) Greek manuscripts removed from the palace collection,

which he claimed the sultan had donated to him. In 1692 Marsili purchased additional Greek manuscripts inherited by the widow of Mustafa Agha, who was executed at Edirne in 1691. A recently discovered library inventory attributed to Marsili itemizes his 17 Greek manuscripts once belonging to the Topkapı Palace collection, which are now kept at the Biblioteca Universitaria in Bologna.⁶⁶

Domenico describes the more exclusive second library in the courtyard of male servants as “the other library that is private (*secreta*) and more inwards (*più indentro*), which is attached to the rooms of the Grand Signor and is the more famous.” It is unclear whether this private library at the sultan’s Privy Chamber complex extending along the left wing of the third courtyard (which comprised multiple domed halls built by Mehmed II and remodeled by Selim I) existed from the very beginning. The library may have been located near the extant dormitory of Privy Chamber pages that replaced earlier structures demolished in the nineteenth century.⁶⁷ According to Domenico’s account of Murad III’s daily routine, each morning this bibliophile sultan left the harem where he slept. At the Privy Chamber complex in the male quarters, he wrote for half an hour and read for an hour in his study (figs. 8a–b), to which he returned at noon to continue his studies until lunch was served there. In the evening he read books there once again before dinner, and then reentered the harem to sleep.⁶⁸ Domenico adds that some books were kept inside two cupboards in the sultan’s Privy Chamber itself (*nella sua camera*), where

there are on each side, two cupboards (*armarij*) with crystal glass doors, and in these cupboards, there are always some two dozen illustrated manuscripts, which he is accustomed to read often. These cupboards are low, so that, sitting in the Turkish fashion, one can see the books that are there through the transparency of the crystal glass, in such a way that the Grand Signor can conveniently take them out, and he is accustomed to reading them often.⁶⁹

Above these cupboards there was another small open cupboard (*armarietto aperto*) where purses full of coins were placed weekly as the sultan’s pocket money. This most private third space for books seems to be the one depicted in a late sixteenth-century painting, which represents Murad III accompanied by male attendants of

Figs. 8a–b. Sultan Murad III scrutinizing the manuscript that contains this very image at a desk in his study featuring built-in book cupboards, accompanied by two leading Privy Chamber pages and dwarfs. Seyyid Muhammed ibn Emir Hasan al-Su‘udi, *Meṭālī‘ü’l-sa‘āde ve menābī‘ü’l-siyāde* (The Ascension of Propitious Stars and Sources of Sovereignty), ca. 1582. the Privy Chamber complex as he is seated on a domical canopied throne, with a colonnade visible in the background. If so, then the two cupboards described by Domenico would have been located inside the third courtyard’s Privy Chamber, rather than within the sultan’s new bedroom at the women’s quarters. A curious example of micro-architecture, the throne canopy is fronted in the painting by a pool with a central water-jet fountain and flanked by hinged cupboards, whose bookshelves of gilded wood contain horizontally stacked manuscripts (fig. 9). The water-jet fountain is probably a now-lost “fountain near the Privy Chamber” mentioned in a repair document dated 1639–40, which lists expenses for gilding its dragon mouth-, curved-tulip-, and straight-tulip-shaped waterspouts that are visible in the painting.⁷⁰

We learn from other sources that Ottoman sultans had readers at the Privy Chamber where they were customarily served meals in the presence of the chief physician. According to Luigi Bassano da Zara (ca. 1537–40), Ottoman dynastic chronicles and the history of Alexander the Great were always read out there after dinner to Sultan Süleyman. He adds that this sultan was well-versed in matters of philosophy and in the scientific works of Avicenna (Ibn Sina, d. 1037) that were read aloud to him in Arabic (fig. 10). The Venetian diplomat Benedetto Ramberti (1534) reports that Süleyman was especially fond of reading the works of Aristotle along with their commentaries in Arabic and diligently studied theology to such an extent that he claimed to rival the muftis. A reader would read to him once or twice a week the histories of the deeds of his ancestors, which

Süleyman's secretaries guarded with reverence as "sacred treasures," since the sultan preferred those "true histories" over panegyric flattery. Similarly, when the Mughal emperor Shah Jahan (r. 1628–58) retired to his private royal quarters for dinner after the congregational evening prayers, selections from "reliable books" of dynastic history were read to him "by eloquent courtiers who were knowledgeable about historical matters."⁷¹

Reading practices, then, were not confined to private contemplation by the Ottoman sultans themselves, but also involved books read out to them in the exquisite spaces of the Privy Chamber complex, fronted by domed pavilions grouped around a large pool on its marble terrace overlooking gardens. As such, spaces of reading in the Topkapı Palace included airy pavilions with ample natural light and garden settings. The presence of books at the Privy Chamber is confirmed by archival docu-

ments from the reign of Selim I onward.⁷² These documents and notes written on manuscripts by librarians testify to the traffic of volumes between the Privy Chamber and the Inner Treasury, each occupying the two most view-commanding corners of the third courtyard across from one another.⁷³

The title pages of several extant books listed in MS Török F. 59 are inscribed with the phrase *odadan çıkan kitâb* (i.e., book transferred from the Privy Chamber to the Inner Treasury). If the private libraries inside and near the Privy Chamber mentioned by Domenico already existed during Bayezid II's reign, one might imagine a similar movement of books loaned to these reading spaces from the Inner Treasury. There was also a treasury known as the Privy Chamber Treasury or Swordbearer's Treasury (*Silahdar Hazinesi*), named after one of the leading pages to whom its key is believed to have been entrusted since the days of Mehmed II. Late-Ottoman chroniclers report that books were stored in cupboards in the treasury of the Swordbearer along with holy relics, currency, and weapons. Manuscripts in the Topkapı library collection that are currently labeled "Emanet Hazinesi Kütüphanesi" came from this treasury.⁷⁴

To return to the Inner Treasury books inventoried by 'Atufi, 784 manuscripts in the current collection of the palace library, which feature either a seal impression of Bayezid II, a dedication, or an annotation of ownership (*ex libris*) referring to him, have been analyzed by Zeynep Atbaş in her essay in this volume. Of these manuscripts, 750 were stamped with the seal of Bayezid II and 117 feature dedications to him. None of the 146 manuscripts in this group that bear dedications to his father were stamped with Mehmed II's seal.⁷⁵ The remaining 521 manuscripts consist of Ottoman works not dedicated to any sultan and others produced in different regions of the Islamic world between the ninth and early sixteenth centuries. Since completing her essay, Atbaş has identified 226 additional volumes at the Topkapı library that were stamped with Bayezid II's seal, which are not discussed in her essay but have been appended as an "addendum" to her list of manuscripts bearing this sultan's seal impressions, comprising 1,010 items (Appendix I). Most likely this number will continue to grow, and it is complemented by Zeren Tanındı's ever-expanding list of 176 manuscripts stamped with Bayezid II's seal that were transferred from the Topkapı Palace to other li-

braries (Appendix II). A total of 1,186 manuscripts with this sultan's seal are listed in the appendices of Atbaş and Tanındı at the end of the present volume. Additional books with seal impressions of Bayezid II are identified in the essays of several authors, including that of Cemal Kafadar, which has its own appendix comprising 130 items.⁷⁶

Accompanied by illustrative plates, my own book list at the end of this volume (Appendix III) is based on that of Atbaş. It presents observations derived from the physical examination of a selected sample of more than fifty books at the Topkapı library, which are stamped with Bayezid II's seal and/or dedicated to him. I have established that in many volumes bearing his seal, the titles written on the opening pages and on paper labels pasted over the binding flaps match 'Atufi's inventory entries exactly, or very closely (Appendix III: 4, 7, 10, 13, 14, 18, 21–23, 25–37, 39–50). The absence of a match in a well-preserved volume must therefore signify that it is a different manuscript copy from the one catalogued in the inventory. Books stamped with Bayezid II's seal but excluded from MS Török F. 59 may initially have been kept in other imperial palaces (e.g., the Edirne Palace, the Galata and Old Palaces in Istanbul), or in the provincial palaces of princes. Alternatively, such books may have been either written or catalogued after the inventory's completion, between ca. 1502–4 and the sultan's demise in 1512 (see Appendix III: 2–3, 6, 8–9, 19–20). There are also examples of books dedicated to Bayezid II that lack his seal impression, some of them undated and others written after the completion of 'Atufi's inventory (Appendix III: 1, 5, 11–12, 15–17, 24, 38).

The opening pages of extant manuscripts listed in the inventory generally identify volumes commissioned by Mehmed II and Bayezid II as having been made "by order of the treasury" (*bi-rasm khizāna*) of the sultanate, sometimes specifying that they were ordered by the ruler himself or made to be read by him (*bi-rasm muṭāla'a; li-muṭāla'a al-sultān*). Although not indicated as such, several inventory entries may refer to volumes inherited from earlier Ottoman sultans, among whom Murad II stands out in particular as a bibliophile. From the luxury books dedicated to him, an example preserved in the Topkapı library bears impressions of Bayezid II's seal and is cited in the inventory without reference to Murad II (in fact, 'Atufi never specifies for whom a book was made and when).

This exquisitely illuminated manuscript in Persian on music theory by the famous theoretician ‘Abd al-Qadir al-Maraghi (d. 1435) was copied in 838 (1435) probably in Timurid Herat, with a dedication to Murad II, shortly before the author’s death. It is one of two manuscript copies of the same work listed in the library inventory: *Maqāṣidu al-alḥāni li-‘Abd al-Qādir al-Marāghī fī al-mūsīqī* (Meanings of Melodies by ‘Abd al-Qadir al-Maraghi, on Music, 335 {17}). The title assigned by ‘Atufi is inscribed verbatim above the opening page and on the paper label pasted on the binding’s flap; the manuscript also bears two seal impressions of Bayezid II at its beginning and end (Appendix III: 46, Pl. 22 [1–3]). The author had served in the courts of the Jalayirids and their successors in Iran, Iraq, and Central Asia. It is believed that ‘Abd al-Qadir al-Maraghi sent this manuscript to the court of Murad II where his youngest son, ‘Abd al-‘Aziz, was a courtier and to whom the Ottoman sultan had donated a fief at Edirne in 1421. In 1423, the author sent an earlier version of the same work (also dedicated to Murad II) to the Ottoman court, where ‘Abd al-‘Aziz and his descendants perpetuated al-Maraghi’s musical legacy in the court circles of Mehmed II and Bayezid II, and continued to be active under Selim I and Süleyman I. Copies of an abridged Persian treatise on music, dedicated to Mehmed II by ‘Abd al-‘Aziz b. ‘Abd al-Qadir, are listed in the library inventory: *Naqāwatu/Nuqāwatu al-adwāri fī al-mūsīqī* (Best of the Modes, on Music, 335 {16}, 336 {18}). One of these copies still exists in the Topkapı library: the top of its opening page bears the same title assigned by ‘Atufi in the inventory, while its first and last pages are stamped with Bayezid II’s seal (the sticky label on the binding is lost). The works on music dedicated by ‘Abd al-‘Aziz’s son, Mahmud, to Bayezid II in 1503 and later to Selim I are missing from the library inventory, in keeping with its date.⁷⁷

Some of Bayezid II’s personal books feature a notation of ownership (ex libris) not found in his father’s manuscripts. One such volume produced during his princehood in 870 (1466) is inscribed, “from the books of Sultan Bayezid” (*min kutubi Sultān Bāyezīd*, Appendix III: 29, Pl. 10). Although it was subsequently stamped with Bayezid II’s almond-shaped seal of sovereignty upon his accession to the throne, this volume is not included in ‘Atufi’s inventory. A book listed in the inventory that bears Bayezid II’s seal has a similar ex libris, “from the books of Sultan Bayezid son of Mehmed Khan,

may his sovereignty be everlasting” (*min kutubi al-Sultān Bāyezīd bin Meḥammed Khān -khallada mulkahu*, Appendix III: 30, Pl. 11 [2]). Yet another book cited in the inventory, but dedicated to Mehmed II, features Bayezid II’s seal impressions and the following ex libris, which is repeated in many other volumes: “owned by Sultan Bayezid son of Mehmed Khan, may his sovereignty be everlasting” (*Şāhibahu al-Sultān Bāyezīd bin Meḥammed Khān -khallada mulkahu*, Appendix III: 28, Pl. 9 [1]).

Bayezid II’s ownership notes are brief and formulaic compared to those documented later in the holdings of the Mughal imperial library, which are inscribed by the successors of Akbar with comments on the date of acquisition and provenance, as well as personal observations and a ranking according to quality in five classes. Such Mughal imperial notations are often accompanied by numerous seal impressions of successive owners and library supervisors, inspection records, and crowded notes, unlike the sparsely annotated opening pages of manuscripts belonging to the Ottoman palatine library. The quotation above from the *Āṭn-i Akbarī* indicates that the qualitative categorization of books determined their placement in the Mughal imperial library, which was subdivided into sections according to the value of the books and the subjects they dealt with.⁷⁸ However, the annotations and ownership notes of Mughal manuscripts lack the systematic references to fields of knowledge that are specified in the book titles assigned by ‘Atufi in his inventory. These titles are repeated on the opening pages and binding labels of volumes catalogued by him, as we shall see below.

Bayezid II gifted books from his library to his two sons renowned for their own cultural patronage, Ahmed and Korkud, whose manuscript collections were appropriated upon their execution by their reigning brother Selim I and reincorporated into the Topkapı Palace library. From the books Bayezid sent as gifts to the provincial palaces of these two princes, their differing personal interests can be deduced. To Prince Ahmed, the sultan dispatched six divans (collected poems) and a *Shāh-nāmah* in December 1483. Later in February 1486, the same prince received nine more divans from his father.⁷⁹ In contrast, gifts sent to Prince Korkud, a scholar, musician, poet, and calligrapher educated in Mehmed II’s palace, consisted of only one divan and four books on religious sciences. Korkud himself authored works in the latter field, all in Arabic, ranging from theology, ju-

risprudence, and mysticism to ethics. These works, which are now kept in the Ayasofya collection of the Süleymaniye Library, originated from the Inner Treasury of the Topkapı Palace.⁸⁰

The portability and mobility of books meant that they circulated not only within the spaces of the imperial palace, but also beyond, leaving their habitat during royal outings to suburban palaces and military campaigns in which sultans carried their favorite books. For instance, I found lists of books in a register dated 1008–13 (1599–1605) that Mehmed III had requested from the Topkapı Palace during his seasonal stays at the suburban Davudpaşa Palace outside the city walls of Istanbul. It is also known that Selim I lost a chest full of books (*bir şandūk kitāb*) in the course of his campaign in Mamluk Syria-Egypt (1516–17), some items of which were recovered by the governor of Cairo, Khayr Bek. One of the lost books was the Ilkhanid historian Wassaf's (d. 1323) chronicle, *Tārīkh-i Waṣṣāf*, which happened to be the sultan's chief "entertainment" during that campaign. Upon conquering Cairo, Selim I ordered the work to be copied by the palace tutor (*sarāy ḥocası*) Mevlana Şemseddin, a speedy copyist who was able to transcribe the Qur'an in merely ten days.⁸¹ When Sultan Süleyman passed away during his last campaign in Hungary in 1566, the inventory of his personal belongings sent back to the Inner Treasury from Belgrade consisted of 41 chests, one of which was "a chest containing books" (*bir şandūkda kitāblar olur*).⁸²

Although the number of Islamic manuscripts listed in 'Atufi's inventory (approximately 5,700 volumes) would increase thereafter, many of these works were gifted by the sultans as personal presents to individuals and as pious endowments (*waqf*) to institutions from the Inner Treasury. It is important to emphasize that 'Atufi's inventory was not a legal document, just as palace library manuscripts stamped with Bayezid's seal were his own private property, rather than a legally inalienable pious endowment collection. Therefore, sultans who subsequently inherited these books as personal property were free to donate them as private gifts to individuals or as pious endowments to libraries within imperial mosque complexes. Starting in the eighteenth century, sultans also endowed separate libraries within the Topkapı Palace grounds, at which point the

selected books were stamped with the *waqf* seals of those rulers.⁸³

Although Sultan Ahmed III (r. 1703–30) had the Inner Treasury books inspected and stamped with his seal, this inventory check does not seem to have produced a new all-encompassing catalogue like that of 'Atufi. Book collections confiscated from deceased individuals, which had been catalogued in separate registers, were stored at that time as self-contained sub-collections in designated windowsills, alcoves, cupboards, or chests in the Inner Treasury.⁸⁴ The freestanding library pavilion built for Ahmed III at the middle of the Topkapı Palace's third courtyard in 1719 brought together some of these separate collections as a charitable endowment of nearly 5,000 books, intended for the male inhabitants of the inner palace. This sultan's endowment deed (*waqfiyya*) explains that, because the countless exquisite books accumulating since the foundation of the palace through "possession, purchase, or presentation to the royal treasury" had remained hidden and dusty in cupboards (*dolāblar*), he decided to make them more accessible. Ahmed III thereby transformed the legal status of selected books into a permanent *waqf* for the palace school and aghas. Some of these books had been brought out a year earlier, in 1718, from a basement of the Inner Treasury (*bodrum ḥazīnesi*) by three palace officers: the Swordbearer and the chiefs of the Privy Chamber and Inner Treasury. These items were handed over to the Privy Chamber's keeper of books for the renewal of their bindings.⁸⁵

Thereafter, an endowment of 4,000 additional Inner Treasury books was bequeathed by Mahmud I (r. 1730–54) to the public library he established next to the Hagia Sophia mosque in 1740 (the Ayasofya collection, which was later moved to the Süleymaniye Library). In 1742 Mahmud I endowed a set of palace books to the second public library he had built at Mehmed II's mosque complex (the Fatih collection, which would also be transferred to the Süleymaniye Library), and he established yet another library at the Galata Palace in 1753. Thereafter, further volumes were endowed to the Revan and Baghdad kiosks at the Topkapı Palace, which constituted dependencies of the Privy Chamber complex, while a library built for the Corps of Gardeners in the palace's outer garden by Mustafa III in 1767 received more than 5,000 manuscripts.⁸⁶ Even then,

numerous precious books remained in the Inner Treasury, as revealed by their current call numbers in the Topkapı library, which start with the letter H, denoting Hazine (Treasury).

The transfer of books from the imperial palace collection to *waqf* libraries had a precedent in the Mamluk context, where private libraries contributed to the formation of those in endowed religious institutions. Hence, the freezing of private collections into *waqf* libraries depleted the holdings of the Mamluk palace library and those of the elites.⁸⁷ A systematic comparison of the booklist of MS Török F. 59 and existing manuscripts stamped with Bayezid II's seal could help, in the long run, to reconstruct the contents and early history of the Inner Treasury library as a collection. The *waqf* seals of later sultans and notes by subsequent owners, borrowers, and librarians promise to provide additional clues regarding the afterlives of manuscripts listed in 'Atufi's inventory and their dispersal to other collections in and beyond modern Turkey.⁸⁸ Future codicological research on the materiality, marginalia, glosses, and colophons of these books will shed light on their production, circulation, and reception, as well as Ottoman readership, librarianship, and collecting practices.⁸⁹ The inventory also carries the potential to make wider contributions to the history of manuscripts, arts of the book, libraries, cataloguing, and collecting in general.

PART II: THE PALACE LIBRARY INVENTORY

The Classification of Knowledge and Categorization of Books

That some book titles on the opening pages of extant manuscripts are believed to have been written in Bayezid II's own hand points to his personal involvement in the cataloguing project of the palace library that he delegated to his librarian. In one such manuscript the title written in a single line above the opening page, which is stamped with Bayezid's almond-shaped seal at the lower left corner, has been authenticated by a diagonal note: "This is the noble handwriting of Sultan Bayezid, one line, it is true" (*Sultān Bāyezīdūn ḥaṭṭ-i şerīfīdür, bir satır, şaḥḥ*) (fig. 11). Nine copies of that manuscript are listed in 'Atufi's inventory with exactly the same title (75 {15–19}, 76 {1–3}), making it impossible to

distinguish these volumes from one another. The title line includes the assigned name of the book and its author, followed by the science or discipline (category of knowledge) to which it belongs: *Kitābu sharḥi al-Mukhtaṣari li-ʿAḏūd al-Dīn fī uṣūli al-fiqḥi* (Book of the Abridged Commentary by Adud al-Din [al-Iji], on the Principles of Jurisprudence).⁹⁰

This is precisely the format that Bayezid II instructed his palace librarian to follow when cataloguing the imperial book collection, as indicated by the Arabic preface of the inventory, according to which 'Atufi was ordered to designate the titles and affiliated disciplines of each volume. The librarian explains that when his illustrious patron "resolved to attend to the books of the religious sciences" (*bi-ri'āyati kutubi 'ulūmi al-dīni*), he ordered this slave of his to

determine the titles of the books in his imperial treasury (*bi-ta'ayyuni asmā'i kutubi khizānatihi al-āmirati*) and to classify every book according to its particular discipline (*bi-khuṣṣiyyati fannihi*), writing [this information] on the front pages and the bindings, and [he commanded me] to write these in the [present] register in a way that corresponds to the titles and descriptions (*al-asmā'i wa-al-awṣāfi*) that are [written] on the front pages and the bindings—without altering [these] in any way [marginal note:] that is to say, any semantic way, not any literal way. For on rare occasions the text in one differs from the text in the other without changing the understood meaning. As for such differences, they concern either substitution, or addition and subtraction, or pre-position and post-position (12 {5–10}, translated in Appendix V).

This passage is somewhat ambiguous concerning 'Atufi's duties. It suggests that he had to first determine the title and discipline of a book, then to write this information on both the opening page (*al-zuhūr*) and the binding (*al-julūd*) of the book, and finally to copy the assigned identification in the inventory. However, many books must have already featured preexisting titles written by former librarians on their opening pages and/or bindings. In such cases 'Atufi would have simply checked to ascertain their correctness, revising or rewriting this information on the book's opening page and binding, thereafter recording it exactly in the inventory. Other volumes whose titles were waiting to be identified and classified would have involved greater scrutiny on his part.

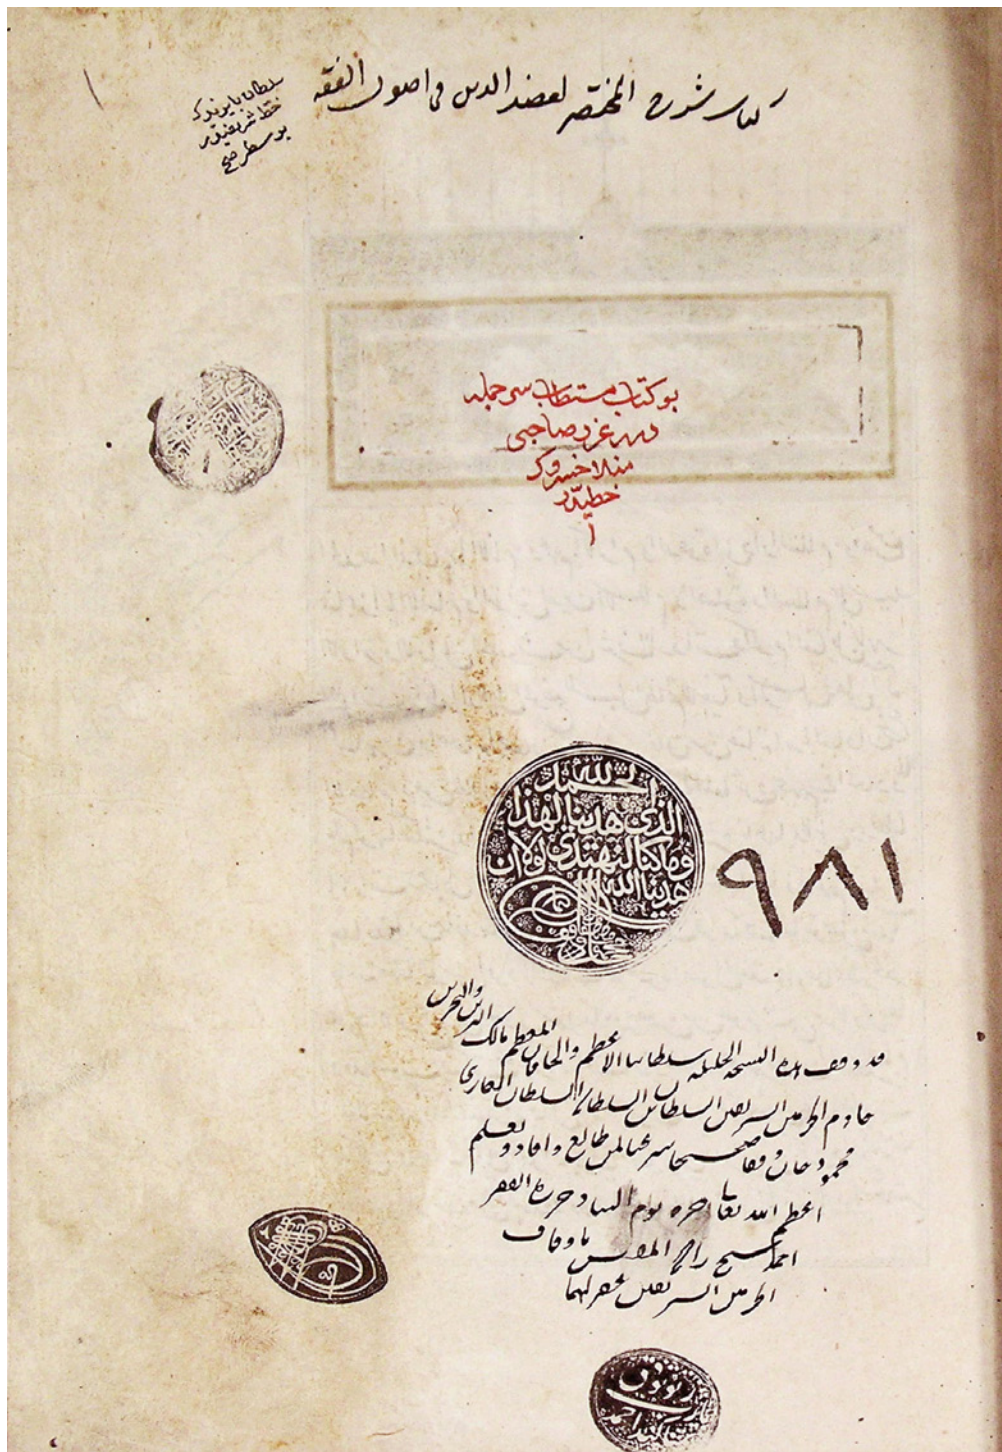

Fig. 11. Opening page of a book on the principles of jurisprudence, at the top of which the title was written by Bayezid II; the red ink inscription praises the scholar Molla Hüsrev, who transcribed the manuscript. Stamped with Bayezid II's almond-shaped seal, the small round Inner Treasury seal of Selim I, the large round *waqf* seal of Mahmud I, and the oval seal of his *waqf* inspector. Istanbul, SK, Ayasofya 981, fol. 1a. (Photo: courtesy of Zeren Tanındı)

Such a scenario appears to be confirmed by my physical examination of books stamped with Bayezid II's seal. In several volumes, older titles on the opening pages have been crossed out or left in place but modified with interlinear insertions or accompanied by titles assigned by 'Atufi, which differ in that they systematically include field classifications at the end. Occasionally the previous title inscribed above the opening page was altered by crossing out some words and adding others. Additions to the end of book titles identified the affiliated discipline of a work as being either "on" (*fī*) or "pertaining to" (*min qibali*) a specified field of knowledge (see fig. 14a below, also Appendix III: Pl. 5 [1], 10, 22 [1]). Such designations, which were assigned to each book by the librarian, were recorded above the opening page (fol. 1a) or flyleaf, and on the sticky label of the binding flap. Remarkably, the designations written on the books themselves match exactly (or nearly so) those that appear in the entries of the inventory, which were recorded subsequently.

A telling example that sheds light on the cataloguing procedure is a famous Timurid calligraphy album compiled during Shahrukh's reign (r. 1405–47) in Herat (Appendix III: 40, Pl. 17 [1]). The title written above fol. 1a, which also bears Bayezid II's seal impression, perfectly matches the corresponding entry in 'Atufi's inventory (the binding's sticky label is lost): *Safīnatun fihā khuṭūṭun nafīsatun wa-Rasā'ilu fī mujalladin a'ẓama* (A Compendium Containing Exquisite Calligraphy and Epistles within a Large Bound Volume, 257 {9}).⁹¹ A slanted note in Turkish, also attributable to 'Atufi and written along the left edge of that page, reads: "let it be recorded under divans" (*devāvīnde derc oluna*). Clearly, this note was necessitated by the complex task of assigning one specific field of knowledge to the diverse texts collected within this monumental album, which is listed in the inventory under Persian divans and versified books. The note confirms that the librarian first wrote the title on the book itself, before the same information was recorded in the relevant section of the inventory, perhaps with the help of one or more assistants.

'Atufi, or an assistant of his, wrote in each book and in the inventory itself the title given by the author, sometimes abbreviating it, or citing the popular title by which it was widely known. Not always indicating the

names of authors, the librarian also occasionally assigned generic titles to books based on their subject matter, or simply listed a keyword followed by a disciplinary affiliation. The fact that various titles are given to different copies of the same work in 'Atufi's inventory reflects the notorious flexibility of premodern titles. 'Atufi avoided systematizing headings or naming books in a more consistent manner, perhaps to accommodate preexisting labels or to distinguish different copies of the same work. The recognizable hand in *naskh* script, with some variations, that transcribed the titles and disciplines of many manuscripts stamped with Bayezid II's seal can be attributed to 'Atufi and/or his assistant(s), who copied and modified previous headings, as well as created new ones.

'Atufi's task involved a combination of procedures. Even though the affiliated disciplines of books were often missing from their previously assigned titles, the volumes must have been loosely grouped according to discipline in the library spaces and chests. After all, Mehmed II's librarian Molla Lutfi wrote a well-known treatise in Arabic on the classification of religious and linguistic sciences, titled *al-Maṭālib al-ilāhiyya fī mawḍū'āt al-'ulūm al-lughawīyya* (The Divine Questions in the Subjects of the Philological Sciences), and his teacher 'Ali Qushji reportedly composed an encyclopedia of knowledge called *Mawḍū'āt al-'ulūm* (Subjects of the Sciences) that has not yet come to light.⁹² The relevance of such encyclopedic classifications of the sciences to the cataloguing of libraries has long been recognized. It may well be that the classificatory system devised by 'Atufi was partly rooted in an earlier encyclopedic conception envisioned by Molla Lutfi and his royal patron, Mehmed II, who was the true founder of the palace library. Whether or not this was the case, it is rather improbable that 'Atufi organized *ex novo* the entire library, whose formation was a cumulative process initiated by his predecessors. Interestingly, 'Atufi's inventory lists four copies of medieval classifications of the sciences by the Sunni Ash'arite scholars Abu Hamid al-Ghazali (d. 1111) and Fakhr al-Din al-Razi (d. 1210). It has been observed that al-Razi's classification, which integrated the religious and rational sciences, was widely imitated by sixteenth-century authors in Iran.⁹³

I would argue that a similar integration characterizes 'Atufi's individualized classification of knowledge.

The entries of MS Török F. 59 exemplify the conciliation of revelation with reason in the palace library collection, which merges the religious and rational sciences. Yet in the Arabic preface quoted earlier, 'Atufi states that Bayezid II had commissioned the inventory because of his particular attention to "books in the sciences of religion" (*kutubi 'ulūmi al-dīni*, 12 {5–6}). The librarian received the order to prepare the inventory just around the time when the mosque and madrasa complex of Bayezid II in Istanbul was being built, between 906 and 911 (1501–5), perhaps with a view to determine some of the canonical books whose copies would be supplied to the single madrasa of that institution. However, the fact that many of the disciplines classified in the inventory were hardly represented in madrasa libraries reveals the incomparably broader horizons of the palace library collection.

As one would expect, this document presents an intellectual universe in which knowledge has been hierarchically organized in a descending order of authority, starting with the Qur'an and religious sciences, followed by other disciplines that add up to a total of twenty sections (*tafşil*). A comparable hierarchy of knowledge characterized fifteenth-century Renaissance Italy, where medieval theological literature dominated most library catalogues, with the Bible in the first place and humanistic works "simply added on." In response to his royal patron's special attention to the religious sciences, some of 'Atufi's inventory categories (such as philosophy and theology) and individual book entries occasionally resort to specifying their degree of adherence to the shari'a. By contrast, the unconventional Mughal emperor Akbar is said to have ordered his librarian to catalogue books in three sections, "giving the first place to books of verse, medicine, astrology, and music; the middle place to works on philosophy, religious mysticism, astronomy, and geometry; and the lowest place to commentaries, the traditions (hadith), books on theology, and on all subjects connected with the sacred law."⁹⁴

In the table of contents of 'Atufi's inventory, the listed fields of knowledge abruptly begin with jurisprudence because pages corresponding to the section headings of the first six categories of knowledge have

been lost. Since these headings are repeated verbatim later on, at the beginning of each of the twenty disciplinary subdivisions, I have reconstructed the missing six "sections" (*tafşil*) between pages 1 and 2 as follows:

- [1] *Tafşilu al-maṣāḥifi al-'azīzati* (The Holy Qur'an, pages 12–17)
- [2] *Tafşilu kutubi al-tafāsiri wa-kutubi 'ilmi al-qirā'ati* (Qur'anic exegesis and the science of recitation, pages 18–28)
- [3] *Tafşilu kutubi al-aḥādīthi wa-kutubi asmā'i al-rijāli wa-ansābihim wa-kutubi manāqibi aṣḥābi al-ḥadīthi wa-kutubi shamā'ili al-nabī-ṣallā Allāhu 'alayhi wa-sal-lama-* (Traditions, reporters of traditions and their genealogies, lives of companions who reported traditions, and the Prophet's character, pages 30–42)
- [4] *Tafşilu kutubi al-ad'iyyati wa-kutubi khawāṣṣi al-Qur'āni wa-kutubi 'ilmi al-wafqi* (Books of prayers, properties of the Qur'an, and the science of magic squares, pages 45–55)
- [5] *Tafşilu kutubi 'ilmi uṣūli al-dīni*, ay, *'ilmi al-kalāmi* (Science of the principles of religion, or the science of philosophical theology, pages 56–68)
- [6] *Tafşilu kutubi uṣūli al-fiqhi* (Principles of jurisprudence, pages 73–80)

The extant pages of the table of contents (pages 2–5) list the following sections:

- [Page 2]
- [7] *Tafşilu kutubi al-fiqhi wa-kutubi manāqibi al-a'immati* (Jurisprudence and lives of the imams, pages 83–101)
- [8] *Tafşilu kutubi al-taṣawwufi wa-kutubi al-naṣā'ihi wa-al-mawā'izi wa-kutubi manāqibi al-maṣāyikhi wa-al-awliyā'i -quddisa sirruhum- wa-kutubi 'ilmi al-akhlāqi* (Sufism, exhortations and admonitions, lives of the shaykhs and saints, and the science of ethics, pages 105–51)
- [9] *Tafşilu al-kutub al-ṭibbiyyati* [*wa-mā yata'allaqu bi-al-ṭibbi bi-jihatin min al-jihāti ka-kutubi al-sumūmi wa-kutubi al-falāḥati*] (Medicine, and what is related to medicine with respect to toxicology and agriculture, pages 151–72)
- [10] *Tafşilu kutubi al-siyari wa-al-tawārikhi wa-kutubi ādābi al-ḥarbi wa-kutubi umūri al-riyāsati wa-al-saltānati wa-al-siyāsati wa-kutubi al-furūsiyyati wa-al-bayṭarati, ya'nī farasnāmah* [*ay bayṭarnāmah*] *wa-kutubi 'ajā'ibi al-makhlūqāti wa-kutubi ṣuwari al-aqālīmi* (Biography and history, etiquette of war, matters of rulership and sultanate and politics, horsemanship, veterinary practice; namely, books of the horse [or falconry],

books of the veterinarian, houndsmanship, wonders of creation, and figures of the climes, pages 175–203)

[Page 3]

[11] *Taḡṣīlu al-dawāwīni al-‘arabiyyati wa-al-kutubi al-manẓūmati bi-al-‘arabiyyati wa-kutubi al-khuṭabi wa-al-kutubi al-musajja‘ati wa-al-kutubi al-amthāli wa-kutubi al-tarassuli wa-al-inshā‘i wa-al-siyāqati wa-al-arqāmi wa-kutubi ‘ilmi al-‘arūḍi wa-‘ilmi al-qawāfi wa-al-shi‘ri wa-al-mu‘ammā* (Arabic divans, versified books in Arabic, [followed by Arabic, Persian, Turkish] orations, rhymed prose, proverbs, official documents, prose composition, secretarial accounting, ciphers, the science of prosody, the science of rhyme, poetry, and literary puzzles, pages 203–28)

[12] *Taḡṣīlu al-dawāwīni al-fārisiyyati wa-al-kutubi al-manẓūmati bi-al-fārisiyyati* (Persian divans and versified books in Persian, pages 230–59)

[13] *Taḡṣīlu al-dawāwīni al-turkiyyati wa-al-mughūliyyati wa-al-kutubi al-manẓūmati bi-al-turkiyyati wa-al-mughūliyyati* (Turkish and Turkic [“Mongolian,” mostly Chaghatay] divans, and versified books in Turkish and Turkic, pages 261–67)

[14] *Taḡṣīlu kutubi ‘ilmi al-ma‘ānī* (Science of rhetoric, pages 268–77)

[15] *Taḡṣīlu kutubi ‘ilmi al-ṣarfi wa-al-naḥwi* (Science of morphology and syntax, pages 280–92)

[16] *Taḡṣīlu kutubi al-lughati al-‘arabiyyati wa-al-fārisiyyati wa-ghayrihimā* (Lexicons in Arabic, Persian, and other languages, pages 293–300)

[Page 4]

[17] *Taḡṣīlu kutubi ‘ilmi al-ta‘bīri wa-kutubi ‘ilmi al-firāsati wa-kutubi ‘ilmi al-kīmīyā‘i wa-kutubi ‘ilmi al-aḥjāri wa-kutubi al-ramli wa-kutubi al-fāli wa-kutubi ‘ilmi al-nayrinjāti wa-kutubi al-ṭilsimāti wa-kutubi al-simiyā‘i wa-kutubi al-‘azā‘imi wa-kutubi ‘ilmi al-jafri wa-kutubi al-ṣinā‘āti al-‘ajibati wa-kutubi al-ḥiyali wa-kutubi al-siḥri* (Science of dream interpretation, science of physiognomy, science of alchemy, science of stones, geomancy, omens, science of *nayranjāt* [magical tricks], talismans, *simiyā‘* [letter magic], the adjuration of spirits, the science of *jafri* [letter divination], wondrous mechanical arts/automata, engineering feats, and sorcery, pages 302–11)

[18] *Taḡṣīlu kutubi ‘ilmi al-nujūmi wa-kutubi ‘ilmi al-hay‘ati wa-kutubi ‘ilmi al-ḥisābi wa-kutubi ‘ilmi al-handasati wa-kutubi ‘ilmi al-mūsīqī wa-kutubi al-lahwi ka-al-shaṭranji* (Science of stars, the science of configurations [theoretical astronomy], the science of arithmetic, the science of geometry, the science of music, and entertainments like chess, pages 313–37)

[19] *Taḡṣīlu kutubi al-ḥikmati al-islāmiyyati [wa-hiya allatī tabḥathu fihā ‘alā qānūni al-shar‘i al-sharīfī al-nabawī] wa-kutubi ‘ilmi al-jadali wa-kutubi al-manṭiqi wa-kutubi al-ḥikmati al-falsafiyati* (Islamic philosophy [in which investigated subjects are in conformity with rules of the Prophetic law], the science of dialectic, logic, and “philosophical” philosophy, pages 339–63)

[Page 5]

[20] *Taḡṣīlu al-kutubi al-mutarjamati min al-Tawriyati [Taw-rātī] wa-al-Zabūri wa-al-İnjīli* (Translations of the Torah, Psalms, and the Bible, pages 364–65)

The boundaries between these twenty sections of the inventory are somewhat blurred by the librarian’s listing of different manuscript copies of the same book under more than one discipline to which they could simultaneously belong. As is explained in ‘Atufi’s Turkish preface discussed below, by doing so he kept in mind the fields from which readers might request the books in question. This flexibility need not be construed as confusion and uncertainty on his part, then, but rather as a reflection of his familiarity with the fluid readership practices of scholarly and court circles of his time. Hence, the classification system of the palace library inventory was colored by the learned librarian’s choices and inferences about the expectations of readers.

Rules of the Inventory and Book Repositories

The prefatory section of ‘Atufi’s inventory in Ottoman Turkish is unique in its explication of the rules he devised in cataloguing the imperial book collection, in accordance with his patron’s specific instructions discussed above. Those instructions were summarized in the brief Arabic preface that follows the much longer one in Turkish. Titled “The Rule of the Register and Its Exceptions” (*Qānūnu al-daftari wa-shawādhduhu*, 5–9), the Turkish preface outlines principles the librarian adopted in the naming, classification, and inventorization process, along with compromises necessitated by exceptions to those rules (see my translation in Appendix IV at the end of this volume). One can only imagine the complications he faced in the intellectual organization and physical maintenance of the treasury spaces where the books were kept. ‘Atufi was confronted with challenges ranging from identification and field classification to the spatial organization of books, which entailed different yet integrated strategies. The rules

established in the Turkish preface seem to have addressed not only his royal patron, who ordered him to prepare the inventory, but also future librarians and possibly potential readers.

The first rule established by 'Atufi is that each volume, whether it pertains to one or more disciplines (*fenn*), should be placed in a single repository or book treasury (*maḥzen*, lit. magazine) and listed only once, under a single corresponding discipline in the inventory (5 {13–19}, 6 {1–4}). An exception to this rule is books with a single title that may be relevant to two disciplines. Such books were listed under separate disciplines in the inventory only if several manuscript copies existed, because of the probability that they may be requested (*istenmek ihtimālî eclinden*) from each of those two disciplines, presumably by the sultan or other readers.

The second rule is that volumes containing several book titles (i.e., multiple-text compendiums) are classified under the discipline corresponding to whichever title is more esteemed (*mu'teber*) and thus more likely to be requested, or alternatively on the basis of rarity (*ḳalîl el-vüçûd*) (6 {5–18}). An exception to this rule is multiple-text volumes containing several equally esteemed and rare works, in which case a subjective classificatory choice would be made by the librarian. However, if a second copy of a volume containing the very same set of texts was available, it was listed under a different discipline corresponding to another esteemed book title that might be requested. This special treatment of compendiums indicates 'Atufi's acute awareness of the problems posed by the multiplicity of works bound within single volumes. The inventory, whose sections on specific disciplines generally begin with more popular or rare books, therefore has fascinating implications for reading practices and the relative esteem of certain titles over others.

The third rule is that the title of each book (*ism-i kitâb*), which is recorded in the inventory according to a particular manner (*bir üslûb-i ḥâşş*), must be the same as (*bi-'aynihi*) the way it appears on the binding flap (*maḳleb*) and on the opening page (*zahr*). This rule was systematically applied, with the exception of a few rare cases and inadvertent mistakes (6 {18–19}, 7 {1–19}, 8 {1–7}). The rule clearly responds to the explicit instruc-

tions given by Bayezid II, who ordered 'Atufi not to alter the titles written on the books and their bindings in any way when recording them in the inventory, as is explained in the Arabic preface quoted above. A necessary exception to this rule concerns lengthy books extending over several volumes that have been recorded under one entry in the inventory, in which case the corresponding number of volumes is indicated next to that single title. Such an entry varies in form, but not content, from the individual titles written in each of the volumes, which are accompanied by their own specific volume number. In incomplete sets, only the number of the existing volumes has been written in the inventory next to the title.

The fourth rule is that books in verse, whatever their subject matter, have been separated as a group from books in prose, which are grouped according to discipline (generally, prose entries indicate the language of the work only when it is not Arabic, the default language). Instead, the volumes in verse are catalogued together under the category of divans and versified books, in accordance with their language, namely, Arabic, Persian, or Turkish/Turkic (8 {7–19}, 9 {1–5}). An exception to this rule is versified works that are highly acclaimed (*ḡāyet mu'teber*) and considered fundamental to a particular discipline (*rükn-i fenn*). These works have been listed together with prose books in their corresponding discipline. If a versified book exists in several copies, most of these are listed under works in verse, with only a few copies incorporated under the associated discipline from which they might perchance be requested.

The linguistic classification of versified books by 'Atufi hints that they were regarded primarily as literary pieces. The large number of panegyric, *Shāhnāmah*-style versified histories in the inventory glorifying the exploits of Bayezid II, Mehmed II, and their ancestors demonstrates the cultural prestige of such works, which blur the boundaries between literature and history. The languages of these works testify to the trilingualism of the Ottoman court, which would diminish with the increasing Turkification of book culture from the late sixteenth century onward.⁹⁵ The literary genre of versified histories also began to be overshadowed around that time by histories written in flamboyant

Ottoman Turkish prose interpolated with Turkish, Arabic, and Persian quotations in verse.

The fifth rule established by 'Atufi is that each heading written on the opening page and binding flap of a book is to be recorded in the inventory by placing a linear mark (*butta*, a line drawn to distinguish separate names in a catalogue) in red ink above its beginning, and a red triple zero (*üç şifir*) at its end. An exception to this rule is double- or multi-volume works, which are cited in the inventory only once, under a single heading marked by these signs (9 {5–12}). The purpose of this convention is to visually distinguish individual items in the inventory, whether single- or multi-volume, so as to make them rapidly identifiable. Thus, the inventory facilitates searching by means of visual aids, which also include section headings for each of the twenty disciplines that are calligraphically differentiated by bolded majuscule letters in red ink. Furthermore, the separation of these sections and their subsections has been indicated with blank spaces.

These five “Rules of the Register” (*el-ḳavānīn el-defterīyye*) are followed by a brief section on “The Rule of the Book Repository” (*ḳanūn-i mahzen-i kütüb*) (9 {13–19}). Here, 'Atufi explains that the disciplines of separate sections (*tefāşil*, namely, the twenty subject categories I reconstructed above), which are enumerated in the inventory's table of contents (*fihrist*), must be written the same way (*bi-'aynihi*) on labels affixed to the top of the corresponding book repositories. Moreover, deluxe manuscripts (*nefāyis*) in each discipline are to be assigned a place (*mekān*) different from that of ordinary books (*gayr-i nefāyis*). Above these distinct spaces should be written “deluxe repository” (*nefāyis mahzeni*) or “non-deluxe” repository (*gayr-i nefāyis*). The stated purpose of this rule is to avoid mixing volumes belonging to these separate repositories when they are periodically taken out of the treasury and placed under sunlight to prevent mildew. Another striking rule is that, on those occasions, “Islamic books must be treated in accordance with religious decorum” (*kütüb-i İslāmiyye-nüñ ri'āyeti dīn ri'āyetine rāci'dür*).

Taking a step back, it is worth speculating about the intended purpose of the book inventory in light of the rules outlined by 'Atufi. His royal patron's insistence on writing book titles and their corresponding disciplines

in exactly the same way on the opening pages of books, on their binding flaps, and in the inventory is remarkable. Besides its epistemological concern with systematic classification according to fields of knowledge, this requirement reveals that the inventory was not only intended to catalogue the library holdings. It was also meant to facilitate locating specific works upon request, while at the same time contributing to efficiency and speediness in inspecting books during inventory checks. However, the absence of a total count of volumes in MS Török F. 59 suggests that periodic inventory counting was less of a concern than finding books upon demand.⁹⁶

Erünsal has pointed out that, by contrast, the catalogues of Ottoman public libraries describe the physical appearance of books in as much detail as possible, so as to “ensure that valuable copies were not replaced by inferior copies” by those who borrowed them. The prime concern in MS Török F. 59 is to emphasize “the finding of information as quickly as possible, and for this reason classification became important.”⁹⁷ I would like to add that the palace library was used not only by the sultan, his intimate entourage, and residents of the inner palace, but it also seems to have provided limited access to privileged courtiers and scholars. 'Atufi specifically mentions in his Turkish preface that he classified book headings with a view to the disciplines from which they were more likely to be requested (*istenmek ihtimālî eclinden / maṭlûb olunmasına ihtimāl / istene diyi ihtimāl*). Indeed, some interlinear and marginal emendations in the inventory are accompanied by annotations listing books that had been “demanded” (*maṭlab*), meaning that they had been checked out by the sultan or possibly other readers. Since these books include several technical medical treatises and lexicons, it seems likely that at least some of them were loaned to the chief court physician or other physicians.⁹⁸ Several books that were permanently given away as gifts by the sultan are indicated in the inventory with the Turkish expression “has been donated” (*'aṭā' olundu*).⁹⁹

That nonresident members of the court were permitted restricted access to the royal library's books is revealed by two late sixteenth-century Inner Treasury records, which list a fixed set of more than sixty-five medical books given to successive court physicians on

long-term loan.¹⁰⁰ While these books could have been used outside the palace, I find it more likely that they were stored at the Chief Physician's Tower (Hekimbaşı Kulesi), near the Privy Chamber where this officer presided over meals served to the sultans. This tower pavilion of the walled-in private garden extending in front of the third courtyard functioned as a royal pharmacy and office that was frequented by court physicians. Late sixteenth- and early seventeenth-century archival records list books from the Inner Treasury that were donated as gifts and loaned out to residents of the inner palace, including aghas, court astrologers (*müneccim*), the sultan, and royal women.¹⁰¹

The main purpose for the compilation of 'Atufi's inventory, then, was to facilitate locating requested books and to make the library more accessible by means of its subject catalogue, whose twenty disciplinary categories exactly matched those written on the labels of corresponding book repositories. Probably because generic titles and multi-text compendiums rendered alphabetization impractical, the individual books within the inventory's separate sections were not organized alphabetically. Moreover, the number of books was expected to fluctuate due to the deaccessioning of works as gifts and new acquisitions, for which blank spaces were left at the end of each section and subsection. Rather than following an alphabetical order, books grouped according to fields of knowledge were ordered with an eye to popularity and rarity. Those in greater demand were placed at the beginning of the inventory sections, which further aided the search for requested books and their proper storage after being returned.¹⁰²

This brings to mind an endowment deed dated 966 (1559) concerning the public library of one Bedreddin Mahmud in Kayseri, which has been summarized by Erünsal. The deed stipulates annual inventory checks in the month of Ramadan, the dusting of all books at that time, and their replacement in the book repository (*maḥzen*) according to the order indicated in the book catalogue (*fihrist*).¹⁰³ The Topkapı Palace library, too, had a topographical dimension with a direct correspondence between the sections of disciplines listed in its inventory and the labels placed on its book repositories. So did some of its medieval Islamic royal counterparts, whose holdings were more numerous. For instance,

the gigantic Fatimid palatine book treasury (*khizānat al-kutub*) in Cairo, which stored works in all domains of knowledge known at that time, had forty storage sections or *khizānas* (*khazā'in*, sing. *khizāna*), rooms or walk-in closets with built-in shelves, or cupboards recessed in walls. Each of these had locked doors from which was hung a list of contents identifying subject matter. The books were grouped in two sections, an outer and a less accessible inner one, with a reading bench reserved for the Fatimid caliph, who also borrowed books. The palace library of the Buyid ruler 'Adud al-Dawla (d. 983) in Shiraz was a hall with book repositories on both sides, each having a catalogue and shelves labeled according to subject matter, whereas books in the tenth-century Samanid royal library in Bukhara were stored in coffers.¹⁰⁴

Physical evidence for the book repositories and their attached labels at the Inner Treasury of the Topkapı Palace has entirely disappeared. The repositories were probably cupboards subdivided by shelves, and built-in wall niches or alcoves, accompanied by chests. I have confirmed that on the few remnants of tiny paper labels pasted on the bindings of books (along the outer face of the fore-edge section of their flaps) titles were written horizontally, to be legible when the volumes were stacked on top of one another in various repositories. These sticky labels lack call numbers, just as the inventory does not provide the total number of books. Many books in 'Atufi's inventory are listed in multiple copies, suggesting that they were not intended only for use by the sultans but also by denizens of the palace. The collecting of several copies of a single title also indicates attention to specific criteria of merit for particular volumes: degree of esteem among readers, rarity, variant text editions including autographs and those with unique marginal glosses or commentaries, translated versions, chains of ownership pedigree, materiality, calligraphic and aesthetic quality.

The curricular focus of the "palace school" for pages residing in the third courtyard of the Topkapı was on religious indoctrination, ethics, politics, literary skills, and some crafts (music, archery, hunting, sports such as wrestling, or other dignified activities depending on talent). The curriculum is described by Giovan Antonio Menavino, a twelve-year-old Genoese slave who

was presented to Bayezid II by the famous corsair and Ottoman navy admiral Kemal Reis. Menavino was educated for five years in the imperial palace, where he remained between 1504 and 1514. His description shows that palace tutors instructed the pages so that they would become loyal Muslims and learned warrior-statesmen, also possessing such virtues as erudition, polished speech, excellent gentlemanly manners, and honest morals. The youngest novices initially learned to speak, read, and (to a lesser degree) write Turkish, followed by reading the Qur'an along with books in Arabic and Persian under the guidance of teachers. Promoted to upper-grade dormitories, where they began to perform specific services for the sultan, older pages read more advanced books for pleasure. Those selected to reside as chamberlains in Bayezid II's Privy Chamber were required to be well-read (*ben literati*). Menavino specifies that among these pages were the sultan's three favorites, who had to be "handsome, graceful, good warriors, well-read, well-bred, and optimal speakers." The scholar-diplomat Guillaume Postel, who accompanied a French embassy in 1536–37, reports that Sultan Süleyman frequently visited the place in his palace where the royal pages studied (*du costé ou ils estudiant*).¹⁰⁵ He adds that Süleyman, who read interpretations of the religious law but more often works by Aristotle or Averroes (Ibn Rushd, d. 1198) in Arabic, occasionally inquired about the opinions of elderly palace tutors (*vieux Hogealar ou docteurs*) who were employed to instruct the pages in Islamic law.

It can therefore be surmised that the library books were partly intended for the education of pages, princes, chancery trainees, and polyglot scribes. The latter had traditionally conducted diplomatic correspondence in Greek, Latin, Serbian, Arabic, Persian, Uyghur, and Ottoman Turkish, but by the mid-1520s Sultan Süleyman instituted a monolingual practice that restricted the language of official documents produced in the central chancellery to Ottoman Turkish (except for Arabic and Persian in some cases).¹⁰⁶ The educational aims of the "palace school" within the residential third courtyard of the Topkapı Palace must have contributed to the encyclopedic scope of the royal library, given the close connection between the position of the librarian and the two tutors of pages in Bayezid II's undated wage register,

cited earlier in relation to the career of 'Atufi, who left the palace service in 1504. According to Menavino (1504–14), the "palace school" (*schola del Serraglio*) had four tutors (no longer two), who taught 80 to 100 newly arrived youngsters in "the dormitory called New Chamber" (*casa chiamata Lengioda*). Bayezid II is known to have increased the number of palace tutors and books, founding this new dormitory in the third courtyard of the Topkapı Palace, called Yeni Oda (New Chamber) or Küçük Oda (Small Chamber), as a preparatory school for higher-grade dormitories. The sultan also established another preparatory school for the youngest pages at the Galata Palace.¹⁰⁷ The dormitories of pages at the Topkapı featured some endowed book collections of their own, which are presently catalogued in the palace library under the denomination "Koğuşlar" (Dormitories).¹⁰⁸

Rare manuscripts belonging to the Inner Treasury collection were likely permitted to be copied for the public libraries of madrasas and the private libraries of prominent scholars or statesmen upon request. It has been proposed, for example, that the aforesaid scholar-statesman Mü'eyyedzade, who was Bayezid II's former boon companion as a prince, may have been allowed access to the palace library.¹⁰⁹ Likewise, the undated petition of an anonymous royal astronomer-astrologer to access some items in Bayezid II's treasury (*khizāna*) has been cited as evidence for the possibility of special consultations of its contents: in this case, an astrolabe and two astronomical books, along with the horoscopes of the sultan and his two sons, Princes Ahmed and Korkud. Intending to use these items in his own calculations, the petitioner apparently had insider information about the contents of the Inner Treasury, which included not only the specific books he requested, but also astrolabes. In fact, an astrolabe dated 1505–6 and signed by an astronomer called "al-Ahmar al-Nujumi al-Rumi" has an inscription that echoes the dedications of manuscripts produced by order of Bayezid II's treasury. It reads: *li-rasm khizānati al-sultān al-a'zam al-sultān ibn al-sultān sultān Bāyezīd ibn Meḥemmed Khān -khal-lada mulkahu* (By order of the treasury of the Greatest Sultan, the Sultan Son of the Sultan, Sultan Bayezid son of Mehmed Khan—may his sovereignty be everlasting).¹¹⁰

Like court physicians, then, royal astronomer-astrologers who were privy to Bayezid II's secrets as confidants appear to have been among the privileged users of the imperial library. The implication is that deluxe manuscripts may also have been accessible to the staff of the court scriptorium (*naḳḳāṣḥāne*) and to royal book scribes (*kātibān-i kütüb*) on occasion. Indeed, Bayezid II is rumored to have had calligraphy specimens of the celebrated Yaqut al-Musta'simi (d. 1298) taken out from the palace library so that his favorite court scribe and calligraphy tutor, Shaykh Hamdullah (d. 1520), could study them closely in order to improve upon these admired models. After a period of spiritual seclusion, Hamdullah miraculously accomplished the challenging feat and codified the Ottoman versions of the six canonical scripts. Loose-leaf representational images and calligraphic scrolls are listed in the Inner Treasury registers discussed earlier. A few entries in 'Atufi's inventory also refer to bound albums. One example is the aforementioned Timurid calligraphy album produced in Herat during Shahrukh's reign, whose dated specimens span the years 1267 to 1434 (Appendix III: 40, Pl. 17 [1–2]). Since it includes a substantial series of works by Yaqut and his students, this splendid album was almost certainly among the Inner Treasury items Bayezid II loaned to Shaykh Hamdullah for study purposes.¹¹¹ A comparable competitive streak in Bayezid's artistic patronage can be detected in the report that he ordered the Ottoman statesman-poet Veliyüddinzade Ahmed Pasha to compose poetic replies (*naẓīres*) to each of the ghazals the Timurid statesman-poet Mir 'Ali-Shir Nava'i (d. 1501) had sent as gifts to the sultan from Herat.¹¹²

As a calligrapher tutored by the Amasya-born Shaykh Hamdullah, who belonged to the Khalwati Sufi order, Bayezid II was sensitively attuned to the aesthetic properties of calligraphy. Therefore, despite its parsimonious entries, MS Török F. 59 identifies several Qur'ans, prayer books, and divans as having been written in the hand of Yaqut (12 {13}, 15 {16}, 17 {18}, 46 {8}, 204 {13–14}, 207 {2–3}, 213 {7–8}, 286 {13}) and Shakyh Hamdullah (known as Ibn al-Shaykh; 12 {15–16}). Some prayer books and volumes or sections of the Qur'an are specified as having "exquisite writing" (*bi-khaṭṭin nafisin*) (14 {8–9}, 15 {6, 10, 12, 13}, 47 {8, 12}), one of these being a Qur'an

"transcribed to be recited by the Sultan [Bayezid II] (*ḳutiba li-tilāwati al-Sultān*) (15 {10}).¹¹³

The special status accorded to deluxe manuscripts penned by celebrated calligraphers shows that aesthetic concerns were important, even though they are overshadowed by subject matter in the classification system of the library inventory. Books commissioned by Mehmed II and Bayezid II from the court scriptorium differ visually from non-Ottoman manuscripts. The latter were unified with Ottoman court productions to some degree by the addition of new bindings, illuminated frontispieces, and headings. Variations in the aesthetic qualities of manuscripts, their paper type, relative size, and bindings provided visual clues about the stratified ranking of books, with luxury volumes (*nefāyis*) stored in separate repositories standing out from the rest.

With their lavish bindings, the illuminated and illustrated manuscripts of the palace library attest to the value attached to aesthetic quality in the production of new deluxe manuscripts and the refurbishment of old ones. However, the only manuscripts described in some detail by 'Atufi are the Qur'ans, which occupy a place of honor at the very beginning of his inventory. Unlike other manuscripts, they are listed with reference to paper type, paper size, and calligrapher. One of these is even identified as a gift from the ruler of Egypt (15 {19}); this may have been the exquisitely illuminated, undated Qur'an dedicated to Sultan Qa'itbay (Qaytbay, r. 1468–96) that once belonged to the Topkapı Palace collection.¹¹⁴ If so, it might have been sent with a gift-bearing embassy of Qa'itbay that was received in 1485 by Bayezid II in Edirne, a mission that did not succeed in preventing the protracted Ottoman-Mamluk war that broke out soon thereafter (1485–91).¹¹⁵ Alternatively, it is possible that the Qur'an arrived with one of several later Mamluk embassies received between 1490 and the completion of the library inventory.¹¹⁶

Dating the Inventory and Codicological Examination of Manuscripts

My aim in this section is to contextualize the inventory and to establish a repeatable methodology for codicologically identifying extant manuscripts that belonged to the palace library at the time 'Atufi catalogued its holdings. Examining volumes stamped with Bayezid II's

seal in conjunction with corresponding entries in the inventory provides tantalizing clues to manuscript connoisseurs with a taste for detective work. Apart from its addictive potential, such a codicological exercise can yield unexpected revelations about the expansive vistas and striking exclusions of the palace library collection, which was dominated by post-Mongol manuscripts from the eastern Islamic lands.

The brief Arabic preface of MS Török F. 59 corroborates Bayezid II's agency in shaping the conceptual framework of the palace library inventory. This document bears witness to a systematic reorganization and itemized classification of books in the Inner Treasury, whose collection of objects had been recatalogued a year earlier, in 907 (1502). Shortly thereafter, the sultan commissioned two multivolume dynastic histories, culminating in his own reign, from the scholars İdris Bidlisi and Kemalpaşazade (Ibn Kemal), which were written in Persian and Ottoman Turkish, respectively. The former work was completed in 911 (1506), and the latter in 916 (1510); therefore, they are missing from MS Török F. 59.¹¹⁷ These histories celebrated the consolidation of Bayezid II's imperial rule after the elimination of the rival contender to the throne, Prince Cem (d. 1495), and the victorious conclusion of an Ottoman-Venetian naval war (1499–1503). It was in the same context of confidence that Bayezid commissioned the library inventory.

The multilingual Bidlisi, who had formerly served as secretary (*munshī*) to the last Aqqoyunlu Turkmen rulers, wrote mostly in Persian but also in Arabic and Turkish. He joined Bayezid's court shortly after the Aqqoyunlu capital Tabriz fell in 1501 to the Safavid ruler Shah Isma'īl I (r. 1501–24). Leaving Tabriz around 1502, he dedicated three early works to Bayezid II just before MS Török F. 59 was completed. The palace library inventory lists only these three books, which Bidlisi presented to the sultan in 1503, prior to being commissioned to write his multivolume Ottoman dynastic history around 1504 (22 {12–13}, 144 {4–5}, 194 {13–14}). Like Mü'eyyeddade, the aforementioned scholar-statesman of Bayezid II's court, Bidlisi had studied in Shiraz with Dawani. Two of the latter's works in Persian are featured in the palace library inventory: six copies of Dawani's world-famous manual on ethics (114 {2–7}) dedicated to the Aqqoyunlu ruler Uzun Hasan (r. 1453–78), and a

work of advice (146 {18–19}) specifically made for Bayezid II's "imperial book treasury" (*khizāna-yi 'āmira-yi kutub-i sulṭānī*). It is known that Dawani dedicated works to this sultan, who in turn offered him gifts and corresponded with him via letters, some of which have survived. Several students of Dawani were invited by Mü'eyyeddade to Istanbul, where they benefited from this influential statesman's patronage.¹¹⁸

The cultural horizons of the Ottoman palace library expanded with the migration of books, scholars, poets, painters, calligraphers, and binders from the Timurid, Turkmen, Mamluk, and other courts throughout the fifteenth and early sixteenth century. For instance, Mehmed II's 1473 victory over the Aqqoyunlu ruler Uzun Hasan resulted in an inflow of scholars, artisans, and probably manuscripts from the latter's seized "armory, treasury, and other belongings" (*cebeḥānesi ve ḥazīnesi ve bākī esbābı*), along with his secretary (*munshī*), Sayyid Muhammad of Shiraz.¹¹⁹ Shortly thereafter, in 1475, the Aqqoyunlu prince Ughurlu Muhammad Mirza (d. 1477), to whom Mehmed II gave his daughter in marriage, most likely brought personal treasures and books with him when he sought political asylum at the Ottoman court. Ughurlu Muhammad Mirza's son born from that marriage, Göde (Short) Ahmed Beg, married a daughter of Bayezid II and occupied the Aqqoyunlu throne in Tabriz during his brief reign in 1497. İdris Bidlisi had served as secretary (*munshī*) to this son-in-law and nephew of Bayezid II in Tabriz before joining the court of the Ottoman sultan.

I find it significant that 'Atufi's book inventory was prepared prior to the further expansion of the Ottoman palace library collection under Selim I, whose victories in Safavid Iran (1514) and Mamluk Syria-Egypt (1516–17) triggered an additional influx of books.¹²⁰ These new books were complemented by rare volumes acquired from Ottoman private libraries belonging to deceased scholars (such as Mü'eyyeddade), as well as Selim I's executed brothers, Princes Korkud and Ahmed. Like his predecessors, Selim I was an ardent bibliophile. According to one of his intimates, this sultan's gaze was rarely separated from books, as he harbored an interest neither in women nor in sleep. After his accession to the throne in 1512, he surveyed "all the exquisite books kept in the Imperial Treasury (*ḥizāne-i 'āmire*), casting a

quick glance on each, one by one, from beginning to end.”¹²¹

The book inventory commissioned by Bayezid II demonstrates that, long before Selim I's conquests, a considerable collection of Arabic, Persian, Ottoman Turkish, and Turkic (mostly Chaghatay, with some Qipchaq and Tatar) manuscripts had already been assembled at the Inner Treasury. These works were acquired through diverse channels, ranging from inheritance, gifts, and commissions to purchase and booty. Some of them were likely brought by rulers, princes, nobles, scholars, calligraphers, and artists who had immigrated to the Ottoman lands. ‘Atufi’s inventory reveals that in addition to their patronage of manuscripts produced in their own court scriptorium, the Ottoman sultans were prodigious book collectors. This predilection, which was also shared by the ruling elites, eventually turned Istanbul into the foremost international market for books in the Middle East. Books plundered during periods of upheaval in Iran and Central Asia often flowed to the Ottoman capital, where they would be clandestinely sold. A telling episode shows how a rare manuscript that had been brought to Istanbul and purchased for Mehmed II’s imperial treasury (*hāzīne-i ‘āmiri*) was eventually returned to ‘Ali-Shir Nava’i in Herat in 1485, when it was revealed in the Bursa shari‘a court to have been stolen from the endowed manuscripts of the Timurid ruler Shahrukh Mirza.¹²²

As noted earlier, the date ‘Atufi provides in his Arabic preface, 908 (1502–3), differs from that of the two Arabic chronograms on the first page of the inventory, which give the completion date as 909 (1503–4). This time lag is consistent with the explicit reference on that page to the inventory’s transcription from a rough draft into a clean copy (1 {8–9}), after which time supplementary annotations and corrections appear to have been added. A note written in two lines of smaller *naskh* script in the same hand, inserted by ‘Atufi at the lower right corner of this first page, reads: “It [presumably the double chronogram] was composed and written by the lowly author of this honorable register” (*‘ansha’ahū wa-ḥarrarahū al-ḥaqīru mu‘allifu hādihā al-daftari al-khaṭīri*, 1 {19–20}). However, the inventory itself was apparently transcribed in a different hand than that of its author, ‘Atufi, as is implied by an interlinear note added to the Arabic

preface in smaller *naskh* script (12 {10}). It specifies that “this lowly slave [and he is the author of this register, not its transcriber]” (*al-‘abdu al-ḥaqīru [wa-huwa mu‘allifu al-daftari lā kātibuhu]*), obeyed the sultan’s command and finished the inventory in 908 (1502–3). The note also confirms that ‘Atufi worked with one or more assistants who were scribes (*kātib*). Indeed, two scribes were assigned to İdris Bidlisi for transcribing clean copies of his drafts between 1504 and 1506, when he was writing his multivolume Ottoman dynastic history in Persian commissioned by Bayezid II.¹²³

Another revealing entry I noticed in the inventory indicates that Bayezid II’s famous chancellor Tacizade Ca’fer Çelebi had passed away, by the addition of the pious phrase “may God’s mercy be upon him” next to his name. This is perplexing because Tacizade was executed by Selim I in 1515, long after ‘Atufi had compiled the book inventory. The entry refers to Tacizade as the deceased translator of a history book on the kings of ancient Persia: *Tarjamatu Kitābi al-mu‘jami bi-al-turkiyyati li-Tāj-zādah -raḥimahu Allāhu ta‘ālā fi al-tawārikhi* (Translation of *Kitāb al-Mu‘jam* into Turkish by the late Tacizade—May God Bless His Soul—on History, 185 {5}). The full title and author of this work are not specified, but Fehmi Karatay’s catalogue of Turkish manuscripts kept at the Topkapı Palace Museum library identifies the extant volume as an abridged translation of Sharaf al-Din Fadl Allah al-Qazwini’s (d. 1329) *Kitāb al-mu‘jam fi āthār mulūk al-‘ajam* (Book of the Alphabetically Arranged Deeds by the [Ancient] Kings of Persia), which had been translated by order of Bayezid II, as indicated in the manuscript’s dedication medallion (fol. 1a). Since Qazwini’s history in Persian was translated into Turkish by Sarıca Kemal (d. after 1489), the inventory’s entry may have misidentified the translator, unless Tacizade had retranslated it.¹²⁴

The title listed in ‘Atufi’s inventory is repeated verbatim, including the pious phrase at the end, above the manuscript’s opening page (fol. 1a) and on the authentic rectangular paper label pasted on the flap of its binding (Appendix III: 44, Pl. 21 [1–4]). This suggests that the volume must have been catalogued after Tacizade’s death in 1515. The entry nevertheless concerns a book dedicated to Bayezid II that is stamped at the beginning and end (fols. 1a, 132a) with his seal, which could not

have been used after the sultan's death in 1512. It can be hypothesized, then, that the volume had been stamped with Bayezid's seal during his reign, but it was not included in 'Atufi's inventory for some reason. Curiously, the volume's flyleaf has a shorter title written above it, without the name of Tacizade or the pious phrase showing that he had died (Appendix III: 44, Pl. 21 [2]): *Tarjumah-i Tārīkh-i mu'jam bi-al-turkiyya* (Translation of *Tārīkh-i mu'jam* into Turkish). A variant title written under this flyleaf title in an elegant monumental cursive script mentions Tacizade, but it does not refer to his death: *Mukhtaṣar-i Tārīkh-i Waṣṣāf-i Turkī, tarjuma-i Tāj-zāda* (Abridgement of Wassaf's History in Turkish, translated by Tacizade). However, as noted above, Karatay identifies the author of the Persian text as Qazwini, rather than Wassaf.

Closer scrutiny of the two-line title on fol. 1a referring to Tacizade's death indicates that an earlier title under it was carefully erased. At the end of the first line, the barely legible last word of the erased former title reads *Waṣṣāf*, an error that was corrected and replaced with the new title that also appears in the inventory. Hence, the two variant titles on the flyleaf were in all likelihood written earlier than the one on fol. 1a and on the sticky label of the binding. This last version, matching verbatim the entry in the inventory, omits the author's name and identifies the translator as Tacizade (though whether or not this was a misidentification requires further research).

While the puzzling entry appears to be indistinguishable from the rest of the inventory, it may well have been added to the clean copy of 'Atufi's inventory (completed in 1503–4) by a scribe in a similar *naskh* script after Tacizade's death in 1515, when the previously overlooked volume was perhaps catalogued. Indeed, this entry comes at the very end of a subsection of the inventory followed by blank lines, where it was probably inserted because the book had been translated for Bayezid II, dedicated to him, and stamped twice with his seal. Such empty spaces in the inventory not only divide the subject groupings of the book collection into subsections, but also anticipate the library's future growth. These spaces indicate that the inventory's contents were intended to be updated by adding new items, but only

a few add-ons in a different *ta'liq* hand are identifiable at the end of several subsections.¹²⁵

Other perplexing entries that may be spotted by researchers in the future will require a more detailed examination of 'Atufi's inventory and the corresponding extant manuscripts.¹²⁶ Although the Tacizade entry raises the possibility that another clean copy of the inventory could have been made during Selim I's sultanate, perhaps due to wear and tear of the original over the course of about a decade, this seems quite unlikely. The contents of 'Atufi's inventory do not appear to have been changed significantly, except for minor updates and emendations. Such an inference is supported by the fact that none of the Ottoman dynastic chronicles written after the inventory's preparation, including those by Kemalpaşazade and İdris Bidlisi mentioned earlier, are listed in MS Török F. 59. Nor do we find any reference whatsoever to the names of later sultans who succeeded Bayezid II. The Inner Treasury's book collection no doubt continued to grow during the last decade of Bayezid's reign, after the completion of the library inventory. Some of the new acquisitions were presented to the sultan as gifts, in return for which he bestowed awards that are recorded in the aforesaid *În'âmât Defteri* (Register of Rewards) covering the period between 909 (1503–4) and 917 (1512), starting with the year 'Atufi finished the clean copy of the library inventory.¹²⁷ However, the sample of books I examined at the Topkapı library reveals that works written after 1503–4, which are included in Zeynep Atbaş's list of extant volumes stamped with Bayezid II's seal (Appendix I), are consistently missing from 'Atufi's inventory (see my Appendix III).

Various annotations added to the only surviving clean copy of MS Török F. 59 attest to the practical aspect of this somewhat fluid document, which was meant to serve successive librarians as a functional tool for recording newly acquired, given away, and checked out volumes of the royal library. Nevertheless, the extant copy of 'Atufi's inventory does not appear to have been used extensively, judging by its nearly pristine condition. This suggests that separate documents were subsequently deployed to record the lending and gifting of the royal library's holdings after 'Atufi left his post as librarian in 1504. Additional acquisitions were probably

recorded in specific registers of sub-collections annexed to the original core collection catalogued by 'Atufi. That these sub-collections were likely kept in their own individual cupboards is implied by a register at the palace archives, which records some books that had been checked out from the Inner Treasury by Murad III. Volumes handed over to him in 1588–89 via one of the Privy Chamber dwarfs included “an anthology from the cupboard of books that came with the felicitous sultan,” that is, from the provincial capital Manisa where Murad III had resided as a prince. A second anthology he requested at that time was “from the cupboard of books that came with the late Sultan Selim [II] from the princely province [i.e., Manisa].” This register shows that some special new collections were kept intact in designated cupboards. The same register lists a Qur'an given by a different dwarf “to be read by the junior lady” (*küçük hānum*) in Ramadan 1589.¹²⁸

That women of the imperial harem had access to Inner Treasury books is also confirmed by an earlier register dated 1557–58, which refers to a copy of the *'Antar-nāma* (The Romance of 'Antar) in three volumes loaned to the “senior lady” (*büyük hānum*).¹²⁹ Six multivolume Arabic and Turkish copies of this chivalric romance by 'Antar ibn Shaddad, the heroic pre-Islamic Arab warrior-poet and adamant lover of 'Abla, are listed in the palace library inventory (188 {3–7}). Of these, only one comprises a set of three deluxe volumes in Turkish, which must be the copy borrowed by that senior lady: *Kitābun fākhīrun fī Qışsati 'Antar bi-al-turkiyyati fī thālātha mujalladātin* (A Luxurious Book on the Story of 'Antar in Turkish in three volumes, 188 {6–7}).

It is rather disappointing for the art historian that 'Atufi's inventory only identifies ten books as illustrated (*muṣawwar*). These are a compendium of hadith on the Prophet's Ascension (*Mi'rājnāmah*), a Book of Solomon (*Sulāymānnāmah*), two copies of Ibn al-Muqaffa's (d. 756?) mirror for princes called *Kalīla wa Dimna*, an unnamed history in Persian, a book pertaining to rulership, a treatise in Persian on Falconry (*Bāznāmah*), a Persian Book of Kings (*Shāhnāmah*), a Persian mathnawī by 'Assar Tabrizi (d. ca. 1390) titled *Mihr u Mushtarī* (Sun and Jupiter), and an *Automata* of Badi' al-Zaman Abu al-'Izz Isma'il b. al-Razzaz al-Jazari (fl. twelfth century). Through codicological examination I have only been

able to identify one of these volumes with certainty and can suggest possible candidates for some of the others:

1) *Kitābu aḥādītha fī al-mi'rāji muṣawwarun*, 39 {15}, listed among books on hadith: Possibly a Chaghatay Turkic *Mi'rājnāma* in Uyghur script produced in Timurid Herat in 1436–37, which features paintings identified by marginal annotations in Ottoman Turkish and Arabic, although it is not stamped with Bayezid II's seal. It lacks its opening page with assigned title, as well as the sticky label of its binding (Bibliothèque nationale de France, Paris, Supplément Turc 190).¹³⁰

2) *Sulāymānnāmah al-muṣawwaru fī al-tawārīkhi*, 178 {5}, listed among books on history: Perhaps Uzun Firdevsi's incomplete Turkish *Süleymānnāme*, dated 1490 and dedicated to Bayezid II, though not stamped with his seal. The pages with seal impressions may have been removed when the manuscript received its new binding, at which time all pages were cropped to fit the binding (Dublin, Chester Beatty Library, T. 406).¹³¹

3) *Kitābu Kalīla wa-Dimna al-muṣawwaru fī al-tawārīkhi*, 189 {10}, listed among books on history, presumably in Arabic.

4) *Kitābu Kalīla wa-Dimna al-muṣawwaru bi-al-fārisiyyati fī al-tawārīkhi*, 189 {11–12}, listed among books on history: Probably not the Persian copy made in Timurid Herat and dedicated to Prince Baysunghur in 1429 (TSMK, R. 1022). Stamped with Bayezid II's seal (on fols. 1a and 146b), it lacks a sticky label on its binding, and the abbreviated title above its opening page comes close to, but does not exactly match, the entry in 'Atufi's inventory. This Timurid manuscript's variant title *Kitābu Kalīla wa-Dimna fī al-tawārīkhi* omits the phrase *al-muṣawwaru bi-al-fārisiyyati*. Therefore, this is more likely one of the five other manuscripts listed in the inventory, which lack references to illustrations and have exactly the same title (189 {7–8, 11}).¹³²

5) *Kitābu tawārīkha muṣawwarun bi-al-fārisiyyati*, 191 {5}, listed among books on history.

6) *Kitābu farā'idī al-sulūki al-muṣawwaru fī umūri al-salṭanatī*, 197 {4}, listed among books on rulership.¹³³

7) *Kitābu bāznāmah muṣawwarun bi-al-fārisiyyati, min qibali umūri al-riyāsati*, 199 {18}, listed among books pertaining to rulership.

8) *Kitāb-i shāhnāmah-i muṣawwar*, 240 {9}, listed among Persian divans and versified books: Probably not the *Shāhnāmah* of Firdawsi, dated 895 (1490) and made in Aqqo-yunlu Shiraz, which is stamped with Bayezid II's seal on

fols. 1a and 584a (Istanbul University Library, F. 1407). The title on its opening page, *Kitāb shāhnāmāh*, differs from the one assigned by ‘Atufi, which ends with the word *muṣawwar*. Besides, it lacks a sticky label on its original leather binding embossed with a longer title identifying the author.¹³⁴

9) *Kitāb-i Mīhr u Mushtarī muṣawwarun*, 251 {17}, listed among Persian divans and versified books: Probably not the copy of this work by ‘Assar Tabrizi made in Aqqoyunlu Shiraz in 1482, which is dedicated to Bayezid II and stamped with his seal on fols. 1a and 191b. It lacks a title assigned by ‘Atufi on its opening page and has no sticky label on its binding (TSMK, A. 3563). Perhaps the manuscript listed in the inventory is the illustrated copy at the Süleymaniye Library (Fatih 4130), dated Dhu’l Hijja 894 (November–October 1489), which lacks its opening pages that would have been inscribed by ‘Atufi, but it is stamped with Bayezid II’s seal at the end (fol. 221a).¹³⁵

10) *Kitābun muṣawwarun li-l-Ra’īs al-Jazarī fī al-sanā’i’i al-‘ajībatī wa-al-ḥiyālī*, 310 {11–12}, listed among books on wondrous mechanical arts/automata and engineering feats: Confidently identifiable as TSMK, H. 414, whose slightly cropped title above fol. 1a exactly matches the entry in the inventory. Under the cropped title is written a variant title with the same words in a different order: *Kitābun li-l-Ra’īs al-Jazarī al-muṣawwarun fī al-sanā’i’i al-‘ajībatī wa-al-ḥiyālī*. This volume is stamped with Bayezid II’s seal on fols. 1a and 174a, but it no longer preserves a sticky label on its binding. Another illustrated copy of al-Jazarī’s work (TSMK, A. 3472) produced at Diyarbakır in 602 (1205–6) is also stamped with Bayezid II’s seal (fols. 1a, 179a), but its title lists the author’s name differently without mentioning illustrations: *Kitābu Abī al-‘Izz al-Jazarī fī al-umūri al-‘ajībatī wa-al-ḥiyālī* (fol. 1a). This variant title corresponds verbatim to that of another volume listed in ‘Atufi’s inventory (201 {16}), whose abbreviated title on the renewed sticky label of its binding is *Kitābu al-ḥiyālī li-Abī al-‘Izz*.¹³⁶

To these ten manuscripts specified as “illustrated” in the inventory, one can add a few other entries alluding to anthologies with painted images that have yet to be identified. One of these is an oversize album referred to as *Kitābun kabīrun fī awwalihi qaṣā’idu wa-fīhi taṣāwīru kathīratun ‘ajībatun* (A Large Book with Qasidas in the Beginning and Containing Many Wondrous Figural Representations, 257 {5–6}). Another anthology is described as *Kitābun fīhi da‘awātun wa-ash‘ārun wa-Qaṣīdatu Burda wa-Rasā’ilu wa-taṣāwīru gharībatun bi-al-tadhhībī* (A Book with Prayers, Poems, a Qasida Burda, Epistles, and Curious Figural Representations

with Illuminations, 255 {19}, 256 {1}). In a few instances drawings are mentioned within the title, as in *Kitābun fī nuqūshi al-ahjāri wa-manāfi’ihā* (A Book with Drawings of Stones and Their Benefits), 201 {13–14}; *Ṣuwaru ālāti al-ḥarbi* (Figures of War Machines, 196 {6}); and in geography books illustrated with maps (*ṣuwar*, *taṣwīr*, *ashkāl*) such as those of al-Istakhri (d. 957) and Ptolemy, 202 {10–14}, 203 {4–9}.

There is generally a perfect or near-perfect match between titles in ‘Atufi’s inventory and those written on the opening pages and binding flaps of extant manuscripts. Therefore, the librarian’s omission of systematic references to illustrations in book titles may have been partly conditioned by his practical concern for abbreviation. This omission also hints at the secondary status of illustrations with respect to subject matter, which constituted the main focus of ‘Atufi’s classificatory system. Physical examination of manuscripts reveals that many more illustrated books were included in the inventory—particularly in the sciences, literature, and history—that have not been identified as such in ‘Atufi’s entries.¹³⁷

Extant illustrated books stamped with Bayezid II’s seal that are listed in the inventory without reference to their illustrations include Rashid al-Din Fadl Allah al-Hamadhani’s (d. 1318) *Tansūkhnāmāh-i İlkhān* (Treasure Book of the Ilkhan), an Ilkhanid treatise on Chinese medicine copied in 1313;¹³⁸ the early thirteenth-century manuscript of Ayyuqi’s romance of *Warqa wa-Gulshāh*;¹³⁹ the Arabic translation of Dioscorides’s *De Materia Medica* (On Medical Materials) dated 1228;¹⁴⁰ and the late thirteenth-century Pierpont Morgan library copy of Ibn Bakhtishu’s “Book of Benefits of Animals” in Persian.¹⁴¹ Another renowned illustrated manuscript stamped with Bayezid II’s seal is the Freer Gallery copy of the divan of Sultan Ahmad Jalayir (d. 1410), who had sought refuge from Timur’s siege of Baghdad at the Ottoman sultan Bayezid I’s (d. 1403) court. Its lavishly illuminated second version is at the Turkish and Islamic Art Museum in Istanbul. Both manuscripts were probably among the three copies with identical titles, listed as *Dīwān-i Sulṭān Aḥmad* in the library inventory.¹⁴² Whether we can presume that the acquisition of these volumes and others could go back that far is an open question.

Besides such celebrated manuscripts, the inventory lists a surgical atlas in Turkish without mention of its illustrations: a copy of the *Cerrāhiyye-i Hāniyye* (The Ilkhanid Surgery Book) dedicated to Mehmed II in 870 (1465–66). Its author, Şerefeddin Sabuncuoğlu (d. after 1468), was a physician-surgeon practicing at the Amasya hospital built in 1308 during the Ilkhanid period.¹⁴³ Another volume whose illustrations are not cited by ‘Atufi is an anonymous Arabic treatise on hydraulic automata (pneumatics), attributed to the Banu Musa brothers of ninth-century Baghdad, titled *Kitābun fi al-ḥiyali wa-al-umūri al-‘ajibati fi ‘amali ālāti al-mā’i* (A Book on Mechanics and Wondrous Matters in the Practice of Hydraulic Machines). Illustrated with some figural images whose faces have been deliberately effaced, this manuscript copy, probably from the fourteenth century, bears seal impressions of Bayezid II (Appendix III: 35, Pl. 14 [1–2]).¹⁴⁴

An additional illustrated manuscript to which Bayezid II’s librarian assigned a title with no mention of its paintings is a versified history in Persian, covering the early years of this sultan’s reign from 1481 up to 1485 (figs. 12a–f). In the manuscript’s illuminated heading on fol. 2b the work is identified by its author, whose pen name was formerly thought to be *Ummī*, as *Shāhnāmāh az guftār-i Malik-i Āhī* (A *Shāhnāmāh* Recounted by Malik Ahi, figs. 12b, 12c). Stamped with Bayezid II’s seal on its first and last pages (figs. 12a, 12d), the manuscript preserves the original rectangular sticky label pasted along the fore-edge of the flap of its binding that reads, *Naẓmu Qiṣṣah-i Sulṭān Bāyezīd Khān -khalāda Allāhu ta‘ālā khilāfatahu* (Versified Story of Sultan Bayezid Khan, May God Make His Caliphate Everlasting, figs. 12e, 12f). The same title appears in ‘Atufi’s inventory under the section on Persian divans and versified books (249 {19}, Appendix III: 48). Differing from the title specified by the author Ahi, the one given by ‘Atufi is repeated above the manuscript’s opening page (fol. 1a) except for the pious phrase at the end, which is omitted: *Naẓmu Qiṣṣah-i Sulṭān Bāyezīd Khān* (fig. 12a). The *Shāhnāmāh* of Ahi dedicated to Bayezid II (on fols. 13b and 97a–98b) must therefore have entered the imperial library collection before or around the time ‘Atufi prepared the inventory. Hence, one can discount a later date for this

manuscript’s production in favor of the years between ca. 1486 and 1503–4.¹⁴⁵

Sara Nur Yıldız has identified another version of this *Shāhnāmāh* (Cambridge University Library, Or. 196, fols. 2a–105b), which is the same work except that its introduction is slightly different, and its colophon provides the completion date of 891 (1486), which is missing from the undated Topkapı version. The author of the Cambridge manuscript, which lacks seal impressions of Bayezid II and an authentic sticky label on its binding, identifies himself as *Āhī* (fol. 3a, line 1) and calls his work a *Shāhnāmāh* in the colophon (fol. 104b). While its calligraphy and binding seem original, the spaces that are reserved in it for illustrations were apparently filled later with paintings in a Qajar-like style. Interestingly, an incomplete draft of the same work with deleted lines, interpolations, and spaces reserved in it for illustrations marked as *maḥall-i taṣvīr*, has been identified by Zeren Tanındı in the Süleymaniye Library (Fatih 4092, fols. 53b–140a). Tanındı points out that the author, named Malik-zadah Mahmud, was an émigré from Herat who first joined Prince Bayezid’s court in Amasya and then moved with him to Istanbul.¹⁴⁶ This undated early draft, once again referring to the author’s pen name as *Āhī* (fol. 54b), is a close variant that deserves to be studied in relation to the two later versions of the same work.¹⁴⁷ Darwish Mahmud bin ‘Abdullah Naqqash, who signed the colophon of the somewhat humble Topkapı manuscript, has convincingly been identified as both its scribe and painter (fol. 98b, fig. 12d). He had formerly worked at the court scriptorium of the Aqqoyunlu ruler Ya‘qub Beg (r. 1478–90) in Tabriz, due to which his Persianate painting style differs from the Europeanizing manner of his Ottoman colleagues.

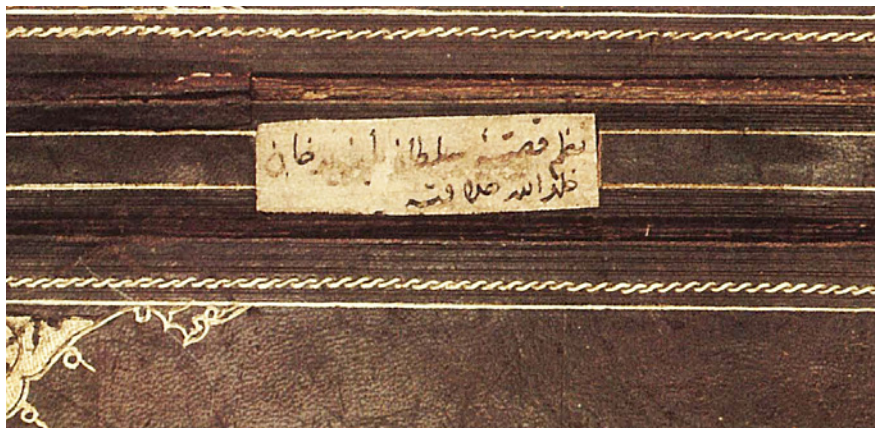

The rectangular sticky label on the binding of the Topkapı *Shāhnāmāh* is authentic, judging by its old paper and miniscule *naskh* script (figs. 12e, 12f). Several other manuscripts with titles matching those of ‘Atufi’s inventory feature similar original rectangular labels on their binding flaps, written in tiny script (Appendix III: Pl. 1 [3], 2 [2], 6 [2], 9 [3], 18 [3], 20 [3], 21 [4], 22 [3], 23 [3]). Unfortunately, some volumes cited in the inventory no longer preserve their opening and last pages with seals, or their original bindings. Moreover, not all of the somewhat crude sticky labels of cut paper on ex-

Figs. 12a–f. Istanbul TSMK, H. 1123, Persian *Shāhnāmah* of Bayezid II by Malik-i Ahi. [12a] Opening page (fol. 1a) with the title assigned by 'Atufi and Bayezid II's almond-shaped seal. [12b] Illuminated headpiece with the author's original title (fol. 2b). [12c] Page with the author's pen name *Āhī* spelled in the first line, and Ahmed III's almond-shaped seal (fol. 3a). [12d] Final page (fol. 98b) with Bayezid II's seal and colophon signed by the painter-calligrapher.

e

tant bindings have survived. Nor do the remaining labels have the same type of paper, shape, and handwriting. Unlike the authentic, small rectangular labels with tiny script, larger labels with cartouche-shaped, rounded, or triangular endpoints were added by subsequent librarians to replace damaged binding labels (Appendix III: Pl. 4 [3], 5 [2], 8 [3], 9 [2], 12 [4], 13 [3], 14 [2], 15 [2]). The latter generally have variant titles written in monumental *naskh* or *nasta'liq* script on relatively new paper. These titles often list the number of lines per page and rarely mention affiliated disciplines, unlike the original rectangular sticky labels attributable to 'Atufi or his assistants.

This means that reconstructing with certainty the holdings of the palace library in the year 1502–3 (allowing for minor revisions and additions to the inventory in and around 1503–4) requires not only identifying Bayezid II's seal impressions on extant manuscripts, but also establishing that the titles written on their opening pages and binding flaps correspond exactly or very closely to the entries in 'Atufi's inventory. Verifying a perfect or nearly perfect fit through codicological examination opens the way to answering other kinds of questions regarding the biographies of manuscripts catalogued in MS Török F. 59, including their date, provenance, patronage, and circulation, which may provide important insights to historians of art and intellectual culture.

PART III: THE PALACE LIBRARY COLLECTION

Cultural Pluralism: Remarkable Manuscripts Associated with Mehmed II and Bayezid II

In this concluding part focusing on highlights from the palace library collection, I assess some telling traces left in the inventory's pages that bear witness to the court cultures and personal proclivities of the library's two successive founders, Mehmed II and Bayezid II. The imperial cosmopolitanism of the inventory stands in contrast to the relative "parochialism" of the few surviving medieval Islamic library catalogues and book lists, which are dominated by the works of local scholars. With its dialectic between transregional and indigenous perspectives, the manuscript collection catalogued in

MS Török F. 59 attests to the universalistic ambitions behind the Ottoman palace library, which contains manuscripts classified under all fields of knowledge as the embodiment of an encyclopedic ideal. This document unsettles the long-held assumption that interest in such a wide range of humanistic subjects had vanished in the "post-classical" Islamic world (after ca. 1200), a conclusion largely informed by the relative narrowness of madrasa curricula. The inventory confirms that books excluded from the curriculum of religious institutions nevertheless circulated in private and commercial realms. In addition to its astonishing diversity, the Ottoman palace library collection stands out for the sheer quantity and quality of its holdings, as well as for its inventory in Arabic, which remained the universal language of Islam and cosmopolitan scholarship, despite the rising status of vernacular languages in the early modern era. In contemporary Europe, too, Latin was still the standard in significant private libraries, with vernacular languages amounting to "no more than a tenth to a third" of their collections in the late fifteenth century.¹⁴⁸

Straddling the late medieval and early modern ages, the reigns of Mehmed II and Bayezid II marked a time when Ottoman cultures of knowledge dynamically absorbed currents not only from the Latin West, but especially from the Mamluk, Turkmen, and Timurid realms through both émigré and local Rumi scholars who had studied abroad in those regions. Although relatively few intellectual interactions with the Islamic West have been documented, the exodus of Muslim and Jewish scholars from al-Andalus further expanded the cultural horizons of the Ottoman palace library from 1492 onward, as signaled above by the presence of a Maghribi keeper of books in Bayezid II's service in 1505–6.¹⁴⁹

The library inventory also testifies to a previously underestimated connectivity with the Indian Ocean world, particularly the Deccan. It is noteworthy to find among its entries two works in Persian on literary prose by Khwaja Mahmud Gawan Gilani, an Iranian merchant who immigrated to India in 1453, the year Mehmed II captured Constantinople, and died in the same year as the Ottoman sultan, in 1481. This author became the chief court merchant (*malik al-tujār*, Prince of Merchants) of the Deccani Bahmanid Sultanate and was eventually

promoted to the position of prime minister with the honorific title “Khawāja-i Jahān” in the court of Muhammad Shah III (r. 1463–82).

Mostly importing horses in return for Indian textiles, the erudite statesman-merchant Mahmud Gawan engaged in trade with the Ottoman territories (*diyār-i Rūm*) during Mehmed II's reign, as recorded in the Bursa registers. For instance, in 1479 his three agents arrived in Bursa via Arabia with consignments of “diverse textiles and goods” (*envāʿ-i aḳmīše ve emtiʿa*). One of the agents died there, at the caravansaray of Mahmud Gawan's namesake, the learned Ottoman grand vizier Mahmud Pasha (d. 1474), where those commodities were being traded. Just before Mahmud Gawan's execution in 1481, six of his agents came to Bursa, where one of them fell ill in the same caravansaray; from there, some of the agents moved on to the Balkans to market their fabrics. The palace library inventory lists Mahmud Gawan's theoretical treatise on literary prose and secretarial arts as *Kitābu manāẓiri al-inshāʿi li-Khwājah-i Jahān* (Book of Vistas of Prose Composition by Khwaja Jahan, 220 {17}), along with the collection of his epistolary correspondence, *Kitābu riyāḍi al-inshāʿi fārisi li-Mahmūd al-Gilānī* (Book of Gardens of Prose Composition in Persian by Mahmud of Gilan, 220 {14}). The latter includes letters to Mehmed II, and another one addressed to his grand vizier Mahmud Pasha in which the author praises his own literary talents and eloquence. After Mahmud Gawan's demise, Bayezid II received a Bahmanid ambassador at Edirne in 1485, along with others sent by rulers of the Mamluk Sultanate (accompanied by the Deccani envoy), the Crimean Khanate, Hungary, Poland, and Puglia (in southern Italy) in order to congratulate the sultan's recent victories. Yet the two manuscripts of Mahmud Gawan's works probably entered the Ottoman palace library under Mehmed II, given that the author's agents regularly visited *diyār-i Rūm* during the reign of this sultan, who was known for his enthusiastic patronage of foreigners, particularly scholars and men of Persian letters. In fact, Mehmed II's preference for foreign talent was jokingly lamented in a Turkish poem presented to him by Çatladı Kasım, quoted later by the poet Lami'i (d. 1531): “If you wish to stand in high honor on the sultan's threshold / You must be a Jew or a Persian or a *Fireng* (European)!¹⁵⁰

The fluidity of transregional cultural interchanges between the Ottoman domains and the eastern Islamic lands would gradually diminish after the establishment of the Shi'i Safavid state in Iran (1501), which intensified the process of Sunnization between the reigns of Bayezid II, Selim I, and Süleyman I. This development was accompanied by the absorption of the Mamluk Sultanate into the Ottoman empire (1516–17), the Portuguese domination of the Indian Ocean, and the progressively eroding cultural memory of the prestigious Timurid tradition following the demise of Sultan Husayn Bayqara (d. 1506) in Herat. The foundation of a record number of madrasas in Istanbul and in other major cities of the empire starting with the reign of Mehmed II contributed to the synthesis of transregional intellectual traditions with local Rumi ones, giving rise to growing Ottomanization during the Süleymanic age and beyond. The late sixteenth-century linguistic Turkification of Ottoman intellectual culture, in turn, coincided with the emergence of a new chapter of enhanced connectivity among the increasingly Persophone courts of the Safavids, Mughals, and Deccani Sultanates. The pluralism of the book collection catalogued by 'Atufi therefore brings into clearer focus the potentialities of a path not followed by later Ottoman sultans, whose court cultures drifted away from multilingualism and initiated the codification of less flexible, domesticated knowledge systems.

'Atufi's deviations from former Islamic classifications of the sciences were in part conditioned by the specific contents of the palace library, whose collection responded to the intellectual orientations of Mehmed II, Bayezid II, and their courts. In other words, the collection and its collectors were inseparable. Hence, 'Atufi's classificatory system was not an entirely abstract theoretical construct, as in the case of encyclopedic enumerations of the sciences. Books collected and commissioned by both sultans ranged from standard works with a curricular dimension to rare titles that often reflected their own personal interests. Given that this was the collection of an imperial palace library, it is only natural that it comprised a large percentage of books on rulership, politics, advice, ethics, religion, jurisprudence, philology, epistolography, recordkeeping, literature, poetry, history, and some courtly pastimes

(hunting, falconry, horsemanship, archery, music, and chess).

Among the scientific manuscripts at the Topkapı library prepared during Mehmed II's reign, which Zeynep Atbaş has examined in her essay in this volume, the largest number of works were on Arabic and Persian philology (27 manuscripts, 10 of which were commissioned by the sultan), including lexicons, books of grammar, prosody, and rhetoric. The second largest group was on wisdom and philosophy (19 manuscripts, 12 of which were dedicated to Mehmed II), followed by the third major group on medical texts (16 copied for him). According to well-known Venetian reports soon after the fall of Constantinople, Mehmed II was tutored daily by an Arabic-speaking philosopher, and two Italian physicians trained in Greek and Latin respectively read to him ancient and contemporary works on history. MS Török F. 59 captures Mehmed II's penchant for philosophical and theological debates, as well as his attraction to Shihab al-Din al-Suhrawardi's (d. 1191) illuminationist (*ishrāqī*) Neoplatonic mystical philosophy fused with philosophical theology. This controversial Sufi philosopher-shaykh had been executed in Aleppo for his "heretical" works, which cited those of Hermes Trismegistus, Pythagoras, Plato, and Plotinus. Many copies of his treatises and their commentaries are included in 'Atufi's inventory, several of which were commissioned by Mehmed II or produced during his reign (Appendix III: 26 [1–5], Pl. 8 [1–3]). While the inventory's entries on philosophy are numerically dominated by Avicenna's works and their commentaries, the second largest group consists of Suhrawardi's treatises with accompanying commentaries.¹⁵¹

Mehmed II was unsuccessful in his attempt to recruit the Naqshbandi Sufi litterateur and scholar 'Abd al-Rahman Jami, who was on his way back from the hajj to the Timurid capital Herat, to the Ottoman court in 1474. But later, the sultan sent a gift-bearing embassy to Herat, requesting that Jami write a work assessing the respective positions of philosophers, theologians, and Sufis on a specific list of metaphysical questions that had been debated for centuries. In response to this request, Jami wrote *The Precious Pearl*, which only reached Istanbul shortly after the sultan's death in 1481. The work commissioned by Mehmed II is missing from the library

inventory drawn up under Bayezid II, either because the latter sultan was less concerned with the burning philosophical-theological questions that deeply preoccupied his father, or because the manuscript was never presented to him. Nonetheless, Bayezid too sent gifts to Jami and in return received *qasidas* dedicated to him.¹⁵²

As is well known, Mehmed II also asked two scholars affiliated with the Ottoman court to evaluate the Ash'ari theologian al-Ghazali's (d. 1111) criticism of philosophers in *Tahāfut al-falāsifa* (The Incoherence of the Philosophers). In this competition, Hocazade Muslihuddin Mustafa b. Yusuf (d. 1488) prevailed with a slight margin over 'Ala' al-Din al-Tusi (d. 1482), who showed greater lenience toward philosophers. It is thought provoking that the palace library inventory lacks an entry on the Andalusian philosopher Ibn Rushd's (Averroes) defense of Aristotelian philosophy, titled *Tahāfut al-tahāfut* (The Incoherence of Incoherence), against al-Ghazali's polemical work. Several copies of the latter are included in the inventory, however, along with the responses to this work written for Mehmed II (62 {11–17}, 63 {6–9}, 74 {10}, 348 {18–19}). 'Atufi even approvingly designates one of the copies of Ghazali's *Tahāfut* as a work "on the annulment of philosophical philosophy" (*fī ibtālī al-hikmatī al-falsafīyyati*). This copy was bound together in a single volume with the philosophical treatises of Avicenna and Suhrawardi, along with a work on Sufism by Ibn al-'Arabi's (d. 1240) student Sadr al-Din al-Qunawi (d. 1274), who settled in Konya (348 {17–19}, 349 {1–2}). While Averroes's *Tahāfut* may have been available outside the imperial palace, neither Hocazade nor 'Ala' al-Din al-Tusi referred to it in their responses to Ghazali's *Tahāfut* commissioned by Mehmed II. This has given rise to a disagreement in scholarship as to whether or not Averroes's *Tahāfut* was known to the Ottomans at that time. Based on 'Atufi's inventory, it can be surmised that a manuscript of Averroes's work did not exist at the palace library of Mehmed II, unless his successor disapprovingly gave it away. While Bayezid II's librarian maintained a critical distance to books on "philosophical philosophy," the culture of debate promoted by Mehmed II nonetheless contributed to the accommodation of works with divergent viewpoints in the palace library, which do not appear to have been systematically censored or purged thereafter.¹⁵³

Mehmed II composed Turkish poems collected, perhaps posthumously, in a *divan* that is conspicuously missing from the palace library inventory. Among unidentified literary works associated with Mehmed II, 'Atufi cites a compendium in the sultan's own handwriting under books on rhetoric, titled *Majmū'atun fī al-nawādiri wa-al-fawā'id bi-khaṭṭi al-Sultān al-maghfūri al-marhūmi Meḥammed Khān -ṭāba tharāhu-* (A Compendium of Witticisms and Wise Sayings in the Handwriting of the Late Sultan Mehmed Khan, May His Grave Be Pleasant, 218 {7–8}). Another intriguing unknown work is an epistle in Turkish verse that combines an encomium of Mehmed II with a eulogy of his new mosque in Istanbul (*Risālatun fī madḥi Meḥammed Khān -ṭāba tharāhu- wa-madḥu al-jāmi'i al-jadīdi bi-al-turkiyyati al-manzūmati*, 266 {15–16}).

Also boasting a *divan* of his own, which is not listed in the inventory unlike that of his rival Prince Cem (244 {19}), Bayezid II appears to have had somewhat narrower interests compared to those of his father. Yet his intellectual curiosity was broader than commonly imagined, judging from two well-informed ambassadorial reports written at the same time that 'Atufi prepared the library inventory. The 1503 *Relazione* of the Venetian ambassador Andrea Gritti, who had lived for many years in the Ottoman capital as a prominent merchant-diplomat, explains that the “pious” (*religioso*) and “melancholic” (*melanconica*) Bayezid, who excelled in horseback hunting, “professes to have some knowledge of philosophy (*filosofia*), but above all devotes attention to cosmography (*cosmografia*), in which they say he is extremely well-educated (*istruittissimo*).” According to another report by Gritti's secretary from the same year, in which Bayezid II is judged as less “cruel and terrifying” (*crudo et teribele*) than his father, this 63-year-old sultan received the Venetian ambassador wearing a dark green camlet caftan over a likewise dark-colored robe and a small turban, “all signs of being devoted to religion” (*tutti segni esser dedito a la religione*). The secretary notes that, though Bayezid had given up wine long ago, he was unable to abstain from excessive sexual intercourse. He adds that the sultan was said to be an expert in archery, which he practiced constantly, and pursued as a hobby the “mechanical arts” (*le arte mecanice*), including carving in carnelian and silver, as well as “alchemy”

(*alchimia*). Bayezid was also held to be “exceptionally well-read in his [religious] law (*doctissimo ne la sua leze*), astrology (*astrologia*), and theology (*theologia*), and continually studied (*studia continuamente*)” works by Arab, Persian, and other Muslim authors.¹⁵⁴

Interestingly, the library inventory cites a book on holy warfare authored with literary skill by the sultan himself, *Risālatu Sultān al-Salāṭin Sultān Bāyezīd Khān -zīdat sa'ādathu fī al-dārayni- muṣanna'atan fī al-jihādi* (Treatise of the Sultan of Sultans, Sultan Bayezid Khan—May His Bliss Be Increased in Both Worlds—Artistically Fashioned on Jihad, 214 {15–17}). While this work has not yet come to light, an Arabic commentary on hadith concerning belief and jihad that the preacher 'Atufi dedicated to Bayezid II in 1511 still exists in the Topkapı library, hinting at the sultan's abiding interest in this subject. It has been observed that Sinan Pasha, the tutor-cum-vizier of Mehmed II, mostly wrote Arabic treatises on the mathematical sciences, jurisprudence, and theology during his pupil's reign, whereas under Bayezid II's rule he authored Turkish works on the lives of saints, religion, and Sufism. This change in orientation may have been a response to the differing priorities of intellectual culture during each sultan's reign, in conjunction with shifting factional rivalries and political circumstances. The relative fall from favor of “philosophers” (*mütefelsefin*), who had previously overshadowed legal scholars, and the concomitant rise of studies on Islamic “jurisprudence” (*fikh*) under Bayezid II is alluded to in a Turkish letter by Ghulam Sinan (d. 1506). The disgruntled author of that undated letter, written (ca. 1495–96) shortly after the execution of the supposedly heretical former palace librarian Molla Lutfi, had been a student of the mathematician-astronomer 'Ali Qushji (d. 1474) in Istanbul. In 1485 he dedicated to Bayezid II a commentary on the astronomy treatise his teacher 'Ali Qushji had presented to Mehmed II more than a decade before, in 1473 (Appendix III: 27).¹⁵⁵

Dominated by religious sciences and Sufism, books in the palace library that were written for Bayezid II also encompassed astronomy-astrology, mechanics, medicine, literature, and history. According to the essay by Zeynep Atbaş in this volume, among extant scientific works produced for and dedicated to Bayezid II, those on astrology-astronomy constituted the largest group

(24 manuscripts). Books on history also occupy a prominent place in MS Török F. 59, which is not surprising given that this sultan's reign marked a turning point in the development of a dynastic tradition of Ottoman historiography in Turkish and Persian. Likewise, 'Atufi's inventory demonstrates the emergence of a nascent tradition of Turkish divans in the Ottoman court. Nevertheless, the 7-page list of Turkish poetry is overshadowed by 27 pages on Persian poetry. The 27-page-long section on Arabic poetry, on the other hand, contains a polyglot subcategory on Arabic, Persian, and Turkish/Turkic works on literary prose composition (*inshā'*) and manuals on secretarial skills.¹⁵⁶

It has been noted that under Bayezid II's patronage, there was a substantial increase in the number of illuminated Qur'ans and copies of the sixth sura (*al-An'ām*), with relatively fewer luxury manuscripts commissioned on other subjects in comparison to the deluxe volumes created for his father's treasury in diverse disciplines. Qur'ans copied for Bayezid II by Shaykh Hamdullah eclipsed other manuscript types in the luxury of their bindings, illuminations, and calligraphy. The somewhat humble appearance of the other manuscripts dedicated to this sultan speaks to their predominantly functional and educational role. Most of them seem to have been presented to him as gifts, rather than commissioned by order of the royal treasury. Compared to the many classics by well-established medieval Islamic authors produced for his father's library, the gifts received by Bayezid were often works by relatively unknown contemporary and local authors. This is in keeping with his policy of rewarding indigenous and, to a much lesser degree, imported talent with donations to promote cultural production within the Ottoman domains. By contrast, contemporary sources stress Mehmed II's persistent patronage of foreign artists, poets, and scholars: wherever in the world he heard of a man of "outstanding talent," the sultan tried to attract him to his capital with generous gifts. According to İdris Bidlisi, the aforesaid Göde Ahmed Beg (grandson of Uzun Hasan and Mehmed II, and son-in-law of Bayezid II, who briefly possessed the Aqqoyunlu throne in 1497) used to praise Mehmed II in court gatherings at Tabriz, applauding his policies, justice, wisdom, and generous patronage of émigré scholars and artists from lands of

the "Arabs and Iranians." Bidlisi contrasted Mehmed II's personal attention to the needs of these intellectuals and their direct access to the sultan's presence with Bayezid II's impersonal and relatively meager patronage of foreigners in favor of Rumis (Ottomans) and converted slave servants (*kul*).¹⁵⁷

The numerous Qur'ans listed in 'Atufi's inventory include exquisite copies penned by internationally renowned calligraphers and those attached to Bayezid II's court. The list also features multiple copies of the sura *al-An'ām* (17 {16–19}, 48 {11–12}). We learn from Bayezid II's abovementioned Genoese page, Menavino, that forty readers of that sura (called *enamcılar*) frequented the sultan's residence every morning. Each held a book while reading the *al-An'ām* aloud for about an hour, as they sat on their knees in a circle formation at the palace mosque: it was believed that all wishes of Bayezid II would be fulfilled by having that sura recited forty times daily. Some Qur'an manuscripts are specified in 'Atufi's inventory as including sections on Qur'anic divination (*fāl al-Qur'ān*). The presence of works on the science of magic squares (*'ilm al-wafq*) and amulets (*al-ḥamā'il*) in the inventory's fourth section (*tafşil*) is noteworthy, especially since these were not always codices.¹⁵⁸ The inclusion of multimedia objects inscribed with talismanic texts in this section seems to have been conditioned by the very nature of those esoteric sciences, which were not confined to books. Although 'Atufi generally excludes from the library inventory any items not bound as volumes, here he lists many amulets folded in various shapes (circular, triangular, square); others written on paper or silk; talismanic shirts and a felt cap (45 {7–9}); as well as inscribed tablets of silver, copper, and wood (45 {18–19}, 46 {1–2, 7–8}).

The inclusion of talismans among books on religious sciences is congruent with the prominence of works on occult and esoteric knowledge in the seventeenth section of the library inventory, subjects of interest to both Mehmed II and Bayezid II. That section contains dynastic horoscopes as well as apocalyptic prophecies. An anonymously listed example of the latter, datable to Mehmed's reign, is titled *Kitābu ṣayḥati al-būmi fī ḥawādithi al-rūmi min qibali 'ilmi al-jafri wa-al-wafqi* (The Owl's Cry on the Events of Rome, Pertaining to the Sciences of Letter Divination and Magic Squares,

309 {17}). It has been suggested that this work, generally attributed to Ibn al-ʿArabi, may have been authored by ʿAbd al-Rahman b. Muhammad al-Bistami (d. 1454). It alludes to eschatological traditions, such as “The Hour will not arise before Great Constantinople and its cities have been conquered.” Its likely author, al-Bistami, who passed away in Ottoman Bursa a year after the capture of Byzantine Constantinople by Mehmed II, was a Hanafi scholar and Sufi, born in Mamluk Antioch. Influenced by Ibn al-ʿArabi, he studied in Mamluk Syria and Egypt before joining the court of Mehmed’s father, Murad II, to whom he dedicated several works, and trained influential early Ottoman scholars such as Mehmed Şah el-Fenari (d. 1436). Ibn al-ʿArabi’s writings are also well represented in the palace library inventory, as are occult texts by his contemporary, the Ifriqian Sufi Ahmad al-Buni (d. 1225 or 1232–33), along with the tenth-century *Epistles of the Brethren of Purity* (*Ikhwan al-Safaʿ*) that inspired them both. The Greek holdings of Mehmed II’s library likewise contained works on prophecy, apocalypticism, and the occult, responding to millenarian expectations aroused by his conquest of Constantinople.¹⁵⁹

ʿAtufi’s inventory abounds in treatises on astrology-astronomy and cosmography-geography, again fields of interest to both Mehmed II and his successor. Entries on the mathematical science of astronomy highlight the continuous lineage of this subject from the courts of the Mongol Ilkhanids and Timurids to that of the Ottomans. The genealogy goes back to the Ottoman-born astronomer-mathematician Qadizade al-Rumi (d. after 1440)—the tutor of Ulugh Beg who became one of the directors of the ruler’s observatory in Samarqand—and to his colleague ʿAli Qushji (d. 1474), both of whose works are listed by ʿAtufi. The combined legacy of these two Timurid scholars was personified in Mirim Çelebi (d. 1525), their great-grandson. This Ottoman astronomer-mathematician furthered the tradition of the “Samarqand School” in the lands of Rum. His father, born from the marriage of Qadizade al-Rumi’s son to a daughter of ʿAli Qushji’s in Samarqand, came with ʿAli Qushji to Istanbul and married the daughter of the Ottoman scholar Hoca-zade Muslihuddin Mustafa (winner of the abovementioned competition set up by Mehmed II). The offspring of that marriage, Mirim Çelebi, was educated by influ-

ential Ottoman scholars. In keeping with its date of compilation, the library inventory lists only two early works by Mirim Çelebi, who was a contemporary of ʿAtufi’s and was appointed Bayezid II’s tutor in the mathematical sciences around the mid-1490s (98 {14–15}, 315 {17–18}). Commissioned by this sultan, Mirim Çelebi’s second work is a Persian commentary on the Timurid ruler Ulugh Beg’s catalogue of stars. It is recorded in the inventory as *Sharḥu Zīj-i Ulugh Beg li-Mawlānā Mīrim Çelebi -sallamahu Allāhu taʿālā- fī al-nujūmi* (Commentary on the *Zīj* of Ulugh Beg by Mawlana Mirim Çelebi—God Almighty Grant Him Salvation—on Astrology, 315 {17–18}). Exactly the same title is written in the opening page of an autograph manuscript dated 1499 and stamped with Bayezid II’s seal. Given that the multilingual scientist-scholar Mirim Çelebi would subsequently engage with Ibn al-Haytham’s (d. ca. 1040) and Kamal al-Din al-Farisi’s (d. ca. 1318) Arabic treatises on optics, he most likely consulted the palace library copies of these works listed in ʿAtufi’s inventory (359 {7–10}).¹⁶⁰

Interestingly, both manuscript copies of al-Farisi’s Arabic book on optics, which revised that of Ibn al-Haytham, are marked in the inventory’s margin as having been “checked out,” which demonstrates that they were being consulted by an unidentified reader: *Tanqīḥu al-manāẓiri* [*maṭlab*] (Revision of the Optics, 359 {8–9}), *Kitābu tanqīḥi al-manāẓiri min qibali al-ḥikmati* [*maṭlab*] (Book of the Revision of the Optics, Pertaining to Philosophy, 359 {9–10}). Instead of classifying this work and Ibn al-Haytham’s work on optics (a discipline combining physics, metaphysics, and mathematics) under the mathematical sciences, ʿAtufi lists them in the inventory’s section on philosophy, as books “pertaining to philosophy.” One of the two copies of al-Farisi’s manuscripts is still kept at the Topkapı library and bears the seal impressions of Bayezid II in its first and last pages.¹⁶¹

Remarkably, all surviving manuscripts of the celebrated Arabic treatise on optics by the mathematician-astronomer, physician, and philosopher Ibn al-Haytham are known to have been preserved in Istanbul libraries.¹⁶² What has not been noticed previously, however, is that nearly each of these rare manuscripts bears seal impressions of Bayezid II. They were transferred from the Topkapı Palace, where only some copies remain, to

royal public libraries in the eighteenth century (Ayasofya and Fatih collections, now at the Süleymaniye Library). The title above the flyleaf of one of these manuscripts is identical to an entry in 'Atufi's inventory: *Kitābu bin al-Haytham fī al-manāẓiri min qibali al-ḥikmati* (Book of Ibn al-Haytham on Optics, Pertaining to Philosophy, 359 {7}) (fig. 13a). I was surprised to discover that this manuscript has a previously overlooked dedication in its opening page (fol. 1a), stamped with Bayezid II's seal, which states that it was produced to be read by Mehmed II (*bi-rasm muṭāla'a*) (fig. 13b). The monumental manuscript is the only known premodern copy that contains the full text of Ibn al-Haytham's *Kitāb al-Manāẓir* (Book of Optics), consisting of seven books or volumes (*jild*) (fig. 13c). In keeping with the dedication to Mehmed II, the completion date given in its colophon is 869 (1464–65) (fig. 13d).¹⁶³

Besides this large-format single-volume manuscript, another entry in 'Atufi's inventory refers to a medieval six-volume set in smaller format: *Kitābu bin al-Haytham fī al-manāẓiri min qibali al-ḥikmati fī sittī mujalladātīn* (Book of Ibn al-Haytham on Optics, Pertaining to Philosophy, in Six Volumes, 359 {7–8}). Once belonging to the Inner Treasury collection, these volumes with varying dates (476/1083 and 636/1239) are now kept at the Topkapı and Süleymaniye libraries. Each of the six volumes is stamped with Bayezid II's seal and repeats verbatim the title assigned by 'Atufi, with the exception of specifying its particular volume number. Classified as pertaining to philosophy, they contain all seven books of the *Optics*.¹⁶⁴ It has been shown that the monumental single-volume manuscript mentioned above was copied from these six volumes, however, without scrutinizing the Ottoman context in which this skillfully curated scholarly edition was reconstituted from a disparate medieval set.¹⁶⁵ Another large-format manuscript of Ibn al-Haytham's *Optics* at the Topkapı library, containing only the first three books, was copied in 915 (1509) from the same medieval set according to a librarian's note on fol. 1a. This manuscript testifies to a continuing interest in optics during Bayezid II's reign, perhaps in the circle of Mirim Çelebi, but it lacks the sultan's seal impressions and is excluded from 'Atufi's inventory that was compiled earlier.¹⁶⁶

Medical treatises recorded in the inventory are especially plentiful. Yet those written for Bayezid II by 'Atufi himself emphasize prophetic and preventive medicine, unlike their scientific counterparts commissioned by Mehmed II. Works on medicine dedicated to Bayezid II were often written by contemporaneous physicians (Appendix III: 17, 19–21). Interestingly, the royal library inventory cites an extant Persian medical treatise on the treatment of joint pains, dedicated to Mehmed II who is known to have suffered from gout. (According to Gritti's *Relazione* mentioned above, Bayezid II also had gout problems that impeded his horsemanship exercises.) Written by the physician Mas'ud b. Hakim al-Din al-Tabib al-Hasani, this manuscript's illuminated frontispiece roundel states that it was made "by order of the sultan's treasury" (*bi-rasm khizānati al-sultān*). Subsequently stamped with Bayezid II's seal, the colophon of the manuscript produced for Mehmed II gives the date June 8, 1476 (Appendix III: 18, Pl. 5 [1–2]). Several extant copies of Avicenna's *Qānūn fī al-ṭibb* were also created for Mehmed II, who requested two Latin books on this treatise from the vassal Rectors of Ragusa in 1466 and 1477. These were a commentary by Taddeus Florentinus and Gentilis Fulginas, and the first book of Marsilius de Sancta Sophia's edition of Avicenna's *Canone*, accompanied by three other unnamed medical books in Latin. The books were intended for the sultan's Italo-Jewish physician and confidante Jacopo da Gaeta (from Gaeta near Naples), who eventually converted to Islam as Yakub Pasha.¹⁶⁷

Books collected and commissioned by Mehmed II include Arabic translations of Greek, Latin, and Syriac texts. One of these is a book of prognostication on eschatological mysteries, which predicts that the final Fourth Monarchy will be under the "ruler of Constantinople" (*malik al-Rūm*). This manuscript was translated from Syriac into Arabic, and its dedication reveals that it was made by order of Mehmed II's treasury (*bi-rasm khizāna*). I have established that its title on fol. 1a, *Kitābu Dāniyāl al-nabī -'alayhi al-salāmu-* (Book of the Prophet Daniel, Peace Be Upon Him), corresponds exactly to an entry in 'Atufi's inventory (308 {8}). Once belonging to the Inner Treasury collection, the manuscript bears seal impressions of Bayezid II on its first and last pages. An early sixteenth-century Hebrew chronicle of

Figs. 13a–d. Ibn al-Haytham's *Book of Optics* copied in 869 (1464–65) for Sultan Mehmed II. [13a] Flyleaf with title assigned by 'Atufi. [13b] Opening page (fol. 1a) with dedication to Mehmed II in gold stating the manuscript was produced to be read by him; stamped with Bayezid II's almond-shaped seal, the round *waqf* seal of Mahmud I, and the oval seal of his *waqf* inspector. [13c] Heading with introduction to volume I (fol. 1b). [13d] Final page (fol. 677b) with dated colophon and Bayezid II's seal. Istanbul, SK, Ayasofya 2448. (Photos: Süleymaniye Library)

the Ottoman empire reports that Mehmed II frequently had the Book of Daniel read out to him by Rabbi Isaiah Meseni. The chronicle even claims that the sultan undertook the study of Hebrew to be able to read the Book of Daniel, since he had learned about its supposed reference to the messianic king of Constantinople (i.e., Mehmed himself). This otherwise dubious account throws light on the context in which this translation was commissioned by Mehmed II.¹⁶⁸ A Greek manuscript on divination and magic at the Topkapı library, the *Testament of Solomon* (G.İ. 17), is believed to have “been designed as one of a pair” with *Kitābu Dāniyāl*, based on their close codicological correspondence and identical bindings covered with crimson velvet (a unique feature characterizing some books owned by Mehmed II that have patterned velvet covers, usually red and green).¹⁶⁹

Another book translation attributed to Mehmed II, now lost, is the Florentine humanist scholar Leonardo Bruni Aretino’s 1422 commentary on the first volume of Polybius’s *Punic Wars*. This book in Latin, which the sultan ordered to be translated, had been presented to Mehmed II as a gift prior to 1463 by Niccolò Ardingelli, a prominent textile merchant of the Florentine community in Istanbul. Two translations cited in the cosmography-geography section of ‘Atufi’s inventory were probably made for Mehmed II as well: *Risālatun fī bayāni madīnati Fulūrindīn* (Treatise on the City of Florence, 201 {5–6}), and *Kitābun fī madīnati al-Banāṭīqa wariyāsatiḥā min qibali al-tawārīkhi* (Book on the City of the Venetians and Its Government, Pertaining to History (201 {8–9})).¹⁷⁰ These unknown manuscripts are classified by Bayezid II’s librarian together with works on wonders (*‘ajā’ib*) and marvels/curiosities (*gharā’ib*) that encompass other geographies, such as India, China, and Constantinople.

Mehmed II’s attentiveness to the ancient history of his new capital is exemplified by Greek and Latin texts on the antiquities of Constantinople that were copied and translated during his reign. Although not dedicated to him, a *Diēgēsis peri tēs Hagia Sophias* (Narrative concerning Hagia Sophia) manuscript in Greek, transcribed by Michael Aichmalotes in 1474, still exists at the palace library (G.İ. 6). It could have been consulted for the adaptive translations of the *Diēgēsis* into Persian and Turkish in the Ottoman court toward the end of Meh-

med II’s reign, with revised versions produced under Bayezid II. Examples listed in the inventory include *Tarjumatu Kitābi Qusṭantīniyya wa-Ayāṣūfiyya, bi-al-turkiyyati fī al-tawārīkhi* (Translation of the Book on Constantinople and Hagia Sophia into Turkish, on History, 200 {16–17}) and *Kitābu dhikri qal’ati Qusṭantīniyya wa-binā’i Ayāṣūfiyya fī al-tawārīkhi* (Book on the Castle of Constantinople and the Construction of Hagia Sophia, on History, 201 {1–2}). In the seventh volume of his Persian history of the Ottoman dynasty covering the reign of Mehmed II, İdris Bidlisi mentions that he consulted some Byzantine chronicles in writing that volume. It has been suggested that he likely made use of a Greek source translated into Persian by order of Mehmed II on the foundation myths of Constantinople and the construction of Hagia Sophia, which was probably accessible to Bidlisi at the palace library of his patron Bayezid II.¹⁷¹

Titles classified by ‘Atufi in the cosmography-geography section of the inventory blur the historical and legendary boundaries of these disciplines, thereby facilitating the assimilation of translated non-Islamic works that are relegated to the realm of mythology. Likewise, pre-Ottoman translations of works by Greek philosophers and scientists have been seamlessly absorbed into other sections of the inventory that correspond to such diverse fields as Sufism, philosophy, ethics, politics, medicine, and the mathematical sciences. These translations are accompanied by manuscripts of the Alexander Romance classified under Persian and Turkish literature, as well as Arabic and Persian copies of Aristotle’s book of advice to Alexander, listed under advice literature and politics.¹⁷²

Mehmed II’s well-known interest in Greek histories of the Macedonian empire-builder did not exclude their Islamic versions, which also enjoyed popularity in fifteenth-century Timurid and Turkmen courts. Three entries on Alexander the Great are grouped together in ‘Atufi’s inventory in such a way that they form a separate subsection within the history section, preceded and followed by blank spaces (182 {11–14}). The first entry, *Tarjumah-i Iskandarnamah min al-Rūmī ilā al-Turkī fī al-tawārīkhi* (Translation of the Book of Alexander from Greek into Turkish, on History), may have been a translation made for Mehmed II, given that Alexander

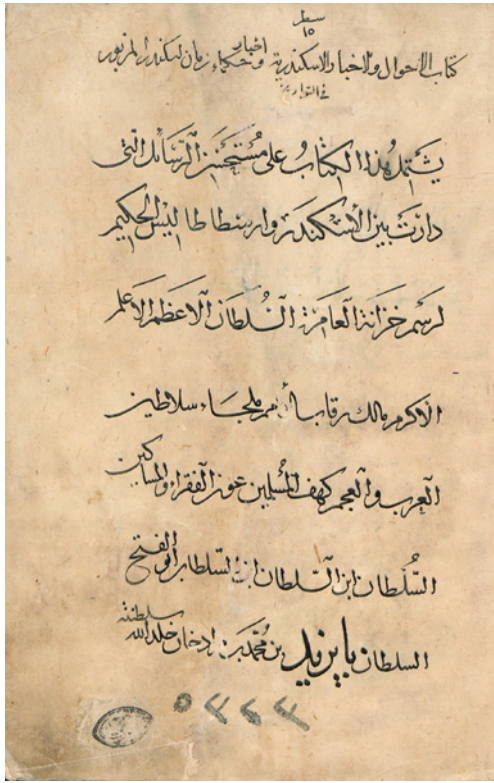

the Great was his role model.¹⁷³ The second entry is an unspecified *Kitābu Iskandarnāmah fī tis'ī mujalladātin fī al-tawārikhi* (Book of Alexander in Nine Volumes, on History), two volumes of which I have located at the Topkapı library. This Turkish work can be attributed to Taceddin Ahmedī's (d. 1413) brother Hamzavi: both volumes feature Bayezid II's seal impressions, their titles match the inventory entry, and they were copied during Mehmed II's reign (the last, ninth volume is dated 1470). This semi-mythical literary work must have been listed under the inventory's history section because it is largely written in prose and incorporates a historical section on the Ottoman dynasty. The third item in the Alexander group is a translation from Greek into Arabic, although not specified as such: *Kitābu al-aḥwālī wa-al-akhbārī al-iskandariyyati wa-akhbārī ḥukamā'i zamāni Iskandār al-mazbūrī fī al-tawārikhi* (Book on the State of Affairs and Traditions of Alexander and Traditions of Sages in the Age of the Aforementioned Alexander, on History). This entry can be confidently identified with a volume of epistles exchanged between Alexander and Aristotle that once belonged to the palace library. Dated 716 (1316), it bears the same title and the seal impressions of Bayezid II on its first and last pages (figs. 14a–b). The long title is repeated verbatim on the partly damaged authentic rectangular paper label pasted on the flap of the binding (fig. 14c). The previously unnoted dedication under the title on fol. 1a explains that it was made by order of the imperial treasury (*li-rasm khizānati al-āmirati*) of Sultan Bayezid II.¹⁷⁴ This new evidence revealed by my codicological examination of the volume signals an ongoing interest in Alexander the Great at the court of Bayezid II. After all, İdris Bidlisi's dynastic history refers to this sultan as the "Alexander" of the age and the "Ceasar of Rum," titles also used by Mehmed II. Scholars have identified the compendium of epistles, compiled from Hellenistic sources in the Umayyad period, as a Graeco-Arabic epistolary "novel." Yet 'Atufi classifies it under the section on history, thus endowing it with greater factual authority.¹⁷⁵

Other translated works cited in the inventory include the rendition of Ptolemy's *Geographia* from Greek into Arabic, commissioned in 1465 by Mehmed II from the previously mentioned Byzantine scholar George Amiroutzes and his Arabic-speaking son Basileios, who con-

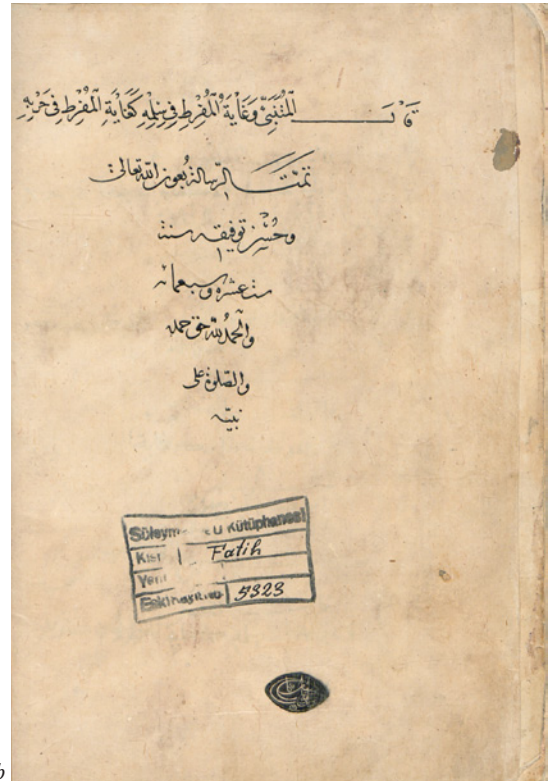

verted to Islam as Mehmed Beg. The Arabic annotations of the accompanying large-scale world map were written by this son, who translated several Greek texts into Arabic for the sultan, including the Greek Orthodox Creed composed upon the sultan's request by Maximos III (the patriarch of Istanbul between 1476 and 1482) and the Bible. Amiroutzes's younger son, Alexandros, later İskender Beg, was nicknamed the "Philosopher's Son" (Filozofoğlu) and held the position of chief treasurer (*ḥazīnedārbaşı*) or minister of finance. Three manuscripts of the Arabic translation of Ptolemy's *Geographia* are listed by 'Atufi (203 {5–9}). Two manuscript copies of this work that originated in the palace library have come to light, both of which are dedicated to Mehmed II and bear Bayezid II's seal impressions, with a partially preserved version that may well be the third copy mentioned in the inventory.¹⁷⁶

These entries on three translated Ptolemy volumes are preceded in the inventory by a fourth anonymous book on the science of astronomical geography, probably also prepared for Mehmed II: *Kitābu [‘ilmi ṣaḥḥ] hay’ati ashkālī al-arḍi fī al-ṭūli wa-al-‘arḍi al-ma’rūfi bi-jughrāfiyyā*. All four titles, which are in keeping with reports about this sultan's abiding interest in the mathematical sciences of geography and cartography, are grouped together as a subsection, separated by empty spaces from their Islamic versions, which are classified under "Books on Wonders of Creation." Among manuscripts stamped with Bayezid II's seal are some medieval Islamic works on geography illustrated with diagrammatic maps, which are classified in 'Atufi's inventory under history or pertaining to history. These include a copy made for Mehmed II, revealing the diversity of his interests in cartography, which encompassed both Islamic and translated Greek classics. The palace library also has two thirteenth- to fifteenth-century Greek versions of Ptolemy's *Geographia* (TSMK, Seragliensis 27, 57) and one in Latin dated ca. 1450 (TSMK, Seragliensis latinus 44). These manuscripts could have been consulted for Mehmed II's translation project, but we do not know when they were acquired.¹⁷⁷

Since the arts of war were a consuming passion and skill of Mehmed II, it is believed that he acquired Latin and Italian illustrated treatises on military engineering and tactics. The palace library inventory

contains more than a few titles in this field, such as a work called *Şuwaru al-ālāti al-ḥarbi* (Figures of War Machines, 196 {6}). Some of the listed treatises on military strategy were translated from Greek, but their present whereabouts, dates, and places of translation have yet to be determined: these include two copies of a work titled *Risālatun fī ādābi al-ḥurūbi mutarjamatun ‘an al-yūnāniyyati bi-al-‘arabiyyati* (A Treatise on the Etiquette of War Translated from the Greek into Arabic, 196 {8–9, 12–13}); and a volume combining an Arabic and a Persian translation from Greek belonging to the same genre (*Risālatun fī ādābi al-ḥurūbi mutarjamatun ‘an al-yūnāniyyati bi-al-‘arabiyyati wa-Risālatun mutarjamatun bi-al-fārisiyyati ‘an al-yūnāniyyati fī ādābi al-ḥarbi* (A Treatise on the Etiquette of War Translated from the Greek into Arabic, and A Treatise Translated from the Greek into Persian on the Etiquette of War, 196 {9–11}).

It is unclear whether these translated treatises were produced in an Ottoman context or elsewhere, making it difficult to associate them with Mehmed II or Bayezid II. According to Gritti’s 1503 *Relazione* cited above, the latter sultan reformed the Ottoman army by regulating its discipline, improving the quality of armaments, and not sparing any expense on portable artillery or men knowledgeable in using such weapons. Gritti also praised Bayezid’s reorganization of the cavalry soldiers and naval forces that resulted in “marvelous” (*meravigliose*) victories. İdris Bidlisi’s dynastic history presented to Bayezid II in 1506 similarly claims that none of the former Ottoman sultans possessed such an esteemed and well-equipped navy as he did.¹⁷⁸ These accounts suggest that treatises on military sciences would have been prized not only by Mehmed II but also by his successor.

A translation project from Greek into Arabic that has been attributed to Mehmed II, who was known for his interest in Suhrawardi, resulted in an anthology redolent with Sufi illuminationist concepts. This anthology combines the undestroyed fragments of the late-Byzantine Neoplatonist philosopher George Gemistos Plethon’s (d. 1452) controversial neo-pagan work, the *Nomoi* (Book of Laws), with the same author’s *Compendium Zoroastreorum et Platonicorum dogmatum* (Summary of the Zoroastrian and Platonic Doctrines) and his edition of the *Chaldaean Oracles*, which he attributed to

the disciples of Zoroaster who influenced Plato. The *Nomoi* was accused of espousing paganism and was consigned to fire (in 1454, 1460, or 1462) by George Gennadios Scholarios, the Aristotelian Greek-Orthodox patriarch of Ottoman Constantinople. Its remaining fragments in Arabic, which had apparently been translated from the latest Greek autograph version by Plethon, exist in the only known copy of this anthology at the palace library. I was able to confirm that the volume bears an impression of Bayezid II’s seal and its title corresponds exactly to the following entry in ‘Atufi’s inventory: *Tarjumatu al-baqiyyati min Kitābi Yamīṣūs al-wathanī fī madhāhibi al-awwalīna min ‘abadati al-aṣnāmi* (Translation of the Remains of the Book of Gemistos the Pagan on the Doctrines of the Ancients on the Worship of Idols, 311 {13}; see Appendix III: 13, Pl. 4 [1–3]). This title, which was inscribed by Bayezid’s librarian, has been misattributed to a modern conservator of manuscripts at the Topkapı Museum.¹⁷⁹

The Arabic manuscript, in which the author is disparaged as a pagan (*al-wathanī*) and Sabeian (*al-ṣābī*), comprises rites of idol worship, theurgic prayers to Zeus and the gods, illuminationist cosmological concepts, divination, and magic. According to its preface, the work was burnt for fear of the possibility that it might lead astray the vulgar commoners (*al-‘awāmm*), implying that the palace elites were above such temptation. Interestingly, this work has been classified in the inventory’s section on occult sciences as a book “on wondrous affairs” (marginal annotation: *fī al-umūri al-‘ajībati*), indicating that it came to be regarded as a “curiosity,” whatever the original intention may have been for its translation. ‘Atufi also lists a formerly unknown second copy of the same work that seems to be lost: *Tarjumatu Kitābi Yamīṣūs al-wathanī tarjamatun thāniyatan fī madhāhibi ‘abadati al-aṣnāmi* (Translation of the Book of Gemistos the Pagan, Second Translation on the Doctrine of the Worship of Idols, 311 {14}).

Entries on translated works imply that the unusually rich collection of lexicons and grammars catalogued in ‘Atufi’s inventory (pages 293–300) may have been partially related to translation projects undertaken by Mehmed II, and to a lesser extent by his successor as well. The inventory lists bilingual lexicons (Arabic-Persian, Persian-Arabic, Turkish-Persian, Turkish-Arabic,

Greek-Arabic, Greek-Persian, Greek-Turkish), trilingual Arabic-Persian-Turkish lexicons, and even quadrilingual lexicons with interlinear translations. Examples of the latter include two copies of a lexicon with interlinear translations that once belonged to the palace library and are now kept at the Süleymaniye Library. Each of these quadrilingual lexicons carries previously unnoted seal impressions of Bayezid II, although they may well have been associated with his father's court. One of these (SK, Ayasofya 4750) is identified by 'Atufi as *Risālatu kalimātin 'arabiyyatin mutarjamatin bi-al-fārisiyyati wa-al-rūmiyyati [ay al-yūnāniyyati] wa-al-sarfiyyati* (A Treatise of Arabic Words Translated into Persian and Greek [or Ancient Greek] and Serbian, 296 {2}). The other copy (SK, Ayasofya 4749) is bound together with several lexicons and grammar textbooks written in the same hand within a compendium, whose contents are described by 'Atufi as: *Risālatu kalimātin 'arabiyyatin mutarjamatin bi-al-fārisiyyati wa-al-rūmiyyati wa-al-sarfiyyati; wa-Kitābu Īsāghūji 'alā al-lughati al-'arabiyyati mutarjamun bi-al-yūnāniyyati fī al-manṭiqi; wa-Risālatu al-amthilati al-muṭṭaridati al-mutarjamati bi-lughatin 'arabiyyatin fī mujalladin wāḥidin* (A Treatise of Arabic Words Translated into Persian, Greek, and Serbian; and the *Book of Isagoge* [Porphyry's "Introduction" to Aristotle's "Categories"] in Arabic Translated into Greek, on Logic; and a Treatise on Regular Examples of Conjugation Translated [from Greek] into Arabic, in a Single Volume, 296 {10–13}).¹⁸⁰

Another compendium of multilingual lexicons and grammar manuals described in an entry by 'Atufi exists in the Topkapı library (296 {3–8}; see Appendix III: 25). It begins with a Persian-Turkish lexicon written by Muhammad b. Hajji İlyas (d. before 1460) titled *Kitābu Tuḥfati al-hādiyyati* (Gift of the Rod), with interlinear translations in Greek, Latin (Frankish: *al-afranjiyyati*), and "other languages." This piece is followed by the abovementioned book on logic, Porphyry's *Isagoge* in Arabic with interlinear Greek translations. Then come treatises on regular examples of conjugation translated into Persian and other languages; on philosophical sciences; on the correction of the names of Greek philosophers; and on the Greek terminology used by astronomy scholars.¹⁸¹ An additional quadrilingual lexicon is defined in the inventory as comprising the alphabeti-

cally arranged Arabic-Persian-Turkish-Greek names of medicines (299 {5–7}). Another multilingual example is al-Zamakhshari's (d. 1144) *Kitābu muqaddimati al-adabi fī al-lughati* (Book of Introduction to Literature, on Language), an Arabic lexicon listed in the inventory with one volume comprising interlinear translations into Persian and Turkish, and another volume having translations into Persian and Latin (Frankish: *al-afranjiyyati*, 294 {11–13}). One additional lexicographic treatise mentioned in the inventory, *Risālatu tarjamati al-'ibriyyati bi-al-fārisiyyati fī al-lughati* (Treatise on the Translation of Hebrew into Persian, on Language, 299 {19}–300 {1}), hints at a concern for translating Hebrew texts, possibly in the Ottoman court where Jewish scholars thrived.

Besides testifying to a culture of translation, the many lexicons and grammars catalogued by 'Atufi reflect the context of multilingualism prevailing at the Ottoman palace with its contingent of converts, wherever or whenever these handbooks were prepared. They appear to have been aids for linguistic training and for reading works in diverse languages. These handbooks would have been essential reference tools for scholars and students alike. Though relatively few, the translated classics that are seamlessly integrated into the Islamic corpus in 'Atufi's inventory are far from negligible. These include translations of works by Hermes Trismegistus, Pythagoras, Plato, Aristotle, Euclid, Hippocrates, Dioscorides, Galen, Philo of Byzantium, Apollonius of Perga, Hero of Alexandria, Apollonius of Tyana, Andromachus, Polemon of Laodicea, Ptolemy, Porphyry, Zosimos of Panopolis, Pappus of Alexandria, Cassianus Bassus Scholasticus, and Muristus.

The Inner Treasury also housed classics in Greek and Latin (besides books in Hebrew, Armenian, Syriac, Serbian, Italian, and French), alongside their translations made in various times and places. For instance, one of the surviving Greek manuscripts that once belonged to the palace library is Homer's *Iliad*, copied (ca. 1463) for Mehmed II, who developed an interest in the legends of Troy, western Anatolia, and Greece while he was based in Manisa (Magnesia) as a prince (1446–51). 'Atufi's inventory curiously cites an anonymous translation titled *Hikāyat-i Īdhīpūs min al-tawārīkhi* (The Story of Oedipus, on History, 194 {4}), which is probably the legend of the mythical Greek king of Thebes related by Homer

and post-Homeric traditions. Another intriguing entry among the lexicons section reads, *Kitābu mulḥaqāt-i Dānistan min al-lughati al-rūmiyyati wa-al-sarfiyyati* [*wa-Risālatu ḥikāyati Qirīsūs bi-khaṭṭin ‘arabiyyin wa-ghayrihi wa-awraqin fiḥā khuṭūṭun mukhtalifātun fī mujalladin wāḥidin*] (Book of Appendices of the *Dānistan* on the Language of Greek and Serbian [and Treatise of the Story of Croesus in the Arabic Script and Other Scripts, and Folios with Various Scripts, in a Single Volume], 297 {1}). The “Story of Croesus” in this compendium may have been an interlinear translation in Arabic script of a Byzantine Greek text on legends concerning this ancient king of Lydia, who reigned in western Anatolia (ca. 560–46 BCE). Croesus was mentioned by Herodotus and used by Byzantine rhetoricians as an exemplum for his legendary wealth and fall from power upon losing divine favor.¹⁸²

Some Ottoman-period volumes at the Topkapı library that are stamped with Bayezid II’s seal consist of translations from Persian into Arabic that were made for his father. Among them are two manuscripts on logic, a subject on which several works were dedicated to Mehmed II (Appendix III: 32–33). Cited in ‘Atufi’s inventory, one of these two manuscripts has a fascinating dedication explaining that Mehmed II commissioned the translation of this book on logic because he considered the Persian language better suited to poetry than to the specialized terminology used by scholars in the sciences (*al-‘ulūm wa-al-ma‘ārif*), unlike Arabic with its greater clarity and strength of expression. The author praises the sultan’s appreciation of books and philosophy, thanks to which he raised the lighthouse of “the ancient sciences” (*al-‘ulūm al-awā’il*, fols. 2a–2b, see Appendix III: 33).

A manuscript concerning astronomy, on the other hand, was translated for Bayezid II from Hebrew into Arabic by its Jewish author, Iliya (Ilyas b. Ibrahim al-Yahudi, d. after 1512). Called ‘Abd al-Salam al-Muhtadi upon his conversion to Islam, the author is believed to have written that treatise in Hebrew before immigrating from al-Andalus to Istanbul. He translated the treatise, which explicates an astronomical instrument invented by him and called *al-Dābid*, into Arabic in 1502 upon Bayezid II’s request (Appendix III: 38). This treatise is

omitted from ‘Atufi’s inventory, which was compiled just around that time. Instead, the inventory cites an earlier polemical work on theology by the same author that aims to refute the proofs of the Jews against Islam. The earliest extant copy of the latter in the Topkapı library was dedicated to Bayezid II in 1497 and is stamped with his seal.¹⁸³

Another Jewish astronomer-cum-physician affiliated with Bayezid’s court, Moses Galeano (Moses ben Judah Galeano), wrote in Arabic under the name Musa Jalinus (Moses Galen). He is believed to have been a “potential transmitter of scientific information between the Ottoman empire and the Veneto, primarily between 1497 and 1502,” when he visited Venice and Padua. One of his teachers was Elijah Mizrahi (d. 1526), the Chief Rabbi of Istanbul and a scholar of mathematics and astronomy. A short Arabic treatise on astronomy written by Musa Jalinus, “the physician” (*al-ṭabīb*), has recently been identified in a compendium at the Topkapı library. It is titled “An Account of Some of the Impossibilities Necessitated by the Hypothesis of the Proposal of the Orb of the Epicycle and the Eccentric and the Demonstration of the Necessity of the Motions of the Heavens and All Its Parts in One Direction).”¹⁸⁴ A noteworthy reference by Musa Jalinus to the seating order at Bayezid II’s court, which resembled the position of the heavenly bodies, indicates that he participated in such courtly assemblies: “Thus the divine decree is that the most ready to receive perfection is placed higher and the more distant from receiving perfection lower, as is the case in the ordering of how we sit before the Sultan.”¹⁸⁵

My codicological examination of the compendium, in which Musa Jalinus’s piece is preceded by an important work by the Andalusian scholar al-Bitruji (d. ca. 1204), has revealed that the title written above the opening page (fol. 1a) stamped with Bayezid II’s seal perfectly matches the titles of two identical works listed in ‘Atufi’s inventory: *Kitābun ‘ajībun fī al-hay’ati wa-Risālatun ukhrā fī mujalladin wāḥidin* (A Wondrous Book on Theoretical Astronomy and Another Treatise, in a Single Volume, 332 {14–16}). The inventory thus provides previously unknown evidence that this extraordinary compendium not only belonged to Bayezid II’s palace library, but that it once existed in two manuscript copies

like many others. ‘Atufi’s two identical entries on this anonymous compendium judge the first work (by al-Bitruji) as a “wondrous book,” while the second item bound together with it is listed as “another treatise” (that of Musa Jalinus).¹⁸⁶

Musa Jalinus also produced some Hebrew translations of Arabic treatises describing astronomical instruments. This special interest of his was shared by Bayezid II, to whom various astronomers dedicated treatises on the same subject. Two planispheric astrolabes constructed for this sultan have come to light, and a third spherical astrolabe has hypothetically been attributed to Musa Jalinus. His works furthermore bear witness to the fascination with alchemy and wondrous mechanical devices at Bayezid II’s court, as noted in the 1503 report by Gritti’s secretary cited above. Musa Jalinus even constructed a wheeled moving humanoid automaton in wood with a long gown, which he operated in Istanbul at the assembly of an unnamed military judge (*kazasker*). It is tempting to speculate that the *kazasker* Musa Jalinus tried to amaze with this robot might have been the powerful scholar-statesman, bibliophile, and patron of intellectuals and poets, Mü’eyyetzade, who served as the military judge of Anatolia in 1501–5 and of Rumelia in 1505–11. Mü’eyyetzade did commission Musa Jalinus to translate a Latin text into Arabic, which was completed in 1506–7: the introduction to the tables of Abraham Zacuto of Salamanca (originally in Hebrew).¹⁸⁷

Bayezid II’s personal attention to mechanics and engineering is exemplified by his bridge project across the Golden Horn and “other works” for which Leonardo da Vinci and Michelangelo were unsuccessfully invited to Istanbul (ca. 1502–3 and 1506, respectively). The inventory’s books on mechanics and engineering may have been partly related to this sultan’s building projects, not only the unrealized bridge but also his mosque complex in Istanbul that was under construction during the same years, between 1501 and 1505.¹⁸⁸

The undated copy of a translated treatise on mechanics (bound together with a medical text in a single volume later in the eighteenth century) could have been commissioned by Bayezid II, if not his father. Stamped with Bayezid’s seals on its first and last pages, this is an Arabic rendering of Pappus of Alexandria’s Greek treatise on mechanics, which the author defines as both a

science and an art/craft. The compendium is identified on fol. 1a as *Risālatun ṭibbi bi-al-turkī ma’a Madkhalu Babūs fī al-ḥiyālī ka-jarri al-athqālī* (A Treatise in Turkish on Medicine, and Introduction of Pappus, on Mechanical Devices for Lifting Weights, fig. 15a). This compendium is not listed in ‘Atufi’s inventory precisely because its contents, combining medicine and mechanics, were bound together in a single volume subsequently, as revealed by its binding from the late Ottoman period. In fact, in this compendium, only Pappus’s treatise is stamped with Bayezid II’s seal at its beginning and end. Therefore, one of the three individual copies of Pappus’s treatise listed in the palace library inventory with the same title must surely have been this one: *Madkhalu Babūs fī al-ḥiyālī ka-jarri al-athqālī*, 310 {5–6}, 335 {4–5}.¹⁸⁹

Surprisingly, the geometrical diagrams in this particular copy are accompanied by drawings in a European pictorial idiom, which reveals a familiarity with contemporary Western treatises featuring scientific illustrations. An emphasis on architectural construction is apparent in the depiction of mechanical devices for lifting weights, such as a block of stone, a classical column base, and an obelisk. Indeed, the description of contents on the opening page of this treatise specifically refers to “the constructions of geometry needed by carpenters (or masons)” (*al-a’mālī al-handasiyya allatī yuḥtāju ilayhā al-najjārūn*) (figs. 15b–d).

The applied sciences represented in many other entries of ‘Atufi’s inventory, including al-Jazari’s illustrated *Automata* discussed earlier, demonstrate a practice-oriented facet of the palace library collection. One such example is a copy of Abu al-Wafa’ al-Buzjani’s (d. ca. 997–98) celebrated treatise on applied geometry, titled *Kitābu fīmā yaḥtāju ilayhi al-ṣānī’ min a’mālī al-handasati* (Book on What Is Needed by the Craftsman/Artisan from Geometrical Constructions). This deluxe Arabic manuscript, copied ca. 1447–49 by order of the treasury of the Timurid Ulugh Beg (d. 1449), had entered the Ottoman palace library from which it migrated to the Ayasofya collection at the Süleymaniye Library. Bearing seal impressions of Bayezid II at its beginning and end, it is listed in ‘Atufi’s inventory with a similar but slightly modified title incorporating the author’s name and omitting the word *al-ṣānī’*: *Kitābu Abī al-Wafā’ fīmā*

Fig. 15a. Opening page (fol. 52a) with title assigned by 'Atufi at the top and a description of contents, stamped with Bayezid II's almond-shaped seal and the oval seal of Mahmud I's *waqf* inspector. [15b] Mechanical device for lifting a column base (fol. 97a). [15c] Mechanical device for lifting a block of stone. [15d] Mechanical device for lifting an obelisk (fol. 101a). Istanbul, SK, Ayasofya 3624. (Photos: Süleymaniye Library)

Figs. 16a–c: Abu al-Wafa' al-Buzjani's book on practical geometry. [16a] Opening page (fol. 1a) with title assigned by 'Atufi at the top, illuminated dedication medallion stating the manuscript was produced by order of Ulugh Beg's treasury, stamped with the seals of Bayezid II, Mahmud I, and the inspector of Mahmud I's *waqf*. [16b] Final page with Bayezid II's seal. [16c] Authentic rectangular sticky label on the binding flap. Istanbul, SK, Ayasofya 2753. (Photos: Süleymaniye Library)

yaḥtāju ilayhi min a'māli al-handasati, 326 {5}. Exactly the same variant title appears both above the manuscript's opening page (fol. 1) and in the authentic rectangular sticky label of its binding flap (figs. 16a–c).¹⁹⁰

MS Török F. 59 ends with a section on Arabic and Persian translations of the Old and New Testaments, which are indirectly alluded to in the Byzantine scholar Amiroutzes's "Dialogue on the Faith of Christ Held with the Sultan of the Turks" (364 {9–19}, 365 {1}). During this private inter-confessional dialogue mediated by an interpreter, Mehmed II had cautioned the Greek Orthodox Amiroutzes not to distort the ancient Hebrew Scriptures because the "formerly Jewish" Italian physician Jacopo da Gaeta (Yakub Pasha) was attending the discussion, and because Arabic translations of all pre-Islamic holy books were available in the royal palace.¹⁹¹ This brings us full circle to the sultan's library at the Treasury-Bath complex of the Topkapı Palace, where this religious dialogue might have taken place.

While it is possible to link some titles in the book inventory to the idiosyncratic personal interests of Mehmed II and Bayezid II, the majority of manuscripts fulfilled the requirements of an up-to-date encyclopedic library collection mirroring interconnected regional and transregional courtly-scholarly networks. As the memory of both sultans faded over time, it was these general works that left a lasting imprint on Ottoman manuscript culture by laying the groundwork of a core collection and canonical teaching curriculum.¹⁹² Not all books were meant to be read, strictly speaking, since many of them had been collected for their prestigious pedigree and artistic value. The palace library was therefore a dynastic patrimonial *lieu de memoire* that played a mediating role between the past, present, and future.

In conclusion, MS Török F. 59 is an astounding archive that opens a window to the expansive vistas and epistemological frameworks of Ottoman court culture between the late fifteenth and early sixteenth centuries. Reflecting a persistent passion for collecting and commissioning manuscripts, it maps out a cultural and intellectual landscape that was still expanding. If the library had been merely a depot, its contents would have hardly required classification according to twenty broadly defined fields of knowledge by means of a comprehensive cataloguing project. This was surely a culture in

which books were actively collected, copied, and consulted, rather than locked up and forgotten. The fact that many of us still read and consult these books is a testimony to their continuing agency.

NOTES

Author's note: Photographs of folios and bindings from some Topkapı Palace library manuscripts discussed in this essay are reproduced in my Appendix III at the end of this volume, to which I provide cross-references here. I am grateful to Zeynep Atbaş and Zeren Tanındı, whom I consulted on many questions throughout the preparation of this essay. I have indicated Arabic case endings (*ʿrābs*) in transliterating book titles cited from the palace library inventory, rather than following the standard convention according to which they are omitted. My decision to match the transliteration system adopted by Bayezid II's librarian in MS Török F. 59 was informed by a concern to demonstrate how closely the titles 'Atufi assigned to books correspond to the titles written on the first pages and bindings of extant manuscripts catalogued by him.

1. Oriental Collection of the Library of the Hungarian Academy of Sciences, Budapest: Magyar Tudományos Akadémia Könyvtára Keleti Gyűjtemény, MS Török F. 59. A microfilm of the manuscript was obtained for the Harvard University library upon my request in 2004, thanks to the assistance of András Riedlmayer, and with the help of the Keeper of the Oriental Collection at that time, Dr. Kinga Dévényi. My preliminary observations on this primary source, prepared in 2005 for the proceedings of the *Bellini and the East* exhibition conferences in Boston and London, were published with a long delay, as the joint proceedings did not materialize: Gülru Necipoğlu, "Visual Cosmopolitanism and Creative Translation: Artistic Conversations with Renaissance Italy in Mehmed II's Constantinople" *Muqarnas* 29 (2012): 1–81.
2. I would like to thank Dr. Nándor Erik Kovács of the Library of the Hungarian Academy of Sciences, Budapest, for sending the measurements of MS Török F. 59. I am also grateful to Zeren Tanındı for dating the binding and attributing it to a European binder based on its gilded designs. The table of contents and Ottoman Turkish preface were introduced to scholarship by İsmail E. Erünsal in several early articles, where he misinterpreted as 959 (1552) the two chronograms that in fact provide the date 909 (1503–4). I repeated his erroneous dating at first in Necipoğlu, "Visual Cosmopolitanism." The correct date is revealed by adding up the *abjad* letters, which yield 909 and are written under two ambiguous numerical dates on page 1. Cemal Kafadar has demonstrated in his essay in the present volume that the ambiguity of numbers can be explained by the fact that "0" closely resembles "5" in the Persian notation system for numbers. In the revised edition of his pioneering

- monograph on Ottoman libraries, Erünsal emended his previous misdating (i.e., 952 corrected to 909): see his *Osmanlı Vakıf Kütüphaneleri* (Ankara, 2008), esp. 94, 117, 128, 460–65, 650–58. The revisions in his book followed a study on MS Török F. 59, which curiously does not cite Erünsal's important publications and only focuses on history books and related subjects: Miklós Maróth, "The Library of Sultan Bayazıt II," in *Irano-Turkic Cultural Contacts in the 11th–17th Centuries*, ed. Éva M. Jeremiás. Acta et Studia, 1 (Piliscsaba, Hungary, 2003), 111–32. Early articles by İsmail E. Erünsal include: "959/1552 Tarihli Defter-i Kütüb," *Erdem* 4, no. 10 (1988): 181–93; "The Catalogue of Bayezid II's Palace Library," *İstanbul Üniversitesi, Edebiyat Fakültesi Kütüphanecilik Dergisi* 3 (1992): 5–66; "A Brief Survey of the Development of Turkish Library Catalogues," in *M. Uğur Derman Festschrift*, ed. İrvin Cemil Schick (Istanbul, 2000), 271–83. See also the expanded version of an article dated 2008, recently reprinted among Erünsal's collected essays: "909/1503 Tarihli Saray Kütüphanesi Kataloğu ve Türk Edebiyatı Tarihine Kaynak Olarak Önemi," in *Edebiyat Tarihi Yazıları: Arşiv Kayıtları, Yazma Eserler, ve Kayıp Metinler* (Istanbul, 2016), 257–83.
3. On these two late thirteenth-century catalogues, see Konrad Hirschler, *Medieval Damascus: Plurality and Diversity in an Arabic Library: The Ashrafiya Library Catalogue* (Edinburgh, 2016), 3–6, 60–64. Hirschler observes that "one of the most fascinating early Ottoman catalogues is the palace library inventory of 1502/3, which is the subject of a forthcoming publication edited by Gülrü Necipoğlu, Cemal Kafadar and Cornell H. Fleischer," 7.
 4. For this building, known as Fatih Köşkü (i.e., Mehmed the Conqueror's Pavilion), and early registers of the Inner Treasury (Enderun Hazinesi, İç Hazine), see Gülrü Necipoğlu, *Architecture, Ceremonial and Power: The Topkapı Palace in the Fifteenth and Sixteenth Centuries* (Cambridge, MA; London, 1991), 124–41; my "Visual Cosmopolitanism," 15, 26–30, 36, 48; and "'Virtual Archaeology' in Light of a New Document on the Topkapı Palace's Waterworks and Earliest Buildings, ca. 1509," *Muqarnas* 30 (2013): 315–50, esp. 317, 326–27, 329–33.
 5. Topkapı Sarayı Müzesi Arşivi (hereafter TSMA) D. 4855, dated Zilkade 971 (1564), fols. 3b–4a; discussed in Necipoğlu, *Topkapı Palace*, 137, 139.
 6. The authenticity of the matching Italianate colonnades is accepted by Ayverdi, who restored the building in the early 1940s: Ekrem Hakkı Ayverdi, *Osmanlı Mi'marisinde Fâtih Devri 855-886 (1451-1481)*, vol. 4 (Istanbul, 1974); and Sedat Hakkı Eldem and Feridun Akozan, *Topkapı Sarayı: Bir Mimari Araştırma* (Istanbul, 1982). I disagree with the view that these were added in an otherwise unrecorded eighteenth-century renovation during the "Ottoman Baroque" period. On this untenable view, see Uğur Tanyeli, "Topkapı Sarayı Üçüncü Avlusu'ndaki Fatih Köşkü (Hazine) ve Tarihsel Evrimi Üzerine Gözlemler," *Topkapı Sarayı Müzesi Yıllık* 4 (1990): 157–88, at 163. The Italianate Renaissance-style capitals have no parallel whatsoever in "Ottoman Baroque" examples; moreover, there was no incentive or even possibility to add lavish colonnades in the eighteenth century when the fountained belvedere and part of the courtyard arcade remained completely walled-in as storage spaces: see Necipoğlu, "Visual Cosmopolitanism," 26, 68n17 and note 12 below.
 7. Jean-Claude Flachet, *Observations sur le commerce et sur les arts d'une partie de l'Europe, de l'Asie, de l'Afrique, et même des Indes Orientales / par Jean-Claude Flachet* (Lyon, 1766), 181.
 8. The wooden galleries are mentioned in Ayverdi, *Osmanlı Mi'marisinde Fâtih Devri*, 715–27, esp. 723, and in Eldem and Akozan, *Topkapı Sarayı*, 75–77, Pls. 73–76, at 76. For pre-restoration photographs, see Tahsin Öz, "Topkapı Sarayı Müzesi Onarımları," *Güzel Sanatlar* 6 (1949): 6–74, esp. 54–62.
 9. The previously whitewashed halls of the Treasury-cum-Bathhouse have recently been stripped of their plaster coating during an ongoing restoration project that has revealed their brick and stone masonry, along with modern interventions using concrete. Some of the basement windows were originally narrower and enlarged at an unknown date (oral communication with Dr. Nilay Özlü, a former member of the restoration team).
 10. On the name "Fatih Köşkü," see note 4 above. In the early 1940s the two wooden domes covering the third and fourth halls were replaced with the present concrete domes, and the originally much higher hipped roof was substituted by the current lower version: see Ayverdi, *Osmanlı Mi'marisinde Fâtih Devri*, 721. The ca. 1509–11 elevation drawing is published and discussed in Necipoğlu, *Topkapı Palace*, 128–29, fig. 74; and my "Virtual Archaeology," 320–21, 330.
 11. Cited in Necipoğlu, *Topkapı Palace*, 134: TSMA, D. 9713, dated 881 (1476). Facsimile and transcription published in Halil Sahillioğlu, "Osmanlı Para Tarihinde Dünya Para ve Maden Hareketlerinin Yeri (1300-1750)," *Ortadoğu Teknik Üniversitesi Gelişme Dergisi*, Special Issue, "Türkiye İktisat Tarihi Üzerine Araştırmalar" (1978): 1–38, at 29–31 (Table 1).
 12. For Selim I's will and his treasury seal, see İsmail Hakkı Uzunçarşılı, *Osmanlı Devletinin Saray Teşkilatı*, 2nd ed. (Ankara, 1984), 319–20. At an unknown date, probably after the mid-sixteenth century, the fountained belvedere and part of the courtyard arcade of the Inner Treasury were walled-in to create additional spaces for storing treasury items: see Necipoğlu, *Topkapı Palace*, 128, 138–39, fig. 73. These walls were removed during renovations in the 1940s: see Ayverdi, *Osmanlı Mi'marisinde Fâtih Devri*, 721, 726, fig. 1052; Öz, "Topkapı Sarayı Müzesi Onarımları," 54–62.
 13. For a more detailed discussion of the Treasury-Bath complex, see Necipoğlu, *Topkapı Palace*, 124–41. My book revised some observations made by the authors cited above in note 6 on this building, based on primary sources that were unavailable to them.
 14. The Law Code of Mehmed II (ca. 1477) specifies that the Privy Chamber (Has Oda) was already built by that time:

- Ahmed Akgündüz, *Osmanlı Kanunnâmeleri ve Hukukî Tahlilleri* (Istanbul, 1990), 326 (31). For this building, see Necipoğlu, *Topkapı Palace*, 141–58.
15. The Law Code of Mehmed II (ca. 1477) orders a Private Audience Hall (Arz Odası) to be built: Akgündüz, *Osmanlı Kanunnâmeleri*, 326 (30). For this building, see Necipoğlu, *Topkapı Palace*, 96–110.
 16. Muhammed İbrahim Yıldırım, trans. and ed., *İdris-i Bitlîsî Heşt Behîşt: VII. Ketîbe: Fatih Sultan Mehmed Devri 1451–1481* (Ankara, 2013), 195. Mentioned without a citation in Franz Babinger, *Mehmed the Conqueror and His Time*, ed. William C. Hickman, trans. Ralph Manheim (Princeton, 1978), 300.
 17. Edirneli Sehî, *Heşt Bihîşt: The Tezkire: An Analysis of the First Biographical Work on Ottoman Poets with a Critical Edition Based on Süleymaniye Library, Ayasofya, O. 3544 by Günay Kut / by Sehî Beg* (Cambridge, MA, 1978), 149–52.
 18. Necipoğlu, *Topkapı Palace*, 136. This document was published by Franz Babinger, who underestimated Mehmed II's sincere devotion to the relics: "Sultanischer Reliquien-schacher im Frankenland," in *Spätmittelalterliche fränkische Briefschaften aus dem grossherrlichen Seraj zu Stambul* (Munich, 1963), 96–119, esp. 108–14.

 20. Ibid., 177, 209–10.
 21. Astérios Argyriou and Georges Lagarrigue, "Georges Amir-outzès et son 'Dialogue sur la foi au Christ tenu avec le Sultan des Turcs,'" *Byzantinische Forschungen* 11 (1987): 29–221, at 65. Only the 1518 Latin translation of the *Dialogue* made in Rome survives, with its concluding pages lost. The no longer extant Greek original, retrospectively based on many such debates (*pluribus disputata*), has been hypothetically dated to ca. 1466–68 or 1470, at 50–52, 66–67. See also Jorge Ameruzes de Trebisonda: *El diálogo de la fe con el Sultán de los Turcos*, ed. Oscar de la Cruz Palma (Madrid, 2000).
 22. On the chronology of Islamic and non-Islamic books produced for Mehmed II in two periods, during the mid-1460s and the late 1470s, see Julian Raby, "Mehmed the Conqueror's Greek Scriptorium," *Dumbarton Oaks Papers* 37 (1983): 15–34, esp. 18–19, 21; "East and West in Mehmed the Conqueror's Library," *Bulletin du bibliophile* 1 (1987): 296–320; Julian Raby and Zeren Tanındı, *Turkish Bookbinding in the 15th Century: The Foundation of an Ottoman Court Style*, ed. Tim Stanley (London, 1993).
 23. On Sinan Pasha's recommendation of Molla Lutfi as librarian, see Ahmed ibn Muştafa Taşköprizâde (Tâsh-kubrîzâdah), *Şekâ'îku-nu'mânîye fî 'ulemâ'-i d-Devlet-i 'Osmânîye (al-Shaqâ'iq al-nu'mânîyya fî 'ulamâ' al-dawla al-'uthmânîyya)*, ed. Ahmed Şubhî Furât (Istanbul, 1985), 174. Mehmed II's tutor Sinan Pasha was appointed vizier in 875 (1470) and then served as grand vizier for a year (ca. 1476–77); Molla Lutfi accompanied the dismissed grand vizier during his exile: See *Türkiye Diyanet Vakfı İslâm Ansiklopedisi* (hereafter TDVİA), s.v. "Sinan Paşa," by Aylin Koç. The rich library collection endowed by their spiritual master Shaykh Vefa (Muslihuddin Mustafa) combined religious and rational sciences and was dominated by books on Sufism: see TDVİA, s.v. "Muslihuddin Mustafa," by Reşat Öngören, and note 58 below. Books on prayers, poetry, and astrology authored by Shaykh Vefa (Wafa', Abu al-Wafa') are under the following entries: MS Török F. 59, 46 {13}, 47 {6}, 50 {7}, 246 {1}, 248 {1–2}, 250 {7–8}, 263 {9–11, 18}, 313 {16–17}. Some of these works are discussed in the co-authored essay of Cemal Kafadar and Ahmet Karamustafa in this volume. For a discussion of amulets and talismans in the inventory, without mention of Shaykh Vefa, see Guy Burak's essay.
 24. MS Török F. 59, 58 {5–6}, 59 {8–9}, 151 {18–19}, 315 {16–17}, 316 {1–2}. For the inventory's entries on astronomy, astrology, and the mathematical sciences, see the essays of Tunç Şen and Cornell H. Fleisher; Elahieh Kheirandish; and Jamil Ragep et al.
 25. On three extant manuscripts of 'Atufi's compendium of medical works, see Fehmi Ethem Karatay, *Topkapı Sarayı Müzesi Kütüphanesi Arapça Yazmalar Kataloğu*, 3 vols. (Istanbul, 1962–66), nos. 7373–76: A 2095, A 2107, A 2117. For 'Atufi's biography and works, see Taşköprizâde, *Şekâ'îku-nu'mânîye*, 416–17; Nev'îzâde Atâ'î, *Şakaik-i Nu'maniye ve Zeyilleri*, ed. Abdülkadir Özcan, 5 vols. (Istanbul, 1989), 1:415; TDVİA, s.v. "Atûfî, Hayreddin Hızır," by İsmail L. Çakan; Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 117nn628–29, 461n2512. On 'Atufi's connection with his hometown Merzifon, see Cemal Kafadar's essay in this volume.
 26. TSMA, D. 9587, fol. 2b. My dating of this document is based on the number of tutors in the "palace school" that was raised to four by 1504; see Menavino in note 105 below.
 27. See pages 24, 40, 449, 498 (pagination in Arabic numerals) in Bayezid II's "Register of Rewards" (*in'âmât defteri*), which continues with some of Selim I's donations and those from the beginning of Sultan Süleyman's reign until 1527: Istanbul, Belediye Kütüphanesi (Atatürk Kitaplığı), Muallim Cevdet 0.71. The register is analyzed and reproduced in facsimile in Hilal Kazan, "XV. ve XVI. Asırlarda Osmanlı Sarayının Sanatı Himayesi" (PhD diss., Marmara Üniversitesi, 2007). I thank Zeren Tanındı for providing a copy of this dissertation. Another dissertation brought to my attention by Tülay Artan shows that 'Atufi regularly received donations as a preacher until the end of Bayezid II's reign: see İlhan Gök, "Atatürk Kitaplığı M.C. O.71 Numaralı 909-933/1503-1527 Tarihli İn'âmât Defteri (Transkripsiyon-Değerlendirme)" (PhD diss., Marmara Üniversitesi, 2014). For the two houses donated to the "preacher" (*vâ'iz*) 'Atufi from the Ayasofya endowments, see Erünsal, "908 (1502) Tarihli Saray Kütüphanesi Kataloğu," 262n17, 263m19; and his "Türk Edebiyatı Tarihi'nin Arşiv Kaynakları I: II. Bayezid Devrine Ait Bir İn'âmât Defteri," *Tarih Enstitüsü Dergisi* 10–11 (1981): 303–42.
 28. For Mevlana Lutfi's works, see İbrahim Maraş, "Tokatlı Molla Lutfi: Hayatı, Eserleri ve Felsefesi," *Dîvân: İlmî Araştırmalar* 14 (2003): 119–36. On accusations concerning his appropriation of books from the royal library and

- other collections, and the reasons for his execution during Bayezid II's reign, see İsmail E. Erünsal, "Fâtih Devri Kütüphaneleri ve Molla Lütî Hakkında Birkaç Not," *İstanbul Üniversitesi, Edebiyat Fakültesi Tarih Dergisi* 33 (1982): 57–78; and İsmail E. Erünsal, "Molla Lütî: Hakkındaki İthamlar ve Şikâyet Mektupları," *Türklük Araştırmaları Dergisi* 19 (2008): 179–96.
29. The two *waqfiyyas* referring to book keepers are cited in Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 370. The Mahgribi scholar's manuscript is at the Topkapı Sarayı Müzesi Kütüphanesi (hereafter TSMK), A. 59.
 30. Zeynep Atbaş has discovered a few manuscripts at the Topkapı library featuring seals of Bayezid II that have been carefully cut out from elsewhere and pasted indistinguishably into these volumes. One such example is even more unusual in that it has three seal impressions of Bayezid II, rather than the usual two; two of these seals were cut out from elsewhere and remounted in that manuscript. Atbaş has also found a unique manuscript, which has three seal impressions of Bayezid II that were not cut out from elsewhere. See her essay in this volume.
 31. On Bayezid II's passion for books, see Zeren Tanındı, "Bayezid II's Collection of Illuminated Books," in *Kasayid-i Efsahi der medh-i Sultan Bâyezîd—Efsahi's Odes in Praise of Sultan Bayezid*, ed. Çağatay Anadol (Istanbul, 2012), 7–33. For his interest in history books, see Feridun M. Emecen, "II. Bâyezîd'in Tarih Merakı Üzerine Bir Not: Fenarîzâde Alâeddin Alî'nin Anonim Osmanlı Tarihi Derlemesi," in *Kitaplara Vakfedilen Bir Ömre Tuhfe: İsmail E. Erünsal'a Armağan*, 2 vols. (Istanbul, 2014), 1:331–44.
 32. For a modern catalogue of 135 Greek, Latin, Hebrew, Armenian, Syriac, Serbian, and French manuscripts now kept at the Topkapı library, see Gustav Adolf Deissmann, *Forschungen und Funde im Serai: mit einem Verzeichnis der nichtislamischen Handschriften im Topkapu Serai zu Istanbul* (Berlin, Leipzig, 1933). Julian Raby has attributed the production of some of these manuscripts to Mehmed II's court scriptorium on the basis of watermarks, dedications, and bindings in "Mehmed the Conqueror's Greek Scriptorium"; see also his "East and West in Mehmed the Conqueror's Library." According to Zeynep Atbaş, the non-Islamic manuscripts and fifteenth-century European printed books preserved at the palace library lack Bayezid II's seal (oral communication). The latter include Roberto Valturio's *De Re Militari* (Verona, 1472; TSMK, H. 2699), and Francesco Berlinghieri's Italian translation of Ptolemy's *Geographia* (Florence, 1482), which was first dedicated to Mehmed II but upon his death, was rededicated to Bayezid II. Another copy of the *Geographia* has a dedication to Bayezid's brother Prince Cem. Both printed editions feature hand-colored maps with gold-leaf borders, illuminations, and dedications. See Sean Roberts, *Printing a Mediterranean World: Florence, Constantinople, and the Renaissance of Geography* (Cambridge, MA; London, 2013), esp. 5–14.
 33. TSMA, D. 4: "Defter-i mevcûdât-i hizâne-i enderûnî," 13 Sha'ban 901 (April 27, 1496), fols. 1b, 3b, 4a, 4b, 5b, 6b, 7a, 8a. I interpret the word *imrânî* as a reference to *Âl-İmrân* (Family of 'Imran), third chapter of the Qur'an on the father of Maryam (Virgin Mary). The family includes 'Imran, St. Anne, Mary, and Jesus. In a later register, cited in note 37 below, this term is substituted with *gebrî*, meaning *gavur* (non-Islamic, or infidel). Seventeenth- to nineteenth-century Ottoman inheritance registers of *dhimmis* and non-Muslims somewhat pejoratively identified foreign books as "kefere kitabı" (infidel books); see İsmail E. Erünsal, *Osmanlılarda Sahaflık ve Sahaflar* (Istanbul, 2013), 328–29.
 34. TSMA, D. 3/1 "Mevcûdât-i hizâne-i enderûnî," compiled by two finance ministers (*defterdâr*), Mevlana Alaüddin and Kasım Çelebi, in the beginning of Sha'ban 907 (February 1502), fol. 4a.
 35. For this interpretation and well-known eye witness reports on Bayezid II's aversion to figural arts and the sale of his father's European paintings, see Necipoğlu, "Visual Cosmopolitanism," 30, 45–48.
 36. TSMA, D. 3/1, dated beginning of Sha'ban 907 (February 1502), fols. 1b, 4a, 5b, 6b. The later register dated 10 Sha'ban 910 (January 16, 1505), TSMA, D. 10026, is reproduced in Tahsin Öz, *Topkapı Sarayı Müzesi Arşivi Kılavuzu II* (Istanbul, 1938), document XXI, fol. 16b.
 37. TSMA, D. 3/2: "Defter-i mevcûdât-i hizâne-i enderûnî," written in Istanbul ca. 1518, fols. 1b, 9b, 12a–b.
 38. Deissmann, *Forschungen und Funde im Serai*, 3–8; Funda Berksoy, "The Cooperation of G.A. Deissmann and E.H. Eldem in the Classification of the Non-Islamic Manuscripts in the Topkapı Sarayı Museum," in *M. Uğur Derman Festschrift*, ed. İrvin Cemil Schick (Istanbul, 2000), 175–85, esp. 178–79. In 1859 the German scholar Constantin Tischendorf discovered Kritoboulos's Greek chronicle of Mehmed II's reign in a chest of manuscripts shown to him: Emil Jacobs, *Untersuchungen zur Geschichte der Bibliothek im Serai zu Konstantinopel I* (Heidelberg, 1919), 112–13.
 39. TSMA, D. 4855, dated Zilkade 971, fols 3b–4a; discussed in Necipoğlu, *Topkapı Palace*, 137, 139.
 40. Gülru Necipoğlu, "A Kanun for the State, a Canon for the Arts: The Classical Synthesis in Ottoman Art and Architecture during the Age of Süleyman," in *Soliman le Magnifique et son temps, Actes du Colloque de Paris Galeries Nationales du Grand Palais, 7-10 mars 1990*, ed. Gilles Veinstein (Paris, 1992), 195–216; Cornell H. Fleischer, *Bureaucrat and Intellectual in the Ottoman Empire: The Historian Mustafa Âli* (Princeton, NJ, 1986).
 41. On Timurid and Turkmen libraries, see David J. Roxburgh, *The Persian Album, 1400-1600: From Dispersal to Collection* (New Haven, CT; London, 2005), 28–29, 133–44; and the unpublished doctoral dissertation by Simon Rettig, "La production manuscrite à Chiraz sous les Aq Qoyunlu entre 1467 et 1503" (University of Aix-Marseille, 2011), introduction, esp. 13–15. In the fourteenth century, the Mongol-Ilkhanid ruler Ghazan Khan had established in his mausoleum complex in Tabriz a library (*bayt al-kutub*) and an annexed scriptorium (*bayt al-qānūn*) staffed with a scribe, a librarian, and a custodian who should repair the library

- books: see Ghiyās al-Dīn ibn Humām al-Dīn Khvānd Mīr, *Tārīkh-i ḥabīb al-siyar*, vol. 3, trans. and ed. Wheeler M. Thackston as *The Reign of the Mongol and the Turk* (Cambridge, MA, 1994), 107; Nourane Ben Azzouna, *Aux origines du classicisme: Calligraphes et bibliophiles aux temps des dynasties mongoles (Les Ilkhanides et les Djalayirides, 656-814 / 1258-1411)* (Leiden and Boston, 2018).
42. The earliest reference I could find to the scriptorium is in an account book dated 1527–28 at the Başbakanlık Osmanlı Arşivi (hereafter BOA), MAD 17884, fol. 61. It mentions the “repair of the workshop of painter-decorators (*karḥāne-i naḳḳāşān*) and the arch above the menagerie (*der fevk-i arslānhāne*) near the Hippodrome,” Necipoğlu, *Topkapı Palace*, 48, 271n71. For the three mosaic-decorated Byzantine churches around the Hippodrome that were converted by Mehmed II into a royal menagerie for lions, an elephant house, and a powder magazine, see page 46; and Gian Maria Angiolello, *Viaggio di Negroponte*, ed. Cristina Bazzolo (Vicenza, 1982), 27–28.
 43. Necipoğlu, “Kanun for the State”; see also Hilāl Kazan, *XV. Asırda Sarayın Sanatı Himayesi* (Istanbul, 2010).
 44. TSMA, D. 9587, fols. 3b, 5a. Cited in Necipoğlu, “Kanun for the State,” 204, 215n13. See also Kazan, *XV. Asırda Sarayın Sanatı Himayesi*, 139, 163; Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 434.
 45. Bimal Kumar Datta, *Libraries and Librarianship of Ancient and Medieval India* (Delhi, 1970), 61–63. On the “House of Felicity,” see Gulbadan Begīm, *Humāyunnāma*, ed. and trans. Wheeler M. Thackston, *Three Memoirs of Humayun*, 2 vols. (Costa Mesa, CA, 2009), 1:23. On Humayun’s fall from the stairs of his library, see Abū’l-Faẓl ‘Allāmī, *The History of Akbar*, ed. and trans. Wheeler M. Thackston, vol. 2 (Cambridge, MA; London, 2016), 498–99. For Sher Mandal, sometimes attributed to the Afghan ruler Sher Shah (1540s), but most probably built by Humayun, see Catherine B. Asher, *The New Cambridge History of India: Architecture of Mughal India*, vol. 1, part 4 (Cambridge, 1992), 33–34. For the less likely hypothesis that it may have been built later under Akbar, in the second half of the sixteenth century, see Ebba Koch, *Mughal Architecture: An Outline of Its History and Development (1526-1858)* (Munich, 1991), 38–41.
 46. On Akbar’s library, its organization, his favorite books, and his custom of having books read aloud to him, see Abū’l-Faẓl ‘Allāmī, *The Ā’in-i Akbarī*, vol. 1, trans. H. Blochmann, 3rd ed. (Calcutta, 1927), 109–13; Ellen Smart, “Akbar, Illiterate Genius,” in *Kalāndarśana: American Studies in the Art of India*, ed. Joanna Williams (New Delhi, 1981), 99–107. For the Mughal imperial library and the swelling of its holdings from 4,000 books to 24,000, see Kavita Singh, *Real Birds in Imagined Gardens: Mughal Painting between Persia and Europe* (Los Angeles, 2017), 20–21; John Seyller, “The Inspection and Valuation of Manuscripts in the Imperial Mughal Library,” *Artibus Asiae* 57, no. 3/4 (1997): 243–350. The 24,000 books of Akbar’s library are mentioned in Joannes de Laet’s *De Imperio Magno Mogolis* (1631); Joannes de Laet, *The Empire of the Great Mogol*, trans. J. S. Holyland (Bombay, 1928), 108–9. Cited in Sh. Abdul Aziz, *The Imperial Library of the Mughuls* (Delhi, 2009), 57–58; V. S. Smith, “The Treasure of Akbar,” *Journal of the Royal Asiatic Society of Great Britain and Ireland* (April, 1915): 231–43, at 243; and Datta, *Libraries and Librarianship*, 64–67.
 47. For the building in Ardebil, see Kishwar Rizvi, *The Safavid Dynastic Shrine: Architecture, Religion, and Power in Early Modern Iran* (London, 2011), 143–55.
 48. On Chardin’s and Kaempfer’s accounts, see Mariana Shreve Simpson, “The Making of Manuscripts and the Workings of the *Kitab-khana* in Safavid Iran,” in *The Artist’s Workshop*, ed. Peter M. Lukehart (Washington; Hanover, NH, 1993), 105–21, at 113–14. See *Voyages du Chevalier Chardin en Perse et autres lieux de l’Orient*, ed. L. Langlès, 10 vols. (Paris, 1811), 7:372–74; Engelbert Kaempfer, *Am Hofe des persischen Grosskönigs (1684–1685)*, ed. Walter Hinz (Tübingen, Basel, 1977), 154–56.
 49. *Tadhkirat al-Mulūk: A Manual of Safavid Administration (ca. 1137–1725), Persian Text and Facsimile (B.M. Or. 9496)*, trans. Vladimir Minorsky (Cambridge, England, 1980), 100. However, in sixteenth- and seventeenth-century Uzbek Central Asia, libraries (*kitāb-khāna*) simultaneously functioned as treasuries (*khazīna al-kutub*) for the conservation of volumes and workshops for manuscript production: Maria Szuppe, “Lettrés, patrons, libraires. L’Apport des recueils biographiques sur le rôle du livre en Asie centrale aux XVI^e et XVII^e siècles,” *Cahiers d’Asie centrale* 7 (1999): 99–115, esp. 103. This Timurid practice was also perpetuated in the Mughal court: Maktub Khan, the supervisor (*dārūgha*) of Jahangir’s library (*kitābkhāna*), was also in charge of the painters’ studio: *The Jahangirnama: Memoirs of Jahangir, Emperor of India*, trans., ed., annotated by Wheeler M. Thackston (Oxford, 1999), 27, 269; cited in Abdul Aziz, *Imperial Library of the Mughuls*, 59.
 50. Thomas Dacosta Kaufmann, “From Treasury to Museum: The Collections of the Austrian Habsburgs,” in *The Cultures of Collecting*, ed. John Elsner and Roger Cardinal (Cambridge, MA, 1994), 137–54, esp. 137–42. An extant palace that combines library and royal treasury is that of the Wittelsbach dynasty known as Schatzkammer der Residenz (Treasury of the Munich Residence), which goes back to the reign of Duke Albrecht V (r. 1516–75): see Dorothea Diemer et al., *Die Münchener Kunstkammer* (Munich, 2008). On the union of *Kunstkammer* and library, particularly in the seventeenth and eighteenth centuries, see Joseph Connors and Angela Dressen, “Biblioteche: l’architettura e l’ordinamento del sapere,” *Il Rinascimento italiano e l’Europa*, vol. 6 of *Luoghi, spazi, architetture*, ed. Donatella Calabi and Elena Svaldruz (Treviso-Costabissara, 2010), 199–228, 752–55, at 224–28.
 51. Connors and Dressen, “Biblioteche,” 212; Csaba Csapodi, *The Corvinian Library, History and Stock*, trans. Imre Gombos (Budapest, 1973); Marcus Tanner, *The Raven King: Matthias Corvinus and the Fate of His Lost Library* (New Haven, CT; London, 2009), 8–10.
 52. Maróth, “Library of Sultan Bayazit II,” 112.

53. Connors and Dressen, "Biblioteche," 205–6.
54. Ibid., 209.
55. Ibid., 203–4, 213–15. For the Medici and other Renaissance libraries, see also Angela Dressen, *The Library of the Badia Fiesolana: Intellectual History and Education under the Medici (1462-1494)* (Florence, 2013); Guido Arbizzoni, Concetta Bianca, and Marcella Peruzzi, eds. *Principi e signori: Le Biblioteche nella seconda metà del Quattrocento* (Urbino, 2010).
56. On this high number, see Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 126–27, who thinks it is probably an exaggeration. Mü'eyyadzade's library collection is discussed and compared to that of Bayezid II by Judith Pfeiffer in the present volume, where she agrees with Erünsal's assessment in this regard.
57. TSMA, D. 9291/1-2: This archival document, in two parts, is analyzed in Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 126–27, and in greater detail by Judith Pfeiffer in the present volume.
58. TSMA, D. 9559, 3b–39b. The 839 books endowed by Mehmed II are grouped in the following order: Qur'anic exegesis, hadith, jurisprudence, rational theology, philosophical wisdom, Arabic books, logic, and miscellanea. The last eclectic category of only 31 volumes features books on advice literature, lives of imams, Sufism, medicine, astronomy, astrology, Euclid's *Elements*, Persian poetry, Persian works by Rumi, and, curiously, a *History of Genghis Khan*. During Mehmed II's reign, a similar classification that does not exclude the rational sciences is found in the *waqfiyyas* of the public libraries established by the grand vizier Mahmud Pasha and Shayh Vefa. The latter was the spiritual mentor of Sinan Pasha and the palace librarian Molla Lutfi; on his endowed library see note 23 above. By the end of Sultan Süleyman's (d. 1566) reign, the number of books in Mehmed II's mosque complex rose to 1,770: Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 108–10, 458, 470–75, 661–63. Erünsal discusses two extant catalogues of Mehmed II's public library; one was prepared under Bayezid II by Şah Çelebi İbnü'l Fenari around 907–18 (1501–12): BOA, D. HMH. STF. No. 21. 941/B. The other one, compiled in 968 (1560–61) by Hacı Hasanazade under Sultan Süleyman (TSMA, D. 9559), was preceded by a now lost third catalogue by Molla Arab (i.e., Hacı Mehmed), Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 128, 465–75. Hacı Hasanazade preferred to base his own catalogue on that of Molla Arab because it was organized better and it more efficiently facilitated the checking out and returning of books.
59. On books endowed by Mehmed II and Bayezid II, see Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 425. For the parallel case of endowed public libraries in the Mamluk Sultanate, see Doris Behrens-Abouseif, *The Book in Mamluk Egypt and Syria (1250-1517): Scribes, Libraries and Market* (London and Boston, 2019), 48–49.
60. For these exaggerated numbers, the description of libraries, and further bibliography, see Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 18–74; İsmail E. Erünsal, *Orta Çağ İslâm Dünyasında Kitap ve Kütüphâne* (Istanbul, 2018), 417–19; Youssef Eche (Yūsuf 'Ishsh), *Les bibliothèques arabes publiques et semi-publiques en Mésopotamie, en Syrie et en Égypte au Moyen Age* (Damascus, 1967); Houari Touati, *L'armoire à sagesse: Bibliothèques et collections en Islam* (Paris, 2003).
61. Hirschler, *Ashrafiya Library Catalogue*, 4, 33. Hirschler considers the more than 2,000 books listed in the catalogue of the somewhat minor Ashrafiyya library, kept in a mausoleum-cum-madrasa complex in Ayyubid Damascus, as a "remarkably large collection," 2–3. See also Behrens-Abouseif, *Book in Mamluk Egypt*, 7–8, and the section on "The Size of Libraries," 46–50, for "exaggerated, legendary numbers given for earlier periods."
62. "Dalla banda sinistra dove è servito dalli huomini vi sono doi Librarie grandi, cioè una commune dietro le stanze de' Camerieri, e Paggi, che l'hanno in custodia, & l'altra, che è secreta, più indentro, & attaccata alle stanze di esso Gran Signore, & è la più famosa: ma sempre nella sua camera, tanto da una parte, come dall'altra, sono due armarij, con porticelle di christallo dentro a'quali sono sempre doi dozzine di libri miniati, che esso usa sempre di legere: essendo detti armarij bassi: sicche standosi à sedere alla turchesca, si vede li libri, che vi sono per la trasparenza del christallo: di modo, che esso Gran Signore li può commodamente pigliare, usando spesso di legere" (Domenico Hierosolimitano, *Relatione della gran città di Costantinopoli* [London, British Library], Harley 3408, fols. 36–37, 39; translated in Necipoğlu, *Topkapı Palace*, 153). See more recently *Domenico's Istanbul*, where the Italian text is translated with an introduction and commentary by Michael Austin, ed. Jeffrey Lewis (Warminster, Wiltshire, 2001), 21. The commentary by Austin is unreliable in its identification of the sites of libraries at the Topkapı Palace and their construction chronology: see 139–43.
63. Domenico specifies that the two libraries were in the courtyard of male servants, not in the female quarters of the harem (see the Italian passage quoted in note 62 above). Domenico's description is confusing because he does not describe the courtyard of male servants from the vantage point of the palace's third main gate leading into the third courtyard. Having described the adjacent harem for female residents, and looking at the sultan's quarters from the vantage point of the outer garden fronting the harem's garden façade, he correctly refers to the women's quarters abutting the royal stables as being on the right side, and the courtyard of male pages as being on the left side. Hence the two libraries were not on the left side of the male section of the third courtyard upon entering from the third gate, but rather on the left side of the harem's outer garden façade (i.e., in the male sector of the third court). Some books may indeed have been kept at the harem, but there is no information concerning the presence of a library in the women's quarters during the fifteenth and early sixteenth centuries or in later periods, for that matter, although there are references to books being loaned to women in the harem

from the Inner Treasury in the second half of the sixteenth century and later (cited in note 129 below).

64. “Nella Libreria, che è alli Camerieri, a Paggi, vi sono libri di tutte sorti dei linguaggi di gran bellezza tutti scritti à penna, & in particular cento venti pezzi di quelli di Costantino Magno, ciascuno lungo doi braccia, e non più di tre palmi largo, fatti di carta bergamina sottile, che par seta, dove stà scritto il Testamento vecchio, e nuovo, & altre Historie, vite dei Santi, tutti à lettere d’oro, coperti d’argento indorato, con gemme di prezzo inestimabile, i quali non si permette, che siano toccata da niuno” (Domenico Hierosolimitano, *Relatione della gran città di Costantinopoli*, 37). I have slightly modified Austin’s translation in *Domenico’s Istanbul*, 21.
65. These manuscripts were selected by the French ambassador Girardin and his two advisors from a set of about 200 Greek manuscripts said to have been removed from the palace collection by the mediation of an Italian renegade: “un renegat italien, l’homme d’esprit, qui est au service de seliktar, premier officier du sérail et favori du Grand Seigneur. Il a eu permission de visiter les livres et de les communiquer, et m’ayant fait apporter, en différents fois, tous ce qu’il y a d’auteurs grecs, qui ne consistent pas en plus de deux cents volumes.” Quoted in Jacobs, *Untersuchungen zur Geschichte der Bibliothek im Serai zu Konstantinopel*, 121–334, at 121. The list of 16 manuscripts that arrived in Paris in 1688 is on p. 122, with their seals illustrated on p. 127.
66. On Marsili’s inventory, see Angelo Bernasconi, “Un gruppo di codici greci bolognesi proveniente della biblioteca di sultano Mustafà I,” *Scriptorium* 40 (2006): 254–68, with 8 plates. The inventory explains that the Greek manuscripts Marsili bought were extracted (*estratti*) by the Livornese renegade called “Trinch Meunet Ayà [sic Agà]” from the “Imperial Seraglio di Costantinopoli” and donated to that renegade by “Sultan 4°.” Elsewhere the renegade is named “Mustafà” by Marsili: see Chiara Fraggiana di Sarzana, “Lo *Iatosophion* della Biblioteca Universitaria di Bologna: Il 3632,” in *BUB: Ricerche e Cataloghi sui Fondi della Biblioteca Universitaria di Bologna*, ed. B. Antonino (Bologna, 2010), 9–13, at 11n4. Bernasconi, who discovered Marsili’s inventory, speculates that “Sultan 4°” was probably Murad IV (r. 1623–40). In my opinion this sultan may have been Mehmed IV (r. 1648–87), whose reign is closer to the dates when Girardin (1687) and Marsili (1692) acquired the palace manuscripts, which according to Mustafa Agha were donated to him from the palace library with the sultan’s permission. Following Jacobs (*Untersuchungen*, 121–31), Bernasconi believes that the seal stamped in most of the Paris and Bologna manuscripts could be that of Prince Mustafa (1591–1639), who briefly ruled as Sultan Mustafa I (r. 1617–18, 1622–23). Jacobs misidentified the seals stamped on the Greek manuscripts in Paris, acquired by the French ambassador Girardin, as those of “Prince Mustafa,” with only one seal of “Sultan Mustafa.” Jacobs lists and illustrates these seals (*Untersuchungen*, 122, 127), but the single sultanic seal is in fact the almond-shaped seal of Bayezid II (Paris, BnF, Grec 1672, Plutarch), while the octagonal seal, which differs from those of Ottoman sultans and princes, must have been that of the Livornese Mustafa Agha. This seal of “God’s slave Mustafa,” dated 1684–85, reads *yâ kâfî al-muhimmât ‘abdahu Muṣṭafâ sene* [10]96, with *yâ ghafûr* repeated three times. Zeynep Atbaş, curator of the Topkapı library, has found no seals of sultans in current non-Islamic manuscripts under her custody.
67. For this second library, see Domenico Hierosolimitano, *Relatione della gran città di Costantinopoli*, 36–37, cited fully in note 62 above. Flach’s eighteenth-century description of the Privy Chamber complex prior to the demolition of some structures is in his *Observations sur le commerce*, 185–86, 195–96. The chronicler ‘Ata records the replacement of these structures with a new dormitory under Sultan Abdülmecid (r. 1839–61), who extensively renovated the third court after a fire in 1856: Aḥmed Ṭayyâr-zâde ‘Aṭâ, *Târîḫ-i ‘Aṭâ*, 5 vols. (Istanbul, 1292–93 [1875–76]), 1:30, 312–13.
68. Cited in Necipoğlu, *Topkapı Palace*, 96.
69. See the Italian text quoted in note 62 above. Discussed in Necipoğlu, *Topkapı Palace*, 153.
70. *Ibid.*, 153, 288n150.
71. For readers of Ottoman sultans and their custom of eating at the Privy Chamber, see *ibid.*, 153, 288n151. On books and Sultan Süleyman, see Luigi Bassano, *Costumi et i modi particolari della vita de’ turchi* (Rome, 1545), ed. Franz Babinger (Munich, 1963), fols. 20v–21r [pages 47–48]; Benedetto Ramberti, *Libri tre delle cose dei Turchi* (Venice 1539), Book III: 30b–31a. History books read aloud to Shah Jahan focused on his dynasty’s Timurid legacy and the deeds of his Mughal ancestors: Rajeev Kinra, *Writing Self, Writing Empire: Chandar Bhan Brahman and the Cultural World of the Indo-Persian State Secretary* (Oakland, CA, 2015), 121–22. A history of Shah Jahan’s ancestor Timur, the *Zafarnāma*, was read out to him at night: Inayat Khan, *The Shāh Jahān Nāma of ‘Inayat Khan: An Abridged History of the Mughal Emperor Shah Jahan, Compiled by His Royal Librarian*, trans. from the Persian by A. R. Fuller, ed. W. E. Begley and Z. A. Desai (New Delhi, 1990), 573.
72. The earliest reference to items loaned to the Privy Chamber that I have come across appears in an Inner Treasury inventory of Selim I (ca. 1518), TSMA, D. 3/2, fols. 14b–15b: “Contents of the Imperial Inner Treasury, kept inside the storage chests for swords near the Privy Chamber” (*Mevcûdât-i ḥizāne-i ‘āmir-i enderûnî der enderûn-i anbârḥâ-i şimşir der nezd-i oda-i ḥāşşa*). Among the contents of those chests are listed swords, daggers, and book pouches.
73. A dated example of a librarian’s note is found on fol. 1a of an album compiled during Selim I’s reign and stamped with his almond-shaped sovereignty seal (TSMK, H. 2160): “This is the book that exited the [Privy] Chamber in order to be stored, in the month of Dhū’l Hijja during the year 983 (1576)” (*Sene 983 mäh-i zîl-hiccede odadan ḥıfz olunmağa çıkan kitâbdur*). This album was thus kept at the Privy Chamber complex before being removed for storage at the Inner Treasury in 1576.

74. 'Atā, *Tārīh-i 'Atā*, 1:92, 209–10, 313; 'Abdurrahmān Şeref, "Topkapı Saray-ı Hümayūnı," *Tārīh-i 'Osmānī Encümeni Mecmu'ası* 5-12 (1326–27/1910–11), 405. The Privy Chamber Treasury is identified as the Treasury of Holy Relics (*emānāt-i mübāreke hazīnesi*) and Treasury of the Sword-bearer (*Silāhdār Ağa hazīnesi*) in two nineteenth-century ground plans. Late sixteenth-century documents refer to the "Treasury of the Privy Chamber" as "*hāne-i hāşşa hazīnesi*; oda hazīnesi, odada olan hazīne-i hāşşa": Necipoğlu, *Topkapı Palace*, 133–41, 153–58.
75. Bayezid II's almond-shaped seal measures 2.2 x 1.4 cm and reads: *Bāyezīd bin Meḥammed el-muẓaffer dā'imā* (Bayezid Son of Mehmed, Always Victorious). Two previously unknown almond-shaped seals of Bayezid II were discovered by Zeynep Atbaş, who attributes them to the end of Bayezid's days as prince or to the first year of his reign. See her essay in this volume with its appendix containing examples of Bayezid II's ex libris. Garo Kürkman has identified in the Venice archives a hitherto unknown round seal of Bayezid II, stamped on an Ottoman document dated 909 (1503). This seal is the same as Selim I's round treasury seal bearing at its center the inscription *Sultān Selīm Şāh* and surrounded by the four-fold rotation of the pious phrase *Tawakkaltu 'alā Khāliqī* (I have placed my trust in the Creator). The only exception is that the center of the newly discovered seal is inscribed *Sultān Bāyezīd*. This seal will be published by Garo Kürkman in his forthcoming book, *Anatolian Seals and Engravers* (oral communication with Zeynep Atbaş).
76. While Atbaş's Appendix I lists every book with Bayezid II's seal impression that she could identify at the Topkapı Palace Museum Library, Zeren Tanındı's Appendix II is only a selective sample of primarily artistic manuscripts with the same seal that were transferred from the Topkapı Palace to other libraries. The Süleymaniye Library has many more manuscripts with Bayezid II's seal.
77. On 'Abd al-Qadir al-Maraghi's manuscript dedicated to Murad II (TSMK, R. 1726, Karatay, F 279) see Raby and Tanındı, *Turkish Bookbinding*, 112–17. Another manuscript dedicated to Mehmed II on fol. 1b by the son of 'Abd al-Qadir after his father's death bears the name *'Abd al-'Azīz bin al-marḥūm al-maghfur Khwāja Kamāl al-Dīn 'Abd al-Qādir* (TSMK, A. 3462, Karatay F 278). For 'Abd al-Qadir al-Maraghi's works on music, which survive in the Topkapı and other libraries, see Recep Uslu, *Merâğî'den Sultan II. Murad'a Müziğin Maksatları: Makāsidi'l-Elhān* (Ankara, 2015), 20–23. On his son and grandson, who were active in the Ottoman empire and dedicated works on music to later sultans, see 30–34; and *TDVİA*, s.v. "Abdülkâdir Merâğî," by Nuri Özcan. Manuscripts on music listed in 'Atufi's inventory are considered by Jamil Ragep et al. in the present volume.
78. For Bayezid II's ex libris samples, see my Appendix III: 6, 26.2, 28, 29, 31, 36, and Plates 9 [1], 10, 11 [2]; and Zeynep Atbaş's essay with an appendix, "Examples of Bayezid II's Ex Libris." For ownership notes, annotations, and the ranking system of manuscripts in the Mughal imperial library, see Seyller, "Inspection and Valuation of Manuscripts," 243–349. The quotation from the *Ā'in-i Akbarī* is in note 46 above. On ex libris examples, seal impressions, value notations, and other annotations by librarians in the Decani ruler Ibrahim 'Adil Shah II's (r. 1580–1627) surviving books from the dispersed Bijapur royal library, see Keelan Overton, "Book Culture, Royal Libraries, and Persianate Painting in Bijapur, circa 1580–1630," *Muqarnas* 33 (2016): 91–154.
79. TSMA, D. 10017, fol. 2a: Cited in Kazan, *XVI. Asırda Sarayın Sanatı Himayesi*, 124n308.
80. TSMA, D. 10017, fol. 3a: Cited in Kazan, *XVI. Asırda Sarayın Sanatı Himayesi*, 125–26. Books authored by Prince Korkud at the Süleymaniye Kütüphanesi (hereafter SK) are mentioned in 126n31. Zeynep Atbaş has discovered previously unknown books donated by Bayezid II to his less famous son, Prince Mehmed: see her essay in this volume.
81. For lists of books requested by Mehmed III, see TSMA, E. 861 (12). On books lost by Selim I, see Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 129–31, 129nn682–83. Erünsal cites two documents, an inventory of books kept at the citadel palace of Aleppo prepared for Selim I, and a letter concerning the search for this sultan's own lost books in 1517. The letter by the governor of Cairo, Khayr Bek, was sent to the sultan's chief treasurer, reporting that he had already dispatched one of the lost books and was sending four more by land, as they might be damaged by humidity on a ship (TSMA, E. 6196).
82. I found this reference in TSMA, D. 9499, dated 974 (1566), fol. 2a. On archival registers also being taken to military campaigns in chests, see Feridun M. Emecen, "Sefere Götürülen Defterlerin Defteri," in *Prof. Dr. Bekir Kütükoğlu'na Armağan* (İstanbul, 1991), 241–68.
83. A document dated 969 (1561) lists 122 books sent from the imperial treasury to one of the newly completed Süleymaniye madrasas: TSMA, E. 861 (1). Books removed from the imperial treasury (*hizāne-i 'āmiri*) and endowed by Selim II in 1572 to the madrasa of the Selimiye complex in Edirne are listed in his *waqfiyya* (Ankara, VGM 1395): see Müjgan Cunbur, "Kütüphane Vakfiyelerinde İlimlerin Sınıflandırılması ve Bibliyografik Künyeler," *Türk Kütüphaneciliği (Turkish Librarianship)* 19, no. 4 (1970): 309–16, at 313–14; Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 148n779, 371. Zeren Tanındı's essay and her Appendix II at the end of this volume document the transfer of Inner Treasury books from the Topkapı Palace to public royal libraries in Istanbul and elsewhere. These books are now kept in the following collections of the Süleymaniye Library: Ayasofya, Fatih, Turhan Valide, Şehzade Mehmed, Süleymaniye, and Laleli; and in Istanbul: Museum of Turkish and Islamic Arts, Istanbul University Manuscript Library, Fatih Millet, Köprülü, and Nuruosmaniye libraries. Tanındı has also discovered manuscripts stamped with Bayezid II's seal at the Bursa Library, Manisa Library, Amasya Library, and other libraries outside Turkey.

84. I have examined a series of unpublished mid- to late-sixteenth-century archival registers that list books appropriated from deceased grandees for the Inner Treasury: TSMA, E. 861 (4–8). For specially designated spaces in the Inner Treasury containing confiscated books, see Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 195n1022.
85. Ibid., 193–99.
86. Ibid., 195n1022, 213, 417. The eighteenth-century Armenian author Ghukas Inchichean mentions two new libraries at the Topkapı Palace, that of Ahmed III inside the third courtyard and that of Mustafa III near the mosque of gardeners in the outer garden. The latter featured more than 5,000 volumes: G. Inchichean, *XVIII. Asırda İstanbul*, trans. H. D. Andreasyan (Istanbul, 1976), 31. On the emergence of purpose-built public libraries as a new building type in which works of literature, history, political advice, moral philosophy, and sometimes the sciences began to hold a more prominent place as compared to former madrasa and mosque libraries, see Yavuz Sezer, “The Architecture of Bibliophilia: Eighteenth-Century Ottoman Libraries” (PhD diss., Massachusetts Institute of Technology, 2016). Sezer notes that books endowed by Mustafa III for the corps of gardeners were transferred in 1831 to the madrasa of the Laleli Mosque built by him (107–9). Abdülhamid II (r. 1876–1909) selected volumes from the Inner Treasury to be rebound and transferred to the Yıldız Palace, but upon his demise these books returned to the Topkapı Palace, with some items given to the Istanbul University Manuscript Library.
87. For books supplied from the Mamluk palace at the citadel and other private collections to public religious institutions as *waqf*, see Behrens-Abouseif, *Book in Mamluk Egypt*, esp. 17–28.
88. On the migration of these books to other libraries, see notes 83–86 above.
89. One of the few studies on a late-Ottoman book collection is Berat Açı, ed., *Osmanlı Kitap Kültürü: Cârullah Efendi Kütüphanesi ve Derkenar Notları* (Ankara, 2015).
90. SK, Ayasofya 981, fol. 1a: reproduced in Raby and Tanındı, *Turkish Bookbinding*, 102, fig. 83.
91. TSMK, B. 411.
92. Molla Lutfi’s encyclopedic classification omits the rational sciences, despite his expertise in these fields: see Maraş, “Tokatlı Molla Lutfi,” 128, 134–35. For ‘Ali Qushji’s lost treatise, see *TDVİA*, s.v. “Ali Kuşçu,” by Cengiz Aydın. On an earlier Ottoman classification of 100 sciences, dated 1424, whose author explained his aim as adding 40 fields of knowledge to the 60 covered in Fakhr al-Din al-Razi’s (d. 1210) Persian encyclopedia (discussed below in note 93), see Kemal Faruk Molla, “Mehmed Şah Fenârî’nin *Enmûzecu’l-Ulûm* adlı Eserine Göre Fetih Öncesi Dönemde Osmanlılar’da İlim Anlayışı ve İlim Tasnifi,” *Dîvân İlmi Araştırmalar* 18 (2005): 245–73.
93. On the relevance of classifications of sciences to libraries, see Alain Besson, *Medieval Classification and Cataloguing: Classification Practices and Cataloguing Methods in France from the 12th to 15th Centuries* (Biggleswade, England, 1980); and Hirschler, *Ashrafiya Library Catalogue*, esp. 72–80. On Islamic classifications of knowledge and the influence of al-Razi’s version in sixteenth-century Iran, see Gerhard Endress, “The Cycle of Knowledge: Intellectual Traditions and Encyclopedias of the Rational Sciences in Arabic Islamic Hellenism,” in *Organizing Knowledge: Encyclopaedic Activities in the Pre-Eighteenth Century Islamic World*, ed. Gerhard Endress (Leiden; Boston, 2006), 103–35, esp. 128–29. The four manuscripts on encyclopedic classifications of sciences by al-Razi and al-Ghazali listed in ‘Atufi’s inventory (64 {16–19}, 65 {1}) are discussed in Abdurrahman Atçıl’s essay in this volume. I find it noteworthy that an anonymous classification of sciences in Arabic is specified in the inventory as having been “checked out” (300 {9–11}).
94. The categories of knowledge adopted by ‘Atufi are listed in MS Török F. 59, 2–5, a section that has a few missing pages. On his categorization of some books “based on the criterion of adherence to Islamic doctrine,” see Dimitri Gutas’s essay in this volume. On the primacy accorded to the Bible and theological books in Italian libraries see Dressen, *Library of the Badia Fiesolana*, 35. The unconventional classification system of books in Akbar’s library is reported by the disapproving historian ‘Abd al-Qadir Bada’uni (d. 1605) in a discussion of the court poet Fayzi’s (d. 1595) books that were passed on to the Mughal emperor upon his death: cited in Seyller, “Inspection and Valuation of Manuscripts,” 270.
95. Inheritance registers (*muhallefât*) from the seventeenth century onward are dominated by Arabic and Turkish books, with very few works in Persian according to Erünsal, *Osmanlılarda Sahaflık ve Sahaflar*, 326.
96. Erünsal notes in *Osmanlı Vakıf Kütüphaneleri*, 464–65, that, unlike other book catalogues, ‘Atufi’s inventory gives no total count of books, revealing that its main purpose was not annual inventory counting but rather finding the books, with empty spaces left for new acquisitions.
97. Erünsal, “Brief Survey,” 275.
98. MS Török F. 59. Checked out books are cited on pages 165 {lower right margin}, 167 {upper and lower right margin}, 168 {upper left margin}, 169 {upper and lower right margin}, 171 {lower right margin}, 178 {lower left margin}, 181 {lower right margin}, 190 {mid-left margin}, 299 {mid-right margin}, 300 {mid-left margin}, 307 {right margin, between lines 4 and 5}, 357 {lower right margin}, 359 {mid-right margin}, 361 {mid-right margin}.
99. MS Török F. 59. Books donated as gifts are cited on pages 110 {18–19}, 169 {1}, 187 {between 1 and 2}, 293 {14, 18}, 294 {18}.
100. TSMA, D. 8228: Molla Kasım borrowed these books in 983 (1575–76); they were passed on to his successor İsa Çelebi in 988 (1580). Cited in Aykut Kazancıgil, “Fatih Devri İlmî Hayatı içinde Tıp Eğitimi ve Tababet,” in *İstanbul Armağanı*, ed. Mustafa Armağan, 4 vols. (1995), 1:256. Also discussed in Nühket Varlık’s essay in this volume, where

- she points out that some scholars have raised doubts about whether these two physicians were employed at the imperial palace or in a public royal hospital.
101. For the Head Physician's Tower, also called Baş Lala Kulesi, see Necipoğlu, *Topkapı Palace*, 187, 292–93n7, Pl. 11 (59). Examples of such library records that I have consulted include TSMA, E. 861 (12–17), D. 6083, and D. 3261.
 102. Sometimes organized alphabetically or thematically, medieval Arabic library catalogues shared no single classification system. Some of these catalogues would likely have been familiar to 'Atufi. For an elaborate "three-tier system" of organizing books according to alphabet, theme, and size in the Ashrafiyya library, see Hirschler, *Ashrafiyya Library Catalogue*, 65–79.
 103. Ankara, Vakıflar Genel Müdürlüğü Arşivi, 582/1, on page 33, cited in Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 380–81.
 104. Touati, *L'armoire à sagesse*, 8, 71, 293–300. See also Behrens-Abouseif, *Book in Mamluk Egypt*, 7–14, 52–69, especially for extant *khizānas* in Mamluk religious complexes in Cairo. On medieval Islamic libraries and for additional bibliography, see Eche, *Les Bibliothèques Arabes*; Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 1–74; Erünsal, *Orta Çağ İslâm Dünyasında Kitap ve Kütüphâne*; and Hirschler, *Ashrafiyya Library Catalogue*, 86–95.
 105. Giovan Antonio Menavino, *I cinque libri della legge, religione, et vita de' Turchi et della corte, & d'alcune guerre del Gran Turco* (Florence, 1548), 92–97. The French scholar-diplomat Postel was sent by King Francis I to the court of Sultan Süleyman in 1536–37 as an official interpreter of the embassy of Jean de la Forêt. Postel collected oriental manuscripts for the king's royal library and traveled a second time in the Ottoman empire in 1549–50. See Guillaume Postel, *De la République des Turcs: et là où l'occasion s'offrira, des mœurs et loy de tous les Muhamédistes* (Poitiers, 1560), Part III:11.
 106. On the educational dimension of the palace library inventory, see also Tahera Qutbuddin's essay in this volume. The palace school curriculum and the education of pages are discussed in Necipoğlu, *Topkapı Palace*, 111–22; where Menavino is cited at 111, 114. On books read in 1579 by treasury pages (mostly religious manuals, books on Sufism, grammar, and literature), and the seventeenth-century curriculum of the palace school, see Emine Fetvacı, *Picturing History at the Ottoman Court* (Bloomington; Indianapolis, 2013), 25, 29–37. In "Greek Scriptorium," 26–28, Raby proposes that some of the extant Greek manuscripts at the palace library were intended for the linguistic training of Mehmed II's chancellery staff. The latest Ottoman document in Greek at the Venetian state archives is dated 1529; it is an official letter announcing a conquest (ASV, Documenti Turchi, no 250). See Maria Pia Pedani, ed., *The Series Lettere e Scritture Turchesche of the Venetian State Archives* (Leiden, 2009), xv. I thank Zahid Atçıl for this reference.
 107. Menavino, *I cinque libri*, 96. On the palace school and dormitories of pages, see Necipoğlu, *Topkapı Palace*, 111–22. Bayezid II's further development of his father's palace organization, with added emphasis on the education of pages and his establishment of new preparatory schools, is mentioned in 'Aṭā, *Tārīḥ-i 'Aṭā*, 1:72, 185.
 108. Books endowed for the use of pages in the service of the Inner Treasury are listed in "check-out" registers from the mid-sixteenth century onward. In my view, these *waqf* volumes may have been kept in the pages' dormitory rather than in the Inner Treasury itself. See TSMA, E. 861 (11) dated 1008 (1599–1600), "Ḥazīne-i 'āmirede mevcūd vakıf kitāblar" (*waqf* books present in the imperial treasury), which were stored at the "*hāne-i ḥazīne*," likely the dormitory of treasury pages. For endowed books in dormitories, see also the essay of Zeynep Atbaş in this volume.
 109. Judith Pfeiffer's essay in the present volume refers to a book borrowed from the Inner Treasury by Mü'eyyездade, which bears both his borrower's mark and the impressions of Bayezid II's seal. She proposes that the sultan may have given that book to him as a present.
 110. The petition is cited in Tunç Şen and Cornell H. Fleischer's essay in this volume, where they raise the pertinent question of whether 'Atufi's inventory was accessible to other members of the palace. For astrolabes, quadrants, and astronomical instruments kept in the Inner Treasury, which are listed in the treasury inventories dated 1496 and 1505, see Necipoğlu, *Topkapı Palace*, 134–35. I have slightly modified the dedicatory inscription of Bayezid II's astrolabe cited by David A. King, who identifies its maker as "a Turk from Central Anatolia": see his "Two Astrolabes for the Ottoman Sultan Bayezid II," in *Essays in Honour of Ekmeleddin İhsanoğlu*, 2 vols. (Istanbul, 2006), 1:439–59, at 454–55. I prefer to interpret the designation "al-Rūmī" more broadly, as an "Ottoman" regardless of ethnicity and from a wider geography than Anatolia.
 111. On Shaykh Hamdullah's probable access to books kept at the royal library, see M. Celâl, *Şeyh Hamdullah* (Istanbul, 1948), 9; cited in Raby and Tanındı, *Turkish Bookbinding*, 98. For this calligrapher, see Muhittin Serin, *Hattat Şeyh Hamdullah* (Istanbul, 2007). The album in question (TSMK, B. 411) is dubbed "The Timurid Calligraphy Album" and is described in Roxburgh, *Persian Album*, 106–21.
 112. This report in Latifi's (d. 1582) Ottoman Turkish biographical anthology of poets is discussed in Ferenc Csirkés's article in the present volume.
 113. On Qur'ans listed in the inventory, see the essays of Zeren Tanındı and Zeynep Atbaş.
 114. This Mamluk Qur'an (T. 533) is now kept in the Turkish and Islamic Art Museum (hereafter, TİEM), in Istanbul: see Zeren Tanındı's essay in the present volume, and her chapter, "The Bindings and Illuminations of the Qur'an," in *The 1400th Anniversary of the Qur'an: Museum of Turkish and Islamic Art Qur'an Collection* (Istanbul, 2010), 90–121, at 99, cat. 62.
 115. The Venetian diplomat Giovanni Dario, who attended this reception ceremony at the Edirne Palace, describes some of the gifts presented by the Mamluk ambassador without mentioning a Qur'an: Guglielmo Berchet, *La Repubblica*

- di Venezia e la Persia* (Torino, 1865), no. 17, 150–51. Berchet misidentified that document as the report of an embassy to Iran, which is contradicted by its references to Edirne and the Ottoman grand vizier Davud Pasha (g.v. 1482–97).
116. In her essay Zeren Tanındı suggests the date 1503 for the presentation of Qa'itbay's Qur'an. For embassies exchanged with the Mamluks during Bayezid II's reign, see Cihan Yüksel Muslu, *The Ottomans and the Mamluks: Imperial Diplomacy and Warfare in the Islamic World* (London, 2014), esp. 248–74.
 117. For dates of rewards given by Bayezid II to these two authors upon the presentation of the completed drafts of their history books, see Kazan, *XVI. Asırda Sarayın Sanatı Himayesi*, 89. Bidlisi's career, his works, and the dynastic histories written by him and Kemalpaşazade are analyzed in a forthcoming book by Vural Genç, *Acem'den Rum'a Bir Bürokrat ve Tarihçi: İdris-i Bidlisi (1457-1520)*. I am grateful to the author, who generously shared with me his unpublished book manuscript.
 118. On the contents and dates of early works by Bidlisi listed in the library inventory, see Genç, *Acem'den Rum'a*, 22, 171–92, 194–96, 590. Genç observes that Bidlisi gives two different dates for his departure from Tabriz, 907 (1501–2) and 908 (1502–3), implying that he probably left Tabriz in 1502 and began to write his Ottoman dynastic history around 1504; see 14–26, 149–50, 171. At 125n415, Genç discusses Jalal al-Din Dawani's book produced for Bayezid II's library, which is cited in 'Atufi's inventory as *Sharḥu rubā'īyyāti Mawlānā Jalāl al-Dīn al-Dawānī bi-al-fārisiyyati min qibali al-naṣā'ihī* (Commentary on Quatrains of Mawlana Jalal al-Din al-Dawani in Persian, Pertaining to Advice, 146 {18–19}). On long-distance exchanges between Dawani and Bayezid II, see 125n414. Dawani's book on ethics, *Akhlāq-i Jalālī* (Jalalian Ethics), was also known as *Lawāmi' al-ishrāq fī makārim al-akhlāq* (Lights of the Rising Sun on Ethical Virtues). The library inventory lists it anonymously with its abbreviated title, *Kitābu makārimi al-akhlāqi bi-al-fārisiyyati min qibali al-taṣawwufi* (114 {2–7}), describing it as a Persian work pertaining to Sufism. Probably because it was well known, it did not need a fuller citation. For both works of Dawani, see the essay of Hüseyin Yılmaz in the present volume. On students of Dawani who benefited from Mü'eyyadzade's patronage at the Ottoman court, see Hanna Sohrweide, "Dichter und Gelehrte aus dem Osten im osmanischen Reich (1453–1600)," *Der Islam* 46, no. 1–2 (1970): 263–302, at 280–81.
 119. Cited and discussed in Necipoğlu, "Visual Cosmopolitanism," 43.
 120. Erünsal mentions books transferred from the royal library in the Cairo citadel to the Inner Treasury of the Topkapı Palace by Selim I: see *Osmanlı Vakıf Kütüphaneleri*, 131. He assumes that Selim I did not take books bequeathed as endowments (*waqf*) to public libraries, but only confiscated those from the private libraries of defeated rulers and governors, 437–39. However, an undated one-page list at the Topkapı Palace archives (TSMA, E. 6090) giving the number of books kept in the Mamluk sultan Qansuh al-Ghawri's (r. 1501–16) mosque in Cairo without naming their titles, which consisted of ten chests containing 469 volumes, may suggest otherwise. Its heading reads, "These are the books in Sultan Ghawri's mosque" (*Sultān Gawrī cāmi'inde olan kitāblar*). For the book treasury of Sultan al-Ghawri's funerary mosque-madrasa-*khanqah* complex, see Behrens-Abouseif, *Book in Mamluk Egypt*, 30, 32–33, 62–63, 67–68. This library consisted of two private collections, showing that it was "not easy in the late Mamluk period to supply a large number of books to fill the library of a princely religious institution" (ibid., 80–81). Likewise, endowed libraries of religious complexes often passed on to private or other libraries, despite their *waqf* stipulations (ibid., 9–10). For the argument that the Ashrafiyya library catalogue (now in the Süleymaniye Library's Fatih collection) was shipped with a substantial number of endowed manuscripts from the Ayyubid-period Ashrafiyya madrasa in Damascus to the Topkapı Palace library as booty upon Selim I's conquest of Syria in 1516, see Hirschler, *Ashrafiyya Library Catalogue*, 46–53. Hirschler proposes that many of these books were transferred from the Topkapı Palace to the Fatih and Ayasofya collections of the Süleymaniye Library by Mahmud I (r. 1730–54). He notes that books repeatedly changed legal status between endowed and private in medieval collections, thereby ensuring their survival over longer periods (ibid., 39–40).
 121. Hoca Sa'deddin, *Tāci'ü't-tevāriḥ*, 2 vols. (Istanbul, 1279/1863), 2:398–99.
 122. By the late sixteenth and seventeenth century, the flourishing book market in Istanbul overshadowed those in other Ottoman centers, including Bursa, Edirne, Cairo, Damascus, Aleppo, Mecca, and Jerusalem according to Erünsal, *Sahafluk ve Sahaflar*, 295–96, 337–39. The book sent back to Herat via Khwaja Hafiz Yazdi is identified in a document preserved in the Bursa qadi court registers as *Tafsir-i Qādi* (dated 12 Rabi' I 890; March 29, 1485): quoted in Erünsal, *Sahafluk ve Sahaflar*, 297n35.
 123. Genç, *Acem'den Rum'a*, 385–86.
 124. TSMK, R. 1465: Fehmi Ethem Karatay, *Topkapı Sarayı Müzesi Kütüphanesi Türkçe Yazmalar Kataloğu*, 2 vols. (Istanbul, 1961), 1, no. 1011, Tarih, 327–28. Karatay notes the possibility that the Tacizade attribution, added by a later hand, may instead refer to Tacizade Ca'fer Çelebi's brother Sa'di Çelebi (d. 1516–17). On the Turkish translation of Qazwini's Persian history, see *TDVİA*, s.v. "Sarica Kemal," by İsmail E. Erünsal. For the many copies of the original Persian version listed in 'Atufi's inventory, see the essay of Ferenc Csirkés in this volume.
 125. Additions of new books to the inventory's empty spaces in a different hand appear on pages 56, 83, 199, 204. Other insertions in the same (or a very similar) hand as that of the scribe/transcriber of the inventory include those on pages 1, 151, and many interlinear corrections.
 126. A different kind of discrepancy appears in a volume not listed in 'Atufi's inventory, which is discussed in the essay

- of Zeynep Atbaş (TSMK, A. 3480, Karatay A 7118). This is a commentary by Mirim Çelebi on his grandfather 'Ali Qushji's Arabic astronomy treatise dedicated to Mehmed II. It bears three seal impressions of Bayezid II (fols. 1a, 2a, 199b), but was dedicated to Selim I on fol. 3a in 925 (1519). Atbaş proposes that the volume was probably refurbished after Bayezid II's demise, as is revealed by the golden text frame that partly covers one of Bayezid's seal impressions stamped during his lifetime. Interestingly, this sultan's two other seal impressions have been cut out from elsewhere and pasted indistinguishably into this volume. For an entry with another inconsistent date in the inventory, see my Appendix III: 45. Because the corresponding volume has two seal impressions of Bayezid II and also a dedication to him, the post-Bayezid *abjad* date written hastily in its last page in a different hand must be erroneous.
127. For this register, see note 27 above. On books presented as gifts to Bayezid II, which are listed in that register, see Kazan, XV. *Asırda Sarayın Sanatı Himayesi*, 347–49.
 128. TSMA, D. 9628, fol. 4a: *Sa'adetli pādīshāh ile gelen kitāblar tolabından bir mecma' ve merhūm Sultān Selīm ile sancākdan gelen kitāblar tolabından bir mecma' Baba Cüce yedinden içeriye teslim*. The Qur'an was handed over to the junior lady on 13 Ramadan 997 (July 26, 1589) by the dwarf Haydar Cüce (fol. 4a).
 129. TSMA, D. 6083, dated 965 (1557–58), fol. 2b.
 130. Translated from Arabic into Chaghatay Turkic by Mir Haydar and calligraphed in Uyghur script by Malik Bakhshi of Herat, the volume was bought in Istanbul in 1673 by Antoine Galland. This text is followed by another one in Uyghur script, titled *Memorial of the Saints*. See Marie-Rose Séguy, *The Miraculous Journey of Mahomet: Mirāj Nāme* (New York, 1977).
 131. I am grateful to Zeynep Yürekli-Görkay, who informed me that there are no seal impressions of Bayezid II in this manuscript. For the date and description of the manuscript, see Serpil Bağcı et al., *Ottoman Painting* (Washington, DC, 2009), 46–47. Yoltar proposed the date ca. 1506–12, given that the author received seven donations from Bayezid II in that period: Ayşin Yoltar, "The Role of Illustrated Manuscripts in Ottoman Luxury Book Production: 1416–1520" (PhD diss., New York University, Institute of Fine Arts, 2002), 425–42. I thank Yoltar for suggesting that this might indeed be the volume listed by 'Atufi, even though she had proposed a later date for the manuscript.
 132. For the manuscript, see Zeren Tanındı's article in the present volume.
 133. I thank Hüseyin Yılmaz, who suggests that this manuscript might be Ibrahim b. Ishaq Shams Sajjaji's *Farā'id al-Sulūk fi Faḍā'il al-Mulūk*, a mirror for princes like the *Kalīla wa Dimna*, written in 610 (1213): see Nasrin Askari, *The Medieval Reception of the Shāhnāma as a Mirror for Princes* (Leiden, 2016), 50–52. But he cautions that other authors have also written works on this genre. An entry in the inventory cites a different copy, defined as pertaining to Sufism: *Kitābu farā'id al-sulūki fi al-naṣā'ihī min qibali al-taṣawwufi* (114 {13}).
 134. The book's flyleaf note, *odadan çıkan fārisi*, indicates that it was transferred from the Privy Chamber to the Inner Treasury at some point.
 135. This manuscript, too, was produced in the Aqqoyunlu workshop in Shiraz.
 136. The variant title of another copy of al-Jazari's illustrated treatise, labeled on fol. 1a as *Kitāb al-Jāmi' bayn al-'amal wa-al-ḥiyyal*, does not match 'Atufi's entries (SK, Ayasofya 3606). This variant is an example of the notorious flexibility of premodern book titles. Stamped with the *waqf* seals of Mahmud I and his endowment inspector, its opening page may once have featured Bayezid II's seal on its missing lower left corner. On the upper left corner is the round Inner Treasury seal of Selim I and what appears to be his almond-shaped sovereignty seal, both of which are effaced. The illustrated Oxford manuscript of al-Jazari's *Automata* (The Bodleian Library, University of Oxford, Greaves 27) lacks seal impressions of Bayezid II. I thank Serpil Bağcı for checking that manuscript on my behalf.
 137. Some of the outstanding illustrated manuscripts are discussed by Zeynep Atbaş and Zeren Tanındı in this volume.
 138. Three copies with a similar title are listed in 'Atufi's inventory: MS Török F. 59, 307 {7}: *Tansūkhnāmah-i ilkhānī li-l-Naṣir al-Ṭūsī fi 'ilmi al-jawāhiri min al-aḥjāri*; 184 {3–4}: *Kitābu tansūkhnāmah-i ilkhānī fi 'ilmi al-aḥjāri*, bound together with a work on history; and 165 {7–8}: *Kitābu Atānsūkhnāmah-i Ilkhān fi al-ṭibbi*. The first two entries refer to Nasir al-Din al-Tusi's (d. 1274) treatise titled "Book on Precious Stones for the Ilkhan": see Naṣir al-Din Ṭūsī, *Tansūkhnāmah-i Ilkhānī*, ed. Muḥammad Razavī (Tehran, 1970). The third entry corresponds to the only known illustrated Persian copy of a work on Chinese medicine, which begins with a preface by the Ilkhanid vizier and polymath Rashid al-Din Fadl Allah al-Hamadani (d. 1318). On this illustrated manuscript (SK, Ayasofya 3596), dated 713 (1313), see Persis Berlekamp, "The Limits of Artistic Exchange in Fourteenth-Century Tabriz: The Paradox of Rashid al-Din's Book on Chinese Medicine, Part I," *Muqarnas* 27 (2010): 209–50. I have examined the manuscript, whose title on the flyleaf, *Kitāb tashrīḥ bi-al-fārisiyya* (Book of Anatomy in Persian), does not match 'Atufi's entry and seems to be a later librarian's addition. It is likely that the front page bearing the title assigned by 'Atufi is lost because Bayezid II's seal is stamped only at the end (fol. 262b). The partly torn opening page (fol. 1a) has the *waqf* seals of Mahmud I and his endowment administrator, but it probably also featured a now-lost seal impression of Bayezid II.
 139. Two copies are listed in MS Török F. 59, 253 {12}, *Dastān-i Warqa wa-Gulshāh*; and 254 {4}, *Naẓm-i ḥikāyati Warqa wa-Gulshāh bi-al-fārisiyyati*. The only extant copy (TSMK, H. 841, Karatay F 386) has seal impressions of Bayezid II.
 140. There are three entries on Dioscorides's work in MS Török F. 59. The first is *Kitāb al-ḥashā'ishi li-Dīsqurīdus wa-huwa khamsu maqālātīn fi al-ṭibbi* (The Book on Herbs by

- Dioscorides, and in it are five parts, on Medicine, 169 {3}). The second entry lists this work within a multi-title compendium (169 {5–7}). The third entry (169 {4–5}) matches verbatim the title of an extant manuscript (TSMK, A. 2127, Karatay: A 7191), which is stamped with Bayezid II's seal on the opening and last pages. The matching title, written on a paper label pasted on top of a previous title on the upper part of the opening page, reads *Mujalladun awwalu min Kitāb Disqūridus fī al-hashā'ishi wa-ghayrihā wa-fihī al-hashā'ishi khamṣu maqālātīn fī al-ṭibbī* (First volume of Dioscorides on Herbs et cetera, and in it are five parts, on Medicine).
141. MS Török F. 59, 169 {13–14}: *Kitābu manāfi'ī al-hayawāni bi-al-fārisiyyati fī al-ṭibbī*. Pierpont Morgan Library, MS 500, featuring Bayezid II's seal on fols. 2a, 84b; several other copies with varying titles are listed by 'Atufi (169 {13–17}).
 142. MS Török F. 59, 244 {11–12}: Washington, DC, Freer Gallery of Art, 32.30–32–37, in which Bayezid II's seal is stamped only on fol. 337b, implying that the front matter is lost; and TiEM, T. 2046. On these two manuscripts, see Filiz Çağman and Zeren Tanındı, "Selections from Jalayirid Books in the Libraries of Istanbul," *Muqarnas* 28 (2011): 221–64, at 229–30.
 143. MS Török F. 59, 165 {17}: *Kitābu jarrāhiyyatin [ay, umūrin jarrāhiyyatin] khāniyyatin bi-al-turkiyyati ma'rūfīn bi-Jarrāhnāmah fī al-ṭibbī*. For three known illustrated copies of this work, see Bağcı et al., *Ottoman Painting*, 25–26, 25n14; İlter Uzel, *Şerefeddin Sabuncuoğlu: Cerrāhiyyetü'l-Hāniyye*, 2 vols. (Ankara, 1992). In her essay in this volume, Nükhet Varlık has identified one of these volumes as having been stamped with Bayezid II's seal.
 144. MS Török F. 59, 310 {12–13}: TSMK, A. 3474, Karatay A 7143.
 145. The manuscript (TSMK, H. 1123, not catalogued by Karatay) was identified as the "*Shāhnāmah* of Malik-i Um̄mī" in Raby and Tanındı, *Turkish Bookbinding*, cat. 34, 190–91; Yoltar, "Role of Illustrated Manuscripts," 386–99; and Bağcı et al., *Ottoman Painting*, 50–51. More recently, it has been attributed to a poet with the pen name of Ahi by Andrew C. S. Peacock: oral communication cited in Sooyong Kim's essay in this volume, where Kim mentions two copies of a divan ascribed to an *Āhī* in 'Atufi's inventory (MS Török F. 59, 246 {19}, 247 {16}). I am grateful to Sara Nur Yıldız, who explained that Peacock's new attribution is based on the fact that the Topkapı manuscript does not clearly differentiate between the spelling of "h" and "m," due to which *Ummī* and *Āhī* are both possible readings. But on fol. 3a the spelling of the author's pen name clearly has an "alif" with a "madda" over it, which justifies reading it as *Āhī* (fig. 12c). The date ca. 1485 was proposed for this manuscript in Raby and Tanındı, *Turkish Bookbinding*, 190; with the revised date of ca. 1495 suggested in Bağcı et al., *Ottoman Painting*, 50–51. Yoltar assigned to it an even later date during or after 1502–3, based on Bayezid II's "Register of Rewards," which begins after that year and lists awards received by this *Shāhnāmah*'s calligrapher-cum-painter Darwish Mahmud bin 'Abdullah Naqqash in 1507–8 and 1508–9: "Role of Illustrated Manuscripts," 386–99.
 146. For the Cambridge manuscript, labeled by a modern librarian as *Bāyazīdnāmah* on the spine of its binding, see Sara Nur Yıldız, "Ottoman Historical Writing in Persian, 1400–1600," in *Persian Historiography*, ed. Charles Melville (London, 2012), 456–61, at 457. Yıldız kindly explained to me that she did not connect the Topkapı manuscript with Ahi in her article, given its common attribution to Malik-i Um̄mī. She now believes that Ahi seems to be, in fact, the correct reading rather than Um̄mī (personal communication). I would like to thank Ünver Rüstem for sending me photographs of the Cambridge manuscript, whose dated colophon gives the scribe's name as 'Abdallah al-Katib (fol. 105a). I have noticed notes added later to the flyleaf and colophon margin of this manuscript, which identify the work as *Dīvān-i Malik-zādah*. In the colophon the author refers to himself as *Malik-i Maḥmūd* (fol. 105a). This seems in keeping with the identification of the author's given name as *Malik-zādah Maḥmūd* by Mikail Bayram, who brought the draft of the same work (SK, Fatih 4092) to the attention of Zeren Tanındı: see her article, "The Illustration of the *Shahnama* and the Art of the Book in Ottoman Turkey," in *Shahnama Studies II. The Reception of Firdausi's Shahnama*, ed. Charles Melville and Gabriella van den Berg (Leiden; Boston, 2012), 141–58, at 144–45.
 147. I have confirmed that the author's name, *Malik-i Maḥmūd*, mentioned in the colophon of the Cambridge manuscript, also appears in the colophons of SK, Fatih 4092 (fol. 139b) and TSMK, H. 1123 (fol. 98a). The colophon of the Süleymaniye manuscript has two couplets crossed out by red lines, with revised couplets indicated as marginal annotations (fol. 98a). Therefore, the Cambridge manuscript, in which these crossed-out lines no longer remain and where one of the two marginal corrections is inserted as an interlinear annotation, must date after the draft version in the Süleymaniye. The Cambridge manuscript, in turn, preceded the final illustrated Topkapı version that lacks such authorial corrections. The illegible almond-shaped seal I noticed in photos of the Süleymaniye manuscript, which Zeren Tanındı graciously sent to me, measures 13 x 17 mm, a measurement that corresponds to Selim II's seal according to Zeynep Atbaş. I also spotted in this manuscript the following endowment note (fol. 53a): *Vakf-i merḥūm Çelebizāde Mevlānā Dervīş Mehmed*. This endower must be Mahmud I's grand vizier (d. 1716), whose library contained several manuscripts from the Ashrafiyya collection in Damascus that bear identical *waqf* notes. These manuscripts in the Süleymaniye Library's Fatih collection likely originated from the Topkapı Palace library, to which they had been transferred from the Ashrafiyya library: see Hirschler, *Ahrafiyya Library Catalogue*, 50–52.
 148. Dressen, *Library of the Badia Fiesolana*, 35. I have briefly discussed several books cited in the inventory that can be associated with the imperial cosmopolitanism of Mehmed II in Necipoğlu, "Visual Cosmopolitanism," 9–16, 23. On the

- strong “Damascene flavor” of the late thirteenth-century Ashrafiyya Library catalogue despite its “diversity and plurality,” see Hirschler, *Ahrafiyya Library Catalogue*, 35–40. Likewise, a bibliography of books written in twelfth-century Bukhara displays a regional focus: see Shahab Ahmed, “Mapping the World of a Scholar in Sixth/Twelfth Century Bukhara: Regional Tradition in Medieval Islamic Scholarship as Reflected in a Bibliography,” *Journal of the American Oriental Society* 120, no. 1 (2000): 24–43. For the wide variety of books on “secular” subjects once belonging to private libraries of Ayyubid and Mamluk elites that ended up in the endowed religious libraries of Syria and Egypt, and the encyclopedic outlook of Mamluks, see Behrens-Abouseif, *Book in Mamluk Egypt*, 40–42, 146–49.
149. The biographies of numerous Ottoman scholars who studied abroad, mostly in Mamluk, Timurid, and Turkmen metropolises, can be found in Taşköprizade, *Şekâ'îkunu'mânîye*.
 150. Mahmud Gawan's two works listed in the library inventory are discussed in Christopher Markiewicz's essay in this volume: see also 'Imād al-Dīn Maḥmūd Gāwān, *Manāẓir al-inshā* (Tehran, 1381/2002–3); Maḥmūd Gāwān, *Riyāz al-inshā*, ed. Chānd Ḥusayn and Ghulām Yazdānī (Hyderabad, 1948). The letter addressed to Mahmud Pasha is in *Riyāz al-inshā*, 125–29, no. 32; for a letter from Sultan Muhammad Shah Bahmani to Sultan Muhammad Shah al-Rumi (Mehmed II), see 391–93, no. 123; another letter to Mehmed II is at 393–98, no. 122. Mahmud Gawan's commercial relations with Ottoman Bursa are examined in Halil İnalcık, “Bursa I: XV. Asır Sanayi ve Ticaret Tarihine Dair Vesikalar,” *Belleten* 24 (1960): 45–102, document nos. 3, 12, and 40, at pages 69, 75–76, and 95–96; Richard M. Eaton, “Mahmud Gawan (1410–1481): Deccanis and Westerners,” in his *A Social History of the Deccan, 1300–1761: Eight Indian Lives* (Cambridge, 2005), 59–77, esp. 65, 76. For Bayezid II's reception of ambassadors in Edirne, see note 115 above and Behiştî Ahmed Çelebi, *Tārīh-i Behiştî II*, ed. Mertol Tulum (Ankara, 2016), 353–55. The verse quoted by Lami'i is cited in Babinger, *Mehmed the Conqueror*, 508.
 151. For extant books associated with Mehmed II, see the articles of Zeynep Atbaş and Zeren Tanındı in this volume; Raby and Tanındı, *Turkish Bookbinding*. Reports by the Greco-Venetian humanist Niccolò Sagudino and Giacomo Languschi are cited in Necipoğlu, “Visual Cosmopolitanism,” 6–7. On deluxe manuscripts of al-Suhrawardi's works produced for Mehmed II, see Raby and Tanındı, *Turkish Bookbinding*, 151, 172. Works by Ibn Sina (Avicenna) and al-Suhrawardi cited in 'Atufi's inventory are discussed in Dimitri Gutas's essay in this volume.
 152. For an English translation of the work commissioned by Mehmed II, see 'Abd al-Rahmān Jāmī, *The Precious Pearl (al-Durrah al-fākhira)*, Together with His Glosses and the Commentary of 'Abd al-Ghafūr al-Lārī, trans. Nicholas Heer (Albany, NY, 1979), cited in Necipoğlu, “Visual Cosmopolitanism,” 44. On the likelihood that this work was not delivered to Bayezid II, see the co-authored essay by Cemal Kafadar and Ahmet Karamustafa in this volume. Bayezid II also corresponded with and sent gifts to Jami in Herat: see Ömer Okumuş, “Jāmī, Abdurrahman,” *TDVİA* 7 (1993): 94–99, at 95. On annual gifts sent by Bayezid II to other Iranian scholars including Jalal al-Din Dawani, Sayf al-Din Ahmad Taftazani, and Mir Jamal al-Din Ataullah, and the sultan's employment of İdris Bidlisi who became estranged from Ottoman court factions, see Genç, “Şah ile Sultan Arasında bir Acem Bürokrati,” 43–75, esp. 44n1.
 153. I have borrowed the term “philosophical philosophy” from the essay of Dimitri Gutas, who notes the “religious watchdog aspect” of the inventory, where Bayezid II's librarian sometimes inserts his own critical comments into book entries, particularly those on “philosophical philosophy” in the Avicennan mode. Gutas observes that philosophers from al-Andalus, including Averroes (Ibn Rushd) are “completely absent” from the palace library inventory, and that even Greek philosophers are sparsely represented. The earliest known manuscript of Averroes's *Tahāfut* was copied in Istanbul in 925 (1519) according to İhsan Fazlıoğlu, who claims that it must have been known earlier in the Ottoman context: see his “Türk Felsefe Bilim Tarihi'nin Seyir Defteri,” *Dîvân: İlmî Araştırmalar* 18 (2005): 1–57, at 41–42. However, the availability of this work to the authors of the two texts commissioned by Mehmed II is uncertain, according to M. Sait Özervarlı, “Arbitrating between al-Ghazālī and the Philosophers: The *Tahāfut* Commentaries in the Ottoman Context,” in *Islam and Rationality: The Impact of al-Ghazālī. Papers Collected on His 900th Anniversary*, ed. Georges Tamer, 2 vols. (Leiden; Boston, 2015), 1:376–97, at 388, 390.
 154. Andrea Gritti, “Relazione [1503],” in Eugenio Albèri, ed., *Relazioni degli ambasciatori Veneti al Senato il XVI secolo*, 15 vols., Serie 3: *Relazioni degli stati ottomani* (Florence, 1855), 3:1–44, at 20–21. The report by Gritti's secretary, I. Caroldus, from the end of September 1503 titled “Relatione fata in Pregadi per sier Andrea Gritti ritornato orator dil Signor turco,” is in Marino Sanuto, *I diarii*, ed. Federico Stefani, 58 vols. (Venice, 1879–1903), 5:449–68, at 458.
 155. On the vizier Sinan Pasha's works, see Koç, “Sinan Paşa,” 230–31. Ghulam Sinan's letter, formerly misattributed to his namesake Sinan Pasha, is published and analyzed in Şükrü Özen, “Sahn-i Semân'da bir Atışma: Gulâm (Köle) Sinan'ın Mektubu,” *Osmanlı Araştırmaları - The Journal of Ottoman Studies* 38 (2011): 161–92, esp. 182–83, 189. Özen additionally identifies Ghulam Sinan's commentary on 'Alī Qushji's astronomy treatise (SK, Fatih 5396), which had also been misattributed to Sinan Pasha.
 156. Maróth, “Library of Sultan Bayazid II,” 115; see also essays concerning 'Atufi's entries on the literary arts by Ferenc Csirkés, Sooyong Kim, Christopher Marckiewicz, and Tahera Qutbuddin in this volume.
 157. On illustrated and illuminated manuscripts produced for Bayezid II, see Yoltar, *Role of Illustrated Manuscripts*, 267–68; and Zeren Tanındı's and Zeynep Atbaş's essays in this volume. Ottoman sources emphasizing Mehmed

- II's invitations to men of talent and learning are discussed in Gönül Tekin, "Fatih Devri Türk Edebiyatı," in *İstanbul Armağanı*, ed. Mustafa Armağan, 1:161–235, at 162–63. For Bidlisi's praise of Mehmed II's patronage of foreigners in contrast to Bayezid II, and Göde Ahmed's admiration for Mehmed II's policies, see Genç, *Acem'den Rum'a*, 126–27, 131, 167, 224, 260–61, 527–28.
158. Menavino, *I cinque libri*, 106–7. On Qur'ans and manuscripts of sura *al-An'am*, see Zeren Tanındı's and Zeynep Atbaş's essays in this volume. Prayer books, amulets, and talismans are discussed in Guy Burak's essay.
 159. Esoteric and occult sciences were already strongly emphasized in Mehmed Şah el-Fenari's early classification of the sciences cited in note 92 above. Works in this field listed by 'Atufi are analyzed by Noah Gardiner in the present volume; see also Cornell Fleischer's essay. No extant volume of the *Owl's Lament* with Bayezid II's seal impression has yet been located. On this work, attributable to al-Bistami, see Cornell H. Fleischer, "A Mediterranean Apocalypse: Prophecies of Empire in the Fifteenth and Sixteenth Centuries," *Journal of the Economic and Social History of the Orient* 61, no. 1–2 (2018): 18–90, at 45; his "Shadows of Shadows: Prophecy in Politics in 1530s Istanbul," *International Journal of Turkish Studies* 13 (2007): 51–62, esp. 55; and "Ancient Wisdom and New Sciences: Prophecies at the Ottoman Court in the Fifteenth and Sixteenth Centuries," in *Falnama: The Book of Omens*, ed. Massumeh Farhad and Serpil Bağcı et al. (Washington, DC, 2009), 232–36. See also *TDVİA*, s.v. "Bistâmî, Abdurrahman b. Muhammed," by Mustafa Çağrıncı; İhsan Fazlıoğlu, "İlk Dönem Osmanlı İlim ve Kültür Hayatında İhvanus's-safâ ve Abdurrahmân Bistâmî," *Dîvân: İlmî Araştırmalar* 1/2 (1996): 229–40; Denis Gril, "Les traditions apocalyptiques au tournant de la chute de Constantinople," *Varia Turcica* 33 (1999): 133–52. On related works translated from Greek in the palace library, see Maria Mavroudi, "Translations from Greek into Arabic at the Court of Mehmed II the Conqueror," in *The Byzantine Court: Source of Power and Culture*, ed. Ayla Ödekan, Nevra Necipoğlu, and Engin Akyürek (Istanbul, 2016), 195–207, esp. 206–7.
 160. Mirim's autograph manuscript (SK, Ayasofya 2697) is dated 12 Rajab 904 and stamped with Bayezid II's seals on fols. 1a and 264a. His later treatise on optics dedicated to Sultan Selim I, which refers to the works of Ibn al Haytham and Kamal al-Din al-Farisi, is mentioned in Elaheh Kheirandish's essay in this volume. On Mirim's biography and works, see *TDVİA*, s.v. "Mîrim Çelebi," by İhsan Fazlıoğlu. For the "Samarqand School," see İhsan Fazlıoğlu, "Osmanlı Felsefe-Biliminin Arkaplanı: Semerkand Matematik-Astronomi Okulu," *Dîvân İlmî Araştırmalar Dergisi* 14, no. 1 (2003): 1–66.
 161. On the listing of optics under the mathematical sciences in earlier classifications of the sciences by al-Razi (d. 1210) and al-Amuli (d. 1352), see Matthew Melvin-Koushki, "Powers of One: The Mathematicalization of the Occult Sciences in the High Persianate Tradition," *Intellectual History of the Islamic World* 5 (2017): 127–99, at 146 and 150. Dated 716 (1316), the extant copy of al-Farisi's treatise has Bayezid II's seal impressions on fols. 2a and 205b. A partially erased book title on fol. 2a is illegible (TSMK, A. 3340, Karatay A 7151). Another title on fol. 1a is *Kitābu Tanqīhi al-manāẓiri*. The same title is repeated on fol. 2a in a script differing from that of 'Atufi and/or his assistants.
 162. The Istanbul manuscripts are described in Abdelhamid I. Sabra, *The Optics of Ibn al-Haytham, Books I-III: On Direct Vision* (London, 1989); and briefly discussed in Gülrü Necipoğlu, "The Scrutinizing Gaze in the Aesthetics of Islamic Visual Cultures: Sight, Insight, and Desire," *Muqarnas* 32 (2015): 23–61, at 37–40. See also Elaheh Kheirandish's essay in this volume.
 163. This manuscript (SK, Ayasofya 2448) has seal impressions of Bayezid II on fols. 1a and 677b. The date in the colophon (fol. 677b; see fig. 13d) has been read as 1464–65 (869) in the Süleymaniye Library's electronic catalogue. The date was misread as 899 (1493–94) in Sabra, *Optics of Ibn al-Haytham*, 2:lxvii, where the dedication to Mehmed II (d. 1481) had been overlooked.
 164. The first pages of the six-volume set are each consecutively labeled by 'Atufi from 1 to 6 as *al-mujallad (X) min kitāb bin al-Haytham fī al-manāẓiri min qibali al-hikmati*. Because one of the volumes contains two books, the total number of volumes is six, even though they contain all seven books. Hence, some of the volume (*mujallad*) numbers in 'Atufi's inventory, which are inscribed above the opening pages of each volume, do not correspond to the book (*maqāla*) numbers of the medieval titles written on the same pages. The Süleymaniye Library has volume 1 (Fatih 3212, medieval label Book I, dated 476/1083, Bayezid II's seals on fols. 1a, 140b); volume 2 (Fatih 3213, medieval label Book II, dated 476/1083, Bayezid II's seal on fol. 1a); volume 3 (Fatih 3214, medieval label Book III, dated 476/1083, Bayezid II's seals on fols. 1a, 197b); volume 4 (Fatih 3215, medieval label Books IV and V, dated 636/1239, Bayezid II's seals on fols. 1a, 328b); and volume 6 (Fatih 3216, medieval label Book VII, dated 476/1083, Bayezid II's seals on fols. 1a, 138b). The Topkapı library has only volume 5 (TSMK, A. 3339, Karatay A 7149, medieval label Book VI, dated 476/1083, stamped with Bayezid II's seal on fols. 1a, 133b).
 165. Sabra described the single-volume manuscript (SK, Ayasofya 2448) as "the only copy that has the whole text of I.H.'s work," comprising 677 folios. He noted that this complete copy was transcribed from what he calls the "Askari Set," which he named after the copyist Ahmad ibn Muhammad ibn Ja'far al-Askari, who was the son-in-law of Ibn al-Haytham (i.e., SK, Fatih 3212, 3213, 3214, 3216; and TSMK, A. 3339) complemented by Fatih 3215: Sabra, *Optics of Ibn al-Haytham*, 2:lxvii. See note 164 above for these six volumes. Sabra does not mention another large-format undated Ottoman copy in the palace library of Ibn al-Haytham's *Optics*, which bears no seal impression of any sultan and perhaps dates from the eighteenth century (TSMK, H. 2007, Karatay A 7150: misidentified as E.H. 2007 by Karatay).

166. This volume (TSMK, A. 1899; Karatay A 7148) only has Ahmed III's seal impression on fol. 1a. I am grateful to Elaheh Kheirandish, who brought to my attention the important observation in Sabra, *Optics of Ibn al-Haytham*, 2:lxviii–lxxxiii, that this volume was transcribed in 915 (1509) from a copy completed in 476 (1083) “as stated on the first page” (namely, SK, Fatih 3212, 3213, and 3214 in the “Askari Set”). Sabra noted that, in A. 1899, the date written at the end of Book I is Sunday, 2 Safar 915 (May 22, 1509) and the date at the end of Book II is Wednesday, 30 Rabi' I, 915 (July, 18, 1509). Another manuscript copy (Köprülü 952) is described in Sabra, *Optics of Ibn al-Haytham*, 2:lxviii: written in Maghribi script, it contains fragmentary sections of books and seems to have been copied in the fourteenth century; but unlike other extant copies, it features the geometrical diagrams of Books IV and V. (These diagrams are missing from SK, Fatih 3215 and Ayasofya 2448, where their places are left blank.)
167. The medical books in Latin are listed in Raby, “East and West in Mehmed the Conqueror's Library,” 303. On further bibliographical references to Jacopo da Gaeta, the Jewish physician who initially attended Murad II and subsequently became the physician to his son, Mehmed II, thereafter rising to the posts of finance minister and vizier after converting to Islam, see Necipoğlu, “Visual Cosmopolitanism,” 7, 12.
168. Charles Berlin, “A Sixteenth-Century Hebrew Chronicle of the Ottoman Empire: The *Seder Eliyahu Zuta* of Elijah Capsali and Its Message,” in *Studies in Jewish Bibliography, History and Literature in Honor of I. Edward Kiev*, ed. Charles Berlin (New York, 1971), 21–44, at 27. For an inter-confessional debate between Mehmed II and George Amiroutzes on the prophecy of the Prophet Daniel concerning the four kingdoms, see Argyriou and Lagarrigue, “Georges Amiroutzès et son ‘Dialogue sur la foi au Christ tenu avec le Sultan des Turcs,’” 161–68. The translated Book of Daniel manuscript (SK, Ayasofya 3367) is cited in Necipoğlu, “Visual Cosmopolitanism,” 12. Besides the seal impressions of Bayezid II on fols. 1a and at the end, it has the *waqf* seal of Mahmud I and of his endowment inspector on fol. 1a. Hence, the manuscript must have been transferred from the Inner Treasury to the Ayasofya collection of Mahmud I. On this manuscript, see also Raby, “Greek Scriptorium,” 19; Fleischer, “Ancient Wisdom and New Sciences,” 232; and Fleischer, “A Mediterranean Apocalypse,” 49.
169. Raby, “Greek Scriptorium,” 19.
170. On Ardinghelli's gift, see Emil Jacobs, “Büchergeschenke für Sultan Mehmed II,” in *Festschrift für Georg Leyh* (Leipzig, 1937), 20–26, at 25–26. Ardinghelli was one of Mehmed II's four Florentine advisors against Venice, who were well respected among the Florentine colony of the Pera district in Istanbul: Babinger, *Mehmed the Conqueror*, 255. The two entries in the palace library inventory are discussed in Necipoğlu, “Visual Cosmopolitanism,” 16.
171. The inventory's list of books on Hagia Sophia and Constantinople are cited in Necipoğlu, “Visual Cosmopolitanism,” 23, 60n58, 70n24. I have not examined extant copies to determine whether they are stamped with Bayezid II's seal or not. For the Greek manuscript of the *Diēgēsis*, see Deissman, *Forschungen und Funde im Serai*, 45–46, no. 6; and Raby, “Greek Scriptorium,” 17. The palace library also has an unillustrated Greek translation of Cristoforo Buondelmonti's Latin text, *Liber Insularum Archipelagi*, featuring an Ottoman-style binding; see Deissmann, *Forschungen und Funde im Serai*, 67, no. 24; Raby, “Greek Scriptorium,” 23, 29. On the Persian translation of a Byzantine chronicle used as a primary source by Bidlisi in his coverage of Mehmed II's reign, see Yıldırım, ed. and trans., *İdris-i Bitlîsî Hest Behîşt VII. Ketîbe*, LXXXIV–LXXXV, CVIII, 57, 61–62; Genç, *Acem'den Rum'a*, 466. Genç makes a plausible argument that Bidlisi must have also gained access to history books on Islamic dynasties, Ottoman chronicles, and other texts that were kept at Bayezid II's palace library (*Acem'den Rum'a*, 219–20, 466–68).
172. In the inventory, versions of the Alexander Romance that appear under Persian literature are: 231 {8}, 231 {8}, 234 {12}, 251 {13}. A Turkish version is: 264 {4–5}. Arabic and Persian versions of Aristotle's book of advice to Alexander are: 145 {11–13}, 197 {17–19}, 198 {6, 11–13}.
173. The lives of Alexander and Caesar translated into Turkish for Mehmed II are mentioned in Agostino Pertusi, ed., *La caduta di Costantinopoli*, 2 vols. (Verona, 1976), 2:132–33. An extant Greek copy of Arrian's *Anabasis*, the classical life of Alexander the Great, at the palace library has been dated to the 1460s and attributed to Mehmed II's court scriptorium in Raby, “Greek Scriptorium,” 18. A now-lost copy of Quintus Curtius Rufus's *Life of Alexander* in the Topkapı library was seen by A. Mordtmann, “Verzeichnis der Handschriften in der Bibliothek Sr. Maj. des Sultans,” *Philologus* 9 (1854): 582–83. On the comparison of Mehmed II to Alexander, his Aqqoyunlu rival Uzun Hasan, and further literature, see Necipoğlu, “Visual Cosmopolitanism,” 6–9. For the comparison of Timur to Alexander in Timurid texts that glorify his spiritual and political authority, see İlker Evrim Binbaş, *Intellectual Networks in Timurid Iran: Sharaf al-Dīn Yazdī and the Islamic Republic of Letters* (New York, 2016), esp. 153, 254–57, 285.
174. The three Alexander entries are discussed in Necipoğlu, “Visual Cosmopolitanism,” 6–9, where I wrongly suggested that the nine-volume set may have been a translation from Greek and misjudged the third title as a work probably associated with Mehmed II. The nine-volume set is identified by Cornell H. Fleischer and Kaya Şahin as possibly Taceddin Ahmedi's *İskendernâme* in Turkish verse in this volume. ‘Atufi generally (though not always) mentions languages other than Arabic in his entries, but he does not do so in this case. After checking extant manuscript copies of the *İskendernâme* at the Topkapı library, I concluded that the nine-volume manuscript listed by ‘Atufi is more likely the one in Turkish by Ahmedi's brother Hamzavi, which combines prose with some verse. Its two surviving volumes at the Topkapı library are: H. 1554, identified on fol. 1a as *al-jild*

- al-sādis min kitāb Iskandarnāma fī al-tawārikh* (The Sixth Volume of the Book *Iskandarnāma*, on History); and H. 1555, copied in the beginning of Shaʿban 874/1470, which is identified on fol. 1a as *al-mujallad al-tāsiʿ wa-huwa al-akhir min kitāb Iskandarnāma fī al-tawārikh* (The Ninth Volume and It Is the Last Volume of the Book of *Iskandarnāma*, on History). This last title confirms that the work belongs to the nine-volume set listed by ʿAtufi. On Hamzavi's prose *İskendernāme*, see İsmail Avcı, "Türk Edebiyatında İskendernāmeler ve Ahmed-i Rıdvân'ın İskendernāmesi" (PhD diss., Balıkesir University, 2013), 47–52.
175. On titles used by Bidlisi for Bayezid II, see Genç, *Acem'den Rum'a: İdris-i Bidlisi*, 458, 530. The compendium with Bayezid II's seal (SK, Fatih 5323) was transferred from the Topkapı library to the Fatih collection, now in the Süleymaniye Library. A second copy of the same compendium (SK, Ayasofya 4260, dated 714/1315) no longer preserves seal impressions of Bayezid II (the lower parts of fols. 1a–2a are torn, and the last page is missing). This manuscript also originated in the palace library; it is stamped with Mahmud I's *waqf* seal (fol. 1a) and that of his *waqf* administrator on fol. 2a. The title on the flyleaf is *Kitāb al-muhāwara bayn al-Iskandar wa-Aristatālis*. On the contents of both volumes, see Mario Grignaschi's articles: "Le roman épistolaire classique conservé dans la version arabe de Salīm Abū-l-'Alā," *Le Muséon* 80 (1967): 211–64; "Les Rasâ'il 'Aristatālisa ilā-l-Iskandar de Salīm Abū-l-'Alā' et l'activité culturelle à l'époque omayyade," *Bulletin d'Études Orientales* 19 (1965–66): 7–83; and "Un roman épistolaire gréco-arabe: la correspondance entre Aristote et Alexandre," in *The Problematics of Power: Eastern and Western Representations of Alexander the Great*, ed. M. Bridges and J. Ch. Bürgel (Bern, 1996), 109–23. More recently: Miklós Maróth, *Correspondence between Aristotle and Alexander the Great: An Anonymous Greek Novel in Letters in Arabic Translation*, Documenta et Monographiae V (Piliscsaba, 2006). For a review comparing Maróth's publication with those of Grignaschi, see Dimitri Gutas, "On Graeco-Arabic Epistolary 'Novels,'" *Middle Eastern Literatures* 12, no. 1 (2009): 59–70.
176. On Amiroutzes, his sons, and texts translated from Greek to Arabic for the sultan by Mehmed Beg, see Vladimir Mirmiroğlu, *Fatih Sultan Mehmet Han Hazretlerinin Devrine ait Tarihi Vesikalar* (Istanbul, 1945), 94–102, at 98; Babinger, *Mehmed the Conqueror*, 247. The two manuscript copies (SK, Ayasofya 2610 and 2596) have been identified in Necipoğlu, "Visual Cosmopolitanism," 11. One of these is listed by ʿAtufi as *Tarjumatu Kitābi Baṭlamyūs bi-al-'arabiyyati fī tafṣili al-aqālīmi al-ma'rūfi bi-'ilmi al-jughrāfiyyā* (203 {6–7}). The same title is repeated verbatim above fol. 1a of Ayasofya 2596, which bears the seals of Bayezid II on fols. 1a, 75a, and has a dedication to Mehmed II on fol. 1a. The *waqf* seals of Mahmud I and of his endowment inspector are also stamped on fol. 1a. Another entry in the inventory, *Tarjumatu Kitābi Baṭlamyūs bi-al-'arabiyyati fī tafṣili al-aqālīmi ma'a ṣuwarihā al-ma'rūfi bi-jughrāfiyyā* (203 {7–9}), corresponds exactly to the title of Ayasofya 2610 (on fol. 23a), which is stamped with Bayezid II's seal only on fol. 23a because its last page is missing. That treatise is preceded by another one with many maps, bound together in the same volume whose first pages are lost; it therefore lacks a title, and Bayezid II's seal is only stamped at its end (fol. 21b). Perhaps referring to this partially preserved illustrated treatise or to another lost manuscript, ʿAtufi's third entry reads, *Tarjumatu Kitābi Baṭlamyūs fī 'ilmi al-jughrāfiyyā bi-al-'arabiyyati fī ṣuwari al-aqālīmi* (203 {5–6}).
177. The inventory lists illustrated copies of al-Istakhri's *Kitāb al-Masālik wa-Mamālik* (also called *Ṣuwar al-aqālīm*), among which TSMK, A. 2830 bears a dedication to Mehmed II but is not stamped with Bayezid II's seal. Impressions of Bayezid II's seal appear on the opening and closing pages of two other copies of al-Istakhri's work. One of them is titled *Kitābu aqālīmi al-arḍi 'alā al-mamāliki al-islāmiyyati fī al-tawārikh* (SK, Ayasofya 2971, fol. 1a), while the other is identified as *Kitābu aqālīmi al-arḍi 'alā al-mamāliki al-islāmiyyati min qibali al-tawārikh* (TSMK, A. 3349, fol. 1a, 79b). Both titles come very close to two entries in ʿAtufi's inventory: *Kitābu aqālīmi al-arḍi 'alā al-mamāliki al-islāmiyyati* (202 {15–16}). Illustrated Arabic treatises in the geography section of the inventory are assigned generic titles (202 {10–16}); therefore, identifying extant volumes and their seals will require future codicological research. Greek and Latin manuscripts of Ptolemy's geography at the Topkapı Palace library are listed in Deissman, *Forschungen und Funde im Serai*, 68–69, no. 27; 80–82, no. 44; 89–93, no. 57. Mavroudi speculates ("Translations from Greek into Arabic at the Court of Mehmed II the Conqueror," 196–97) that another Greek version in Cardinal Bessarion's collection, now in Venice (Marc. gr. Z.516=[904]), "can be tentatively associated with the library of Mehmed the Conqueror."
178. Gritti, "Relazione [1503]," 20–21; Genç, *Acem'den Rum'a*, 458n1379. An illustrated military treatise in Latin, once kept at the Topkapı Palace book treasury, probably belonged to Mehmed II. This treatise by Mariano Taccola (d. ca. 1453–58) was written in 1449 and copied by Paolo Santini de Duccio, likely in Venice around the third quarter of the fifteenth century. Titled *De re militari et machinis bellicis*, it was acquired in 1687 by the French ambassador Pierre de Girardin through an Italian renegade, who removed it from the Topkapı Palace collection (BnF, Lat. 7239): see Bibliothèque nationale de France: <http://archivesetmanuscrits.bnf.fr>, Archives et manuscrits, Latin 7239. An illustrated treatise surviving at the Topkapı library is Roberto Valturio's *De re militari* printed at Verona in 1472 (TSMK, H. 2699), whose manuscript version was sent to Mehmed II in 1461 by the ruler of Rimini, Sigismondo Malatesta, but was confiscated by the suspicious Venetians. On this and other European books presented as gifts to Mehmed II, see Jacobs, "Büchergeschenke für Sultan Mehmed II," 20–26; Jacobs, "Mehmed II der Eroberer, seine Beziehungen zur Renaissance und seine büchersammlung," 6–29;

- and Raby, "East and West in Mehmed the Conqueror's Library," 300–301.
179. Discussed in Necipoğlu, "Visual Cosmopolitanism," 11–12. For the extant Arabic manuscript and the misattribution of 'Atufi's title to a modern hand, see J. Nicolet and M. Tardieu, "Pletho Arabicus: Identification et contenu du manuscrit arabe d'Istanbul, Topkapı Serai, Ahmet III 1896," *Journal Asiatique* 268, no. 1-2 (1980): 35–57, at 38–39. On this Arabic translation, see also Mavroudi, "Translations from Greek into Arabic at the Court of Mehmed II the Conqueror," 203–7; and her "Pletho as Subversive and His Reception in the Islamic World," in *Power and Subversion in Byzantium*, ed. Dimitri Angelov and Michael Saxby (Farnham, England, 2013), 177–203.
 180. The two quadrilingual lexicons are mentioned in Necipoğlu, "Visual Cosmopolitanism," 11. The abbreviated title on fol. 1a of Ayasofya 4750 reads: *Lughati 'arabī wa-lughati fārisī wa-lughati rūmī wa-lughati sarfī*. Bayezid II's seal is stamped on fols. 1a and 63b. The second copy bound in a compendium (Ayasofya 4749) has Bayezid's seal on fol. 1a and the abbreviated title *Lughati fārisī, 'arabī, wa-rūmī wa-sarfī*. Both manuscripts were summarized, with no mention of Bayezid II's seals, in A. Caferoğlu, "Note sur un manuscrit en langue serbe de la bibliothèque d'Ayasofya," *Revue internationale des études balkaniques* 1, no. 3 (1936): 185–90; and Speros Vryonis, Jr., "Byzantine Constantinople and Ottoman Istanbul: Evolution in a Millennial Iconography," in *The Ottoman City and Its Parts*, ed. Irene A. Bierman et al. (New Rochelle, NY, 1991), 13–52, at 39–40. See also Werner Lehfeldt, *Ein arabisch-persisch-griechisch-serbokroatisches Sprachlehrbuch in arabischer Schrift aus dem 15./16. Jahrhundert* (Bochum, 1970); and his edited book, *Eine Sprachlehre von der Hohen Pforte – Ein arabisch-persisch-griechisch-serbisches Gesprächslehrbuch vom Hofe des Sultans aus dem 15. Jahrhundert als Quelle für die Geschichte der serbischen Sprache* (Cologne, 1989). Multilingual lexicons in the palace library inventory are discussed in the essays by Ferenc Csirkés and Tahera Qutbuddin.
 181. TSMK, A. 2698 (Karatay: A 8732).
 182. For a catalogue of surviving manuscripts and printed books in non-Islamic languages at the palace library, see note 32 above. On the *Iliad* manuscript made for Mehmed II, his days as a crown prince, and his fascination with the legend of Troy, see Necipoğlu, "Visual Cosmopolitanism," 6–7, 9–10. This *Iliad* manuscript in the BnF in Paris, which the French ambassador Pierre de Girardin acquired via intermediaries from the Topkapı library in 1687, is dated to around 1463 in Raby, "Greek Scriptorium," 20–21. The provenance of two other *Iliad* manuscripts in Greek, from the thirteenth and fifteenth century, that survive in the Topkapı Palace library is unknown: see Deissmann, *Forschungen und Funde im Serai*, 42–43, no. 2; 96, no. 65. I would like to thank Dimitri Gutas, who pointed out that he has never come across any reference to "a story of Qirisus" in the Graeco-Arabica corpus, and has suggested that if the legend in Herodotus was available in a Byzantine Greek story, the manuscript in the library inventory "may well be a transcription, in Arabic characters, of the Greek story, in a manuscript which would appear to have contained other stories in various alphabets" (email correspondence). This section of the inventory does indeed include some lexicons and works in Greek. I am grateful to Dimitri Angelov, who confirmed that Croesus was a known figure in Byzantium; according to the electronic database of Byzantine Greek texts, Croesus was used "as an exemplum by rhetoricians for a wealthy king who loses divine favor and falls from power" (email correspondence).
 183. On Ilyas ibn Ibrahim al-Yahudi, who wrote the Hebrew treatise on astronomy in al-Andalus before moving to Istanbul, see Ekmeleddin İhsanoğlu et al., eds., *Osmanlı Tabii ve Tatbiki Bilimler Literatürü Tarihi*, vol. 1 (Istanbul, 2006), 20, no. 18; and Ekmeleddin İhsanoğlu et al., eds., *Osmanlı Astronomi Literatürü Tarihi*, 2 vols. (Istanbul, 1997), 1:71–73. The polemical theology treatise is listed in 'Atufi's inventory as *al-Risālatu al-hādīyatu fī ibtālī hujaji al-yahūdī 'alā al-islāmī min qibali 'ilmi al-kalāmī* (63 [14–15]). The earliest known extant copy (TSMK, A. 1735, Karatay A 4945) is identified on fol. 1a with a slightly different abbreviated title, which omits the affiliated discipline: *al-Risālatu al-hādīyatu fī ibtālī adillati al-yahūdī 'alā al-islāmī*. Dated 19 Jumada II 902 (February 22, 1497) and written by 'Abd al-Salam al-Muhammadi, it has Bayezid II's seal on fol. 38a. On an edition of the polemical treatise that does not use the earliest manuscript at the Topkapı, see Sabine Schmidtke, "The Rightly-Guiding Epistle (*al-Risāla al-Hādīya*) by 'Abd al-Salām al-Muhtadī al-Muḥammadi: A Critical Edition," *Jerusalem Studies in Arabic and Islam* 36 (2009): 439–70.
 184. The treatise (TSMK, A. 3302, fols. 102b–109a) is titled *Dhikr ba'd al-maḥallāt* [i.e., *al-muḥallāt*] *al-lāzima li-aṣl waq' falak al-tadwīr wa-khārīj al-markaz wa-bayān luzūm kaww ḥarakāt al-samā' wa-jamī 'ajzā'ihā ilā nāḥiya wāḥida*, according to Robert Morrison, "A Scholarly Intermediary between the Ottoman Empire and Europe," *Isis: A Journal of the History of Science Society* 105, no. 1 (March 2014): 32–57, at 35–36. See also his "An Astronomical Treatise by Mūsā Jālīnūs alias Moses Galeano," *Aleph* 11, no. 2 (2011): 385–413. Unaware of Bayezid II's seal in that volume, Morrison speculated that it was "perhaps" written in the sixteenth century.
 185. See Morrison's transcription and English translation of the Arabic text: "An Astronomical Treatise by Mūsā Jālīnūs alias Moses Galeano," 385–413; the quote is at 400–401.
 186. Karatay's catalogue mentions only the first item in this compilation (TSMK, A. 3302, Karatay: A 7055), comprising two treatises. This first work on theoretical astronomy is by the Andalusian scholar Nur al-Dīn Abu Ishaq al-Bitrujī (d. 1185), titled *Kitāb al-Murta'ish fī al-hay'a* (Book of Trembling on Theoretical Astronomy). The compendium has no sticky label on the flap of its original binding. Nor is there a seal impression of Bayezid II at the end of the volume; only one seal remains on fol. 1a. The final pages of the volume seem to be missing and Musa Jalinus's treatise ends

- abruptly on fol. 109a. The second manuscript copy listed by 'Atufi has not yet come to light. The Arabic treatise by Musa Jalinus and his other works are listed in İhsanoğlu et al., eds., *Osmanlı Astronomi Literatürü Tarihi*, 1:224–25; and Morrison, "Scholarly Intermediary." See also the essay by Jamil Ragep et al. in this volume on al-Bitruji's groundbreaking work, which posited a "homocentric modeling as an alternative to Ptolemy's *Almagest*" (the first item in the Topkapı manuscript, whose second item is not discussed in their essay).
187. For Musa Jalinus's expertise in mechanical devices, his acquaintance with Bayezid II's court, his intellectual-professional networks in Istanbul, and his works, see Y. Tzvi Langermann, "Medicine, Mechanics, and Magic from Moses ben Judah Galeano's *Ta'ulumot hoḳmah*," *Aleph* 9 (2009): 353–77; Y. Tzvi Langermann, "A Compendium of Renaissance Science: *Ta'ulumot hoḳmah* by Moses Galeano," *Aleph* 7 (2007): 285–318, esp. 287–88. David A. King has hypothetically attributed a spherical astrolabe signed as "the work of Musa, in the year 885/1480–81" to Musa Jalinus in Istanbul; if his attribution is correct, this scientist was already active around the time of Mehmed II's death (d. 1481) and Bayezid II's accession: see *Spherical Astrolabes in Circulation: From Baghdad to Toledo and to Tunis and Istanbul*, <http://www.davidaking.academia.edu/version> 24 September 2018, pages 50–119. On the translation of Zacuto's *Almanacum perpetuum*, see *ibid.*, 109. For the two other astrolabes with dedicatory inscriptions to Bayezid II, dated 910 (1504–5) and 911 (1505–6), see David A. King, "Two Astrolabes for the Ottoman Sultan Bayezid II," 1:439–59; and David A. King, *In Synchrony with the Heavens: Studies in Astronomical Timekeeping and Instrumentation in Medieval Islamic Civilization, Volume Two: Instruments of Mass Calculation* (Leiden; Boston, 2005), Part XIV: 775–96. Alchemical works in 'Atufi's inventory are analyzed by Noah Gardiner in this volume.
 188. On the bridge project and Bayezid II's mosque complex in Istanbul, with its possible connections to Pope Julius II's New Saint Peter's in Rome, initiated ca. 1506, see Necipoğlu, *The Age of Sinan: Architectural Culture in the Ottoman Empire* (London, 2011), 88–92; and my "Architectural Dialogues across the Eastern Mediterranean: Monumental Domed Sanctuaries in the Ottoman Empire and Renaissance Italy," in *The Companions to the History of Architecture, Volume I: Renaissance and Baroque Architecture*, ed. Alina Payne (Hoboken, NJ, 2017), 594–623, at 600–604.
 189. European illustrated treatises on military engineering associated with Mehmed II are cited in note 178 above. Pappus discusses mechanics in Book VIII of his *Mathematical Collection*. I am indebted to Elaheh Kheirandish for bringing this undated illustrated Arabic translation (SK, Ayasofya 3624) to my attention; it is cited in her essay in the present volume. In the compendium, which I examined, only the treatise by Pappus (fols. 52a–103b) is stamped with Bayezid II's seals (fols. 52a and 103b). The seal of Mahmud I's *waqf* inspector is on fols. 1a and 52a, with Mahmud I's *waqf* seal on fol. 1b.
 190. SK, Ayasofya 2753, seal impressions of Bayezid II, Mahmud I, and Mahmud I's *waqf* inspector are on fol. 1a, with another seal of Bayezid II on fol. 70b. On the practical geometry treatise of Buzjani, see my essay and that of Elaheh Kheirandish in Gülru Necipoğlu, ed., *The Arts of Ornamental Geometry: A Persian Compendium on Similar and Complementary Interlocking Figures*, Supplements to Muqarnas 13 (Leiden; Boston, 2017), 11–78, 79–144.
 191. On translated pre-Islamic holy books listed in 'Atufi's inventory, see Cemal Kafadar's essay in this volume; and Argyriou and Lagarrigue, "Georges Amiroutzès et son 'Dialogue sur la foi au Christ tenu avec le Sultan des Turcs'," 157, 159. On a Bible translated from Greek to Arabic for Mehmed II by one of Amiroutzes's two sons, called Mehmed Beg, see Mirmiroğlu, *Fatih Sultan Mehmet*, 98.
 192. Many titles of the scholarly-bureaucratic madrasa curriculum established by Sultan Süleyman about half a century later match those in 'Atufi's inventory, an observation that merits further examination. However, this curriculum is entirely confined to the Islamic religious sciences, unlike the wide-ranging disciplines encompassed in the palace library inventory. See the book list of the curriculum analyzed in Shahab Ahmed and Nenad Filipović, "The Sultan's Syllabus: A Curriculum for the Ottoman Imperial *medreses* Prescribed in a *fermān* of Qānūnī I Süleymān, Dated 973 (1565)," *Studia Islamica* 98/99 (2004): 183–218.

BETWEEN AMASYA AND ISTANBUL: BAYEZID II, HIS LIBRARIAN, AND THE TEXTUAL TURN OF THE LATE FIFTEENTH CENTURY

To Filiz Çağman,
scholar-librarian par excellence,
who taught me that a custodian
of books can be a treasure herself

Unlike his father and his son, Sultan Bayezid II (r. 1481–1512) was more interested in peaceful and orderly administration than in conquest. He thus worked harder on manufacturing consent than on wielding coercion. Not to be confused with a flat-out refusal to use military force, this is more a matter of a different balance in policies. Bayezid certainly did not refrain from conquest or coercion, or from policies that struck many of his subjects as oppressive, even cruel. Yet many of his contemporaries described him as unwarlike and moderate.

The Crimean khan, for instance, an Ottoman vassal since 1475, asked the sultan in a surprisingly forward letter if the “duty of jihad” was no longer in force, now that the Ottoman army had remained inactive for some time. Bayezid replied gently but firmly that he, too, was mindful of the duty of jihad, which would bring one blessings in both worlds, but reminded the khan that sultans had the unique responsibility before God to maintain order in the realm so that their subjects could flourish, and that such order is vulnerable to disruption by the ill-willed when the sultan and the army are on the move. With all this in mind, Bayezid wrote, he devoted his time, day and night, to investigating and managing the affairs of the people.¹ Later historians did not diverge much from this assessment. Joseph von Hammer-Purgstall (1774–1856), the Habsburg Orientalist and historian of the Ottoman empire, wrote that Bayezid “did not engage in war unless he had to.”² The difference in temperament between Bayezid and his father also struck contemporaries who had known them both. Tursun Beg, historian and scribe of the late fifteenth century

(d. 1496), wrote critically that the wrath of Mehmed II trumped his moderation, implying the reverse for his son Bayezid. Even if this was simply a way of flattering the young sultan, the choice of characteristics is telling.³

That reputation seems to have rendered Bayezid II a figure of lesser significance and accomplishment in the eyes of posterity, particularly in modern historiography, which tends to either ignore him or, more often, present him in a defensive posture.⁴ Yet the more historians repeat that Bayezid is underrated, and then rehearse an argument to counter that reputation in his defense, the more entrenched the image of a weak link in an otherwise robust narrative of vigorous conquest and expansion, by one descendant of Osman after another, seems to become. The meek counterarguments are often whit-tled down into qualifications, even mere excuses: Bayezid may have been less active on the military front, but that is only because his brother’s captivity in Europe until 1495 meant that he had to remain cautious. Bayezid’s reign was not without its successful campaigns, after all, such as the conquest of Kilia and Akkirman on the Black Sea (1484), as well as Lepanto and Mothoni on the Mediterranean (1499–1500) and Durrës (Durazzo) on the Adriatic (1501). Bayezid was personally there in the field for much of it. He may have missed “the grand 1492” of Christopher Columbus, but he made the best of that fateful year by allowing his realm to become a refuge for the Jews and Muslims expelled from Iberia after the fall of Granada. Moreover, improving the naval capabilities of the Ottoman state was only one of several important steps Bayezid took toward developing institutions and infrastructure. None of this is as glamor-

ous as conquering Constantinople or Egypt, but his admirers could still take solace in the fact that “saintly” was his sobriquet. Within such a framework, for instance, a modern historian characterizes Bayezid’s reign as “a period of transition from the old heroic age of the fourteenth and fifteenth centuries to the new age of grandeur ... a period of consolidation before conquests were resumed.”⁵ But would any ruler desire to be considered “transitional”?

In terms of his record as a patron of the arts and culture, too, Bayezid’s legacy remains captive to two dominant narratives. On the one hand, his reign falls between the fabled patronage of his father, and the felicitous partnership of his grandson (and two more generations of sultans) with the great architect Sinan (d. 1588). On the other hand, at least since the late nineteenth century, when intellectuals around the world started to ask why their country was not (like) Europe and adopted defensive positions vis-à-vis “European civilization,” Bayezid’s victory over his brother Cem to consolidate control of the Ottoman sultanate has come to represent a path not taken, the ultimate “what if” of Ottoman history. In this counterfactual account, Mehmed knew what the Renaissance was all about and Cem would have continued in that path to lead his empire toward modernity. What-if easily turns into a wishful if-only.

There are accompanying narratives regarding Bayezid II that compound the image of a reactionary sultan following a progressive one. A curious tale, for instance, attributes to him a firman and a fetva, allegedly issued in 1483, imposing a ban on printing in the Arabic script. Although this tale is based on the shakiest of grounds, it has become a common refrain in Orientalist scholarship.⁶ Could a firman, or even repeated firmans, if there ever were any, have been sufficient to prevent the importation of a technology and its social uses for two and a half centuries, considering that the alleged ban is offered as an explanation for the belatedness of Arabic-script printing in the Ottoman empire, which did not begin until 1728? How, then, did coffee and coffeehouses manage to defy numerous bans from the sixteenth century onwards? The point is raised here not to discuss the history of printing, obviously, but to underline the fact that Mehmed or Bayezid or any other sultan functioned within a complex social order influenced by dynamic institutional and irregular factors that shaped the authority of the state and the will of the sultan, as powerful

as these may have been. Discussing the policies and temperaments of sultans is only meaningful when we bear this in mind.

The specific political alignments of the second half of the fifteenth century and their articulations in the cultural realm ultimately need to be considered against the background of the deep-reaching transformations in the social order that were taking root in the Ottomanizing geography of the lands of Rum at the time. Large groups of people were undergoing various forms and degrees of social transition within different micro-ecologies of that geography, from nomadism to peasanthood, for instance. Encounters, both destructive and synergistic, between different modes of animal breeding and plant cultivation, continuing since the eleventh century when Turkish migrations and invasions started, were culminating in a new agro-pastoral landscape, which the Ottoman state would bring under its control by the early sixteenth century. Rising numbers of Islamic endowments were creating new social and institutional environments for important aspects of public life, such as education and religion. A corollary of this development was the growth of the cadres of ‘ulema, namely Muslim scholars and jurists. Religious conversion (to Islam) and linguistic *métissage* (mostly favoring Turkish) continued apace. Sufism was advancing with a new orientation toward a more strictly path- or (Sufi) order-minded organization in its activities and relations with devotees. Confessional concerns were becoming more important for the state and orthodoxy-minded scholarly cadres, while ecumenicism, ambiguity, and metadoxy continued to prevail among some influential circles as well as large segments of society. Frontier warriors and former “nobilities” were losing their autonomy and being transformed into appointees in an increasingly well-oiled administrative apparatus with its complex calculus of rotating positions, promotions, and dismissals. This was accelerated by the larger “constitutional” reform initiated and legislated by Mehmed II, whereby the role of the sultan and of the dynastic state was radically redesigned in terms of its hierarchical relationship with a nascent bureaucracy, the ‘ulema and the military-administrative “servants of the Porte,” the latter staffed increasingly by the *devshirme*. Changing patterns of landholding paved the way for the commercialization of agriculture around cities, and migration to cities.⁷ A sultan could only harness and control so much of these

and similar interrelated, at times conflicting, dynamics. He also needed to work with a team of *grandees* and elites who had their own opinions and interests, even if he had directly appointed some of them.

To return to Bayezid II, since my intention here is to shed light on certain aspects of the imperial book collection and its inventory—which was compiled between 1502–4 at Bayezid's initiative by Hayrüddin Hızır 'Atufi (d. 1541), tutor and librarian at the court—some comments on the broader context of that project are in order. The reason Bayezid reversed some of his father's policies was not simply a matter of temperament. Rather, the sultan, and presumably some leading members of his administration, evidently thought that part of Mehmed II's program was unsustainable. While certain deeds of clemency inaugurating the rule of a sultan might be regarded as mere gestures, Bayezid's decision to reverse his father's policy of confiscations was far more than that. Tursun Beg, who served as treasurer under both sultans, speaks of twenty thousand villages whose status as endowments was annulled under Mehmed so that they could be subsumed into the Imperial Treasury and assigned as revenue to fief-holders.⁸ Bayezid returned this huge aggregation of villages to their former status and to those who benefited from their revenue, mostly Sufi communities. This reversal was consistent with many of Bayezid's earlier and later actions, which prioritized consent. Already as a prince based in Amasya (between 1454–81), for instance, he had raised objections to his father's fiscalist measures and defended the townspeople of his princely residence from various exactions.⁹

By the end of his reign, Mehmed II had created large numbers of resentful subjects due to various policies, which were considered harsh and tyrannical. Even his larger project of turning Istanbul into the shining imperial capital of a highly centralized bureaucratic state had its critics among some vocal segments of the population.¹⁰ Bayezid cannot have been the only one who was aware of the currency of popular strands of historical narratives—oral cycles, some of which were finding their way into texts written in a rather simple everyday Turkish—since the beginning of the fifteenth century. At least some of that material, either discreetly or explicitly and even loudly, gave vent to a critical sensibility vis-à-vis Ottoman centralization, while also compiling tales of the deeds of the House of Osman in a celebratory

fashion. Some of that critique was embedded in the vitae of other heroes of an epic past, dervishes or warriors, whose stories intersected with those of the Ottomans. Mahmud Pasha (d. 1474), who acquired a reputation as a saintly figure after having served as Mehmed II's grand vizier but ultimately being executed by order of the sultan, had commissioned a history of Umur Bey of the House of Aydın (d. 1348), whose principality was one of the thorniest rivals of the Ottomans for some time.¹¹ It took a certain Ebu'l-hayr-i Rumi seven years, between 1473 and 1480, to comply with the orders of Prince Cem to travel and gather tales told about Sarı Saltuk, a popular legendary dervish of the thirteenth century; this monumental collection of lore included a critique of the preference of Istanbul over Edirne as the capital city.¹² After his first successful military campaign in 1484, however, Bayezid was in an even more comfortable position to encourage the emergence into public view of such narratives of the deeds of his own forefathers, critical or not. Some of these narratives had already been written down, but texts began to appear in quick succession and undergo redactions within the next decade or two. The textualization of historical lore surrounding the House of Osman culminated in the emergence of the first major corpus of Ottoman history writing, which constitutes the most important body of information (and misinformation) about early Ottoman history to this day. Independent of its historiographic function, however, the blossoming of this corpus between 1484 and the turn of the sixteenth century should also be recognized as one of the most consequential events in the history of vernacularization and textualization, at least in the lands of Rum. The emerging corpus represented a systematic engagement with oral traditions, as well as some sparse earlier written materials based on those traditions, followed by editions in written form. Here we have the first substantive textual layer of public debate in Ottoman cultural life, enabled by Bayezid's encouraging attitude toward those critical but pro-Ottoman voices, mostly among the dervish milieu.

This body of chronicles, some anonymous, which consisted of different "editions" of popular accounts concerning the "Deeds of the House of Osman," was only part of an avalanche of efforts toward textualizing the oral narratives and traditions of Turkish speakers in the fifteenth century. The famous cycle of warrior epics—

Baṭṭāl-nāme, *Dānişmend-nāme*, *Şaltuḡ-nāme*—recounting tales of Arab and Turkish ghazis, and their convert comrades, conquering the lands of Rum in the name of Islam, found their way into canonical texts during this same century. The rich oral traditions of the Oghuz, as embodied in epic narrative cycles or edifying and entertaining common discursive genres like proverbs, were also collected and edited (see below for further discussion of Oghuz lore). Dervish lore received editorial treatment in Turkish texts in the same era, following Persian, Arabic, Syriac, Armenian, and Greek models to be sure, but in modes and idioms recognizable to their prime audiences among Turkish speakers.

Bayezid's patronage of certain dervish communities, his close links with Khalveti shaykhs, and his eventual reputation as a saintly ruler also invite a consideration of his piety. Modern historians have sometimes tended to treat the piety of a ruler as a sign of an inward-looking parochialism, all the more so perhaps with Muslim rulers. To give an example from Indian history, the differences between the emperors Akbar (r. 1556–1605) and Aurangzeb (r. 1658–1707) are certainly significant, but they have also lent themselves to a comforting binary of the modern/secular/universalist versus the medieval/religious/parochial as the main explanatory dynamic of centuries in the history of the subcontinent, which continues to carry a heavy political load even today. In the Mughal realm, there is another parallel to the case of Bayezid and Cem in a battle for the throne, where the prince who lost, Dara Shikoh (d. 1658), represents the major what-if, as well as the if-only.

Rather typical of that binary is to lionize the “scientific” attitude of rulers of the former type and to be somewhat dismissive toward the latter in terms of their attitude to learning and the sciences. The only study dedicated to the libraries of successive sultans, for instance, a truly path-breaking work published in 1948 and not followed since in terms of its diachronic comparative approach, asserts that Bayezid II was interested in collecting books but not necessarily in reading them.¹³ Until recently, histories of Islamic and Ottoman science, too, tended to see a large gap between Mehmed II and the westernizing nineteenth century.¹⁴ While it may be useful to investigate the differences between Mehmed II and Bayezid II on these matters, their continuities are

far more obvious in terms of the palace library collection. As for Bayezid's own relationship to books, it is worth citing Alvise Gritti, one of the Venetian elite closely connected to Istanbul and quite well informed about Ottoman affairs, who described Bayezid in 1503 as someone who “continuously studies theology and astral sciences and is highly educated in cosmography.”¹⁵ Among the books identified as having once belonged to his collection, several have notes mentioning Bayezid's perusal (*muṭālaʿa*) of their contents, and the compiler of one hadith collection in particular evidently followed his suggestion for alphabetic ordering (*ʿalā tartībī al-ḥurūfī li-Sultān al-Salāṭīn Sultān Bāyezīd Khān*) (“according to the order of letters, for Sultan Bayezid”).¹⁶

The political and ideological views of a ruler, or anyone for that matter, cannot be merely a function of his or her position on some imagined scale of piety. Not only does piety itself consist of a complex set of attitudes, but there also are many other cultural concerns and orientations that influence it and work in tandem or in conflict with it. Lettrism was clearly one of the most important of these intellectual movements at the time, and it has lately received overdue attention, which has profoundly reshaped our understanding of Ottoman cultural and intellectual life in the fifteenth and sixteenth centuries.¹⁷ As for Sufism, its changing face throughout the Islamic world in the late medieval era culminated in its institutionalization within far more strictly organized dervish orders with their own well-connected translocal networks. In that regard, for instance, the nature and consequences of Bayezid's sympathy for the Khalvetiyye since his youthful days in Amasya need to be further explored.

Oghuzism, too, was a vibrant trend among some segments of Ottoman society and neighboring Turkish communities in the fifteenth century. It related to a spirited engagement with the political and cultural traditions of Oghuz Turks, one of the two large language communities among the Turkish-speakers of Inner Asia and related to each other, in their genealogical legends, through descent from Oghuz Khan, a legendary figure associated with an ur-monotheism and the idea of world-conquest. The Oghuz constituted the overwhelming majority of the Turkish tribes who Islamized and moved to western Asia from the eleventh century,

forming the dynastic and military elites of new states, like the Seljuks and the Ottomans who adopted various other political traditions from various other elites and social groups they coopted on their way to imperial power in the Middle East and beyond. An early version of Oghuzism, partly consisting of rediscoveries of “forgotten traditions,” is discernible in some key texts composed during the reign of Murad II (r. 1421–44; 1446–51), viz., *Bahjat al-tawārikh* by Şükrullah of Amasya and *Ta’rîḥ-i Âl-i Selçuk*, in which lore about Oghuz Khan is embedded, by Yazıcızade ‘Ali of Gelibolu (fl. first half of the fifteenth century).¹⁸ A complex set of ideas and attitudes negotiating weighty matters concerning the role of Turkmen communities and their traditions in the emerging Ottoman dispensation, Oghuzism deserves a separate study as a largely unrecognized phenomenon that was eventually subsumed under confessional and other anxieties of the sixteenth century.

Bayezid was attentive to Oghuzism, as was his brother. Strikingly, Cem (b. 1459–60) had a son named Oghuz (b. 1474–75?), but one should not overlook the fact that Bayezid already had a son named Korkut (b. 1469–70 in Amasya) as well as a daughter named İlaldı, names that are clearly meant as avatars of the good old days of the Oghuz.¹⁹ Could the tales of Dede Korkut, perhaps the most popular secular epic cycle of Turkish-speaking communities from the lands of Rum to Khorasan, have been written down in the cultural orbit of Amasya? Probably not, since recent linguistic analysis has tended to locate the textualization of the versions as we have them, surprisingly, in Rumelia; but the more important fact is that it happened in the fifteenth century, and that the writing displays an attitude of respect for both the Akkoyunlu and the Ottomans, who were neighbors and rivals in eastern and east-central Asia Minor. The only recognizable geographic references in these tales refer to areas just to the east and northeast of Amasya; one can well imagine that the tales, as told, would have engaged receptive audiences in that region.²⁰

Yet another point of focus for Oghuzism was Turkish proverbs, collections of which were titled *Oghuznâme*. One can hardly exaggerate the significance attached by these texts, and presumably by their audiences, to the collective wisdom embodied in Oghuz lore. The introduction to a collection of proverbs, compiled in

885/1481–82, boldly asserts: “Proverbs [literally, ‘the words of ancestors,’ in Turkish] are not in the Qur’an but go alongside it.” Another version of the same collection, with ninety-four additional proverbs, also presents its material emphatically but in a manner less likely to raise eyebrows among the ‘ulema: “Those we call ancestors are not [merely?] the elderly of Turks and Turcomans but prophets and saints, nothing else. They took their words from [Qur’anic] verses and hadith.”²¹ Yazıcızade’s “History of the Seljuks,” mentioned above, speaks more directly to the need for these written collections of Oghuz traditions, reminding the Ottomans that this was their background, their blessed origin which made their success possible, but it had been neglected and was in danger of being forgotten altogether. One of the copies of Yazıcızade’s magnum opus was, not so incidentally, bound together with an independent but kindred short text of two-and-a-half pages, explicitly related to the narrative cycle of the tales of Dede Korkut, with opening lines of laudations for the Oghuz and offering some choice proverbs as well.²²

This period represents the final glow of Oghuz cultural traditions before they were overtaken by an emerging Ottoman synthesis, which incorporated some of their features and marginalized others. It was this momentous change in the cultural lives of Turkish-speaking Muslims in the lands of Rum, especially those of Oghuz-Turkmen background and the Rumi populations who “became Turks” within their orbit, that served as the impetus for the “folkloric” collections of the fifteenth century. Pertev Naili Boratav (1907–98), the brilliant folklorist-historian who personally lived through a similar transformative moment in the history of the Turkish language and literature in the twentieth century, captures the essence of the *Oghuznâme* with characteristic brilliance. He has demonstrated that before they were texts, “in the good old days of the Oghuz,” to use the very language of these collections, proverbs were not verbally dropped in one-off utterances but rather were performed. That was their vital role in narratives or inaugurations such as opening recitations to initiate wrestling competitions, much like ritual acclamations and castigations (*alkış* and *kargış*). Toward the end of the fifteenth century, proverbs were losing their vital

presence as structural elements in epic narrative performances and instead were being turned into wise sayings for the purpose of moral edification.²³ The epic tales themselves were receiving their canonical form in writing. Textualization was still a form of engagement with Oghuzism, even a defense of it at some level, but came at the expense of anchoring the tradition in new terrain where the written word would have hierarchical claims over the spoken. In other words, the authors or editors of the proverb collections or the epic tales of Turkic-Islamic-Hellenic heroes of olden days, including the corpus of late-fifteenth-century chronicles compiling tales of the early Ottomans, were folklorists themselves. Like all ethnographer-folklorists, they were not just collecting but were also serving as witnesses to and instruments of a transformation in the cultural world around them.

Of texts that testify to the widespread cultural trend that can be identified as Oghuzism, there are not many examples in the palace library of 1502–3, when the inventory was prepared; even some of the books that owed their existence to Bayezid's initiative, if not patronage, were missing. There were good reasons for compiling oral traditions and rendering them into writing, but many of those initiatives and energies took shape outside the palace. Bayezid went a certain distance toward tapping into these initiatives, much farther than his father had, but he proceeded selectively, without engaging the tradition head on. Although the Oghuz materials available in the palace library would increase a bit after Bayezid, their Oghuzism catered to nostalgia and curiosity rather than representing a critical negotiation by the court with the trajectory of the Ottoman polity vis-à-vis its Turkmen subjects, as in the fifteenth century. The most important, though not necessarily direct, contribution of the Turkish and Turkmen-led courtly societies of the fifteenth century to the textualization of oral epic narratives and related genres must be located in their overall valorization of the written word and their efforts to create hospitable environments for bookish and literary pursuits, including libraries. The textual turn was not an orchestrated event, nor was its main focus on the Turkish language as such, though it may have been the main beneficiary in the long run.

Whether as authors, editors, ethnographers, or translators, some textualizers were at least aware that theirs was a task of not only rendering *into* Turkish but also rendering *unto* Turkish, namely making sure that Turkish would be given its due as a language, that it would be recognized as a vehicle capable of carrying profound meaning in various registers, from the very basic to the more sophisticated. Hence the hypersensitivity of writers concerning their choice of subject, register, depth of discussion, or prose versus verse. The author of one medical work penned in 1460 writes in the introduction that he “put this book together in Turkish” because “what is said in this land is said in Turkish” and he wished to follow the principle that “one ought to address a people in their own language.” This much could be considered a primer for the use of vernacular, but the author also finds it necessary to explain his choice of prose through a striking analysis of the use of poetry in terms of its linguistic and psychological implications: “I did not care for poetry, verse, or rhyme, for the reason that this is a book of instruction. Poetry makes one cheerful (expansive?), and happiness cannot be without pride and heedlessness, moreover grudge can intervene; the requirements of poetry also invite difficult words, meaning remains distant.”²⁴

To bring the matter closer to Bayezid II, Sinan Pasha (d. 1486), who was hugely admired by the sultan, underlines another aspect of writing in Turkish, namely the heterogeneity of audiences when writing in the vernacular, a matter of particular concern for him. Dervishes need to mind the exoteric sharia, he writes in his translation of Farid al-Din ‘Attar’s (d. 1221) *Tadhkirat al-Awliyā*, a work well represented in the palace library in its original Persian (see Appendix, no. 1, and Plate 1), but many do not understand what that is and consider too many things to be contrary to it. In his translation, however, Sinan Pasha did not deem it appropriate to expound on this topic since he expected the book to be read by common people (because it is in Turkish) who would not have the sophistication to understand the subtleties of the matter and would therefore be misled to error (*dalālet*).²⁵ The totality of Sinan Pasha’s impressive and influential output in Turkish, three books altogether, is from his remaining few years during the reign of Bayezid who, immediately after his accession,

reinstated the famous and famously unfortunate scholar—demoted, briefly imprisoned and, after protests by the ‘ulema, exiled by Mehmed II—in his former rank as vizier and appointed him to a top-level professorship in Edirne. The young sultan’s decision to honor the oppressed intellectual was celebrated by the queen mother Gülbahar Hatun in a letter to her son, Bayezid, where she writes: “You have given a vizier-ship to the son of Hızır Beg, it was about time. We have love for those who have love for thee.” Just a couple of years earlier, Gülbahar herself had gotten on the wrong side of Mehmed II who sent an order to Amasya in 1479 to question her claim to some villages as her property and to re-allocate them as fief assignments.²⁶

The case of Sinan Pasha also helps to illustrate the rise of families of scholars with roots in the lands of Rum among Turkish-speaking communities in the fifteenth century. While emigration to the Ottoman realm continued thanks to the opportunities created by the expansion and successful institutionalization of the new dynastic state, certain Rumi families, too, boasted members of scholarly reputation and even intergenerational continuity in that regard. The title *çelebi*, used for scions of elite families—dynastic, Sufi, or scholarly—started to gain in frequency. There was also some competition and rivalry between these two types of recruits into the ranks of Ottoman intellectual, artistic, courtly, and scholarly elites. An anecdote involving Hızır Beg (d. 1459), Sinan Pasha’s father, himself the son of a scholar, relates that his reputation reached the capital city of Edirne even from his middle-Anatolian town of Sivrihisar. When the famous scholars of the center were unable to respond properly to questions raised in a debate by visiting scholars from the Arab world, Hızır Beg was invited for the second round, where he proved that a provincial scholar of Rum, whose outlook at first triggered some slighting laughter, could out-debate all those sophisticates with his learning and eloquence.²⁷ Apocryphal though the tale may be, it captures the sense of combativeness among the uppity Rumis. Resentful of a dismissive attitude toward “the locals,” these Rumis joked bitterly that to be recognized in the court of Mehmed II, one had to be either a Jew, or a Persian, or a “Frank,” displaying the manner of a Zorzi (Giorgio, in Venetian). The ruse of a certain Le’ali, a poet origi-

nally from Tokat but pretending to be from Iran, was exposed only after he managed for years to receive favors as ‘Acem (Persian); there was even a word coined specifically for the type that Le’ali represented, namely *müte’accim*, a pseudo-Persian.²⁸

Whatever the validity of this stereotype, celebrity scholars and poets were also emerging from among the Anatolians and Rumelians, for whom Turkish was the unifying linguistic medium and a treasure to be cultivated for new uses. Inter marriages among these families must have intensified the sense of belonging to a kind of scholarly gentry. Hızır Beg’s wife, and Sinan’s mother, for instance, was the daughter of Hızır’s renowned teacher, Molla Yegan (d. ca. 1461), from a Turkmen tribe. Gülbahar Hatun (d. 1492) likely knew her; our investigations of Ottoman scholarly life would benefit immensely from a closer look into marriage patterns and networks that include women, not to mention women’s roles in education and transmission of learning.

Sinan Pasha was only one of several intellectuals who had been demoted, ill treated, or forced into exile or withdrawal by Mehmed II. Another important turn of events under Bayezid that had profound consequences for Ottoman cultural life was the reinstatement of these intellectuals, often to positions of security and productivity. The fate of Molla Lutfi of Tokat (d. 1495) reminds us, however, that reinstatement was not always secure, even under Bayezid and despite being productive. After having served Mehmed II as palace librarian and being dismissed, this brilliant student of Sinan Pasha’s was given a professorship at a top madrasa by Bayezid upon his accession. Molla Lutfi was also invited to the court for the many open debates held by the new sultan, just like his father, on scientific and philosophical questions in front of an audience. At least two of Molla Lutfi’s books were produced as an outcome of those intensely competitive debates at the court, but he seems to have been unable to control his biting humor and impatience for dogmatism despite several warnings. Considered an incorrigible gadfly by his colleagues, Molla Lutfi is said to have been protected by Bayezid a number of times against charges of heresy, but ultimately the sultan yielded and agreed to a trial by a jury of scholars. The former librarian was sentenced to execution as a heretic, with only a single abstention from Efdalzade

Hamidüddin Efendi, one of 'Atufi's teachers.²⁹ None of Molla Lutfi's works appears in the inventory.

AMASYA

The city of Amasya had been the princely residence of Bayezid II for twenty-seven years. Much like Bayezid himself, the significance of the city in Ottoman history has not been properly recognized due to what it was not. Namely, it was not a capital city, it never became an overture to Istanbul like Bursa or Edirne, nor was it a place that could be treated as a stage to the ultimate telos of Ottoman history.

Amasya, was, however, much more than just one princely city among others. Three of the four rulers of the fifteenth century came of age and cut their teeth in politics there. Both winners of the two bitterly fought internecine wars of that century, namely Mehmed I and Bayezid II, were Amasyan, for all practical purposes, and their bases of support and networks in the region mattered for their victory as well as for their reign thereafter.³⁰ The city would also be at the crux of the next big struggle among brothers, the sons of Bayezid II, which was lost by the prince of Amasya in 1511–13. This period can be considered the second interregnum, nearly a century after the first one (between 1402–13), and the city would never regain its earlier prominence thereafter. Still, Amasya was quite relevant during the fourth set of wars among princes, namely yet another make-or-break moment in the long and conflict-ridden Ottoman project to build an empire in the lands of Rum and beyond. Vanquished, Prince Bayezid (d. 1562), son of Süleyman, and the last one to hold an appanage in Amasya, would seek refuge in Safavid Iran in 1559, where he would eventually be executed after an agreement between the sultan and the shah—somewhat like the fate of his great-uncle Prince Cem, who died, possibly poisoned, while in the custody of the pope in Italy.³¹ (The palace library would eventually include at least some of the books of the two deceased princes.)

In short, Amasya was arguably at the center of more than a century and half of Ottoman political history. During the lifetime of Bayezid and 'Atufi, the city's aura and formative impact transcended that of the surrounding region. On the northern corridor of the Silk Road in

Anatolia, the vibrant trade route between Bursa and Tabriz, Amasya constituted the most important gateway between the lands of Rum and Iran at the time.³²

As the leading urban center of the easternmost region held continuously and securely by the Ottomans for more than a century—namely until after the battle of Çaldıran (1514), when the Ottoman realm expanded eastward—Amasya was a veritable hub of commercial, cultural, and Sufi networks with extensive transregional connections. Until 1514, Amasya was also the administrative center of a region with several well-connected towns (including Merzifon and Tokat), fertile agrarian lands, as well as nomadic and semi-nomadic communities.³³ There was a remarkable continuity in the political roles played by notable families—some of them evidently with deep roots in the ancient régime of the Seljuk and the Mongol eras—and in their relatively stable coalition with the House of Osman after 1398. The proximity between the patricians and the princes certainly contributed to the stability of that coalition. They must have been the main beneficiaries of Bayezid's defiance of his father, for instance, when Mehmed II wanted to impose the aforementioned extraordinary levy on the city and the prince defended his compatriots against the exaction. Some of these families were undoubtedly linked, by descent or social network, to sizeable Turkmen communities with their transhumant pastoralism and Oghuz traditions.³⁴ They were also linked to, or even led in some instances, the emerging Sufi circles of the city, with endowed institutions and transregional networks. The social, cultural, material, and military resources amassed by this intricate articulation of elites rendered Amasya a site of considerable political capital for princes, who could also insert their own men into this landscape through land grants and fiefs. In fact, before he became known for piety, Bayezid had amassed a reputation as a young man who indulged in the pleasures of wine and opium in the merry company of Amasyan socialites and literary elites.

Not surprisingly, the city and the region were receiving migrants, while it also sent some of its brightest to cities further west in the Ottoman realm, especially after the accession of Bayezid II, as the case of 'Atufi exemplifies. Second to none in the lands of Rum as a thriving center of cultural life, Amasya boasted some of the most accomplished poets, Sufis, scholars, artists,

and physicians in its heyday. Mihri Hatun of Amasya (d. 1514?) is one of the very few women to have received a regular place and a fine critical reception in the nearly all-male universe of the biographical dictionaries of Ottoman poets. From a notable family with deep roots in the city, Mihri knew well the artistic and political elites, including Prince Bayezid, to whom she would eventually send a handsome (autograph?) copy of her *divan* in the emerging high register of Ottoman Turkish (see Appendix, no. 114). One of her male friends (and object of amorous attention, allegedly) from the literary circles in Amasya was Bayezid's close companion Mü'eyyetzade 'Abdurrahman Efendi (d. 1516), whose reputation as a bibliophile and book collector would surpass even his highly respectable standing among the Ottoman 'ulema, as discussed in the essay by Judith Pfeiffer in this volume. As for the Amasyan calligrapher Şeyh Hamdullah (d. 1520), who was also one of Prince Bayezid's tutors, he has been recognized since the sixteenth century as the founder of one of the canonical styles of Ottoman calligraphy; some of his works are listed in the palace library inventory. Among famous Amasyans of the fifteenth century, also with fingerprints in 'Atufi's inventory, should be mentioned the surgeon-physician Sabuncuoğlu Şerefeddin (d. after 1468), who wrote a pioneering technical treatise in Turkish on the practice of surgery. All four of these stellar representatives of Amasya's glory at the time could claim descent from families of some recognition in the region; as we will see, 'Atufi, too, had some claims about the renown of his family in the nearby town of Merzifon.³⁵

Another famous physician of Amasya in the fifteenth century is hardly known in Ottoman studies, a field in which an integrated treatment of the overlapping lives of different religious, ethnic, and linguistic communities is still an elusive goal. In his own time, however, Amirdovlat Amasiatsi enjoyed the kind of reputation that would secure him employment in the palace of Mehmed II. The pharmacopeia that he composed in his native Armenian, *Useless for Ignorants*, is an astonishing achievement, not only because of its learning and encyclopedic range of knowledge but also for its lexicon of names of plants and substances in Arabic, Armenian, Greek, Latin, Persian, and Turkish. The palace library does not presently have any of his books but bears evidence of his continued reputation in the form of a late-

sixteenth-century Armenian manuscript on the history of medicine, which features a miniature-style portrait of Amirdovlat as its frontispiece.³⁶ While the second part of the name of this polyglot Armenian scientist resonates with patriotic pride of his hometown, the first part—a combination of two Arabic words in Perso-Turkish pronunciation—is redolent of a peculiarly Rumi integration, whereby Christian families (perhaps Armenians, in particular) readily availed themselves of the onomastic pools of their Muslim neighbors in naming their children.

Indeed, a fiscal survey from 1520 suggests that the Muslims and non-Muslims of Amasya did not care much for segregation. While only four of fifty-two neighborhoods are marked as non-Muslim, there were several mixed neighborhoods where many of the 324 dhimmi households out of a total of 1,042 were dispersed.³⁷ The overall population of the city itself is estimated to have been between eight and ten thousand in the early sixteenth century—a considerable concentration of souls, particularly if one takes into account the connectivity between the city and its hinterland, which were integrated by brisk mobility.

The administrative peripheralization of Amasya after Bayezid's reign was the result of a process initiated by his son and successor Selim I (r. 1512–20), who was born in that city (in 1470?) but seems to have resented what it stood for: the princely seat of his elder brother Ahmed, popularly viewed as their father's favorite and heir apparent. As Sultan Selim I, he redesigned the administrative hierarchies in that region by relegating Amasya to a lesser position and designating it as a sub-province to be governed from Sivas, the new center of the larger province.³⁸ The later political peripheralization of Bayezid II's princely residence can be gauged by the fact that none of the four princes sent there after him—namely Ahmed b. Bayezid II, Murad b. Ahmed b. Bayezid II, Mustafa b. Süleyman I, Bayezid b. Süleyman I—could seize the throne. Of those, Ahmed came close, but his aforementioned defeat in 1511–13 brought the Selimian dispensation to the fore. As for those who came after Ahmed, neither Mustafa nor Bayezid wanted to be in Amasya to begin with, since by then it was considered an outpost, an obstacle to a viable bid for the throne. The region's peripheralization vis-à-vis the emerging ideological and confessional orthodoxy of that

dispensation, with a Shi'i Safavid counterpart to its east, can be read in the fact that two of the later princes of Amasya, Murad (d. 1513?, grandson of Bayezid II) and Bayezid (d. 1562, son of Süleyman I), imagined that they could hark back to the ecumenical accommodationism and self-conscious confessional ambiguity of the bygone era, but both ended up in exile in Safavid Iran.³⁹

To be sure, Amasya continued to be a vibrant and significant site of urban life in later centuries, particularly in terms of its tradition of learning and scholarship, as well as its civil architecture. But the region's leading role in Ottoman political life was irreversibly altered after Çaldıran and the articulation of the new confessional dynamics.⁴⁰ After his victory in that battle, instead of returning to Istanbul, Selim stayed in Amasya in the winter of 1514–15 in order to reapportion its landholdings and endowments and thus to reassert the redistributive role of the state, punishing those who were deemed disobedient or unorthodox with confiscations in the manner of his grandfather and allocating resources according to the new dispensation. It has been claimed that 'Atufi was among the ones whose landholding was taken away, but a village that was most likely named after him is listed in a survey of the region made in 1520. Was the land first confiscated and then returned to him? It seems impossible to either verify or reject this hypothesis given our current state of knowledge.⁴¹

Notwithstanding its significance for the consolidation of an Ottoman order in the fifteenth century, the Amasya region was also a strong base for Turkmen communities that would reinvent themselves as *qizilbash* ("redheads," i.e., supporters of the Safavid shaykh/shah) at the dawn of the sixteenth century and present the biggest challenge to that order. Numerous riots and instances of unruliness in that vein had been recorded since the late fifteenth century, but full-fledged rebellions erupted only after Selim's departure from the region. The one led by Shaykh Celal in 1519 in the region of Tokat must have been in some sense paradigmatic, since thereafter the word "Celali" became the generic reference to rebels in the Anatolian countryside, particularly during the wildfire of uprisings in the late sixteenth century.⁴²

CIRCA 1501

It would be pointless to engage in a new counterfactual and ask what would have happened if Prince Ahmed had been the successor and sultan instead of Selim, but it is worth considering the perspectives of the Ottomans, and Bayezid in particular, around the turn of the century before the succession crisis erupted in full force in 1510. In hindsight, the year 1501 has come to imply to Ottoman historians, as well as to modern scholars, "the rise of the Safavid state" first and foremost, and its profound challenge to the Ottoman order. The argument made by Selim and pro-Selim historiography to legitimate the prince's defiance of his father—namely that the older sultan was unaware of the magnitude of the Safavid threat, and too soft in dealing with it—is by and large accepted in later accounts.⁴³

Surely, there were apprehensions about the growing influence and ambitions of the Safavid order among the Ottoman political elites starting in the final decades of the fifteenth century, but the matter was not as alarming at that time as it would become after a few years.⁴⁴ Two chronicles that happen to come to a halt in 1501–2, namely one by Oruç (d. after 1502) and the other by Behiştî (d. after 1512), corroborate this picture by providing a fascinating perspective on anxieties caused by the rising Safavid challenge without the sense of an inevitable military do-or-die clash as a necessary consequence.⁴⁵ It is yet another instance of the tremendous hegemonic success of Ottoman historiography after Selim that Ottoman-Safavid relations are described with Çaldıran as the inevitable consequence of irreconcilable differences that set the course of those relations from the outset. Even if this were true, it is still worth observing that the matter appeared differently to the sultan and his cabinet at the Sublime Porte during the earlier years of Shah Isma'il (r. 1501–24).⁴⁶ More importantly, different sets of policies other than the one eventually designed and implemented by Selim were still conceivable. Bayezid took some harsh measures by his own standards. If these efforts struck his son and successor, Selim the Grim, as feeble, this was perhaps because the sultan was not bellicose enough for the hawks, and he typically moderated state violence with imperial patronage. Bayezid's main

policies in this regard were the following: to prevent the flight of the population out of Ottoman Asia Minor to Iran under the threat of execution and confiscation; to transport rebellious “supporters of Ardabil” (i.e., of the Safavid order) to Morea, where he could boast of some prize conquests between 1499 and 1501; and, to extend his patronage over the Bektashi cult of dervishes.⁴⁷

With regard to the latter, we should mention Bayezid's eventual infatuation with a new region in Thrace. Amasya obviously continued to be a site of importance and affection for the sultan after his move to Istanbul, given his recruitment of talent from the city and his interest in Amasyans such as Mihri Hatun, as well as the construction of his mosque-madrasa complex there in 1481–86. For all sorts of practical reasons, however, the sultan had to stay close to the capital; so when he needed a place to pursue his pastimes, he found it in the region of Dimetoka (Didymoteicho in modern Greece, an easy route of about 250 kilometers from Istanbul), where he was born in 1448. The city at the center of that region had an excellent late medieval pedigree, with memories of prominent Byzantine and Ottoman figures who had sojourned and built monuments there; there were abundant hunting grounds in its vicinity; and Sufism had started to flourish in the surrounding countryside during the fifteenth century. The cult of Seyyid ‘Ali Sultan (also known as Kızıl Deli, the Crimson Berserk), in particular, attracted the interest of the sultan. Bayezid asked the shaykh of that Sufi community, Balm Sultan, who enjoyed a large and growing following, to move to the primary shrine complex of the Bektashi cult of dervishes in central Anatolia and to organize it, arguably so that its immense prestige among the *qizilbash*-leaning Turkmen population could be harnessed. Later tradition accepts the year 1501 as the date when Balm Sultan moved to the shrine complex of Hacı Bektash (d. 1271?) and started his institutionalization of the Bektashi order, which garnered for him a reputation as “the second founder.”⁴⁸ It must have been around the same time that Bayezid ordered the construction of a lead-covered dome over the tomb of the holy man buried there in the late thirteenth century, who has been regarded as a source of sublime spiritual power for millions of followers since then. This ultimate gesture of imperial patron-

age is recorded as such in the final chapter of the vita of Hacı BektaşVeli, which was most likely written by Firdevsi-i Rumi (d. after 1512). He penned several works for Bayezid II and appears in ‘Atufi's inventory with two volumes of his monumental *Süleymānnāme* (Book of Solomon).⁴⁹

The only illuminated page that we have today from the eighty-two volume venture of Firdevsi happens to feature two facing pages of fantastic characters, human or otherwise, organized in crowded rows under depictions of King Solomon and the Queen of Sheba, each seated on his and her throne, respectively.⁵⁰ The style is quite foreign to Ottoman miniature painting and to its Persian sources of inspiration, suggesting an unusual Maghribi artist in the Ottoman court. The explanation might well lie in the Ottoman reception of Jewish and Muslim émigrés from Iberia during those years. In fact, in that same fateful year of 1501, Bayezid's court received a letter from Iberia, where the Muslims of al-Andalus were under renewed pressure and asked for the assistance of the sultan.⁵¹

To view the context of Bayezid's “cultural turn” and the preparation of our inventory from another perspective, we might bear in mind that between 1499 and 1501, Bayezid had completed his first European campaign after 1484 with great success, which probably resonated all the way at the western end of the Mediterranean. This might even be considered his one and only campaign against the “Franks,” since the earlier campaign did not engage with the Catholics, the true rivals of the Ottomans in their competitive bid for “universal” rule against various powers and leagues in Catholic Europe. Bayezid's victories in the Mediterranean and the Adriatic would be sealed in 1502, by means of two treaties signed with the Venetians and the Hungarians, respectively.

Already as the diplomatic negotiations were unfolding, Bayezid could change his pace and his focus. As recounted in the anonymous “Hanivaldanus chronicle,” after the successful campaigns of 906/1500–1501, the sultan refrained from any further undertakings and remained “idle” in Istanbul. Oruç, whose annalistic chronicle breaks off in 908/1502–3, starts that year and the earlier one with Bayezid sojourning in his capital city.⁵²

Just as Bayezid had instigated the “publishing,” namely making public, of the histories of the House of Osman in 1484 after his conquests of fortresses by the Black Sea, the sultan again seems to have turned his attention to cultural patronage with greater intensity and focus. Not only was this a matter of respite from military mobilization, but also of riding high on the prestige of victory. In July 1501, construction started on the mosque-madrasa complex in Istanbul that would be named after the sultan. Within the same month, an order was sent to Manastir (Bitola in today’s North Macedonia), asking *müderres* ‘Ali Çelebi to dispatch a book of history that his father was known to have compiled, namely a “History of the House of Osman” in which “the tales of each [dynast]” had been brought together.⁵³ It does not appear to be coincidental that one of the earliest surviving registers to systematize the procedures for the “tenure-clock” of assistants in madrasas (*mülâzemet*) also starts during the same month.⁵⁴

THE LIBRARY COLLECTION AND THE LIBRARIAN

In short, the first years of the sixteenth century presented an opportune moment for Bayezid to take stock of his library as well as to consider the quality of education and learning in the palace and beyond. He must have thought, like many rulers before and after him, that bringing matters of knowledge to an orderly state was essential to the order of the realm. Thus he commissioned Hayrûddin Hızır ‘Atufi, one of those many talented Amasyans who eventually joined Bayezid’s circle after his accession, to prepare the unusual document at hand. There is still no obvious explanation for how the inventory of the palace library ended up in Budapest. Before its introduction to the scholarly community by İsmail Erünsal—the indefatigable historian of books and libraries in the Ottoman world—and the first detailed account of its contents by Miklós Maróth, a Hungarian librarian who was able to study the manuscript itself, Joseph von Hammer-Purgstall may have laid eyes on it. With uncanny precision, Hammer writes that Bayezid II left a library of *seven thousand* volumes, “larger than any of the libraries of Istanbul of our times,” i.e.,

between 1827 and 1835, when Hammer’s ten-volume *Geschichte des osmanischen Reiches* was published in Pest, the Hungarian city that the Habsburgs had seized from the Ottomans in 1686.⁵⁵

The imperial collection obviously built upon the acquisitions of earlier sultans, but it is difficult to say much about these works without further research. Still, it is clear that the books listed in the inventory are overwhelmingly those of Mehmed II and Bayezid II.⁵⁶ If we knew more about the book trade and the book market in Istanbul at that time, as well as the gifting of books, we would be better equipped to speculate on the acquisition and dispersal of works in the imperial library. The transregional nature of the flow of information and gossip about books in that period, and to some degree also of the books themselves, should not be underestimated. This expansive literary network was not limited to rulers and courts, either. A fifteenth-century bookseller and scholar in Yemen, for instance, could be corresponding with the governor of the port of Calicut in Kerala, India, who was in search of a good dictionary.⁵⁷

As for the libraries in Istanbul, which presently contain some of the largest and most precious collections of Islamic manuscripts, one common assumption is that they have been stocked primarily by the yields of conquest, namely booty. There were indeed several instances of the seizure and transfer of the book collections of defeated rivals—the libraries of Mamluk Syria and Egypt in 1516–17 being among the most noteworthy, both quantitatively and qualitatively. At present, it is difficult to assess the scale of this form of “acquisition,” but future research on the subject is bound to prove fruitful. In any case, some of the books written or copied before 908/1502–3, which are held in the palace collection today without signs of Bayezid’s seal or titles added by ‘Atufi’s hand, must have been seized after the Ottoman conquest of Tabriz in 1514, followed by Syria and Egypt in 1516–17. There are, of course, some books whose original ownership is easily identifiable, such as those with the *ex libris* or seal of Kansuh al-Ghawri (d. 1516), the Mamluk sultan. At the same time, the palace library contains certain titles that can be identified as having entered the stacks after the completion of the inventory but during Bayezid’s reign. The library continued to

actively acquire books through purchase, in other words, as well as accepting gifts and commissioning copies; the blank spaces left by 'Atufi in his *Defter-i Kü-tüb* (Register of Books) seems to be reserved for those.

The dispersal of a library was not necessarily the direct consequence of conquest. In his pioneering study of the catalogue of the Ashrafiya Library of Damascus, which was prepared circa 1270, Konrad Hirschler has meticulously investigated the listed items against manuscripts that are presently available in the Süleymaniye Library, including the thirteenth-century miscellany which includes the Damascene catalogue itself. His tripartite categorization of the volumes as being either almost certain, highly likely, or likely to have arrived in Istanbul from Damascus is based on sound criteria and systematic inspection.⁵⁸ Having examined each of those volumes, I have found that none identified by Hirschler as almost certain or highly likely to have once been on the shelves of the Ashrafiyya carries the seal of Bayezid or shows the hand of 'Atufi. This strongly suggests their arrival in the Ottoman capital after the conquest of Syria in 1516. Yet very few of these manuscripts are in the collections of the Süleymaniye Library that contain books endowed by sultans that had been transferred from the palace treasury, where booty would have been stored. The overwhelming majority of the Ashrafiyya books are in the collections of grandees and scholars who probably purchased them after the dispersal of the library. This may have been due to instability caused by conquest, or loss of endowment funds, but these works do not appear to have been brought in as booty, unlike the books of the Mamluk sultan in Cairo.

In any case, the Török manuscript represents an earlier stage in the creation of the Ottoman imperial library. Dedications and gifts abounded, but there were also numerous purchases made in a book market of which we know very little.⁵⁹ The labor of copyists, professional or not, must also be better understood in terms of their network of patrons and clients, as well as their wages and incentives. The materials of book production, paper and ink to start with, likewise need to be explored in terms of their historicity. A scholar and palace librarian like 'Atufi must have been steeped in this kind of knowledge, even though we do not know much about his early life.

'ATUFI

In the colophon to the autograph copy of his *Anzāru sharḥi al-Mashāriq ma'a khātimati fī 'ilmi al-daqa'iqi wa-huwa 'ilmu al-ta'bīri al-badanī* (Insights: Commentary on al-Mashāriq, with a concluding Chapter on the Science of the Intricacies, that is, the Science of the Veridical Bodily Dream-Vision), 'Atufi writes of himself and his lineage as follows:

Khīẓr al-ḥaḳīr al-shahīr bi'l-'Atūfī al-faḳīr wa-huwa ibn Maḥmūd ibn al-'ālim al-'āmil al-wāri' al-kāmil imām al-mashāyikh al-'izām wa-humām al-amājīd al-kirām [erased word here] *al-'Arabgīrī mawlidān wa-al-Marzifōnī maḥtidān 'Omar al-Hāj Naṣr al-dīn al-Marzifōnī*. [marginal note: *al-ḥāc ṣaḥḥa*]⁶⁰

Hızır, the wretched, known as 'Atufi. He is the son of Mahmud son of 'Ömer el-Hac Nasreddin of Merzifon, the learned, the pious ... imam of the great shaykhs, of Arapgir by birth and of Merzifon by descent.

Cryptic as it is, this rare autobiographical morsel allows us a glimpse into Hayrüddin Hızır 'Atufi's family background. He is obviously proud of his grandfather and of being able to claim Merzifon (46 km from Amasya today and part of the Amasya province then and now) as his hometown. He also finds it worth recording that his learned ancestor was born in Arapgir (463 km to the southeast of Amasya on today's roads), without giving any further explanation. Perhaps 'Atufi wanted to emphasize that his family was indeed from Merzifon even if Elhac 'Ömer happened to be born in Arapgir, while also recognizing the town of Arapgir as part of the family's heritage. He felt obliged to verify his grandfather's successful undertaking of the pilgrimage to Mecca since there were many who used "Elhac" as a title. Even more significant is the fact that 'Atufi introduces his grandfather as a leader among shaykhs, which possibly implies that he was a Sufi of some renown. This could also explain the mention in a 1520 cadastral survey of a "zawīya," or dervish lodge in Amasya, which enjoyed as its endowment half of the share of a village named Hayrüddin, which local tradition associates with Hayrüddin Hızır 'Atufi.⁶¹

Long before that date, 'Atufi moved to Istanbul where he would start a career, which included his work as

court librarian among other positions. We do not know 'Atufi's age at the time he arrived in Istanbul, but he was probably around twenty, or even younger, since he continued to take lessons with top scholars after he moved west, judging by the biographies of his teachers.⁶² All but one of these teachers spent their careers in the western parts of the empire. Moreover, the famous Hocazade (d. 1488) was in Iznik and Bursa during his last several years, before and after Bayezid's accession. In other words, 'Atufi may have spent some time in the Bursa-Iznik area between his youth in Amasya and his career in Istanbul; this could also explain his distinct reverence for Kutbüddinzade of Iznik (d. 1480), the scholar and Sufi of the Akbarian tradition.⁶³

'Atufi's first patron in Istanbul seems to have been Çandarlı İbrahim Pasha (d. 1499), since he dedicated some of his early books to the pasha, known for his learning and valuable book collection.⁶⁴ Two manuscripts in TSMK, likely to be in 'Atufi's own hand, start with dedications and eulogies to İbrahim Pasha and refer to service in the latter's treasury/library (*li-khidmati khizānati İbrāhīm Paşa*).⁶⁵ By then, Hayrüddin Hızır was known as al-'Atufi, the Compassionate, or simply as 'Atufi, as his penname appears in his own works in verse.

'Atufi's appointment by the sultan to the tutorship of palace servants may have occurred after the demise of İbrahim Pasha in 1499. In any case, the young Hızır, or at least his family, was probably known to Bayezid during the latter's princely residence in Amasya. Serving as tutor in Bayezid's court would certainly lead to an acquaintance with the library there and must have paved the way for 'Atufi's work on the inventory, which started in 1502. Sometime after the completion of that task, he pursued his career outside the palace, serving as preacher (*vā'iz*) in mosques and offering lessons in Qur'anic exegesis. Sixteenth-century biographies of Ottoman scholars also refer to 'Atufi's expertise in the rhetorical sciences of *ma'ānī* and *bayān*.⁶⁶ Whether he coveted them or not, 'Atufi was quite unlike his flamboyant predecessor, Mehmed II's librarian Molla Lutfi. He did not join the cutthroat fray for positions in madrasas, which would have certainly given him a much more detailed treatment in the biographical dictionaries, but rather he led a quiet life and concerned himself with writing until his demise in 1541. He was buried in Eyüp, where he had also had his worldly residence. 'Atufi must have indeed

felt at home in Eyüp, where he made a modest endowment, which was still overseen by his (female) descendants in the early nineteenth century, as mentioned in an archival document.⁶⁷

As for his books, it should be said at the outset that none of them acquired a great reputation or enjoyed wide circulation by being copied in significant numbers. Still, 'Atufi's oeuvre offers us a profile of sincere scholarly engagement with multiple disciplines, of quiet dedication to a life of books and ideas, and of consistency and constancy. Not surprisingly, all these qualities also characterize his *Defter-i Kütüb*, which he probably completed at some point in his thirties.

In the inventory, 'Atufi lists four of his own works, one of them, *Ḥifẓu al-abdāni* (Preservation of Bodies), in two copies:

151 {13–17}

≈ Kitābu rawḍi al-insāni fi al-ṭibbi al-nabawī wa-
~ Risālatu [bi-al-turkiyyati al-manẓūmati] dhukhri al-
'aṭshāni fi al-ṭibbi al-nabawī wa-
~ Risālatu [bi-al-'arabiyyati al-manẓūmati] ḥifẓi al-
abdāni fi al-ṭibbi

~ kulluhā min ta'lifāti aḍ'afi al-'ibādi al-'Aṭūfi al-khādimi
li-kutubi al-khizānati al-'āmirati al-Sulṭān Bāyezīd
Khāniyyati fi mujalladin wāḥidin

(Garden of Man, on prophetic medicine; and, Treasury for the Desirous, on prophetic medicine, in Turkish; and, Preservation of Bodies, in Arabic, in verse; all of them works by the weakest of slaves [of God], 'Atufi, librarian of the royal treasury of Sultan Bayezid Khan, in one volume. [See list by Nükhet Varlık])

166 {10}

≈ Ḥifẓu al-abdāni li-aḍ'afi 'ibādi Allāhi al-'Aṭūfi [bi-al-'arabiyyati al-manẓūmati] fi al-ṭibbi

303 {17–18}

≈ Risālatu ramzi al-daḡā'iḡi fi 'ilmi al-daḡā'iḡi wa-huwa
al-'ilmu bi-al-ru'yā al-ṣādiqati al-badaniyyati li-aḍ'afi al-
'ibādi al-'Aṭūfi [-'ufiyya 'anhu-]

(Treatise on the Symbol of the Intricacies regarding the Science of the Intricacies, that is, the Science of the Veridical Bodily Dream-Vision, by the weakest of slaves, may he be pardoned. [See list by Noah Gardiner])

The three-work volume listed at the top of the section on medicine, a rare case of self-flattery in 'Atufi's oeuvre, seems to correspond to TSMK, A. 2107, where he writes (on 206b) that the copy was completed in 904/1498–99. The palace library presently has an additional copy of the first text, *Kitābu rawḍi al-insāni*, and the second text, *Risālatu dhukhri al-atshāni* (in Turkish verse), both of them with dedications to İbrahim Pasha. Those copies, with no date or seal of Bayezid II, possibly contain some of the earliest compositions of 'Atufi. They are dedicated to practical medical advice, and are based on the deeds and sayings of the Prophet Muhammad. The treatise in Turkish verse, 115 couplets on the benefits and manners of drinking water, is the second part (49a–59b) of a two-work compendium, which opens with a book on the beneficial qualities of sneezing (*Kitāb al-uṭās*, Book of Sneezing), inspired by the renowned *Ḳānūn fī al-ṭibb* (Canon of Medicine) of Ibn Sina.

Of these early literary experiments, 'Atufi seems to have been more certain of his treatise on dreams, *Risālatu ramzi al-daḡā'iqi fī 'ilmi al-daḡā'iqi*. He turned it into the concluding chapter of his next work, a commentary on some hadiths in the famous collection of al-Saghani, *Mashāriq al-anwār al-nabawiyya* (The Rise of Prophetic Lights), a work with which 'Atufi had started to engage in his earlier *Rawḍ al-insān*. Of his erstwhile foray into the science of hadith, namely his commentary on *Mashāriq*, the two copies in the palace library, A. 443 and A. 444, are clearly two redactions of the same work, carefully produced with the same page design, format, and binding by the same hand, that of 'Atufi. Only one of them, A. 443, has the seal of Bayezid II (twice, on 1a and 99a), is dated (to 911/1505–6), gives the name of the sultan in gilded letters (on 4a), and offers the autobiographical information cited above. The one without these features, A. 444, was clearly the earlier working redaction, which 'Atufi raised to another level for the presentation copy. The full title on the later redaction, also cited at the beginning of this section above, is followed by *muswadda Ḥizir al-'Atūfi -'uḡfiya 'anhu-* (drafted by Hızır 'Atufi, may he be forgiven). Neither of these two manuscripts appears in the inventory, since they were composed just one or two years after its completion.

Following this work on hadith, 'Atufi turned to kalam and composed a gloss to explicate al-Jurjani's commentary on *al-Mawāqif* (Stations) of al-Ījī (d. 1355).

Titled *Hāshiyat al-'Atūfi 'alā sharḥ al-Sayyid al-Sharīf 'alā Muqaddimat al-Mawāqif* ('Atufi's Gloss on Sayyid al-Sharīf's Commentary on the Introduction to *al-Mawāqif*), this work was completed in 913/1507–8 and dedicated to Bayezid II.⁶⁸ Perhaps 'Atufi had studied that specific commentary with Hocazade, who passed away while working on a gloss on the same text that had been requested by the sultan. Hadith seems to have been one of 'Atufi's favorite disciplines, as he returned to it with a compilation and commentary on hadith concerning faith, *al-Jawharat al-jināniyya fī masā'il al-īmāniyya* (Gem of Paradise in Matters of Faith), dedicated to Bayezid II.⁶⁹ Of an exegetical exercise by 'Atufi, again dedicated to the same sultan, there is one copy in the Süleymaniye Library, *Ḥisn al-āyāt al-iḡām fī tafsīr awā'il sūrat al-an'ām* (The Bastion of Mighty Signs in the Exegesis of the Beginning of the Verse of *An'ām*), which consists of a commentary on the first three verses of the chapter *An'ām* of the Qur'an.⁷⁰

Thereafter, 'Atufi continued to write books on the mainstream sciences taught in madrasas, primarily hadith and tafsir, without becoming a professional member of the madrasa circles himself. He wrote mostly in Arabic and in Turkish, but he also knew Persian well enough to experiment with some verse in it. After İbrahim Pasha and Bayezid II, his main patron was Süleyman I, to whom 'Atufi dedicated several books.

A selective look at some of 'Atufi's works after the reign of Bayezid II might help us trace his intellectual trajectory beyond the framework of our study.⁷¹ Some of his literary output was obviously intended for instruction. In 1521, 'Atufi completed an exegetical study on shorter verses recited commonly during prayer, *Kitāb al-hāl fī mā 'āzala min mazāliq al-maḡāl* (Book of the [Spiritual] State Which Removes from Perilous Ground), written for ordinary believers who needed explication. In the same field of exegesis, and in response to questions asked by his students, 'Atufi wrote a brief gloss on al-Baydawi's (d. 1286) commentary on one verse in sura *Mulk* (67/11) and a longer one on the same author's *Anwār al-tanzīl*.

A late work of 'Atufi's, titled *İbret-nāme* (Book of Lessons) and so far unknown in the scholarly literature, has recently come to our attention thanks to its being posted online. This seems to be an autograph copy, and was written during the reign of Süleyman I; it is now housed in the Uppsala University Library.

While the book is in Turkish and was written decades after the completion of the inventory, 'Atufi still wears his cataloguer's hat and gives the title in Arabic: *Kitāb 'Ībrat-nāma fī hikāya Īskandar bi al-tafsīr al-turkī alladhī allafahu Ḥiḍir bin Maḥmūd bin 'Umar al-'Atūfī* (Book of Lessons in the Story of Alexander in Turkish Exegesis, Which Is Composed by Hızır bin Mahmud bin 'Umar al-'Atufi). Evidently written in an era alive to anticipations and concerns regarding world conquest, the text interprets passages about *Dhū al-qarnayn* (Alexander "of two horns") in the Qur'an, often citing al-Zamakhshari's *Kashshāf*, and 'Umar al-Nasafi, in an attempt to draw out lessons for contemporary rulers and armies.⁷²

During the same era, he wrote an Arabic commentary on the *Qaṣīdat al-Burda*, which he proudly announces as the first commentary written in the lands of Rum on this ode to the prophet, written by al-Busiri (d. 1296?), many copies of and commentaries on which 'Atufi handled while preparing the inventory. Even when he wrote in Arabic, 'Atufi was keen to underscore his place as one of the scholars of the lands of Rum, whose arrival as a self-conscious and proud community of learning and letters started to manifest itself at the time of his work in Bayezid's library.⁷³

The most recognized scholarly accomplishment of 'Atufi for his contemporaries, and perhaps in his own reckoning as well, may well be his *Kashf al-Mashāriq* (Unveiling the *Mashāriq*), which is an expanded version of his earlier study on the hadith in al-Saghani's *Mashāriq al-anwār* (well represented in the inventory; see essay and list by Recep Göktaş). No matter what the circumstances in the Hayrūddin village back in Merzifon were, 'Atufi appears in this book, as well as in his other studies, as a bona fide Ottoman loyalist with a strong preference for Hanafi-Maturidi positions and an aversion to interpretations with a flavor of Mu'tazilism, even in the works of Ibn Melek (d. 1399), an early Rumi scholar whom he admired a good deal. A copy of this mature work, likely written in 1539–40, would eventually be gifted by Süleyman I to the library of the Süleymaniye madrasa and is mentioned in the endowment deed as one of the books that could be used for instruction there.⁷⁴

In hindsight, however, 'Atufi's *Defter-i Kütüb* could arguably be considered the crowning achievement of an otherwise unstoried life. Just as in our own day, the labor

of a librarian seems to have received less than its due. He is remembered in all biographical accounts for his "substantive" works, which were—unfortunately for him—considered respectable, perhaps, but not much more than that. Yet a close reading of the unique book inventory 'Atufi prepared presents us with a remarkable and, so far at least, unparalleled intellectual endeavor. It could be seen as an early instance of the same early modern context, with its qualitative and quantitative leap toward an archival order around rigorously structured practical documents that surveyed and counted and listed things and people on paper, in tandem with a growing place for texts in the public sphere beyond that of holy texts.

'ATUFI'S ORGANIZATIONAL PRACTICES

By the fifteenth century, certain rules and expectations regarding the shelving and organization of book collections were well established for educated bibliophiles in Muslim societies. 'Atufi must have read the same kind of literature that his older compatriot, 'Ali bin Hüseyin el-Amasi (d. 1470?), summarized in a pedagogical manual in 1453:

one should not place a pence, or an apple or pear or [a loaf of] bread on top of [a copy of] the Qur'an; nor should one place other books on top of it. If one were to wish to store books in some place, books of jurisprudence should be on top of the other sciences, books of hadith over those, books of exegesis over those, and the Word of God over those. In that order.⁷⁵

In a work compiled in Damascus in 1526 for students and faculty of higher education, more detailed instructions on the same topic were offered by an Arab scholar of the next generation, who was clearly steeped in the same tradition. In a chapter that deals with "the appropriate ways of treating books," al-Ghazzi includes a section on "the methods of shelving (*waḍ'*) and transmitting (*ḥaml*) books accurately":

When one stacks books next to each other, they should be placed upon a stand, wooden seat, shelf, or upon other [elevated] places. It is preferable to leave some space between books and the ground, and not to place them directly on it, lest they suffer damage from dampness or decay. If the books are placed upon wood or some similar material their

leather bindings should be protected by some means from above and below. Similarly, something should be inserted between the books [to keep them from direct contact] with the wall or whatever they lean against or lie upon. One should observe [certain] moral guidelines in the placement of books according to their rank (*sharaf*) and the notability of their authors. Thus the most esteemed book should be placed in the topmost position. The others should be arranged beneath it, according to their value. If there is a copy of the Qur'ān, it should be placed on top of all the other books. It is preferable to keep it in a cloth sack with a short rope attached, so that it may be hung from a peg on a ritually clean wall in the center of a sitting room (*majlis*). [Next, below the Qur'ān,] the exclusive collections of traditions, such as those of al-Bukhārī and Muslim [should be placed]; then commentaries on the Qur'ān; then commentaries on the collections of traditions; then works on theology; then works on the principles of jurisprudence; then works on syntax and morphology; then collections of poetry; and finally, works on prosody and similar subjects. If there are two books on the same subject, the one which contains more quotations from the Qur'ān or traditions should be placed on top. If the two books are equal [in this respect], or if it is not known which contains more, then the merit of the author should be considered. If the authors are equal in importance, then the book which is older in composition or in transcription, or the one which is used more frequently by scholars and pious persons should be placed on top. If the books are also equal in these respects, then the more correct one should be placed on top. In order to prevent books from falling often large books should not be placed on top of smaller ones. In order to prevent the flap of the book cover from tearing quickly, one should not place the flap inside the book too frequently. One should write the title of the book upon the bottom edges of the leaves, with the tops of the letters in the title in the direction of the beginning, that is, the side of the basmalah of the work. This citation of the title is of value in that it aids in identifying a book and facilitates pulling it out from among other books. If a book is placed upon a stand or upon a wooden bench, for instance, the cover which is on the side of the basmalah should be on top. One should not use the book as a depository for quires and similar things, nor should one use it as a pillow, a fan, a press, a prop to lean or rest upon, or an insect swatter. ... one should not fold over the margin or corner of a leaf [in a book] as ignorant people often do...⁷⁶

The latter words of caution may have been particularly relevant for the users of the library at the court, with hundreds of denizens as likely borrowers or readers.

As objects, books acquire part of their power from their mobility, which facilitates their use in all kinds of environments, as well as their circulation and relocation, but also puts them and their collectors in jeopardy because of their vulnerability to damage and loss. The mobility of books was precisely the problem for early Muslim jurists, who refused to legitimate the endowment of books, since one could only endow immobile property in a strict understanding of the holy law. However, by the ninth century, a new generation of jurists was able to legitimize the dedication of copies of the Qur'ān, and eventually other books as well, for public use "in eternity."⁷⁷

Within the palace, the circulation and relocation of books was common, even if the precise nature of these operations is not quite clear to us. Several manuscripts include notes concerning their transfer from the Privy Chamber to the Inner Treasury, often using the language of the work indicated: e.g., *odadan çıkan fārisī* ("Persian book, transferred from the [Privy] Chamber"; see instances in Appendix). Several others have notes indicating their arrival in the Topkapı Palace from princely residences, such as *sancağdan gelen* ("arrived from the princely residence"), presumably when the new sultan brought over his collection or when the library of a deceased prince was transferred. Likewise, it is possible that princes, or members of their entourage, could ask to take books with them en route to their appanage. Compared to other sites outside Istanbul, this might explain the relatively large number of books with Bayezid II's seal in the manuscript library of Manisa, the primary princely residence after Amasya.⁷⁸

In a vital sense, the imperial library was the private collection of a family, even if it had a semi-public character for the inhabitants and servants of the palace. Hence, its books could be gifted or endowed by members of the dynastic family, and thus alienated from the collection. The overwhelming majority of the books inventoried by 'Atufi but not currently found in the palace library (TSMK) are those thousands of volumes that were endowed by later sultans, and sultanas, to the public libraries they built and stocked. The pioneer of this "public turn" was perhaps Hatice Turhan Sultan (d. 1683), the mother of Mehmed IV (r. 1648–87) and a major public figure in her own right. Her endowed

library collection, as well as the Ayasofya and the Fatih libraries endowed by Mahmud I (r. 1730–54)—all of which have now been consolidated into the giant centralized collection at the Süleymaniye Library (SK)—are prime examples of this development.⁷⁹

Besides such legitimate acts of relocation, books were also subject to theft and repossession or, to give the matter a less sinister spin, forgetfulness. We know exactly how certain volumes were lost from the palace library. Sultans and princes often took books with them during their travels, even on military campaigns. Selim I, for instance, traveled with a chest full of manuscripts during his campaign to Syria and Egypt. The chest was part of a load that was left behind during a rushed advance, and the whole lot was snatched by the Bedouins. Having thus lost a precious copy of the *History of Vassaf* that Selim “had a fondness for and was entertained by,” he commissioned a new copy to be made by a certain copyist known for his swiftness.⁸⁰ Was the copy in Selim’s chest the one mentioned in ‘Atufi’s inventory (184 {17})? Could it have ended up in a dignified auction in Europe in modern times?

Whatever their path, some of them gifts, others being purchases of volumes abducted from the seraglio, several manuscripts from the palace library found their way into European libraries and collections. So far, the only book from Bayezid’s library found to the east of the former Ottoman empire is in Herat. This codex, which originated in the library of Shahrukh (r. 1405–47), may have been sent as a gift to Istanbul; perhaps it made its way back there again as a gift or returned if it was discovered that it was stolen, but not before receiving the seal of Bayezid II (Appendix no. 1, Plate 1).⁸¹

Also outside Istanbul, but not that far, is the fabulous and fabulously important copy of the divan of Prince Cem in the İnebey Library of Bursa, where the unfortunate prince lies buried. The title is written exactly as it appears in MS Török F. 59, 244 {19}: *Dīwānu al-marḥūmi Jam [Cem] bin Sultān Meḥammed Khān-ṭayyaba Allāhu ta‘ālā tharāhumā* (Divan of the late [dearly departed?] Cem, son of Sultan Mehmed Khan—may God Almighty purify their tombs) (Appendix no. 2, Plate 2). Even though the manuscript was handled by our librarian, it does not have a seal imprint. The seal may have been effaced, given the visible disrepair of the page, or per-

haps Bayezid did not think it would be decorous to add his name to the poetry collection of his brother, of whose passing he was not innocent.

The reverse—namely having Bayezid’s seal but no entry in the inventory—is the case for a manuscript that contains the poetry of a distinguished contemporary of ‘Atufi’s, and a fellow Amasyan. Mihri Hatun (d. after 1512) is recognized on the title page, by a different hand, as the daughter of Mevlana Belai. The absence of this work from the inventory suggests that it arrived in the palace library after 1504. Of the several grants Mihri received between 1503 and 1512, as recorded in the register of imperial donations to poets and artists, the one dated to August 1508 is specifically stated to be in recognition of her divan, which may well be the copy that is now housed in SK, Ayasofya 3974 (Appendix, no. 114).⁸²

One of ‘Atufi’s favorite authors was undoubtedly Kutbüddinzade (d. 1480), who is amply represented in the inventory probably because the sultan cared for him as well.⁸³ This Sufi scholar from Iznik is listed with eight distinct works in four different fields (*ad‘iya*, *fiqh*, *taṣawwuf*, *ta‘bīr*), two of them with two copies. ‘Atufi notes specifically that two of the works, one on jurisprudence and the other “pertaining to Sufism,” are in Turkish, which also makes Kutbüddinzade a major representative of the vernacular in the inventory, where Turkish texts do not have much of a presence otherwise. Our librarian’s particular reverence and affection for the deceased author are expressed through formulaic expressions of good wishes for his afterlife, *quddisa sirruhu* and *ṭāba tharāhu*, which occur two times each in the inventory.

‘Atufi’s personal touch is most obvious when he places certain authors in the “dearly departed” category. More specifically, he refers to only eight authors as *marḥūm*, asking for God’s mercy upon the deceased.⁸⁴ These are all contemporaries or near-contemporaries of our librarian, and he may well have known some of them personally. Otherwise, he uses a rich repertoire of prayer formulae for deceased scholars and sultans.

Not exactly terms of endearment, certain of ‘Atufi’s usages still manage to invoke a sense of cultural proximity between the librarian and some of the hundreds of authors whose names and books constitute the inventory. The word *Mawlānā* (“our lord”), for instance, which

is applied to scholars of a certain standing and dignity in Ottoman discourse, appears 119 times, and is used for scholars of the Ottoman world in all but a few instances. In those exceptional cases, the word is attached to scholars for whom Ottoman literati had a special fondness and considered as part of their own cultural universe, such as Jalal al-Din Rumi (d. 1273; he also appears as *Mawlānā Khudāwandigār* once), Jami (d. 1492), and Taftazani (d. 1390).

Çelebi is, of course, another designation specific to the Ottoman world; it is used in the inventory to refer to four scions of notable families. The term *Rūmī*, as usual, presents a curious case as both a de-ethnicizing epithet for the Muslim intellectuals of the lands of Rum and the name of the Greek language of those lands. The word is thus used on dozens of occasions, without a hint of confusion or tension, which would be hard to imagine in the age of nationalism. The fact that Şeyh Bedreddin (d. 1420?), son of the qadi of Simavna, does not receive such eulogies or familiarizing terms in any of his seven mentions—in six of which he is referred to as *Ibn Simāwunā*—might be interpreted as a consequence of his controversial legacy. But the same holds true for Davud-i Kayseri (d. 1350); perhaps the references to Simavna and Kayseri were sufficient to “place” them in a familiar geography.

Some cultural specificity could also be indicated by references to the language in which a book was written. It was not necessary to designate Arabic, since this could be considered the default category in a library where the overwhelming majority of books were in that language. Persian is mentioned regularly with regard to works written in that language but not always; in some cases, mention of Persian was probably omitted because it was obvious, as in the case of works by Jalal al-Din Rumi. But other times the language designation seems to have been omitted due to neglect, perhaps because work on the inventory needed to proceed in a hurry. Of approximately seven thousand titles, nearly 450 are listed explicitly as being in Persian.

Of tongues more specific to the lands of Rum, Greek appears six times as *Rūmī*, while the word *Yūnānī* is attached to 19 texts, but always in the sense of belonging to “Ionian,” or Hellenic Greek culture. Four texts are mentioned as being in *Suryānī*, namely Syriac language

or script, and three as *Afranji* (=Latin?). Old Church Slavonic, designated “Serbian” here, appears three times as one of the languages in some multilingual dictionaries.

Turkish was important enough to deserve a section of its own for the divans and versified books in that language, but the section stands out as one of the shorter ones. The relative dearth of works in Turkish clearly extended beyond the palace library, since the proportion of Turkish books in the other grand book collection of the time, namely that of Mü’eyyездade, Bayezid’s companion from his youthful days in Amasya, was not higher.⁸⁵ Whatever their overall quantity, however, the relevant texts in both collections were mostly of recent vintage and stood witness to the fact that the Turkish vernacular was on the verge of coming into its own as a literary language and would grow by leaps and bounds within the next century.

The palace library collection also features many examples of a lively conversation between western and eastern Turkish at the time. The admiration of Ottoman intellectuals for the star literati of Herat was not limited to Jami, who wrote in Persian, but included ‘Ali Shir Nawa’i (Neva’i) and others who wrote in what is now known as Chaghatai Turkish as well as Persian. For ‘Atufi, who lived long before the age of comparative linguistics and Turcology, these were texts written in other dialects and sometimes even other scripts from the eastern world of Turkish-speakers, including the Qipchak Turkish of the Mamluks, which he often preferred to designate as *Mughūlī* (21 occurrences; see, for instance, SK, Ayasofya 4757, Appendix, no. 124, Plate 27 [1–2]) but placed within the same section as divans and verse “in Turkish.” The semantic range of the word *Mughūl* was obviously much more capacious than our modern *Mongol*. A copy of Yazıcızade’s *Tārīḫ-i Āl-i Selçuḫ* from the library of Prince Bayezid b. Süleyman, dated 951/1544–45, is assigned the title *Mughūlnāme* on its flyleaf, presumably because it starts with an account of Oghuz Khan and the genealogies of different tribes of Turks and Mongols in Inner Asia (TSMK, R. 1391, Plate 13 [1–2]). For ‘Atufi and the Ottoman literati of the fifteenth and sixteenth centuries, the Turkī/Mughūlī distinction functioned somewhat like the modern Turkish/Turkic. It was a distinction worth making, while at the same time recognizing the kinship between these two categories

and the mutual intelligibility of their literatures. A proper perusal of Neva'i was considered so important for Ottoman readers that a dictionary was eventually put together (by 1534 at the latest) with rare lexical items and Chaghatai vocabulary foreign to Ottoman Turkish that appear in the poetry of Neva'i and others from the East who were in vogue in the lands of Rum.⁸⁶ Once, with respect to the script of a book written in Uyghur (SK, Ayasofya 4012, Appendix, no. 115, Plate 25 [1–2]), 'Atufi uses the word *gharīb*, with its connotations of unusual and rare, or strange—in reference to dictionaries of rare words, and manuscripts with rare illustrations. And once, in describing a translation of the *Qaṣīdat al-Burda*, he refers to the “Tatar” language.

Small scribal touches like these endow the inventory with a certain Ottoman, and even personal, flavor worth underlining. But the register as a whole is characterized by the systematic and fastidious work of a librarian (and probably a few assistants), executing a huge and sometimes tedious task according to certain pre determined principles and sultanic instructions.⁸⁷ The two most important principles concerned the titling and classification of volumes. That is, there should be concordance between the title assigned to a volume on the title page and its entry in the inventory, as well as on the sticky label of the binding (most of the latter are not extant). Further, each volume, and ideally each text within a compendium, should be categorized according to the classificatory scheme outlined at the beginning of the register.⁸⁸

There are indeed very few volumes and titles that lack an indication of the discipline of learning to which they belonged. To facilitate some ambiguation, since not all books could be neatly classified, 'Atufi relied on the phrase *min qibali* (“pertaining to”), which he tried not to use indiscriminately or sloppily. One text might clearly belong in the discipline of “history,” but another might better be identified as “pertaining to history.” 'Atufi also recognized many instances when a book might belong to more than one category, such as a work “on Sufism and advice” or a truly puzzling one “pertaining to kalam and jurisprudence and Sufism” (121 {17–18}).

Titling and identifying authors may well have been the hardest part of 'Atufi's task.⁸⁹ He did not always feel obliged to indicate the author even when that informa-

tion was available, as in the case of the commentary on *Gulshan-i Rāz* (Rose Garden of Secrets) by Ahmed-i Ilahi (d. after 1481), one of his contemporaries (TSMK, R. 474, Appendix, no. 37, Plate 11 [1–3]), so long as the work was properly categorized and titled. Another contemporary, who was well known in the palace, was Tursun Beg, whose chronicle is listed in the inventory without the author's name but with a title honoring 'Atufi's patron: “Story of the Accession of Bayezid Khan, Sultan of Sultans.” Yet the author himself gives a different title within the body of the text, calling his work “The History of Mehmed the Conqueror.”⁹⁰ Sometimes our librarian chose to be exceedingly practical; on the exquisite opening page of Me'ali's history, with illuminated roundels, he wrote the title as *Naẓm-i tawārīkh-i Sulṭān Mehmed Khān b. Murād Khān wa-ghayruhu bi-al-fārisiyyati*, referring to other sultans simply “and the rest” (TSMK, H. 1417, Appendix, no. 36, Plate 10 [1–2]). There are numerous signs indicating that 'Atufi sweated over such issues and labored to find solutions for them (see, for instance, SK, Ayasofya 1898, Appendix, no. 73, Plate 18). There are also many instances, however, when he seems to have thrown his hands in the air and decided that he would simply assign to certain works the most generic of designations, like “treatise on Sufism.”

Manuscript libraries are replete with multi-work volumes and miscellanies, some containing dozens of items, which present compounded challenges to a librarian tasked with identifying, titling, and classifying such “one-volume libraries.” While Franz Rosenthal uses this term in his study of a manuscript consisting of 23 items with 410 folios, a much larger compendium of more than two hundred items has been dubbed “the Tabriz treasury” by the team of scholars who studied it.⁹¹ The Ottoman imperial collection likewise contains some veritable one-volume libraries, or treasuries, which posed thorny inventorying problems for 'Atufi and led him to take shortcuts.

One of the heftier volumes he handled, for instance, is 752 folios long; it is listed with forty-two separate entries in the current catalogue of the Süleymaniye Library (Ayasofya 3857, Appendix, no. 112). 'Atufi's solution for this volume was to highlight the first item therein, the famous *Quintet* of Nizami (d. 1214?), and describe the rest as containing “treatises of the virtuous in the mid-

dle, and the lyrics of the greats and their quatrains at the end." He must have assumed that this volume would be requested for Nizami, and the rest would constitute a pleasant bonus for the reader. Notwithstanding the "treatises in the middle," then, it was conveniently classified under Persian poetry. Even easier to classify were the voluminous but more homogenous "collected works" of Jami.

Trouble arose when seemingly disparate texts were bound together. There is the curious case of a "Vita of Shaykh Safi al-Din," likely that of the founder of the Safavid order (d. 1334), for instance, bound in a compendium after two Arabic treatises, one on prosody and the other pertaining to the science of poetry, and before "other treatises, all in one volume" (227 {15–17}). Did 'Atufi list this volume in the section on Arabic literature without any hesitation? He must have considered listing it among books on Sufism and the biographies of shaykhs. In any case, if this vita is a copy of *Ṣafvat al-Ṣafā* (the Quintessence of Purity), the most important hagiography of the eponym of the Safavids, it may be the codex that is now a single-text volume, catalogued as SK, Ayasofya 3099, which has signs of being rebound on its own, possibly after separation from some preceding folios (Plate 24 [1–2]). With 896/1490–91 as its date of completion, indicated in the colophon, the arrival of the volume in the palace before the compilation of the inventory is not impossible. Given his temperament and attitude, Bayezid's eagerness to read about the lineage and legacy of Safi al-Din is true to form, as demonstrated by the presence of another copy of the same hagiography, with the seal of the sultan, that postdates the inventory.⁹²

Some books found a place on the shelves and in the inventory soon after their completion, but some missed it by a narrow margin. Ibrahim b. Shaykh al-Islam Sharaf al-Din Musa al-Halabi's (fl. late 15th/early 16th century) *Tuḥfatu al-asāṭini li-'ayni al-salātini* (Gift of Pillars in the Rite of Sultans), for instance, an Arabic work on Sufism, was in fact written by order of the Treasury and dedicated to the sultan in June 1501, but must have arrived a bit too late to be listed, even though it did eventually receive the seal of Bayezid II (Appendix, no. 15).⁹³ Only a few months before that, in September 1500, a certain Hisari completed his *Tuḥfat al-mu'min* (Gift to the Be-

liever), a didactic *mathnawī* in Turkish, which is both listed and sealed (Appendix, no. 68). Not only of recent vintage, but also very much wrapped in its own moment, this book dealt with "current events" to some extent, particularly with the rising influence of the shaykhs and Sufis of Ardabil, and the spread of illicit practices such as drinking alcoholic beverages, and growing long and "proud" moustaches.

A book written in 909/1503–4, on the other hand, seems to have missed being included in the inventory by a narrow margin. This commentary on Ibn al-Farid's (d. 1235) *Qaṣīda-yi khamriyya* (Wine Poem) by Idris Bidlisi concludes with a colophon that presents precious information on the emigration of this famous intellectual from Iran to the Ottoman empire. Idris's commentary is bound in a two-work volume, the second part of which had already been listed by 'Atufi and sealed with the sultan's imprint, evidently before Idris's text arrived and was deemed fit to be bound together with it (SK, Ayasofya 4092, Appendix, no. 117, Plate 26 [1–2]). The colophon also enables us to instantiate a peculiar numbering practice that has confused modern scholars with respect to the date of not only this manuscript but also of MS Török F. 59, namely our inventory, at the time of its first discovery.⁹⁴

UNIVERSALIST AMBITIONS

Some of the medieval chronicles and geographies available at the Topkapı Palace Library would seem to suggest that this library, or any contemporaneous one for that matter, paled in comparison to certain forerunners in the Islamic world of the tenth to eleventh centuries, which allegedly had collections in the hundreds of thousands, with dozens of volumes of inventories.⁹⁵ Even if, like many modern researchers, the Ottoman readers of these medieval accounts were skeptical of the numbers given, they may have still been impressed by the conceivability of such vast libraries. In any case, they do not seem to have buckled under the oppressive weight of past magnificence. Theirs was a new age with a very different kind of universalism, building on a glorious medieval heritage and fabulous new opportunities.

A brief look at the final section of the inventory might help to round out and conclude our discussion of the universalist and cosmopolitan ambitions of the sultans as collectors. The medieval Islamic and, to a lesser degree, Byzantine lore that the Ottomans had collected, adopted, and elaborated on had already incorporated parts of the legacy of pre-Islamic universalisms of the eastern Mediterranean and Mesopotamia, such as, for instance, narrative cycles concerning iconic figures like Solomon and Alexander, or collections of fables like the *Panchatantra*. The Ottomans also inherited a large part of the vast body of medieval Islamic learning, with its translations of and conversations with non-Islamic philosophical and scientific works, such as texts by (or attributed to) Aristotle, Euclid, Galen, Ptolemy, and others, as illustrated and discussed in various essays in this volume. The often-neglected universalist aspirations of the steppe, now fused with Perso-Islamic elements, continued to inform the Ottomans through not only the Oghuz traditions but also their competitive and constructive engagement with other polities of steppe background, like the Timurids.

Although they may have been more rare, there are also direct encounters with non-Islamic lore and learning reflected in our inventory, namely encounters not mediated by earlier translations or adaptations. The translation of the work of Georgios Gemisthos Plethon (d. 1454?), the late Byzantine philosopher whose thought was considered heretical by the Greek Orthodox Church, is probably the best-known example. This rendering from Greek into Arabic was only one of Mehmed II's commissions reflecting his interest in the cultural universe of his Greek subjects, and it was accompanied by a translation of Ptolemy's *Geography*, as well as an original work composed by the patriarch Gennadios (d. ca. 1473) on the "confession of faith" according to the doctrine of the Church.⁹⁶ Impressive as these initiatives are in their own right, they certainly do not compare to the translation movement of the ninth and tenth centuries in the Abbasid world, which had a far more comprehensive radar for a far more pristine beginning.

The final section of the inventory offers a glimpse into yet another dimension of the intellectual ambition that shaped the collection, namely an engagement with texts that move beyond the Islamic corpus, in a strict sense,

even if they are part of the Islamic tradition in another. In this rather short list of eleven items (see List of Entries below), 'Atufi enumerates the collection of holy texts within the Abrahamic tradition, texts that Muslims consider to be based on divine revelation and yet corrupted in their available forms, since their integrity could not be safeguarded as with the Qur'an. Such texts were still considered worthy of reading, both for the divine truth they contained, if only partially, and also for polemical reasons. In addition to this list, the Torah and the Gospels are mentioned in other sections of the inventory within titles of books that represent selections from (and/or commentaries on?) these texts, such as "A Syriac Treatise from the Torah Translated into Arabic," listed in the section on Sufism as "pertaining to advice" (146 {6}). Another treatise in Syriac is described as being "in a special calligraphic hand of theirs, which is what they write the Gospels in" (138 {18–19}).

Finally, the inventory also reflects another level of the engagement with the Old and the New Testament in the form of refutations of those texts from the point of view of different Muslim scholars, such as a volume that includes both al-Ghazali's (d. 1111) influential "Exquisite Refutation of the Outward Meaning of the Gospels" and al-Juwayni's (d. 1085) "Cure for the Ailment, on What Occurs in the Torah and the Gospels" (145 {17} and {17–18}).

As for the list itself, it includes four Arabic versions of the Psalms of David, which is mentioned in the Qur'an as one of the four revealed books, named in the inventory as alternatively *Zabur* or *Mazāmīr* (*Mizmor*) (364 {12, 12–13, 13–14} and 365 {1}). The Torah (*Tawra*) is represented with one Arabic and one Persian translation (both of them on 364 {11}). The New Testament, or *Injīl* (Evangelium), appears in five volumes, two of them in Arabic (364 {14–15} and {19}), two others in Persian (364 {15–16} and {16–18}), and one that includes a versified translation in Arabic and another in Persian (364 {19}–365 {1}). On four of those occasions, the *Injīl* is said to consist of four books, and twice the Gospels are named after each of the four evangelists.

In short, this grandiose collection of books, one of the largest in its time, was growing and was intended to grow even larger. While it presented many challenges to the librarians who toiled not only on the inventory but

also on acquisitions, circulation, and maintenance of the precious volumes, the labor was painstaking perhaps, but it was clearly also a labor of love. It was surely a matter of pride and prestige as well.

NOTES

Author's note: I would like to express my thanks to Didar Akbulut, Zeynep Atbaş, Serpil Bağcı, Peri Bearman, Aslıhan Gürbüz, Maria Metzler, Gülru Necipoğlu, Eda Özel, Zeren Tanındı, Menderes Velioglu, and Akif Yerlioğlu for their generous help and contribution.

1. Selahattin Tansel, *Sultan II. Bâyezid'in Siyasî Hayatı* (Istanbul, 1966) 5–6. Tansel provides facsimiles of the relevant folios (65–66) from his source, Ridvan Paşa Tarihi (*Tārīḥ-i Mişr*, Beyazıt Devlet Library, MS 4971). Note also the facsimile Tansel provides of an anonymous letter from the Topkapı Palace Archives (E. 10818; undated but from Bayezid II's reign), the author of which narrates a dream of his with Seyyid Gazi, the legendary hero of the earliest Islamic conquests in the lands of Rum and a source of inspiration for later gazis, spurring the sultan to go on a westerly campaign.
2. Joseph von Hammer-Purgstall, *Geschichte des osmanischen Reiches* (henceforth *GOR*), 10 vols. (Pest, 1827–35), 2:317.
3. Tursun Bey, *Tarih-i Ebû'l-Feth*, ed. Mertol Tulum (Istanbul, 1977), 25–26.
4. The attitude of neglect is pervasive in political discourse and public life in Turkey, where the names of Fatih Sultan Mehmed (Mehmed II, r. 1444–46; 1451–81) and Yavuz Sultan Selim (Selim I, r. 1512–20) are commonly given to monumental construction projects and sites. A similar attitude is also common in Ottoman studies in terms of the coverage of Bayezid II's reign in survey books, for instance; for a blatant example, see the title of Yaşar Yücel and Ali Sevim's work, *Osmanlı Klasik Döneminin Üç Hükümdarı: Fatih-Yavuz-Kanuni* (Ankara, 1991). In many other survey books, Bayezid II's rule is often treated as an overture to that of his son and to the "inevitable" Ottoman-Safavid wars, imposing an anachronistic approach to the turn of the century when our object of investigation in this volume, the palace library inventory, came into being. For a bold and compelling attempt at reinterpreting the role of Bayezid in Ottoman history, from a different but equally important perspective, see Nenad Filipović, "Draç'ın Fethi (1501), Oruç Bin-i Âdil Vakayinâmesi ve İsbey-oğlu Mehmet Çelebi," *Prilozi za Orijentalni Filologiju* (Sarajevo) 61 (2011):369–418.
5. Stanford Shaw, *History of the Ottoman Empire and Modern Turkey*, vol. 1, *Empire of the Gazis: The Rise and Decline of the Ottoman Empire, 1280–1808* (Cambridge, 1976), 70. For a detailed treatment and balanced assessment, see Feridun Emecen, *Osmanlı Sultanları I: Bayezid (II) – Yavuz – Kanuni* (Istanbul, 2011).
6. The trail of these references, which culminates in a black hole, has been painstakingly traced by Kathryn Schwartz in the second chapter of her PhD thesis (Harvard University, 2015), titled "Meaningful Mediums: Manuscript and Print in 19th-Century Ottoman Cairo." For a more recent short circuit of the same charge, see the work of David A. King, *Spherical Astrolabes in Circulation: From Baghdad to Toledo and to Tunis and Istanbul*, which appears on Prof. King's academia.edu website (downloaded on April 3, 2019). King writes (on p. 84): "We shall also not discuss the Sultan's prohibition of the printing of Arabic script in 1483, whereby the Shaykh al-Islâm issued a *fatwa* stating that moveable-type printing was permissible only for non-Muslim communities, but not for Muslims of the Empire," citing Walid Ghali, "Print or Not Print: Is that Still the Question? Delay in Adopting Printing Press in the Ottoman Empire" (presentation, 38th Annual Conference of the European Association of Middle East Librarians May 30–June 1, 2016), who writes: "Printed copies of the Quran during this period met with strong opposition from Muslim legal scholars: printing anything in Arabic was prohibited in the Ottoman Empire between 1483 and 1726—initially, even on penalty of death" (6), in turn citing Suraiya Faroqhi, *Subjects of the Sultan: Culture and Daily Life in the Ottoman Empire* (I. B. Tauris, 2005), 134–36 and "The Encyclopaedia of Islam, s.v. 'Fascicules,' by Masrah Mawlid and Clifford Edmund Bosworth." And yet the meticulous scholar Faroqhi makes no mention of even the rumor of a formal prohibition, in 1483 or any other date, let alone a death penalty! Ghali's second reference is to an entire fascicle of an encyclopedia, in which the relevant entry on *maṭba'a* offers no evidence relevant to that sweeping assertion.
7. On this latter phenomenon, see Aleksandar Shopov, "Between the Pen and the Fields: Books on Farming, Changing Land Regimes, and Urban Agriculture in the Ottoman Eastern Mediterranean ca. 1500–1700" (PhD diss., Harvard University, 2016).
8. Tursun Bey, *Tarih-i Ebû'l-Feth*, 22.
9. Feridun Emecen, *Osmanlı Sultanları I*, 20–21.
10. The word *zulm* (tyranny) is indeed used to describe some of Mehmed's decisions and actions in the anonymous chronicles. See, for instance, *Anonim Osmanlı Kroniği (1299–1512)*, ed. Necdet Öztürk (Istanbul, 2000), 112.
11. The part on the House of Aydın in Enveri's *Düstürnâme* has been edited and translated by Irène Mélikoff as *Le Destân d'Umûr Pacha (Düstürnâme-i Enverî)* (Paris, 1954). A larger portion of the text, though still not the entire work, has been published by Mükrimin Halil [Yınanç] as *Düstürnâme-i Enverî* (Istanbul, 1928).
12. Ebu'l-hayr Rumi, *Şaltuknâme*, TSMK, H. 1612. For a facsimile edition, see Gönül Alpay-Tekin et al., *The Legend of Sarı Saltuk: Collected from Oral Tradition by Ebû'l-Ḥayr Rûmî*, 7 vols. (Cambridge, MA, 1974–84). For other extant copies of this text, see the introduction by Necati Demir and Dursun Erdem to their edition: *Saltuk-nâme* (Istanbul, 2013), 26.
13. Süheyl Ünver, "İkinci Selim'e kadar Osmanlı hükümdarlarının hususi kütüphaneleri hakkında," in *IV. Türk Tarih Kongresi, 1948* (Ankara, 1952), 294–312.

14. More recent work on the history of Ottoman science has already removed many of those former certainties about the absence of scientific enterprise in the early modern Ottoman world, but it has yet to make a direct impact on mainstream narratives, particularly narratives of world and European history. See, for instance, Ekmeleddin İhsanoğlu, *Osmanlı Bilim Mirası*, 2 vols. (Istanbul, 2017); İhsan Fazlıoğlu, *Kayıp Halka: İslam-Türk Felsefe-Bilim Tarihinin Anlam Küresi* (Istanbul, 2014); and Ahmet Tunç Şen, "Astrology in the Service of the Empire: Knowledge, Prognostication, and Politics at the Ottoman Court, 1450s–1550s" (PhD diss., The University of Chicago, 2016).
15. Marino Sanuto, *I diarii*, 5:458. For this and other sources speaking of Bayezid's "penchant for the astral sciences," for instance, see the essay by Cornell Fleischer and Tunç Şen in this volume. Also cited in Hammer, *GOR*, 2:366 and 626. Cenabi, the sixteenth-century Ottoman historian, likewise focuses on Bayezid's engagement with books and learning in his assessment of the sultan; see Ctirad Heeren-Sarka, intro. and trans., *Sultan Bâyezid II (1481–1512) in der Chronik des Muṣṭafâ Cenâbî* (Munich, 1980), 87–88.
16. SK, Fatih 756 (Appendix, no. 46, Plate 29 [1–2]).
17. The work of Cornell Fleischer on Lettrism and related intellectual trends has been groundbreaking; see his essay in this volume and his "Ancient Wisdom and New Sciences: Prophecies at the Ottoman Court in the Fifteenth and Early Sixteenth Centuries," in *Falnama: The Book of Omens*, ed. M. Farhad and S. Bağcı (London, 2009): 232–43, 329–30. See also Matthew Melvin-Koushki, "Early Modern Islamic Empire: New Forms of Religiopolitical Legitimacy," in *The Wiley-Blackwell History of Islam*, ed. A. Salvatore, R. Tottoli, and B. Rahimi (London, 2018): 353–75.
18. On the ideological functions of Oghuzism during the first half of the fifteenth century, with memories of the Ottoman defeat in the battle of Ankara in 1402 and the ensuing claims of Timurid suzerainty still hanging in the air, see *TDVİA*, s.v. "Murad II," by Halil İnalçık.
19. The parallel between the names of the two nephews, Korkut and Oghuz, has already been noted by Faruk Sümer, *TDVİA*, s.v. "Oğuzlar." See also Sümer's magnum opus, *Oğuzlar (Türkmenler) Tarihleri, Boy Teşkilatı, Destanları* (Istanbul, 1992). Çağatay Uluçay, *Padişahların Kadınları ve Kızları* (Ankara, 1980), 28, cites a congratulatory letter written by İlalı to her brother Selim upon his accession in 1512. The name İlalı also appears earlier as one of the daughters of Mehmed I (r. 1413–21), but not after the generation of Bayezid II's children. For male and female names, also see the genealogical tables in A. D. Alderson, *The Structure of the Ottoman Dynasty* (Oxford, 1956). It is noteworthy that such Turkish names were also adopted among the Christians in the lands of Rum. İlalı, for instance, appears as the name of a non-Muslim woman already in the Seljuk era; for this name and many other examples, see Osman Çetin, *Sicillere Göre Bursa'da İhtida Hareketleri ve Sosyal Sonuçları (1472–1909)* (Ankara, 1999), 37.
20. Semih Tezcan, *Dede Korkut Oğuznameleri Üzerine Notlar* (Istanbul, 2001) has argued for Rumelia as the site of textual rendering. The geography of these processes of textualization and vernacularization needs to be investigated in greater detail. For a rich and learned discussion of many examples and aspects of vernacularization in our inventory, with their broader implications, see the essay by Ferenc Csirkés. Also see Hüseyin Yılmaz, *Caliphate Redefined: The Mystical Turn in Ottoman Political Thought* (Princeton, 2018), the section on "the translation movement," pp. 55–64. Oscar Aguirre Mandujano's "Poetics of Empire: Literature and Political Culture at the Early Modern Ottoman Court," (PhD diss., University of Washington, 2018) is another welcome recent contribution to our understanding of the politics of language and literature in the age of Bayezid II.
21. The citation from the first collection, "Atalar sözi Kur'āna girmez, yanınca yilişür," is in red ink and vocalized on 115b in SK, Fatih 3543 (İzbudak's reference to MS 3443 must be a typographical error). The proverb collection constitutes the second part of a compendium in two parts. Since the first item in this volume, a medical work titled "Teshil-i Mevlānā Şemsüddin," gives its date of copying as 963/1557–58 (see 113b), the proverb collection must be a later copy. The proverbs start on 115a. I became aware of this manuscript through *Atalar Sözü*, ed. Velet İzbudak, with facsimile and transliteration (Istanbul, 1936), 9. A brief note on the flyleaf, "sancağdan gelen," and the seal of Süleyman I suggest that this manuscript may have been in the possession of one of his sons. The citation from the second proverb collection is on p. 229 in "Quatre-vingt quatorze proverbes turcs du XV siècle, restés inédits," ed. Pertev N. Boratav, with introduction and French translation, *Oriens* 7 (1954):223–49. A larger *Oghuznâme*, possibly copied in 1009/1601–2, now in the library of the Faculty of Oriental Studies of St. Petersburg State University, MS 121/58, is titled "Kitāb-i Oğuznâme." For this collection of 1863 proverbs, see *Oğuznâme (Emsāl-i Mehmedali): XVI.yy.da Yazılmış Türk Atasözleri Kitabı*, ed. Samed Alizade, with additional notes by Ali Haydar Bayat (Istanbul, 1992).
22. TSMK, R. 1390, 3a–4a. The MS bears the seal of Süleyman I.
23. See Boratav, "Quatre-vingt quatorze proverbes," 224–28. For social uses of proverbs in another setting, and their transformations, see Natalie Zemon Davis, "Proverbial Wisdom and Popular Errors," in *Society and Culture in Early Modern France: Eight Essays* (London, 1975), 227–67.
24. Eşref bin Muhammad, *Ḥazā'inü's-sa'ādāt*, ed. Bedi Şehsuvaroğlu (Ankara, 1961), pp. 1–2 of the transcription, 2a–b of the facsimile.
25. Sinan Paşa, *Tezkiretü'l-Evliya*, ed. Emine Gürsoy-Naskali (Ankara, 1987).
26. For her letter, see Çağatay Uluçay, *Haremnden Mektuplar*, 18–20. Mehmed II's firman is cited, and a facsimile provided, in *TDVİA*, s.v. "Gülbahar Hatun" by Feridun Emecen.
27. For the relevant biographies, see Taşköprülüzade, *Eş-şekā'iku'n-nu'māniyye fi 'ulemā'i'd-devleti'l-'oşmāniyye*, ed. Ahmed Subhi Furat (Istanbul, 1985), 91–94 (Hızır Beg);

- 173–77 (Sinan Pasha). For the development and recruitment of the Ottoman religio-scholarly cadres, see Abdurrahman Atçıl, *Scholars and Sultans in the Early Modern Ottoman Empire* (Cambridge, Eng., 2017).
28. First cited from an eighteenth-century anthology in Süheyl Ünver, *Fatih Külliyesi ve Zamanı* (Istanbul, 1946), 248, the joke on Mehmed II appears in a collection of pleasant tales by Lami'i Çelebi (d. 1531), *Leṭā'ifnâme*. See the essay and note 150 by Gülru Necipoğlu. On Le'ali, see *Tezkire-i Latîfî* (Istanbul, 1896–7), 289–90.
 29. On Molla Lutfi's dismissal from the library and his trial, see Şükrü Özen, "Molla Lutfi'nin İdamına Karşı Çıkan Hamîdüddin Efendi'nin Ahkâm'uz-zındîk Risâlesi," *İslâm Araştırmaları Dergisi* 4 (2000): 7–16; Şükrü Özen, "İslâm Hukukunda Zındıklık Suçu ve Molla Lutfi'nin İdamının Fikhîliği," *İslâm Araştırmaları Dergisi* 6 (2001): 17–62; and İsmail E. Eriüsal, "XV–XVI. Asır Osmanlı Zindeka ve İlhad Tarihine Bir Katkı," *Osmanlı Araştırmaları* 24 (2004): 127–57. On his oeuvre in general and the books he wrote as a culmination of debates held at Bayezid's court, see the introduction by Şükran Fazlıoğlu to her edition of one of Molla Hüsrev's most important books: *Dil Bilimlerinin Sınıflandırılması = El-Metalib El-İlahiyye Fi Mevzuat El-Ulum El-Lugaviyye* (Istanbul, 2012), 52–53.
 30. It is better known that Mehmed I and Bayezid II were related to Amasya, but so was Murad II, who was born there in 1404 and held his appanage between 1415 and 1421, when he became sultan. The early reign of Murad II can be considered a sequel to the "family matters" that the House of Osman had been trying to settle after 1402, since he was dealing with the aftershocks of interregal tremors.
 31. While a certain strand of historiography tends to associate almost every prince-turned-sultan with Amasya, beginning with the learned but at times too Amasya-centric account of Hüseyin Hüsameddin [Yasar] (1869–1939), some of that information is dubious. See İsmail Hakkı Uzunçarşılı, "Sancağa Çıkarılan Osmanlı Şehzadeleri," *Belleten* 39 (1975): 659–96; and Petra Kappert, *Die osmanischen Prinzen und ihre Residenz Amasya im 15. und 16. Jahrhundert* (Istanbul, 1976). Hüseyin Hüsameddin's work is still indispensable for those studying Amasya; on the adventures of his twelve-volume manuscript, see *TDVİA*, s.v. "Hüseyin Hüsameddin Yasar," by Turgut Akpınar. The municipality of Amasya has published the first five volumes: Abdi-zade Hüseyin Hüsameddin Efendi, *Amasya Tarihi*, 5 vols. (Amasya, 2007).
 32. The region of Amasya-Tokat is finally receiving long overdue attention with interdisciplinary methodologies. Recently finished and ongoing dissertations promise to change how we view not only the region but also the late medieval/early modern period in the lands of Rum and in Iran. The ongoing dissertation research of Polina Ivanova, with the long-term perspective of environmental history and archaeology, and that of Damla Özakay, which combines architectural and urban history, are two examples conducted at Harvard University. See also Hasan Karataş, "The City as a Historical Actor: The Urbanization and Ottomanization of the Halvetiye Sufi Order by the City of Amasya in the Fifteenth and Sixteenth Centuries" (PhD diss., University of California, Berkeley, 2011).
 33. The cadastral surveys of 1482 and 1520 are the key documents for the period under study: BOA, TD 15, and TD 387, respectively. A detailed introduction to these and other archival sources for Amasya can be found in Adnan Gürbüz, "Toprak Vakıf İlişkileri Çerçevesinde XVI. Yüzyılda Amasya Sancağı" (PhD diss., Ankara University, Institute of Social Sciences, 1993). See also Oktay Özel, *The Collapse of Rural Order in Ottoman Anatolia: Amasya 1576–1643* (Leiden; Boston, 2016); and *TDVİA*, s.v. "Amasya," by Feridun Emecen and İlhan Şahin.
 34. Undoubtedly, there were also Kurdish communities in the region, but not to the same extent as in the more southerly and easterly parts of Asia Minor. Even there, the larger political confederations were led by Turkmen dynasties in the fifteenth century, such as the Karakoyunlu and the Akkoyunlu, for whom Diyarbakir was a significant point of focus in terms of their political ambitions. There is some evidence, however, for the presence of Kurdish beys among Amasya's elites as well; see <https://pirtukweje.wordpress.com/2018/03/09/murad-ali-ciwan-amasya-bagimsiz-kuerdemirligi/>, which relies on Hüseyin Hüsameddin in this regard.
 35. The characteristic manner of referring to these families was with the suffix "zade," or its often interchangeable Turkish equivalent "oğlu" (i.e., "son or daughter of ..." or "member of the House of ... by descent"). Mihri's grandfather was a famous Sufi shaykh from the Gümüşlüzade; Abdurrahman Efendi was of the Divriklizade; Hamdullah was of the Sarıklızade, and his grandfather was a Sufi shaykh as well; Şerefeddin was the grandson of the chief physician of Prince Mehmed [I].
 36. TSMK, G.İ. 95. In the colophons of several manuscripts of his, Amasiatsi's life story can be followed. See S. A. Vardanyan, *Amirdovlat Amasiatsi: A Fifteenth-Century Armenian Natural Historian and Physician*, trans. M. Yoshpa (Delmar, NY, 1999).
 37. My estimate is slightly higher than those given on p. 52 in Gürbüz, "XVI. Yüzyılda Amasya Sancağı," and on p. 90 in Selim Özcan, "Amasya'da Sancak Beyliği Yapan Şehzadeler Döneminde Amasya Şehri," *Amasya Üniversitesi İlahiyat Fakültesi Dergisi* 3 (2015): 69–94. In his article on Mehmed I's nickname, Paul Wittek speaks of a "rein türkisch Amasya" in contrast to a heterogenous Bursa, but this is likely an oversight, since his focus is on the predominance of Greek communities in Bursa, where Prince Mehmed Çelebi—later, Mehmed I—spent his early childhood, in order to substantiate his argument concerning the Greek origin of the nickname (*kyritzes* > *kirişçi*). See Paul Wittek, "Der 'Beiname' des osmanischen Sultans Mehmed I," in *Eretz-Israel: Archeological, Historical and Geographical Studies, L. A. Mayer Memorial Volume (1895–1959)* 7 (1964): 144–53.

38. On changes in the administrative status of Amasya, see Orhan Kılıç, "Osmanlı Dönemi İdarî Uygulamalar Bağlamında Şehzâdelerden Mutasarrıf Paşalara Amasya Sancağının Yönetimi," *I. Amasya Araştırmalar Sempozyumu (13-15 Haziran 2007)*, vol. 1 (Amasya, 2007) 41–64. Under Süleyman, Amasya was promoted again to being the center of its province but never regained its clout.
39. The former of those two princes, Murad bin Ahmed, held a post under the Safavid régime, possibly having crossed over the confessional divide as well, allegedly already while in Amasya.
40. Georges Perrot, who led a scientific expedition to Asia Minor in 1861, observed that "Amasya is the Oxford of Anatolia," on the basis of his estimate that its population of 25,000 included 2,000 students in 18 madrasas. Perrot, *Souvenirs d'un voyage en Asie Mineure* (Paris, 1863), 298–99.
41. In a non-academic publication, İsmail Onarlı has asserted, on the basis of archival documents he mentions without giving a citation, that Hayrüddin Hızır 'Atufi was among those whose fief grants were revoked by Selim; Onarlı's untimely demise makes it impossible to check this reference; see his *Şah İsmail* (Istanbul, 2000), 124–25. I intend to explore the implications of this possibility in terms of 'Atufi's confessional identity, in the context of the sectarian latitudinarianism of his age, in another publication since it calls for further on-site research; see below note 61. For the relevant entry in the cadastral survey of 1520, see Başbakanlık Osmanlı Arşivi, TD 387, facsimile published as 387 Numaralı Muhasebe-i Vilayet-i Karaman ve Rum Defteri (937/1530), vol. II (Ankara, 1997), 380.
42. There is a large body of literature on those rebellions, which has recently been replenished by the perspectives of environmental and climate history; for an insightful view based on research specifically related to Amasya, see Özel, *Collapse of Rural Order*; and Sam White, *The Climate of Rebellion in the Early Modern Ottoman Empire* (Cambridge, Eng., 2011).
43. See for example, Shaw, 1:78, where he writes of Bayezid's "failure to suppress the Safavids more decisively"; or *TDVİA*, s.v. "Bayezid II," by Şerafettin Turan: "Bayezid's peace-minded and hesitant attitude was the reason why relations with the Safavids worked to the disadvantage of the Ottomans" (translation mine).
44. As argued in Christopher Markiewicz, "The Crisis of Rule in Late Medieval Islam: A Study of Idrīs Bidlīsī (861–926/1457–1520) and Kingship at the Turn of the Sixteenth Century" (PhD diss., The University of Chicago, 2015). For a similarly compelling account of that context, with a focus on the perspective of the *qizilbash* communities, see Ayfer Karakaya-Stump, *The Kizilbash-Alevis in Ottoman Anatolia: Sufism, Politics and Community* (forthcoming), chapter 6.
45. Behiştî Ahmet Çelebi, *Tarih-i Behiştî: Varidat-ı Sübhani ve Fütuhât-ı Osmani* (791-907/1389-1502), vol. 2, ed. Fatma Kaytaz (Ankara, 2016).
46. For Bayezid's letters to Ismail during the first few years following 1501, advising restraint and moderation and emphasizing repeatedly that the consent of subjects is more important than military victory and coercion, see Hamidreza Mohammednejad, "Osmanlı-Safevi İlişkileri (1501–1576)" (PhD diss., Ankara University, Institute of Social Sciences, 2015).
47. Also see Gilles Veinstein, "Les premières mesures de Bâyezid II contre les Kızılbaş," in *Syncretismes et hérésies dans l'Orient seldjoukide et ottoman (XIV-XVIII siècle)*, *Actes du Colloque du Collège de France, octobre 2001* (Paris, 2005), 225–36.
48. Irene Mélikoff, "Le problème kızılbaş," *Turcica* 6 (1975): 49–67; see Ayfer Karakaya-Stump, *Kizilbash-Alevis in Ottoman Anatolia*.
49. There is no mention of this vita in the inventory, and there are no copies of it in the palace library (or anywhere) until its seventeenth-century renditions. Of the widely dispersed copies of the sprawling *Süleymännâme*, which Firdevsi had originally conceived as 366 "books" but allegedly quit after the 82nd because the sultan found it too long and tedious, I have so far been able to identify one copy with the seal of Bayezid II: TSMK, H. 1530; seal on 100a, at the end of "Book 44," but in the middle of the volume as currently bound and consisting of "Books 43–47."
50. *Süleymännâme*, vol. 1, Dublin: Chester Beatty Library, MS 406, consisting of Books 1–20. Possibly the presentation copy.
51. The Arabic original and an English translation of the letter are in James Monroe, "A Curious Morisco Appeal to the Ottoman Empire," *Al-Andalus* 31, no. 1 (1966): 281–303. For a more recent assessment, including comparisons with a version of the letter written to the Mamluks, see P. S. van Koningsveld and G. A. Wieggers, "An Appeal of the Moriscos to the Mamluk Sultan and Its Counterpart to the Ottoman Court: Textual Analysis, Context, and Wider Historical Background," *Al-Qantara* 20, no. 1 (1999): 161–89.
52. See p. 221 in Codex Hanivaldanus, translated from Latin into German and annotated by Richard Franz Kreutel, in *Der Fromme Sultan Bayezid: Die Geschichte seiner Herrschaft (1481-1512) nach den altosmanischen Chroniken des Oruç und des Anonymus Hanivaldanus*. Osmanische Geschichtsschreiber 9 (Graz; Vienna; Köln, 1978), 182–285. For a modern Turkish translation based on this German edition, see *Haniwaldanus Anonimi'ne Göre Sultan Bayezid-i Velî (1481-1512)*, trans. Necdet Öztürk (Istanbul, 1997).
53. *II. Bayezid Dönemine Ait 906/1501 Tarihli Ahkâm Defteri*, ed. Feridun Emecen and İlhan Şahin (Istanbul, 1994), 102, order no. 365.
54. Ercan Alan, "Yeni Bir Belgeye Göre XVI. Yüzyılın İlk Yarısında Osmanlı Mülâzemet Sistemi," *Osmanlı Araştırmaları / The Journal of Ottoman Studies*, XLIX (2017): 89–124. There are just a few lines dealing with the same procedure in a register from 1485, which also suggests that such information was not registered before: Topkapı Palace Museum Archives,

- D.9555, published in Ercan Alan and Abdurrahman Atçıl, *XVI. Yüzyıl Ulema Defterleri* (Ankara, 2018); see p. 25.
55. Hammer, *GOR*, 2:393; emphasis mine. In 1873, the cities of Pest and Buda were joined to become Budapest. For the relevant publications by Erünsal and Maróth, see the introductory essay by Gülru Necipoğlu, note 2.
 56. For a pioneering survey of the early formation of the collection under different sultans, see Süheyl Ünver, "İkinci Selim'e kadar Osmanlı hükümdarlarının hususi kütüphaneleri hakkında," in *IV. Türk Tarih Kongresi*, 1948 (Ankara, 1952), 294–312. Ünver notes, for instance, that he has seen 141 manuscripts once owned and endowed by Murad II to three different libraries in Edirne, which was his capital city. For a useful survey and bibliography of studies on the history of the libraries of Istanbul, see Bilgin Aydın, "İstanbul Kütüphaneleri Tarihine Dair Araştırmalar," *Türkiye Araştırmaları Literatür Dergisi* 8 (2010): 333–44. A focused study of the books on Sufism in the library of Mehmed II, also making use of 'Atufi's inventory, is in Mehmet Arıkan, "Fenâdan Bekâya İp Atmak: Fâtih Sultan Mehmed'in Özel Kütüphanesindeki Tasavvuf Eserleri," *Osmanlı'da İlm-i Tasavvuf*, ed. Ercan Alkan and Osman Sâid Arı (Istanbul, 2018), 59–82. The Appendix below highlights some aspects of the continuities and discontinuities in the palace library collection, but its primary focus is on the inventory itself; further research for a more comprehensive diachronic treatment of the collection is highly desirable, with more attention paid to the yeomanly work of librarians.
 57. For an account of this interesting exchange from 1477, which was triggered by a letter from the governor's pagan overlord to Yemen, in a manuscript that eventually found its way to Istanbul, but not the palace library, see Franz Rosenthal, "A One-Volume Library of Arabic Philosophical and Scientific Texts in Istanbul," *Journal of American Oriental Studies* 75 (1955): 14–23, at p. 15. On the late medieval book trade and collections in the extensive Arab lands, with links to other parts of the world, see Konrad Hirschler, *The Written Word in the Medieval Arabic Lands: A Social and Cultural History of Reading Practices* (Edinburgh, 2012); and Doris Behrens-Abouseif, *The Book in Mamluk Egypt and Syria (1250–1517): Scribes, Libraries, and Market* (Leiden, 2019). For the Iranian and Persianate world, see Nourane Ben Azzouna, *Aux origines du classicisme: Calligraphes et bibliophiles au temps des dynasties mongoles (les Ilkhanides et les Djalaïrides 656–814/1258–1411)* (Leiden, 2018).
 58. Konrad Hirschler, *Medieval Damascus: Plurality and Diversity in an Arabic Library: The Ashrafiya Library Catalogue* (Edinburgh, 2016).
 59. See Erünsal et al., *Osmanlılarda Sahaflık Ve Sahaflar* (Istanbul, 2013). On the question of the looting of libraries, also see İ. E. Erünsal, "Fethedilen Arap Ülkelerindeki Vakıf Kütüphaneleri Osmanlılar Tarafından Yağmalandı mı?" *Osmanlı Araştırmaları* 43 (2014): 19–66.
 60. TSMK, A. 443, 100b.
 61. See note 41 above. Since the whole village is named after him, Hayrüddin is likely to have made the endowment himself (for a zāwiya in the name of his grandfather?). The cadastral survey also specifies that Hayrüddin was still in control of a quarter share of the village holding while another quarter share was in the hands of the son of a lady (Hayrüddin's sister?) named Kutlu Melek: "*Ḳarye-i Ḥayrüddin'de nuşf-ı mālīkāne vakf-ı zāviyedür der Amāsiyye ve rub'-ı mālīkāne vakf-ı evlādlık üzere Ḳutlu Melek nām hātūn taşarrufında idi ḥaliyā oğlu taşarrufında ve rub'-ı āher daḥı vakf-ı evlād der taşarruf-ı Ḥayrüddin.*" This village and two nearby villages, associated with two sons of 'Atufi in local tradition, are inhabited by Alevi communities today. It is impossible to reconstruct the trajectory of the village in the late fifteenth and the early sixteenth centuries on the basis of this sparse evidence, even though the name of Kutlu Melek is tempting to conjecture on the influence of the cult of Hacı Bektash there. A lady with that name is one of the key characters in the vita of the holy man and in the later Bektashi tradition; see *Velāyetnāme: Hacı Bektaş Veli*, ed. Hamiye Duran (Ankara, 2007), 210–11. Note that in the village named Ya'qub, allegedly after the name of Hayrüddin Hızır's son, part of the revenue is endowed to the zāwiya of Shaykh Cu'ī [Jū'ī] (fl. first half of the fifteenth century), a Mevlevi.
 62. His biography and the names of his teachers are given by Taşköprülüzade, *Eş-şekā'iku'n-nu'māniyye*, 416–17.
 63. On Hocaşade, see *TDVİA*, s.v. "Hocaşade Muslihüddin Efendi," by Saffet Köse.
 64. Uzunçarşılı, *Çandarlı Vezir Ailesi* (Ankara, 1986); and *TDVİA*, s.v. "Çandarlı İbrahim Paşa," by Münir Aktepe.
 65. These are A. 2094 and A. 2095; the citation is on 1a of the former.
 66. Taşköprülüzade, *Eş-şekā'iku'n-nu'māniyye*, 416.
 67. BOA, Cevdet/Evkaf 33 (24 Sha'ban 1236/April 24, 1824). The lady who successfully petitioned for her case in 1824 refers to our librarian-scholar as "*ceddim merḥūm 'Atufi* (my ancestor 'Atufi, may he be pardoned)."
 68. There are two copies of 'Atufi's gloss in TSMK, A. 1798 and A. 1832, and one in SK, Ayasofya 2235. The date of completion is given on 64a of A. 1832, which also includes (on 63a/b) a letter from 'Atufi to the sultan asking for his imperial favor.
 69. TSMK, A. 607.
 70. SK, Ayasofya 399.
 71. I rely here mostly on Hızır Yağcı, *Atufi'nin Hadis Şerhçiliği* (Istanbul, 2018).
 72. *İbretnāme*, in Uppsala University Library, O St.71. See C. J. Tornberg, *Codices arabici, persici et turcici Bibliothecae Regiae Universitatis Upsaliensis* (Lund, 1849), no. 390, p. 253. A former owner of the manuscript identifies himself as "Adölf Feridrik Uştürsānbeker" (= Adolf Fredrik Sturtzenbecker, 1757–84) and gives his date of ownership as 1782 on the colophon page, which has been moved to the front of the codex, but the page number (in a European hand)

- is clearly 178. In other words, 178a is now in the position of 1a. Furthermore, some pages are missing and some seem to have been misplaced in the binding, judging by misalignments between the leads at the bottom of the recto pages and the first word of the following verso pages. The full manuscript in its current form has 108 folios and is available on <http://www.alvin-portal.org/alvin/view.jsf?pid=alvin-record%3A54361&dswid=9715> (last accessed April 12, 2019).
73. On the circulation and impact of ideas concerning world conquest and the end times in this era, throughout the Mediterranean and beyond, see the inspirational work of Cornell Fleischer, which circulated widely before its publication thanks to his generosity: "A Mediterranean Apocalypse: Prophecies of Empire in the Fifteenth and Sixteenth Centuries," *Journal of the Economic and Social History of the Orient* 61 (2018):18–90.
 74. Of the extant copies, the one in Hacı Selim Ağa Library, MS 230, is said to be an autograph; see *TDVİA*, s.v. "Atufi," by İsmail L. Çakan.
 75. *Ali bin Hüseyin el-Amāsi ve Tarīku'l-Edeb'i*, ed. Mehmet Şeker (Ankara, 2002), 132–33; p. 43 of the facsimile.
 76. The relevant parts of the text from al-Ghazzi's *al-Durr al-Nadīd fī Adab al-Mufīd wa al-Mustafīd*, completed in 1526, are translated in Ahmad Hikmat Sharkas, "Badr al-Dīn al-Ghazālī (904/1499–984/1577), and His Manual on Islamic Scholarship and Education" (PhD diss., Harvard University, 1976), 184ff.
 77. Houari Touati, *L'armoire à sagesse: Bibliothèques et collections en Islam* (Paris, 2003), 55–57; and Youssef Eche [=Yūsuf 'Ishsh], *Les bibliothèques arabes publiques et semi-publiques en Mésopotamie, en Syrie et en Égypte au Moyen Age* (Damascus, 1967), 70.
 78. See Zeren Tanındı's Appendix II in this volume.
 79. For identifications of books inventoried in MS Török F. 59 but now housed in these libraries endowed by members of the royal family, see the appendices in this volume, especially the appendix by Zeren Tanındı. See also Yavuz Sezer, "The Architecture of Bibliophilia: Eighteenth-Century Ottoman Libraries" (PhD diss., MIT, 2016).
 80. Hoca Sadeddin, *Tacü't-tevarih*, cited in Erünsal <https://www.academia.edu/7276501/Fatih_Sultan_Mehmed'in_Ilgi_Duydugu_Kitaplar_ve_Kütüphanesi-Tebliğ>. Also see Feridun Emecen, "Sefere Götürülen Defterlerin Defteri," in *Prof. Dr. Bekir Kütükoğlu'na Armağan* (Istanbul, 1991), 241–68.
 81. I am grateful to Simon Rettig, who kindly informed me of this book, and to Claus-Peter Haase, who generously shared the pertinent image. For the adventures of a manuscript, a copy of *Tafsīr-i Qāḍī*, which was returned to Herat after investigation by the court of Bursa in 1485, and verification of it as one of Shahrukh's endowed books, see the essay by Gülru Necipoğlu, who cites Erünsal, *Sahafılık ve Sahaflar*, 297n35.
 82. Thus surmised by Erünsal in *TDVİA*, s.v. "Mihri Hatun." See also Hakverdioğlu, *Mihri Hatun'u Anlamak: Tahlil* (Amas-
 - ya, 2016); and Didem Havlioğlu, *Mihri Hatun: Performance, Gender-Bending, and Subversion in Ottoman Intellectual History* (Syracuse, NY, 2017).
 83. For the special treatment given to this Sufi author, see the essay by Kafadar and Karamustafa in the present volume.
 84. To translate *marhūm* simply as "late, deceased, or departed," which are the standard renderings given in dictionaries, does not convey the reference to God's mercy (*rahmet*), implying "the one (whom one wishes to be) blessed with God's mercy," or perhaps simply "the forgiven."
 85. On Mü'eyyedzade's collections, see the essay by Judith Pfeiffer.
 86. *TDVİA*, s.v. "Abuşka Lugati," by Osman Fikri Sertkaya.
 87. On those instructions and principles, see the Turkish and the Arabic prefaces to the *Deft-i Kütüb*, and the discussion in the introductory essay by Gülru Necipoğlu.
 88. On the philosophical outlook that informed the epistemological underpinnings regarding the relationship among different fields of learning among Ottoman intellectuals in the fifteenth century and beyond, see the introductory essay by Cornell Fleischer.
 89. On the significance of and attitudes toward title pages in earlier Islamic book cultures, see the illuminating discussion by Touati, *L'armoire à sagesse*, 77ff.
 90. Tursun Bey, *Tarih-i Ebü'l-Feth*, 9.
 91. Rosenthal is referring to a manuscript, dated 1477–78, in the Carullah collection of the Millet Library; see his "A One-Volume Library of Arabic Philosophical and Scientific Texts in Istanbul," *Journal of American Oriental Society* 75 (1955): 14–23.
 92. Another copy of this vita was available in the palace library, now at SK, Ayasofya 2123, with the seal of Bayezid II on 1a and 619b, but that one obviously arrived after the completion of the inventory, since the copy was finished in 914/1508–9 according to the colophon on 620a. Also see Ahmet Zeki Velidi Togan, "Sur l'origine des Safavides," in *Mélanges Massignon*, vol. 3 (Damascus, 1957), 345–57. The author is known as Tawakkuli, but Togan intriguingly suggests the name might be "Tukli" (as in the name of Baba Tükles/Tükli; see *TDVİA*, s.v., "Baba Tükles," by Devin DeWeese).
 93. See Gülru Necipoğlu, Appendix III, no. 9.
 94. Bidlisī, *Sharḥ-i qaṣīda-yi khamrīya*, SK Ayasofya 4092, 82a. The manuscript was previously dated to 959/1551–52 due to confusion arising from the manner in which the number "zero" is written in the colophon, namely as a circle with a hole in its middle, which makes it look like a five; Brockelmann, for instance, designates the text as an autograph and gives the date of completion as 959 due to this "peculiar" rendering of zero. Orhan Başaran already identified the nature of the misreading in his "İdris-i Bitlisî'nin Şerh-i kasīde-i Hamriyye'si ve iki yazma nüshası," *Nüsha* 4 (2004): 9. For a full discussion of İdris's sojourn in Sofia and the two books he wrote there, see Markiewicz, "Crisis of Rule," 106ff. Confusion about the very same numbers with that spelling in MS Török F. 59, namely a misreading of 909 as 959, first

- led to misdating our inventory to the era of Süleyman I, which was later revised; see essay by Gülru Necipoğlu.
95. On the medieval libraries, see Touati, *L'armoire à sagesse*; and Eche, *Les bibliothèques arabes publiques*.
 96. On Maria Mavroudi's ongoing studies of the translations from Greek into Arabic made for Mehmed II, see, for instance, "Plethon as a Subversive and His Reception in the Islamic World" in *Power and Subversion in Byzantium*, ed. D. Angelov and M. Saxby (Ashgate Variorum, 2013), 177–204; and eadem, ""Translations From Greek into Arabic at the Court of Mehmed the Conqueror," in *The Byzantine Court: Source of Power and Culture. Papers From The Second International Sevgi Gönül Byzantine Studies Symposium*, (Istanbul, 2013), 195–207. Mehmed's interest in Greek and Latin learning is treated extensively in the introductory essay by Gülru Necipoğlu; see also her "Visual Cosmopolitanism and Creative Translation: Artistic Conversations with Renaissance Italy in Mehmed II's Constantinople" *Muqarnas* 29 (2012):1–81. It should also be noted that the palace treasury included a number of books in European languages, but those are not listed in 'Atufi's inventory and as such are beyond the scope of our study of MS Török F. 59. For those books, which are mentioned in some archival documents but not itemized, see again the introductory essay by Necipoğlu.

LIST OF ENTRIES

SECTION ON TRANSLATED BOOKS OF THE TORAH AND THE ZABUR/PSALMS AND
THE GOSPELS*(Taḥṣīl al-kutub al-mutarjamati min al-Tawrāti wa-al-Zabūri wa-al-Injīli)*

1. “*Tarjamatu al-Tawrāti bi-al-‘arabiyyati*” (Translation of the Torah into Arabic), 364 {11}. MANUSCRIPT: A. 3524 (Karatay A 5722). Seal of Bayezid II.
2. “*Tarjamatu al-Tawrāti bi-al-fārisiyyati*” (Translation of the Torah into Persian), 364 {11}.
3. “*Tarjamatu al-ṣuwari min al-Zabūri bi-al-‘arabiyyati*” (Translation of Verses from the Zabur/Psalms into Arabic), 364 {12}.
4. “*Kitābu mazāmīri Dāwud al-nabī -‘alayhi al-salāmu- bi-al-‘arabiyyati*” (The Psalms of David the Prophet—peace be upon him—in Arabic), 364 {12–13}. MANUSCRIPT: A. 3521 (Karatay, A 5719, though he speculates it is a manuscript of the 18th century). Seal of Bayezid II.
5. Same as above, 364 {13–14}.
6. “*Tarjamatu al-Injīli bi-al-‘arabiyyati ‘alā mā katabahu arba‘atun min al-Ḥawāriyyīn*” (Translation of the Gospels into Arabic according to What Four of the Apostles Wrote), 364 {14–15}. MANUSCRIPT: A. 3519 (Karatay, A 5724, though he speculates it is a manuscript of the 18th century). See the essay by Zeynep Atbaş, below. Seal of Bayezid II.
7. “*Injilun fārisiyyun wa-huwa Injīlu Mattā wa-Marqus wa-Lūqā wa-Yuḥannā*” (The Gospels in Persian, Which Are the Gospels of Matthew, Mark, Luke, and John), 364 {15–16}.
8. No note of *fi mujalladin wāḥidin*, but items separated with *wa-* and are identified as being in one volume. MANUSCRIPT: R. 1927 (Karatay, F 97). Seal of Bayezid II.
- 8a. “*Tarjamatu Injīli Mattā bi-al-fārisiyyati*” (Translation of the Gospel of Matthew into Persian), 364 {16–17}.
- 8b. “*Tarjamatu Injīli Marqus bi-al-fārisiyyati*” (Translation of the Gospel of Mark into Persian), 364 {17}.
- 8c. “*Tarjamatu Injīli Lūqā bi-al-fārisiyyati*” (Translation of the Gospel of Luke into Persian), 364 {17–18}.
- 8d. “*Tarjamatu Injīli Yuḥannā bi-al-fārisiyyati*” (Translation of the Gospel of John into Persian), 364 {18}.
9. “*Tarjamatu al-Injīli bi-al-‘arabiyyati*” (Translation of the Gospels into Arabic), 364 {19}.
10. “*Arba‘u anājili bi-al-‘arabiyyati al-manẓūmati wa-bi-al-fārisiyyati al-manẓūmati*” (The Four Gospels in Arabic Verse and in Persian Verse), 364 {19}–365 {1}.
11. “*Zabūrun mutarjamun bi-al-‘arabiyyati*” (The Zabur/Psalms Translated into Arabic), 365 {1}.

APPENDIX:
NOTES AND OBSERVATIONS ON SOME MANUSCRIPTS
RELEVANT FOR UNDERSTANDING THE COMPILATION OF THE INVENTORY

HERAT NATIONAL ARCHIVE

1. HNA 107: *Tadhkiratu al-awliyā'i* [could be one of several entries in MS Török F. 59]. Dated 670(?)/1272. From the library of Shakhruh in Herat. Seal of Bayezid II. (PLATE 1)

BURSA İNEBEY LIBRARY

2. Haraççı 913 [= 244 {19}]. *Dīwānu al-marḥūmi Jam [Cem] bin Sultān Meḥammed Khān -ṭayyaba Allāhu ta'ālā tharāhumā-*. Title given by 'Atufi on the first page is the same as the title in the inventory. A marginal note on the upper left, with the year of Cem's demise (900/1495), also speaks of his death by poison and mistreatment by the pope. No seal of Bayezid II, perhaps effaced, but it also looks like the lower part of the relevant page is damaged. (PLATE 2)

TOPKAPI PALACE MUSEUM LIBRARY

3. A. 23 (Karatay: F 3) [= 22 {16–17}]. The work known as *Kashf al-asrār va 'uddat al-abrār* is listed by 'Atufi consistently as: *Kitābu kashfī al-asrāri wa-'umdati al-abrāri fī al-tafsīri bi-al-fārisiyyati*. Bayezid's seal on 1a and 466b. The exegetical work of Maybudi (d. after 1126), written in 1126 as a commentary on that of al-Ansari (d. 1088). See no. 92 in list by Mohsen Goudarzi. The inventory mentions two more copies. In each case, 'Atufi mentions that it is all "in a single volume," even though no other texts are bound with it, presumably because of its huge size. There are two owner's notes on 1a, indicating stages in the manuscripts's life story before it reached the imperial collection: one by a scribe dated 823/1420–21, and the other by a preacher dated 873/1468–69.
4. A. 32 (Karatay: T 3087) [= 26 {8–9}]. On 1a, there is a title in 'Atufi's style but not in his hand: *Kitābu al-tafsīri bi-al-turkiyyati*. This MS is likely to be another, a later, copy than the one listed in the inventory: *Kitābu jawāhiri al-aṣḍāfi bi al-turkiyyati fī mujalladayni fī al-tafsīri*, an early Qur'an commentary in Anatolian Turkish, commissioned by Isfendiyar b. Bayezid (d. 1440) of the Candaroğulları. Copied by Ayas b. Muhammad in 913/1508, this MS must have arrived in the palace after the compilation of the inventory. Seal of Bayezid II on 1a and 331b. In the palace library there is currently one other copy of this important text; that manuscript (H. 22, Karatay: T 20) with no sign of 'Atufi's hand or seal of Bayezid II, must have entered the imperial collection much later, as it has several ownership records from the end of the seventeenth century.
5. A. 443 (Karatay: A 2899) [does not match but is related to 303 {17–18}]. 'Atufi lists one of his own works in the inventory as: *Risālatu ramzi al-daqa'iqi fī 'ilmi al-daqa'iqi wa-huwa al-'ilmu bi-al-ru'yā al-ṣādiqati al-badaniyyati li-aḍ'āfi al-'ibādi al-'Aṭūfi -'uḍfiya 'anhu*. The title given on 1a of this manuscript, *Anzāru sharḥi al-Mashāriqi ma'a khātimati fī 'ilmi al-daqa'iqi wa huwa 'ilmu al-ta'bīri al-badani muswaddati Khiḍr al-'Aṭūfi*, suggests that it may been a later redaction of the one that made it to the inventory. Karatay gives the completion date as 911/1505. Seal of Bayezid on 1a and 99a. See essay above.

6. A. 1402 (Karatay: A 5210) [= 108 {13–14} or 138 {10–11}]. ‘Atufi: *Kitābu ādābi al-dārayni min qibali al-taṣawwufi*. Title on the sticky label of the binding: *Kitābu ādābi al-dārayni bi-al-‘adli*. Of the two entries in the inventory, the one on 108 matches the title as given on 1a; the one on 138 matches the label but adds *fi al-naṣīhati*. Colophon in red ink on 401a indicates that it was copied in 815/1412–13. Illuminated roundel (1a) gives author’s name as al-Mubarak al-Badri al-Mawsili. Seal of Bayezid II on 1a and 401b.
7. A. 1411 (Karatay: A 8675) [= 140 {10–11}]. ‘Atufi on 3a: *Kitābu al-iṣṭilāḥāti li-l-Qāshānī fi al-taṣawwufi wa-Kitābu al-ishārāti li-Ibn Sīnā fi al-ḥikmati al-falsafyyati*. Title on the sticky label of the binding: *Kitāb al-iṣṭilāḥāt al-sūfiyya*. Two texts in one volume: 3a–107a; 109a–249a. Illuminated roundels for both texts, on 3a and 109a, respectively. 3a also has alternative (not preferred?) title, written diagonally on the lower left, possibly by the same hand: *Kitābu al-iṣṭilāḥāti li-l-Qāshānī -ṭāba tharāhu- wa-fi al-taṣawwufi wa-Kitābu al-ishārāti li-Abī Alī fi al-ḥikmati*. On 1a, there is a shorter title, by a later (?) hand: *Iṣṭilāḥāt li-l-Qashānī wa-Ishārāt li-Ibn Sīnā*, under a largely-written *taṣawwuf*. Colophon on 249a indicates that the copies were completed in 867/1462–63 for Mehmed II in Bosnia, where he was on campaign. Seal of Bayezid II on 3a and 249a. (PLATE 3)
8. A. 1417 (Karatay: A 5035) [= 145 {7}]. ‘Atufi on 1a: *Kitābu al-dharī‘ati fi makārimi al-akhlāqi fi al-naṣā’ihī*. The flyleaf has evidence of other thoughts on title and category, written diagonally, not in ‘Atufi’s hand: *Kitāb al-dharī‘a ilā makārim al-sharī‘a fi al-akhlāq ‘ilm al-taṣawwuf*, [modified with] *min qibali*. Like the one above, this manuscript bears evidence of the labor that went into the making of the inventory. Illuminated roundel identifies author as al-Raghib al-Isfahani (d. early eleventh century) and that the copy is for the perusal of Mehmed II. Seal of Bayezid II on 1a and 108b.
9. A. 1425 (Karatay: A 5117) [= 109 {14}]. ‘Atufi’s title on 1a, *Kitābu zubdati al-taḥqīqi fi sharḥi al-Nuṣūṣi fi al-taṣawwufi*, matches the one in the inventory. Sticky label on the binding has the same title. Commentary on Qonawī’s *Nuṣūṣ*. Author identified on 1a, not in ‘Atufi’s hand: Piri Muhammad b. Qutb al-Din ibn Hasan al-Khawa’ini al-Hanafi (d. 1460?). Colophon on 172b indicates that the copy was completed in 880/1475–76. Seal of Bayezid II on 1a and 172b.
10. A. 1453 (Karatay: A 5114) [= 139 {16–17}]. ‘Atufi on 2a: *Kitābu al-tadhkirati bi-umūri al-ākhirati li-l-Qurṭubī - raḥimahū Allāhu ta‘ālā - min qibali al-taṣawwufi*. Sticky label has the same title but without the prayer formula; the same work is listed in the inventory as being *min qibali al-naṣīhati*. Another title given on 1a, not in ‘Atufi’s hand, follows the one as given in the illuminated roundel on 2a: *Kitāb al-tadhkira bi-aḥwāl al-mawtā wa-umūr al-ākhirā*, with the additional note that it (this title?) was written on 4 Ramadan 902 / 6 May 1497, which suggests an earlier librarian’s hand, whose title was not preferred. Colophon on 253a indicates that the copy was completed in Ramadan 772/March–April 1371. Seal of Bayezid II on 2a and 253a.
11. A. 1465 (Karatay: F 57) [= 253 {15}]. ‘Atufi on 1a gives the same title, *Kitābu kunūzi al-ḥaqā’iqi min qibali al-taṣawwufi*, as the one in the inventory. Title given in roundel on 1a, not in ‘Atufi’s hand: *Kitāb kunūz al-ḥaqā’iqi rumūz al-daqa’iq*. Sticky label on the binding has *Kitāb kunūz al-ḥaqā’iq fārisī*, and indicates number of lines per page, as is the convention of another (later?) librarian. Bayezid’s seal on 1a and 210b. See list by Sooyong Kim.
12. A. 1473 (Karatay: F 53) [= 117 {11}]. ‘Atufi on 2a: *Kitābu ḥaqqi al-yaqīni bi-al-fārisiyyati min qibali al-taṣawwufi*. This matches perfectly the entry in the inventory and the sticky label on the binding. The author, identified on 2b within the text, is Mahmud al-Shabistari (d. 1317). Seal of Bayezid II on 1a and 37b.

13. A. 1474 (Karatay: F 66) [= 116 {15–16}]. ‘Atufi on 1a: *al-Risālatu al-dhawqīyyatu li-Mawlānā Hūsām al-dīn -raḥimahū Allāhu ta‘ālā- fi al-taṣawwufi*. This matches perfectly the entry in the inventory as well as the sticky label on the binding. Autograph copy by Hūsamzade el-Bursevi (d. after 1488), according to colophon in red ink on 107b. Seal of Bayezid II on 1a and 107b. TDVIA, s.v. “Hūsamzade Mustafa Efendi,” by İlyas Çelebi, cites another autography copy in SK, Hacı Mahmud Efendi 3121.
14. A. 1490 (Karatay: F 96) [missing from the inventory]. Title on 1a: *Sharḥu al-Asmā’i al-ḥusnā al-mawsūmu bi-Mir’āti al-salāṭini bi-al-fārisiyyati*. Colophon on 116a indicates that it is an author’s copy written in 909/1503–4 in Mecca by the hand of the author, Mawlana Sufi Samarqandi *sākin fi madrasati Sulṭān al-Miṣr min aṣḥābi Shaykh ‘Alāu’d-dawla Simnānī*. This manuscript must have arrived in the palace after the inventory was compiled. Bayezid’s seal on 1a and 116a. Also see Appendix III by Gülru Necipoğlu.
15. A. 1498 (Karatay: A 5181) [missing from the inventory]. Title given in illuminated roundel on 7a: *Tuḥaf al-asāṭin li-‘ayn al-salāṭin*. Earlier pages include *taqrīzes* (expansive blurbs) and a table of contents, which are added after the completion of the work in June 1501. Arrival of MS probably late to be included in the inventory. Seal of Bayezid II on 194a. Also see Appendix III by Gülru Necipoğlu.
16. A. 1506 (Karatay: A 5090) [missing from the inventory?]. Title on 2a: *Kitābu al-fuṣūṣi li-l- Shaykh al-Imām al-‘Ālim fi al-taṣawwufi ... Muḥyi al-millati wa-al-dīni ... al-Andalusī-raḍiyya Allāhu ‘anhu*. “*Fi al-taṣawwufi*” is inserted later, suggesting an ‘Atufi-style title, but even the first half of this title has no match in the inventory. Seal of Bayezid II on 2a and 103a.
17. A. 1507 (Karatay: F 43) [= 109 {14–15}]. ‘Atufi: *Kitābu nuṣūṣi al-khuṣūṣi fi sharḥi al-Fuṣūṣi bi-al-fārisiyya fi al-taṣawwufi*. Same title written by the same hand on the sticky label of the binding. The author refers to himself as “Rukn-i Shirazi” on 529a. Karatay suggests Rukn al-Din Mas‘ud al-Shirazi al-Astarabadi (d. 1539–40), but it is Mas‘ud bin Abdullah Baydawi (d. 2nd half of the 14th century), also known as Baba Rukn al-Din, a student of ‘Abd al-Razzaq al-Qashani and Dawud al-Qaysari. Seal of Bayezid II on 1a and 527b.
18. A. 1551 (Karatay: A 5004) [not in the inventory]. Title given on the flyleaf, with no indication of the field, is not in ‘Atufi’s hand: *Kitāb būstān al-‘arīfīn*. Karatay gives the author as Abu al-Layth Nasr b. Muhammad b. Ahmad b. Ibrahim al-Samarqandi (d. 373/983). It was clearly acquired after the inventory was prepared, but note that another copy receives an entry in the inventory on 98 {5–6}, which ‘Atufi classifies as “pertaining to jurisprudence”: *Kitābu al-bustāni li-l-Imām Abī al-Layth min qibali al-fiqhi*. Colophon on 174b indicates that it was copied in 901/1495–96. Seal of Süleyman I on 1a.
19. A. 1572 (Karatay: A 5119) [= 110 {10–13}]. *Kitābu miṣbāḥi al-unsi fi sharḥi Miṣṭāḥi al-ghaybi fi al-taṣawwufi wa-Risālatu al-asrāri al-ilāhiyyati al-murattabati ‘alā alfi maqāmīn min maqāmāti allatī bayna al-‘abdi wa-al-rabbī fi al-taṣawwufi fi mujalladin wāḥidin*. The first text is a commentary on al-Qonawi’s *Miṣṭāḥ* by the famous Ottoman scholar Muhammad b. Hamza b. Muhammad al-Fanari (d. 1431). Seal of Bayezid II on 1a and 344a.
20. A. 1584 (Karatay: A 8688 [not in the inventory]). A table of contents on 1a, *Fihrist mā fi hādḥā al-rasā’il* itemizes 19 pieces. A note on the same page says these treatises were “compiled in this volume by ... ibn Mu‘ayyad,” namely Mü‘eyyadzade (d. 1516), one of Bayezid’s companions from Amasya, and a distinguished jurist during his reign, in the year 919/1508–9. It starts on 1b with “*Kitāb al-mabdā’ wa al-ma‘ād*.” In the horizontal form of a *saḥīfa*, or *cönk*. There is no sign of ‘Atufi or seal of Bayezid II, in keeping with the key date concerning the dispersal of Mü‘eyyadzade’s

books, namely his death. For the adventures and contents of Mü'eyyeddade's book collection, see the essay by Judith Pfeiffer.

21. A. 1597 (Karatay: A 5168) [= 194 {14–15}]. Title given on 1a, *Kitābu naẓmi al-sulūki fī musāmarati al-mulūki fī al-tawārikhi*, could be 'Atufi, but note the unusual use of red ink, except for the first and the final word, which might be all that 'Atufi added to make the title conform to his style. The entry in the inventory adds the word *al-gharibati* after identifying it as a work of history. The flyleaf has: *Naẓm al-sulūk fī musāmarat al-mulūk fī al-tawārikh li-Aḥmad al-Ḥanaḩī*. The full name of the author is given on 1a as 'Abd al-Raḩmān b. Muḩammad b. 'Alī b. Aḩmad al-Ḥanaḩī *madhhaban al-Biṣṭāmī mashraban*. Seal of Bayezid II on 1a. For a full discussion of this unique work, see the introductory essay by Cornell Fleischer.
22. A. 1735 (Karatay: A 4945) [= 63 {14–15}]. 'Atufi on 1a: *al-Risālatu al-hādiyatū fī ibṭālī adillati ḩujajī al-yahūdī 'alā al-islāmi min qibali 'ilmi al-kalāmi*. Sticky label on the binding has the same, omitting the words *adillati* (crossed through on the title page) and *min qibali*. Also on 1a is another title by a different hand, *al-Risāla al-hādiya fī ibṭāl adilla al-yahūd*, indicating that it (this note?) was written (by the librarian who preceded 'Atufi?) on 19 C.II 902 / 22 February 1497 (see no. 10 above). Seal of Bayezid II on 2a and 37a. (PLATE 4)
23. A. 2535 (Karatay: A 5019) [= 250 {12–13}]. The title given by 'Atufi on 1a, *Majmū'atun ākhiruhā Gulshan-i rāz bi-al-fārisiyyati al-manzūmati*, perfectly matches the one in the inventory. While the first and longer work in this two-work volume, *Yawāqūt al-mawāqūt* by al-Tha'alibi (d. 1038), is not mentioned in either those two instances, it is included in an alternative title, also on 1a, which reads as if it, too, may have been coined by 'Atufi's team: *Kitābu al-Yawāqiti wa-kitābu Gulshan-i rāz min qibali al-taṣawwufi*, but curiously not incorporated into the final version at the expense of the earlier, and larger, part of this two-text volume, even though it did not present any problem for identification. Yet another title appears on the spine: *Majmū'atun awwaluhā Yawāqūt al-mawāqit wa ākhiruhā Gulshan-i Rāz-i Shaykh. Gulshan-i rāz* begins on 299a. Colophon on 347b indicates that the copying was completed in 878/1473–74 by the hand of *al-faqīr al-ḩaqīr Mas'ūd*. The flyleaf has "*odadan çıkan*," indicating that it was moved from the Privy Chamber to the Inner Treasury, without providing information on the language of the text as these notes often do. Seal of Bayezid II on 1a and 347b.
24. A. 2698 (Karatay: A 8732) [= 296 {3–8}]. Title given on 1a, not in 'Atufi's hand, is simply: *Tuḩfat al-hādiya*. Full title in the inventory, on the other hand, is detailed: *Kitābu tuḩfati al-hādiyatī al-mutarjamu bi-al-turkiyyati wa-al-rūmiyyati wa-al-afranjiyyati wa-ghayrihā fī lughati al-fursi wa-Kitābu Īsāghūjī 'alā al-lughati al-'arabiyyati al-mutarjamu bi-al-yūnāniyyati fī al-manṭiqi wa-Risālatu al-amthilati al-muṭṭari[da]ti al-mutarjamati bi-al-fārisiyyati wa-ghayrihā wa-Risālatun fī al-'ulūmi al-ḩikamiyyati wa-Risālatun fī taṣḩiḩi asāmī al-ḩukamā'i al-yūnāniyyati wa-Risālatun fī iṣṭilāḩātī 'ulamā'i al-hay'ati 'alā al-lughati al-yūnāniyyati fī mujalladin wāḩidin*. The author/editor, Muhammad bin Hajji Ilyas, is identified on 1b. Seal of Bayezid II on 1a and 91b. See Appendix III by Gülru Necipoğlu.
25. A. 2732 (Karatay: F 304) [= 298 {6–12}]. *Jāmi' al-lughat*, thus titled on 1a but not by 'Atufi, is a scribal handbook of lexical and grammatical items, compiled by Siraj bin Tayyib bin Ahmad, a court clerk (*nā'ib*) in Edirne in 867/1463. The sticky label largely follows the inventory where 'Atufi, perhaps because he knew the author, a fellow-Amasyan, lists the separate items by title: *Kitābu al-asmā'i 'alā tartibi al-ḩurūfi wa-Kitābu al-lughati al-fārisiyyati 'alā tartibi al-ḩurūfi wa-al-ḩarakāti wa-Kitābu al-lughati al-mutarjamu bi-al-fārisiyyati 'alā tartibi al-ḩurūfi wa-al-ḩarakāti [wa-]Risālatu al-amthilati al-taṣriḩiyyati bi-al-quyūdi al-turkiyyati wa-Risālatun fī maktūbātīn*

- sharʿiyyatin wa-Kitābu mirqāti al-adabi al-manẓūmu wa-Kitābu tuḥfati ʿAlāʾi al-manẓūmu wa-Kitābu niṣābi al-ṣibyāni al-manẓūmu wa-Kitābu naṣibi al-fityāni al-manẓūmu wa-Kitābu ʿuqūdi al-jawāhiri [al-]manẓūmu Ḥamd u thanā fi mujalladin wāhidin.* Colophons at the end of each section, e.g., on 96b, 207a–b, 238b, 263b–264a, where the author/editor/copyist identifies himself as *Sirāj b. Ṭayyib al-Ṣūnisāʾi*. The flyleaf gives the further detail that he is from the village of *Eyrek* (thus vocalized), which is in Amasya. Seal of Bayezid II on 1a. For some items, see list by Tahera Qutbuddin. (PLATE 5 [1–2])
26. A. 3000 (Karatay: A 6170) [= 184 {9} or 184 {13}]. Title given by ʿAtufi on 1a for this popular history of Mahmud of Ghazna (d. 1030) and his age by ʿUtbi (d. 1036): *Kitābu tawārikhi al-ʿUtbī*. Title on the edge [not the binding]: *Kitābu tawārikhi al-ʿUtbī*. Seal of Bayezid II on 299b.
 27. A. 3126 (Karatay: A 8739) [= 100 {5–6}]. ʿAtufi: *Kitābu sharḥi al-Farāʾidi bi-Sirāj al-Dīn fi al-fiqhi wa-Kitābu minhāji al-ʿābidīna li-l-Imām al-Ghazālī [-quddisa sirruhu- added in the inventory] fi al-taṣawwufi*. Full name of the author of the *Farāʾid*, on which al-Jurjani wrote this commentary that constitutes the first part of the two-work volume, is given on 1b as Muhammad b. Muhammad b. ʿAbd al-Rashid al-Sajawandi (d. 1203). Colophons at the end of each section: on 95b, indicating that it was completed in 839/1435–36; and on 254a, indicating that it was completed in 859/1454–55. Seal of Bayezid II on 1a and 254b.
 28. A. 3372 (Karatay: A 6849) [= 341 {11}]. ʿAtufi on 1a: *Kitābu jāmiʿi al-daqaʾiqi fi al-manṭiqi*. Colophon on 124a indicates that it was copied by Hinduṣāh b. Sanjar in 673/1274–75 in the Nizāmiyya madrasa in Baghdad. The same page offers another title: *Kitābu jāmiʿi al-daqaʾiqi fi al-ḥaqāʾiqi* (in red ink). Seal of Bayezid II on 1a and 124b. (PLATE 6 [1–2])
 29. A. 3412 (Karatay: A 6854) [not in the inventory?]. Title by ʿAtufi in the middle of a very crowded page, on 1a, *Sharḥu Maṭāliʿi al-anwāri al-musammā bi-al-Lawāmiʿi al-afkāri fi al-manṭiqi wa-al-ḥikmatī al-islāmiyyati*, does not have a precise match in the inventory, where the relevant entry reads (on 340 {4–5}): *Lawāmiʿu al-afkāri fi sharḥi Maṭāliʿi al-anwāri fi al-manṭiqi wa-al-ḥikmatī al-islāmiyyati*. Title on the sticky label of the binding: *Sharḥu gharibin li-l-Maṭāliʿ*. Title on the flyleaf: *Hādhā sharḥu gharibin li-l-Maṭāliʿ maʿa ḥikamīyya*. Colophon on 311a gives the date of completion as 693/1293–94. Seal of Bayezid II on 1a and 311b.
 30. A. 3421 (Karatay: A 6859) [= 340 {5–6}]. ʿAtufi's title on 1a, *Maṭāliʿu al-anwāri fi al-manṭiqi wa-al-ḥikmatī al-islāmiyyati*, is the same as the one in the inventory. Title on the sticky label of the binding: *Maṭāliʿu al-anwāri fi al-manṭiqi*. Title on the endpaper: *Maṭāliʿ al-anwār*. Colophon on 210a indicates that it was copied in 713/1313–14. Seal of Bayezid II on flyleaf and 209b. (PLATE 7)
 31. A. 3429 (Karatay: A 6851) [= 341 {1–2}]. The unusual title given by ʿAtufi on 1a, *Matnu maṭāliʿi al-anwāri fi al-manṭiqi faqat*, perfectly matches the one in the inventory. Is “*faqat*” meant to refer to the fact that this text is on its own, without a commentary, or to the category (“of logic only”) ? Title on the sticky label of the binding: *Maṭāliʿ al-anwār*. Title on the endpaper: *Maṭāliʿ*. The copy was made for the grand vizier Mahmud Pasha (d. 1474) (see note on 1a). Seal of Bayezid II on 1a. (PLATE 8)
 32. A. 3432 (Karatay: A 6891) [= 342 {18–19}]. The title given by ʿAtufi on 1a, *Kitābu al-mubīni fi sharḥi al-matīni fi al-manṭiqi*, is the same as the one in the inventory. Seal of Bayezid II on 1a and 263b. For this book, dedicated to Mehmed II, see essay by Khaled El-Rouayheb, list by El-Rouayheb and Didar Akbulut, and essay and Appendix III by Gülru Necipoğlu.
 33. A. 3437 (Karatay: A 6853) [340 {4–5}]. ʿAtufi on 1a gives the same title, *Lawāmiʿu al-afkāri fi sharḥi Maṭāliʿi al-anwāri fi al-manṭiqi wa-al-ḥikmatī al-islāmiyyati*, as the one in the inventory. Title on the sticky label of the binding: *Lawāmiʿ al-afkār fi sharḥ Lawāmiʿ al-nūr*. Note on the colophon

indicates that the copy of Qutb al-Din al-Razi's (d. 1365) commentary on Siraj al-Din al-Urmawi's (d. 1283) book on logic was made for the personal study of Mehmed II in 877/1472–73 by the hand of Yusuf b. Husayn al-Siwasi. Seal of Bayezid II on 1a and 463b. For the four interrelated items here, nos. 29–31 and no. 33, see essay by Khaled El-Rouayheb and list by El-Rouayheb and Didar Akbulut. (PLATE 9)

34. H. 270 (Karatay: F 915) [= 123 {18–19}]. The title given by 'Atufi for the two-work volume on 1a, *Kitābu jāmi-jihān-numā' fi al-taṣawwufi wa-Kitābu al-lama'āti fi al-'ishq min qibali al-taṣawwufi*, is the same as the one in the inventory. The first text ends on 16a; the colophon on 55a announces the completion of the second piece, *tammāt al-Lama'āt al-qudsiyya fi al-'ishq*, but does not give a date. Seal of Bayezid II on 55a (seal inside the text frame, almost over the text).
35. H. 1123 (Karatay: no entry) [= 249 {19}]. The title on 1a, *Kitāb-i naẓm-i kışsa-i Sulṭān Bāyezīd*, is rendered *Naẓmu Qışṣah-i Sulṭān Bāyezīd Khān -khallada Allāhu ta'ālā khilāfatahu* in the inventory for this work in Persian. The same title appears on the sticky label. The inventory neither names the author, who appears on 1b as *Malik-i Āhī*, nor mentions the fact that the manuscript is illustrated. Seal of Bayezid II on 1a and 98b. See essays by Sooyong Kim, Gülru Necipoğlu, and Zeren Tanındı, and Appendix III by Gülru Necipoğlu.
36. H. 1417 (Karatay: F 155) [= 252 {5–6}]. The title given on 2a, *Naẓm-i tawārīkh-i Sulṭān Meḥammed Khān b. Murād Khān wa-ghayruhu bi-al-fārisiyya*, is expanded in the inventory with a prayer formula, as in the case of H.1123 above: *Naẓm-i tawārīkh-i Sulṭān Meḥammed Khān bin Murād Khān -khullidat khilāfatuhum* [sic]- *wa-ghayruhu bi-al-fārisiyyati*. The author, Mīr Sayyid 'Alī b. Muẓaffar al-Tūsī, gives his pen name, *Ma'ālī*, twice within the text, on 5b and 183b. Seal of Bayezid II on 1a and 183b. See Appendix I by Zeynep Atbaş and Appendix III by Gülru Necipoğlu. (PLATE 10 [1–2])
37. R. 474 (Karatay: F 52) [= 111 {8–9}]. On 1a, 'Atufi gives the same title, *Kitābu sharḥi Gulshan-i rāz al-mawsūmu bi-Shaqā'iqi al-ḥaqā'iqi bi-al-fārisiyyati fi al-taṣawwufi*, as the one in the inventory as well as the one on the sticky label on the binding. On the flyleaf is a note in Persian, which explains that this work was written by Ahmed-i Ilahi as a gift for the sultan. Inside the text, the author's name appears on 5a and that of the sultan, in gilded letters, on 5b. Seal of Bayezid II on 1a and 180b. (PLATE 11 [1–3])
38. R. 475 (Karatay: F 65) [= 144 {12–13}]. Title by 'Atufi on 1a, *al-Risālatu al-sharīfatu bi-khaṭṭin dīwāniyyin bi-al-fārisiyyati fi al-taṣawwufi*, perfectly matches the one in the inventory. Colophon on 23a mentions that the work was completed in 883/1478–79 in Īskandariyya [i.e., Shkoder where Mehmed II laid siege in that year] by the hand of Sayyidi Muhammad al-Munshi al-Sultani, a scribe in the imperial chancery. The manuscript is distinguished by its exquisite hand, which leads 'Atufi to make one of his rare observations on the script. On 1b, the basmala is illuminated in an ornate frame. Karatay considers this Muhammad to be the copyist of an "anonymous" treatise, but the scribe seems to have compiled the text himself from various works of classical Sufi authors whom he names on 2a. Seal of Bayezid II on 1a and 23b.
39. R. 1270 (Karatay: T 627) [not in the inventory]. *Sulṭān Bāyezīd Ḥān Ġāzī Sulṭān Cem mābeynlerinde olan vāqı'a-i 'aẓīm ve gayrīdür zikr olunur* (The big event that transpired between Sultan Bayezid and Sultan Cem, and other events, are memorialized [in this work]). On 1a, there is also the title: *Kitāb-i Vaḳ'anāme-i Sulṭān Bāyezīd Ḥān bā Sulṭān Cem*. This chronicle by Behiṣṭi covers not only the events that transpired between the two brothers, as both titles promise, but also the reign of Sultan Bayezid II until 907/1501–2. Considering that the book is written for Bayezid and ends its coverage just before 'Atufi was commissioned to do his work, one might expect that the inventory should mention a copy of it, and that the palace library would have a copy with this sultan's

seal and 'Atufi's hand. But Behiştî evidently continued to work on his chronicle until at least 1511. On 1a, this very interesting copy has a note, which says that it once belonged to Kâtib Çelebi (*merhûm Kâtib Çelebi nüshalarındandır*). On 62a and 62b, there are notes by a seventeenth-century owner, with various words spelled in the vernacular rather than "correctly," including: *receb 'ayında çarşenbe günü galebe oldu perşenbe günü ikindiyyin sulţân 'oşmân'ı boğdular cum'a günü namâzın kıldılar* (there was commotion in the month of Rajab on Wednesday, they strangled Sultan Osman in the afternoon on Thursday, they performed the ritual prayer of death on Friday), perhaps considered appropriate on the flyleaf of a book on the battles of two princes and the demise of one of them. (PLATE 12 [1–2])

40. R. 1465 (Karatay: T 1011) [= 185 {5}]. The title by 'Atufi on 1a, *Tarjamatu Kitâbi al-mu'jami fi al-tawârikhi bi-al-turkiyyati li-Tâj-zâdah (Tâcizâde) -rahîmahu Allâhu ta'âlâ- fi al-tawârikhi*, matches those in the inventory and the sticky label on the binding. The illuminated roundel on the same page indicates that the work was undertaken by order of the sultan. Seal of Bayezid II on 1a and 132a. See no. 44 in Appendix III by Gülru Necipoğlu.
41. R. 1563 (Karatay: A 5772) [possibly the eighth of the twelve-volume set listed on 182 {18}]. No evidence of the hand of 'Atufi or his team on the manuscript. Title assigned by a different hand, in a larger script, on 1a: *Al-mujallad al-thâmin min al-kâmil fi al-tâ'rikh li-Ibn al-Athîr*. The same title is repeated lower on the same page, with an indication of the number of lines per page. Colophon on 245a indicates that it was copied in 764/1362–63. Seal of Bayezid II on 1a and 245b.
42. R. 1927 (Karatay: F 97) [= 364 {16–18}]. Same title by 'Atufi on 1a and on the sticky label of the binding: *Tarjamatu Injîli Mattâ bi-al-fârisiyyati va Tarjamatu Injîli Marqus bi-al-fârisiyyati va Tarjamatu Injîli Lûqâ bi-al-fârisiyyati va Tarjamatu Injîli Yuhannâ bi-al-fârisiyyati*. Two other titles are given on 1a: *Injîl fârisî*, above the one by 'Atufi, and *Tarjamatu Injîli arba'ati bi-al-fârisî* [sic] below it, with indication of script and number of lines per page. Bayezid's seal on 1a and 93b. Colophon on 93b indicates that it was copied in 863/1458–59. (PLATE 14)

NURUOSMANIYE LIBRARY

43. Nuruosmaniye 1984 (formerly, 2398) [= 127 {9–11}]. Title on the binding: *Risâlatun sharîfatun fi tahqîqi subhânaka mâ 'arafnâka haqqa ma'rîfatika min qibali al-taşawwufi*. The inventory lists three texts, all of them by Kutbeddinzade, in one volume. A folio made up of a new and different kind of paper inserted between the binding and 1a; the original 1a, where Bayezid II's seal and 'Atufi's note would have been, is covered, but the palimpsest of the seal is visible on 1b. Seal of Bayezid II on 38a. (PLATE 32 [1–4])

SÜLEYMANIYE LIBRARY

FATİH

44. Fatih 722 [not in the inventory]. *Al-Juz' al-awwal min Kitâb jâmi' al-uşûl fi al-aḥādîth al-rasûl*. There is no precise match with the inventory since this MS was endowed to the book collection of Mehmed II's mosque-madrasa complex. Colophon on 230a indicates that it was copied in 743/1342–43. Shaykh 'Ali bin Majdullah al-Bistami, known as Musannifek (d. 1470), marked the manuscript with an ownership record in 874/1469–70 in Edirne. Seal of Mehmed II on 2a and 229b. *Jâmi' al-uşûl*, by ibn al-Athîr, makes several appearances on p. 34 of the inventory. See the list by Recep Göktaş. There are at least four other copies with the seal of Bayezid II:

TSMK, A. 301 (Karatay 2833–34) [= ? 38 {8}]. Seal of Bayezid II and ‘Atufi’s title only on the first volume of this two-volume set, copied in 901/1495–96;

TSMK, A. 302 (Karatay 2835–36) [= ? 38 {8}]. Seal of Bayezid II and ‘Atufi’s hand in both volumes of this two-volume set, copied in 733/1332–33; ‘Atufi simply added “*fī al-ḥadīth*” to an existing title in both cases;

TSMK, R. 354 (Karatay 2838). Only the second volume of an abridged version of this title; title by ‘Atufi; copied in 724/1323–24;

SK, Turhan Valide 48. ‘Atufi added only “*fī al-ḥadīth*” to an existing title, *Jāmi‘ al-uṣūl tamām*, written in larger calligraphic script; copy made in 870/1465–66 for the perusal of Mehmed II; seal of Bayezid II on 1a.

45. Fatih 723 [not in the inventory]. *Al-Juz’ al-awwal min Kitāb jāmi‘ al-uṣūl fī al-aḥādīth al-rasūl* (in red ink). Endowed to the mosque-madrasa complex of Mehmed II; see above. Colophon on 355a indicates that it was copied in 750/1349–50 by Muhammad b. Husayn b. Hasan al-Farabi. Note on 1a asserts that this copy was produced by comparison with the autograph copy. Seal of Mehmed II on 2a and 354a.
46. Fatih 756 [= 41 {8–11}]. The long title on 1a, *Risālatun fī al-ḥadīthi wa-al-du‘ā’i ‘alā tartībī al-ḥurūfi li-Sulṭān al-Salāṭīn Sulṭān Bāyezīd Khān bin Meḥmed Khān -zīdat sa‘ādatuhumā fī al-dārayni-mawsūmatun bi-Kitābi ighṭināmi al-furṣati li-qirā’ati al-ḥadīthi bi-Burṣa*, matches precisely the one in the inventory. Seal of Bayezid II on 1a and 33a (x2). See the essay and list by Recep Göktaş for the attribution to Bayezid II. (PLATE 29 [1–2])
47. Fatih 1123 [not in the inventory]. Title on the sticky label of the binding: *Iṣṭilāḥāt al-ḥadīth al-Nawawī*. An attempt at assigning a title was started on the flyleaf, but the word *kitābu* remains solitary. The process of binding may have dislocated some pages, since the numbering of folios starts again at 1 after the current 48b. The MS was part of the endowment of the mosque-madrasa complex of Mehmed II. Colophon on 73b indicates that it was written in 740/1339–40. Seal of Mehmed II on 1a and 73b.
48. Fatih 1217 [not in the inventory]. Pages seem to be missing from the front material of this second volume of *al-Nihāya* by Ibn al-Athīr (d. 1210); the text starts abruptly on 1a, without an ‘Atufi-style title. Colophon on 250b indicates that the copy, endowed to Mehmed II’s mosque-madrasa complex, was completed in 634/1236–37 by Muhammad b. Mikail b. Ahmad b. Rashid b. Husayn al-Mawsili. Seal of Mehmed II on 1a and 250a. At least two copies of this work by Ibn al-Athīr bear the seal of Bayezid II: TSMK, A.516, and SK, Süleymaniye 1025. See the list by Recep Göktaş.
49. Fatih 2552 [not in the inventory]. Title on 1a, not by ‘Atufi, has: *al-Jild al-akhīr min al-Iḥyā’*, namely the final book of al-Ghazālī’s *al-Iḥyā’*, of which there are corresponding entries in the inventory, but this MS cannot be one of those. There may have been some front material that is now missing. Copied in Konya in 853/1449 and endowed by Musannifek to the mosque-madrasa complex of Mehmed II. Almond-shaped but illegible seal on 1b and 311a, likely that of Mehmed II.
50. Fatih 2753 [not in the inventory]. Title given on 1a, not by ‘Atufi, and not in his style: *Faṣl al-khiṭāb Khwāja Aḥmad Pārsā ‘alayhim al-raḥmatu wa-al-riḍwān*. Previously owned by Musannifek (see no. 44 above), who endowed it to the mosque-madrasa complex of Mehmed II. Seal of Mehmed II on 2a and 179a.
51. Fatih 2788 [= 118 {17–18}]. The inventory lists this item, now known as *Maqālāt*, as: *Mujalladun min kālāmin fārisiyyin marqūmun bi-annah min kalimāti Mawlānā Sh[amsi] Tabrīzī fī al-taṣawwufi*. On 1a of the ms, *bi-annah* is replaced by *qila huwa*. Above this title is another one:

- qiṭ'a min kitābi Mawlānā Shaykh Tabrīzī fī al-taṣawwufi*. The volume is in two parts: 1b–47a and 48b–123b. The illuminated roundel refers to Shams as *sulṭān al-ma'shuqīn Mawlānā Sh[ams] Tabrīzī*. Seal of Bayezid II on 1a and 123b. (PLATE 30)
52. Fatih 2859 [not in the inventory?]. *Maqālāt-i Bahā' al-Dīn Walad bi-al-fārisiyya*. Colophon on 186b indicates that it was copied in 801/1398–99 by Muhammad b. Isa al-Hafiz al-Mawlawi al-Qunawi. Seal of Bayezid II on 2a and 187a.
53. Fatih 3418 [= 314 {8–10}]. *Kitābu al-zījī al-jāmi'i li-Kūshyār fī al-nujūmi wa-Kitābu mujmali al-uṣūli fī aḥkāmi al-nujūmi li-Kūshyār wa-Risālatu Abī Ma'shar al-Balkhī fī iḥtir[ā]qāti al-kawākibi fī mujalladin wāḥidin* (last section listed in the inventory missing in the MS). Pages missing from the beginning; no sign of 'Atufi and no seal at the front. Only one seal of Bayezid, on 227b.
54. Fatih 3856 [= 239 {7}]. The title on 1a (by 'Atufi?), *Dīwān-i Qāsim wa-Risālatun manẓūmatun*, refers to the two items that it lists in the most economic manner as in the inventory, which adds *fī mujalladin wāḥidin*. The other title, given on the flyleaf, *Dīwān-i Qāsim ma'a Risāla-i mutanawwi'a*, is more accurate since the volume contains three texts, all of them by Qasim-i Anvar. Colophon on 218b indicates that it was copied in 867/1462–63 by Hafiz 'Umar Shah al-Harawi. Bayezid II's ownership record on 1b, and his seal on 1a and 230b.
55. Fatih 4041 [possibly = 141 {6}]. Title given on 1a, where 'Atufi simply added the category "pertaining to advice," *Al-Kalimu al-rūḥāniyyati fī al-ḥikami al-yūnāniyyati min qibali al-naṣā'ihi*, is the same as the entry in the inventory, except for the categorization of the work as being *fī al-mawā'izi* (in homiletics). There is another copy of the same work in the inventory [= 144 {18}] with the title: *Kitābu al-kalimi al-rūḥāniyyati wa-al-ḥikami al-yūnāniyyati jama'ahū Abū al-Faraj fī al-naṣā'ihi*. Seal of Bayezid II on 100b; a seal on 1a, possibly of Bayezid, has been effaced. (PLATE 31)
56. Fatih 4045 [= one of two entries on 236 {18–19}]. The title given by 'Atufi on 1a, *Kitābu kullīyyāt-i Jāmī*, could refer to any one of his two entries with precisely that simple wording in the inventory. Compendium of 38 works by Jāmī. Colophon on 385a indicates that it was put together in 898/1492–93. Seal of Bayezid II on 1a and 741a.
57. Fatih 4062 [= 139 {9}]. The title by 'Atufi on 1a, *Risālatu al-lawā'ihi li-l-Jāmī fī al-taṣawwufi*, is the same as the one in the inventory. Colophon on 35a indicates that it was written in Sha'ban 900/April–May 1495 by Husayn al-Shirazi. Seal of Bayezid II on 35a.
58. Fatih 4130 [possibly = 251 {17}]. Pages missing from the beginning of this "illustrated and illuminated ... rare copy from the painting atelier of Shiraz during the Aqqoyunlu period" (see Appendix II by Zeren Tanındı). Identified in the catalogue of the Süleymaniye Library as *Mıhr u Mushtarī*, or *Ishq-nāma*, this manuscript could be related to any one of several entries for that title in the inventory, but only one of the entries refers to an illustrated version (*muṣawwar*). Colophon on 221a indicates that *al-kitābu al-musammā bi-muḥabbat-nāma...* was copied in Shiraz in Dhu'l-Hijja 894/October–November 1489. Only one seal of Bayezid, on 221a. Appendix I by Zeynep Atbaş mentions another illustrated copy, TSMK A. 3563, with the seal of Bayezid II, which does not seem to be the one in the inventory. Also see list by Sooyong Kim under Aṣṣār Tabrīzī and essay by Gülru Necipoğlu.
59. Fatih 4131 [= 249 {17–19}]. 'Atufi's title on 1a, *Kitābu mihri al-qulūbi li-l-Jamālī wa-Kitābu kashfi al-arwāḥi fī qışṣati Yūsuf-'alayhi al-salāmu- li-l-Jamālī*, is the same as the one in the inventory. Seal of Bayezid II on 1a and 273b.
60. Fatih 4203 [= 180 {17} or 181 {14}]. *Kitābu bahjati al-tawārīkhi*. Seal of Bayezid II on 1a and 369b. See no. 107 below (on MS Ayasofya 2990).

61. Fatih 4518 [= 190 {19}]. The title given by 'Atufi on 1a, *Kitābun musamman bi-al-Waladi al-shaḥīqī fī al-tawārīkhi*, matches the one in the inventory. The note on 1a, *odadan çıkan fārisī*, indicates that the manuscript in Persian was moved from the Privy Chamber to the Inner Treasury. Also on 1a, is the note *al-jild al-thānī min al-tawārīkh*, which was later crossed through. Seal of Bayezid II on 1a and 298b.

ŞEHZADE MEHMED

62. Şehzade Mehmed 8/1. This copy of 'Atufi's own work on hadith, *Anzāru sharḥi al-Mashāriqī*, is part of a compendium that bears the seal of Prince Mehmed b. Süleyman (d. 1543) on 1b, where our librarian's work starts and extends to 100a.

AYASOFYA

63. Ayasofya 446 [not in the inventory]. Neither the title on flyleaf, *Kitāb al-mukhtaṣar fī uṣūl al-ḥadīth wa-kitāb al-mukhtaṣar fī 'ilm al-ḥadīth*, nor the one on 1a, *Mukhtaṣar fī 'ilm al-ḥadīth li-l-'allāma fī 'ilm al-uṣūl wa-al-furū' wa-al-kalām wa-al-manṭiq wa-ghayrihā min al-'ulūm al-'aqliyya wa-al-naqliyya*, both of which might be considered in 'Atufi's style, matches any entry in the inventory. The closest entry is on 75 {18–19}: *Kitābu sharḥi al-Mukhtaṣari li-l-'Allāma fī uṣūli al-fiqhi*. The catalogue of SK assigns the work to Ibn al-Jazari (d. 1429) and strictly to the science of hadith. The trace of an almond-shaped seal on the flyleaf is barely visible, but it has been effaced beyond recognition.
64. Ayasofya 1654 [= 118 {14–17}]. The inventory has: *Kitābu rashḥi al-zulālī fī sharḥi al-alfāzi al-mutadāwilati bayna arbābi al-aḥwālī wa-Risālatu al-uṣṭurlābi wa-Risālatu ma'rifati kayfiyyati al-arṣādī wa-al-'amali bi-dhātī al-ḥalaqī wa-Kitābu al-iṣṭilāḥātī li-l-Qāshānī fī al-taṣawwufi fī mujalladin wāḥidin*. The title given by 'Atufi on 1a almost perfectly matches the one in the inventory but omits the word *al-mutadāwila*. A shorter title above this one simply has: *Sharḥ-i Iṣṭilāḥāt-i Qāshānī*. There are two texts by al-Qashani on Sufism at either end of the two astronomical works. Seal of Bayezid II on 1a and 109b. (PLATE 15)
65. Ayasofya 1682 [= 114 {10–11}]. The title on 1a, *Kitābu barīdi al-sa'ādātī fī sharḥi Kalimāti al-naṣā'ihī bi-al-fārisiyyati min qibali al-taṣawwufi*, matches the one in the inventory for this book by Muhammad b. Ghazi al-Malati (d. first quarter of 13th c.). Seal of Bayezid II on 1a.
66. Ayasofya 1683 [= 119 {13–16}]. The title on 1a, *Kitābun fī muḥimmāti al-umūri al-dīniyyati li-l-faqīhi Abī al-Layth al-Samarqandī wa-Kitābu akhlaṣi al-khālīṣati fī al-taṣawwufi wa-Risālatu al-basmalati wa-Risālatun 'alā madhhabī aḥli al-sunnati wa-al-jāmā'ati wa-Risālatun fī al-rūḥi wa-al-naḥsi wa-ḥālī al-nā'imi min kitābi al-Shaykh al-'Allāma Abī Ishāq al-Bukhārī min qibali 'ilmi al-kalāmi wa-al-taṣawwufi*, matches the one in the inventory, which does not indicate that these texts are “in one volume.” Note the designation of al-Bukhari (d. 870) as “*al-'Allāma*” (most erudite); 'Atufi uses this term for only four (maybe five) scholars in the whole inventory. Seal of Bayezid II on 1a.
67. Ayasofya 1694 [= 131 {7–11}]. 'Atufi's title on the flyleaf, *Kitābu al-tajalliyāti fī al-taṣawwufi wa-Rashḥu al-zulālī fī sharḥi al-alfāzi al-mutadāwilati bayna arbābi al-aḥwālī wa-Kitābun fī aḥwālī al-ḥurūfi wa-Kitābu ma'ārījī al-albābi fī kashfi al-afrādī wa-al-aqtābi min qibali al-taṣawwufi wa-Kitābu rashfi al-ma'īni fī kashfi ma'nā al-nubuwwati wa-sharḥu Ḥukmi al-wilāyati wa-Risālatu al-lā'ihati al-'ulwiyyati fī al-taṣawwufi*, perfectly matches the entry in the inventory, which mere-

- ly adds that these pieces are all in one and the same volume, *fi mujalladin wāḥidin*. The brief title on 1a, *Tajalliyāt* (of Ibn al-ʿArabi), refers to the first text only, which ends with a colophon (dated 884) on 31b and is followed by the brief title of the second piece on 32a, *Rashḥ al-zulāl*. Colophon on 248a indicates that the copying was completed in 884/1479–80. Seal of Bayezid II on 1a and 248a. (PLATE 16 [1–2])
68. Ayasofya 1701 [= 263 {6}]. The title given by ʿAtufi on 1a and the one in the inventory have the same wording: *Kitābu tuḥfati al-muʾmini bi-al-turkiyyati al-manzūmati*. Colophon on 130b indicates that it was completed on 1–10 Safar 906/August 27–September 5, 1500. For more on this text by Hisari (d. after 1500), see essay above. Seal of Bayezid on 1a and 130a.
 69. Ayasofya 1747 [= 111 {2–3, 4, 5} (three copies listed)]. The title given by ʿAtufi on 1a, *Kitābu jāwidān-khirad min qibali al-taṣawwufi*, matches three separate entries in the inventory, which also lists some other copies of this work by Ibn Miskawayh with variant titles. In this manuscript, *Jāwidān-khirad* ends on 241a and is followed by a short text. Seal of Bayezid II on 1a and 271a.
 70. Ayasofya 1778-001 [= 112 {8–9}]. The title given by ʿAtufi on the flyleaf, *Kitābu khiwāni al-ikhwāni bi-al-fārisiyyati min qibali al-taṣawwufi*, is the same as the one in the inventory. A later note by a *mudarris* on the flyleaf contests that this work by “Nasir-i Khusrev-i ʿAlevi,” written to propagate the *daʿwa* of the Fatimids, is related to Sufism. Colophon on 149b indicates that it was copied in 862/1457–58. Seal of Bayezid II on 1a and 149a.
 71. Ayasofya 1819 [= 108 {11} or 110 {2–3} or 111 {11} or 120 {1}]. The almost generic title given by ʿAtufi on 1a, *Risālatu al-Qushayrī fi al-taṣawwufi*, has four precise counterparts in the inventory, which includes very few works from the early phase of Sufism other than this classic by al-Qushayri (d. 1072). Colophon on 221a indicates that it was copied in Rajab 856/July–August 1452. Seal of Bayezid II on 1a and 221b.
 72. Ayasofya 1852 [= 120 {19}–121 {1}]. Title on 1a by ʿAtufi, *Kitābu mirʾāti al-tāʾibīna fi al-taṣawwufi*, a work by ʿAlī al-Hamadānī (d. 1385), is the same as the one in the inventory. Seal of Bayezid on 1a and 75b.
 73. Ayasofya 1898 [= 119 {8–11}]. ʿAtufi’s title on 1a, *Risālatu al-muqaddimāti min awāʾili sharḥi al-Qaṣīdati al-tāʾiyyati wa-Risālatu al-muqaddimāti min awāʾili sharḥi al-Fuṣūṣi li-Dāwud al-Qayṣarī fi al-taṣawwufi*, curiously lists one piece less than the entry in the inventory, which includes after these two texts: *wa-Risālatu al-Qādī al-Sīmāwī ʿalā khilāfi al-taṣawwufi fi mujalladin wāḥidin*. This third text, by the controversial Ottoman Shaykh Badr al-Dīn (d. 1420?), seems to have been at some point removed from the volume, which is also missing the second seal that would have come at or near the end of the text that originally concluded the volume. In its current binding, the volume has a third text by Dawud al-Qaysari (d. 1350) (89a–110a). The title on the flyleaf, not in ʿAtufi’s hand, identifies the volume as: *Kitāb iṣṭilāḥāt al-mashāyikh maʿa rasāʾil sāʾira*. On 1a, above the title by ʿAtufi, is another one by a different hand, in much larger and gilded letters: *Hādhā muqaddimāt iṣṭilāḥāt al-mashāyikh min awāʾil sharḥ al-Qaṣīda al-tāʾiyya li-Ibn al-Fāriḍ -qaddasa Allāhu sirrahu- li-l-Shaykh al-Farghānī -raḥimahu Allāhu raḥmatan wasīʿatan*. An explanatory note is added (by ʿAtufi?) under the word al-Farghānī, identifying him as “al-Qāshānī,” and verifying this with “*wa-huwa al-ṣaḥīḥ*.” This monumental title seems to have been an earlier one, given to the first text, which was later examined and emended by ʿAtufi when working on the inventory. Colophon on 26a, at the end of the first text, indicates that it was copied in 878/1473–74. Only one seal of Bayezid, on 1a. (PLATE 18)
 74. Ayasofya A. 1935 [= 113 {3} or 122 {10–11}]. ʿAtufi’s title on 2a, *Kitābu sharḥi Manāzili al-sāʾirina fi al-taṣawwufi*, matches two entries in the inventory, which lists five copies altogether for this

work by ‘Abdullah Ansari (d. 1089). Shorter title on 1a: *Hādhā sharḥ Manāzil al-sā’irīn*. Seal of Bayezid on 2a and 222b.

75. Ayasofya 1936 [= 112 {7, 8} (two copies listed)]. The title on 2a, *Kitābu sharḥi al-Mawāqifi fī al-taṣawwufi*, originally had one or two more words after *Mawāqif*, but that bit was erased. As it is, this title matches two entries in the inventory for this text by al-Tilimsani (d. 1291). The flyleaf has: *Kitāb sharḥ Mawāqifi li-l-Tilimsānī fī al-taṣawwuf*. Colophon on 268b indicates that it was copied in 743/1342–43. Seal of Bayezid on 1a and 268b.
76. Ayasofya 1957 [= 140 {11–13}]. The title by ‘Atufi on 1a, *Kitābu al-ṭahārati li-Ibn Miskawayh fī tahdhībī al-akhlāqi wa-Risālatun li-l-Fārābī fī al-akhlāqi*, perfectly matches only one of several relevant entries in the inventory. Another title on the same page has a slightly different wording: *Kitābu al-ṭahārati fī tahdhībī al-akhlāqi li-Ibn Miskawayh wa-Risālatun fī al-akhlāqi li-l-Fārābī*. Colophon at the end of the first text on 124b indicates that it was copied in 879/1474–75; the second text starts on 125a with *Risālatu fī al-akhlāqi li-l-Shaykh al-Fārābī* and ends on 149a. Seal of Bayezid on 1a and 149b.
77. Ayasofya 1976 [= 118 {6–8}]. ‘Atufi on 1a gives the same title as in the inventory: *Kitābu faṣli al-khiṭābi fī ‘aqā’idi al-kubarā’i al-jāmi’ina bayna ‘ulūmi al-sharī’ati wa-al-ṭarīqati min qibali al-taṣawwufi*. The flyleaf has: *Kitābu faṣli al-khiṭābi fī ‘aqā’idi al-kubarā’i al-jāmi’ina fī al-taṣawwufi*. Colophon on 252b indicates that this work by Muhammad Parsa (d. 1420) was copied in 846/1442–43 by Ibrahim bin Yusuf al-Imam al-Mu’ini (?). ‘Atufi does not indicate that the work is in Persian. Seal of Bayezid on 1a and 253b. (PLATE 19)
78. Ayasofya 1977 [= 118 {8–10}]. On the flyleaf, ‘Atufi identifies the two-part compilation as *Kitābu faṣli al-khiṭābi fī ‘aqā’idi al-kubarā’i al-jāmi’ina bayna ‘ulūmi al-sharī’ati wa-al-ṭarīqati wa-al-Risālatu al-qudsiyyatu min qibali al-taṣawwufi*. The inventory has the same but adds that they are in one volume (*fī mujalladin wāḥidin*). Flyleaf-1 has only a short title for the first item, *Kitāb faṣl al-khiṭāb*, and indicates the number of lines per page. Both of these texts (the first one spanning 1b–227a; the second one, 228b–241a) are in Persian, but ‘Atufi does not indicate the language. Seal of Bayezid II on flyleaf-2a and 241b. (PLATE 20 [1–2])
79. Ayasofya 1980 [= 132 {11–16}]. The ten pieces in this multi-text volume are each identified in the inventory: *Kitābu fuṣūlin fī al-taṣawwufi wa-al-Risālatu al-qudsiyyatu fī al-taṣawwufi wa-Risālatu Mawlānā Kāshghiri fī kayfiyyati al-dhikri wa-al-tawajjuhi fī al-taṣawwufi wa-Sharḥu rubā’i al-Shaykh ‘Aṭṭār wa-Risālatun mawsūmatun bi-Mir’āti al-‘āshiqina wa-Risālatun fī faḍli al-du‘ā’i wa-Risālatun fī ‘ilmi al-khaṭṭi wa-Risālatu ta’wīli Qisṣati Yūsuf-‘alayhi al-salāmu- fī al-taṣawwufi wa-Qaṣīdatun mawsūmatun bi-Waḍā’i’i al-ashār fī ṣanā’i’i al-ash’ār wa-Qaṣīdatu al-āfāqi wa-al-anfusi fī mujalladin wāḥidin*. The short title on the flyleaf (not by ‘Atufi?), which mentions only the first text by Ebu’l-Vefa (d. 1481) without naming him, does not match any entry: *Kitābu fuṣūlin ma’a rasā’ili fī al-taṣawwufi* (A Book [Containing] Sections, with Treatises on Sufism; see list by Kafadar and Karamustafa). Seal of Bayezid II on 1a and 108b.
80. Ayasofya 1982 [not in the inventory]. The title on 1a, not by ‘Atufi, *Muṭṭala’u Khuṣūṣ al-kilām fī ma’ānī Fuṣūṣ al-ḥikam*, and the one on the flyleaf indicating the number of lines per page, *Kitāb ma’ānī Fuṣūṣ al-ḥikam wa-ghayruhu* (Book on the Meanings of [Ibn al-‘Arabi’s] *Fuṣūṣ al-ḥikam* and others?), do not match any entry in the inventory perhaps because it is a late arrival. Three colophons in this multi-text volume indicate different dates of copying: 873/1468–69 on 43a, 881/1476–77 on 53a, and 870/1465 on 134a. Seal of Bayezid II on 64a and 134b.
81. Ayasofya 2033 [= 143 {18}]. The title given by ‘Atufi on 1a, *Kitābu al-lawā’iḥi fī al-taṣawwufi*, matches only one entry in the inventory, where the words *fī mujalladin wāḥidin* are added, perhaps by mistake, because the entry lists only one work. Seal of Bayezid II on 1a and 50a.

82. Ayasofya 2098 [= 137 {19}–138 {2}]. The title by ‘Atufi on 1a, *Muntakhabu Jāwidān-khirad fī al-naṣā’ihī wa-Risālatu al-aḥādīthi wa-Risālatu munājāti ‘Abd Allāh al-Anṣārī bi-al-fārisiyyati fī al-taṣawwufi*, describes the contents with precisely the same words as in the inventory. Three works listed by ‘Atufi end on 58a; volume contains another short text, *Risāla dar Shinākhtan-i Khōd* (Treatise on Knowing Oneself) by Afdal al-Din al-Kashi (d. 1291), between 59a and 62b, which was included in the volume before it received the sultan’s seal (but after the inventory?). Seal of Bayezid II on 1a and 62b.
83. Ayasofya 2112 [= 115 {2–3}]. The title on 1a, *Kitābu manhāji al-rashādi min qibali al-fiqhi wa-al-taṣawwufi*, for this work “pertaining to jurisprudence and Sufism” by Şükrullah b. Ahmed el-Amasi (d. after 1464), is the same as the one in the inventory. Seal of Bayezid II on 1a and 111a.
84. Ayasofya 2114 [= 112 {14} or 136 {15}]. The title on 1a by ‘Atufi, *Kitābu minhāji al-‘ābidīna li-l-Imām al-Ghazālī fī al-taṣawwufi*, matches two separate entries in the inventory. Seal of Bayezid II on 175a only.
85. Ayasofya 2115 [= 113 {14–15}]. ‘Atufi’s title on 1a, *Kitābu minhāji al-‘ābidīna li-l-Imām al-Ghazālī-ṭāba tharāhu- fī al-taṣawwufi*, matches precisely only this one among several relevant entries in the inventory. Colophon on 108b indicates that the copy was completed in 878/1473–74. Seal of Bayezid II on 1a and 108b.
86. Ayasofya 2116 [= 112 {13}]. The title given by ‘Atufi on 1a, *Kitābu minhāji al-‘ābidīna fī al-taṣawwufi*, is the same as the one in the inventory. Colophon on 115a indicates that it was copied in 794/1391–92. Note the three slightly different titles given to these items on nos. 84–86, and no. 88 below, which enables one to identify specific manuscripts to a large degree. Seal of Bayezid II on 1a and 115a.
87. Ayasofya 2117 [= 114 {7–9}]. The title given by ‘Atufi to this multi-text volume on 1a, *Kitābu mukhtaṣari Minhāji al-‘ābidīna fī al-taṣawwufi wa-Kitābu fawātiḥi al-jamālī fī ṭariqi al-taṣawwufi wa-Risālatu al-hā’imi al-khā’ifi min lawmati al-lā’imi min qibali al-taṣawwufi wa-Rasā’ilu ukhrā*, is the same as the one in the inventory, which adds that these texts are *fī mujalladin wāḥidin*. The current catalogue of SK lists five items. Seal of Bayezid II on 1a and 174a.
88. Ayasofya 2118 [= 144 {19}]. ‘Atufi’s title on 1a, *Minhāju al-‘ābidīna li-l-Imām al-Ghazālī -quddisa sirruhū- fī al-taṣawwufi*, is the same as the one in the inventory. Seal of Bayezid II on 121b only?
89. Ayasofya 2119 [= 115 {18–19}]. The title given by ‘Atufi on 1a, *Kitābu mawāqī’i al-nujūmi li-l-Shaykh Muḥyi al-Dīn al-‘Arabī-ṭāba tharāhu- fī al-taṣawwufi*, offers a precise match with the entry in the inventory. Seal of Bayezid II on 1a and 169b.
90. Ayasofya 2120 [= 113 {16–17}]. The title given by ‘Atufi on the flyleaf, *Kitābu mawāqī’i al-nujūmi li-Muḥyi al-Dīn—ṭāba tharāhu—fī al-taṣawwufi*, is nearly the same as the one in the inventory, which omits the prayer formula. In the volume as presently bound, the titled and inventoried text starts as late as on 7b, and is preceded by a short piece on “*adab wa-ḥikam*” (culture and wisdom), which may have been bound in this volume after the inventory was compiled. Seal of Bayezid II on 1a and 188b.
91. Ayasofya 2155 [= 137 {8–9}]. *Kitābu waṣāyā Zayn al-Dīn al-Khwāfī fī al-taṣawwufi*. The title on the sticky label of the binding could have been by ‘Atufi: *Waṣiyyatu Shaykh Zayn al-Dīn al-Khwāfī fī al-taṣawwufi*. No title record by ‘Atufi in the folios, and no seal of Bayezid II.
92. Ayasofya 2285 [= 66 {13–14}]. The title given in the inventory, *Tarjamatu Rashfi al-naṣā’ihī bi-al-fārisiyyati min qibali ‘ilmi al-kalāmi wa-Sharḥu Qaṣīdati burdata bi-al-fārisiyyati fī mujalladin wāḥidin*, would have been the same as the one given by ‘Atufi on the flyleaf, if the part between *sharḥu* and *fārisiyyati* were not effaced. The same page offers traces of attempts to work out the identification and titling of the volume, with notes by two different hands; right next to *Kitāb*

tarjama-i Rashf al-naṣā'ih, written in a much larger script, for instance, another hand ('Atufi?) has added: *bi-al-fārisiyyati*. Below this line, *wa-Sharḥu Qaṣīdati burdata* in large script is, again, followed by *bi-al-fārisiyyati* in a script that looks like the usual of 'Atufi. There is also an ownership record of Bayezid II on that page. Colophons at the end of each section: on 148b indicating that it was completed in 857/1453, and on 217b indicating that it was completed in 858/1454. Seal of Bayezid II on 1a.

93. Ayasofya 2398 [= 352 {10–11}]. The title given by 'Atufi on 1a, *Hāshiyatu Mawlānā-zāda 'alā al-Hidāyati fī al-ḥikmatī al-falsafīyyati*, is the same as the one in the inventory. There is another copy of the same work by Mawlanazada Mahmud al-Harawi (fl. 15th century) listed in the inventory [= 361 {4–5}] with a different wording and noted as having been “requested (*maṭlab*).” Seal of Bayezid II on 1a and 99b.
94. Ayasofya 2427 [= 355 {8–9}]. 'Atufi's title on 5a, *Sharḥu Ḥikmatī al-ishrāqī li-l-Quṭb al-'Allāma al-Shīrāzī fī al-ḥikmatī al-falsafīyyati*, perfectly matches the entry in the inventory. On the back cover, the title is given by two different hands as *Kitāb sharḥ Ḥikmat al-ishrāq*, with an indication of number of lines per page, and *Sharḥ Ḥikmat al-ishrāq*. The page that currently serves as the flyleaf has the seal of Bayezid II and the title *Ḥikmat al-ishrāq*. Pages inserted later (?) between that one and 'Atufi's title page include two short texts, *al-Kalīmāt al-dhawqīyya li-l-Imām al-shahīd al-Suhrawardī* and *Risāla fī sharḥ al-faqr*, also by Suhrawardī, “the martyr.” Colophon on 145a indicates that the copy of Qutb al-Dīn al-Shīrāzī's (d. 1311, the “most erudite”) commentary on Suhrawardī's famous book was completed in 786/1384–85. Palimpsest of seal on the back page clearly visible here. Seal of Bayezid II on 1a and 145b. (PLATE 21 [1–2])
95. Ayasofya 2457 [= 304 {19}–305 {1}]. This multi-text volume of thirteen pieces is titled by 'Atufi on 1a with only the first two of its contents: *Majmū'atun awwaluhā Kitābu Aristātālīs fī al-firāsati wa-thānīhā Kitābu al-Imām al-Fakhr al-Rāzī -quddisa sirruhu- fī al-firāsati*; this is nearly the same as the one in the inventory, which omits the prayer formula and adds *fī mujalladin wāḥidin*. Seal of Bayezid II on 1a and 269b.
96. Ayasofya 2490 [= 344 {4}]. The title given by 'Atufi on 1a, *Zubdatu al-bayāni bi-al-turkiyyati fī al-mantiqī*, is the same as the one in the inventory. Dedicated to Bayezid II, who is eulogized on 2a/b and named on 2b, by Muhyiddin Mehmed Çelebi el-Ladiki (d. beg. of the 16th c.), who wrote this first book on logic in Turkish and presented this autograph copy to the sultan. Seal of Bayezid II on 1a and 75b.
97. Ayasofya 2582 [= 328 {8–9}]. 'Atufi's title on 1a, *Ithnāni min Sharḥi al-Tabṣīrati bi-khaṭṭi mu'allifihī Muḥammad bin Mubārak-Shāh fī al-hay'ati*, is the same as the one in the inventory, where *fī mujalladin wāḥidin* is added. A rare instance of two copies of the same work in one volume. The codex is in the form of a *safīna*, or *cönk*. The first one is an autograph by Muḥammad b. Mubarak-shah (d. after 1382); the second one is a copy made from it. Colophon on 106b gives the date of completion as 733/1332–33. Seal of Bayezid II on 1a and 106b.
98. Ayasofya 2671 [= 321 {3–4}]: This multi-text volume is titled by 'Atufi on 1a: *Majmū'atun min rasā'ila fī 'amali al-ṣafīḥati wa-'amali al-uṣṭurlābi wa-ghayriḥā*. This is the same as the title given in the inventory, but the one on the manuscript page has the words *min qibali* written and crossed over. Colophon on 75a gives the date of completion for that piece as 611/1214–15. Seal of Bayezid II on 1a and 153b.
99. Ayasofya 2672 [= 323 {7}]. The title given by 'Atufi on 1a, *Majmū'atun min rasā'ila fī aḥkāmī al-nujūmi wa-'amali al-uṣṭurlābi wa-ghayriḥi*, is a perfect match with the one in the inventory. The current catalogue of the Süleymaniye Library lists twelve items in this miscellany. Colophon on

- 36b indicates that the first text, *al-Madḥal fī ilm al-nujūm* by Kūshyār al-Jilī al-Falākī (fl. 2nd half 10th/early 11th c.), was completed in 685/1286–87, while another one on 54b indicates that the copying of the piece *Risāla fī ‘amal al-usturlāb*, by the same author, was completed in 684/1285–86. Seal of Bayezid II on 1a and 131b.
100. Ayasofya 2753 [= 326 {5}]. *Kitābu Abī al-Wafā’ fīmā yahtāju ilayhi min a’ māli al-handasati*. This work on geometry by Abu al-Wafa al-Buzjani (d. 998) has a faded seal of Bayezid II on p. 70 (pagination by a modern hand). See essay and list by Tunç Şen and Cornell Fleischer.
 101. Ayasofya 2818 [= 122 {15–17}]. Neither of the two titles on 1a, *Kitāb Aḥmad b. Muḥammad Miskawayh fī al-akhlāq* or *Kitāb ‘ilm al-akhlāq*, appears in the inventory, but it is worth noting that “Aḥmad b. Muḥammad Miskawayh” is ‘Atufi’s standard way of referring to the author (see three different entries on pp. 122 and 123 of MS Török F. 59). Colophon at the end of the first section on 103b indicates that it was copied in 684/1285–86. The second text is by al-Farabi. These two authors are brought together in four separate entries in the inventory with their works on ethics but only twice as a pair, namely without additional items in the same volume (for the other pairing, see no. 76 above on MS Ayasofya 1957). Seal of Bayezid II on 1a and 118b.
 102. Ayasofya 2852 [not in the inventory]. This manuscript provides an example of some of the continuities with the practices of palace librarians after ‘Atufi. Title on flyleaf-2a: *Kitāb taḥrīr al-aḥkām fī al-siyāsiyya*. Title on 1a with monumental script in red ink: *Kitāb fīhi taḥrīr al-aḥkām fī al-siyāsiyya taṣnīf al-Shaykh al-Imām Abu al-Ḥasan Muḥammad al-Suhrawardī al-Baghdādī – ghaffāra Allāhu lahu wa li-man qarā’ahu wa li-jamī’ al-muslimīn*. Seal of Selim I on 1a and 74b. (PLATE 22 [1–2])
 103. Ayasofya 2868 [= 140 {13–14, 14–15} (two copies listed with the same title)]. Title given by ‘Atufi on 1a, *Tarjamatū Kitābu naṣīhati al-mulūki bi-al-‘arabiyyati*, matches both of those two in the inventory. The same page has two ownership notes, one by a *khaṭīb* (preacher) and one by a mudarris in the madrasa of Sultan Orhan in Bursa. Colophon on 76b indicates that the copy of this Arabic translation of al-Ghazali’s book was completed in 766/1364–65. Seal of Bayezid II on 1a and 77b.
 104. Ayasofya 2907 [= 115 {12}]. Title by ‘Atufi on 1a, *Kitābu minhāji al-wuzarā’i fī al-naṣīhati min qibali al-taṣawwufi*, is the same as in the inventory. An earlier (?) title on the facing page is crossed. The author’s name, Aḥmad b. Mahmud al-Jilī (d. 1329), is mentioned on 2a. Colophon on 163a indicates that this autograph copy was completed in 729/1328–9 in Tabriz in the madrasa al-Sadr. Seal of Bayezid II on 1a and 163a. (PLATE 23)
 105. Ayasofya 2971 [= 202 {15} or 202 {15–16}]. ‘Atufi’s title on 1a, *Kitābu aqālīmi al-arḍi ‘alā al-mamālīki al-islāmiyyati fī al-tawārīkhi*, matches two consecutive entries in the inventory, where the discipline of the book is not indicated. Note that he categorizes this book as well as some similar ones in “history,” while they are ordinarily considered as works of geography by modern scholars and librarians. See essay and list by Pınar Emiralioglu. No colophon. Seal of Bayezid II on 1a.
 106. Ayasofya 2984 [= 251 {9–10}]. *Kitābu anīsi al-qulūbi fī qaṣaṣi al-anbiyā’i wa-ghayrihim*. For this work by Qāḍī Burhān al-Dīn Abū Naṣr ibn Maṣṣūr al-Anawī (d. 1211–12) and for this manuscript, see Cailah Jackson, “An Illuminated Manuscript of Early Fourteenth-Century Konya? Anīs al-Qulūb (MS Ayasofya 2984, Süleymaniye Kütüphanesi, Istanbul),” *Journal of Islamic Manuscripts* 8 (2017): 85–122. Seal of Bayezid II on 1a and 428b.
 107. Ayasofya 2990 [= 180 {17} or 181 {14}]. The title on 1a, *Kitābu bahjati al-tawārīkhi*, describes the Persian chronicle of Şükrullāh bin Aḥmed (d. after 1464), of which there are four more copies in the inventory. The other entries are worded differently. Only one entry mentions the language

- of the text (180 {19}) but uses *fārisiyyun* instead of the inventory's conventional *bi-al-fārisiyyati*; in hindsight, 'Atufi seems to have realized that this could be confusing and thus added a marginal note to make sure that *fārisiyyun* (Persian) was understood to refer to the book and not to its historical content. Seal on 1a and 301b. See essay and list by Cornell Fleischer and Kaya Şahin.
108. Ayasofya 3032 [= 180 {5–6}]. *Qışsatu julūsi Sultān al-Salāṭīn Sultān Bāyezīd Khān -a'ānahu al-musta'ānu 'āla al-sarīri- bi-al-turkiyyati ma'a qışṣati abihi Sultān Meḥmed Khān -ṭāba tharāhu- bi-al-turkiyyati fi al-tawārīkhi*. This Turkish chronicle by Tursun Beg (d. after 1491) is better known as *Tārīḫ-i Ebū'l-Feth*, namely as a chronicle dedicated to the reign of Mehmed II, but 'Atufi emphasizes the fact that it includes the reign of Bayezid II. In fact, the inventory gives only the first half of the long title, without mentioning Mehmed II. Seal of Bayezid II on 1a and 180b. See essay above.
 109. Ayasofya 3195 [= 177 {5–6}]. The title on 1a, *Kitābu durji al-durari fi siyar Sayyid al-Bashar fi al-tawārīkhi*, is a perfect match with the entry in the inventory. Under this title is written by another hand: *mawlid-i nabi fārisī li-Sayyid Aşıl* [al-Din Abd al-Rahman al-Shirazi (d. 1478–79)]. Colophon on 454b indicates that the copy was completed in 886/1481–82. Seal of Bayezid II on 1a and 454b. While the inventory has only one entry for this work, there is another copy of it with the seal of Bayezid II (see below no. 113, MS Ayasofya 3895).
 110. Ayasofya 3461 [= 111 {12}]. The title on 1a, *Kitābu manāqibi al-Shaykh al-Kāzarūnī min qibali al-taşawwufi*, is the same as the one in the inventory. Colophon on 212b indicates that it was completed in 829/1425–26 in Mashhad. Seal of Bayezid II on 1a and 213b. This work is now identified as the vita of Ahmad al-Rifa'i (d. 1182), titled *Shifā' al-askām*. 'Atufi may have been confused by the fact that the author is a certain Ibrahim b. Muhammad b. Ibrahim al-Bakri al-Kazaruni.
 111. Ayasofya 3702 [= 169 {3}]. The title given by 'Atufi on 1a, *Kitābu al-ḥashā'ishi li-Dīsqūrīdus*, is expanded in the inventory into *Kitābu al-ḥashā'ishi li-Dīsqūrīdus wa-huwa khamsu maqālātīn fi al-ṭibbi*. It is the first of three titles listed for that book in the inventory; this one and the next contain five chapters, while the third has only four. Date given on 1a is 818/1415–16. Seal of Bayezid II on 1a and 186b. See essay by Gülru Necipoğlu.
 112. Ayasofya 3857 [= 234 {7–8}]. The tripartite title on 1a, *Kitābun fi awwalīhi Khamsah-i Nizāmī wa-fi awṣaṭīhi rasā'ilu al-afāḍili wa-fi ākhirīhi ghazaliyyātu al-akābiri wa-rubā'īyyātuhum*, perfectly matches the one in the inventory. The current catalogue of the Süleymaniye Library identifies 42 separate entries in this compendium of Persian poetry, compiled in a volume of 752 folios in the form of a *saḫḫina* / *cönk*. No colophon or seal at the end. Seal of Bayezid II on 1a.
 113. Ayasofya 3895. *Kitābu durji al-durari fi siyar Sayyid al-Bashar fi al-tawārīkhi*. [=177 {5–6}]. By Aşıl ad-dīn 'Abdallāh bin 'Abd al-Raḥmān al-Shirāzī. Copied in 886/1481–82. Seal of Bayezid II on 1a and 454b. (See no. 109 above.)
 114. Ayasofya 3974 [not in the inventory]. Title given on 1b, not 'Atufi's hand: *Dīwān-i Mihri dukhteri Mawlānā Belā'i*. Arrived in the palace later than the compilation of the inventory; see essay above. Seal of Bayezid II on 1a and 76b.
 115. Ayasofya 4012. Title given by 'Atufi on 1a: *Risālatu fi makārimi al-naṣā'ihi ≈ Risālatun fi faḍā'ili ba'di al-aḥwālī bi-khaṭṭin gharībīn min qibali al-taşawwufi*. Second part of the title matches the entry in MS Török F. 59, 137 {18–19}. Is the first part an earlier attempt at titling that was not preferred? Here is a rare instance of a *butta* between the two titles on the manuscript itself. In the preferred version, the letters *alif-lām-alif* were first written after the word *faḍā'il* and then crossed over. Volume in the horizontal form of a *saḫḫina*, or *cönk*, has text in Uyghur and Arabic

- scripts. Colophon on 123a indicates that the copy was completed in 848/1444–45 in Samarkand. Seal of Bayezid II on 1a and 122b. See the essay and list by Ferenc Csirkés.
116. Ayasofya 4015 [= 219 {12–13}]. Title by ‘Atufi on 1a for this two-work volume on official correspondence, *Kitābu Rashīd al-Dīn fī al-tarassuli wa-kitābu Abī Bakr al-Qunawī fī al-tarassuli*, is the same as the one in the inventory. A shorter title on the flyleaf names only the first text. Seal of Bayezid II on 1a and 107b.
117. Ayasofya 4092 [the second text = 117 {18–19}]. Of this compendium of two texts, the first one seems to have arrived in the palace after the compilation of the inventory. Title given for this first work on 1a, not ‘Atufi’s hand: *Kitāb sharḥ Qaṣīda khamriyya*. While there are several copies of this work by al-Jami in the inventory, there is no precise match with any entry. Colophon on 82a indicates that the copy was completed in 909/1503–4 in Sofia by none other than the historian and refugee from Iran, Idris b. Hüsameddin el-Bidlisi (d. 1520). The second work is titled by ‘Atufi on 84a, where a seal of Bayezid II is also extant: *Risālatu al-Shaykh al-Rūmī al-ma’rūfī bi-Aq Shams al-Dīn [Aḫṣemseddin] -ṭāba tharāhu- fī al-taṣawwufi*. The two texts were evidently bound together after 1504; they also feature different formats within the page. Who decided to bring these two texts together after one was already sealed and inventoried (and possibly bound)? Seal of Bayezid II on 84a and 147b. (PLATE 26 [1–2])
118. Ayasofya 4138 [= 220 {8}]. The title given by ‘Atufi on 1a, *‘Arā’isu al-khawāṭiri fī al-makātibi wa-al-inshā’i*, matches the one in the inventory. A longer title under it, and in red ink, identifies this work by Rashid al-Din Watwat (d. 1177) on epistolography as: *Hādḥā kitāb ‘Arā’is al-khawāṭir wa-naḡā’is al-nawādir fī al-inshā’*. Seal of Bayezid II on 1a and 108b.
119. Ayasofya 4210 [= 248 {5}]. Title given on 1a (by ‘Atufi?) is simply: *Kitābu Jamālī*. The manuscript contains eight texts by Jamal al-Din Muhammad al-Ardistani al-Dihlivi (d. 1474). The closest entry in the inventory is *Kitābu kullīyyāt-i Jamālī*. Seal of Bayezid II on 1a and 434b.
120. Ayasofya 4304 [= 141 {4}]. Title on 1a, not ‘Atufi’s hand, and in a monumental script, *Muntakhabun min Kitābi jāwidān-khirad fī al-naṣā’ihī*, perfectly matches an entry in the inventory. A style attempted in the earlier stages of the inventory’s compilation, or inherited from earlier practice, and abandoned in favor of a more practical approach? Colophon on 28a indicates that it was completed by Yusuf b. Yahya al-Mashhadi in 713/1313–14. Seal of Bayezid II on 1a and 28a.
121. Ayasofya 4317 [= 232 {10}]. Title on 1a, *Kitābu manṭiqi al-ṭayr li-l-‘Atṭār*, matches an entry in the inventory, but is not ‘Atufi’s hand, and indicates the script as well as the number of lines per page, as is the practice of another (later?) librarian. According to the colophon on 163b, the copy was completed in 860/1455–56 by Muhammad b. Mahmud al-Harawi. Seal of Bayezid II on 1a and 163b.
122. Ayasofya 4336 [= 219 {3}]. ‘Atufi on flyleaf-2a has the same title as in the inventory: *Nafā’isu al-kalāmi fī al-tarassuli*. Flyleaf-1a has the very same title, with an indication of the number of lines per page. Colophon on 126b indicates that it was completed in 871/1466–67. Seal of Bayezid II on 1a and 126b. For this work by Razi al-Din Ahmad ibn Mahmud Samarqandi, see list by Christopher Markiewicz.
123. Ayasofya 4749 [possibly = 296 {2} and/or {3–8}]. This multilingual compendium is described in detail in the inventory, while the manuscript has on 1a (not by ‘Atufi): *Lughat-i fārisī ‘arabī wa-rūmī wa-sarfī* and *Lughat-i alsīna-i arba’a*. ‘Atufi-style titles are given at the beginning of individual texts, but there is no precise match with the inventory. Seal of Bayezid II on 1a and 101b. For a full discussion, see essay and list by Ferenc Csirkés and essay by Gülru Necipoğlu.
124. Ayasofya 4757 [= 264 {18}–265 {1}]. The long title given by ‘Atufi on 1a, *Risālatun bi-al-lughati al-mughūliyyati al-manẓūmati wa-al-khaṭṭi al-mughūlī min qibali al-naṣā’ihī wa-Kitābu makhzani*

al-asrāri bi-al-lughati al-mughūliyyati wa-al-khaṭṭi al-mughūlī kullun minhumā muḥashshan bi-al-turkiyyati, matches perfectly the entry in the inventory. On the manuscript page, there is also the word *majmū'a* before the title. Colophon on 81a indicates that it was completed in 884/1479–80 by Shaykh-zāda Abd ar-Razzaq Bakhshi in Istanbul. Seal of Bayezid II on 88b. For a full discussion, see essay and list by Ferenc Csirkés. (PLATE 27 [1–2])

125. Ayasofya 4795 [= 37 {4–12}]. On 2a, 'Atufi lists the titles of this multi-text volume as: *Kitābu tarjamatu Ḥiṣnīn ḥaṣīnīn bi-al-fārisiyyati fī al-ḥadīthi wa-Kitābu nathri al-la'ālī min kalāmi Ḥaḍrat 'Alī -raḍīya Allāhu 'anhu- wa-Kitābu muntakhabi Khulāṣati al-ḥaqā'iqi fī iṣtilāḥāti ahli al-ḥaqqi wa-Qaṣā'idu 'arabiyyatun wa-Risālatun fī al-rasmi al-'uthmānī fī al-muṣḥafi wa-Risālatun fī ma'rīfati Allāhi wa-ma'rīfati al-insāni li-l-Shaykh Muḥyī al-Dīn al-'Arabī wa-Kitābu kanzi al-rumūzi fī al-taṣawwufi wa-Kitābu jāmi-jahān-numāy wa-Kitābu jāmasbnāma li-l-Naṣīr al-Ṭūṣī wa-Risālatu al-'arūḍi wa-Risālatun fī al-'arūḍi wa-Risālatu tarjamati Ṣad kalimah-i 'Alī -karrama Allāhu wajhahū- wa-Risālatu Ibn Sīnā fī aḥwālī al-qalbi wa-fī ḥādhihi al-majmū'ati rasā'ilu ghayru mā dhakarnā*, which corresponds perfectly to the one in the inventory, which adds *fī mujalladin wāḥidin*. In the current catalogue of SK, this is a compendium of fifty texts; 'Atufi names thirteen of them. Seal of Bayezid II on 3a and 482b. (PLATE 28 [1–2])
126. Ayasofya 4798 [= 136 {12–14}]. 'Atufi's title of this two-work volume on 1b, *Kitābun yaḥtawī 'alā kalāmi al-Shaykh Abī 'Abd Allāh al-Qurashī al-Hāshimī wa-Kitābu al-irshādi wa-al-taṭr[īdi] fī faḍli dhikri wa-tilāwati kitābihi al-'azīzi wa-faḍli al-awliyā'i wa-al-nāsikīna wa-al-fuqarā'i wa-al-masākīni min qibali al-taṣawwufi*, is the same as the one in the inventory, where *fī mujalladin wāḥidin* is added later above the line. Colophon on 46b indicates that at least the first text was completed in 737/1336–37; the second piece is by al-Yafī'i (d. 1367). Seal of Bayezid II on 1a and 137b.
127. Ayasofya 4804 [= 120 {15–18}]. The title on 1a, *Kitābu sharḥi al-Qaṣīdati al-mīmīyyati al-fāridiyyati al-mawsūmu bi-al-Lawāmi'i fī al-taṣawwufi wa-Risālatu al-lawā'ihi fī al-taṣawwufi wa-Risālatu sharḥi al-rubā'iyāti fī al-taṣawwufi wa-Kitābu naqdi al-nuṣūṣi fī sharḥi naqshi al-fuṣūṣi fī al-taṣawwufi*, is the same as the one in the inventory, which adds *fī mujalladin wāḥidin*. The current catalogue of the Süleymaniye Library lists only three of these four items. A variant title under the one on 1a, in tiny script, has the same four items. The list on flyleaf-2a, by the same hand as the one on 1a (?), has first included and then crossed through *Risālatu al-rubā'iyāti*, which is the item missing from the codex as we have it. Another instance of decisions made during binding and rebinding. Colophon on 215a gives the date of completion as 863/1458–59. Seal of Bayezid II on 1a and 215a.
128. Ayasofya 4837 [= 131 {17}–132 {3}]. This multi-text volume, with pieces in both Arabic and Persian, is titled by 'Atufi on 1a: *Kitābun fī lughāti al-Qur'āni wa-Risālatu sharḥi al-asmā'i al-ḥusnā wa-Risālatu al-hā'imī li-Najm al-Dīn al-Kubrā fī al-taṣawwufi wa-Kitābu kashfi al-asrāri fī al-taṣawwufi wa-Kitābu awṣāfi al-ashrāfi fī al-taṣawwufi wa-Kitābu farā'ida manthūratin min maqālāti 'Alī bin Abī Ṭālib -raḍīya Allāhu 'anhu- wa-Kitābu nathri al-la'ālī min kalimāti 'Alī bin Abī Ṭālib -raḍīya Allāhu 'anhu- wa-Kitābun fī al-lughati wa-risālatun fī ādābi al-khaṭṭi wa-Kitābu qānūni al-sa'ādati fī ṣinā'ati al-muḥāsabāti*. This is a perfect match with the entry in the inventory, which adds *fī mujalladin wāḥidin*. The current catalogue of the Süleymaniye Library lists six of these eight items. Three folios between the seal on the flyleaf and 'Atufi's title on 1a must have been added later during the binding, with some additional text “from the *tafsīr* of Qurtubī” and “names of the *qurrā'* [“reciters,” known for their canonical readings of the Qur'an].” Seal of Bayezid II on flyleaf-2a.

129. Ayasofya 4857 [= 324 {6–7}]. Title given by ‘Atufi on 5b, *Majmū‘atun min kutubin awwaluhā mukhtaṣaru Firdawsī al-ḥikmātī wa-Fihā Kitābu al-tabṣirātī fī al-hay‘atī wa- ~ Fihā Risālatu ‘Alī bin ‘Isā fī al-uṣṭurlābi*, with *mukhtaṣaru* added later under the line, is the same as the one in the inventory, which neglects to add on this occasion that the three texts are part of the same volume. Pages added (during the binding?) between the flyleaf and 5b, with two short texts; the current catalogue of the Süleymaniye Library lists ten texts altogether. Colophon on 75a indicates that the copy was completed in 611/1214–15. Seal of Bayezid on 5a and 306b.
130. Ayasofya 4875 [= 134 {18}–135 {5}]. For this multi-text volume in the horizontal form of a *safīna*, or *cönk*, ‘Atufi lists the items on the flyleaf as: *Kitābun min kalimāti Amīr al-Mu‘minīn ‘Alī -raḍīya Allāhu ‘anhu- wa-Kitābun fī al-maḥabbatī min qibālī al-taṣawwufī wa-Risālatun fī tafṣīlī al-qaḍā‘ī wa-al-qadari wa-Kitābu ishārātī al-Qur‘ānī fī ‘ilmi al-insānī fī al-taṣawwufī wa-Kitābu natā’ijī al-adhkārī wa-Kitābu tājī al-rasā’ilī wa-Kitābu al-‘abādilatī wa-Risālatu al-ifādātī li-l-Shaykh Muḥyī al-Dīn al-‘Arabī fī al-taṣawwufī wa-Kitābu ‘uqlatī al-mustawfizi li-l-Shaykh ayḍan fī al-taṣawwufī wa-Risālatu al-amrī al-muḥkamī li-l-Shaykh ayḍan fī al-taṣawwufī wa-thamānu rasā’ila*. The inventory follows the same order and wording but merely adds *fī mujalladīn wāḥidīn*. Another title begins on the page facing the long title but stops in the middle after the words *Kitābun min kalimāti Amīr al-Mu‘minīn ‘Alī -raḍīya Allāhu ‘anhu- wa-Kitābun fī al-maḥabbatī min qibālī al-taṣawwufī wa-Risālatun*. The current catalogue of the Süleymaniye Library lists twenty-one items in the volume. Some pieces have colophons with the date of completion given as 754/1352–53. Seal of Bayezid II on 1a and 247b.

Plate 32 [3-4].

LEARNING AND SOVEREIGNTY IN THE FIFTEENTH AND SIXTEENTH CENTURIES

‘Atufi’s inventory allows us to address important questions pertaining to Ottoman notions of time, history, writing, and reading. A point of singular value in the inventory is its temporality, situated almost precisely at the midpoint between the physical assertion of Empire with the conquest of Constantinople in 1453, and the appearance of a cultural, historiographical, linguistic, and legal canon, the efflorescence of which took its form from the middle of the sixteenth century. ‘Atufi gives us a snapshot, *in medias res*, of a project under construction and in process: the creation of a universalist imperial identity and culture genealogically identified with the House of Osman and historiographically associated with the notion of a “classical age” achieved under Süleyman the Lawgiver (r. 1520–66) at the hands of the likes of Taşköprizade (d. 1561), Celalzade Mustafa (d. 1567), ‘Aşık Çelebi (d. 1572), and Mustafa ‘Âli (d. 1600).

There are several corollaries to this proposition that deserve some emphasis, obvious though they might seem. The first is that the library is a construction, a product of conscious collection, selection, use, and deployment, as many contributions to this volume demonstrate, and not merely an inheritance at once random and a product of “tradition.” A second is that the library cannot be assumed to be directed, teleologically, to an endpoint in the late sixteenth, seventeenth, or eighteenth century. Whatever developed into a distinctively “Ottoman” culture in the later sixteenth century was not merely an organic phenomenon implicit in the library of 1502–3; it was equally a construction shaped by the massive perturbations of the reign of Selim I (r. 1512–20), the struggles of his successor to secure dynastic legitimacy and supremacy over opponents internal as well as external, and the establishment of a human apparatus

that could seem, at least, to control vast territories formerly ruled by the suddenly vanished states of the Timurids, Mamluks, and Turkman Akkoyunlus. Third, and finally, we should not assume that the Anatolian-Rumelian-Eastern Mediterranean world of the fifteenth century was, *in nucleo*, roughly comparable to that of the sixteenth century post-1520 or, more properly, post-1550. Beginnings do not necessarily imply natural endings. This is why I prefer, in reference to the full-blown “Ottoman” order of the “classical age,” to term the era of the inventory “Ottomanizing,” in the sense that it represents an intermediate phase in the construction of a new formulation of dynastic legitimacy and its lineage, a new language (Ottoman Turkish), and a new genealogy of knowledge particular to the Ottoman lands and their dynastic inheritance.¹ But the project that seems to have ended in this fashion had its origins in a very different world, to which I would like to draw attention, underlining the differences between the very fluid world of the fifteenth century and the apparently more structured and stable one of the sixteenth.

The deeper background of the intellectual organization underlying ‘Atufi’s inventory, and its substantial difference from the context of the later sixteenth century and beyond, is best observed through a snapshot of the career and oeuvre of ‘Abd al-Rahman al-Bistami (1380–1454). A mystic (Bistami) and lettrist (*ahl al-ḥarf*), Bistami was a key figure in the formulation of Ottoman sovereignty as a gnostic project at the court of Murad II (r. 1421–44, 1446–51), and his innovative “classification of the sciences” in the form of a tree with roots, trunk, and branches was certainly one of the major sources for ‘Atufi’s organization of his own material, as demonstrated by positioning, next to one another, of particular sub-

branches of knowledge (see the essays by Gardiner, Markiewicz, Şahin/Fleischer, and Şen/Fleischer in this volume). Bistami's 400-page classification of the sciences (undertaken in response to a request from Murad II spurred by ill-intentioned questioning of Bistami's scholarly and spiritual rectitude), which places the science of letters (*ilm al-ḥurūf*) at both root and pinnacle of all forms of learning, served as an organizational foundation for the massive royal library as catalogued in 1502–3, a library that itself contained an array of Bistami's works, including autograph copies and volumes sealed or signed as belonging to Sultan Bayezid II.

An Antiochene scholar raised and educated in Mamluk Syria and Egypt, and a witness to Timur's catastrophic sack of Aleppo in 1400, Bistami spent most of his career as an author and teacher largely in the "Ottomanizing" territories of Rumelia and Anatolia over a period that saw the dismemberment of the first Ottoman attempt at empire in 1402; a hotly contested restoration of territorial integrity between 1413 and 1421; and expansion under Murad II, whose son, Mehmed, would conquer Constantinople in 1453 and so fully assert the universal imperial stature of the Ottoman house. Bistami spent roughly the last three decades of his life in Bursa, the intellectual and spiritual capital of the Ottoman principality.

Bistami began his "Roman" career by explicating those portions of the Bunian corpus (see the essays by Burak, Gardiner in this volume) dealing with branches of the science of letters and divine names, and teaching his rapidly expanding corpus on much of the vast body of sciences, occult and otherwise, that came into his purview. He was a member of the neo-Brethren of Purity of the fourteenth and fifteenth centuries, who revived, claimed, and adapted the Pythagorean Hermeticism of their tenth-century Basran eponyms, together with, in Bistami's case at least, much of their Greek terminology. These elite intellectuals, who inhabited a central Islamic world increasingly defined as such by Timurid cultural and political prestige, were supremely self-confident and shared a millennialist project to effect social and spiritual renovation by joining their own command of the sciences and gnostic cosmology to a political (read dynastic) cause they identified as messianic.² The transformation of the Ottoman Murad

II from regional march lord to universal emperor of Islam and representative of the millennial dynasty, made visible in Bistami's literary traces and enduring scholarly prestige well into the sixteenth century, represents the single, long-lived success of the Brethren project. The longevity and vitality of Bistami's influence in the formation of dynastic ideology is most strikingly apparent in the sixteenth century when his apocalyptic compendium, *Miftāḥ al-jifr al-jāmi* (Key to the Comprehensive Prognosticon), constituted the Urtext from which the image of Sultan Süleyman as messianic conqueror, Last World Emperor, Renewer of Religion, and *axis mundi* was hewn.³

In this context I must dwell briefly on the political dimension of Bistami and his Brethren's project to create a millennial society on the basis of a marriage between the new sciences (which aimed to mobilize ancient wisdom in new, historically conditioned contexts) cultivated by the scholarly generation of the Brethren, and new rulers and lineages identified and guided by the scholars. One (but only one) significant part of the answer to the question of why the Ottoman branch of the project should have survived while others (Timurids, Mamluks, Turkmans) did not, lies in the unique novelty of the Ottoman location in the West and in the mystique that Rum enjoyed, in old Muslim lands, as the location in which a new and thus "pure" Islam was being erected, free from the pollution of historical accretion. A second factor, presented schematically in the form of a tree depicting the organic relationship of the sciences to one another, is the centrality of sovereignty as a revealed category to Bistami's preoccupations as a scholar who was both insistent on the approach of a final, apocalyptic resolution of history, and keenly aware of the significance in this context of Mongol and Timurid destruction. Knowledge of politics or rule, *siyasa*, is one of the four branches of Metaphysics, be it royal or prophetic (and the scholars are the inheritors of the prophets), general, domestic, or personal. The tree is reproduced in the manuscripts of both Bistami's *Fawā'ih al-miskiyya fī al-fawātiḥ al-makkiya* (Scents of Ambergris on the Meccan Revelations) and *Naẓm al-sulūk fī musāmarat al-mulūk* (The Ordering of Paths for the Accompaniment of Kings), as well as in a unique autobiographical work, *Durrat tāj al-rasā'il* (Pearl in the Crown

Fig. 1. TKS A. 1597, 56b–57a, al-Bistami, *Naẓm al-sulūk fī musāmarrat al-mulūk*, autograph, stamped twice (beginning and end) with the seal of Bayezid II.

of Tractates, Nuruosmaniye Library 3905). Knowledge (*ma'rifa*) of sovereignty is almost invariably marked in red ink. Its significance, in Bistami's world of the early fifteenth century, is hard to miss and yet more difficult to ignore.⁴

It is noteworthy that Bistami's inclusion of Politics as a branch of Metaphysics—as well as his use of Greek terminology for the Propaedeutic arts—represents, without reference or citation, a direct appropriation of the scheme of the original Brethren, which is also to say that the Brethren of his own time, rather than their predecessors, were the Sunni Muslim objects of Bistami's address. His task, in substantial measure, was to establish pre-Islamic Hermeticism as having a rightful and

licit place in the genealogy of knowledge appropriate to the Sunni (in his own case, proudly Hanafi) Muslim context of his own age. For Bistami, the root and pinnacle of knowledge was Lettrism, or the Science of Letters and Names, the *'ilm al-ḥurūf wa al-asmā'*, which was parallel and equal in revelatory power to Sufism while differing in method. Even in his own time, the universality and “orthodoxy” of his project were not everywhere understood, despite the coda to his Tree of Sciences, citing Plato to the effect that there is no form of knowledge so bad that ignoring it is not worse than knowing it. He penned for Murad II or another “high personage” his summa, *Scents of Ambergris on the Meccan Revelations* (with clear reference to the *Meccan Revelations* of Ibn

al-ʿArabi) in 1440–41, itself a massive classification of sciences with Lettrism at its core. This was a response to the implicit accusations of those “who would impugn the repute of one who came to Rum as a visitor” (TSMK, Hazine 274, 13a). His spirited display of the breadth of his learning and right to be placed among the “Men of Learning of the Time” concludes with a heresiography that reviles—twice—Fazlullah of Astarabad (d. 1394) as one who has perverted Lettrism, just as there are would-be Sufis who use a reputation for spiritual accomplishment for their own carnal purposes but whose existence does not therefore discredit the truth of the particular Way.⁵ This convergence, four years before the celebrated Edirne incident that resulted in the immolation by fire of the Hurufi propagandist who had so intrigued Prince Mehmed, shows, if nothing else, that dynastic interest in Lettrism was not, as generally presented, an aberrant, one-off incident. Bistami’s problem—apparently solved by his writing for the dynast and son whom he served for more than a decade—was to make clear the distinction between true and false Lettrism.

The manuscript evidence from Bistami’s own lifetime in Bursa sheds light on the relationship and evolution of Bistami’s intellectual and political activities. Successive iterations of his work most directly concerned with history, time, chronography, and sovereignty—*The Ordering of Paths for the Accompaniment of Kings*—not only trace the history of the Islamic community in terms of dynastic succession, notable natural events, the ebb and flow of warfare with Christian powers, the Mongol and Timurid disasters of the thirteenth and fourteenth centuries, and the births and deaths of major scholars, mystics, and philosophers as well as kings; they also contain the first internally “Ottoman” references to early Ottoman conquests as significant moments in world history, history itself being considered as significant a form of revelation as scripture. This project would seem to be intimately related to the genesis of the other earliest Ottoman sources we possess: the “almanacs” (*taqwīm*) that emerge from 1420 onwards, which contain chronologies in reverse—usually from Creation to the present—that tie proximate dynastic history and the present day to a larger cosmic course.⁶ It is in these ephemeral productions that we can trace, in the use of titulature, the elevation of Murad II (and his lineage) from the status of regional chieftain to world-conquering eschatological

ruler able to challenge the claims to such status of his Timurid rival Shahrukh. Bistami’s notions of time, history, and scholarship were highly influential during his lifetime and beyond. They helped Ottoman literati reimagine their place, and the place of the Ottoman enterprise, within prophetic, dynastic, and, indeed, cosmic history.

In 1430–31, Bistami completed an initial version, in three chapters, of his *Naẓm al-sulūk fī musāmarat al-mulūk* (Süleymaniye Library [hereafter SK], Halet Efendi 311), his major meditation on the measurement of time, the course of history, and renewal of religion (*tajdid*). Copies of the work proliferated after 1453 with a finale clearly linking the conquest of Constantinople to the End of Days and attendant events. Both before (in 1428–29, SK, Ayasofya 3503) and after 1430–31 (in 1431–32, SK, Reisülküttab 721), he composed a projected fifth chapter to the *Naẓm* in the form of a chronology of major events in the life of the Muslim community since its inception: events prophetic and political, successions of dynasties, natural disasters, and deaths of scholars and saints as well as kings and, increasingly, the back-and-forth of conquest and retreat between Muslim and non-Muslim powers, especially but not exclusively in the context of the Crusader wars.

The first of these chronologies ends with a different disastrous watershed, the Mongol destruction of the Abbasid caliphate in 1258. The second carries the chronology down to Bistami’s present day in 1431–32, beginning with the Ilkhans (as Muslim sovereigns), including of course Timur’s 1400 sack of Aleppo, but also inserting the first internal references we possess, beyond Ahmedi, to Ottoman history and ascent to dynastic status. The year 1299–1300 witnessed not only the Ilkhanid-Mamluk confrontation in Syria but also, according to the autograph, “the conquest of Bilecik by the Ghazi Osman son of Ertugrul, the ancestor of the Ottoman line (Bani ‘Uthman). It was one of the fortresses of the land of Rum, conquered by al-Rashid in 190 [AH], then the Rum [Romans/Byzantines] retook it and it remained in their hands until ‘Uthman retook it in this year.” A marginal notation adds: “In the year 731 Urkhan bin ‘Uthman Ghazi conquered Izniq” (SK, Reisülküttab 721, 40a).

We have here, then, in Arabic, the earliest prose and non-epigraphic invocations of ghazi ideology from an

Ottomanizing source. These are only magnified and amplified in the Timurid-inspired chronographic sources represented by the *taqwīms*, in the composition of which, in Murad II's reign, Bistami was likely deeply involved in Bursa. Two of these bear his clear imprint in the form of dedicatory rosettes—dated 1439 and 1440 respectively—that are fully Mamluk in form, eschewing the more Seljuk style of titulature common to both earlier and later exemplars and relying on Mamluk forms natural to Bistami, which were utterly alien to “Ottoman” norms.⁷ The second of these is extraordinary in two respects. First, it follows Bistami's necrologies closely in detailing the deaths of saints and scholars along with the deaths of sultans. Secondly, after the necrology and in its dedication to the living ruler—in contrast to the carefully calibrated terminology used in the reverse chronology—this *taqwīm* elevates all rulers of the lineage back to Murad I to the status of “khan,” i.e., universal ruler. Five years later, yet another almanac of 1446 (Oxford Bodleian Hunt. 16) further claims the status of “Caliph of the Messenger of God among the Muslims” for Murad, along with clear signs of divine mandate that are elaborated in unusual and extravagant titulature (“Succoured by the Support of the Beneficent,” and yet more potently *Ṣāhib-qirān*, “Lord of the Auspicious Conjunction,” universal conqueror in the Timurid mold.

Suffice it to say that these assertions of Ottoman superiority and divine right continued to be made in the reigns of the Conqueror and his progeny. The question we are attempting to answer here is: when and where did these begin? The evidence presented above, and the convergence of the chronographic and historiographical activities of Bistami with the appearance of methodologically cognate materials and concerns in the chronological sections as well as texts of the Ottoman almanacs that begin to proliferate in the reign of Murad II, would suggest that the location is Bursa, the period roughly (but still fairly precisely) 1428–39. At this point, still close to the disaster of 1402, two decades from the Interregnum, with Murad II still asserting control over newly unified territories, the primary ideological target and rival for supremacy in an Islamic mode would have been the Timurid Shahrukh. It was his claims to emperorship of Islam, caliphate, and the status of Centennial Renewer to which Murad II's supporters, among them Bistami, would have been reacting. Timur had reminded

Ibn ʿUthman, in 1402, of his limited and regional status: Bayezid I's grandson would challenge Timur's son for at least equality of supreme status among Muslims in the apocalyptic/messianic idiom of the Timurid and Mamluk *Ikhwān al-Ṣafāʾ*—hence the direct connection between Metaphysics and Politics/Sovereignty.

It is equally noteworthy that by the end of the sixteenth century and beyond—despite Bistami's ongoing prestige evidenced by his inclusion in scholarly biographical dictionaries, multiple copies of his best-known works (*Naẓm*, *Fawāʾih*, and above all *Miftāḥ*), and even translations into Turkish (*Fawāʾih*, *Miftāḥ*)—the learning underlying Bistami's work was no longer largely understood. Even the translator/adaptor of the *Miftāḥ*, selected in 1597 for translation and sumptuous illumination, noted that he had been given the commission because of his excellent knowledge of Arabic; even so, he could not be certain of the accuracy of his translations because he did not understand the science underlying the original composition, and therefore had left Arabic expressions of “secrets” he could not comprehend in the original marked in red (TSMK, Bağdat 373). The Ottoman translator of Bistami's *Fawāʾih*, commissioned in the reign of Selim II (r. 1566–74), was either so aware of political sensitivity or so perturbed by the denunciations of Fazlullah because they might actually imply an ongoing “Hurufi” connection for the dynasty that he omitted them entirely from his rendition.⁸ Finally, from the late sixteenth century, scribes producing copies of the popular *Fawāʾih* or *Naẓm*, charged with reproducing, among other things, the Tree of Sciences, show themselves to have been largely flummoxed by the inclusion of Politics as a branch of Metaphysics, presumably because the inclusion made no sense to them. The subcategories of *siyasa* (prophetic, royal, general/public, domestic, individual, etc.) fade away, *siyāsa* is not even recognized, sometimes rendered as the more metaphysical-sounding *sāʾa* (The Hour), and sometimes reduced to unrecognizable scrawl. The later unrecognizability of the world of the fifteenth century is writ large, and tellingly so.

NOTES

Author's note: I must express profound gratitude to the friends and colleagues who have played a role in the gestation and pro-

duction of this essay, which, slight though it is, is meant as an address to the significance of 'Atufi's inventory as a whole, and so also to the virtue of our collaborative project, now with some of us for nearly a decade. Kaya Şahin and Tunç Şen, as ever in our acquaintance, have been there from beginning to end; their suggestions and editorial skills have been crucial to the production of a finished essay at a time when health-related events made the physical task of editing extremely difficult. Colin Heywood, trusted friend and companion in most that matters over four decades, at a late stage read acutely and commented yet more so, to excellent effect. At the earliest stages of this essay as in later ones, enthusiastic and informed discussion with Nikolay Antov, Abdurrahman Atçıl, Evrim Binbaş, Snjezana Buzov, Ferenc Csirkés, Noah Gardiner, Sooyong Kim, Mayte Green-Mercado, Christopher Markiewicz, Nühket Varlık, and Hüseyin Yılmaz always kept things moving in the right direction.

1. One very clear illustration of the cultural intermediacy of the document is found in 'Atufi's grappling with the issue not only of classifying but also rendering in Arabic script works written in a form of Turkish, of which there are a relatively small number as yet. Indeed, as Ferenc Csirkés very plausibly suggests, it may be the case that the inventory served a secondary function as a means of taking stock of such holdings at a time when interest in Turkish production was on the rise, and a mere two decades before an "Ottoman" form of written Turkish was fully launched as an imperial language of letters, as well as of diplomacy and administration. There was not yet, as of 1502–3, either a standard language or a single system for rendering Turkish in Arabic script, though as Csirkés notes, 'Atufi was aware of several methods. 'Atufi's own usage in his Ottoman introduction on principles of classification bears the imprint of his active grappling with the problem of how to render Arabic or Persian vocabulary in a linguistically Turkish context. It was not carelessness or sloppiness that led him to variant usages (for example, sometimes keeping, sometimes omitting a final hamza on *lhyā*), but rather his cognizance of multiple systems and, importantly, a keen awareness of the underlying morphology and grammar—*vide* his extensive discussion of the use or non-use of the Arabic definite article in the listing of book titles. Particularly striking in this regard are several instances of his giving multiple vocalizations to the same Arabic (or Perso-Arabic) word, indicating that he was aware of the original form: as a Turkish vocabulary item, it had a different vocalic structure (with a second prosthetic vowel added), and that it was to be read as Turkish and so the prosthetic vowel dropped with the addition of Persian *izafa* (9/11, *şifir/şifir*). The linguistic enterprise, like that of collection, was a serious and complex one.

4. A simple point of comparison that suggests the originality of Bistami's positioning of *siyāsa* (in all its forms) as a branch of Metaphysics is afforded by Nasir al-din Tusi's *Nasirean Ethics*, which of course formed the foundation of the later (and yet more temporally proximate) ethics treatises of Davani (d. 1502) and Kinalızade 'Alī Çelebi (d. 1572). In his Aristotelian (and Avicennan) classification of the branches of philosophy, Tusi places Metaphysics in the speculative sciences, while Politics belongs to the practical ones. Leaving aside the complexities of Tusi's understandings of imamate and how these were adapted in late fifteenth- and late sixteenth-century Sunni contexts, we may usefully note the striking differences in the placement of crucial forms of knowledge between Bistami (and the Fenarian circle to which he was firmly attached) in the early fifteenth century, on the one hand, and both earlier and later schemes (thirteenth century, sixteenth century) on the other.

Observations on the significant omissions are my own.

ARTISTIC ASPECTS OF SULTAN BAYEZID II'S BOOK TREASURY COLLECTION: EXTANT VOLUMES PRESERVED AT THE TOPKAPI PALACE MUSEUM LIBRARY

The Ottoman sultans' love of books has led to the Topkapı Palace Museum becoming home to one of the most significant manuscript collections in existence. The manuscripts were first systematically catalogued during the reign of Bayezid II, when the entire collection was recorded in the inventory of his librarian 'Atufi and each volume stamped with the sultan's seal. As the manuscript treasury collection grew, later sultans bequeathed some books to libraries they founded within the palace grounds or to other royal libraries. Preliminary studies of the manuscripts remaining today in the Topkapı Palace Museum Library collection provide evidence—in the form of seals, dedications, or annotations of ownership—that at least 1,010 of these manuscripts belonged to the library of Bayezid II. A large number of these were manuscripts that the sultan inherited from his father, Mehmed II. The library collection contains works on an extensive range of subjects, shedding light on history, science, culture, and art in the vast geographical expanse of the Islamic lands at the time. The contents of Bayezid II's library, dating from the ninth to the beginning of the sixteenth century, included artistic manuscripts prepared in such cultural hubs as Tabriz, Herat, Baghdad, Damascus, Cairo, Bursa, and Istanbul. 'Atufi's inventory not only reveals the holdings of Bayezid II's manuscript treasury, but it also provides clues about the subsequent evolution of the collection. My essay analyzes 784 extant manuscripts that I initially identified as belonging to Bayezid II's collection at the Topkapı Palace Museum Library, a number that has since then increased to 1,010 and will likely continue to grow.¹

The manuscript collection is foremost among the Ottoman treasures accumulated in the Topkapı Palace

Museum in Istanbul. Once kept in the Inner Treasury of the Ottoman palace, the collection was initiated during the reign of Sultan Mehmed II (r. 1444–46, 1451–81) and was augmented by the addition of numerous works under later sultans, all bibliophiles, which resulted in the accumulation of tens of thousands of books over the years. The manuscript collection was built with works commissioned by the sultans as well as those acquired by various other means, such as inheritance, purchase, gifts, and booty.

From the reign of Mehmed II onward, manuscripts arriving at the Topkapı Palace were placed in the Inner Treasury of the third courtyard, under the supervision of a librarian. Inner Treasury registers of Bayezid II (r. 1481–1512), dated 1496² and 1505³, list artifacts stored on the ground floor and in the basement halls of this building, which was constructed during his father's reign in the mid-1460s. Among the listed artifacts are chests containing unbound pages, Qur'ans, non-Islamic books, loose-leaf paintings, archival documents, historical and astrological calendars, maps, and architectural ground plans. The Inner Treasury was employed not only as a storage space but also as a library, whose Islamic book collection was catalogued separately by 'Atufi.⁴ The holdings of this manuscript treasury were subsequently augmented by booty appropriated during the reign of Sultan Selim I (r. 1512–20) after his victories over the Safavids and Mamluks. An inventory dating from Selim's reign lists historical manuscripts, Qur'ans, and parts of the Qur'an, as well as a group of unidentified non-Islamic (*gebrî*) manuscripts, the latter most probably from the collection of Mehmed II.⁵ An inventory dated 1564, prepared during the reign of Sultan Süleyman (r. 1520–66), mentions a number of manuscripts in Turkish, Persian,

and Arabic stored in closets in the throne room (*dīvānhāne*) of the Inner Treasury.

The manuscript collection of the Ottoman imperial palace continued to expand in the seventeenth and eighteenth centuries. From time to time, sultans were known to have manuscripts removed to their Privy Chamber (Has Oda) in the male or the harem quarters of the third court, where they had established personal libraries consisting of illustrated works, Qur'an copies penned by celebrated calligraphers, as well as literary, scientific, and historic works of particular interest. Notes found on some manuscripts, such as *odadan çıkan Fārsī* / *odadan çıkan Türkī* / *odadan çıkan 'Arabī* indicate that books on loan at the Privy Chamber were frequently being returned to the Inner Treasury.

The first ruler to construct a purpose-built library at the Topkapı Palace was Sultan Ahmed III (r. 1703–30), who laid its foundation stone himself. This freestanding library is located at the middle of the third courtyard of the palace. According to its endowment deed (*waqfiyya*),⁶ the sultan commissioned this library, named after himself, in order to gather the many fine manuscripts scattered throughout the palace under a single roof so that they might be better preserved and protected from damage rather than forgotten in some corner, and so that the aghas of the Inner Palace (*Enderun ağaları*) could make use of them. The library collection of Ahmed III is preserved in its entirety today.⁷ Other manuscripts were later added to this collection as endowments by Sultan Abdülhamid I (r. 1774–89) and Sultan Selim III (r. 1789–1807).⁸

As the idea of establishing libraries took root, certain manuscripts were transferred as endowments from the Inner Treasury to the royal pavilions surrounding the Privy Chamber. The Revan Pavilion Library, for instance, was established with books endowed by Mahmud I (r. 1730–54) and was expanded with new endowments from Osman III (r. 1754–57) and Mustafa III (r. 1757–74). The Baghdad Pavilion Library, in turn, was established with manuscripts endowed by Sultan Abdülhamid I (r. 1774–89) and Sultan Selim III (r. 1789–1807).⁹

After the conversion of the palace into a museum in 1924, some of the manuscripts preserved for centuries in the Inner Treasury, the Privy Chamber, the Ahmed III Library, and in various other pavilions and the dormito-

ries for pages within the Topkapı Palace were gathered together. These manuscripts were transferred to the former Mosque of the Aghas in the third courtyard of the palace in 1928, forming the current manuscript library. The ten closets filled with manuscripts in this library were labeled according to the original location of their contents within the palace and classified according to their fields of knowledge and languages, as in the former Ottoman library system.¹⁰

This article examines the manuscripts in the current Topkapı Palace Museum Library collection in such varied fields as science, religion, literature, and history that bear the almond-shaped seal impressions or ownership annotations (*ex libris*) of Bayezid II, focusing particularly on volumes of artistic value. The selected works are some of the finest manuscripts, with bindings, illuminations, and calligraphy in diverse styles from various periods, testifying to the significance of this library collection in terms of the arts of the book. The collection stands out for its broad chronological span and its rich stylistic diversity. During the reign of Sultan Murad II (r. 1421–51), manuscripts were copied and accumulated in cities such as Amasya, Bursa, and Edirne, then the centers of the Ottoman multicultural landscape. Upon the death of Murad II, these books were transferred to the library of his son and successor Mehmed II. Manuscript production gained further momentum during the latter's reign, particularly after the conquest of Constantinople in 1453, when the manuscript workshops were transferred to the new capital. Upon his accession, Mehmed II first had his own library transported to Edirne from the provincial capital of Manisa, which he had governed as a prince, then subsequently to Istanbul, where he installed the collection in the Topkapı Palace upon the completion of the Inner Treasury in the mid-1460s. Mehmed II persistently enhanced his library collection by ordering copies of selected manuscripts in Arabic, Persian, and certain western languages and commissioning the translation of a number of works into Turkish. Many of these manuscripts were works of art transcribed by master calligraphers, illuminated by master gilders, and covered with exquisite bindings elaborately worked in an array of different colors and techniques. Upon the death of Mehmed II, this library was inherited by his son and successor Bayezid II.

Even as a prince, Bayezid II had already shown a keen interest in culture and the arts. Surrounded as he was by those who shared his interests, he had transformed his princely palace in Amasya into a vibrant hub of artists and scholars. The cultural exchanges and activities that took place in this setting provided a stimulus for the prolific production of manuscripts dedicated to the future sultan. Once Bayezid II became sultan, his patronage of the arts and sciences continued, enriched by interactions with metropolitan cultural centers in Iran and Central Asia, especially Tabriz and Herat. Some of the finest illuminated manuscripts produced in those locations were sent as gifts to Bayezid II. After 1485, manuscript production gained particular momentum in Istanbul as many poets, authors, and calligraphers dedicated and gifted their works to the sultan, who generously rewarded them for their work. Hence it was the combination of two factors—an imperial patron who was a true bibliophile, and the protection of manuscripts at the Topkapı Palace—that proved instrumental in creating what was to become one of the most significant collections of the Inner Treasury.

Before completing this essay, I had identified 784 manuscripts bearing the almond-shaped seal impressions of Bayezid II, a number that has increased since then. Not included in the present essay, the newly identified manuscripts are incorporated as a separate “addendum” at the end of my list of manuscripts stamped with Bayezid II's seal at the Topkapı Palace Museum Library (see Appendix I at the end of this volume). Some of these manuscripts also feature Bayezid II's *ex libris*, indicating that they belonged to his library. To fully reconstruct and study this extensive manuscript collection is clearly a challenging, if not daunting, task that requires further research. The collection comprises works dating from the ninth to the first decade of the sixteenth century that are characterized by a diversity of provenance from throughout the Islamic world, including manuscripts produced in the Ottoman palace workshops. Works prepared in the first half of the fifteenth century in particular merit rigorous examination. It was in this era that the intercultural exchange and dynamic flow of manuscripts and artists among the Ottoman centers of Bursa, Edirne, and Istanbul; the

Timurid capitals of Herat and Samarqand; the three Turkmen cities Shiraz, Baghdad, and Tabriz; and the Mamluk workshops of Cairo and Damascus exerted a significant impact on the arts of the book. The arts of binding and illumination in manuscripts prepared at the Ottoman capitals tended to vary stylistically from one center to another. What is more, certain manuscripts of non-Ottoman provenance later had sections added to them and were rebound in the Ottoman workshops, making it particularly difficult to distinguish between these refurbished works and those of Ottoman origin. Based on their dedication inscriptions, dates of copying, calligraphers, and the stylistic features of their bindings and illuminations, I have grouped the 784 manuscripts into three sections below: those from the reign of Mehmed II and those bearing dedications to him (146 manuscripts); manuscripts from the reign of Bayezid II and those dedicated to him (117 manuscripts); and manuscripts prepared in other locations throughout the Islamic world, along with those that lack dedications to Ottoman sultans but are attributable to Ottoman workshops (521 manuscripts).

MANUSCRIPTS FROM THE PERIOD OF SULTAN MEHMED II AND THOSE DEDICATED TO HIM

Mehmed II, who since his days as a prince had studied under the most important scholars of the day, held culture and the arts in high regard and amassed a great number of manuscripts in his library. As noted above, upon his accession to the throne the sultan brought his library first from Manisa (where he had been based as a prince) to the Edirne palace, and later to Istanbul when it became the new Ottoman capital. His high esteem for the arts of the book and his sustained patronage of their creators stimulated the production of books on many subjects during his reign. Manuscripts created under the patronage of Mehmed II and his grand vizier Mahmud Pasha (d. 1474) are true works of art in terms their superb calligraphy, illumination, and bindings.¹¹ Manuscripts were produced primarily in scientific fields such as medicine, philosophy, logic, and geography, but manuscripts on religion, philology, and literature were also

created, with their autograph copies entering Mehmed II's library.

Of the 784 manuscripts mentioned above, 146 were prepared during the reign of Mehmed II, many of which bear dedications to him,¹² although none were stamped with his seal. We must therefore conclude that many manuscripts in the library collection of Bayezid II that bear his seal but lack any record of attribution to him must have originated in the library he inherited from his bibliophile father. In most such manuscripts, there are indications that they were prepared for Mehmed II. Although some works lack such evidence, they can be attributed to the era of Mehmed II stylistically by means of their calligraphy, illumination, and bindings. Dominated by works on the sciences (98 in total), these manuscripts span a range of topics, including literature (24 manuscripts), religion (20 manuscripts), and history (4 manuscripts). The consistently high quality of their calligraphy, bindings, and illumination make these manuscripts outstanding examples of their time. Foremost among scientific manuscripts are Arabic and Persian works on philology (27 manuscripts), including dictionaries and books of grammar, prosody, and rhetoric. Ten of these were specifically prepared for Mehmed II.¹³ One of them was dedicated to the sultan by its author, Molla Gürani, who had been tutor to Mehmed II since his time as prince. This Arabic work is a 600-couplet treatise in verse on the science of prosody and rhyme, titled *al-Shāfiya fī al-arūd wa-al-qāfiya* (The Comprehensive Treatise on Prosody and Rhyme).¹⁴ Dated 1463, it is written in *naskh* script in a two-column, eleven-line format over 23 folios and is bound in brown leather. The binding covers are decorated with a central *shamsa* (medallion) and corner pieces framed with a border, all of which are decorated with *khiṭāyī* (chinoiserie lotus and peony floral designs), *rūmī* (vegetal scrollwork decorations), and foliate stemmed motifs (fig. 1), while the doublures bear *shamsas* decorated with tooled leather and *rūmī* scrolls over a blue ground. The illuminated medallion on fol. 1a is inscribed with the title of the work, the author's name, and his dedication to Sultan Mehmed II.

The second largest group among Mehmed II's books on the sciences consists of works on wisdom and philosophy. Of these 19 works, 9 were prepared for Mehmed II and dedicated to him.¹⁵ One of these works written by

the Greek philosopher Apollonius of Tyana (d. 100 CE), known as Balinus, is titled *Sirr al-ṭabī'a wa-al-'ilal wa-al-ma'lūmāt li-Bālīnūs* (The Secret of Nature and the Causes and the Infirmities by Balinus).¹⁶ Each of its 119 folios has 25 lines of *naskh* script. The brown leather binding covers have *shamsas* and corner pieces within a border frame. The *shamsa* medallions are divided into small hexagons decorated with large interlaced *khiṭāyī*, *rūmī*, and foliate stem motifs. The rectangular upper and lower registers of the illuminated frontispiece of the opening page (fol. 1a) contain a dedication to Mehmed II in gold letters in *thuluth* script on a dark blue ground (fig. 2). The central section features concentric oval medallions, the innermost bearing the title of the work in gilded *thuluth*, while the encircling medallion is decorated with palmettes, surrounded by *rūmī* motifs and foliate stem infill.

Among philosophical manuscripts copied for Mehmed II, the highest priority is given to works by the renowned philosophers Ibn Sina (Avicenna, d. 1037)¹⁷ and Shihab al-Din al-Suhrawardi (d. 1234),¹⁸ along with commentaries on their works. Some of these manuscripts were transcribed by leading master calligraphers of the day. One such calligrapher is 'Ali ibn Fathallah al-Ma'dani al-Isfahani, who penned three manuscripts.¹⁹ Two of these are Ibn Sina's *al-Ishārāt wa al-tanbīhāt* (Remarks and Admonitions)²⁰ and a commentary on Athir al-Din al-Halabi's (d. 1265) *Sharḥ hidāyat al-ḥikma* (Commentary on the Guide to Philosophical Wisdom).²¹ The copy of Ibn Sina's work (TSMK, A. 3278) is dated 869 (1464–65). The dark brown binding covers are decorated with lobed *shamsa* medallions with pendants, while the doublures are of plain, light brown leather. This 165-folio manuscript is written in *dīwānī* script with 11 lines per page. The dedicatory opening page (fol. 1a) contains the book title and a dedication to Mehmed II. The headpiece is illuminated in a manner typical of the period and has exquisite calligraphy (fols. 1a–2b, fig. 3). The copy of Athir al-Din al-Halabi's work (TSMK, A. 3213), dated 872 (1467), is transcribed in *ta'liq* script in 17 lines on each of the 244 folios. Its brown leather binding covers bear a lobed oval *shamsa* with pendants and corner pieces, containing large *khiṭāyī*, *rūmī*, and palmette motifs. The doublures contain a lobed, central *shamsa* with pendants, and corner pieces embellished with leather

Fig. 2. Illuminated frontispiece page with dedication, almond-shaped seal of Bayezid II, and round seal of Ahmed III, Apollonius of Tyana, *Sirr al-ṭabīʿa wa-al-ʿilal wa-al-maʿlūmāt li-Bālīnūs*, Istanbul, pre-1480, TSMK, A. 2082, fol. 1a. (Photo: Courtesy of the Topkapı Palace Museum Library)

Fig. 3. Double page with illuminated rectangular headpiece, Ibn Sina, *al-Ishārāt wa al-tanbīhāt*, calligrapher ‘Ali ibn Fathallah al-Ma‘dani al-Isfahani, Istanbul, 1464–65, TSMK, A. 3278, fols. 1b–2a. (Photo: Courtesy of the Topkapı Palace Museum Library)

rūmī and foliate stem motifs tooled over a gilded ground (fig. 4). Copied by ‘Ali ibn Fathallah al-Ma‘dani al-Isfahani, these are among the finest examples of manuscript arts, which amply reflect the characteristic taste of the period with their bindings, illumination, and calligraphy.

The third largest group of scientific works belonging to Mehmed II that later entered the library of Bayezid II consists of medical texts, some of them copied for the sultan himself (16 works).²² One such manuscript, copied for Mehmed II, is the *Kitāb al-Karma* (Book on the Grapevine), an Arabic translation of the work of the famous Greek physician and philosopher Galen (d. 210

CE) by the Iraqi Nestorian Arab physician Hunayn b. Ishaq (d. 873).²³ The manuscript of 84 folios, each with 11 lines of *naskh* script, specifies the benefits of the grapevine and its fruit, and is written in question and answer format. The dark brown leather binding covers are embellished with large *shamsas* and corner pieces, decorated with *khiṭāyī* motifs and foliate stems. The doublures and envelope flap of maroon colored leather binding have lobed *shamsas* and corner pieces, containing leather filigree *rūmī* and stem motifs on a blue-painted and gilded ground (fig. 5).

The collection has four manuscripts penned by the calligrapher Shams al-Din al-Qudsi, who copied

Fig. 4. Lower doublure of binding, al-Halabi, *Sharḥ hidāyat al-ḥikma*, calligrapher ‘Ali ibn Fathallah al-Ma‘dani al-Isfahani, Istanbul, 1467, TSMK, A. 3213. (Photo: Courtesy of the Topkapı Palace Museum Library)

Fig. 5. Lower doublure of binding, translation of Jalinus (Galen), *Kitāb al-Karma*, Istanbul, pre-1480, TSMK, A. 2038. (Photo: Courtesy of the Topkapı Palace Museum Library)

Fig. 6. Upper binding cover, al-Marzuqi, *Sharḥ al-ḥamāsa*, calligrapher Shams al-Din al-Qudsi, Istanbul, 1465, TSMK, R. 706. (Photo: Courtesy of the Topkapı Palace Museum Library)

Fig. 7. Opening double page, al-Tha'alibi's *Fiqh al-lugha wa sirr al-'arabiyya*, calligrapher Shams al-Din al-Qudsi, Istanbul, 1475, TSMK, A. 2753, fols. 1b–2a. (Photo: Courtesy of the Topkapı Palace Museum Library)

multiple works for Mehmed II.²⁴ These manuscripts on poetry, ethics, linguistics (lexicons), and philosophy are in *naskh* script. One of them is bound in leather, the other three in cloth. The earliest in date is a commentary on the renowned Abbasid poet Abu Tammam's (d. 846) *Dīwān al-Ḥamāsa* by Ahmad b. Muhammad al-Marzuqi (d. 1030), titled *Sharḥ al-Ḥamāsa* (Commentary on *Heroism*).²⁵ The copy prepared for Mehmed II in 869 (1465) consists of 416 folios in *naskh* script, each of 21 lines. It is a masterpiece of binding, illumination, and calligraphy. The binding is of dark brown leather. Its oval lobed *shamsas* with pendants and corner pieces are filled with *khiṭāyī*, *rūmī*, floral rosette, and foliate stem motifs (fig. 6). The doublures and the envelope flap of light brown leather feature lobed rectangular *shamsas* with leather filigree palmette and *rūmī* motifs over a gilded ground. The illumination is typical of the style of Baba Nakkaş, the renowned illuminator active in the period

of Mehmed II. The rectangular dedicatory frontispiece is illuminated in the style of the era, and its inscription states that the manuscript was prepared for the sultan (fol. 1a). Although the initial folios of the manuscript do not reveal any traces of the seal of Bayezid II, a mark is visible on the final folio. Closer inspection reveals this to be a trace remaining from the erased seal of Bayezid II. The seal on the initial folios was most likely erased as well, since signs of erasure are also seen on the seal of Mahmud I on the opening page, which records his endowment of this volume to the Revan Pavilion.

Another manuscript copied by Shams al-Din al-Qudsi is by the scholar of Arabic language and literature, 'Abd al-Malik ibn Muhammad al-Tha'alibi (d. 1038), titled *Fiqh al-lugha wa sirr al-'arabiyya* (The Science of Language and Secrets of Arabic).²⁶ This work on synonyms and literary style, copied in 880 (1475), comprises 132 folios with 17 lines of *naskh* script on each (fig. 7). The

Fig. 8. Binding cover, al-Tha'alibi, *Fiqh al-lugha wa sirr al-'arabiyya*, calligrapher Shams al-Din al-Qudsi, Istanbul, 1475, TSMK, A. 2753. (Photo: Courtesy of the Topkapı Palace Museum Library)

binding is made of patterned green velvet woven in two layers, a feature characterizing many volumes prepared for Mehmed II (fig. 8). The fabric is embellished with a gilded floral rosette pattern. Several manuscript bindings from the reign of Mehmed II are covered in fabrics not specifically woven as book covers, but that were adapted from existing pieces destined for other uses.²⁷ There are no examples of cloth-covered bindings among the manuscripts known to have been prepared for Bayezid II.

Three scientific manuscripts on prosody, mathematics, and logic, which were copied for Mahmud Pasha, Mehmed II's bibliophile grand vizier, were inherited by

Bayezid II from his father's library.²⁸ The manuscripts in question bear notable similarities to those prepared for Mehmed II in terms of their content, bindings, illumination, and calligraphy. A copy of the mathematician-astronomer Nizam al-Din al-Nisaburi's (d. 1328–29) treatise on the basic principles and applications of arithmetic, titled *al-Risāla al-shamsiyya fī al-ḥisāb* (The *Shamsiyya* Treatise on Arithmetic), was prepared for Mahmud Pasha according to its dedication (fol. 1a).²⁹ The manuscript, dated 870 (1470), has 84 folios with 13 lines of *ta'liq* calligraphy on each. The dark brown covers of its binding are decorated with oval *shamsas*, infilled with *rūmī* motifs, and gilded corner pieces within a border frame, while the doublures are of plain burgundy leather. The opening page includes the title of the work in addition to the aforementioned dedicatory inscription (fig. 9).

Another scientific manuscript is a copy of Shams al-Din Muhammad Fakhri Isfahani's (d. 1348) book on rhetoric. Titled *Mi'yār al-jamālī* (The Jamali Touchstone) and dedicated to Jamal-al-Din ibn Mahmud-Shah Inju, it comprises four sections on prosody, rhyme, poetry, and a Persian lexicon.³⁰ Its 194 folios are written in *ta'liq* script with 15 lines per page. The undated manuscript must have been copied around 1470. The dark brown binding covers are ornamented with a large central *shamsa* and corner pieces, which extend over the surface of the covers (fig. 10). The light brown doublures are decorated with *shamsas* and corner pieces infilled with palmette, *rūmī*, and stem motifs in filigree leather on a gilded ground (fig. 11).

Among the books inherited from Mehmed II's library by his son Bayezid II are 19 works on religious subjects, including Qur'anic commentary, hadith, jurisprudence, dogma, and Sufism.³¹ One of the most interesting of these works is an Arabic translation of the Bible, which was probably prepared in Syria during the fourteenth century.³² The manuscript contains the four Gospels and information about their authors, the four Evangelists. The binding with an envelope flap is not original. The manuscript has 226 folios with 13 lines of *naskh* script throughout. It contains four miniature paintings depicting scenes from the gospels, as described by the Evangelists, which share typical characteristics of fourteenth-century Byzantine painting. One of these is a Deisis with the Christ figure depicted at the center,

Fig. 9. Illuminated frontispiece with dedication, almond-shaped seal of Bayezid II, and round seal of Ahmed III; al-Nisaburi, *al-Risāla al-shamsiyya fī al-ḥisāb*, Istanbul, 1470, TSMK, A. 3150, fol. 1a. (Photo: Courtesy of the Topkapı Palace Museum Library)

Fig. 10. Upper binding cover, Shams al-Din Muhammad Fakhri Isfahani, *Mi'yār al-jamālī*, Istanbul, ca. 1470, TSMK, A. 1706.

flanked by John the Baptist on the left and the Virgin Mary on the right. This painting is on the right hand page of a bifolio (1b–2a), whose facing left page has an illuminated rectangular plate, the central square of which features a cruciform device with arms merging into eight-pointed stars over a ground filled with vegetal and foliate motifs (fig. 12). The composition is completed with two rectangular frames on the upper and lower registers, which are inscribed in Kufic script on a dark blue ground. The entire composition is surrounded by a wide border of cartouches infilled with vegetal and medallion motifs. Although this manuscript contains

no record of provenance, it is thought to have entered Mehmed II's library during his reign. It must be one of the Arabic Bible translations mentioned in 'Atufi's inventory (364 {14–19}).

A copy of the *Qiṣṣa-i 'Antar al-'Absī* (Epic of 'Antar al-'Absi), translated from Arabic into Turkish, also bears the seal of Bayezid II.³³ This work is a folk tale on the life and amorous exploits of the pre-Islamic era poet, Antara b. Shaddad b. Amr al-'Absi (d. 608). Although the manuscript does not contain any indication that it was prepared for Mehmed II, it is known that the work was translated into Turkish in 1477 by the order of the sultan, and that this copy is the manuscript in question. Its 317 folios with 17 lines on each are penned in *naskh* script. On fol. 1a are various annotations together with the almond-shaped seal of Bayezid II at the lower left corner. The seal above the page reads *Vakf-ı hāne-i hazine-i hümayūn fī sene 1135* (Endowment of the Chamber of the Imperial Treasury, in the year 1722–23) (fig. 13). This seal, which dates from the reign of Ahmed III (r. 1703–30), indicates that the manuscript was endowed to the Dormitory (Chamber) of the Treasury Pages.³⁴ The annotations on that folio list the names of various readers who borrowed the manuscript. One of these is dated 1258 (1842) and states that the book was read by a servant of the palace school named Ahmed Rıfat Efendi. Superimposed over this note is a small circular seal bearing the name "Ahmed." Another annotation dated 1196 (1781) specifies that this volume was read three thousand times by the Qur'an reciter Hafız Bekir Efendi at the Dormitory of the Treasury Pages. The final note indicates that another reciter, Hafız Münib, read the manuscript in 1258 (1842). These notes show the popularity of this work among the volumes in the palace.

MANUSCRIPTS FROM THE REIGN OF SULTAN BAYEZID II AND THOSE DEDICATED TO HIM

Bayezid II's relationship with poets, calligraphers, and scholars began during his governorship as a prince in Amasya. There, at the palace of the princes, he acted as patron to a significant milieu of poets, scholars, and masters of the arts, such as the renowned calligrapher Shaykh Hamdullah and Hamdullah's tutor Hayreddin

Fig. 12. Double page with a Deisis painting and a rectangular plate with geometric patterning, Arabic translation of the Bible, probably Syria, fourteenth century, TSMK, A. 3519, fols. 1b–2a. (Photo: Courtesy of the Topkapı Palace Museum Library)

Marashi, the brothers Tacizade Ca'fer Çelebi and Sa'di Çelebi, Müeyyedzade Abdurrahman Çelebi, Zenbilli 'Ali Efendi, the historian Şükrullah, the physician Şerefeddin Sabuncuoğlu (d. 1468), and poets such as Refiki, Afitabi, and Kabuli. Bayezid II, who took calligraphy lessons from Shaykh Hamdullah, was known to be a skilled calligrapher and used the pen name 'Adlî in his poetry. Upon his accession to the throne, the sultan maintained strong ties with the cultural centers of Iran and Central Asia, Herat and Tabriz in particular, and his patronage of culture and the arts continued in Istanbul. From surviving archival documents it is known that Bayezid II showered benefactions on authors, poets, and scribes, rewarding them with the most generous of gifts, and that he received in return many tokens of appreciation in the form of dedications and gifted manuscripts.³⁵

Of the manuscripts kept at the palace library of Bayezid II, I have identified 117 that are dedicated to him and were produced during his reign.³⁶ Most of these manuscripts bear the sultan's seal. Some manuscripts, although lacking his seal impression, are dedicated to the sultan. It is not known when the practice of recording dedications on the opening pages of manuscripts was first adopted in the Islamic lands, a practice that persisted under the Ottomans sultans, including Bayezid II.

Among the manuscripts analyzed in this section, copies of the Qur'an, prayer books, Qur'anic commentaries, hadith collections, works on jurisprudence, doctrine, and Sufism constitute the principal focus, there being 50 such manuscripts in all. These are followed by 49 scientific manuscripts on philosophy, ethics, mathematics, medicine, astrology, and philology. Ten literary and eight historical manuscripts complete the collection. Most of these manuscripts were transcribed by renowned calligraphers and are outstanding representatives of the arts of illumination and binding of their era.

Shaykh Hamdullah, with whom Bayezid II's association began in Amasya and continued after his accession in Istanbul, produced a large number of manuscripts at the sultan's behest. These include many Qur'ans, copies of the sura *al-An'ām*, sections of the Qur'an, prayer books, hadith collections, medical works, poetry anthologies, albums, quatrains, and samples of calligraphy. It was Shaykh Hamdullah who executed the calligraphic inscriptions of Bayezid II's mosque in Istanbul. Qur'an manuscripts transcribed by him are particularly outstanding masterpieces of their time, not only for their calligraphy but also for the artistry of their bindings and illumination.³⁷ His characteristic illumination style was adopted by other contemporary calligraphers of the Qur'an at the Ottoman court.

Two Qur'ans stamped with Bayezid II's seal and copied during his reign were endowed to dormitories of the Topkapı Palace. One of these (TSMK, K. 16), dating from 898 (1492–93)³⁸ and copied by Ahmed bin Mahmud bin Mehmed el-Hallak, bears a note on fol. 1a citing its endowment to the Corps of Cooks (Aşçılar Ocağı) by the harem eunuch Idris Ağa in 1024 (1615). The endowment note is significant, since it indicates that a palace official could have in his personal possession a manuscript belonging to the Inner Treasury (perhaps as a present) and

that books circulated within the palace. This Qur'an has 333 folios with 8 lines of *naskh* and 3 lines of *thuluth* script per folio. Its dark brown binding covers are decorated with *shamsas* having pendants and corner pieces, infilled with gilded diminutive *khiṭāyī*, *rūmī*, and stem motifs. The illuminated frontispiece (fol. 1b–2a) featuring the suras *al-Fātiḥa* and *al-Baqara* is divided into horizontal and vertical fields, embellished with many-colored buds, floral rosettes, and *rūmī* motifs on gilded stems against a dark blue ground (fig. 14). The sura headings are inscribed in gilded *thuluth* script within cartouches infilled with scrolling stems bearing diminutive florettes, buds, and foliate devices executed in a naïve style.³⁹ The layout and repertoire of the illuminations represent a continuation of features in Shaykh Hamdullah's works. The illuminated frontispiece format, the abundant use of gilding over navy blue, the diversity of *rūmī* and *khiṭāyī* motifs, and the *tuğs* (rays) framing the ornamented page are typical stylistic features of the period.⁴⁰

The Qur'an (TSMK, K. 18) with Turkish translation and interlinear annotations in fine *naskh* script, which was copied by the calligrapher Pir Hasan of Gallipoli in 901 (1496),⁴¹ bears a note on fol. 1a stating that it was first endowed to the Dormitory of Small Chamber Pages (Küçük Oda Koğuşu), and then to the Dormitory of Commissary Pages (Kilerli Koğuşu) in the third courtyard of the Topkapı Palace. The manuscript has 286 folios of 11-line *naskh* script. The leather binding was covered in fabric at a later date. However, from vestigial traces visible on the fabric and paper liners, it is clear that the original binding was in the style of the period. The double-page ornamented frontispiece (fol. 1b–2a), featuring the suras *al-Fātiḥa* and *al-Baqara*, is divided into horizontal and vertical fields terminating in triangular end pieces (fig. 15). It is embellished with multi-colored buds, floral rosettes, and *rūmī* motifs on gilded stems against a dark blue ground, executed in a naïve style, and the sura headers are in white *thuluth* script.

One of the Arabic religious manuscripts prepared for Bayezid II is a book on hadith, titled *al-Jawharat al-jināniyya fī al-masā'il al-īmāniyya* (The Jewels of Paradise on Matters of Belief). It was written in 916 (1511) by Hayreddin Hızır b. Mahmud 'Atufi, whom the sultan had commissioned to prepare the palace library inventory in 908 (1502–3).⁴² This 94-folio manuscript has 13

Fig. 14. Double-page illuminated frontispiece, Qur'an, calligraphy by Ahmed bin Mahmud bin Mehmed el-Hallak, Istanbul, 1492–93, TSMK, K. 16, fols. 1b–2a. (Photo: Courtesy of the Topkapı Palace Museum Library)

Fig. 15. Double-page illuminated frontispiece, Qur'an, calligraphy by Pir Hasan, Gelibolu, 1496, TSMK, K. 18, fols. 1b–2a. (Photo: Courtesy of the Topkapı Palace Museum Library)

Fig. 16. Opening double page with illuminated headpiece, 'Atufi, *al-Jawharat al-jināniyya fī al-masā'il al-īmāniyya*, Istanbul, 1511, TSMK, A. 607, fols. 1b–2a. (Photo: Courtesy of the Topkapı Palace Museum Library)

lines of *naskh* script per folio. The dedicatory inscriptions in the oval *shamsas* on fols. 93b–94a state that the book was prepared for Bayezid II. The binding covers are of dark brown leather. The rectangular headpiece is illuminated with *rūmī* and *khūṭāyī* motifs, florette buds, and foliate devices on fine stems against a gilded dark blue ground (fol. 1b, fig. 16). On fol. 2a phrases written from the eleventh line of the text onward show that the manuscript was prepared for Bayezid II (fig. 16).⁴³ This folio contains a curious detail. The inscription *Sultān Bāyezīd Hān* appears in illuminated gilded script within a cartouche outside the left margin frame. This unique feature deviates from the common practice in manuscripts, where the name of the sultan or dignitary to whom the work is dedicated is inscribed in a different color within the main text block. It is possible that the scribe inadvertently neglected to inscribe the name of the sultan in contrasting color within the text. This being clearly inadmissible in a work made to be presented to Bayezid II, the error was corrected by adding the sultan's name in an illuminated cartouche in the margin.

Among scientific manuscripts produced during Bayezid II's reign, the largest group consists of 24 works on astronomy and astrology. Almost all of these manuscripts were copied for and dedicated to the sultan. They include the works by such authors as Nasir al-Din al-Tusi (d. 1274), 'Umar Chaghmini (d. 1221), and 'Ali al-Qushji (d. 1474), along with commentaries on these works, and contemporary treatises written by scholars during Bayezid II's reign. Fath Allah al-Shirwani's commentary on Nasir al-Din al-Tusi's *Sharḥ al-tadhkira li-Fath Allāh al-Shirwānī* (Commentary on the Memoir by Fath Allah al-Shirwani) is of particular significance.⁴⁴ This manuscript, which was copied in Amasya around 879 (1474), is one of the many works dedicated to Bayezid II during his time as prince. Its binding covers in brown leather are ornamented with a lobed central *shamsa* featuring pendants and corner pieces, all of which are embossed with large *khūṭāyī* motifs, Chinese-style clouds, and foliate and stem motifs over a gilded ground (fig. 17). The same designs recur on the double pages, although here the ornamentation consists of

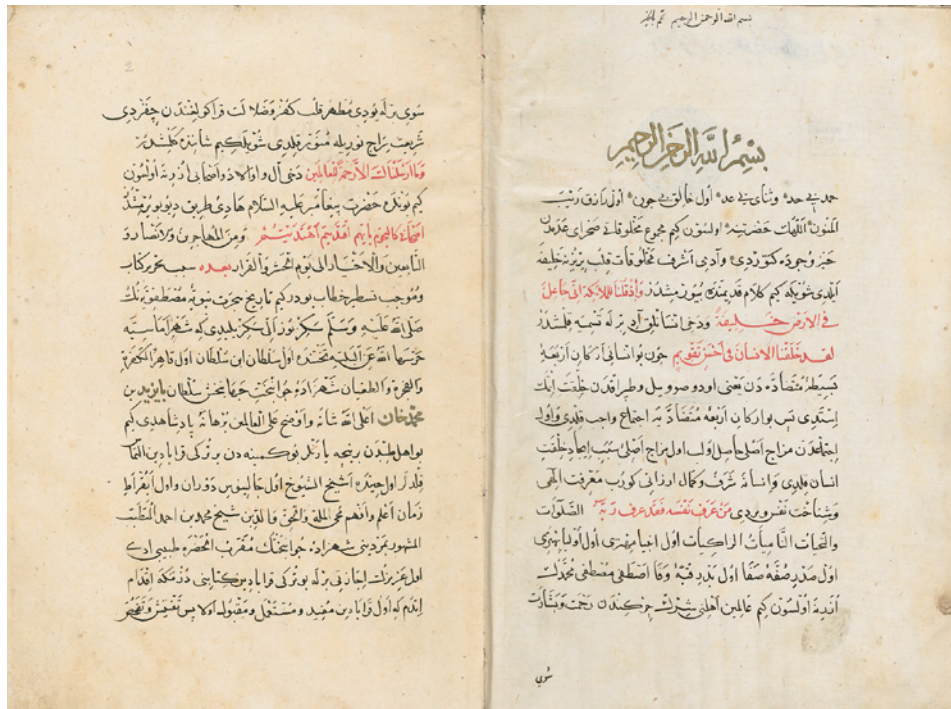

Fig. 20. Opening double page of *Qarābādīn*, a Turkish translation of al-Jurjani's *Zakhīra-i Khwārazmshāhī*, Amasya, 1476–77, TSMK, A. 2124, fols. 1b–2a. (Photo: Courtesy of the Topkapı Palace Museum Library)

filigree leather on a dark blue painted ground. The inscription within a plain medallion on the dedication page states that the work was prepared for Bayezid II (fol. 1a). The 368-folio manuscript is in *ta'liq* script with 23 lines per page. The rectangular heading on fol. 1b is decorated with foliate stems bearing *rūmī* motifs and palmettes on a dark blue and gilded ground (fig. 18).

Andalusian Jewish scholars of the period, who were particularly engaged in the study of medicine and astronomy, wrote and translated several works dedicated to Bayezid II.⁴⁵ One of these manuscripts is titled *Ma'rifat haqīqīyyat al-mawḍū'āt al-kawākib* (Knowledge on the Truth of Matters concerning the Stars), which 'Abd al-Salam al-Muhtadi translated from Hebrew into Arabic by order of Sultan Bayezid II in 1502.⁴⁶ The dark brown binding covers are embellished with a floral and foliate design, while the doublures are of plain burgundy leather. The manuscript features 88 folios, each with 11 lines of *naskh* script. On fol. 1b Bayezid II's name is highlighted in gold script (fig. 19).

The 14 medical manuscripts prepared for Bayezid II were written mostly by physicians, who presented their works to the sultan. The earliest of these manuscripts was copied in Amasya at the behest of Bayezid II during his time as prince by the renowned physician and surgeon Şerefeddin Sabuncuoğlu. This work, titled *Qarābādīn* (or *Aqrābādīn*), is a pharmacological handbook or antidotarium, adaptively translated into Turkish during Mehmed II's reign in 858 (1454) from Isma'il b. Hasan al-Jurjani's (d. 1137) Persian treatise, *Zakhīra-i Khwārazmshāhī* (Treasures of the Khwarazmshah), also known as *Qarābādīn-i Khwārazmshāh*. The translated text was copied for Prince Bayezid II in 881 (1476–77) by Mehmed b. 'Ali b. Muzaffer, according to the dedication on fol. 2a (fig. 20).⁴⁷ The manuscript, whose binding is unremarkable, describes medicinal formulas and preparation methods. It is written in 11 lines of *naskh* script over 187 folios. Another medical work, titled *Jawhar ḥifẓ al-ṣiḥḥa* (Jewel of Hygiene), is a guide to health and nutrition written by 'Abdurrahman el-Müneccim b. Nabi

Fig. 21. Opening double page with illuminated headpiece, *Rubā'īyyāt 'Umar Khayyām*, calligrapher Shaykh Hamdullah, Istanbul, ca. 1490, TSMK, M.R. 541, fols. 1b–2a. (Photo: Courtesy of the Topkapı Palace Museum Library)

Yusuf el-Hafiz, an important physician of the period of Bayezid II, and presented to the sultan in 908 (1502).⁴⁸ This diminutive 98-folio manuscript is preserved in its original form in an elaborate binding. The inscription on fol. 3b indicates that it was prepared for Bayezid II, whose name is inscribed there in gold letters.

Among other manuscripts prepared for Bayezid II or copied during his reign are 11 literary works, some of which are illustrated. A copy of the book of poetry by the Iranian scholar and philosopher Omar Khayyam, titled *Rubā'īyyāt 'Umar Khayyām*, was among the holdings of Bayezid's library.⁴⁹ Copied by Shaykh Hamdullah toward the end of the fifteenth century, it has a plain dark brown binding and consists of 24 folios, each with nine lines of *naskh* script. The rectangular heading is decorated with multi-colored palmettes, *rūmī* motifs, floral buds, rosettes, and foliate stems over a gilded navy blue ground (fig. 21). Unusually, the seal of Bayezid II on the book's initial and final folios is masked by paper that has been glued over. On fol. 1a are two additional seals, one erased so that it is illegible and the other, although partially illegible, appears to belong to Sultan Abdülhamid

I (r. 1774–89). The latter is known to have endowed some manuscripts from the Inner Treasury to the Baghdad Pavilion and the Ahmed III libraries within the Topkapı Palace grounds.⁵⁰ The volume in question is thought to have undergone such relocation, but it subsequently entered the library of Sultan Mehmed Reşad (r. 1908–18) and from there was returned to the Inner Treasury of the palace.

The majority of illustrated manuscripts from the reign of Bayezid II are works of literature. Examples of miniature painting are prevalent in literary manuscripts produced in Istanbul, but also in those prepared in the urban centers of Iran and Central Asia, which arrived at the Ottoman court incomplete and were supplemented by illustrations added in the palace workshops. A hint of Western European stylistic influence is evident in most of these miniatures, particularly in the Italianate illustrations characteristic of Mehmed II's reign. Some miniatures, however, were executed in the Shirazi style of Aqqoyunlu workshops. The type of work carried out in the Ottoman palace workshops of the period tended mainly toward the crafting of additions to fourteenth-

Fig. 22. Lower binding cover, Nizami, *Khamsa*, Istanbul, ca. 1500, TSMK, H. 781. (Photo: Courtesy of the Topkapı Palace Museum Library)

and fifteenth-century copies of the *Khamsa* (Quintet) by the Iranian poets Nizami and Amir Khusaw Dihlawi, complemented by the restoration of such manuscripts.

The most significant of these is the *Khamsa* of Nizami (TSMK, H. 781).⁵¹ The manuscript, copied in 849 (1445–46) by Yusuf al-Jami in Herat, remained incomplete but somehow found its way into the Ottoman palace library. The 325-folio manuscript has 23 lines of *ta'liq* script per folio. It has a reddish-brown leather binding, whose covers with envelope flaps feature *shamsas* with pendants and corner pieces, which are infilled with *rūmī* motifs, the upper cover's *shamsa* being cruciform and that on the lower cover, lobed (fig. 22). The *shamsa* and corner pieces on the binding flap are infilled with foliate devices interspersed with hares and geese in flight. The border is inscribed with a supplicatory prayer for longevity, and the fore-edge flap section contains the phrase *bi-rasmi khizānat-i Sultān al-Bāyezīd* (by order of the treasury of Sultan Bayezid) in *thuluth* script, which dates the binding to this sultan's reign. Within the text, space for fourteen illustrations has been allocated, although only thirteen partially completed paintings ex-

ist. Nine of these were executed by Khwaja 'Ali of Tabriz, while two others are in a different style. One of the latter depicts the scene of "Bahram engaged in combat with a pair of lions, taking possession of his throne and crown" (fig. 23). Although this scene bears features typical of traditional Persianate paintings, it is somewhat unusual due to the Ottoman headgear of the figures, its painting style, and the spatial depth of the composition. The two distinctive paintings exemplify the influence of European, and particularly Italian, art on Ottoman miniature painting that began during the reign of Mehmed II. The two Italianate paintings have generally been attributed to the palace workshops of Bayezid II; however, a more recent study ascribes these paintings to Mehmed II's reign.⁵²

Another illustrated manuscript, the *Shāhnāma-i Malik-i Āhī* (Book of Kings by Malik-i Ahi), which is datable to around 1495, has another distinguishing feature besides its figural paintings.⁵³ This manuscript is one of the first illustrated Ottoman history books and one of the earliest with illustrations of contemporary history. The 98-folio volume, with 11 lines of *ta'liq* script per page, has

Fig. 23. Painting depicting "Bahram engaged in combat with a pair of lions, taking possession of his throne and crown," Nizami, *Khamṣa*, Istanbul, ca. 1500, TSMK, H. 781, fol. 160a. (Photo: Courtesy of the Topkapı Palace Museum Library)

Fig. 25. Painting depicting an "Assembly of Sultan Bayezid II," *Shāhnāma-i Malīk-i Āhī*, calligrapher and painter Darwish Mahmud b. Abdullah Nakkash, Istanbul, ca. 1495, TSMK, H. 1123, fol. 14a. (Photo: Courtesy of the Topkapı Palace Museum Library)

seven paintings. Its binding covers are maroon leather, embellished with deep moulded lobed *shamsas* and corner pieces, which are infilled with curved stems, *rūmī* motifs, and floral patterns over a gilded ground (fig. 24). Inscribed on folio 14a is the phrase "Assembly of Sultan Bayezid II" (fig. 25). Both the calligraphy and paintings of this manuscript were executed by Darwish Mahmud b. 'Abdullah Nakkash, whose name is also mentioned in registers of Sultan Bayezid II's reign. This is an artist who is thought to have migrated to Istanbul from Tabriz, where he also prepared works for the Aqqoyunlu Sultan Ya'qub (r. 1478–90). He continued to produce work in the traditional Aqqoyunlu painting style,⁵⁴ and archival documents show that he was still actively engaged in miniature painting for the Ottoman court in 1509.⁵⁵

Calligraphers who had worked under the patronage of Mehmed II continued to produce manuscripts for Bayezid II. One of them is the renowned master of *nasta'liq* script, Muhammad al-Badakhshani.⁵⁶ Among the works he copied is the linguist Isma'il ibn Hammad al-Jawhari's (d. before 1009) work on grammar, titled *Ṣurāḥ al-lughā* (Clear Speech), which was translated from Arabic into Persian by Jamal al-Qarsi (d. ca. 1303).⁵⁷ The dedicatory inscription on fol. 1a is set within a rectangular frame, which contains a medallion with pendants and corner pieces (fig. 26). Written in white *ta'liq* script over a gilded ground within the medallion, the dedication inscription reads: *bi-rasm muṭāla'at sulṭān al-islām wa-al-muslimīn burhān al-ḡuzāt wa-al-mujāhidīn al-maktūb fī haykal dawlatahi naṣr min Allāh wa-faṭḥ qarīb al-Sulṭān bin al-Sulṭān Sulṭān Bāyazīd bin Sulṭān Muḥammad Khān Allāhumma ayyadahu bi-al-nuṣr wa-al-'āfiyah fī atamm al-'izz wa-ḥusn al-'āqibah* ("for the reading of the Sultan of Islam and Muslims, Proof of the Ghazis and Warriors of the Faith, on the monument of whose sultanate is inscribed 'Victory is from God and Conquest is Ultimate,' Sultan son of the Sultan, the Sultan Bayezid son of Sultan Mehmed Khan, may God bestow upon him support for perfect victory and health"). This manuscript has 19 lines of *ta'liq* script throughout its 449 folios.

Another manuscript copied by Badakhshani for Bayezid II is the *Dīwān-i Sayf Farghānī*, which contains the collected poems of the Central Asian mystic poet Sayf Farghani (d. 1348).⁵⁸ The binding covers are in dark brown leather. An inscription in white *ta'liq* within the

medallion on the dedicatory page (fol. 1a) states that the manuscript was prepared for Bayezid II. This work, comprising 362 folios of 15 lines in *ta'liq* script, was completed in 904 (1498–99). The rectangular heading on fol. 1b is illuminated in the style of the period (fig. 27).

MANUSCRIPTS PRODUCED IN CENTERS THROUGHOUT THE ISLAMIC WORLD AND THOSE WITHOUT DEDICATIONS TO OTTOMAN SULTANS

A total of 521 manuscripts produced in various other locations throughout the Islamic world were also part of the library of Bayezid II. These manuscripts include those that entered the Inner Treasury as diplomatic gifts and others that lack dedications to the Ottoman sultans.⁵⁹ As mentioned in the introduction to this article, among the manuscripts that constitute this group, those dating from the first half of the fifteenth century are particularly worthy of close scrutiny, as they illustrate the impact of diverse cultural cross-currents on the arts of the book in that era. Typical amongst these are two manuscripts discussed below, which were prepared in previous centuries but appear to have received new bindings during the Ottoman period. I have chosen to restrict this section exclusively to manuscripts that can be historically attributed with certainty.

This group includes manuscripts from the Abbasid, Seljuq, Ilkhanid, Jalayirid, Timurid, Mamluk, Aqqoyunlu, and Qaraqoyunlu Turkmen periods on a variety of subjects that have calligraphy, bindings, and illumination of outstanding quality. A total of 121 such manuscripts in the collection are works on religious topics. Foremost among them are exquisite Qur'ans dating from the eighth and ninth centuries to the beginning of the sixteenth century, copied by the foremost calligraphers of their day that feature skillfully executed bindings and illumination.

The earliest of these manuscripts is dated to the Abbasid period and contains pages from selected suras of the Qur'an (XLI, XVIII, XX, XXX, XI, X).⁶⁰ It is written in Kufic script on 22 folios, each with 5 lines. On fols. 17b–18a are stamped the seals of Bayezid II and Abdülhamid I (fig. 28).⁶¹ The dark brown leather binding is not original, being a late nineteenth-century replacement. This

Fig. 26. Illuminated frontispiece with dedication, Jamal al-Qarsi, *Şurāḥ al-lughā*, calligrapher Muhammad al-Badakhshani, Istanbul, 1501, TSMK, A. 2692, fol. 1a. (Photo: Courtesy of the Topkapı Palace Museum Library)

Fig. 27. Page with illuminated headpiece, *Dīwān-i Sayf Farghānī*, calligrapher Muhammad al-Badakhshani, Istanbul, 1498–99, TSMK, R. 984, fol. 1b. (Photo: Courtesy of the Topkapı Palace Museum Library)

must be one of the Kufic Qur'an manuscripts mentioned in 'Atufi's inventory (13 {2–5}, 16 {4}, 17 {15–16}).

A manuscript of the sura *al-An'ām* from the Ilkhanid era, with a colophon dated 690 (1291), is the work of the master calligrapher Yaqut al-Musta'simi (d. 1298) of Baghdad, who is considered one of the foremost Islamic calligraphers.⁶² The manuscript is transcribed in *thuluth* and *naskh* script over 71 folios, with 7 lines each. The frontispiece (fols. 1b–2a) has rectangular inscribed frames above and below, featuring large foliate motifs, while the borders are covered by geometrical interlaces on a gilded ground (fig. 29). The lobed triangular devices on the outer edges are illuminated with large white and gilded *rūmī* and palmette motifs on a dark blue ground. The style of illumination indicates that the triangular devices were later additions, as were the brown leather upper and lower binding covers. On these covers, the cruciform *shamsas* with pendants are embellished with stems, large vegetal and palmette motifs, and a central lozenge studded with gilded points (fig. 30). The contours of the *shamsas* and their pendants are also gilded. The dark brown leather doublures have oval *shamsas* with pendants, which are infilled with vegetal motifs and floriated stems in brown filigree leather over a green fabric-covered ground. The style of illumination points to an Ottoman provenance for the binding covers and would suggest a date of circa 1450.⁶³ This manuscript must be the sura *al-An'ām* transcribed in the hand of the calligrapher Yaqut al-Musta'simi, which is listed in 'Atufi's inventory (17 {18}).

Fig. 28. Bifolio with seal impressions of Bayezid II and Abdülhamid I, Qur'an, eighth to ninth centuries, Abbasid period, TSMK, E.H. 26, fols. 17b–18a. (Photo: Courtesy of the Topkapı Palace Museum Library)

Fig. 29. Double-page illuminated frontispiece, sura *al-An'ām*, calligrapher Yaqut al-Musta'simi, 1291, Ilkhanid period, TSMK, R. 70, fols. 1b–2a. (Photo: Courtesy of the Topkapı Palace Museum Library)

Two Qur'an manuscripts from the Ilkhanid period copied by Argun al-Kamili, a pupil of Yaqut al-Musta'simi and a renowned master of calligraphy, are also stamped with Bayezid II's seal. The first of these is a Qur'an dated 1330 with 13 lines of *naskh* script over 273 folios.⁶⁴ The binding, with an envelope flap, has covers of dark brown leather and doublures of reddish brown. The manuscript features an illuminated double-page dedication (fols. 1b–2a), and a frontispiece with the suras *al-Fātiḥa* and *al-Baqara* enclosed in rectangular frames (fols. 2b–3a) (fig. 31). The suras are separated by vegetal foliate stems, and the sura headings are inscribed in gold script on a dark blue ground, embellished with vegetal stem infill. The whole composition is enclosed in a border ornamented with gilded stems, palmettes, and vegetal designs on a dark blue ground. The marginal medallions share the same decorative motifs. The manuscript must be one of the two Qur'ans copied by Argun al-Kamili that are cited in 'Atufi's inventory (12 {14}, 16 {11}).

←

Fig. 31. Double-page illuminated frontispiece, Qur'an, calligrapher Argun al-Kamili, 1330, Ilkhanid period, TSMK, E.H. 151, fols. 2b–3a. (Photo: Courtesy of the Topkapı Palace Museum Library)

The second manuscript in the hand of Argun al-Kamili is a *Du'ānāma* (Book of Prayer) dated 1352.⁶⁵ This 71-folio manuscript has 5 lines of *muhaqqaq* script per page. The brown leather binding is not original. The manuscript is stained and damaged in its double-page illuminated frontispiece (fig. 32) and other pages. One may assume that its deterioration is due to frequent use, the work being outstanding for its calligraphy by a master scribe. This is most probably the prayer book in the hand of Argun al-Kamili listed in 'Atufi's inventory (47 {13}).

One finely bound and illuminated Qur'an bearing the seal of Bayezid II,⁶⁶ which is neither dated nor attributed to a calligrapher, has 224 folios in *naskh* script. The binding covers are of black leather and contain lobed oval *shamsas* with pendants and corner pieces, embellished with foliate stems, vegetal motifs, and palmettes (fig. 33). The brown leather doublures are designed in panels, with a central section having concave and convex curved forms (fig. 34). The yellow, green, and black ground is infilled with filigree brown leather stems, vegetal motifs, and palmettes.⁶⁷ The illuminated double-page frontispiece inscribed with the sura *al-Fātiḥa* features broad, oval cartouches and separating strips

(fols. 1b–2a, fig. 35). The central section contains the sura *al-Fātiḥa* in *naskh* script, the upper and lower oval cartouches are inscribed with verses in gold *thuluth*, while the ground is infilled with gilded palmette and vegetal motifs. The wide border framing the cartouches and the composition as a whole, together with the marginal medallion rosettes, share the same style of illumination.⁶⁸ The binding and illumination indicate that this manuscript is of Mamluk origin and can be dated to the first half of the fourteenth century. As previously stated, the work gives no indication as to the identity of the calligrapher. The name Yaqt al-Musta'simi inscribed on the final page (fol. 222a) is a later addition.⁶⁹ Two folios of a Qur'anic divination manual in Persian and Arabic (*Fāl-i Qur'an*) (fols. 222b–224a) were also added at a later date.⁷⁰ Their Persian text is in *ta'liq*, with the Arabic in *naskh* script. The colophon of the *Fāl-i Qur'an* is dated 853 (1450) and was transcribed in *dīwānī* script (fol. 224a) by Bayazid b. Sadiq al-Sufi al-Kirmani.⁷¹ Most probably this is the Qur'an copy with a finely inscribed *Fāl-i Qur'an* mentioned in 'Atufi's inventory (15 {6}).

A Qur'an manuscript from the Aqqoyunlu period (thought to date to ca. 1480) by an unknown calligrapher

Fig. 32. Double-page illuminated frontispiece, *Du‘ānāma*, calligrapher Argun al-Kamili, 1352, Ilkhanid period, TSMK, R. 80, fols. 1b–2a. (Photo: Courtesy of the Topkapı Palace Museum Library)

is among the distinguished works that made their way into the library of Bayezid II.⁷² It is transcribed in *naskh* script in a 9-line format on 586 folios. The illuminated frontispiece encloses the suras *al-Fātiḥa* and *al-Baqara* (fols. 1b–2a, fig. 36). The central sections contain suras with Persian translations in red *ta‘līq* script below the text and interlinear commentary. The upper and lower cartouches and the page borders are embellished with floral *khiṭāyī* motifs over a dark blue ground. The sura headings are inscribed in white within the cartouches. The brown binding of the manuscript is plain and is a later addition, apparently dating from the nineteenth century. One Qur’ān copy with a Persian translation is recorded in ‘Atufi’s inventory (14 {4}).

Among manuscripts on religious topics, the 54 works on jurisprudence and hadith are the most numerous. A copy of *Shifā’ al-saqām fī ziyārat khayr al-anām* (The Healing of Hearts in Visiting the Best of Creatures), authored by the Shafī‘ī scholar Taqī al-Dīn al-Subkī (d. 1355) and dated to the Mamluk period, is amongst these manuscripts.⁷³ This work, which encourages visitation to the Prophet Muhammad’s grave in Medina, was copied by Ahmad b. ‘Alī b. Muhammad al-Hanafī in 775

(1374). The 164-folio manuscript is transcribed in a 19-line format in *naskh* script. The surfaces of the brown leather binding covers are entirely decorated with geometric patterns (fig. 37). The central rectangular panel is filled with geometric interlace motifs dominated by two ten-pointed stars, whose arms extend into an overall geometrical composition. The ground is embellished with diminutive gilded dots.

The most significant manuscript within this group is titled *al-Tuḥfat al-najībīyyat li-ḥadrat al-salṭanat al-Uwaysīyya* (A Fine Gift for Uways, the Lord of All-Revered Sultans). It is the only known copy of this Arabic work on Islamic wisdom and law by Hajjī Muhammad b. Husayn al-Damghani, transcribed in *nasta‘līq* script for the Jalayirid ruler Shaykh Uways Bahadur Khan (d. 1374).⁷⁴ The brown leather upper and lower covers of the binding have undergone repair to re-attach certain separated sections, and the original ornamented leather binding has been detached from the lower cover. However, the upper cover, which survives in its original form, has a lobed medallion *shamsa* with pendants and corner pieces (fig. 38). The inscription panel in *thuluth* script in the lower part of the cover is illegible, having partially

Fig. 36. Double-page illuminated frontispiece, Qur'an, ca. 1480, Aqoyunlu period, TSMK, E.H. 183, fols. 1b–2a. (Photo: Courtesy of the Topkapı Palace Museum Library)

broken off. Square panels flanking the inscription on either side are inscribed with the name 'Ali in a style reminiscent of Kufic script. At the center of the brown leather doublures are rectangular gilded *shamsas*. The embellished and inscribed envelope flap is the most noteworthy detail of this binding. Written in monumental *thuluth* over a ground of vegetal motifs on the upper fore-edge of the envelope flap is the aforementioned book title. The two flanking panels contain fragments of a Persian inscription, which is only partially legible due to damage, but it can still be deciphered sufficiently to indicate that the work was made for the Jalayirid sultan Shaykh Uways. The inscription bands on the upper fore-edge flap are embellished with large vegetal motifs, and the border is filled with rosettes and foliate designs. The corner panels are again inscribed 'Ali. The lobed, oval *shamsa* on the lining of the envelope flap is decorated with geometric interlaces. The central inscription band

←

Fig. 37. Upper binding cover, al-Subki, *Shifa' al-saqām fī ziyārat khayr al-anām*, calligrapher Ahmad b. 'Ali b. Muhammad al-Hanafi, 1374, Mamluk period, TSMK, A. 324. (Photo: Courtesy of the Topkapı Palace Museum Library)

Fig. 38. Upper binding cover, al-Damghani, *al-Tuḥfat al-naḥbiyyat li-ḥaḍrat al-salṭanat al-Uwaysiyya*, 1373–74, Jalayirid period, TSMK, A. 656. (Photo: Courtesy of the Topkapı Palace Museum Library)

on the fore-edge flap is in Kufic script, with the flanking bands in *thuluth*. The information gleaned from these inscriptions, as well as further research, indicates that the manuscript was collated, illuminated, and completed in Tabriz in 775 (1373–74) by Muhammad b. Husayn at the behest of Shaykh Uways, and that Hajji Muhammad b. Husayn al-Damghani, who is named as the author, was also responsible for the design of the binding and executed the calligraphic inscriptions on the covers himself.

Another manuscript bearing the seal of Bayezid II, which is particularly notable for its binding, is a compilation of hadith and prayers titled *Ad'īyya ma'thūra mar-wīyya 'an al-Nabī* (Revealed Prayers Recited by the Prophet).⁷⁵ The manuscript's author is the Arabic linguist and scholar of Qur'anic commentary and hadith, Abu Tahir Majd al-Din Muhammad b. Ya'qub b. Muhammad al-Firuzabadi (d. 1414). The 118-folio copy is transcribed in 7 lines of *rayḥānī* script. The covers of the dark brown leather binding are decorated with a central *shamsa* and borders infilled with geometric interlace. The doublures are lined in a blue, red, yellow, and green fabric (fig. 39). The ground is divided into square panels, each containing alternating enlarged *khiṭāyī* motifs and interlaced lozenges. Bands framing the square panels are embellished with floral rosettes, foliate motifs, and interlaced knots. The dedicatory page is ornamented with undulating concave and convex bands (fol. 1a).⁷⁶ The central section of the page provides information about the contents of the volume, complemented by laudatory phrases about its owner, illuminated with large floriated devices, vegetal motifs, and palmettes. The rectangular heading is illuminated with large multi-colored palmettes, vegetal motifs, and floral rosettes. The format and content of the dedicatory inscription, the composition of the binding, and the style of illumination indicate that the manuscript was prepared between the years 1380 and 1420 in Cairo or Damascus.

A work notable for its binding is a copy of the *Miftāḥ al-'ulūm* (The Key to the Sciences) by Abu Ya'qub Yusuf ibn Abi Bakr al-Sakkaki (d. 1229).⁷⁷ This manuscript, which was copied in 1322, is 173 folios long, with a 17-line format of *naskh* script. The binding covers with envelope flaps are of brown leather, bearing a lobed *shamsa* in the center. The cover designs are foliate, while those on the envelope flap are geometrical. The composition

on the doublures consists of elongated hexagonal panels alternating with four-point stars, each containing infill motifs which alternate between stems and vegetal motifs and two lines of Arabic inscription in *thuluth* script, reading *al-'izz al-dā'im wa-al-iqbāl* (perpetual eminence and prosperity) (fig. 40). Similar compositions are encountered on the bindings of works of Bursa provenance pre-dating 1460.⁷⁸ Hence, it is clear that the binding is not original and that the manuscript was rebound in Ottoman Bursa.

A literary manuscript exquisitely illuminated and bound during Qaraqoyunlu Turkmen rule in Baghdad is also stamped with the seal of Bayezid II. Titled *Dīwān-i Qāsim-i Anwar*, it contains the collected poems of the Iranian poet Qasim-i Anwar and is dated 859 (1455).⁷⁹ The book, transcribed in *ta'liq* script in a 15-line format, is 346 folios long. The illuminations on the dedication page, which bears a *shamsa* motif (fol. 1a), and the frontispiece (fols. 1b–2a) reflect the style of the era. The covers of its brown leather binding with an envelope flap are decorated with a hunting scene in gilded relief, depicting a deer felled by a hunter on horseback (fig. 41). As the deer lies smitten, hares and other deer run off through the trees. The brown leather doublures have lobed *shamsas* with pendants and corner pieces. The dark blue and green ground within the *shamsas* and corner pieces is embellished with finely worked brown leather filigree stems dotted with *khiṭāyī* and vegetal motifs (fig. 42).

Also among the manuscripts bearing the seal of Bayezid II are illustrated medieval works of literature and science, some of which are the only known copies of a particular work. The *Ṣuwar al-kawākib al-thābita* (Images of the Fixed Stars) by the prominent scholar 'Abd al-Rahman al-Sufi (d. 986), written in Arabic, is a synthesis of the star catalogue in Ptolemy's *Almagest* and Arabic astronomical traditions on the constellations. The 148-folio manuscript bearing Bayezid II's seal was copied during the Artuqid period in Mardin by Wathiq b. 'Ali b. 'Umar b. al-Husayn, known as Shawqi, in 525 (1131).⁸⁰ The manuscript contains eighty detailed illustrations of the constellations of fixed stars, indicating proportional distances between the stars. Figural representations of the signs of the zodiac are drawn in black ink, some figures being also painted. The illustration on fol. 91b depicts the "Sign of Sagittarius" (fig. 43).

Fig. 39. Doublure of lower binding cover, al-Firuzabadi, *Ad'iyya ma'thūra marwiyya 'an al-Nabī*, Cairo or Damascus, 1380–1420, Mamluk period, TSMK, A. 526. (Photo: Courtesy of the Topkapı Palace Museum Library)

Fig. 40. Doublure of lower binding cover, al-Sakkaki, *Miftāḥ al-ʿulūm*, 1322, bound in Bursa, pre-1460, Ottoman period, TSMK, A. 1628. (Photo: Courtesy of the Topkapı Palace Museum Library)

Although the illustrations adhere to classical iconography associated with this astronomical genre, the stylized contours, figural types, and elements of dress are Islamic in character.⁸¹

Another noteworthy illustrated manuscript from the Middle Ages is the *Kitāb al-bayṭara* (Book of Veterinary Art). This volume (TSMK, A. 2115) is based on a Greek text on the grooming and veterinary treatment of horses titled *Hippiatrika*. Written by Ahmad b. al-Husayn b. al-Ahnaf, it was copied in 606 (1210) by ʿAli b. al-Hasan. The manuscript, transcribed in *naskh* script over 171 folios, contains 56 illustrations. The illustration on page 168b depicts a figure grooming a horse (fig. 44). The stylistic features of this illustration, particularly its approach to figural representation, treatment of landscape elements, and frameless positioning of those features against a blank background directly on the page, are characteristic of the shared medieval pictorial repertoire of Mesopotamia, northern Iraq, and southeastern Anatolia.⁸²

CONCLUSION

To summarize, of the 784 manuscripts in the Topkapı Palace Museum Library identified as bearing a seal, dedication, or annotation of ownership, 750 are stamped with the seal of Bayezid II. The remaining 34 manuscripts have either a dedication to Bayezid II or a proprietorial note verifying their presence in the palace library, such as *min kutub al-Sultān Bāyezīd b. Meḥemmed Ḥān ḥallada mulkahu; šāhibuhu al-Sultān Bāyezīd bin Meḥemmed Ḥān ḥallada mulkahu*; or *min kutub al-Sultān Bāyezīd*.⁸³ Such notes are, however, not exclusive to the few manuscripts lacking Bayezid II's seal, as they are also found on those stamped with his seal. Although manuscripts bore dedications to the Ottoman sultans before the reign of Bayezid II, volumes entering the palace library before his time did not have any seal impressions or proprietorial exlibris annotations. As mentioned above, despite the fact that certain

works bear dedications to Mehmed II, they do not include his seal impression or a statement of ownership. This highlights the significance of the steps taken with regard to the manuscript treasury during the reign of Bayezid II, steps which would later be adopted as customary practice. Bayezid II's approach to the organization of the palace library sets him apart from both his predecessors and his successors. Manuscripts continued to be dedicated to Bayezid II's successors, some featuring both dedicatory notes and the sultans' seals. However, such practices were restricted solely to manuscripts dedicated to the incumbent sultan of the time, works that entered the treasury during the reign of that very sultan. Manuscripts already in the Inner Treasury collection prior to the reign of the incumbent sultan were

not treated with scrutiny and no attempt was made to create a comprehensive catalogue of the pre-existing collection.

To recapitulate, of the manuscripts analyzed in this essay, 405 are on scientific topics, 192 on religion, 144 on literature, and 41 on history, as well as one album. Twenty-three of these manuscripts are illuminated.⁸⁴ Of the many scholarly manuscripts with dedications to Mehmed II and Bayezid II, the dominant topics are philology, philosophy, astrology/astronomy, and medicine, although works are not limited to these fields. Subjects such as logic, arithmetic, ethics, onomancy, music, dream interpretation, geography, agriculture, and horsemanship are also featured within the palace library collection.

Opening page with the seal impressions of Prince Mehmed, Bayezid II, and Ahmed III, al-Tahtani, *Tahrīr al-qawā'id al-manṭiqiyya fī sharḥ al-shamsiyya* (The *Shamsiyya* Epistle on the Fundamentals of Logic), 1393, TSMK, A. 3370, fol. 1a. (Photo: Courtesy of the Topkapı Palace Museum Library)

Manuscripts on hadith are predominant among the religious-themed works, accompanied by those on theology, Sufism, Qur'anic commentary, and jurisprudence. Qur'ans, prayer books, Arabic and Persian translations of the Bible, as well as Arabic translations of the Psalms and the Torah are also among this group. Qur'ans copied by renowned calligraphers of the Ilkhanid, Jalayirid, Timurid, Mamluk, Aqqoyunlu Turkmen, and Ottoman periods; prayer books; hadith collections; and works on jurisprudence include among them examples of the great artistry characteristic of their time. Most of the works on jurisprudence, Qur'anic commentary, Sufism, hadith, and theology were prepared for Mehmed II and Bayezid II. As noted above, the volumes in this group include Arabic translations of the Psalms and the Torah,

and Arabic and Persian translations of the Bible, which must be counted among the "Psalms, Torah, and translated Bibles" listed in 'Atufi's inventory (364 {11–19}, 365 {1}).⁸⁵

The sultans' love of verse contributed to the existence of many poetry books among the literary works in Bayezid II's library, some of them elaborately decorated, alongside story books and compendiums. One of the four books of poetry stamped with Bayezid II's seal was prepared for him,⁸⁶ and the remaining three were made for Mehmed II.⁸⁷ Illustrated copies of major Iranian works on literature made their way into the palace library as gifts.

Almost all of the historical manuscripts in the collection focus on the history of Islam. Among them are single volumes on the histories of three dynasties—Ghaznavid,⁸⁸ Mongol,⁸⁹ and Iranian⁹⁰—along with a copy of Rashid al-Din's (d. 1318) *Jāmi' al-Tawārīkh* (Compendium of Chronicles).⁹¹ The *Khunkār-nāma* (Book of the Sovereign)⁹² written for Mehmed II; a Persian *Silsilā-nāma* (Genealogy)⁹³ produced during the reign of Bayezid II; the *Fatḥ-nāma* (Book of Conquest) recording the same sultan's conquest of Modon and Lepanto;⁹⁴ and the *Shāhnāma-i Malik-i Āhī*⁹⁵ are three Ottoman dynastic histories that bear the seal of Bayezid II.

Books belonging to Bayezid II in the palace library are important not only for their contents and artistic characteristics, but also for their previously unknown seals. Studies up to this point have only identified Bayezid II's almond-shaped seal (2.2 × 1.4 cm), inscribed *Bāyezīd bin Meḥammed el-muzaffer dā'imā* (Bayezid son of Mehmed, always victorious). However, two additional seals of Bayezid II, each of them a different type, have recently been discovered in two books at the palace library.⁹⁶ One of the books in question is Abu Mansur al-Maturidi's two-volume work titled *Ta'wilāt Abū Maṣṣūr al-Māturīdī*.⁹⁷ The first volume of this work was prepared in the fourteenth century, while the second volume dates from the thirteenth century. In both volumes, fol. 1a is annotated with the names of their previous owners, Kadi Hasan b. Isma'il 815 (1412) and Ahmad b. Bakr 818 (1415). Upon entering the book treasury of the imperial palace, these volumes were stamped with Bayezid II's seal. Yet fol. 283b of the first volume has a differently shaped seal, although it too is inscribed as *Bāyezīd bin Meḥammed el-muzaffer dā'imā* (see

Appendix, “Examples of Bayezid II’s Ex Libris,” at the end of this essay).⁹⁸ With both of its sides having a curvilinear form, the seal features illegible motifs above and below, whereas its letters are notably intricate. We might compare this design with the tughras (monograms) and seals of Ottoman princes found in extant archival documents and manuscripts.⁹⁹ The striking aspect of these princely seals is that, in comparison with those of the sultans, their lines are imprecise and less sharp, while their calligraphies are relatively crude. It can be observed that princes who became sultans changed their seals, even experimenting with several transitional seal types prior to deciding on their sultanate seals, which stand out for their superior designs. This shows the importance sultans attached to their seals, which symbolized their sovereignty. The oval seal in the first volume of *Taʿwīlāt Abū Maṣṣūr al-Māturīdī* must have been Bayezid II’s princely seal because of its less accomplished form and design in comparison to his sultanate seal.¹⁰⁰

The second different seal of Bayezid II is found in a compendium containing various medical treatises (see Appendix, “Examples of Bayezid II’s Ex Libris,” at the end of this essay).¹⁰¹ The seal imprinted on the first and last pages of this volume features the same text as those above, just as its form and design is almost identical with his well-known almond-shaped seal. However, this seal is larger than the standard seal of Bayezid II (2.7 × 1.6 cm). Moreover, its design displays minor variations in the lowermost knot pattern and the motif on the right side. This variant seal, which has thus far only been identified in the medical compendium, was probably prepared during the last years of Bayezid II’s time as prince or in the first year of his reign. Judging from these examples, it may be concluded that Bayezid II used different seals during his days as a prince and established his sultanate seal soon after his accession to the throne.¹⁰²

Bayezid II gifted many manuscripts to his sons, who were also bibliophiles, especially princes Ahmed and Korkud.¹⁰³ Studies thus far have focused primarily on princes Selim, Ahmed, and Korkud due to their prominence in disputes for the throne, with only brief accounts on the other princes, one of whom was Prince Mehmed. This prince, who governed Caffa in the Crimea, died in

910 (1504) and was interred in the mausoleum of Murad I in Bursa.¹⁰⁴ Among the 784 manuscripts analyzed in this essay, only three feature a diminutive circular seal without any monogram, of a kind not previously noted in any study (fig. 45). Upon close scrutiny, the inscription reveals this seal as belonging to Prince Mehmed, son of Sultan Bayezid II.¹⁰⁵ On two of these three manuscripts (which are on the topics of doctrine, philosophy, and logic), Prince Mehmed’s seal is seen alongside that of Bayezid II,¹⁰⁶ while the third lacks Bayezid II’s seal.¹⁰⁷ The opening page of the latter manuscript, however, indicates that it was prepared for Bayezid II. This manuscript was probably a gift to the prince from his father, and for this reason it may have been deemed unnecessary to stamp it with the sultan’s seal. The books of the little-known Prince Mehmed, who predeceased his father, must have been brought to the Topkapı Palace upon his death. ‘Atufi’s inventory includes a manuscript belonging to Prince Mehmed among the books on astrology (321 {5–6}). However, it has not been possible to identify this particular manuscript in the Topkapı Palace Museum Library.

Curiously, in 14 of these 784 manuscripts in the palace library, the seal of Bayezid II on the first and last folios is either erased, carved out and removed,¹⁰⁸ gilded over, masked by illumination, or covered with a paper patch, which was apparently glued on in an attempt to conceal or destroy it.¹⁰⁹ The seal impressions in these manuscripts are well hidden, and it is often challenging to find any remaining traces of them. Two of these manuscripts bear records of having been copied for Mehmed II,¹¹⁰ and a further two for Bayezid II.¹¹¹ In them, the seals are either gilded over or erased. The seals on a copy of Jalal al-Din Rumi’s (d. 1273) *Mathnawī*¹¹² dating from 1446, and a 1450 copy of the Persian Shafi‘i scholar Farra’ al-Baghawi’s (d. 1122) hadith collection, titled *Maṣābiḥ al-sunnah*,¹¹³ are covered with illuminations that differ in style from those in the rest of these manuscripts. Bayezid II’s seal is only faintly visible in a copy of *Kitāb al-filāḥa* (Book on Agriculture), an Arabic translation of an agrarian almanac that greatly influenced Sufism, by the Greek author Cassianus Bassus Scholasticus (Qasṭūs b. Iskūlas-tika). This is an astrometeorological work detailing the impact of zodiacal signs and lunar aspects on the seasons and on certain calendar events.¹¹⁴ One of the two

annotations and ownership notes on fol. 1a of this manuscript has been partially erased, the other has been gilded over, and both are illegible. However, some notes reveal that the manuscript passed into the possession of Mehmed Ağa, also known as Süleyman Ağazade, and Haşmet Dede el-Mevlevi. Somehow this manuscript, which had once belonged to the library of Bayezid II, was acquired by others and changed hands before ultimately returning to the palace collection. A thorough and detailed investigation would no doubt reveal additional works from which Bayezid II's seal has been erased or masked in the palace library and in other museums or libraries.¹¹⁵ Bearing this in mind, it is highly likely that the number of identified manuscripts that have survived from Bayezid II's library will increase with further examination.

Another significant and interesting aspect is revealed in an Arabic commentary titled *al-Risāla al-faṭḥiyya* (Treatise on [the Commemoration of] the Conquest) by Mirim Çelebi, the grandson of the author of a treatise by the same title, 'Ali al-Qushji (d. 1474), who had dedicated this book on astronomy to Mehmed II following the sultan's victory over the Aqqoyunlu ruler Uzun Hasan in 1473.¹¹⁶ We encounter the seal of Bayezid II on folios 1a, 2a, and 188b. However, the work is dated 925 (1519) and includes a dedication to Sultan Selim I on fol. 3a. Such conflicting details complicate the issue of the connection between the manuscript and its seal. Although sufficient research has yet to be carried out in order to reach a definite conclusion on this issue, certain explanations can be tentatively proposed. Mirim Çelebi, the author and copyist of the commentary, was invited to the palace to tutor Bayezid II in mathematics. The author was subsequently appointed by Selim I as the army judge (*kazasker*) of Anatolia in 925 (1519) and retired shortly afterwards. A close inspection of the folios and seals on this manuscript reveals interesting details. The seals on fols. 1a and 188b were expertly carved out and removed from another manuscript and were then skillfully remounted onto the manuscript in question.¹¹⁷ The seal on fol. 2a is genuine, since it is stamped directly onto the paper of the manuscript folio. The gilded border strip surrounding the text on fols. 1b–2a was clearly added later, as it overlaps the original seal. Certain lines of script or single words have been erased by

abrasion and alterations to the text, resulting in two visibly different styles of calligraphy. From this evidence we may speculate that the manuscript was transcribed by Mirim Çelebi for Bayezid II but was left incomplete. After entering the library of Bayezid II and being stamped with his seal, the incomplete book underwent revision at some point, with corrections and additions being made to it while in the library. The book was subsequently presented to Selim I in its revised state. The gilded dedication on fol. 3a, indicating that the manuscript was prepared for Selim I; the colophon dated 925 (1519) at the end of the manuscript; the genuine seal of Bayezid II on fol. 2a (this seal was never used after the sultan's death);¹¹⁸ and the gilded strip overlapping the original seal impression all support such a theory. However, this theory fails to explain the seals of Bayezid II that were glued onto fols. 1a and 188b at a later date. Other manuscripts with seals attached by glue do exist in the palace library. But all of the very obviously glued seals are, as far as I have been able to ascertain, the round treasury seals of Selim I,¹¹⁹ and they are found on manuscripts that have undergone repair or restoration. Ownership attribution inscriptions were usually cut out and removed from worn-out parts but were reattached by gluing them to the page on the new binding liners during restoration. But in the case of the work under scrutiny, the application is quite different. The cut-out seals added at a later date belong to Bayezid II, and an attempt has been made to mask their addition by a nearly perfect merging with the page surface. This application may have been carried out by Mirim Çelebi during his revision and completion of the manuscript as a symbolic act of fidelity to his original patron, Bayezid II.

As has been mentioned above, many of the manuscripts held at the library of Bayezid II were subject to alterations of various kinds at a later date, either by restoration, added illuminations,¹²⁰ renewal of bindings,¹²¹ or the addition of Qur'anic divination sections to Qur'an manuscripts.¹²² Such modifications are extremely critical for the codicology of the works in the collection. This collection, comprising as it does manuscripts on an unusually wide range of subjects, from the ninth century up to Bayezid II's demise in 1512 ('Atufi's inventory only covers volumes acquired until ca. 1502–4), constitutes a

unique record of the stylistic tastes and cultural diversity throughout the Islamic world at the time. Besides shedding light on works of history, science, culture, and the arts across that vast geography, it also documents the web of artistic interactions and relationships evolving over the ages.

Just as the library holdings of Bayezid II were built upon the collections of his forebears, so too his own library was transferred to his successors and was redistributed over time, as the manuscripts made their way into various libraries throughout the palace and beyond. In the library inventories of more recent years, these works have been catalogued according to the names of the collections from which they originated within the imperial palace complex.¹²³ As I have described here, part of the collection that had accumulated for several centuries in the Inner Treasury was endowed to the library of Ahmed III, which was established as the first freestanding library erected in the palace grounds by this sultan. The entire collection of manuscripts was stamped with the endowment seal of Ahmed III and was recorded in an endowment deed (*waqfiyya*), which explains that the sultan

had this freestanding building constructed in the palace grounds with the intention that all those exquisite volumes which had been incorporated into the collection whether by appropriation, purchase, or gift should be preserved in the library to prevent their being mislaid or forgotten in some remote corner of the palace, to better protect them against damage, and also so that those wishing to acquire information from reading them should be granted access to these works.

(*Devlet-i Âliyye-i 'Osmâniyyenin zühûrundan beri sarây-i cedîd-i sulţânide gerek temellük ve şatın alma ve gerekse hediye şûretiyle biriken birbirinden nefis kitâbların köşe bucâkda қаларак unutulmaması, zâyî' olmaması, daha iyi muhâfaза edilmesi, ve bunların müţâla'asına müştâk olan kimselerin istifâde edebilmesi için sarây-i hümayûnda bir dârü'l-kütüb inşâ ettirmiştir.*)

Ahmed III required that works from every field of science and scholarship be selected for the library, which was to be opened on Mondays and Thursdays for the inhabitants of the male quarters in the Inner Palace (*Enderûn*). During those two days, certain volumes could be loaned out by the clerk of the library or the librarian to individuals within the palace; removing the

books from the palace grounds, however, was strictly prohibited. Thus the task of collocating, cataloguing, registering, and stamping these volumes with the seal of the library collection that had begun during the reign of Bayezid II was revived centuries later during the reign of Ahmed III. In establishing this endowed library, Ahmed III employed practices similar to those of his predecessor Bayezid II, so much so that one might conjecture that Ahmed III was inspired by the precedent of his ancestor.

Istanbul, Turkey*

NOTES

1. At the time of writing this article only 784 manuscripts in the palace library were identified by this author as belonging to the manuscript treasury of Bayezid II. However, more recently additional manuscripts have been discovered in that category. Although not covered in the present article, these have been included in the list of manuscripts stamped with Bayezid II's almond-shaped seal, which are compiled by the author in Appendix I at the end of this volume (see "Appended List," which enumerates 226 manuscripts, yielding 1,010 manuscripts in total).

34. After the Topkapı Palace was converted into a museum in 1924, all manuscripts contained in the dormitories of the Treasury Pages (Hazine), the Expeditionary Force (Seferli), the Halbediers (Baltacılar), the Cooks (Aşçılar), the Sofa, and other quarters were gathered together to form the Dormitories Library (Koğuşlar Kütüphanesi). Most of these manuscripts bear notes denoting the dormitories from which they had been transferred as well as endowment seals. Most are copies of the Qur'an, sections of the Qur'an, hadith collections, Qur'anic commentaries, and works on Islamic jurisprudence, although some pertain to other disciplines.

61. The Sacred Relics Treasury library was located in the Privy Chamber in the male quarters of the Third Court in the Topkapı Palace. The library was named after the chamber in which the sacred relics of the Prophet Muhammad were kept. Ottoman sultans endowed manuscripts to this library, and such volumes were stamped with the seal of the sultan who made the endowment. The library collection, 3118 manuscripts in all, consists mainly of illuminated Qur'ans from various eras and regions of the Islamic and Ottoman worlds, copied and ornamented by renowned calligraphers and illuminators.

69. Many works in a number of museums and collections bear dubious signatures by calligraphers. The palace collection includes works attested in the colophon to be transcribed by or attributed to Yaquṭ al-Musta'simi. Some of these works have undergone repairs such as the replacement of the original binding, covers, or end papers, and repairs to the frontispiece or dedicatory page after entering the Inner Treasury collection. Hence very few such manuscripts with the seal of Bayezid II remain in the collection.

96. I have identified the two differing seals of Bayezid II in manuscripts belonging to the collection of the Ahmed III library at the Topkapı Palace Museum Library (TSMK, A. 28/1 and A. 2137) while researching this collection with a fellowship granted by the Barakat Trust. This ongoing project is titled "Stamps and Ownership Records on Books in the Ahmed III Collection of the Topkapı Palace Museum Library." I am also currently studying other collections of the palace library from the same perspective.
97. TSMK, A. 28/1–2: Karatay, *Arapça Yazmalar*, 1712, 1713.
98. The seal measures 2.2 × 1.3 cm.

99. Zarif Orgun, *Tuğralar, Mühürler ve Elyazıları* (İstanbul, 1943); G. Kut and N. Bayraktar, *Yazma Eserlerde Vakıf Mühürleri* (Ankara, 1984).
100. Two manuscripts prepared for Bayezid II during his days as a prince, one on medicine (see note 47 above) and the other on astrology (see note 44 above), have not been stamped with his princely seal.
101. TSMK, A. 2137: Karatay, *Farsça Yazmalar*, 276.
102. Besides Bayezid II's three seals examined in the present essay, Garo Kürkman has identified in the Venice archives a hitherto unknown seal of Bayezid II, stamped on an Ottoman document dated 909 (1503). This seal is nearly the same as Selim I's round treasury seal, the center of which is inscribed *Sultân Selîm Şâh* and is surrounded by the four-fold rotation of the pious phrase *Tawakkulî 'alâ khâliqi*. The only difference is that the newly discovered seal's center is inscribed *Sultân Bâyezîd*. This seal will be published by Garo Kürkman in his forthcoming book, *Anatolian Seals and Engravers*.
103. TSMA, D. 10017. This document in the palace archives records gifts sent by Bayezid II to his sons who governed provinces, in the following order: Şehinşah, Ahmed, Mahmud, Korkud, Alemşah, and Selim. Only gifts sent to the princes Korkud and Ahmed feature books. Known for his interest in Sufism, Prince Korkud received mostly volumes on this subject (*İsfahânî*, *Şerh-i 'Akâ'id*, *Şerh-i Ma'âli*, *Hâşiye-i Ma'âli*, *Kitâb-i Muhtaşar*, and *Hamse-i Nizâmî*). Prince Ahmed, who was interested in poetry, received copies of famous works on Persian literature (*Şehnâme*, *Divân-i Kâsim*, *Divân-i Hâfiz*, *Divân-i Kâtibi*, *Külliyât-i Amâlî*, *Divân-i Câmî*, and *Divân-i Seyh Kemâl*, as well as nine unspecified volumes of diwans).

ARTS OF THE BOOK: THE ILLUSTRATED AND ILLUMINATED MANUSCRIPTS LISTED IN ‘ATUFI’S INVENTORY

The almond-shaped seal of Sultan Bayezid II (r. 1481–1512) is found on many fine manuscripts dating from the ninth to the fifteenth centuries. This seal is stamped on the first and last page, or only on the last page of the best attested works, which were inscribed, often with exceptionally amply illustrated texts, illuminated, and bound by master craftsmen. These manuscripts are mainly to be found today in the Topkapı Palace Museum Library (TSMK), sections of the Süleymaniye Library (SK), and other Istanbul libraries: Millet, Köprülü, and Nuruosmaniye, as well as the Turkish and Islamic Arts Museum (TİEM).¹ The presence of Bayezid II’s seal indicates that a manuscript in the Imperial Inner Treasury (*hizāne-i ‘āmire-i enderūnī*) of the Topkapı Palace was catalogued and stamped with the imperial seal during his reign.²

Manuscripts are listed in ‘Atufi’s inventory by title and subject, and occasionally by author. The calligrapher’s name or *nisba* is also included for Qur’an manuscripts and some liturgical texts. The masters mentioned are: Yaqut, Arghun al-Kamili, Ibn al-Shaykh, ‘Abd Allah al-Sayrafi, Yusuf Shah al-Harawi, al-Murshidi, Muhammad b. Sultan Shah al-Harawi, al-Wali, Ibn-i Abu Bakr, Mustafa b. Kamal, Ahmad b. Yahya, Fadl Allah, Ahmad al-Misri, Yusuf b. Sulayman, Muhammad al-Awza’i, ‘Abd al-Latif, and ‘Abd Allah al-Harawi. Although very rarely, there are cases in which the artistic merit of the manuscript is also noted, or where an illustrated manuscript (*muṣawwar*) is mentioned as such, or the phrase *khaṭṭ nafīs* (excellent calligraphy) indicates a masterful script. For copies of the Qur’an, the type of paper (such as *al-Dimashqī*, *al-Samarqandī*), occurrence of interlinear Persian or Turkish glosses, divination by the Qur’an (*fāl al-Qur’ān*), and closing prayers of the Qur’an are also mentioned where relevant. One Qur’an manuscript is

recorded as being the gift of an Egyptian envoy. The size of a Qur’an is recorded as being either large or small, and manuscripts inscribed in gold are also indicated.

The titles, calligraphers, and patrons of the extant illuminated and illustrated manuscripts bearing the seal impression of Bayezid II generally match those listed in ‘Atufi’s inventory. However, the inventory lists some illuminated manuscripts that are not currently marked with the seal of Bayezid II, which suggests that the original binding and first or last folios that would have been stamped with his seal are now missing, having probably been replaced during repairs. In what follows, I examine the artistic profile of the Bayezid II manuscript collection by matching works that currently bear his almond-shaped seal in various libraries with those listed or thought to be referred to in ‘Atufi’s inventory.

ILLUMINATED QUR’AN MANUSCRIPTS

According to the tradition in library inventories since the Middle Ages, the first entries in ‘Atufi’s inventory are copies of the Qur’an. Some Qur’an listings also include the name of the scribe, although the type of script is given only when the Kufic script was used (13 {2–5}, 16 {4}, 17 {15–16}). Qur’ans written in Kufic script, which are thought to date from the Umayyad and early Abbasid periods, have rarely survived in full text and in the original binding.³ Even the most ornate bindings were replaced by later owners. Some Qur’an manuscripts with the seal of Bayezid II, written in Kufic script during the Umayyad or early Abbasid periods, are believed to have been illuminated and bound in the late fourteenth century and have been attributed to the Mamluks.⁴ One

Kufic Qur'an dated to the tenth century that bears the Bayezid II seal also contains sura heading markers and marginal ornaments in the form of unique decorative rosette motifs. The outer faces of its leather binding, embellished with deep moulded central medallions and corner pieces, must have been made in the palace workshop during Bayezid II's reign.⁵

One of the earliest known Islamic calligraphers of the medieval period is Yaqut al-Musta'simi (d. 1298), who is thought to have lived in Baghdad during Abbasid rule. Although its authenticity may be contested, his signature appears on many calligraphical masterpieces, including Qur'an manuscripts, literary works, and single folio calligraphy compositions.⁶ 'Atufi's inventory lists two Qur'ans in the hand of Yaqut (12 {13}, 15 {16}). One of these was almost certainly copied by Yaqut on 3 Dhu'l Hijjah 694 (October 14, 1295) and illuminated by Muhammad al-Sa'ati. Although currently lacking the seal of Bayezid II,⁷ it is probably one of the aforementioned Qur'ans described by 'Atufi as being inscribed in the hand of Yaqut. The second copy must be the manuscript dated 17 Ramadan 696 (July 9, 1297) in the Topkapı Palace Museum Library, which has an exquisitely illuminated double frontispiece with the seal of Bayezid II on the opening folio.⁸ The finely decorated binding must have been made at the Istanbul palace workshop during the reign of Bayezid II. The third copy is probably a Qur'an manuscript, lavishly illuminated in the sultanic manner and dated 685 (1286–87), even though it lacks Bayezid II's seal impression.⁹

Yet another work listed in 'Atufi's inventory as copied in Yaqut's hand is the *Ad'iyatun bi-Khaṭṭi Yāqūt fi Mujalladin* (Book of Prayers in the Hand of Yaqut Bound in a Volume, 46 {8}). It is highly likely that this book of prayers is the finely illuminated manuscript stamped with Bayezid II's seal and copied on Safar 682 (May 1283), probably in Baghdad (fig. 1).¹⁰ Although the colophon identifies Yaqut as its scribe, this book of prayers is believed to be the work of one of his pupils. Alternatively, this manuscript may be identified as one of the books of "Seven-Day Prayers" (*Ad'iyatu al-Ayyāmi al-Sab'ati*) listed by 'Atufi without identifying their calligrapher (45 {3–4}, 46 {9–10, 13–14}). There are other works recorded in the inventory as written by Yaqut, including *Dīwānu shi'ri Abi Mahjan al-Thaqafi bi-khaṭṭi*

Fig. 1. Illuminated frontispiece, the seal of Bayezid II, and the endowment seal of Mahmud I, *Ad'iyat al-ayyām al-sab'a*, calligraphy signed by Yaqut, 1283, Baghdad. SK, Ayasofya, MS 2765, fol. 1a. (Photo: courtesy of the Süleymaniye Library)

Yāqūt wa-Dīwānu al-Ḥādīra bi-khaṭṭi Yāqūt fi mujalladin wāhidin (The Collected Poems by Abi Mahjan al-Thaqafi in the Hand of Yaqut and the Collected Poems of al-Hadira in the Hand of Yaqut Bound in a Single Volume, 207 {2–3}). This can be identified as a volume copied by Yaqut and the Timurid calligrapher Shams al-Baysunghuri in the Yaqut style; both collections of poems bear the seal of Bayezid II but are less lavishly illuminated than the other works copied by Yaqut.¹¹

One of the masters who adopted the Yaqut style is the calligrapher Arghun al-Kamili, who trained in Baghdad during the Ilkhanid period. This master is renowned for his five Qur'an copies in the *rayḥānī* script, of which those in Turkish collections are exquisitely illuminated.¹² Two Qur'ans (12 {14}, 16 {11–12}) and a book of prayers (47 {12–13}) are attributed to this calligrapher in

Fig. 2. Illuminated frontispiece of the Qur'an, calligraphy signed by Arghun al-Kamili, 1330, Baghdad. TSMK, E.H. 151, fols. 2b–3a. (Photo: courtesy of the Topkapı Palace Museum Library)

'Atufi's inventory. One of the Arghun al-Kamili Qur'ans, which was copied on 29 Rabi' I 730 (January 20, 1330), bears the seal of Bayezid II (fig. 2).¹³ There can be little doubt that this courtly manuscript, with its exquisitely decorated frontispiece, is one of those listed in the 'Atufi inventory. The second Qur'an listed must be the work dated to Safar 738 (August 1337).¹⁴ The illuminated book of prayers bearing the seal of Bayezid II, which was copied by Arghun al-Kamili and dated 723 (1352–53), may be the manuscript referred to in 'Atufi's inventory.¹⁵

Magnificently illuminated early fourteenth-century Qur'an sections (*juz'*) between 50 and 70 centimeters in length—some with signed and tooled leather bindings from Ilkhanid Baghdad, Mosul, and Hamadan—are to be found in the *Emanet Hazinesi* (Sacred Relics Treasury) section of the Topkapı Palace Museum Library and at the Museum of Turkish and Islamic Arts. Today none of these *juz'* bears the seal of Bayezid II. Some were inscribed by the calligrapher Ahmad b. al-Shaykh

al-Suhravardi al-Baqri, also known as Shahykhzada.¹⁶ This must be the Shayhkhzada mentioned in 'Atufi's inventory as the scribe of a book of prayers (48 {4}). A single-volume Qur'an copied by Ahmad b. al-Suhravardi on Shawwal 718 (November 1318) bears the seal of Bayezid II.¹⁷ On its first two double pages it contains the most exquisite illuminations in the style of the Ilkhanid period. The binding, however, and the Qur'anic divination section (*fāl al-Qur'ān*) at the end of the text were later additions. There can be little doubt that the inner and outer covers of this manuscript's binding, which are finely embellished with moulded leather floral decorations, are the work of an Ottoman master binder from around 1470.¹⁸ The divination section was copied in Persian prose in 857 (1453) in *ta'liq* script; since it lacks ornamentation, the provenance of this section is difficult to attribute. It could have been added at the workshop of a previous owner before arriving in Ottoman hands,

Fig. 3. Illuminated last sura of the Qur'an with the seal of Bayezid II, dedicated to Qaytbay, ca. 1485, Cairo. TĪEM, MS T. 533, fol. 437a. (Photo: courtesy of the Turkish and Islamic Arts Museum)

Fig. 4. Outer front cover of the Qur'an, dedicated to Qaytbay, ca. 1485, Cairo. TĪEM, MS T. 533. (Photo: courtesy of the Turkish and Islamic Arts Museum)

or it could equally have been the product of an Ottoman provincial workshop, such as Amasya, Bursa, or Edirne.¹⁹

The most artistically bound and stunningly illuminated of the Mamluk Qur'ans with the seal of Bayezid II is a copy dedicated to the Mamluk sultan Qaytbay (r. 1468–96) (fig. 3).²⁰ Although the colophon of this work, which is inscribed with gilt ink in the *rayḥānī* script, contains neither a date nor the calligrapher's name, it may be attributed to the last quarter of the fifteenth century. The elegant illuminations and splendidly adorned outer covers and doublures of the binding immediately give the impression of a manuscript of imperial grandeur (fig. 4).²¹ Sultan Qaytbay's Qur'an may well be the very manuscript mentioned in 'Atufi's Qur'an

list as having been presented to the Ottoman court by an ambassador from Egypt (15 {19}). It is known that a Mamluk ambassador visited Istanbul and attended the imperial court on 25 Jumada I (November 15, 1503) with his retinue, where he presented various gifts to Sultan Bayezid.²²

A Qur'an copied by Yusuf Shah al-Harawi is mentioned in the 'Atufi listing (13 {11}), although I have yet to encounter a Qur'an manuscript in his hand. This calligrapher did copy a manuscript of the *Mathnawī* of Mawlana al-Rumi, which was dedicated to the Timurid sultan Abu Sa'id (r. 1451–69) in 859–62 (1453–57), in the *naskh*, *nasta'liq*, and *tavqī'* scripts, with section headers illuminated in the Herat style; yet this work does not

Fig. 5. Illuminated frontispiece of the Qur'an, the seal of Bayezid II, calligraphy signed by Muhammad b. Sultan Shah al-Harawi, 1485, Herat. TSMK, H.S. 4, fol. 1b–2a. (Photo: courtesy of the Topkapı Palace Museum Library)

bear the Bayezid II seal.²³ However, a large-sized anthology that does bear this sultan's seal contains Yusuf Shah's exquisite renderings of the sayings of 'Ali (the fourth Sunni caliph and first Shi'i imam 'Ali b. Abi Talib), in *thuluth*, *naskh*, and *muḥaqqaq* scripts copied from the text of the scribe Yaqut.²⁴ The calligrapher Muhammad b. Sultan Shah al-Harawi (al-Hirawi) is referred to in 'Atufi's Qur'an inventory as the scribe of a large Qur'an (13 {18–19}). This master was responsible for a Qur'an copied in *mahrusa-i* Herat on 9 Ramadan 890 (September 19, 1485), inscribed in alternate sequence in a line of elongated *muḥaqqaq* followed by six lines of short *naskh*, then a line in elongated *thuluth*, again followed by six lines of short *naskh*, and subsequently another line of elongated *muḥaqqaq*. The headers, frames, and margins of the first two suras, where the almond-shaped seal of Sultan Bayezid II is stamped, are sumptuously illuminated in the Herat style (fig. 5). The leather binding with moulded outer covers and doublures, bearing central medallions and corner pieces, is the work of a Herat master binder (fig. 6). Although not a large manuscript, its elegant illumination, covers, and masterful rendering of the text make it one of the finest master-

pieces cited by 'Atufi.²⁵ This Qur'an, a select and stunning product of the Herat workshop of the Timurid sultan Husayn Bayqara (r. 1468–1506), must have been sent from that city as a gift to Bayezid II no later than fifteen years after its completion.

Another calligrapher to whom a Qur'an manuscript is attributed in 'Atufi's inventory is Fadl Allah (15 {7}). A Qur'an in the Khalili collection in London was inscribed and illuminated on 10 Muharram 899 (October 22, 1493) by the calligrapher and illuminator Fadl Allah b. Wali, known as Ibn al-'Arab.²⁶ The opening lines of this Qur'an are framed with a finely illuminated heading (*sarlawḥa*) around the text. Although there is no impression of Bayezid II's seal, it is highly probable that this is the Qur'an referred to by 'Atufi. Certain other fine manuscripts stylistically attributable to the second half of the fifteenth century are also assumed to have been illuminated by Fadl Allah. Two *Sūra al-An'am* (sixth sura of the Qur'an) manuscripts were copied by the master in 912 (1506–7) and therefore are not included in 'Atufi's inventory, which was completed in 1503–4. One of these two manuscripts, which were also illuminated by Fadl Allah *naqqāsh* (painter-illuminator), bears the seal of

Fig. 6. Binding, doublure of back cover, Qur'an, 1485, Herat. TSMK, H.S. 4. (Photo: courtesy of the Topkapı Palace Museum Library)

Bayezid II.²⁷ As the text was popular among Ottoman Muslims, *Sūra al-An'ām* manuscripts of great beauty and distinction were produced from the sixteenth century onward. Fadl Allah clearly initiated the tradition of copying finely illuminated versions of this much sought-after text.²⁸ *Naqqāsh* Fadl Allah was rewarded with currency and robes of honor by Bayezid II for masterworks he prepared for the court between the years 911 and 915 (1505–9).²⁹ This scribe-painter presented one of his Qur'an copies to the sultan as a gift for the inauguration of the Bayezid Mosque in Istanbul.³⁰

The most renowned examples of the arts of the book from the reign of Bayezid II are the group of Qur'ans copied by the Ottoman calligrapher Shaykh Hamdullah (d. 1520) (fig. 7).³¹ We know that this master was handsomely rewarded for the works he created for the court. The records tell us that between the years 909 and 917 (1503–11), he received imperial gifts totaling fifty thousand aspers (*akçe*), and was presented on four occasions with robes and sable pelts.³² Four works he copied between 1494 and 1508 include divination sections at the end of the Qur'anic text, which was an unusual format

and not a tradition in Ottoman Qur'ans. These sections are written in verse, one in *naskh* and the other three in *nasta'liq* script.³³ Although only one (TSMK, A. 5) of this group of finely illuminated Qur'ans copied by Shaykh Hamdullah bears the Bayezid II seal, records clearly indicate that all but one of them (TSMK, E.H. 71) were produced for the personal use of Bayezid II. Three Qur'ans listed in the inventory as having been copied in the hand of Ibn al-Shaykh, as Shaykh Hamdullah was popularly known (12 {15, 16}), must have been written before 1503–4, the year in which 'Atufi completed his inventory. In this case, it is reasonable to conclude that the three extant Qur'ans in the hand of this shaykh are the ones listed in the inventory. One of these was copied by the shaykh during the middle ten days of Rajab 899 (April 19–26, 1494), and the second one at the "Abode of Conquest, Constantinople" (*dār al-faṭḥ Kōstanṭīniyya*) during the first ten days of Dhu'l-Hijjah 901 (August 11–20, 1496). I believe that the third manuscript is the one dated 909 (1503–4), even though this is the same year in which a clean copy of 'Atufi's inventory was made from an earlier draft prepared in 908 (1502–3).³⁴

Fig. 7. Illuminated colophon page of the Qur'an, calligraphy signed by Shaykh Hamdullah, 1494, Istanbul. TIEM, T. 402, fol. 259b. (Photo: courtesy of the Turkish and Islamic Arts Museum)

Fig. 8. Illuminated frontispiece of the Qur'an, the endowment seal of Ahmed III, calligraphy signed by Shaykh Hamdullah, illumination signed by Hasan b. 'Abd Allah, 1503–4, Istanbul. TSMK, A. 5, fol. 1a. (Photo: courtesy of the Topkapı Palace Museum Library)

Based on their shared repertoire of sparse stems, trefoil florettes, and large *khatā'i* motifs dispersed over a wide gilded field, the illuminations in two of the above-mentioned Qur'an manuscripts may be attributable to the artist *Naqqāsh* Fadl Allah. Two other Qur'ans copied in Shaykh Hamdullah's hand bear the signature of the artist Hasan b. 'Abd Allah; these manuscripts are dated 909 (1503–4) and 914 (1508–9), respectively (fig. 8).³⁵ Both were presented to the court by the calligrapher Shaykh at the inauguration of Bayezid's mosque in Istanbul, for which he was rewarded with coins and robes of honor.³⁶ The artist Hasan excelled at creating frontispiece panels in which geometrical designs merge almost

seamlessly with ornate foliate patterns, and in which dark blue pigment dominates. The illuminations of another finely illuminated Qur'an copied by Shaykh Hamdullah on 14 Safar 905 (September 14, 1499) may be attributed to the artist Hasan.³⁷ For his finest manuscript work, the artist was rewarded with 32,500 aspers by the sultan between the years 910 and 917 (1504–12); he also received robes of honor on eleven occasions.³⁸ The leather bindings of Qur'an manuscripts in Shaykh Hamdullah's hand are the work of another master craftsman.³⁹ It would appear that they were created by the binder Ahmad, who is referred to in the sources in connection with manuscripts of the Bayezid II period. Be-

tween the years 909 and 916 (1503–10), this master binder was rewarded by the court with 3,900 aspers and was also given robes of honor in return for a slave he gifted to the sultan.⁴⁰

ILLUMINATED AND ILLUSTRATED SCIENTIFIC MANUSCRIPTS

Many of the earliest illustrated manuscripts in Islamic art are works of astrology, philosophy, medicine, and botany. The seal of Bayezid II is stamped on a number of rare illustrated works of this kind in the Topkapı Palace Museum collection, including the *Kitāb Şuwar al-Kawākib al-Thābita* (Book of Fixed Stars, 326 {5–6}), *Kitāb al-ḥashā'ish* (a translation of Dioscorides's *De Materia Medica*, 169 {3}), *Kitāb fī Ma'rīfat al-ḥiyal al-Handasiyya* (Book of Ingenious Mechanical Devices, 201 {16}, 310 {11–12}), and *Kitāb al-Baytara* (Book of Veterinary Art, 199 {4–9}).⁴¹ These works were created during the twelfth and early thirteenth centuries in northern Mesopotamia under the patronage of the local nobility and must have been brought to the Ottoman manuscript treasury before 1503–4, since they are recorded in 'Atufi's inventory.

Manuscripts in the Turhan Sultan section of the Süleymaniye Library were removed from the Inner Treasury of the Topkapı Palace and endowed by the queen mother Hatice Turhan Sultan (d. 1682) to the magnificent mosque she built in Eminönü, Istanbul. She was the wife of İbrahim I (r. 1640–48), mother of Mehmed IV (r. 1648–87), and grandmother of Ahmed III (r. 1703–30), the latter being the first sultan to build a freestanding library at the Topkapı Palace. While the mosque was still under construction, Hatice Turhan Sultan had the list of a group of books in the Inner Treasury (*hizāne-i 'āmiri-i enderūnī*) prepared, which mainly include rare works bearing the seal of Bayezid II.⁴² The listed works were also stamped with the endowment seal of Turhan Sultan with the date 1072 (1661–62) and were subsequently transferred to her mosque, which was completed in 1665, where they were probably placed in a special section allocated to the library.⁴³

Hatice Turhan Sultan was the first queen mother to remove a large number of rare books from the Topkapı

Palace's book treasury, relocating them to a public library outside the palace. One of these rare works was the *Dīwān al-Khuṭṭāb al-Nabata* copied by Mahmud b. 'Ali b. Yusuf al-Tari in 661 (1262–63) (figs. 9a–b). The work contains the sermons (*khuṭba*) of Ibn Nubata al-Khatib (d. 984), who is believed to have been born in Silvan and who lived in Aleppo.⁴⁴ The author was renowned in his day for his considerable mastery in the devices of persuasive rhetoric, which he used during the delivery of sermons, a legacy continued by his son and grandson. The copy of the *Dīwān al-Khuṭṭāb al-Nabata* in the Hatice Turhan Sultan collection is a masterpiece. The original leather binding is decorated on its outer and inner covers with a large central medallion and corner pieces. The doublures are paper-lined. The names of the book and that of the author are inscribed within the illuminated medallion on fol. 1a, and to the left of the medallion is the endowment seal of the Turhan Sultan. The second page is embellished with a fully ornamented *lawḥa* (fols. 1b–2a). In the lower left corner of fol. 2a is the almond-shaped seal of Bayezid II, which also appears on the end (colophon) page (fol. 189a). The frontispiece (fols. 2b–3a) and finispiece are both decorated with framed illuminations. This rare work was written in the mid-thirteenth century, probably in Mesopotamia, and was bound and illuminated by master craftsmen of the day. Having entered the Ottoman palace library collection prior to 1503–4, it is among the works listed in 'Atufi's inventory (*Kitābu al-Khuṭabi al-Nubātiyyati*, 207 {6}, 218 {9}), according to which two copies of the same work existed in the palace library. Interestingly, at the top of the front page (fol. 1a) of the extant copy described above, the same title is written in the hand of 'Atufi or one of his assistants at the palace library (fig. 9b). That such an exquisite work, rare in terms both of content and artistic merit, should be selected from among the thousands of volumes in the palace library collection to be endowed to the library of a mosque built for the queen mother indicates the influence wielded by knowledgeable bibliophiles well-versed in the arts of the book. Endowing this volume made it accessible to clerics tasked with the delivery of sermons in that mosque, and to their pupils aspiring to become preachers.

The manuscript entitled *Tansūkh-nāma-i Ilkhānī* (Treasure Book of the Ilkhans on the Branches of the

Chinese Sciences) is a work of medicine that was translated from Chinese into Persian in Tabriz in 713 (1313) at the request of Rashid al-Din (d. 1318), the scientist and vizier to the Mongol Ilkhanid sovereigns Ghazan

(r. 1295–1304) and Uljaytu (r. 1304–17). The book includes illustrated drawings of internal and external human organs (fig. 10).⁴⁵ This rare work made its way into the Ottoman palace library collection, where it was stamped with Bayezid II's seal. It is mentioned in two separate entries in the 'Atufi inventory. The first is among historical works (184 {3}), and the second entry is in connection with works related to medicine, alchemy, and magic. This last entry cites the author as Nasir al-Tusi (307 {7}). Similarly, an exceptional illustrated manuscript of the Ilkhanid era, Ibn Bakhtishu's *Manāfi' al-ḥayawān* (On the Usefulness of Animals), also entered the Ottoman palace library collection; it must have been among the several copies of this work that are recorded in 'Atufi's inventory (169 {13–17}).⁴⁶

One of the multiple-copy works on Sufism inventoried by 'Atufi is the *Kitāb kīmīyā sa'adāt* (Alchemy of Eternal Bliss) (107 {14–19}, 108 {1–4}). A particularly fine copy of this work was executed by the scribe and artist 'Abd al-Rahman b. 'Abd al-'Aziz b. 'Abd Allah al-Shirazi in Shirvan on 2 Safar 781 (May 19, 1379) for the ruler Shirvanshah Hushang. The scribe was also the illuminator of the book, whereas the leather binding was the work of a master binder. We know that this work, a product of the Shirvanshah period dating to the end of the fourteenth century and a rarity among the Islamic arts of the book, entered the palace collection prior to 1503–4, since it bears the seal of Bayezid II.⁴⁷

One of the early fifteenth-century masterpieces of Islamic manuscript art is an anthology, thought to have been about a thousand pages in length, containing texts on astrology, which was copied for Iskandar Sultan, the Timurid crown prince and governor of Fars (d. 1414) in 813–14 (1410–11). The illuminated and illustrated opening pages of this copy, whose first miniature depicts an observatory, are in the Istanbul University Library, along with several illuminated sections of the text (fig. 11).⁴⁸ The Bayezid II seal is stamped on the illuminated frontispiece of this work. This manuscript was removed from the Topkapı Palace Inner Treasury to be sent to the library that was founded in approximately 1886 by Sultan Abdülhamid II (r. 1876–1909) in the Yıldız Palace, where he took up residence for most of his reign. The anthology was later transferred, along with other books, to the Istanbul University Library in 1924. These chang-

Fig. 10. Images of wrists, *Tansūkh-nāma-i Ilkhānī*, 1313, Tabriz. SK, Ayasofya MS 3596, fols. 81b–82a. (Photo: courtesy of the Süleymaniye Library)

es of location led to the loss of the finest, most richly illuminated and illustrated sections of the book to collections outside Turkey.⁴⁹ These sections must have been among the astrology works listed as *nujūm* and *zīj* in 'Atufi's inventory (313–19). Another such manuscript is recorded under the title, *Kitābu Walādati Iskandar bin 'Umar Shaykh bin Amīr Taymūr min qibali al-nujūmi* (Book on the Birth of Iskandar son of Umar Shakh son of Amir Timur pertaining to Astrology, 319 {4–5}). Other works bearing the seal of Bayezid II include a sumptuously illuminated 700-page anthology prepared for Iskandar Sultan in 815–16 (1412–13),⁵⁰ and another anthology made for him in 816 (1413–14), which boasts a number of illustrated pages and samples of fine calligraphy. A heading written on the first page of the latter, probably in the hand of 'Atufi, describes this volume as an anthology of fine calligraphy comprising treatises gathered together into a monumental binding; the same

heading is recorded in 'Atufi's inventory (*Safīnatun fihā khuṭūṭun nafīsatun wa-Rasā'ilu fī mujalladin a'zama*, 257 {9}).⁵¹ These examples, together with other works recorded in the inventory of 'Atufi, suffice to indicate that manuscripts copied for the bibliophile prince Iskandar, particularly those related to history and astrology in which he is known to have had a keen interest, entered the Ottoman palace library collection prior to 1503–4.

'Atufi's inventory also contains entries related to the wonders of creation (*'Ajā'ib al-makhlūqāt wa-gharā'ib al-mawjūdāt*, 200 {6–14}). We know from other entries that Bayezid's library contained Persian and Turkish translations of an Arabic text on cosmography by Zakariya al-Qazwini (d. 1283). This is a work that was particularly popular in medieval Islamic bibliophile circles, and many illustrated copies of it were made.⁵² There are a number of illuminated and illustrated manuscripts of this genre in the library collection of Bayezid II

Fig. 11. Illuminated frontispiece, the seals of Bayezid II and the *Kitābkhāna-i Mābāyn-i Humāyūn* of Abdülhamid II (Library of the Yıldız Palace), *Anthology*, 1410–11, Shiraz. Istanbul University Library, MS F. 1418, fol. 1a. (Photo: courtesy of the Istanbul University Library)

Fig. 12. Illuminated frontispiece, *'Ajā'ib al-makhlūqāt wa-gharā'ib al-mawjūdāt*, 1422, Shiraz. SK, Fatih MS 4171, fol. 1b. (Photo: courtesy of the Süleymaniye Library)

predating 1503–4, which were copied during the Timurid and Aqqoyunlu Turkmen periods and bear the seal of Bayezid II. One was copied and illustrated in Persian on Rabi' I 825 (February–March 1422) in Shiraz, at the court of the Timurid prince Ibrahim Sultan ibn Shah-rukh (governor of Fars between 1414 and 1435) (fig. 12).⁵³ A copy of the *'Ajā'ib al-makhlūqāt* made on Rabi' I 824 (March–April 1421), again in Shiraz and illustrated in the same workshop as the abovementioned work, is stamped on its frontispiece with the oval seal of 'Ala' al-Din (d. 1513), son of the bibliophile prince Ahmad (d. 1513) and grandson of Bayezid II.⁵⁴

HISTORICAL AND LITERARY WORKS

One of the illustrated historical works bearing the seal of Bayezid II is the *Tārīkh-i Jahāngushāy* (History of the World Conqueror), Juwayni's (d. 1283) chronicle of Genghis Khan's reign and the establishment of the Mongol empire. This copy was prepared on 4 Dhu'l-Hijjah 689 (December 8, 1290) during the Ilkhanid period, probably in Baghdad.⁵⁵ It is cited in 'Atufi's inventory among historical works of the Ilkhanid period (*Tārīkh-i Jangiz Khān al-mashhūru bi-Tārīkh-i jahān-gushāy fī al-tawā-rīkhi*, 185 {10}).

Fig. 13. Binding, leather filigree of outer cover, *Dīwān of Anwārī*, 1309, Ilkhanid? SK, Fatih MS 3784. (Photo: courtesy of the Süleymaniye Library)

Anwari (d. 1168?), a poet at the palace of the Great Seljuq ruler Sultan Sanjar (r. 1118–57), is renowned as one of the outstanding qasida poets in Iranian literature.⁵⁶ Eleven copies of this celebrated poet's diwan are recorded in 'Atufi's inventory, in addition to a commentary on its difficult passages (238 {10–12, 14}). Sultan Bayezid II's seal is impressed on an extant sultanic copy of Anwari's diwan (fols. 2a, 214b), dated Shawwal 708 (March–April 1309) and written in a script resembling *ta'liq* by Muhammad b. 'Abdallah b. Muhammad al-Hafiz. Its illuminations and superbly carved leather binding are the work of skilled masters (figs. 13, 14). This book prepared for Sultan Mas'ud b. Abu Bakr was probably produced in the Ilkhanid territories.⁵⁷

Manuscripts stamped with the seal of Bayezid II and recorded in 'Atufi's inventory include some of the finest

illustrated and illuminated thirteenth-century literary texts. One of these is the tragic romance of *Warqa wa-Gulshāh* in Persian (254 {4}). The earliest illustrated copy of this work produced in Seljuq Anatolia is a manuscript containing the miniatures of *naqqāsh* 'Abd al-Mu'min b. Muhammad al-Huwayyi, which can be dated to the first half of the thirteenth century and was illustrated in Konya.⁵⁸ The Jalayirid sultans' love of books and their particular predilection for illustrated manuscripts has been demonstrated in various publications. Among those listed by 'Atufi are finely illustrated works of the Jalayirid period, although the inventory does not mention the fact that they are illustrated. These include two copies of the *Farhād-nāmah-i 'Arif* (251 {8–9}), one of which 'Atufi identifies as an autograph manuscript by its author. An extant illustrated version of this work in the Topkapı Palace Museum Library, prepared for Shirvanshah Hushang (d. 1382) and the Jalayirid sultan Shaykh Uways (r. 1356–74), is the one inscribed in the author's hand.⁵⁹ On its frontispiece we see the almond-shaped seal of Bayezid II. The second copy in the Süleymaniye Library's Ayasofya section also carries the seal of Bayezid II. The ornamentation of its leather binding and the paper type suggest that this manuscript was likely produced in Istanbul around 1480.⁶⁰ The same sultan's seal is stamped on two exquisite copies of the diwan of Sultan Ahmed Jalayir, one illustrated and the other illuminated, which were executed during his lifetime (r. 1382–1410).⁶¹ Both of these copies appear to be included in 'Atufi's inventory, which lists three manuscripts of *Dīwān-i Sulṭān Aḥmad* (244 {11–12}).

'Atufi's inventory shows that a copy of the diwan of the Jalayirid woman poet, Jihan Khatun, was also to be found in the palace library collection (246 {2}). An extant copy of this work in the Topkapı Palace Museum Library, dated to 840 (1436–37), is in fact stamped with Bayezid II's seal. That copy, which was produced during the Timurid period, probably in Shiraz, is not illustrated but has delicate illuminations in a "naïve" style. More significantly, the outer cover of its masterfully executed leather binding is embellished with the earliest known human figures seen on an Islamic binding.⁶²

One of the most prominent illustrated literary works of the early medieval period is the *Kalīla wa-Dimna* (Kalila and Dimna, or Book of Fables). Two illustrated (*muṣawwar*) copies in Persian and Arabic are featured

Fig. 14. Illuminated dedication page with the seals of Bayezid II, Mahmud I, and the inspector. *Dīwān of Anwārī*, 1309, Ilkhanid? SK, Fatih MS 3784, fols. 1b–2a. (Photo courtesy of the Süleymaniye Library)

in 'Atufi's inventory (189 {10, 11–12}). Several illustrated manuscripts of the *Kalīla wa-Dimna* in Arabic and Persian produced before 1503–4 are known.⁶³ One of the Persian illustrated versions was copied for the Timurid crown prince and bibliophile Baysunghur b. Shahkrukh (d. 1433) by the *nasta'liq* master calligrapher Muhammad b. Husam Shams al-Baysunghuri in the palace workshop of the capital (*dār al-saltanat*) Herat in 833 (1429).⁶⁴ This manuscript has an exquisite leather binding with outer covers designed by a master of the Timurid Herat workshop that is decorated with animals, its doublures featuring filigree central medallion and corner pieces.⁶⁵ The first three pages are illuminated with predominantly dark blue designs. The manuscript's twenty-five miniatures, which are clearly the work of a Herat master, superbly illustrate the text. This masterwork prepared for a bibliophile Timurid patron was

clearly among the *Kalīla wa-Dimna* manuscripts recorded by 'Atufi, as we see from the almond-shaped seal of Bayezid II impressed upon it.

Most of the fifteenth-century illuminated copies of poetic works in the Persian literary tradition, such as the diwans of Kasimi, Kamal, and Katibi, bear the seal of Bayezid II. These works were written between 1460 and 1500 in the *nasta'liq* script by leading masters of the day either in Baghdad, Shiraz, or Tabriz during the Qaraqoyunlu and Aqqoyunlu periods. They were exquisitely illuminated and bound in sumptuously decorated bindings for royal patrons, sovereigns, and princes governing those cities. One such work is a diwan in Chagatay Turkish, probably copied in Shiraz around 1475 for the bibliophile prince Khalil Sultan (d. 1478), governor of the Aqqoyunlu city of Shiraz, who ruled as sultan for only a year.⁶⁶ This work is recorded in 'Atufi's inventory

Fig. 15. Mihr sailing on the sea, *Mihr u Mushtarī*, 1482, Shiraz. TSMK, A. 3563, fol. 87a. (Photo: courtesy of the Topkapı Palace Museum Library)

as *Dīwān-i Mīr-Hidāyat bi-al-Mughūliyyati* (Mir Hidayat's Collected Poems in the Mongolian (i.e., Chagatay) Language, 262 {13}). The manuscript, which contains four miniatures that are clearly the work of a master artist, bears the almond-shaped seal of Bayezid II.⁶⁷ One of the finest literary manuscripts to enter the palace library collection is an anthology of selected works from the diwans of twelve poets of Persian literature, including those mentioned above, which was copied by the renowned master calligrapher at the Aqqoyunlu Turkmen court, 'Abd al-Rahim b. 'Abd al-Rahman al-Khwarazmi al-Sultani on 26 Dhu'l-Qa'dah (April 3, 1475). The double frontispiece and opening pages to each section of the volume are most elegantly illuminated by a master artist. Unfortunately, the binding, which is thought to have

been equally stunning, is missing. This anthology, one of the greatest masterpieces of the palace workshop of Aqqoyunlu Tabriz, bears Bayezid II's almond-shaped seal on both its frontispiece and finispiece (first and last pages).⁶⁸

The author Muhammad 'Assar's (d. 1382–83) account of the adventures of Mihr and Mushtari, which he wrote in Persian verse, was first copied, illuminated, and illustrated under the title *Mihr u Mushtarī* in the fifteenth century.⁶⁹ This work in Persian also appears in multiple copies in 'Atufi's book inventory (251 {14, 17, 19}). Only one of these is listed as illustrated. An extant illustrated copy of the *Mihr u Mushtarī* in the Topkapı Palace Museum Library, dated 18 Ramadan 887 (October 31, 1482) and written by the calligrapher Na'im al-Din al-Katib b. Sadr ad-Din, contains miniatures in the Shiraz style of the Aqqoyunlu period (fig. 15). Bayezid's seal appears on fol. 1a along with a dedication inside an ornamented medallion, which indicates that the work was prepared for this sultan's treasury (fig. 16). It has been suggested that the dedication shows that the work was copied in an Aqqoyunlu workshop prior to being sent as a gift from the Aqqoyunlu to the Ottoman court.⁷⁰ This illustrated manuscript must have arrived at the imperial palace in Istanbul before 1487, since the first *Mihr u Mushtarī* in Turkish translation appeared without miniatures in 892 (1486–87), and was then duly stamped with Bayezid's seal.⁷¹ 'Atufi lists this Turkish version separately from the Persian copies in his inventory (264 {7}).

The works of poetry mentioned above are by no means the only literary masterpieces to have reached the Ottoman manuscript treasury from the Aqqoyunlu palace. Two poets at the Herat court of Sultan Husayn Bayqara (r. 1468–1507), Molla Jami (d. 1492) and 'Ali Shir Nava'i (d. 1501), were renowned not only throughout the Timurid regions but also beyond. Their fame spread to the courts of other contemporary art-loving patron sovereigns, reaching the Aqqoyunlu and Ottoman palaces. According to 'Atufi's entries regarding the works of these two Herat poets, it appears that the first two finely illuminated copies of their work entered Bayezid's manuscript collection during the poets' lifetime (Jami, 237 {2–15}; Nava'i, 262 {6–8}). The 800-page *Kulliyāt* (anthology) of Jami deserves particular attention. This manuscript, dated 1492–95, most probably originated in Herat.

Fig. 16. Illuminated dedication page, and the seal of Bayezid II, *Mihr u Mushtarī*, 1482, Shiraz. TSMK, A. 3563, fol. 1a. (Photo: courtesy of the Topkapı Palace Museum Library)

Its sections are finely illuminated with motifs and the binding is the work of a master. Although it does not bear the seal of Bayezid II, we know from the dedicatory inscription on the illuminated opening page that the copy was in the manuscript treasury of this sultan's son, Prince Ahmed (d. 1513).⁷² Bayezid, knowing his son to be a bibliophile, sent him a generous consignment of books as a gift on 4 Dhu'l-Qa'dah 888 (December 4, 1483). Among them were the diwans of poets such as Jami and Hafiz.⁷³

The literary works listed by 'Atufi include multiple copies of those by Mawlana Jalal al-Din Rumi (d. 1273) (230 {12–19}, 231 {1–14}) and Farid al-Din 'Attar (d. 1220) (232 {5–19}, 233 {1–2}). Some fine copies of Rumi's *Mathnawī* dating to the fifteenth century can be found

in the libraries of Istanbul, each section illuminated, with moulded leather or painted lacquer bindings and filigree work on the doublures.⁷⁴ One of these copies bears the date 8 Shawwal 853 (November 24, 1449) and the seal of Bayezid II.⁷⁵ Copies of 'Attar's works are also represented in library collections. Their exquisite bindings, illuminations, and paper quality place them among the finest masterpieces of the Timurid palace workshop of Herat in the first half of the fifteenth century.⁷⁶ Although not all illuminated copies of these poets' works are stamped with Bayezid II's seal, the majority of them must have arrived on Ottoman soil within fifty years of their creation, and undoubtedly entered the imperial palace's manuscript collection.

The *Khamasa* (Quintet of Poems) of Nizami (d. 1217?) and Firdawsī's (d. 1025) *Shāhnāma* (The Book of Kings) were among the most popular Islamic illustrated works. Many illustrated copies of both titles were made in Iran, particularly at Shiraz, over an approximately hundred-year period from the second half of the fifteenth century to the second half of the sixteenth. The largest collection of illustrated copies of these two titles is found in the Topkapı Palace Museum Library. There are fifty-five illustrated copies of the *Shāhnāma* in the library, of which eleven are dated prior to 1503–4. None of these manuscripts bears the seal of Bayezid II.⁷⁷ 'Atufi's inventory lists five copies of the *Shāhnāma* among works of Persian literature, of which only one is specified as being illustrated (240 {7–9}); in addition, he cites three selections from the *Shāhnāma* (240 {8–9}, 249 {12}). 'Atufi records one Turkish translation of the *Shāhnāma* under the section on historical works (187 {7}).⁷⁸

There are seventy-one illustrated copies of Nizami's *Khamasa* in the Topkapı Palace Museum Library. Thirty of these are dated prior to 1503–4, and three manuscripts from this group bear the seal of Bayezid II. Two of them were illustrated at Shiraz during the Aqqoyunlu Turkmen period, towards the end of the fifteenth century.⁷⁹ The third copy possesses certain features of significance for Islamic codicology and for the Islamic arts of the book, which gives it an intriguing biography.⁸⁰ 'Atufi lists relatively few copies of Nizami's *Khamasa*, although he cites each of the five sections of the book separately (234 {5–19}).

OTTOMAN LITERARY MANUSCRIPTS LISTED IN 'ATUFI'S INVENTORY

From the early fifteenth century up to 1503–4, when 'Atufi made the final revisions to his inventory, manuscripts inscribed, illuminated, and bound with moulded and tooled covers of fine leather by master craftsmen were made, first in Amasya and Bursa, later in Edirne and Istanbul. The majority of these works bear the seal of Bayezid II and are included in 'Atufi's inventory. One example is the *Maqāsid al-alḥān* (Purports of Music), a work on music theory written by 'Abd al-Qadir Maraghi (d. 1435), a copy of which was made for the Ottoman sultan Murad II (r. 1421–44; 1446–51). This finely illuminated copy, skillfully bound in leather and dated 14 Jumada II 838 (January 15, 1435) bears Bayezid's seal on the illuminated frontispiece (fig. 17).⁸¹ 'Abd al-Qadir's works are among those recorded in 'Atufi's list; the copy mentioned above must have been one of those (335 {17}). A copy of the author's *Jāmi' al-alḥān* (Collection of Music), which is in the Nuruosmaniye Library, does bear the Sultan Bayezid II seal (336 {3–5}).⁸²

A considerable number of exquisitely illuminated manuscripts bound in fine leather were copied for Mehmed II, son of Murad II, between the years 1465 and 1480 in Istanbul.⁸³ However, masterfully illustrated copies from the Ottoman workshops are rare prior to 1503–4.⁸⁴ It is clear that the masters of book arts who were responsible for production in the Ottoman palace workshop in the mid-fifteenth century continued their activities at the beginning of Bayezid II's reign. Migrant calligraphers such as Ghiyath al-Din al-Mujallid al-Isfahani⁸⁵ and Muhammad al-Badakhshi⁸⁶ produced (this time for their Ottoman patrons) masterful copies of the works of poets much admired and already represented with fine manuscripts in southern and eastern Iran, such as Molla Jami and 'Attar (fig. 18). In this context, another master calligrapher of note is Sayyid Muhammad al-Munshi al-Sultani, who was responsible for the widespread adoption of the *dīvānī* script at the Ottoman court.⁸⁷ This calligrapher copied the *Jawharat al-sharaf* (Honorable Pearl), a work related to *inshā'* (literary composition) in the *dīvānī* script, in *belde-i Koştanīniyye* approximately one month before the demise of Mehmed II in Muharram 886 (March–April 1481) (fig. 19).⁸⁸

Fig. 17. Illuminated dedication page with the seal of Bayezid II, *Maqāsid al-alḥān*, 1435, Bursa or Edirne. TSMK, R. 1726, fol. 2a. (Photo: courtesy of the Topkapı Palace Museum Library)

The work is exquisitely ornamented and bound. It is a masterpiece that acquired the seal of Bayezid II and a place in the inventory of 'Atufi (220 {12–13}).

The text of an epic in Persian verse entitled the *Garshāsb-nāma* was generally included in illustrated copies of the *Shāhnāma* of Firdawsi. Independently bound, illustrated manuscript versions of this tale are rare, and the work was not favored for illustration during the Ottoman period.⁸⁹ The *Garshāsb-nāma* is recorded in 'Atufi's inventory (249 {12}).⁹⁰ It is probable that this copy was the one inscribed for Bayezid II in fine *nasta'liq* in 905 (1499–1500) by the calligrapher Sultan Ahmad al-Harawi, who migrated from Herat to Istanbul during the late Timurid period (fig. 20).⁹¹ That copy is

Fig. 18. Decorated page, *Muammiyat* of Jami, 1480–81, calligraphy signed by Ghiyath al-Din al-mujallid al-Isfahani, Istanbul. SK, Ayasofya MS 4009, fol. 3a. (Photo: courtesy of the Süleymaniye Library)

Fig. 19. Illuminated heading, *Jawharat al-sharaf*, 1481, calligraphy signed by Muhammad al-Munshi al-Sultani, Istanbul. SK, Ayasofya MS 3839, fol. 1b. (Photo: courtesy of the Süleymaniye Library)

finely illuminated and bound. The calligrapher Sultan Ahmad, who is mentioned in the *in‘āmāt defteri* (Register of Donations) from the reign of Bayezid II, must be the master who copied the work referred to above.⁹² This particular calligrapher was rewarded with 24,500 aspers and was presented with honorary robes on five occasions between 900 and 917 (1494–1512). Two thousand aspers were gifted to the master for the book *Yūsuf wa Zulaykha*, which he presented as a gift to the sultan in 910 (1504–5).

A manuscript that appears in ‘Atufi’s inventory under the title *Naẓmu Qışṣa-yi Sultān Bāyezīd Khān -khallada Allāhu ta‘ālā khilāfatahu* (Versified Story of Sultan Bayezid Khan, May God Grant His Caliphate Perma-

nence, 249 {19}) contains an account of the events of the sultan’s reign between the years 1480 and 84. The same title also appears on a label glued to the outer fore-edge flap on the leather binding of a book in the Topkapı Palace Museum Library. The title of this work is inscribed in the central section of the *unwān* (ornamented header frame) as *Shāhnāma az guftār-i Malīk-i Āhī* (*Shāhnāma* according to Malik Ahi).⁹³ The book was copied by the calligrapher Darvish Mahmud Ibn ‘Abd Allah Naqqash, certainly after 1485, but without question prior to 1503–4 when ‘Atufi finalized his inventory. The work bears Bayezid II’s seal on the final page and was probably illustrated by the manuscript’s calligrapher, Mahmud. The name of this master also occurs in the book of

Fig. 20. Illuminated dedication page, *Garshāshnāma*, 1499–1500, calligraphy signed by Sultan Ahmad al-Harawī, Istanbul. SK, Ayasofya MS 3287, fol. 2a. (Photo courtesy of the Süleymaniye Library)

benefaction of the Bayezid II era, which was the record of favors granted to artists of the period. According to that source, Mahmud was the recipient of one thousand five hundred aspers in 914 (1508–9) for another work.⁹⁴

CONCLUSION

During a period in which production of illuminated manuscripts began to gain momentum in the court workshops of Sultan Mehmed II at the palaces of Edirne and Istanbul, Prince Bayezid was serving as governor of Amasya, a duty which would occupy him for twenty-seven years (1454–81). It was in Amasya that he met the calligrapher Shaykh Hamdullah, with whom he studied

calligraphy. While in that city, Bayezid commissioned for himself and for his father's library many finely illuminated and richly bound manuscripts from Shaykh Hamdullah and other master calligraphers.⁹⁵ According to archival sources, during the period of Bayezid's governorship, many émigré artists from Tabriz and other cities in Iran are known to have resided in Amasya prior to being enlisted at the court workshop in Istanbul.⁹⁶ Thus, the production of fine manuscripts in Amasya before and during the period of his governorship should not come as a surprise.

On Bayezid's arrival in Istanbul for his accession to the throne (1481), the manuscript treasury at the Topkapı Palace possessed the finest manuscripts from prominent centers throughout the Islamic world, as well as a notable collection of manuscripts copied by Ottoman masters in the workshops of Amasya, Bursa, Edirne, and Istanbul. The masterful bindings of these works clearly indicate royal ownership. Although the outer covers of the bindings are not particularly flamboyant, their inner covers are stunningly ornate. Here the master binders surpassed themselves in their efforts to show off each manuscript to its best advantage.⁹⁷ Similarly, illuminators filled the pages with original compositions, as well as with design elements borrowed from their contemporaries in the Timurid, Turkmen, and Mamluk regions, often achieving a unique synthesis between these borrowings and their own creativity, thereby reinforcing the courtly character of the work. Some of the most stunning examples of this type of ornamented composition may be seen in the extremely refined and innovative illuminations of a Qur'an that was brought to the Museum of Turkish and Islamic Arts from the Ayasofya Library in 1914. This copy was probably made by Baba Naqqash, a designer of ornamental compositions, and his team, possibly in Edirne in 857 (1457–58) (fig. 21).⁹⁸ Paintings produced by highly skilled artists superbly illustrate the texts of royal manuscripts.⁹⁹

The production of fine manuscripts at the Istanbul court persisted throughout the reign of Bayezid II. Shaykh Hamdullah and other master calligraphers, manuscript painters, illuminators, and master binders continued to create exceptionally valuable Qur'ans and other types of work to add to the manuscript treasury of Bayezid II. As discussed above, it is evident that some of

Fig. 21. Illuminated sura heading of the Qur'an, 1457–58, calligraphy not signed, probably Edirne. TIEM, MS T. 30, fol. 317a. (Photo: courtesy of the Turkish and Islamic Arts Museum)

the finest manuscript masterpieces to be produced in the workshops of Islamic courts had entered the manuscript treasury of the Topkapı Palace by 1503–4, when 'Atufi completed his inventory. Although there is no record of how the manuscripts arrived in Istanbul, they were probably either presented to the court as diplomatic gifts or arrived among the personal effects of fleeing nobles seeking Ottoman protection. Some of the magnificent manuscripts may have been brought by scribes, poets, and artists migrating to Ottoman lands. It is fair to say that the migration of master craftsmen and the arrival of such fine, rare manuscripts from beyond Ottoman borders had a considerable impact on the local community of artists at the palace workshops, acting as sources of inspiration in their pursuit of new

artistic ideas, and as catalysts in their quest for innovative artistic interpretation.

We may observe traces of interaction between the Mamluk manuscript masters and their Anatolian counterparts throughout the fourteenth century.¹⁰⁰ This interaction persists in the bindings and illuminations of the fifteenth century.¹⁰¹ One style of illumination in particular, which I would describe as “delicate” or “naïve,” circulates with astonishing persistence among Mamluk, Ottoman, Timurid, Turkmen, and pre-Mughal Indian illuminators throughout the fifteenth century.¹⁰² The impact of the style of Baba Naqqash, which was to expand the repertoire of motifs in Ottoman illumination at the beginning of the second half of the fifteenth century, was felt in the designs of manuscripts prepared for the Mamluk ruler Qaytbay and his son towards the end of the century. Decorative elements from both the Aqqoyunlu Turkmen and the Ottoman design repertoires are evident on the covers of these Mamluk manuscripts.¹⁰³ The work that displays most vividly the similarities between the styles of Mamluk and Ottoman masters is the aforementioned Qur'an prepared for Qaytbay that bears the almond-shaped seal of Bayezid.

The courtly manuscripts collected at the Ottoman palace have double-page frontispieces illuminated with sumptuous, full-page *lawḥa* ornamentation, void of text. In some literary works, the frontispiece illuminations recur as header ornamentation at the onset of each section of the manuscript. The most magnificent examples of this form of ornamentation may be seen in literary works and Qur'an manuscripts with the almond-shaped seal of Bayezid II that are recorded in 'Atufi's list. Jala-yirid masters at the turn of the fifteenth century and Timurid-Turkmen masters throughout that century produced stunning, richly ornamented books, while master binders made intricately embellished covers that presage and transmit the contents of royal manuscripts. The courtly manuscripts bearing the seal impressions of Bayezid II that are recorded by 'Atufi provide sufficient evidence that large numbers of the most exquisitely illuminated, illustrated, and bound examples of the arts of the book had reached the Ottoman palace prior to 1503–4. Particularly notable are works of literature prepared by the best Qaraqoyunlu masters from the

mid-fifteenth century onwards, and later by their Aqqoyunlu successors.

Illuminators and binders in the court workshops of Sultan Bayezid II produced manuscripts of great excellence for their royal patron that would vie with the highest quality work of their Timurid and Turkmen contemporaries. In fact, they are even known to have completed the illustrations of some manuscripts that arrived incomplete at the imperial palace in Istanbul, and to have provided decorative bindings for others that arrived unbound. The influence of the *nasta'liq* script, which was particularly preferred by Persian émigré calligraphers and used mainly in the copying of literary works, can be seen in the manuscripts of the Ottoman calligrapher Shaykh Hamdullah, who inserted Qur'anic divination sections in *nasta'liq* at the end of some Qur'ans. His renowned work, in which he defines the six scripts *aqlām al-sitta* (i.e., *thuluth*, *tawqī'*, *naskh*, *muḥaqqaq*, *rayḥānī*, *riq'a*) includes verses by certain Iranian poets inscribed in *nasta'liq*.¹⁰⁴ Shaykh Hamdullah also produced a copy of Jami's diwan in *nasta'liq* in Sha'ban 904 (March–April 1499).¹⁰⁵ Although somewhat debated, the anecdote that Sultan Bayezid II had exquisite calligraphic examples in the hand of Yaqut removed from the manuscript treasury of the imperial palace in 1485 to show them to Shaykh Hamdullah may indicate that such works were occasionally taken out of the Inner Treasury for the perusal of Ottoman sultans and prominent court artists.¹⁰⁶

It is quite clear that the influence of manuscript masters from the Aqqoyunlu regions was prevalent in the masterworks of the Bayezid period.¹⁰⁷ The majority of manuscripts dating to the second half of the fifteenth century that bear the seal of Bayezid II are also of the Aqqoyunlu era. One of the earliest illustrated copies of Jami's diwan, dated 20 Shawwal 882 (January 25, 1478), is ornamented with miniatures in the style of Aqqoyunlu Turkmen Shiraz.¹⁰⁸ The presence in the Topkapı Palace manuscript treasury of the earliest copies of the work of this renowned poet, a contemporary of Bayezid living in Timurid-ruled Herat, would undoubtedly have caught the attention of poets and artists at the Istanbul court.

The flow of decorated manuscripts into the Topkapı Palace manuscript treasury would continue beyond 1503–4, the year in which 'Atufi completed his invento-

Fig. 22. Binding, doublure of front cover, *Khamsa-i Muḥayyira*, 1507–8, Istanbul. Istanbul University Library, MS F. 1398. (Photo: courtesy of the Istanbul University Library)

ry. According to records in the abovementioned *in'āmāt* registers, calligraphers and state dignitaries presented the court with a total of forty-seven gifts, including Qur'ans, sections of the Qur'an, and the *Sura al-An'am* between the years 1503 and 1510. Two of the Qur'ans in question were a gift from Shaykh Hamdullah. Bayezid II reciprocated by bestowing currency and robes of honor upon the bearers of these gifts.¹⁰⁹ Other decorated manuscript copies were made for this sultan in the early sixteenth century. One of two such manuscripts is the *Khamsa-i Muḥayyira*, a work on Sufism. It was calligraphed by the aforementioned Sultan Ahmad (al-Harawi) in 913 (1507–8), who also copied other works in

Fig. 23. The mural and tile decoration from the mausoleum of Prince Mustafa, son of Sultan Mehmed II, Bursa, ca. 1479. (Photo: courtesy of Doğan Yavaş)

nasta'liq for Bayezid II.¹¹⁰ Although this work does not bear the seal of Bayezid, an inscription in the center of the illuminated frontispiece medallion states that it was prepared for the treasury of Bayezid. The exquisitely ornamented *lawḥa* frames extending over the two double frontispiece pages, which are attributed to the illuminator Hasan b. 'Abd Allah, are outstanding, and the leather binding attributed to the bookbinder Ahmad is among the finest masterpieces of the period (fig. 22). The decorative composition on the binding's outer covers and doublures, along with the technical prowess of the binder, enhance the effect of this masterpiece. The second manuscript is a Qur'an. This is a monumental work copied by Darwish Hasan b. Ilyas al-Bursawi in the *rayḥānī* script during the last ten days of the month of Dhu'l-Qa'dah 904 (March 20–30, 1509) at *madīna-i Kōstantīniyye* (the city of Constantinople). The large sized manuscript is leather bound, exquisitely illuminated, and stamped with the seal of Bayezid on the colophon page.¹¹¹

Sultan Bayezid II, under whose patronage the illuminators, illustrators, and calligraphers of the Istanbul pal-

ace workshop produced finely illuminated Qur'ans, as well as scientific and literary texts, also employed these masters to transform the tombs of the imperial family at Bursa into gardens of paradise. Original examples of painted stucco (*kalemiṣi*) wall decoration in the interiors of royal tombs from the fifteenth century and earlier are extremely rare. Although no longer entirely original due to continuous repairs, most of the extant examples of *kalemiṣi* decoration are to be found in the tombs of Bursa. The partially gilded *kalemiṣi* decorations of the tomb of Prince Mustafa (d. 1474), son of Mehmed II, on the grounds of the Muradiye Mosque in Bursa, still bear some traces of the original decoration with motifs of Baba Naqqash (ca. 1479), despite a series of poor repairs (fig. 23).¹¹² Similarly, the authentic painted walls of the tomb of Bayezid II's wife Shirin (d. 1500?) and of his son Mahmud (d. 1507) on the grounds of the same mosque were uncovered after restorations in recent years, revealing decorations similar to those in the tomb of Prince Mustafa. The painted composition on the interior domes of the tombs echo the central medallion designs from the *zahrīyya* (dedicatory page) of contemporary

Fig. 24. Detail of the painted decoration in the dome of the mausoleum of Prince Mahmud, son of Sultan Bayezid II, Bursa, ca. 1507. (Photo: courtesy of Doğan Yavaş)

manuscripts (fig. 24).¹¹³ As with the inscriptions on the tomb walls, designs on the interior of the domes and walls of these tombs are identical, larger-scale versions of the motifs and compositions found in illuminated manuscripts of the fifteenth century. It is quite clear that these fine *kalemişi* wall paintings were executed by master artists, among them Hasan b. ‘Abd Allah and Fadl Allah b. ‘Arab. Thus, Bayezid’s patronage and love of the arts clearly extended into the paradisiacal interiors of his family’s tombs in Bursa.

The sultan’s support for the arts, as evidenced by the generous distribution of gifts and favors to poets, authors, and artists during his reign, created a culturally prolific environment in which Ottoman literature, science, and the arts flourished. How the patronage of Bayezid II and his father, Mehmed II, provided for and guided the artistic developments of their time, both as collectors and bibliophiles, and the way in which masters, styles, and aesthetic tastes moved from one imperial workshop to another is amply evidenced in the body of manuscripts preserved at the *hizāne-i ‘āmile-i*

enderūnī in the third courtyard of the Topkapı Palace and inventoried by the librarian ‘Atufi.

NOTES

1. Manuscripts bearing the seal of Bayezid II are, for the most part, preserved in the Topkapı Palace Museum Library, and are concentrated in that library’s Ahmed III collection. The second largest group of these manuscripts is kept in the library built in 1740 by Sultan Mahmud I (r. 1730–48) along the southern wall of the Hagia Sophia (Ayasofya), in a collection which consists mainly of manuscripts that were removed from the Topkapı Palace Manuscript Treasury (now the Ayasofya collection at the Süleymaniye Library in Istanbul). For the Topkapı Palace Museum Library, see İsmail Baykal, “Hazine-i Hümayûn ile Bağdad ve Revan Odası Saray Kütüphaneleri Hakkında İki Hatt-ı Hümayûn,” *Tarih Vesikaları* II/9 (1942): 191–92; İsmail Baykal, “Topkapı

- Sarayı Müzesi Kitaplıkları," *Güzel Sanatlar Mecmuası* 6 (1949): 75–84; Şükrü Yenal, "Topkapı Sarayı Müzesi Enderun Kitaplığı," *Güzel Sanatlar Mecmuası* 6 (1949): 85–90; İsmail E. Erünsal, *Osmanlı Vakıf Kütüphaneleri* (Ankara, 2008), 195–202. For the Ayasofya Library, see Günay Kut, "Sultan I. Mahmud Kütüphanesi ve Kütüphaneler: Ayasofya Kütüphanesi," *Osmanlı Devletinde Bilim Kültür ve Kütüphaneler*, ed. Özlem Bayram, Ali Can, et al. (Ankara, 1999), 99–128; Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 213–21.
2. For the Imperial Inner Treasury, see Gülrü Necipoğlu, *Architecture, Ceremonial, and Power: The Topkapı Palace in the Fifteenth and Sixteenth Centuries* (New York, 1991), 133–41. The almond-shaped seal of Bayezid II is the first such seal of an Ottoman sultan to be stamped on manuscripts entering the Topkapı Palace manuscript treasury. The second such seal is the round or very occasionally almond-shaped seal of Selim I (r. 1512–20), known as the treasury seal (*hazine mührü*). A number of illuminated manuscripts in the treasury bear the oval seal of Sultan Süleyman the Magnificent (r. 1520–66) and his son, the crown prince Şehzade Mehmed (d. 1543). Yet another imperial seal frequently encountered on manuscripts from the Topkapı Palace is that of Ahmed III (r. 1703–30) dated 1115 (1703–4). Additionally, a number of the manuscripts relocated by Ahmed III from the imperial manuscript treasury (*hizāne-i āmire-i enderūnı*) to the library he had built in the third court of the Topkapı Palace bear the round endowment seal of Ahmet III; on some, both the endowment seal and his personal oval seal are found. As mentioned in note 1, Mahmud I was the second sultan to have manuscripts relocated from the Imperial Inner Treasury in the Topkapı Palace to a library founded and endowed in his name and stamped with his endowment seal. A small group of manuscripts bearing the Mahmud I endowment seal was relocated from the Inner Treasury to the Revan Kiosk of the Topkapı Palace. A number of illuminated works which are now recorded in the Revan section of the Topkapı Palace Library bear the endowment or personal seal of sultans Osman III (r. 1754–57), Mustafa III (r. 1757–74), and Abdülhamid I (r. 1774–89). Certain manuscripts in the palace library collection recorded in the Hazine, Revan, and Baghdad sections are stamped with the personal seal of Selim III (r. 1789–1807).

Lowry, *Timur and the Princely Vision: Persian Art and Culture in the Fifteenth Century* (Los Angeles, 1989), cat. 21, 82–83, 110–11, 136–37. For a technical analysis of the illuminations, see Özcan, "Timur Devri Herat Tezhip Ekolü," 150–82.
65. Aslanapa, "Art of Bookbinding," 61, 86.
66. Chester Beatty Library, MS T. 401. V. Minorsky and J. V. S. Wilkinson, *The Chester Beatty Library: A Catalogue of the Turkish Manuscripts and Miniatures* (Dublin, 1958), MS T. 401; Basil W. Robinson, "The Turkman School to 1503," in *The Arts of the Book in Central Asia*, ed. Basil Gray (London, 1979), 234, 241.
67. Library records printed at the end of the nineteenth century indicate that this work was previously catalogued in the library established by Mahmud I in Ayasofya, Istanbul, as MS 3975. However, a note of indeterminate date written next to the work reads: *zāyî' oldu* ("was lost"). Günay Kut, "Sultan I. Mahmud Kütüphanesi (Ayasofya Kütüphanesi)," *Osmanlı Devletinde Bilim, Kültür ve Kütüphaneler*, ed. Özlem Bayram, et al. (Ankara, 1999), 123.
68. SK, Ayasofya MS 3946. Ahmet Ateş, *İstanbul Kütüphanelerinde Farsça Manzum Eserler*, 244–45. The works within the anthology are listed in this modern catalogue alphabetically by author. Hence, information about each section is contained on different pages of the catalogue. There is no record in 'Atufi's list of the manuscript type known as *jong* or *majmū'a* (compendium), in which the selected verses of individual poets or various texts of different authors are gathered together. 'Atufi must have collated the works by authors' name as in the Ahmet Ateş modern catalogue.
69. Zeren Tanındı, "Mihr-ü Müşteri Minyatürlerinin İkonografik Çözümlemesi," in *Sanat Tarihinde İkonografik Araştırmalar Güner İnâl'a Armağan* (Ankara, 1993), 457–90.

Aga-Oglu, *Persian Bookbindings*, VI–VII; Lentz and Lowry, *Timur and the Princely Vision*, cat. 39; Roxburgh, *Persian Album*, 1400–1600, 160–65.
 77. Some examples of the illustrated or illuminated *Shāhnāma* bearing Bayezid II’s seal were removed from the Inner Treasury to other collections. One unillustrated but richly illuminated *Shāhnāma* in the Turkish and Islamic Art Museum (TİEM, T. MS 2043) bears the Bayezid seal. It is dated 839 (1435–36) and is decorated in Timurid Shiraz style. See *Türk ve İslam Eserleri Müzesi*, 331. There must be more manuscripts bearing Bayezid’s seal in this museum, but I was unable to conduct research there due to restoration work. Istanbul University Library has an illustrated copy of the *Shāhnāma* dated 890 (1489–90), in Aqqoyunlu Shiraz style, stamped with the Bayezid II seal (MS F. 1407). See Uluç, ed., *From the Yıldız Palace*, 121.
 78. An illuminated prose copy of the *Shāhnāma* translated into Arabic and dating to 692 (1293) bears the seal of Bayezid II. Karatay recorded this copy in his catalogue of historical works, as did ‘Atufi. TSMK, A. MS 2996. Karatay, *Arapça Yazmalar*, 3:6166.
 79. TSMK, H. MS 754, H. MS 759.  90. An abridged version of the *Shāhnāma* written in Persian for Mehmed II also bears the seal of Bayezid II; see *Orientalische Buchkunst in Gotha: Ausstellung zum 350 jährigen Jubiläum der Forschungs- und Landesbibliothek Gotha* (Gotha, 1997), 131–32.
 91. SK, Ayasofya MS 3287. Zeren Tanındı, “Bayezid II’s Collection of Illuminated Books,” in *Kasâyid-i Efsahî der meth-i Sultan Bâyezîd. Efsahî’s Odes in Praise of Sultan Bayezid*, facsimile edition (Istanbul, 2012), 17–18. Other works copied by Sultan Ahmad Harawi include: SK, Ayasofya MS 3977; Istanbul University Library, F. MS 1398. Ateş, *İstanbul Kütüphanelerinde Farsça Manzum Eserler*, 449–50.
 92. Kazan, XVI. Asırda Sarayın Sanatı Himayesi, 146–47.
 93. TSMK, H. MS 1123. Raby and Tanındı, *Turkish Bookbinding in the 15th Century*, 190–91; Ayşin Yoltar, “The Role of Illustrated Manuscripts in Ottoman Luxury Book Production: 1413–1520” (PhD diss., New York University, 2002), 386–99; Bağcı et al., *Ottoman Painting*, 50–51. The penname of this manuscript’s author was formerly thought to be Ummî rather than Âhî. The correct reading proposed by Andrew C. S. Peacock is cited in Sooyong Kim’s essay in this volume, and has been confirmed by Sara Nur Yıldız and Gülru Necipoğlu. I am grateful to these scholars for having corrected an error that has persisted for many years. An unfinished draft version of this work exists: SK, Fatih MS 4092, fols. 53a–143a. The importance of this manuscript draft is that it contains marginal annotations indicating where illustrations were to be added. This is the earliest known example of a draft manuscript with illustration place-markings. See Zeren Tanındı, “The Illustration of the *Shahnama* and the Art of the Book in Ottoman Turkey,” in *Shahnama Studies II: The Reception of Firdausi’s Shahnama*, ed. Charles Melville and Gabriella van den Berg (Leiden, 2012), 144–45. For the latest discoveries on these two versions and a third version of the *Shāhnāma* of Malik-i at the Cambridge University Library, see Gülru Necipoğlu’s essay in this volume.

94. Kazan, *XVI. Asırda Sarayın Sanatı Himayesi*, 167.
95. The illuminated *Maşāliḥ al-abdān wa-al-anfus* (Sustenance for Body and Soul) (SK, Ayasofya MS 3740), a medical text copied for Mehmed II by Shaykh Hamdullah, bears the Bayezid II seal and may be dated to around 1475. It is recorded in 'Atufi's list (162 {16–17}). For an exquisitely bound and finely illuminated work in the Shiraz style, copied in Amasya for Bayezid II in 881 (1477), see TİEM, T. MS 1820: Raby and Tanındı, *Turkish Bookbinding in the 15th Century*, 184–87.
96. Rıfki M. Meriç, *Türk Nakış Sanatı Tarihi Araştırmaları I, Vesikalar* (Ankara, 1953), 4. There are also examples indicating the production of finely illuminated manuscripts from the beginning of the fifteenth century onwards in that city; see Bağcı et al., *Ottoman Painting*, 23–25.

113. The original paint on the stucco decorations on the internal walls of the tomb of Bayezid's bibliophile son, Prince Ahmed (d. 1513), on the grounds of the Muradiye Mosque in Bursa has unfortunately been destroyed by poor repairs.

“THE OTTOMAN MUSE FLUTTERED, BUT POORLY WINGED”: MÜEYYEDZADE, BAYEZID II, AND THE EARLY SIXTEENTH-CENTURY OTTOMAN LITERARY CANON

A contemporary to the King of Hungary and Croatia, Matthias Corvinus (d. 1490), whose legendary Renaissance library has mesmerized generations, the Ottoman scholar, kadi, and bibliophile ‘Abd al-Rahman b. ‘Ali b. Mü’eyyed (d. 1516) was famed for his neoplatonic learning and splendid book collection. According to the Ottoman polymath Taşköprülüzade (d. 1561), Müeyyedzade

had gathered all kinds of extraordinary books, among them books of which none of the contemporaries had knowledge by virtue of [actually] reading [them]. I heard that these are 7,000 volumes, excluding doublets.¹

This exceeds by far the number of books in the Bibliotheca Corviniana, which even by generous estimates is said to have held some 4,000 to 5,000 works in up to 2,500 codices, of which merely 221 volumes survive.² It is also much larger than the humble 1488 precursor of Oxford’s famous Bodleian library, known as Duke Humfrey’s, which prides itself in a “priceless collection of more than 281 manuscripts, including several important classical texts” that Humfrey, Duke of Gloucester and younger brother of King Henry V, had bequeathed to the university in the fifteenth century.³ The building of the famous Bodleian Library itself did not begin until a century later, in 1598, and at that time it was equipped to hold no more than 2,500 volumes, of which some were donated by the founder and namesake Thomas Bodley (1545–1613) himself.⁴

Although the number given by Taşköprülüzade is high in comparison to some of the foremost Renaissance libraries of Europe, it does not appear to be quite as fantastic when considered in the Ottoman context. As Renaissance libraries were mushrooming across fifteenth-century Europe, so they were in the Ottoman

empire.⁵ Here, as throughout Islamic history, learning and knowledge were highly prized by scholars and rulers alike.⁶ Books and libraries were an intrinsic part of intellectual life, as evidenced by the massive manuscript production and historical references to the existence of not only madrasa and royal libraries, but also private libraries such as Müeyyedzade’s. What is special about the Ottoman context in comparison to earlier Islamic libraries is the sheer quantity and quality of available sources on book culture, including endowment records, donation lists, and library catalogues, such as the inventories discussed here, that increasingly become available from the fifteenth century onwards as part of a concerted effort to systematize knowledge in an ever-expanding and interconnected world.⁷

We are fortunate that a copy of the inventory of Müeyyedzade’s library drafted for the Ottoman sultan Selim I (r. 1512–20) soon after Müeyyedzade’s death in 922 (1516) has survived. This inventory records 2,112 titles.⁸ The actual number of books in Müeyyedzade’s collection was probably somewhere between this figure and the much higher number claimed by Taşköprülüzade (7,000), as some of his books were sold before this inventory was drafted (see below). Although the list in our hands thus represents only a partial record of the original library, it still brightly reflects the impressive erudition of the owner and collector. What is more, the inventory of Müeyyedzade’s library is contemporaneous with the catalogue of the Ottoman palace library in Istanbul that was prepared on behalf of Bayezid II in the years 908 (1502–3) (first draft)⁹ and 909 (1503–4) (fair copy, *ta’rikh khurūj al-daftar min al-musawwada ilā al-bayād*).¹⁰ Since the Ottoman palace library inventory shows some 7,200 titles in approximately 5,700 volumes,

its size appears to be comparable to that of Müeyyedzade's collection.¹¹

As for the contents of Müeyyedzade's library, we can tell from the remaining titles that it had a universal outlook. Educated in the erudite circles of Ottoman Amasya, Mamluk Aleppo, and Aqqoyunlu Shiraz, Müeyyedzade had enjoyed a broad education, and his library reflects it. As far as I have been able to establish—and this is preliminary and the only major contrast to Bayezid's inventory I have so far observed—there are no books by European authors in Müeyyedzade's inventory. Given that large parts of his library had been dispersed before the inventory was drafted, it is difficult to know for certain whether it ever held such books.¹² However, in terms of the sciences covered, Müeyyedzade's library exhibited just as much breadth as Bayezid's, or any of the European libraries established in the Renaissance spirit. It was the focus and composition of each library that distinguished them, though overall Bayezid's and Müeyyedzade's collections are surprisingly similar, given that one was a private, and the other a royal library.¹³

For example, like Bayezid's library, Müeyyedzade's held a comparatively high proportion of works on the sciences of the stars, medicine, and the occult, reflecting the great interest in these areas of inquiry at the time, both in the Ottoman empire and beyond, including Renaissance Europe.¹⁴ In the areas of astronomy and astrology, the scope of Müeyyedzade's collection ranges from widespread teaching manuals on astronomy, such as Jaghmini's (fl. 1221) elementary cosmographical work *al-Mulakhkhaṣ* (The Summation),¹⁵ to more specialized works, such as a copy of the somewhat rare Arabic version of al-Mas'udi's (fl. 1154) astronomical-geographical *al-Kifāya fī 'ilm al-hay'a* (The Compendium of Cosmography)¹⁶ and several copies of Qutb al-Din Shirazi's (d. 1311) *Nihāyat al-idrāk* (Extreme Comprehension)¹⁷ and *al-Tuḥfa al-Shāhiyya* (The Imperial Gift),¹⁸ to a large number of *hay'a* works and works on *nujūm* that are difficult to identify because the title is vague or the author's name was not recorded in the inventory.¹⁹ Among the works on magic and astrology, Müeyyedzade held a copy of the *Picatrix*, a work which, as far as I can see, is not listed in the palace inventory.²⁰

Another example of shared interests is the area of medicine. Here Müeyyedzade's inventory records sev-

eral copies of Avicenna's (d. 1037) *Qānūn* (Canon [of medicine])²¹ and multiple copies of commentaries on it, though due to the lack of information on the authors, these are impossible to identify.²² Müeyyedzade's inventory also records a copy of Ibn Jazla's (d. 1100) *Minhāj al-bayān* (The Clear Path, or Path of Explanation),²³ one copy each of volumes one and three of Ibn Hubal's (d. 1213) *Mukhtār fī al-ṭibb* (Choice [Book] of Medicine),²⁴ two copies of Ibn al-Nafis's (d. 1288) *Mūjaz fī al-ṭibb* (Epitome of Medicine),²⁵ a copy of al-Sijzi's (fl. before 1334) *Ḥaqā'iq asrār al-ṭibb* (Truths of the Secrets of Medicine),²⁶ and several other works that are clearly dedicated to medicine, though not all of these can be identified, again due to the lack of information on the authors and the polysemy of the titles.²⁷

In terms of numbers, however, a much larger space than either astronomy or medicine is occupied in both inventories by the topic of literature (more than sixty pages in Bayezid's, if we count literature in all languages together) as well as Sufism, hagiography, and ethics (more than forty pages in Bayezid's inventory). The proportions are similar in Müeyyedzade's inventory. For the purpose of this article, diwan literature has been selected for a comparative case study.

While a detailed comparison of the inventories in their entirety can only be undertaken once both of them have been properly published, the already apparent parallels should not be too surprising, given that Bayezid and Müeyyedzade lived during the same period in the same region and had also been close friends since their youth.

BAYEZID II AND MÜEYYEDZADE

Müeyyedzade was not only Bayezid's close contemporary (Bayezid was his elder by eight years, and predeceased Müeyyedzade by four years), they also grew up together in Amasya, where Müeyyedzade's father, Şemseddin Müeyyed Çelebi, was appointed chancellor (*nişancı*) to Prince Bayezid upon the latter's appointment as governor in 865 (1461).²⁸ In Amasya, Müeyyedzade and Bayezid also enjoyed an outstanding education in the fine arts, studying the art of writing with one of the foremost calligraphers of the time, the Amasya-born

Shaykh Hamdullah (d. 1520), and moved among the circles of some of the finest poets of that age, including the poetess Mihri (d. after 1512), who is known to have developed a liking for Müeyyedzade in her youth.²⁹ It was in Amasya that Prince Bayezid and Müeyyedzade forged a relationship that was to last throughout their lives. Their boon companionship in Amasya in the 1470s apparently acquired dimensions that displeased Bayezid's father Mehmed II (r. 1451–81) to the extent that he issued an order for Müeyyedzade's execution.³⁰ After escaping first to Aleppo and then to Shiraz, where he studied for several years with Jalal al-Din Dawani (d. 1502), Müeyyedzade was called back to the Ottoman empire after Mehmed II's death to serve Bayezid after his accession to the Ottoman throne in 1481. From that time until shortly before his death in 1516, Müeyyedzade held high offices, including that of chief military judge (*kazasker*), throughout Bayezid II's reign and also during the first half of the reign of Bayezid's son and successor Selim I (r. 1512–20).³¹

Bayezid and Müeyyedzade apparently also shared a taste for rare and valuable books. Müeyyedzade's upbringing in a learned family, as well as his extended studies in Shiraz, the connections he forged with the scholars there, and the books he brought back with him, played a key part in the circulation of knowledge between the late fifteenth-century Ottoman empire and Aqqoyunlu Fars. However, as recent research has also shown, the scholarly networks that had been established over the preceding two centuries were equally important, as they clearly informed the shape and scope of Müeyyedzade's library.³²

Müeyyedzade apparently collected books both for their content and because of the intrinsic value of specific copies. Some of the surviving copies that bear the owner's mark of Müeyyedzade were made from autograph copies that had been carefully compared and collated either with the autograph itself or with other authoritative copies.³³ Other books that Müeyyedzade acquired had previously been owned and/or annotated by key figures in the production and circulation of knowledge—such as Zayn al-'Arab al-Misri, who completed his commentary on Avicenna's *Qānūn* in 751 (1350)³⁴—or by otherwise famous scholars, including

authors of non-Muslim background, such as the Syriac Maphrian Bar Hebraeus (d. 1286).³⁵

In other words, Müeyyedzade was well aware of the genealogy of learning that these specific copies embodied, and he consciously collected and consulted them primarily for this reason. Yet there were also books in his library that Müeyyedzade personally commissioned to be copied on his behalf. These were thus "fresh" copies of works that were apparently not or only rarely to be found in the Ottoman empire at the time, or that Müeyyedzade simply wanted to own.³⁶ But even here, he carefully selected as the master copy such manuscripts that had been prepared by specialists in the field, and took care to collate the new copy once again with the master copy.³⁷

In-depth studies of individual cases are required in order to properly analyze why Müeyyedzade may have wished to consult more than one copy of the same work. For now, the evidence suggests that Müeyyedzade was a scholar with broad interests and a high epistemological consciousness who was not satisfied with references of a lesser order (later copies) when he could have access to autograph copies, or to copies annotated by famous scholars or past specialists in the field. In other words, where modern scholars read journal articles, pre-modern scholars like Müeyyedzade would have consulted the margins of manuscripts, which embodied the collective knowledge of the field through the comments and analysis of past scholars: The topic was defined by the main text of a given work, and the analysis and scholarship about it (in modern jargon, the "secondary literature") was delivered right with it in the margins, together with its epistemological framework—not a bad way to carry out research.

A FEW WORDS ON METHOD

Describing and comparing Bayezid II's and Müeyyedzade's inventories is easier said than done, as Müeyyedzade's is both incomplete and unsystematic. A major difference between the two inventories is that the one prepared for Bayezid II by his librarian 'Atufi is a proper catalogue of a complete royal library that to some extent is a projection and serves as a mirror of the

division of sciences (*taqṣīm al-ʿulūm*) at the time. By contrast, the inventory of the holdings of Müeyyedzade's private library prepared for Selim I records the remainder of the collected books of a scholar and true bibliophile that was established only after his death. Furthermore, we are comparing a royal library that grew over several generations³⁸ and was also enriched by many donated books from friends and protégés,³⁹ with the private library of a scholar and bibliophile who probably also inherited a good number of books from his learned ancestors. But clearly Müeyyedzade acquired many of his books by purchase or had them specifically copied for himself, without access to the same means as his royal patron. Indeed, Müeyyedzade may even have fallen into debt because of his bibliophilia, though this remains a matter of speculation.

Probably because of his precarious financial situation, Müeyyedzade never established an endowment for his library. His books were sold and dispersed upon his death, and today they can be found in various libraries across the world, which makes it a particularly daunting task to establish a list of his surviving books (and here the fate of his collection somewhat parallels that of Corvinus's).⁴⁰ It is difficult to reconstruct the sequence of events following Müeyyedzade's death, but the available evidence cited below supports the following scenario: The sons of Müeyyedzade sold part of his library in order to pay off his debts. The funds that they raised from the sale appear to have covered his debts only partially. At this point, Selim I became aware of the dispersal of Müeyyedzade's collection. He dispatched a delegation to gather Müeyyedzade's books, if necessary from the book sellers. Selim instructed his delegates to record the books that they were able to recuperate (which resulted in the book inventory studied here), and then sell them on his behalf so that Müeyyedzade would be relieved of his debts. As suggested by İsmail Erünsal, it is reasonable to presume that Selim himself also wished to possess some of Müeyyedzade's books in order to fill lacunae in his palace library.⁴¹

The inventory includes Selim's instructions to the delegation:

However many books [had] belonged to the late Müeyyedzade, they should be collected, and if they have [already] been sold, they should be bought back from the

places to which they have been sold, and be safely stored in a place.⁴²

Selim's order also contains a clause indicating that he asked for "important" (*mühimm*) books to be singled out and highlighted as such, which reinforces the impression that one of his aims was to acquire some of these titles for the palace library:

The number of [Müeyyedzade's] creditors is endless. If the important [manuscripts] were pointed out to the Emperor and the remainder sold and [the proceeds] given to the creditors, the deceased [Müeyyedzade] would be relieved from his debts [and could rest in peace].⁴³

Probably as a result of these instructions, Müeyyedzade's books are recorded in two contiguously copied but distinct lists, with most of the more valuable manuscripts (apparently the "important" books) recorded in the first list and often marked as "first rate" (*a'lā*) copies (TSMA, D. 9291.1). This first list is also visually more distinguished, as there are fewer items per page (between 22 and 40 entries, arranged in four columns of up to 10 items per column), whereas the second list (TSMA, D. 9291.2) features between 95 and 110 entries per page (arranged in five columns of between 19 and 22 items each, with additional items sometimes listed in smaller script, or entries spread across two columns if necessary).⁴⁴ In this article I refer to these two documents as "List I" and "List II," respectively, or, when referring to specific entries, briefly as "I" and "II," followed by the folio numbers.

Since many of the books that Müeyyedzade once owned had already been sold when Selim's delegation arrived, those books that they could find were not listed according to topic, but by the criteria of value (which distinguishes List I from List II) and the location from which the books were recovered.⁴⁵

This has resulted in a major difference between the book inventories of Müeyyedzade and Bayezid II in terms of their organization and the arrangement of entries. Bayezid's inventory is ordered according to two major principles and several subprinciples (referred to as *qānūn* in the compiler 'Atufi's introduction).⁴⁶ The major organizing principles are disciplines or fields of knowledge (hadith, *ta'rikh*, etc., called *fann* in the introduction [5 {7}; 6 {1–9}]); within each discipline, titles are

ranked in terms of popularity and rarity (*maṭlūbiyyet ve kullet-i vüçüd*, 6 {11}). We can observe additional sub-principles of organization, including whether a work was composed in verse or prose (8 {7–14, 14–18}), languages (in the case of diwans), clusters of authors who wrote at approximately the same time, and certain clusters of titles grouped together with related commentaries, continuations, and translations.

Thus, if one wanted to find all the copies of a given book in a given discipline in Müeyyedzade's inventory and to compare these with all the books of the same discipline in Bayezid's inventory, one would first need to read the entirety of Müeyyedzade's inventory and establish alphabetical indices of all books and authors contained therein, then identify these works, and finally prepare a concordance of the individual titles with their equivalents in the relevant section of Bayezid's inventory.

I have undertaken the first two steps and am currently preparing the alphabetical indices by titles and authors for publication, with about ten percent of the books still remaining that I have yet to identify.⁴⁷

For the purpose of the present article, and in order to achieve a meaningful comparison, I had to select a clearly defined and comparable subgroup of works.⁴⁸ Here diwan literature offered itself as one of the fields with the sharpest contours, as the combination of the generic title *dīwān* (which is sometimes supplemented by subtitles such as *Najdiyyāt*, *Irāqīyyāt*, etc.) with the author's name promised to yield the most crisp picture and reliable identification for a confined, yet sizeable group of texts.⁴⁹ This is less often the case for other book titles in the inventory, which yield much higher "unknown" rates, often providing only an abbreviation of a title with multiple possibilities of identification (such as *mufaṣṣal*, *sharḥ mukhtaṣar*, and the like), without the author's name. Moreover, in contrast to Bayezid's inventory, the titles listed in Müeyyedzade's inventory lack circumstantial indication about the discipline or language of the work, which are significant hints for identifying an entry. Of course, language mattered little to an educated Ottoman, for whom works in Arabic, Persian, and Ottoman Turkish (and during this period also Chaghatay Turkish) were equally accessible. Nonetheless, language is an important criterion for identifying any given work, including diwans.

Diwans also offer a meaningful point of comparison because Müeyyedzade and Bayezid were not only collectors of poetry, but they also both wrote poetry and were patrons of poets. Under the pen name Ḥātemī (Khātimī), Müeyyedzade composed poetry in three languages: Arabic, Persian, and Turkish.⁵⁰ Among the poets who benefited from Müeyyedzade's patronage were Necati (d. 1509),⁵¹ Kemalpaşazade (d. 1534),⁵² and Zati (d. 1546).⁵³ Hence, we may assume that Müeyyedzade was somewhat of a connoisseur when it came to collecting poetry.

For the purpose of this article, and without skirting the important question of the authorship of diwans, "the diwan of author X" will be treated as the poetry collection of that author, regardless whether the poetry gathered therein was composed by the author or was later ascribed to him or her, and regardless of whether the diwan was gathered by the author himself or herself, or by third parties after the author's death.⁵⁴ Known titles (for instance, *Siqṭ al-zand* for the diwan of Ma'arri, the *Ḥamāsa* for Abu Tammam, and the *Irāqīyyāt* and *Najdiyyāt* for the two parts of the diwan of Abu Muzaffar al-Abiwardi) have been checked against the alphabetical title index of Müeyyedzade's inventory that I created in order to ensure that no diwans were omitted. Such cases are identified and discussed as appropriate.

For the present study, I used the entirety of Müeyyedzade's inventory, whereas for Bayezid's inventory I only systematically read and analyzed the *Dawāwīn* sections (in Arabic, Persian, and Ottoman and Chaghatay Turkish). As İsmail E. Erünsal has demonstrated in his much broader study of the Turkish literary works recorded in Bayezid's inventory, such titles can be found in virtually any section of the inventory, not only in the diwan section.⁵⁵ Entries from other sections are thus included as applicable, though only in one case is a *dīwān* work (as opposed to other literary genres, such as *mathnawīs*, *khamṣas*, and the like) found in a different section of Bayezid's inventory.⁵⁶

As for the nature of the inventories studied here, I have assumed that in Müeyyedzade's case, the inventory established by Selim I's commission is a snapshot, recording a specific moment in time for a library that had already begun to disintegrate. In Bayezid's case, by contrast, the inventory is not a finite document but served as a living tool and accretional text, a kind of

checklist that was used to account for acquisitions as new books arrived, as does any modern library catalogue or current bibliography. The copy of Bayezid II's inventory that we have is precisely such a document, featuring empty spaces and entire blank pages at the end of each section to permit future additions.⁵⁷ This assumption is further confirmed by additions to the blank spaces that are written in different hands, recordings in awkward places,⁵⁸ and inconsistencies within an otherwise very thoughtfully devised system (e.g., recordings of the same author's name with and without a prayer formula; or inconsistent recordings of the language in which a work was written).⁵⁹ While at first glance, two dates can be read on the front page of Bayezid's inventory, i.e., 909 (1503–4, in *abjad* letters on 1b {5 and 10}), as per the *ta'rikh* given for the fair copy of the catalogue), and 959 (1551–52, in numbers, on 1b {6 and 11}),⁶⁰ the contributors to this volume have established that the copy of the inventory that is in our hands can be dated to 909. We therefore assume that entries seemingly attributed to later authors in Bayezid's inventory, such as Zati (d. 1546, e.g., 246 {11}) and the famous Khayali (d. 1557), refer instead to different, earlier authors using the same pen name, or that these may be accounted for in other ways, as explained below.

Lastly, whereas this article concentrates very much on *books* due to the focus of the present volume, we must not forget that it was above all *people* who drove the debates, nurtured the culture of learning, and penned and reproduced the very books that permit us to catch a glimpse of the past. Scholarly gatherings inside and outside of mosques, madrasas, in *majlises* of learning and poetry alike, including, one would imagine, gatherings convened in private homes in the vicinity of libraries, were the spaces where debates were carried out, poetry proclaimed, and further knowledge produced, without which even the best library would be but shelves filled with empty paper.⁶¹

PATRON, POET, AND CONNOISSEUR: MÜEYYEDZADE'S DIWAN COLLECTION

Müeyyedzade's personal library comprised a substantial number of diwans by major poets, often in several cop-

ies. Thus, we learn that he owned at least four copies of al-Mutanabbi's (d. 955) diwan alone, together with three different commentaries (*sharḥs*) of the same work, as well as possibly a fifth diwan or parts thereof, listed as *Ash'ār Mutanabbī*.⁶² It is unfortunate that the inventory of Müeyyedzade's books is only a partial record of his total library, but even this glimpse is impressive. On the other hand, the comparison with the palace library makes Müeyyedzade's book collection look much more modest than Taşköprülüzade's statement suggests, both in terms of diwans held and the number of copies of each diwan that it contains (Taşköprülüzade, we will recall, had explicitly excluded doublets from his account). Table 1 below shows the diwans with more than one copy recorded in Müeyyedzade's inventory (TSMA, D. 9291.1-2) in comparison with Bayezid's.

Diwans with More than One Copy in Müeyyedzade's Library (Table 1)

The evidence suggests that in the great majority of cases, Bayezid's inventory was richer than Müeyyedzade's in terms of the number of copies it held of each diwan.⁶³ Only in the case of the diwan of Abu Tammam (d. 845) and possibly that of Abiwardi (d. 1113) does it appear that Müeyyedzade's library is comparable to Bayezid's. Müeyyedzade's inventory shows three copies of Abu Tammam's *Dīwān* (II/3b, II/6b, II/8a), whereas Bayezid II's has only one (205 {11}), though it holds six copies of the same author's *Ḥamāsa* (against two copies in Müeyyedzade's inventory). As for Abiwardi's *Dīwān*—which consists of two parts, the *Trāqīyyāt* and the *Najdiyyāt*—there are altogether nine copies of the work found in Bayezid's inventory (two copies of the *Trāqīyyāt* and seven of the *Najdiyyāt*). Although not a single work titled *Dīwān Abiwardi* is listed in Bayezid's catalogue, it would be misleading to state that the palace library did not hold a copy of this diwan. If one combines the *Trāqīyyāt* and the *Najdiyyāt* volumes held in the palace library, this adds up to two full copies of the *Dīwān*, which is the same number as found among Müeyyedzade's books. In addition, the palace library held five extra copies of the *Najdiyyāt* and four copies of the *Sharḥ Najdiyyāt* (as compared to a single copy of this *sharḥ* in Müeyyedzade's inventory). Thus, in terms of

sheer numbers the palace library also proves to be richer overall than the recorded portion of Müeyyedzade's library.

Put differently, with the exception of Abu Tammam's *Dīwān*,⁶⁴ wherever Müeyyedzade's inventory shows multiple copies, so does Bayezid II's. In the majority of cases, the palace library held more (often several more) copies than Müeyyedzade's library, at least in the form in which it was retrieved after his death. Nonetheless, Müeyyedzade's private collection stood up well, considering that it was a private as opposed to a royal collection. Whether the individual copies in question might have included special features (such as comments from famous former owners, autograph copies, and the like), only an investigation of surviving copies can ultimately answer.

Diwans Identified as "Important" (mühimm) (Table 2)

Both Taşköprülüzade's comments and the introduction to Bayezid's palace library inventory suggest that not only the age and execution of a book, but also its rarity (*kullet-i vücūd*, 6 {11}) may have been important criteria for Müeyyedzade in establishing his collection. Therefore, if we take seriously Taşköprülüzade's claim of the exceptional rarity of Müeyyedzade's books, we might assume that Müeyyedzade's "important" List I (TSMA, D. 09291.1) would record copies of those diwans of which fewer (or possibly no) specimens were held in the palace library. Such works are presented here in Table 2 ("Important" Diwans in TSMA, D. 9291.1 Compared with MS Török F. 59).⁶⁵ In light of Taşköprülüzade's claims, it is perhaps surprising that copies of most of these diwans appear to have already been part of Bayezid's library when Müeyyedzade's inventory was drafted. In all but one of these cases, the palace library held at least two or three copies of each of these diwans; in six cases, it held five copies or more; and in one case (Hafiz), even as many as eighteen.

There is only one diwan of which the palace library apparently did not hold a copy, which is that of a certain Hatifi. The individual in question here is probably the poet and nephew of Jami, 'Abd Allah Hatifi of Khargird in Khurasan (d. 1521), who belonged to "the circle of Herāt formed under the liberal patronage of the later Timūrids."⁶⁶ He appears to have been relatively un-

known in Ottoman circles at the beginning of the sixteenth century, and his diwan apparently also had not entered the palace library by this time. Bayezid's inventory records only two copies of Hatifi's *Khusraw wa Shirin* (253 {4–5, 9}), which is part of Hatifi's *Khamisa*, but does not list his diwan. In addition to Hatifi's diwan, Müeyyedzade's collection also held an especially precious copy of the entire *Khamisa* that was apparently also illustrated (*Khamisa-yi Hātifi, muṣawwar, a'lā*, I/1b).⁶⁷ Müeyyedzade's travels and protracted studies in Shiraz may have led to personal contacts that facilitated his acquisition of Hatifi's *Dīwān* and *Khamisa*. In this particular case, it appears that not only the rarity of the work itself, but also the execution of the copy in question made the volume particularly valuable. Several of the remaining poets in List I (such as Hasan, Qasim, and Amir Shahi) also belonged to the Herat circle and were possibly less well known among Ottoman readers, although copies of their work were available in the palace library. A certain curiosity about—and possibly a sense of competition with—the sparkling circle of poets around 'Ali Shir Nava'i (d. 1501) at the contemporaneous court of Sultan Husayn Bayqara (d. 1506) in Herat (which in just the decade between 1490 and 1500 included some 150 to 200 poets) may have contributed to the novelty factor and desirability of these works in Ottoman circles.⁶⁸

Equally striking is that nine of the ten shared diwan titles presented in Table 2 are recorded in the section of Persian diwans in Bayezid's catalogue. Only one (the diwan ascribed to 'Ali b. Abi Talib) was presumably written in Arabic;⁶⁹ and there is at most one Ottoman Turkish diwan among the "important" works in Müeyyedzade's List I (the *Dīwān Khayāl[ī]*). Given the period under consideration, however, it is likely that this refers to Khayali Bukhari (d. ca. 1446), the author of a Persian diwan, rather than the more famous, but much later, Ottoman poet Khayali (d. 1557).⁷⁰ In sum, we can state that diwans in Persian constituted the overwhelming majority of the key ("important") diwans recorded in Müeyyedzade's List I. As İsmail E. Erünsal has pointed out, during this period Ottoman readers continued to hold Persian literature in high esteem, and Persian poets were regarded as models; hence, it is not particularly

surprising to find such a high number of Persian diwans among Müeyyedzade's books.⁷¹

A similar image emerges from an investigation of Müeyyedzade's Lists I and II taken together. Only one of the authors, 'Ishqi/Aṣki, who flourished during the period of Mehmed II, wrote in Ottoman;⁷² and at most two, Bana'i (d. 1512) and Lutfi (d. 1462–63 or 1492), wrote in Chaghatay Turkish. However, parts of their diwans were probably written in Persian as well, since no diwan written entirely in Chaghatay Turkish is known to have been authored by Bana'i, who in fact is known to have authored two diwans in Persian and even actively opposed Turkish as a literary language in his early life.⁷³ Overall, Müeyyedzade's literary orientation was clearly towards the Persianate East. This should not be surprising, given his extended sojourn and study with the foremost scholars of Shiraz in the 1470s and 1480s, with whom he apparently also maintained close relations after returning to Ottoman service. In a sense, this shows that Müeyyedzade's library was both selectively constructed, and reflects his very specific vita and historical context. Whether Müeyyedzade's library may have once held Ottoman diwans, which perhaps were sold too quickly after his death to be recorded in his inventory, we do not know. What is clear is that Müeyyedzade's collection held a significant number of Persian diwans. This is paralleled by the significant number of Persian diwans in Bayezid's collection.⁷⁴ In both inventories, Turkish as a literary language is present, but it is less prominent than the Persian (and Arabic) sections at least in terms of absolute numbers, which confirms our knowledge of the history of Turkish as a literary language.

The remaining diwans of Müeyyedzade's library are recorded in the second inventory list (TSMA, D. 09291.2).⁷⁵ In addition to the already discussed diwans represented with multiple copies, Müeyyedzade's List II includes single copies of the *Dīwān Anwarī* (II/10a), *Dīwān Shaykh 'Arabī* (II/4b), *Dīwān Bākharzī* (II/3b), *Dīwān Banā'ī* (II/10a), *Dīwān Humām* (II/2b), *Dīwān Ibn Fāriḍ* (II/3a), *Dīwān Ibn Ishāq* (II/5b), *Dīwān Ibn Khaṭīb al-Maghribī* (II/9b), *Dīwān Ibn Nubāta* (II/4a), *Dīwān Ibn Qārī* (II/3b), *Dīwān 'Irāqī* (II/6a), *Dīwān 'Ishqī* (II/6b), *Dīwān Khāwarī ma'a risāla ukhrā* (II/6a),⁷⁶ *Dīwān Kamāl Khujandī* (II/8a), *Dīwān Lutfī* (II/6b), *Dīwān Maghribī* (II/5b),⁷⁷ *Dīwān Qāḍī Īsā* (II/6b), *Dīwān Quṭb* (II/4a),⁷⁸

Dīwān Rukn al-Dīn (II/6b),⁷⁹ *Dīwān Sa'd* (II/8a), *Dīwān Shahīd* (II/5a), *Dīwān Shaykh 'Aṭṭār* (II/8a), *Dīwān Shaykh Yaḥyā Ṣarṣarī* (II/4a),⁸⁰ *Dīwān Sharaf Rāmī* (II/7a), *Dīwān Sulṭān Aḥmad* (II/8a), *Dīwān Sulṭān al-'arīfīn* (II/5a),⁸¹ *Dīwān 'Ubayd-i Zākānī* (II/8a), *Dīwān Zahīr/Zuhayr* (II/1b, II/9a),⁸² as well as several diwans whose authors I have so far been unable to identify.⁸³

The palace library also held copies of the majority of these diwans. In general terms, Müeyyedzade's library inventory largely overlaps with and generally confirms the literary canon represented by the palace library—albeit on a smaller scale, and with a more expansive collection of diwans overall, especially those written in Persian and, to a lesser extent, in Arabic (although key poets writing in Arabic are also present together with their *sharḥs*, as we have already seen). Major poets are well represented, including with literary works other than diwans, especially when they wrote in Persian: Nizami's (d. between 1180 and 1217) *Khamsa*,⁸⁴ 'Attar's (d. 1221) *Muṣibat-nāma*,⁸⁵ (probably) Rumi's (d. 1273) *Mathnawī*,⁸⁶ Sa'di's (d. 1292) *Kulliyāt* and *Gulistān*,⁸⁷ and Jami's (d. 1492) *Khamsa*⁸⁸ are all recorded in Müeyyedzade's inventory.

Equally well represented are "lesser" poets (or at least ones who are lesser known today), such as Hatifi, 'Ismat, and Bisati (all recorded in List I). By contrast, Müeyyedzade's inventory is significantly less well equipped on the Turkish side when compared to Bayezid's inventory. This is particularly visible in the area of Chaghatay works, which at the time were flourishing in one of the most politically stable centers of cultural efflorescence in the Eastern Islamic lands under the patronage of Sultan Husayn Bayqara and Mir 'Ali Shir Nava'i.

Even though Müeyyedzade's inventory was drafted more than a decade after Bayezid's, and even though Müeyyedzade clearly maintained excellent connections to scholars and the book trade in Iran and Central Asia, Turkish works are also almost entirely absent in his List II. Whether this is a reflection of Müeyyedzade's own predilections, or whether these books were particularly popular and therefore sold more swiftly than others and could not be retrieved by Selim I's delegation, will have to remain an open question. İsmail E. Erünsal has suggested that the number of Chaghatay works in Müeyyedzade's book collection would have

been lower than in Bayezid's because the Chaghatay works probably reached Bayezid's library as presents.⁸⁹

Not surprisingly, given its royal patronage and larger size, the palace library inventory features many books that are not found in Müeyyedzade's inventory, including books that one might reasonably expect to find there, such as copies of the diwans of Müeyyedzade's own protégés. The absence of Zati's (d. 1546) diwan in Müeyyedzade's inventory is not entirely surprising, given his late death date; the presence of a diwan by a poet of this name in Bayezid's catalogue probably refers to another poet with the same *makhlaṣ* (Zātī) who lived during an earlier period.⁹⁰ By contrast, the absence of Necati's diwan in Müeyyedzade's catalogue is surprising. Necati not only predeceased Müeyyedzade, but was encouraged by Müeyyedzade to collect his dispersed ghazals in a diwan, which he did. Necati subsequently dedicated this diwan to Müeyyedzade, which created a major splash, since the dedication went against etiquette by stepping over some more senior individuals.⁹¹ Thus we might reasonably assume that Necati's diwan is one work that had already been sold before Selim was able to retrieve it. It is curious, as İsmail Erünsal has pointed out, that Necati's diwan is also absent from Bayezid's inventory.⁹²

IMPLICATIONS AND PRELIMINARY OBSERVATIONS

Returning to Taşköprülüzade's quote at the beginning of this article, one of the aims here has been to assess whether Müeyyedzade had indeed possessed books that were otherwise not known in Ottoman lands. The other aim has been to determine the ways in which these books may have been special, and what this can tell us about the literary canon of the time.

Harawi and Bukharan Literary Circles

There are two major differences between the two inventories in the area of diwan literature. As noted above, one is the greater presence of diwans in Ottoman and Chaghatay Turkish in Bayezid's library as compared to Müeyyedzade's incomplete inventory. Despite its slightly later date, Müeyyedzade's catalogue is virtually devoid of diwans in Ottoman Turkish (except for 'Ishqi's/

Aşki's, as we have seen), even though most of Müeyyedzade's own surviving poetry is in Ottoman Turkish. The survival of these works by Müeyyedzade, however, may have resulted from a selective process dictated by the tastes of audiences in subsequent centuries, rather than representing the languages in which Müeyyedzade actually composed.

As noted above, Müeyyedzade's inventory holds only one, or possibly two, diwans with verses in Chaghatay Turkish. These are a copy of the *Dīwān Lutfī*, which, given the dating, probably refers to the diwan of the Herat-based Lutfi (d. 1462–63 or 1492), who wrote in Chaghatay Turkish,⁹³ and a copy of a diwan of the Herat-born and Herat-educated Bana'i (d. 1512) that may have contained some verses in Chaghatay.⁹⁴ While Bana'i spent most of his life in Transoxania, he also spent extended periods between Iraq and Tabriz around the time of Müeyyedzade's sojourn in Shiraz, which was probably when Müeyyedzade became acquainted with his poetry.⁹⁵

Bayezid's catalogue, by contrast, records several copies of the diwans of the better-known poets writing in Chaghatay Turkish, such as Sayf-i Sarayi (d. after 1394), who also wrote in Qipçak Turkish;⁹⁶ Gada ("Gadā," Gadā'i, fl. 1491–92);⁹⁷ and Mir 'Ali Shir Nava'i (d. 1501).⁹⁸ As already pointed out by İsmail Erünsal, Bayezid's inventory features a substantial amount of literature in Chaghatay Turkish for the period. This would suggest that Nava'i's works spread into Ottoman circles earlier than previously assumed.⁹⁹ The overall comparatively low number of diwans in Chaghatay Turkish in both Bayezid's and especially Müeyyedzade's catalogue reflects the fact that ninety percent of the poetry in Central Asia before 'Ali Shir Nava'i was composed in Persian, and only ten percent was written in Chaghatay Turkish, which somewhat parallels the situation in Ottoman lands.¹⁰⁰ Neither Bayezid's nor Müeyyedzade's book inventory records copies of Chaghatay diwans from the first half of the fifteenth century, such as the diwans of Sakkaki of Samarqand (fl. 1410),¹⁰¹ Ata'i of Balkh (fl. 1450),¹⁰² and Yusuf Amiri of Badakhshan (fl. 1433).¹⁰³ This would suggest that Bayezid was less concerned with the Turkish language in which these diwans were written than he was with their fame, especially the renowned Harawi circle in which the later works were

produced. Considering that literary production in Chaghatay Turkish was at its height at exactly this time—especially in the Herat of Husayn Bayqara—and taking into account our current knowledge concerning the history of Nava'i's reception in Ottoman literary circles, this shows to what extent the palace library was on the cutting edge of the literary trends of the time.¹⁰⁴

From the three great centers of Chaghatay and Persian literary activity in the fifteenth century (i.e., Samarqand, Shiraz, and Herat), Müeyyedzade's library appears to have been particularly well stocked with works by authors who were related to Shiraz and Herat.¹⁰⁵ To these can be added works from the lesser-known literary circle in Bukhara surrounding 'Ismat Allah Bukhari (d. 1436 or 1437; see below). The literary connection to Shiraz was obviously established and reinforced through Müeyyedzade's extended sojourn and study there. The connection to Herat is particularly evident in a cluster of diwans from the circle of Husayn Bayqara that Müeyyedzade had once owned. Husayn Bayqara is known to have completed his own diwan in 1491.¹⁰⁶ While Müeyyedzade's inventory does not list a copy of this work, it does include copies of diwans by the aforementioned Herat-based poets Lutfi, Jami, and Bana'i. To this group may be added Hasan Shah Harawi, who is said to have died at the age of 105 in 905 (ca. August 8, 1499).¹⁰⁷ It is not certain that he is the person behind the mysterious name or pen name "Hasan," but given the prominence of poets from Herat in Müeyyedzade's inventory, and considering Herat's role as the foremost center of literary production in the Eastern Islamic lands at the time, Hasan Shah Harawi is one of the strongest contenders (*Dīwān Hasan, a'lā, I/2a*).¹⁰⁸ Also included in Müeyyedzade's collection are works by earlier authors from Herat, such as the *Dīwān* of Qasim-i Anwar (d. 1433–44), who spent a substantial amount of time in Timurid Herat. Two copies of his diwan are listed in the "important" section of Müeyyedzade's book inventory (I/2a). Müeyyedzade moreover owned a copy (I/2b) of the diwan of the poet Amir Shahi of Sabzawar (d. 1453), who spent some time in Herat in the circle of Baysunqur.¹⁰⁹ And last but not least, Müeyyedzade's catalogue lists a copy of the diwan by the already mentioned maternal nephew of Jami, Hatifi, who like Qasim al-Anwar was from Khargird, not far from Herat, where

he served as the custodian of Qasim-i Anwar's tomb that had been built by Mir 'Ali Shir Nava'i.¹¹⁰

That Nava'i's Turkish poetry in particular was avidly read, copied, and even adapted to the Oghuz Turkish dialect prevalent in the Aqqoyunlu Shiraz of the early 1470s is evident from the copy of his so-called *Dīwān of the Aq Qoyunlu Admirers* that was penned (and possibly compiled) by the famous Aqqoyunlu calligrapher 'Abd al-Rahim Khwarazmi in 1471.¹¹¹ Aqqoyunlu Shiraz, which had strong cultural ties to Herat as well as Bukhara, served as a key entrepôt for the introduction of Nava'i's works to Ottoman audiences.¹¹² Not coincidentally, it was here that Müeyyedzade spent several years of intensive study in the decade immediately following the copying of the *Dīwān of the Aq Qoyunlu Admirers*, and Müeyyedzade likely not only brought back copies of Nava'i's works, but also reinforced the excitement about his poetry in Ottoman circles. If he owned a copy of Nava'i's diwan, however, it appears to have sold quickly, as no copy of the work is recorded in his inventory.¹¹³

Müeyyedzade's collection also includes a good selection of diwans by poets from the early fifteenth-century Bukharan circle of 'Ismat Allah Bukhari (d. 1436), which included 'Ismat himself, Bisati Samarqandi (fl. 1411), Pir Barandaq (d. ca. 1433), and Khayali Bukhari (d. ca. 1446–47), among others.¹¹⁴ Of these, Müeyyedzade held copies of the diwans of 'Ismat (*a'lā, I/2a*), the *Dīwān Bisātī* (*a'lā, I/2a*), and two copies of "Khayāl[ī]'s" *Dīwān* (I/2a, I/2b, one *a'lā*), which may refer to Khayali Bukhari.¹¹⁵

Even though at the turn of the sixteenth century Herat surpassed Shiraz, Cairo, and Istanbul as the leading center of literary activity, and a certain interest in works from Herat should thus not be surprising, the clusters of works discussed above are striking. They seem to point to a personal connection that was perhaps established during Müeyyedzade's studies in Shiraz, though further research is needed to verify this. Diwans from the Herat-based poets (i.e., Hasan, Hatifi, Qasim, and Amir Shahi), the Bukhara-based Bisati, Khayali, and 'Ismat, and the Shirazi poet Hafiz, are all recorded in Müeyyedzade's List I. They are registered in this list along with the most important (*mühimm*) and valuable (*a'lā*) books probably because of their rarity in Ottoman lands at that time, but also because of their literary excellence and the illustrious literary circles they represented.¹¹⁶ As noted

above, the palace library held copies of all of these except for Hatifi's diwan.

Spiritual Orientations

The other major difference between Bayezid's and Müeyyedzade's diwan collections is the focus of their content. Generally speaking, it appears as though the Arabic diwans in Bayezid's inventory are ranked roughly by the ancientness of their authors. Thus, the Arabic diwan section begins with the diwan ascribed to 'Ali b. Abi Talib (d. 661), followed by early Arabic poets, such as al-Mutanabbi (d. 935), Hassan b. Thabit (d. 674), etc., before moving on to later ones. The section of Persian diwans could have followed a similar order, and indeed, it could have followed the model of the work of another famous author from the literary circle surrounding Mir 'Ali Shir Nava'i, Dawlatshah Samarqandi's *Tadhkirat al-shu'arā'* (Biographies of Poets), which was completed in 1486.¹¹⁷ Here the poets are arranged by *tabaqas*, roughly half centuries. The *Tadhkirat al-shu'arā'* starts with Rudaki, followed by (skipping here quite a few lesser-known names) Asadi Tusi, 'Unsuri, Mas'ud b. Salman, Firdawsi, Nizami 'Aruzi, Nasir-i Khusraw, Khaqani, Sana'i, and 'Attar before reaching Rumi (d. 1273). Here, and only here, is where Bayezid's inventory sets in. While it does include works by the earlier authors (Rumi is immediately followed by the earlier 'Attar, for example), it does so only after having listed all the works by Rumi. It thereby establishes a hierarchy that is not based on chronology, local patriotism, or appreciation of literary excellence alone, as it expresses veneration for Rumi as a Sufi saint with a prayer formula added after each occurrence of his name (fifteen times: *quddisa sirruhu*, or "may his secret be sanctified," a formula usually employed for deceased Muslim saints). This seems to hint at a special connection to the Mawlawi order, or at least veneration for Rumi. In light of this, it is reasonable to suggest that the position of the diwan ascribed to 'Ali b. Abi Talib at the beginning of the Arabic diwan section of Bayezid's catalogue likewise expresses deference to the authority of 'Ali, rather than being merely an expression of chronological ordering. A similar arrangement had been followed by Necati, whose diwan, as we had seen, starts off with *qaşidas* first on the Prophet Muhammad, then 'Ali, and then the Ottoman sultans, followed

by their dignitaries, including his patron Müeyyedzade. To determine whether the order followed by the palace library's inventory reflects the general custom of the time, Bayezid's own preferences, or those of the compiler 'Atufi, and to what extent it may have served, in turn, as a foil for later anthologies, would require further investigation.¹¹⁸

However this may be, Bayezid's section of Persian diwans starts out with the works of Rumi and those of his son and successor Sultan Veled (d. 1312), all in multiple copies. There are nineteen full copies of the *Mathnawī* of Rumi, whose name in the first fifteen entries is followed by blessings on the author, and two volumes of selections from Rumi's *Mathnawī*, one *sharḥ* of his *Mathnawī*, in addition to two full copies of Sultan Veled's diwan and a copy of the diwan of "Shams-i Tabrizi." Overall, these works are much less strongly represented in Müeyyedzade's inventory, which holds only one (or possibly one, as the author is not named) full copy of Rumi's *Mathnawī*,¹¹⁹ and no copy of Sultan Veled's diwan.¹²⁰ By contrast, a strong representation of the works of 'Attar, Ibn 'Arabi, Sadr al-Din Qunawi, 'Iraqi, and Jami is clearly discernible in Müeyyedzade's inventory, which appears to reflect deeply entrenched differences between two Konya-based spiritual and intellectual circles (Rumi vs. Ibn 'Arabi). Whether this points to differences in the spiritual orientation or literary tastes of Bayezid and Müeyyedzade, or whether once again the additional copies in Müeyyedzade's collection were simply sold more quickly, is a question that deserves further investigation.

However we may interpret the above differences, it is clear that Sufi works occupy a significant space in both Müeyyedzade's and Bayezid's inventories. Already Maróth has drawn our attention to the fact that, with forty-six pages, the section on Sufism (arranged together with the genres of hagiography and ethics) is by far the single largest chapter in Bayezid's inventory. (With more than sixty pages, only the section on diwan literature is larger if we count all languages together.¹²¹) For the sake of comparison, works on philosophy, logic, dialectics, and Islamic wisdom cover only twenty-five pages in the inventory (339–63), and works on medicine, twenty-two (151–72).¹²² By contrast, the entire section of works on "the interpretation of dreams, physiognomy,

alchemy, mineralogy, talismans, prediction, incantation, magic, and other miraculous activities,” an area in which Bayezid is known to have had a special interest and which has commanded much attention in recent scholarship, is recorded on only ten pages (302–11).¹²³ While Sufism, and Ibn ‘Arabi in particular, have both received their fair share of scholarly attention over the years, preliminary research suggests that it would be worthwhile to investigate further this aspect of Bayezid’s and Müeyyedzade’s collections in future studies.

CONCLUSIONS

Although Bayezid’s library collection was broader, and individual works were represented with more copies in comparison to Müeyyedzade’s, both collections represent the wide spectrum of their patrons’ intellectual interests, which overlapped significantly, regardless of the fact that one was a royal and the other a non-royal library. While this may not be particularly surprising given the shared upbringing and lifelong interaction of the two patrons, it is nevertheless worth pointing it out, since the interests of scholars and politicians do not always show such strong parallels. One of the reasons for this similarity may be as simple as it is obvious: not only did Bayezid and Müeyyedzade love books, but they also maintained vast aspirations and an encyclopedic vision of the ideal library. Both of them believed that the ideal library should be as broad and complete as possible, regardless of whether this scope exceeded one’s own immediate professional needs.¹²⁴ This points not only to the well-recognized thirst for knowledge and encyclopedic approach to learning prevalent among the scholars of this period, but indeed it also exemplifies a certain “outreach” mentality: rather than seeking to build a library for the sole purpose of the owner’s personal consultation, these book collectors apparently reckoned with a broader usership and purpose for their books. To what extent these collections were open to a reading “public”; whether there was ever a building or just a room in a house dedicated to Müeyyedzade’s collection; and whether social and scholarly gatherings and debates may have been carried out perhaps involving the use of these books is at this point an open question.

As for the diwan literature collected by Bayezid and Müeyyedzade, and the role of Ottoman Turkish diwans therein, both inventories confirm that at the turn of the sixteenth century, the production and reception of Ottoman diwans appears to have been less intensive than only half a century later. H. F. Hofman, who has analyzed Chaghatay Turkish literary production during approximately the same period, has summarized the commonly expressed view that at the beginning of the sixteenth century, “the Ottoman muse fluttered, but poorly winged.”¹²⁵ By the time it started to fly in the mid-sixteenth century, the political and literary landscapes had significantly changed, to which several major Ottoman *Tezkire* works appearing in tight succession from the mid-sixteenth century onwards bear vivid testimony.¹²⁶ Bayezid’s and Müeyyedzade’s book inventories provide eloquent correctives to this later literary canon, offering insight into the literary tastes at the very beginning of the sixteenth century, which were strongly oriented eastward, in terms of both content and languages represented.

Müeyyedzade and Bayezid lived at the turning point of the sixteenth century, with such famous literati as Husayn Bayqara, Nava’i, and Jami as their faraway neighbors in Herat whose literary achievement they could barely compete with, and such bibliophile Renaissance men as Corvinus as a closer neighbour in Buda, whose library even a private library like Müeyyedzade’s had no difficulty matching. They also lived through a time of major worldwide political changes that had an immediate impact on the Ottoman empire, including the final blow of the 1492 Reconquista in Spain and the establishment of the Shi’i Safavid dynasty in Iran in 1501, both of which resulted in a major influx of Muslim and non-Muslim refugees to the Ottoman empire that left deep marks in its cultural, religious, and intellectual landscape.

While the center of Müeyyedzade’s life (as well as that of Bayezid, and many of their contemporaries) shifted eventually from Amasya in Northern Central Anatolia westwards to Istanbul and Edirne, Müeyyedzade’s library was clearly steeped in an earlier network of scholars that extended well into Fars, Khurasan, and Central Asia. It is perhaps because Müeyyedzade was so connected to past networks and learning—possibly to

the detriment of his engagement with more recent developments—that his own work, like his library, eventually dispersed: Müeyyedzade had gathered a massive private library, but did not have the means to endow it; he wrote and collected poetry and encouraged others, such as Necati, to gather their poetry in a diwan, but had no diwan of his own; and he wrote extensively in the area of law, but was soon outshone in this area by one

of his students, Ebussuud Efendi.¹²⁷ While Müeyyedzade may appear to have ultimately been unsuccessful in his bibliophile endeavors, studying people like him nonetheless enables us to scrutinize the undercurrents, transition periods, turning points, and impasses in history that are not usually in the spotlight of research, reminding us of a few “blind spots” in the intellectual landscapes of modern scholarship along the way.

APPENDIX: TABLES

Table 1 Diwans with More than One Copy in TSMA, D. 9291.1-2 Compared with MS Török F. 59

Author	Work	Copies in Müeyyedzade's Inventory	Copies in Bayezid II's Inventory (A, P, T = in the Arabic, Persian, or Turkish section)
al-Abīwardī, Abū al-Muẓaffar (d. 1113) ¹²⁸	<i>Dīwān Abīwardī</i>	2 copies of <i>Dīwān Abīwardī</i> (II/5b {14} and II/7b {18})	0 copies (de facto: 2 copies when the <i>Trāqīyyāt</i> and <i>Najdiyyāt</i> copies are combined)
	<i>Trāqīyyāt Abīwardī</i>	1 copy of <i>Trāqīyyāt Abīwardī</i> (II/7b {9})	2 copies (A) of “ <i>Dīwān Abī al-Muẓaffar al-musammā bi al-Trāqīyyāt</i> ” (205 {12–13}; 206 {2})
	<i>Najdiyyāt Abīwardī</i>	1 copy of “ <i>Najdiyyāt Abīwardī ma’a dīwān ākhar</i> ” (II/7b {11})	7 copies (A) of “ <i>Dīwān Abī al-Muẓaffar al-musammā bi al-Najdiyyāt</i> ” (205 {14–15/2x}; 206 {14}; 207 {9, 12/3x}; 214 {10–11})
	<i>Sharḥ Najdiyyāt Abīwardī</i>	1 copy (II/5b)	4 copies (A) of “ <i>Sharḥ Dīwān Abī al-Muẓaffar al-musammā bi al-Najdiyyāt</i> ” (205 {16}; 212 {16, 18/2x}; 213 {1})
Abū Tammām (d. 845) ¹²⁹	<i>Dīwān</i>	3 copies (II/3b, II/6b, and II/8a)	1 copy (A) (205 {11})
	<i>al-Ḥamāsa</i>	2 copies (II/7b, II/9b)	6 copies (A) of “ <i>Kitāb al-Ḥamāsa li-Abī Tammām</i> ” (212 {2–5/6x})
	<i>Sharḥ al-Ḥamāsa</i>	2 copies “ <i>jild thānī min Sharḥ Ḥamāsa</i> ” (II/4b); “ <i>Sharḥ Ḥamāsa</i> ” (II/9b)	2 copies (A) of “ <i>Sharḥ al-Ḥamāsa</i> ” (212 {5/2x})

Table 1 Diwans with More than One Copy in TSMA, D. 9291.1-2 Compared with MS Török F. 59 (cont.)

Author	Work	Copies in Müeyyadzade's Inventory	Copies in Bayezid II's Inventory (A, P, T = in the Arabic, Persian, or Turkish section)
Hāfiẓ (d. 1390) ¹³⁰	<i>Dīwān</i>	2 copies (I/2a, I/2b)	18 copies (P) (235 {10, 16–17/2x}; 236 {9–14/12x}; 237 {1/1x}; 238 {3, 6, 18/3x})
“Ḥasan” ¹³¹	<i>Dīwān</i>	3 copies (one <i>a’lā</i>) (I/2a, II/6b, II/8a)	5 copies (P) (235 {8, 10, 18/3x}; 238 {3}; 239 {16})
Kamāl Isfahānī (d. ca. 1237) ¹³²	<i>Dīwān</i>	2 copies (II/4a, II/7a)	1 copy (P) of “ <i>Dīwān Kamāl al-Dīn Ismā’īl</i> ” (238 {7}) ¹³³
Khāqānī (d. 1199) ¹³⁴	<i>Dīwān</i>	2 copies (II/4b, II/8a)	2 copies (P) (245 {13, 17})
Khayāl[i] of Bukhara (?) (d. ca. 1446–47) or Darwīsh Khayālī (fl. ca. 1449) ¹³⁵	<i>Dīwān</i>	2 copies (I/2a, 2x)	5 copies (P) of “Khayālī” (237 {1}; 241 {8}; 247 {7/2x}; 248 {3})
Khwājū/Khūjū [Kirmānī] (d. 1352) ¹³⁶	<i>Dīwān</i>	2 copies (II/4a, II/9b)	3 copies (P) (241 {13, 15–16/2x}; 242 {2})
al-Mutanabbī (d. 965) ¹³⁷	<i>Dīwān</i>	4 copies (II/6a, II/7b, II/10a, II/10b)	6 copies (A) (204 {12–14})
	<i>Sharḥ Dīwān Mutanabbī</i>	3 copies (II/4b, II/8a, II/9a)	14 copies (A) (204 {15–17/7x}; 205 {1–5/7x})
Qāsim [al-Anwār] (d. 1433) ¹³⁸	<i>Dīwān</i>	2 copies (I/2a {7}, II/2b {8})	9 copies (P) (239 {7–12/9x})
Salmān [Sāwajī] (d. 778/1376) ¹³⁹	<i>Dīwān</i>	3 copies (I/2a, I/2b, II/9a)	5 copies (P) (237 {1}; 238 {12, 17, 19/4x})
Ẓahīr/Ẓuhayr ¹⁴⁰	<i>Dīwān</i>	2 copies (II/1b, II/9a)	4 copies (P) (238 {10}; 246 {6}; 247 {15–16/2x})

Müeyyedzade's Inventory TSMA, D. 9291.1 (Table 1)	Bayezid II's Inventory MS Török F. 59
<i>Dīwān Ḥaḍrat-i ‘Alī raḍīya Allāhu ‘anhu</i> , 2 copies; one <i>a’lā</i> (I/2a {2}, I/2b {6}); ‘Alī b. Abī Ṭālib (d. 660) ¹⁴¹	5 Arabic copies + 1 Persian + (possibly) 1 Ottoman translation; “ <i>Dīwān ash‘ār Amīr al-mu‘minīn ‘Alī raḍīya Allāhu ‘anhu al-musammā bi-Anwār al-‘uqūl ma‘a tarjumatihā bi-al-fārisīyya al-manẓūma</i> ” (204 {4–10}; “ <i>Dīwān ‘Alī bi-al-Turkiyya</i> ” ¹⁴² (262 {2}))
<i>Dīwān Bisāṭī</i> , <i>a’lā</i> , 1 copy (I/2a {7}); Bisāṭī Samarqandī (d. Oct. 28, 1411) ¹⁴³	5 copies (P) ¹⁴⁴ (241 {8–9/4x}; 247 {8})
<i>Dīwān Ḥāfiẓ</i> , 2 copies, one <i>a’lā</i> (I/2a {7}, I/2b {7}); <i>Ḥāfiẓ</i> (d. 1390) ¹⁴⁵	18 copies (P) (235 {10, 17/2x}; 236 {9/3x, 10/2x, 11/3x, 12, 13/2x, 14}; 237 {1}; 238 {3, 6, 16/3x})
<i>Dīwān Ḥasan</i> , <i>a’lā</i> , 1 copy (I/2a {3}); “Ḥasan” ¹⁴⁶	5 copies (P) (235 {8, 10, 18/3x}; 238 {3}; 239 {16})
<i>Dīwān Hātifi</i> , 1 copy (I/3b {9}); ‘Abd Allāh Hātifi (d. 927/ca. 12 Dec. 1520) ¹⁴⁷	—
<i>Dīwān Khayāl[i]</i> , 2 copies, 1 <i>a’lā</i> (I/2a {1}, I/2b {6}); Khayāl[i] of Bukhara (?) (d. ca. 1446) or Darwish Khayālī (fl. 1449) ¹⁴⁸	<i>Dīwān Khayālī</i> , 5 copies (P) (237 {1}; 241 {8}; 247 {7/2x}; 248 {3})
<i>Dīwān Iṣmat</i> , <i>a’lā</i> , 1 copy (I/2a {4}); Iṣmat Allāh Bukhārī (d. 840/1437) ¹⁴⁹	3 copies (P) (240 {19/2x}; 241 {1/1x})
<i>Dīwān Nāṣir</i> , <i>a’lā</i> , 1 copy (I/2a {1}); “Nāṣir” ¹⁵⁰	<i>Dīwān Nāṣir</i> , 2 copies (P) (240 {19}; 247 {15}) <i>Dīwān Nāṣir-i Khusraw</i> , 2 copies (P) (246 {5–6}; 247 {4}) <i>Dīwān Nāṣir-i Bukhārī</i> , 2 copies (P) (247 {6}; 248 {4})
<i>Dīwān Sayyid Qāsim</i> , <i>a’lā</i> , 1 copy (I/2a {7}); ¹⁵¹ Qāsim al-Anwār (d. 1433–34) ¹⁵²	9 copies (P) (239 {7–12/9x})
<i>Dīwān Shāhī</i> , 1 copy (I/2b {6}); Āqā Malik b. Jamāl al-Dīn Fīrūzkūhī, whose pen name was Shāhī or Amīr Shāhī of Sabzawar (d. 1453) ¹⁵³	5 copies (P) (246 {1, 15/2x}; 247 {11, 13/2x}; 248 {2})
<i>Dīwān Salmān</i> , 2 copies, one <i>a’lā</i> (I/2a {2}; I/2b {7}); Salmān Sāwajī (d. 1376) ¹⁵⁴	5 copies (P) (237 {1}; 238 {12, 17, 19/4x})

NOTES

Author's note: This article has benefited from the generosity of several colleagues. I am indebted in particular to İsmail E. Erünsal for carefully reading and commenting on this article, and for arranging a memorable *meclis* in which parts of Müeyyedzade's library inventory were read and solutions proposed for those passages that I found difficult to read. I would furthermore like to thank Giovanni Maria Martini and İlker Evrim Binbaş for reading and commenting on early drafts of this article, and Gülru Necipoğlu and Cemal Kafadar for reading and providing comments on it once it was submitted. Any remaining errors are, of course, my own. Funding for research for this article was made available by the European Research Council under the *European Union's Seventh Framework Programme (FP7/2007-2013)* / ERC Starting Grant 263557 IMPAcT, the Alexander von Humboldt Foundation, and a Scaliger Fellowship at the Scaliger Institute in Leiden. I am grateful for the support they provided.

1. Taşköprülüzade Aḥmet, *al-Shaqā'iq al-Nu'māniyya fī 'ulamā' al-dawla al-'Uthmāniyya*, ed. Muḥammad Ṭabāṭabā'ī Bihbahānī "Maṣṣūf" (Tehran: Kitābkhāna-yi Mūza va Markaz-i Asnād-i Majlis-i Shūrā-yi Islāmī, 1389 H.sh./2010), 261.
2. Csaba Csapodi, *The Corvinian Library: History and Stock* (Budapest: Akadémiai Kiadó, 1973); Edit Madas, "La Bibliotheca Corviniana et les Corvina 'Authentiques,'" in *Matthias Corvin, les bibliothèques princières et la genèse de l'État moderne*, ed. Jean-François Maillard, István Monok, and Donatella Nebbiai (Budapest: Országos Széchényi Könyvtár, 2009), 35–78; with a list of 221 manuscripts that she has identified as authentic, at 48–75. See also Christian Gastgeber, *Matthias Corvinus und seine Zeit: Europa am Übergang vom Mittelalter zur Neuzeit zwischen Wien und Konstantinopel* (Vienna: Verlag der Österreichischen Akademie der Wissenschaften, 2011). Already during the period between 1491 and 1526 (Corvinus's death and the Ottoman conquest of Budapest), "spoliation and incipient dispersion" had set in, as no librarian was looking after the collection (Csapodi, *Corvinian Library*, 17–90, at 72). In an ironic twist of history, the library suffered during the Ottoman conquests under Sultan Süleyman in 1526—though as Csapodi has argued, and contrary to reports by later sources, the books were not burned during Süleyman's capture of Buda; rather, a good number of them would have been taken to Istanbul or dispersed in other ways, e.g., to the Medici family, who showed a great interest in them (Csapodi, *Corvinian Library*, 79–83).
3. This donation provided the incentive for the university to build a new library above the new Divinity School. *The Bodleian Library Oxford* (Oxford: n.d. [2016]), 3; brochure also available online at <http://www.bodleian.ox.ac.uk/docs/historybodleian.pdf>. The more detailed 1796 description by Anthony Wood accounts for some 600 volumes from Humphrey's and other donations that made up the book collection of the University Chest that stood at the beginning of the Duke Humphrey's Library by the late fifteenth century (Anthony Wood and John Gutch, *The History and Antiquities of the University of Oxford: In Two Books* [Oxford, 1792–96]. Now first published in English, from the original MS in the Bodleian Library: by John Gutch, Oxford: Printed for the editor, 1796, vol. 2, part 2, 914–15).
4. The Bodleian Library itself opened in 1602. Between the foundation of the Duke Humphrey's and Bodleian Library, there was a hiatus of ca. fifty years when, in 1550, the year during which a large quantity of the rare books of Oxford's College libraries were deliberately removed and destroyed (Anthony Wood and John Gutch, *History and Antiquities of the University of Oxford*, vol. 2, part 1, 106–10), the Duke Humphrey's Library was emptied of its books and subsequently "stript stark naked [of] the benches and desks therein" (ibid., vol. 2, part 2, 919) in 1555 (ibid., 919) as part of a purge of Roman Catholic books and other publications that were considered "heretic" under Edward VI: "Some of those books so taken out by the Reformers were burnt, some sold away for Robin Hoods pennyworths, either to Booksellers, or to Glovers to press their gloves, or Taylors to make measures, or to Bookbinders to cover books bound by them, and some also kept by the Reformers for their own use" (ibid., 919). It was a drastically changed political situation half a century later that enabled Thomas Bodley to come to the rescue by providing the funds—and some books—for the establishment of the new library that was to bear his name.
5. For contemporary and comparable examples from fifteenth-century European libraries, see Maillard, Monok, and Nebbiai, eds., *Matthias Corvin*.
6. This is explicitly stated in the Arabic introduction to Bayezid II's palace library inventory: "Praise be to God who [...] made knowledge a pillar of religion, and the Qur'an [literally: 'the Book'] a pillar for knowledge and certitude" (*al-ḥamdu li-Allāhi al-ladhī [...] ja'ala al-'ilma 'imādan li-al-dīn wa al-kitāba 'imādan li-al-'ilm wa al-yaqīn*); MS Török F. 59, 7 {1–3}. See also the translation of the Arabic introduction at the end of this volume: Appendix V, by Mohsen Goudarzi. For a survey of Islamicate libraries before the Ottoman era, see İsmail E. Erünsal, *Osmanlı Vakıf Kütüphaneleri* (Ankara: Türk Tarih Kurumu, 2008), 1–74.
7. The book inventories of Bayezid II (MS Török F. 59) and Müeyyedzade (TSMA, D. MS 9291.1–2) are among the earliest and most complex Ottoman library inventories in terms of their size and the breadth of sciences represented. For a survey of references to books found in public institutions such as Murad II's *Dār al-ḥadīth* in Edirne (1435), Umur Bey's mosque in Bursa (1440 or 1456), and İshak Bey's madrasa in Üsküp (1445), see İsmail E. Erünsal, "959/1552 Tarihli Defter-i Kütüb," *Erdem* 10 (1988): 181–93. It is worth recalling that the famous Ghazi Hüsrev Bey Library in Sarajevo was also established at this time as part of an endowed madrasa library. Not coincidentally, its founder Ghazi Hüsrev Bey (1480–1541) was the son of one of Bayezid II's daughters, Selçuk, and thus was connected to the same circles as Bayezid II and Müeyyedzade. However,

in this case no contemporary library catalogue is extant. See Kasim Dobrača, "Introductory," in *Katalog arapskih, turskih i perzijskih rukopisa / Catalogue of the Arabic, Turkish, and Persian Manuscripts* (Sarajevo: Starješinstvo islamske vjerske zajednice za SR Bosnu i Hercegovinu, 1963–), 1:xix–xxvi, at xxii. The earlier catalogue of the Ashrafiyya Library in Damascus (wr. ca. 1270) is an exception rather than the rule for libraries in this early period. See Konrad Hirschler, *Medieval Damascus: Plurality and Diversity in an Arabic Library: The Ashrafiyya Library Catalogue* (Edinburgh: Edinburgh University Press, 2016).

8. Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 127.
9. MS Török F. 59, 12 {11}.
10. MS Török F. 59, 1b {5, 10}.
11. For a discussion of the date of Bayezid's library inventory, see İsmail E. Erünsal, "Türk Edebiyatı Tarihinin Arşiv Kaynakları 6: 909/1503 Tarihli Defter-i Kütüb," *Journal of Turkish Studies* 32, no. 1 (2008): 203–19, at 205; and Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 460–61, with the Ottoman introduction in transliteration and a facsimile of the first five folios of MS Török F. 59 in Appendix XV, 650–58 (which is a revised version of Erünsal's 1988 publication, "959/1552 Tarihli Defter-i Kütüb," 184–93, where he had first introduced this important document). See also Erünsal, "The Catalogue of Bâyezid II's Palace Library," *Kütüphanecilik Dergisi, Belge Bilgi Kütüphane Araştırmaları* 3 (1992): 55–66; Feridun M. Emecen, "II. Bâyezîd'in Tarih Merakı Üzerine Bir Not: Fenarîzâde Alâeddîn Alî'nin Anonim Osmanlı Tarihi Derlemesi," in *Kitaplara Vakfedilen Bir Ömre Tuhfe: İsmail E. Erünsal'a Armağan*, 2 vols. (Istanbul: Ülke Yayınları, 2014), 1:331–44, at 333; and, for an estimate of the number of work titles and volumes, Miklós Maróth, "The Library of Sultan Bayezid II," in *Irano-Turkic Cultural Contacts in the 11th–17th Centuries*, ed. Éva M. Jeremiás (Piliscsaba: The Avicenna Institute of Middle Eastern Studies, 2003), 111–32, at 112.
12. Here we see the difference, perhaps, between a private scholar's library and that of a ruler who inherited and further expanded the collection of his father (Mehmed II), which was characterized by universal aspirations.
13. For comparative material from some 40 sixteenth-century endowed libraries in Istanbul, see Faruk Bilici, "Les bibliothèques vakıf-s à Istanbul au XVI^e siècle, prémices de grandes bibliothèques publiques," *Revue des mondes musulmans et de la Méditerranée* 87–88 (September 1999; dedicated to the topic, "Livres et lecture dans le monde Ottoman"): 39–59.
14. It is precisely these books that were going to be 'purged' in England under Edward VI after 1550, where many of the books that were "either condemned to the fire or jakes" were "guilty of no other superstition than red letters in their fronts or titles" (Wood and Gutch, *History and Antiquities of the University of Oxford*, vol. 2, part 1, 106). On the discussions of "the science of the stars" in late fifteenth- and sixteenth-century Ottoman intellectual circles, see Ahmet Tunç Şen, "Rasattan Takvime: XV/XVI. Yüzyıl Osmanlı Dünyasında Astrolojinin Yeri Üzerine Bazı Gözlemler," in *Osmanlı'da İlim ve Fikir Dünyası, İstanbul'un Fethinden Süleymaniye Medreselerinin Kuruluşuna Kadar*, ed. Ömer Mahir Alper and Mustakim Arıcı (Istanbul: Klasik, 2015), 227–49.
15. *Sharḥ Jaghmīnī li-al-ʿUbaydī*, TSMA, D. MS 9291.1 (henceforth "I"), I/3b; *Sharḥ Jaghmīnī*, TSMA, D. MS 9291.2 (henceforth "II"), II/2a; *Sharḥ Jaghmīnī*, II/2b; *Sharḥ Jaghmīnī Qādī-zāda*, II/2b; *Sharḥ Jaghmīnī*, II/4b; *Sharḥ Jaghmīnī*, jild, II/7a; *Sharḥ Jaghmīnī*, II/7b; *Sharḥ Jaghmīnī li-al-Sayyid*, II/8b; *Sharḥ Jaghmīnī*, II/9b. References here are given to Müeyyadzade's inventory only; for entries from Bayezid's inventory, please see the relevant articles in this volume.
16. *Kitāb al-kifāya fī al-hay'a ma'a risāla*, II/8b. On the relative position of this work among the larger oeuvre of al-Mas'ūdi, see Ayman Shihadeh, who has pointed out that the Persian version with the title *Jahān-dānīsh* (prepared by Mas'ūdi himself probably shortly after the Arabic version) "clearly had a much wider circulation than the Arabic original" and referred to Istanbul, Hafid Efendi MS 154, ff. 107b–149a and Medina 'Ārif Hikmat MS 9 *Falak* as the two known copies of the Arabic version of this work (Shihadeh, *Doubts on Avicenna: A Study and Edition of Sharaf al-Dīn al-Mas'ūdī's Commentary on the Ishārāt* [Leiden: Brill, 2015], 22–23). According to the inventory, Bayezid's library held copies of both the Arabic and Persian versions of the work: *Kifāyat al-ta'lim fī al-nujūm*, 316 {15–16} and *Kitāb-i Jahān-dānīsh bi al-fārisiyya tarjumat al-kifāya fī 'ilm al-hay'a*, 325 {17–18}. Several copies of the work in both Arabic and Persian are extant in the collections held in the Süleymaniye Library in Istanbul; for their possible identification with Bayezid II's holdings, see the relevant article in this volume.
17. *Nihāyat al-idrāk fī dirāyat al-falāk* [sic], I/3b; *Nihāyat al-idrāk*, II/2a; *Nihāyat al-idrāk fī al-hay'a*, II/2b; *Nihāyat al-idrāk*, II/10a; *Nihāyat al-idrāk*, II/10a.
18. *Tuhfa-yi Shāhiyya*, jild, II/4a; *Tuhfa-yi Shāhiyya*, II/4a; *Sharḥ Tuhfa-yi Shāhiyya ma'a risāla-yi* [sic] *ākhar*, II/4a; *Tuhfa-yi Shāhiyya*, II/5b; *Tuhfa-yi Shāhiyya*, II/7b; *Tuhfa-yi Shāhiyya*, II/8b; *Tuhfa Shāhiyya*, II/9b; *Tuhfa-yi shāhiyya*, II/10a; also probably *Tuhfa fī al-hay'a*, II/8a.
19. *Risāla fī al-hay'a*, I/3b; *Kitāb fī 'ilm al-nujūm*, II/4a; *Jūnk (jōnk) fī al-nujūm*, II/6a; *Kitāb fī al-nujūm ma'a rasā'il ukhrā*, II/6a; *Risāla fī al-nujūm*, II/6a; *Risāla fī al-nujūm wa si fasl*, II/6b; *Kitāb āthār fī al-nujūm*, II/7a; the copy of a work titled *Kitāb fī ikhtiyārāt al-nujūmiyya*, II/8b (possibly a copy of Sahl b. Bishr's [d. 845] *Kitāb al-ikhtiyārāt 'alā al-buyūt*, or Abū Ma'shar's [d. 885] *Kitāb Ikhtiyārāt al-sā'āt*, or Abū Bakr al-Qasrānī's *Ikhtiyārāt nujūmiyya*, of which a copy is found in Berlin, Staatsbibliothek oct. 3296/3, see *GAL S I*, 392 (not seen); and possibly two copies of Sahl b. Bishr's *Aḥkām al-nujūm: Kitāb min aḥkām al-nujūm*, II/7a, *Aḥkām-i nujūm*, II/10a. The work titled *Mawāqī' al-nujūm* (II/9a) is probably to be identified as Ibn 'Arabi's (d. 1240) work of the same title and ought to be classified among the works of Sufism

- (*GAL* G I, 443), which is also where it is listed in Bayezid's inventory (113 {13–14; 16} and 149 {4–5}).
20. *Ghāyat al-ḥakīm*, II/10a. On the *Picatrix*, see Hellmut Ritter, "Picatrix, ein arabisches Handbuch hellenistischer Magie," in *Vorträge der Bibliothek Warburg herausgegeben von Fritz Saxl, Vorträge 1921–1922* (Leipzig/Berlin: B.G. Teubner, 1923), 94–124.
 21. *Qānūn-i Ṭibb-i Abī 'Alī, naḥs, a'lā*, I/2a; *Kulliyāt Qānūn*, II/2a, *Kulliyāt Qānūn fī al-ṭibb*, II/5a, *Qānūn fī al-Ṭibb*, II/8b, *Kulliyāt Qānūn*, II/9a.
 22. *Sharḥ Kulliyāt Qānūn*, II/1b, *Sharḥ Qānūn 'Allāma, jild awwal*, II/3a, *Sharḥ Kulliyāt Qānūn, jild thānī*, II/3a, *jild thālith min sharḥ Kulliyāt Qānūn*, II/3b, *Sharḥ Qānūn li-Quṭb al-Dīn*, II/3b, *Sharḥ Qānūn nā-tamām*, II/4a, *Sharḥ Kulliyāt Qānūn*, II/4b, *Sharḥ Kulliyāt Qānūn*, II/5a, *Sharḥ Kulliyāt Qānūn li-al-'allāma*, II/5a, *Sharḥ Kulliyāt Qānūn, jild awwal*, II/7b, *Sharḥ Kulliyāt Qānūn*, II/9b.
 23. *Minhāj al-bayān fī al-ṭibb*, II/3b.
 24. *Jild awwal min Kitāb al-Mukhtār min al-ṭibb*, II/3a; *Juz' thālith min al-Mukhtār fī al-ṭibb*, II/4b.
 25. *Mūjaz fī al-ṭibb*, II/7a; *Mūjaz fī ṭibb*, II/8a.
 26. *Ḥaqā'iq asrār ṭibb*, II/9b.
 27. *Kitāb min al-ṭibb*, II/2a; *Risāla-yi fārsī fī al-ṭibb*, II/3a; *Risāla fī al-ṭibb*, II/5b; *Kitāb fī al-ṭibb*, II/9b; *Risāla min al-ṭibb ukhrā*, II/10a. Works that can possibly be identified include the *Ganj asrār al-ṭibb*, II/8b and *Kitāb al-Īdāḥ fī al-ṭibb*, II/10a; also *Ṭibb Nabawī*, II/10b.
 28. On Müeyyedzade, see M. Tayyib Gökbilgin, "Müeyyedzāde," *İslam Ansiklopedisi* VIII (1997): 786b–790b; *TDVİA*, s.v. "Müeyyedzāde Abdurrahman Efendi," by Hasan Aksoy; Cemal Kurnaz, "Osmanlı Tarihinde İz Bırakan Amasyalı bir Aile: Müeyyedzādelar," in *I. Amasya Araştırmaları Sempozyumu Bildirileri*, ed. Yavuz Bayram, 2 vols. (Amasya: T.C. Amasya Valiliği, 2007), 2:647–66. On the important role of Amasya as a center of learning during the fifteenth and sixteenth centuries, see Petra Kappert, *Die osmanischen Prinzen und ihre Residenz Amasya im 15. und 16. Jahrhundert* (Istanbul: Nederlands Historisch-Archaeologisch Instituut te İstanbul, 1976); Hedda Reindl, *Männer um Bāyezīd: Eine prosopographische Studie über die Epoche Sultan Bāyezīds II (1481–1512)* (Berlin: K. Schwarz, 1983); Hasan Karataş, "The City as a Historical Actor: The Urbanization and Ottomanization of the Halvetiye Sufi Order by the City of Amasya in the Fifteenth and Sixteenth Centuries" (PhD diss., University of California, Berkeley, 2011).
 29. *TDVİA*, s.v. "Mihri Hatun," by İsmail E. Erünsal.
 30. For further references on this episode, see *TDVİA*, s.v. "Müeyyedzāde Abdurrahman Efendi," by Hasan Aksoy.
 31. For an edition and analysis of the *ijāza* that Dawani issued to Müeyyedzade, see Judith Pfeiffer, "Teaching the Learned: Jalāl al-Dīn al-Dawānī's *Ijāza* to Mu'ayyadzāda 'Abd al-Rahmān Efendi and the Circulation of Knowledge between Fārs and the Ottoman Empire at the Turn of the Sixteenth Century," in *The Heritage of Arabo-Islamic Learning: Studies Presented to Wadad Kadi*, ed. Maurice A. Pomerantz and Aram Shahin (Leiden: Brill, 2015 [2016]), at 298–324.
 32. Hanna Sohrweide, "Dichter und Gelehrte aus dem Osten im osmanischen Reich (1453–1600)," *Der Islam* 46 (1970): 263–302; Pfeiffer, "Teaching the Learned"; Pfeiffer (in preparation). For the central role that Shiraz continued to play in the production of illustrated manuscripts throughout the sixteenth century, with Istanbul as a key destination, see Lale Uluç, "Ottoman Book Collectors and Illustrated Sixteenth Century Shiraz Manuscripts," *Revue des mondes musulmans et de la Méditerranée* 87–88 (1999): 85–107; Lale Uluç, *Turkman Governors, Shiraz Artisans and Ottoman Collectors: Sixteenth Century Shiraz Manuscripts* (Istanbul: Türkiye İş Bankası, 2006); Lale Uluç, "Onaltıncı Yüzyılda Osmanlı-Safevî Kültürel İlişkileri Çerçevesinde Nakkashānenin Önemi," *Doğubatı* 54 (2010): 23–60. The fame of the Shirazi calligraphers also spread eastward, certainly by the end of the fifteenth century; see below for an example from Bukhara.
 33. E.g., Müeyyedzade once owned a copy made directly from an autograph copy (*nuskhat al-mu'allif*) of Quṭb al-Dīn Shirazī's (d. 1311) *Sharḥ Ḥikmat al-ishrāq* (Commentary on [Suhrawardī's] *Philosophy of Illumination*), which had also been collated twice with the original, and was then collated a third time by al-Hasan b. 'Alī al-mutaṭabbib al-Mawlawi al-Siwasi "from a copy of the text which had been read with the author" (*nuskha maqrū'a 'alā al-muṣannif*; MS Leiden, Or. 606, fol. 157a). On fol. 1a this copy bears an owner's note by 'Abd al-Rahmān Ibn 'Alī b. Mu'ayyad, dated Friday 7 Ramadan 901 (May 20, 1496) in Istanbul ("*bi-maḥrūsa Qusṭanṭīniyya*").
 34. MS Leiden, Or. 606, fol. 1a, which features an owner's mark by Zayn al-'Arab al-Misri. For a copy of al-Misri's *Sharḥ al-Qānūn* (Commentary on [Avicenna's] *Kanon*), see MS London, Wellcome Historical Medical Library, WMS Or. 119.
 35. E.g., a copy of Nasir al-Dīn al-Tusi's comments on Archimedes's treatise "On Sphere and Cylinder" ([Tahrīr] *Kitāb Arshīmūdhīs fī al-kura wa al-uṣṭuwāna*) bears both an ownership mark of Müeyyedzade (dated to Rabi' I 914/ca. July 1508) and the record (in Syriac) "*ex-libris* of Gregory, the lowly maphrian; year 1592 of the Greeks [A.D. 1280/1]" (MS Istanbul, Hacı Selim Ağa 743, fol. 1a).
 36. İsmail Erünsal has drawn our attention to the fact that book inventories were also used in lending ("Catalogue of Bāyezīd II's Palace Library," 56). With regard to Müeyyedzade's books, we find that he often used the term *ista'ara* (which means literally "to borrow") to express ownership, usually as part of the phrase *ista'arahu min al-zamān* (he, i.e., I, Müeyyedzade, have borrowed this [book] from time). If we were to take the term at face value, there is a remote possibility that Müeyyedzade was permitted to "borrow" books from the palace library temporarily. An example is MS Istanbul, Süleymaniye, Carullah 1264 (a copy of Taftazani's [d. 1390] *al-Maqāṣid fī 'ilm al-kalām*, *The Objectives of Dialectical Theology*), which bears both an owner's (or

perhaps borrower's) mark by Müeyyedzade (*ista'ārahu*) on fol. 1a and Bayezid II's seals on fols. 1a and 192b. However, it seems more likely that Bayezid gave this book to Müeyyedzade as a present, or vice versa, and that the term *ista'ārahu* is an ownership statement expressing the idea of temporary ownership, suggesting that Müeyyedzade used this phrase both as a gesture of *humilitas* and as a "personal signature." For similar expressions in ownership statements, see Adam Gacek, *Arabic Manuscripts: A Vademecum for Readers* (Leiden: Brill, 2009), 176.

37. E.g., Müeyyedzade left the following note on a copy of Nasir al-Din Tusi's Exposition on Euclid's *Elements* (*Tahrīr Uqlīdis fī uṣūl al-handasa wa al-ḥisāb*): "I had this copy made from a copy prepared by the hand of the distinguished and most erudite master known as al-Nizām al-A'raj. I, 'Abd al-Raḥmān b. 'Alī b. al-Mu'ayyad al-Rūmī al-Amāsī, who am in need of the one God's kindness, collated it with it according to [my] ability as much as possible." [*istaktabtu hādhihi al-nuskha min nuskhatin bi-khaṭṭ al-Mawlā al-fāḍil al-'allāma al-mushtahir bi-al-Nizām al-a'raj wa qābaltuhā bihā ḥasba al-wuṣ' wa-al-imbkān wa anā al-faqīr ilā rahmati rabbīhi al-aḥad 'Abd al-Raḥmān b. 'Alī b. al-Mu'ayyad al-Rūmī al-Amāsī.*] He dated this event to Tuesday, 18 Ramadan 885 (November 21, 1480), in Shiraz (*bi-madīnat Shīrāz*; Istanbul, Veliyüddin MS 2304, fol. 184a). See Pfeiffer, "Teaching the Learned." The name al-Nizām al-A'raj almost certainly refers to Nizām al-Din al-Hasan b. Muhammad b. al-Husayn al-A'raj al-Nishaburi (d. ca. 1330), who authored an important commentary on Tusi's *Tadhkira*. In other words, the copy that Müeyyedzade selected as the basis for his fresh copy had been prepared by a scholar who knew what he was doing when he wrote out the text; equally important in this particular case, his name stood for the accurate execution of the highly intricate geometrical illustrations accompanying the text. On al-Nizām al-Din al-Nishaburi, see Robert Morrison, *Islam and Science: The Intellectual Career of Nizām al-Dīn al-Nisābūrī* (London: Routledge, 2007).
38. İsmail E. Erünsal has pointed out that the collection was particularly enriched during the reign of Bayezid II's grandfather Murad II (r. 1421–44, 1446–51): Erünsal, "959/1552 Tarihli Defter-i Kütüb," 181; Erünsal, "Türk Edebiyatı Tarihinin Arşiv Kaynakları 6: 909/1503 Tarihli Defter-i Kütüb," 205.
39. These included, among others, such illustrious names as Molla Lütüf (Erünsal, "Türk Edebiyatı Tarihinin Arşiv Kaynakları 6: 909/1503 Tarihli Defter-i Kütüb," 205).
40. The fact that Müeyyedzade's book collection was unendowed distinguishes it from other (mostly later) private Ottoman libraries that were endowed, often by the scholars themselves, such as the collections of Carullah (d. 1738), Ragıp Paşa (d. 1763), and others, for which at least the majority of the books are still found today in known collections. Müeyyedzade's collection was dissolved immediately after his death, which makes it more difficult to check book titles listed in his inventory against actual surviving copies. As Gülru Necipoğlu has pointed out, "this is also the case

with Bayezid's books, dispersed to many sultan's madrasas, etc., though a core is present in TSMA and we know which collections the dispersed books were endowed to" (personal communication, May 28, 2016). On the library of Ragıp Paşa, see Nevzat Kaya, "Ragıp Mehmed Paşa and His Library," in *Theoretical Approaches to the Transmission and Edition of Oriental Manuscripts*, ed. Judith Pfeiffer and Manfred Kropp (Würzburg: Ergon Verlag, 2007), 185–93, with further references to earlier scholarship.

41. "Muhtemelen Müeyyed-zâde'nin kıymetli kitapları I. Selim'in Saray'daki özel kitaplığına alınmıştır" (İsmail E. Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 127).
42. "*merhûm Müeyyedzade'nün ne kadar kitâbları var ise cem' olunub ve satılmış var ise daḥi satılan yerlerden alınub bir yerde hıfz oluna deyü emr olunub [...]*" (TSMA, D. MS 9291 II.10b). For this and the following quotations, see İsmail E. Erünsal's *Osmanlı Vakıf Kütüphaneleri*, 127, where he published several of the passages previously. As Erünsal has pointed out, in a sense this document is part of the *Nachlaßregister* genre (*tereke/metrukât* or *muḥallefât defteri*) (İsmail E. Erünsal, "Türk Edebiyatı Tarihinin Arşiv Kaynakları 6: 909/1503 Tarihli Defter-i Kütüb," 203). For reflections on books listed in the *muḥallefât defterleri* of seventeenth- and eighteenth-century Ottoman bureaucrats, see Henning Sievert, "Verlorene Schätze – Bücher von Bürokraten in den *Muḥallefât*–Registern," in *Buchkultur im Nahen Osten des 17. und 18. Jahrhunderts*, ed. Tobias Heinzelmann and Henning Sievert (Bern: Peter Lang, 2010), 199–263.
43. *Deyn taleb ider eşhâsın nihâyeti yok. Hüdâvendigâr Hazretlerine mühimm olan işâret buyurulub mâ'adâsı satılıb dâyinlere verilse merhûm daḥi deynden ḥalâş olurdu* (TSMA, D. MS 9291 II.10b; İsmail E. Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 127).
44. This use of space as an indicator for the wealth of the writer or owner has a long tradition in Islamic manuscript culture and diplomatics alike, where a more generous use of space and paper usually signifies the higher standing and importance of the patron, addressee, and/or text involved.
45. E.g., "The [titles listed] below are those that were found in the hands of Hasan, son of the keeper of the sultan's fur robes, during the foregoing investigation" (*Bundan aşağısı teftiş-i sâbıkda Kürkçibaşı oğlu Hasan elinde zâhir olandır*, I.4a); "These mentioned [books] are the ones found in the possession of [Müeyyedzade's] son 'Abdülfettah" (*Oğlu 'Abdülfettah elinde zâhir olan bunlardır ki zikr olunur*, I.2b), etc.
46. The first to publish the Ottoman Turkish introduction of this document (in transliteration, alongside facsimiles of the five folios of MS Török F. 59 to which he had access at the time of publication in 1988) was İsmail Erünsal, who also undertook an analysis of the rules for cataloguing it (Erünsal, "959/1552 Tarihli Defter-i Kütüb," 193); when fuller evidence became available several years later, he revised his initial assessment of the date of the document in Erünsal, "909/1503 Tarihli Defter-i Kütüb," 205; Erünsal, *Osmanlı*

- Vakıf Kütüphaneleri*, 460–64 and 650–58 (Appendix XV). For a detailed discussion of the classification principles and rules, as well as an English translation of ‘Atufi’s Turkish preface, see Gülru Necipoğlu’s essay as well as Appendix IV at the end of this volume.
47. The difficulty of identifying ambiguous titles or descriptions of books applies to both inventories; for examples from Bayezid’s catalogue, see Maróth, “Library of Sultan Bayezid II,” 112.
 48. A broader comparison will have to await the publication of both catalogues with full indices.
 49. For a prior study of the section of Turkish literature in Bayezid’s inventory, including diwans, see İsmail Erünsal, “Türk Edebiyatı Tarihinin Arşiv Kaynakları 6: 909/1503 Tarihli Defter-i Kütüb.” For a study of the section on works in the area of historiography, see Maróth, “Library of Sultan Bayezid II,” 115–29; see also the relevant chapters in this volume.
 50. On Müeyyedzade as a poet, and for examples of his Turkish poetry, see e.g., Sehî Beg’s (d. 1548–49) *Heşt Bihişt (Sehî Beg Tezkiresi)*, ed. Günay Kut (Harvard University Printing Office, 1978), ff. 28a–29a (facsimile of MS Istanbul, Süleymaniye, Ayasofya 3544); trans. Rescher (1942), 17; ‘Aşık Çelebi (d. 1572)’s *Tezkere*, ed. G. M. Meredith-Owens, ff. 260a–262a; Latîfî’s (d. 1582) *Tezkire*, ed. Mustafa İsen, 85–86; trans. Rescher (1950), 189–190; 355–56; trans. Rıdvan Canım (2000), 383–84; Beyânî Mustafa Bin Carullah’s (d. 1597) *Tezkiretü’ş-şuarâ*, ed. İbrahim Kutluk (1997), 39 (Latin script); 77–78 (Arabic alphabet), and Kınalı-zade Hasan Çelebi’s (d. 1604), *Tezkiretü’ş-şuarâ*, ed. İbrahim Kutluk (Ankara: TTK, 1978), 1:318–25. Other examples of his poetry are found in a *majmû’a* (collective or composite volume) with Ottoman poetry that is held in the Bodleian Library in Oxford, MS Thurton etc. 23 (Ethé No. 2153), fol. 20b. It contains also poetry by Zati, Necati, Kemalpaşazade, and other poets of this circle. On Müeyyedzade as a patron of poets, see Muhsin Macit, “Hem Hami Hem Şair: Müeyyedzâde’ye Dair,” *Türk Edebiyatı* 377 (2005): 44–56. On Müeyyedzade’s qualities as a calligrapher, see Müstakimzade, *Tuhfe-i hattâtîn*, ed. Mustafa Koç (Istanbul: Klasik, 2011), 232–33 (with further references on p. 233); Ekrem Hakkı Ayverdi, *Fatih Devri Hattatları ve Hat Sanatı* (Istanbul: Istanbul Matbaası, 1953), 7–8.
 51. *TDVİA*, s.v. “Necâtî Bey,” by Bayram Ali Kaya; M. Tayyib Gökbilgin, “Müeyyedzâde,” 790; Mehmed Çavuşoğlu, *Necâtî Bey Divânı’nın Tahlili* (Istanbul: Milli Eğitim Basımevi, 1971), 64–65; Hammer, *Dichtkunst*, 162–78; *Necâtî Beg Divanı*, ed. Ali Nihat Tarlan (Ankara: Akçağ Yayınları, 1992), 19–20, 40 and his *qasîda* (a laudatory poem) “*der vaşf-ı ‘Abdurrahmân Efendi*” on pp. 55–57, immediately following Necati’s opening *qasîdas* on the Prophet Muhammad, ‘Ali b. Abi Talib, Mehmed II, and Bayezid II, and preceding a *qasîda* on Sultan Mahmud.
 52. *TDVİA*, s.v. “Kemalpaşazâde,” by Şerafettin Turan; Gökbilgin, “Müeyyedzâde.”
 53. *TDVİA*, s.v. “Zâtî,” by Vildan S. Coşkun; Gökbilgin, “Müeyyedzâde.”
 54. The questions of who collated diwans, and what constitutes a diwan, have been left to the side. If the inventory or catalogue calls something a *dîwân*, it is included in this study; if it says “*majmû’at abyât/ash’âr*,” “*ghazaliyyât*,” “*kulliyât*” (collective volume of poetry; love poems; collection of poetry), or the like, it has not been considered here. For a pertinent discussion of what constitutes an author, and who is involved in writing and arranging a composite text, see Bilal W. Orfali and Maurice A. Pomerantz, “Assembling an Author: On the Making of Hamadhānī’s *Maqāmāt*,” in L. Behzadi and J. Hämeen-Anttila, *Concepts of Authorship in Premodern Arabic Texts* (Bamberg: University of Bamberg Press, 2017), 107–29.
 55. İsmail E. Erünsal, “Türk Edebiyatı Tarihinin Arşiv Kaynakları 6: 909/1503 Tarihli Defter-i Kütüb.”
 56. MS Török F. 59, 203 {18}–267 {3}. This article was prepared based on a pdf of the original document in the Arabic script. If diwans appear elsewhere in Bayezid’s inventory, these are only included insofar as they were found via a search in the draft edition made accessible to the authors after submitting the present article to the editors. I thank Gülru Necipoğlu, who kindly sent me a copy of the catalogue typed in Roman characters after I had submitted the article; this search yielded only one additional diwan outside the section on diwans (*dawāwīn*), though the involvement of transliteration may mean that some diwans were overlooked in the search.
 57. This has already been pointed out by İsmail E. Erünsal, e.g., *Osmanlı Vakıf Kütüphaneleri*, 465.
 58. For instance, a different hand has added the entry *dîwân Abi Nuwās Abū Ṭawq* to the cluster of six diwans by al-Mutanabbî at the beginning of the section on Arabic diwans (204 {14}). The hand is clearly different from that of the main scribe, and the entry was also made in the wrong place, as the actual cluster of Abu Nuwas’s diwans follows on the next page (207 {3, 9, 11}). In this case the different hand, and the fact that it was added both in the “wrong” place and at the end of a distinct cluster of authors, followed by empty lines (i.e., a place *foreseen* for additions), are clear indicators of a later addition to the catalogue. The out-of-place, end-of-cluster position is also an indicator for later additions in other cases. An example of additions in the same hand (which are thus less immediately “visible”) are the entries on Abiwardi. Two copies of Abiwardi’s *Najdiyyāt* were added to Bayezid’s inventory at the end of a block of early Arabic diwans (207 {12}) before several blank lines (207 {13–17}) at the end of the cluster, but long after the initial Abiwardi had already been dealt with in a cluster of several copies of his *Najdiyyāt* and *Irāqīyyāt*, together with commentaries on the *Najdiyyāt*, two pages earlier (205 {12–15}). In other words, like Abu Nuwas’s diwan, these two copies of the *Najdiyyāt* were probably added after the initial draft had already been completed and copied. Given how much thought and care went into the establishment

of the cataloguing rules and the preparation of the inventory itself, the fact that both a first draft and then a "clean copy" were prepared in 908 and 909 respectively, and that an entire year passed between the two, it appears that further records were added to the inventory possibly even after 909, as new books and additional copies entered the library *after* the initial catalogue had been completed. Page 207 of the Arabic diwans (perhaps not coincidentally *at the end* of the section on Arabic diwans), and pages 245–48 of the Persian diwans (again *at the end* of the Persian diwan section) are similar cases. Here we find listed, in a seemingly random order, additional single, un-clustered copies of diwans of which other copies had already been recorded earlier; or diwans by more recent authors, such as Şeyh Vefa (d. 1491; 246 {1} and 248 {1–2}), Kashifi (d. 1504–5; 246 {17} and 247 {15}), Zati (d. 1546; 246 {11}), and possibly the sixteenth-century poet Khayali/Hayali (d. 1557; 248 {3}; for earlier authors with this *makhlāṣ* [pen name], including from Central Asia, see below), as well as Muniri (d. 1520–21). Also recorded here are a substantial number of copies of Navā'ī's (d. 1501) works at a relatively early date (four copies of his Chaghatay diwan in Arabic and one in Uyghur script, together with two copies of his *Khamṣa* in Uyghur script (cluster on p. 262 {6–8}). Since Gülrü Necipoğlu has established that, of the extant dated books listed in Bayezid II's palace library inventory and stamped with his seal at the current Topkapı Palace Museum Library, none is later than 1503–4 (personal note on May 28, 2016; see her Appendix III at the end of this volume), this is extraordinary proof of the early reception history of Chaghatay works in Ottoman circles.

59. For examples, see Erünsal, "Türk Edebiyatı Tarihinin Arşiv Kaynakları 6: 909/1503 Tarihli Defter-i Kütüb," 212.
60. This number is found twice on folio 1b of the inventory, with a clearly written 5 ("o" – an open circle, as opposed to the closed "full stop" of the zero, "·"). But since it is not 959 ("٩٥٩"), but rather 909 ("٩٠٩") that is supported by the numerical *abjad* date, scholars are in agreement that MS Török F. 59 was copied in 909.
61. On Ottoman poetic séances (*meclis*, pl. *mecâlis*) as a "focal point of Ottoman cultural and intellectual life," see Cornell H. Fleischer, *Bureaucrat and Intellectual in the Ottoman Empire: The Historian Mustafa Âli (1541–1600)* (Princeton: Princeton University Press, 1986), 22–23. See also Walter Andrews and M. Kalpaklı, "Toward a *Meclis*-Centered Reading of Ottoman Poetry," *Journal of Turkish Studies* 33 (2009): 309–18. For the literary *majlis* in the Timurid context, in which several of the poets whose diwans are discussed here participated, see Eva Maria Subtelny, "Arts and Politics in Early 16th Century Central Asia," *Central Asiatic Journal* 27, no. 1–2 (1983): 121–48, at 139–43.
62. *Dīwān Mutanabbī*, II/6a; II/7b; II/10a; II/10b; *Sharḥ Dīwān Mutanabbī*, II/4b; II/8a; II/9a; *Ash'ār Mutanabbī*, II/5a.
63. Where Müeyyedzade's inventory shows two copies of the *Dīwān-i Khāqānī* (II/4b; II/8a), Bayezid II's catalogue has two as well (245 {3, 17}). Where Müeyyedzade's inventory

lists three copies of the *Dīwān Ḥasan* (I/2a; II/6b; II/8a), there are five copies in Bayezid's catalogue (235 {8, 10, 18/3 copies}; 238 {3}; 239 {16}). Where Müeyyedzade's inventory shows four copies of al-Mutanabbī's *Dīwān* (II/6a; II/7b; II/10a; II/10b), Bayezid II's has six (204 {12–14}); and where Müeyyedzade's inventory lists three copies of the *Sharḥ Dīwān Mutanabbī* (II/4b; II/8a; II/9a), Bayezid II's has fourteen (!) (204 {15–17}; 205 {1–5}). The ratio is similar for Abū Tammām's *Ḥamāsa* (i.e., 2:6; two copies listed in Müeyyedzade's inventory versus six in Bayezid's), as well as for the *Sharḥ al-Ḥamāsa* (2:2), Abīwardī's *Trāqīyyāt* (1:2) and *Najdiyyāt* (1:7), the *Sharḥ Najdiyyāt Abīwardī* (1:4), the *Dīwān of Ḥāfiẓ* (2:18), the *Dīwān of Khayāl[ī]* (2:5), *Dīwān Khwājū* (2:3), *Dīwān Qāsim* (2:9), *Dīwān Salmān* (3:5), and the *Dīwān Zuhayr* (2:4). Of the diwan of Kamāl Isfahānī, Müeyyedzade's inventory shows two copies, whereas Bayezid's inventory records only one entry that says *Dīwān Kamāl Isfahānī*, strictly speaking, though there are an additional 14 copies of a *Dīwān Kamāl* listed in the vicinity of this record, and it is highly likely that several of these refer to the same author's diwan as well (as opposed to Kamāl Khujandī and other possible Kamāls). To avoid reduplication and to facilitate the retrieval of information about authors, such information is provided in the Table section of this article.

64. This possibly reflects Müeyyedzade's sojourn in Aleppo, where he went to deepen his knowledge of Arabic. He may have acquired several copies of this Levantine author's work there, or met fellow scholars who sent him books in later years.
65. In addition, there is a diwan in List I—*Dīwān Abharī* (?), *a'lā* (I/1b)—whose authorship is doubtful. This entry is difficult to read due to a water stain, and there is no known diwan of an author with this name.
66. Edward G. Browne, *A Literary History of Persia* (hereafter *LHP*), 4 vols. (Cambridge: Cambridge University Press, 1920), 3:459; 4:5, 83, 227–29; for further information on Hātifi, please see the references to Table 2.
67. A possible contender might be a manuscript that is held at the Met with the accession number 69.27; it is a copy of Hātifi's *Khusraw wa Shīrīn* that is dated to 904 (1498–99) and was penned and painted by Suzi, probably either in Istanbul or Amasya; see <http://www.metmuseum.org/art/collection/search/452037>, accessed July 19, 2016.
68. Eva Maria Subtelny, "Arts and Politics in Early 16th Century Central Asia," 124, 128–29; see also Maria Szuppe, "Circulation des lettrés et cercles littéraires. Entre Asie centrale, Iran et Inde du Nord (XVe–XVIIIe siècle)," *Annales. Histoire, Sciences Sociales* 59.5 (2004): 997–1018; Szuppe, "Lettrés, patrons, libraires. L'apport des recueils biographiques sur le rôle du livre en Asie centrale aux xvi^e et xvii^e siècles," in *Patrimoine manuscrit et vie intellectuelle de l'Asie centrale islamique*, ed. Ashirbek Muminov, Francis Richard, and Maria Szuppe (Aix-en-Provence: Edisud, 1999), 99–115. On the establishment and endowment of (albeit largely post-sixteenth century) private libraries in Istanbul, see

- Frédéric Hitzel, "Manuscripts, livres et culture livresque à Istanbul," *Revue des mondes musulmans et de la Méditerranée* [RMMM-Special number on Livres et lecture dans le monde ottoman] 87-88 (1999): 19–38. From sixteenth-century Istanbul alone, we know of some forty endowments for book collections and libraries. Despite the large number of books once possessed by Müeyyedzade, his collection was not among these endowed collections. For a survey study of these endowments, see Faruk Bilici, "Les bibliothèques vakıf-s à Istanbul au XVI^e siècle, prémices de grandes bibliothèques publiques," *Revue des mondes musulmans et de la Méditerranée* 87-88 (1999): 39–59.
69. This diwan is recorded in the Arabic section of Bayezid's inventory, though from Müeyyedzade's inventory it is not clear in which language it was composed. It refers possibly to the *Khāwar-nāma*, "a lengthy mathnawī dealing with the miracles and martyrdom of Ḥaḍrat 'Alī and other Shiite Imāms, composed by Muḥammad b. Hisāmu'd-dīn [...]" (d. 875/1470). This work is in imitation of Firdawsī's *Shāhnāma* and was completed in 830/1427" (*Catalogue of Persian Manuscripts* [Hyderabad: Salar Jung Museum and Library, 1967], vol. 4, no. 1554, p. 253). Alternatively, it might be a reference to the long *tarjī-band* by Kamāl al-Dīn Ḥasan (d. ca. 720/1320) that was written in praise of "Ḥaḍrat 'Alī" (*Catalogue of Persian Manuscripts*, vol. 4, no. 1369, p. 156).
 70. Khayālī Bukhārī's (d. ca. 1446) Persian *Dīvān-i Khayālī Bukhārā'ī* was published by Ahmad Karami in 1380 (2001 or 2002; Tehran: Mā).
 71. Personal communication, August 18, 2016.
 72. II/6b. On 'Ishqī/'Aşki, see *TDVİA*, s.v. "Aşki, Kadīm," by İsmail Ünver.
 73. "In his youth Kamāladdīn [Banā'ī]—it seems—opposed the Turcophile tendencies of 'A.[li] Şīr [Navā'ī] in disclaiming that poetry should, would, or could be at all possible in the tongue of these sons of 'Japhet.' However, in later years he made a full volte-face [...]. He could even cite to 'A.[li] Şīr [Navā'ī] some vv. [verses] of Luṭfī's (not known before to the mīr?) which were then taken as the *maṭla'* for one of his ḡg. [ghazals] by that illustrious Č.[aghatay] paragon and protagonist" (H. F. Hofman, *Turkish Literature: A Bio-Bibliographical Survey* [Utrecht: The Library University of the University of Utrecht, 1969], part I, vol. 2:215–23, at 220). On Banā'ī, see also Şafā, *Tārīkh-i adabiyāt dar Īrān*, 4:393–411; Z. Şafā, "Banā'ī Heravī, Kamāl-al-Dīn Şīr-'Alī (1453–1512)," *ELr* 3 (1989): 667–68; Maria Eva Subtelny, "Scenes from Literary Life in Timūrid Herāt," in *Logos Islamikos: studia islamica in honorem Georgii Michaelis Wickens*, ed. Roger Savory and Dionisius Agius (Toronto: Pontifical Institute of Mediaeval Studies, 1984), 137–55, at 147–48.
 74. Cornell Fleischer has pointed out that, in contrast to the calendars prepared for Mehmed II and Selim I respectively, those prepared for Bayezid II were composed in Persian, not Turkish. See Cornell H. Fleischer, "Ancient Wisdom and New Science," in *Falnama: The Book of Omens*, ed. Massumeh Farhad and Serpil Bağcı (London: Thames & Hudson, 2009), 232–43, at 235. Bayezid II may have had a similarly strong appreciation for Persian poetry. On Ottoman Persianate court culture during the late fifteenth and early sixteenth centuries, see Christopher Markiewicz, "The Crisis of Rule in Late Medieval Islam: A Study of Idrīs Bidlīsī (861–926/1457–1526) and Kingship at the Turn of the Sixteenth Century" (PhD diss., The University of Chicago, 2015).
 75. Certain exceptions are the *Dīvān Salmān* and the *Dīvān Ḥasan*, copies of which are found in both lists: one copy of the *Dīvān Salmān* is recorded in List II (II/9a), whereas two copies (one as part of a collective volume that also contained other diwans, which may have made this copy particularly interesting) were recorded in List I, one of which is marked as *a'lā* (*Jūng-i dīvān-hā awwaluhā Dīvān-i Salmān*, *a'lā*, 1/2a; *Dīvān Salmān*, 1/2b). Of the *Dīvān Ḥasan*, one copy is found in List I (*Dīvān Ḥasan*, *a'lā* (1 copy; 1/2a), and two further copies are found in List II (II/6b; II/8a), though it is possible that different authors may be referred to as "Ḥasan"; see below.
 76. According to Dawlatshah Samarqandi, "Khāwarī" is the *takhalluṣ* (pen name) of either Anwari (83) or Sudā'ī (421); *Tadhkirat al-Shu'arā'*, ed. Browne, 83, 421.
 77. This is possibly Muḥammad Shīrīn Maghribī (d. 1407–8), which would explain why the work is listed here separately from the diwan of *Ibn Khaṭīb al-Maghribī* (II/9b).
 78. The entry is clearly readable, though it is unclear which author this refers to. Possibly it is the fourteenth- or fifteenth-century poet Qutb-i 'Atiqi with the *makhlaṣ* "Qutb" (Şafā, *Tārīkh-i adabiyāt dar Īrān*, 3:1124).
 79. There are, of course, a number of individuals who may have been referred to with the honorific "Rukn al-Dīn." I am grateful to Giovanni Maria Martini for pointing out to me that this might be a reference to 'Ala' al-Dawla Simnani who wrote a diwan, who was for a short while the master of Kamal al-Dīn Kirmani, and who has an entry in Dawlatshah's *Tadhkirat al-shu'arā'*.
 80. On the *Dīvān* of Shaykh Yahya al-Sarsari (d. 1258), which apparently comprised 20 volumes, see Li Guo, ed., *Early Mamluk Syrian Historiography: Al-Yūnīnī's Dhayl Mir'āt al-zamān*, 2 vols. (Leiden: Brill, 1998), 1:68.
 81. Several authors are known by this honorific, including Bayazid Bistami (d. 848 [?]) and al-Sayyid al-Sharif al-Jurjani (d. 1413), though neither is known to have had a diwan to his name.
 82. For possible disambiguations, see below.
 83. These include the following: *Dīvān Wahbī/Vehbī* (II/1b); *Juz' thānī min dīvān Ridā'ī* (?) (II/3a); *Sharḥ Dīvān Sarwar/Server*/[*Servi*?] (?) (II/4a); *Dīvān Raḍī* (II/7b); *Dīvān Sārum Najd/Yazd* (?) (II/8b).
 84. Nizāmī is represented with one work, the *Khamṣa-yi Nizāmī*, *a'lā* (I/1b).
 85. *Muṣibat-nāma-yi Khwāja 'Aṭṭār* (II/3b); *Dīvān Shaykh 'Aṭṭār* (II/8a); also *Ḥāshīya-yi 'Aṭṭār*; *Mathnawī bar-kinār*, *a'lā* (I/2a).
 86. *Ḥāshīya-yi 'Aṭṭār*; *Mathnawī bar-kinār*, *a'lā* (I/2a).

87. *Kulliyât-i Shaykh Sa'dî, a'lâ* (I/1b); *Kulliyât-i Shaykh Sa'dî* (II/8a); *Gulistan-i Shaykh Sa'dî* (II/9a).
88. *Khamsa-yi Jâmî* (II/8a). In addition, the record shows a *Kitâb Shaykh Jâmî fi al-ash'âr, a'lâ* (I/2a).
89. Personal communication, August 18, 2016.
90. For the identification of this poet, see the relevant article in the current volume.
91. *Necatî Beg Divanı*, ed. Ali Nihat Tarlan (Ankara: Akçağ Yayınları, 1992), 19–20, 40, and a *qaşıda* "der vaşf-ı Abdurrahman Efendi," on 55–57, following immediately the *qaşidas* on the Prophet Muhammad, 'Ali b. Abi Talib, and the Ottoman sultans Mehmed II and Bayezid II.
92. Erünsal, "Türk Edebiyatı Tarihinin Arşiv Kaynakları 6: 909/1503 Tarihli Defter-i Kütüb," 215.
93. On Lutfi see János Eckmann, "Die Tschaghataische Literatur," in *Philologiae Turcicae Fundamenta* 2, ed. Louis Bazin, Jean Deny, et al. (Wiesbaden: Steiner, 1964), 304–402, at 308–14; *TDVİA*, s.v. "Lutfi," by Kemal Eraslan.
94. II/10a. On Banā'î, see n. 73. Since language is not consistently indicated in Müeyyedzade's catalogue, we cannot be absolutely sure, but given what we know about Banā'î as a poet, this diwan was most probably written in Persian, with at most a few Chaghatay poems or lines in it.
95. See also Barbara Kellner-Heinkele, "Nawā'î – eine Skizze zum historischen Hintergrund," in *Mîr 'Alî Shîr Nawā'î*, ed. Barbara Kellner-Heinkele and Sigrid Kleinmichel (Würzburg: Ergon, 2003), 1–13.
96. Hofman, *Turkish Literature*, 5173–75.
97. On "Gadā/Gadā'î," see Eckmann, "Tschaghataische Literatur," 324–25.
98. On Navā'î, see *ibid.*, 329–57.
99. "Katalogda ilk göze çarpan Doğu Türkçesiyle yazılmış eserlerin sayısıdır" and the subsequent discussion: Erünsal, "Türk Edebiyatı Tarihinin Arşiv Kaynakları 6: 909/1503 Tarihli Defter-i Kütüb," esp. 212–14.
100. Eckmann, "Tschaghataische Literatur," 349–50. Eckmann points out that even the ten percent of the poets who wrote in Turkish at the same time also composed poetry in Persian.
101. On Sakkaki, see *ibid.*, 306–8.
102. On Ata'î, see *ibid.*, 314–15.
103. On Yusuf Amiri, see *ibid.*, 319–21.
104. Lutfi is represented in Bayezid's inventory with a total of four copies of his diwan (261 {18}, 262 {11–13}), and Navā'î with a total of five copies (262 {6–7}). On the Chaghatay Turkish Literature of the time and the early Ottoman reception of 'Ali Shir Navā'î, see Eckmann ("Tschaghataische Literatur," 352), who discusses a copy of one of Navā'î's works found in Mehmed II's library, though the reference here is to an unidentified "catalogue" in the "Library of the Hungarian Academy of the Sciences." This most probably refers to Bayezid II's inventory, as no specific call number is mentioned. See also E. Birnbaum, who refers to the same manuscript (also without a call number, based on Eckmann), "The Ottomans and Chaghatay Literature," *Central Asiatic Journal* 20 (1976): 157–90, at 165; Mehmed Çavuşoğlu, "Kanunî Devrinin Sonuna Kadar Anadolu'da Nevâyî Tesiri Üzerine Notlar," in *Atsız Armağanı* (İstanbul: Ötüken, 1976), 75–90; Siegrid Kleinmichel, "Mîr 'Alî Şer Navā'î und Ahmed Paşa," *Archivum Ottomanicum* 17 (1999): 77–211; on Navā'î in particular, see Erünsal, "Türk Edebiyatı Tarihinin Arşiv Kaynakları 6: 909/1503 Tarihli Defter-i Kütüb," 213–14.
105. On Muhammad Parsa's (d. 1420) even earlier (endowed, and yet dispersed) library in Herat, see Ashirbek Muminov and Shevasil Ziyadov, "L'horizon intellectuel d'un érudit du xve siècle: Nouvelles découvertes sur la bibliothèque de Muhammad Pârsâ," in *Patrimoine manuscrit et vie intellectuelle de l'Asie centrale islamique*, ed. Ashirbek Muminov, Francis Richard, and Maria Szuppe (Aix-en-Provence: Editions), 1999, 77–98.
106. Eckmann, "Tschaghataische Literatur," 327.
107. Hasan Shah Harawi lived during the reigns of the Timurid rulers Shahrukh and Husayn Bayqara (Şafâ, *Tārîkh-i adabiyât dar Irân*, 4:378–82).
108. Müeyyedzade's library held three copies of the *Dîwân Ḥasan* (one *a'lâ*), I/2a; II/6b; II/8a. Alternatively, this may refer to the diwan of Amir Najm al-Din Hasan Sanjari, or Sizjî, better known as Ḥasan Dihlavî (d. 738/1338).
109. Şafâ, *Tārîkh-i adabiyât dar Irân*, 4:310–14, at 311.
110. *Encyclopaedia Iranica*, s.v. "Hâtefi," by Michele Bernardini.
111. 'Ali Shîr Navā'î, *Dîwân of the Aq Qoyunlu Admirers* (1471), ed. Aftandil Erkinov (Tokyo: Research Institute for Languages and Cultures of Asia and Africa, 2015), 11–26.
112. Maria Szuppe has pointed out that Mutribi Samarqandi (fl. 1627) reports in his *Nuskhā-yi zibā-yi Jahāngir* (The Beautiful Copy of Jahangir) that by the end of the fifteenth century, copyists were installed in a part of the Bukharan bazaar that was known as the "Bâzâr-i Shîrâzî." This included a certain "Ma'sûmî Bukhârî, fils de Sharaf al-Dîn 'Alî Vazîr, qui travaillait dans le «bâzâr-i Shîrâzî» à Boukhara *intra-muros*" (Maria Szuppe, "Lettres, patrons, libraires. L'apport des recueils biographiques sur le rôle du livre en Asie centrale aux xvi^e et xvii^e siècles," in *Patrimoine manuscrit et vie intellectuelle de l'Asie centrale islamique*, 99–115, at 109). This most probably refers to Sharaf al-Din 'Ali, who is listed among the Tajik scribes (*nivisandagān-i tâzîk*) of the Timurid Sultan Maḥmūd b. Abū Sa'îd (d. 1495) in the *Mu'izz al-ansāb*, facsimile ed. *Istoriū Kazakhstana v persidskikh istochnikakh* / [otvetstvennyi redaktor, A.K. Muminov], Almaty: "Daik-Press," 2006, fol. 158a. In other words, he was active in the Shîrâzî Bazaar of Bukhara as a scribe precisely during the period when Müeyyedzade and Bayezid II were actively acquiring books from the East.
113. On the popularity of Navā'î's diwan among Ottoman readers at this time, see Erünsal, "Türk Edebiyatı Tarihinin Arşiv Kaynakları 6: 909/1503 Tarihli Defter-i Kütüb," 213–14, who gives the example of a 940/1533 sale of two copies of Navā'î's diwan in the market.
114. On this circle of poets, which additionally included Khwaja Rustam Khuryani and Tahir Abiwardi, see Dawlatshah Samarqandi, *Tadhkirat al-Shu'arā'*, 361.

115. For other contenders for this name, please see the notes attached to Table 1 below.
116. In at least one case, such a literary work was also illustrated (*Khamsa-yi Hâtîfî, muşavvar, a'lâ*, I/1b). The artistic quality of the illuminations, calligraphy, and bindings of copies once owned by Müeyyedzade is something that historians of material culture will have to judge once such copies have been identified.
117. However, as far as I have been able to see, the palace library inventory does not appear to hold a copy of this work.
118. It is striking that the first fifteen times that Rumi's name is mentioned, it is followed by the prayer formula, whereas in the last few cases (in places that appear to be later additions), the prayer formula is absent. As suggested by Hatice Aynur's systematic survey of diwan anthologies produced in the Turkish Republic from Köprülü 1931 to Şentürk 1999, in placing Rumi (and Sultan Veled) at the beginning of the diwan section, several modern authors of Ottoman diwan poetry anthologies have followed a similar pattern as Bayezid's inventory. These include Fuad Köprülü's (d. 1966) *Eski Şairlerimiz: Divan Edebiyatı Antolojisi* (1931) and Sadık Deniz's *Bugünün Dilîyle Dîvân Şiiri* (1972), which begin with Rumi; as well as Necmettin Halil Onan (1940; 1989; 1998) and İsmet Zeki Eyüboğlu (1994), whose works start with Sultan Veled. See Hatice Aynur, "Cumhuriyet Dönemi Divan Şiiri Antolojileri," in *Eski Türk Edebiyatına Modern Yaklaşımlar II*, ed. Hatice Aynur et al. (Istanbul: Turkuaz, 2008), 57–109.
119. *Mathnavî, jild* (II/8a). In addition, the inventory lists a *Ḥaṣhiya-yi 'Aṭṭār, Mathnavî bar-kinār, a'lâ* (I/2a), a *Sharḥ Mathnavî* (II/4b), and a *jild khāmis Mathnavî* (II/10a).
120. The only work by Sultan Veled that is recorded in Müeyyedzade's inventory is his *Vaṣīyat-nāma-yi Sultān Valad* (II/6b).
121. "Sufi works appear to have been of central importance in the library. They are represented by 48 pages as opposed to the 24 pages devoted to the holy tradition" (Maróth, "Library of Sultan Bayezid II," 114–15). As for diwan literature, we must take into account that here the division by disciplines does not apply. As 'Atufi specifies in his introductory statement on the rules of the inventory's organization, any discipline could be found in the section on diwans, as long as a work was written in rhyme rather than prose (8 {7–18}).
122. Not coincidentally the compiler 'Atufi, who was appointed to the task of preparing the present inventory, was a specialist in medicine whose own works also feature in the inventory. See the relevant contributions to this volume.
123. The pagination above follows Maróth, "Library of Sultan Bayezid II." To complete the picture, it should be pointed out that the entirety of the Qur'an commentaries and *qirā'āt* covers 11 pages (18–28).
124. While Bayezid inherited a significant portion of these books from earlier Ottoman rulers, particularly his father, he also made the deliberate choice to maintain and expand the royal library.
125. H. F. Hofman on the common perception among twentieth-century scholars on Ottoman poetry before Ahmed Paşa Bursalı (d. 1496) in comparison to the state of contemporaneous Chaghatay Turkish literature (H. F. Hofman, *Turkish Literature*, 2:58). Bursalı and the poems he wrote (for Bayezid) in the style of the Herat circle have been perceived as a turning point after which Ottoman literature came into its own, taking inspiration from literati from the East, notably Navā'ī. Hofman possibly quotes either Köprülü or Gibb, though I have not been able to ascertain the exact reference. On Bursalı, see *TDVİA*, s.v. "Ahmed Paşa, Bursalı," by Günay Kut.
126. The biographical dictionaries of poets include, but are not restricted to, the *Tezkires* of Sehi Beg (d. 1548–49), 'Aşık Çelebi (d. 1572), Latifi (d. 1582), Beyani (d. 1597), and Kınalızade Hasan Çelebi (d. 1604), which were consulted for this article; see above, note 52.
127. Müeyyedzade's *fatwās* remain unpublished to date, despite their arguably massive impact, as attested by the more than 100 copies in various libraries worldwide, many of which are heavily annotated.
128. On Abiwardi, see C. Hillenbrand, "al-Abīwardī," *Encyclopedia of Arabic Literature* (henceforth *EAL*), 2 vols. (London: Routledge, 1998), 1:22. Bayezid's inventory lists Abiwardi under the name "Abū Muẓaffar," whereas Müeyyedzade's catalogue lists him, without exception, under the name "Abīwardī" (which is often spelled across two lines, or with the *yā* of *Abī* written separately from the next word: *Abī Wardī*).
129. J. S. Meisami, "Abū Tammām," *EAL*, 1:47–49.
130. *Encyclopaedia Iranica*, s.v. "Hafez (Ḥāfeẓ), Šams-al-Din Moḥammad, of Shiraz," by Ehsan Yarshater, Baha'-al-Din Khorramshahi, J. T. P. de Bruijn, et al. Intended here could also be the so-called "Ḥāfiz-ī 'Acem" (d. 1551), though this would probably have been specified, and his death date is rather late for his diwan to be included in the inventory; see *TDVİA*, s.v. "Ḥāfiz-ī Acem (ö. 958/1551)," by Ömer Faruk Akün.
131. This could be the diwan of anyone with the name or *makhlāṣ* "Ḥasan," and is difficult to identify candidates and then consider these in relation to the "Ḥasan"s listed in Bayezid's inventory. One of the most promising candidates appears to be Ḥasan Dihlawī (d. ca. 1326), which is supported by Bayezid's inventory, where the title *Dīwān Ḥasan* is found in the immediate vicinity of two copies of the *Dīwān Amīr Ḥasan Dihlavī* (239 {16–17}). On Amir Hasan Dihlawī, see Browne, *LHP*, 3:108; Dawlatshah Samarqandī, *Tadhkirat al-Shu'arā'*, 347–49. A further possible candidate is Ḥasan Shāh Haravī, who is said to have lived for 105 years and to have died in 1499. He lived during the reigns of the Timurid rulers Shahrukh and Husayn Bayqara and was part of the same circles as some of the other poets listed here, in particular the circle of Mir 'Alī Shir Navā'ī (Şafā, *Tārīkh-i adabiyāt dar Īrān*, 4:378–82). A copy of a *Dīwān Ḥasan* is also found in List I (see below).

132. *Encyclopaedia Iranica*, s.v. "Kamāl-al-Dīn Eṣfahānī," by David Durand-Guédy; *EL2*, s.v. "Kamāl al-Dīn Ismā'īl," by A. H. Zarrinkoob; Browne, *LHP*, 2:540–42. Dawlatshah Samarqandi, *Tadhkirat al-Shu'arā'*, 148–54; Michael Glünz, *Die panegyrische Qasida bei Kamāl ud-dīn Ismā'īl aus Isfahan: eine Studie zur persischen Lobdichtung um den Beginn des 7./13. Jahrhunderts* (Beirut: Steiner, 1993).
133. In the Persian section of MS Török F. 59 there are several entries listed as *Dīwān Kamāl* (236 {19}–237 {1}; 238 {3 (2x), 4 (1x), 5 (3x), 6 (2x), 7 (2x: *Dīwān Kamāl* and *Dīwān Kamāl al-Dīn Ismā'īl*), 17 (1x), 18 (1x)}; 239 {1 (1x)}), i.e., there are altogether 14 copies of Persian diwans ascribed to "Kamāl."
134. *TDVİA*, s.v. "Hâkânî-i Şîrvânî, Efdalüddîn Bedîl (İbrâhîm) b. Alî," by Tahsin Yazıcı; Dawlatshah Samarqandi, *Tadhkirat al-Shu'arā'*, 78–83; Browne, *LHP*, 2:391–99; *Encyclopaedia Iranica*, s.v. "Kāqānî Şervānî ii. Works," by Anna Livia Beelaert.
135. *Dīwān Khayāl* (I/2a): the author's name clearly reads "Khayāl" (not "Khayālī"). Meant here is most probably Khayālī Bukhārī (Şafā, *Tārīkh-i adabiyāt dar Īrān*, 4:456–57; Browne, *LHP*, 3:352). For his diwan, see *Dīwān-i Khayālī Bukhārī* (wr. approximately 1446), ed. Aḥmad Karamī (Tehran: Mā, 1380 [2001 or 2002]). An identification of these entries with the Ottoman poet Khayālī (d. 1557) is only possible if we assume that these were later additions to Bayezid's and Müeyyedzade's inventories, which is unlikely. As for another possible candidate, the Ottoman poet Ḥayālī-i Evvel (d. 1524), no diwan of his is known to have survived. See *TDVİA*, s.v. "Hayālī-i Evvel (ö. 931/1524)," by Sabahattin Küçük; *TDVİA*, s.v. "Hayālī Bey (ö. 964/1556–57)," by Cemal Kurnaz. A third possibility is the person who translated Khwājū Kirmānī's *Rawḍat al-anwār* (wr. 743/beg. June 6, 1342) into Ottoman Turkish, who completed this translation in 853 (ca. February 24, 1449) under the *makhlaṣ* "Khayālī." As the editor Fatih Köksal has established, this third Khayālī cannot be identical with Ḥayālī-i Evvel for several reasons, and must be considered a hitherto unknown poet of the fifteenth century who also used the *makhlaṣ* "Khayālī" and became the first poet in an entire tradition of *Makhzan al-asrār* interpretations ("Mahzenu'l-esrār geleneği"), as Kirmani's *Rawḍat al-anwār*, in turn, was a *naẓīra* of Nizami Ganjawi's (d. 1214?) *Makhzan al-asrār* (Derviş Hayālī, *Ravzatü'l-envār*, ed. M. Fatih Köksal [Istanbul: Kitabevi, 2003], vii–ix, 3–13. Since Müeyyedzade also owned two copies of Khwaju's *dīwān* and a full copy of Nizami's *Khamṣa* (of which the *Makhzan al-asrār* is the first part), a diwan by this Khayālī would have fit the profile of Müeyyedzade's library. Given the state of our knowledge about the poetry of this period, it is possible that such a diwan will be identified in the future; however, at this point no such diwan is known. The most likely candidate appears thus to be the fifteenth-century Khayālī-yi Bukhārī, who indeed has a diwan to his name. Only the study of copies with actual owner's marks, as far as they are available, and copying dates (which are rarely given for diwans unless they were copied by a known calligrapher) will permit a conclusive identification of this author.
136. *EL2*, s.v. "Khwādju, Kamāl al-Dīn Abū al-'Aṭā' Maḥmūd b. 'Alī," by Iraj Dehghan; *Tadhkirat al-Shu'arā'*, 249–53.
137. J. S. Meisami, "al-Mutanabbī," *EAL*, 2:558–60.
138. The exact phrasing of the entries is *Dīwān-i Sayyid Qāsim wa dīwān-i Ḥāfiẓ bar kinār, a'lā* (I/2a) and *Dīwān Qāsim Anwarī* [sic] (II/8a). "Qāsim" is the *takhalluṣ* sometimes used by Qasim-i Anwar. On the latter, see *EL*, s.v. "Kāsim-i Anwār," by V. F. Büchner; *EL*, s.v. "Kāsim-i Anwār," by R. M. Savory; Dawlatshah Samarqandi, *Tadhkirat al-Shu'arā'*, ed. Browne, 346–52; Browne, *LHP*, 3:352, 438 (death date 1431–32); Şafā, *Tārīkh-i adabiyāt dar Īrān*, 252–64; Hofman, *Turkish Literature*, 5:41–48. For a full range of possible poets with the *makhlaṣ* "Qāsim" writing in Chaghatay Turkish, see Hofman, *Turkish Literature*, 5:35–36, who faced the problem of having too many Qasims to choose from (calling them "tantalizing tempters" of identification). Another possible poet who may be identified with this *makhlaṣ* is described in *İstanbul Kitaplıkları Türkçe Yazma Divanlar Kataloğu*, Kütüphaneler Müdürlüğü, Tasnif Komisyonu, vol. 1 (Istanbul: Millî Eğitim Basımevi: 1947), 67, entry "Kasım." Only one copy of his diwan is listed as İstanbul, İstanbul Üniversitesi Kütüphanesi T. MS 759/4, ff. 116–35. Nothing is known about the poet's exact birth and death dates, but from two lines in one of his *qasidas* (in Turkish), it can be inferred that he must have lived during the reigns of Murad II and Mehmed II, i.e., that he was alive during the fifteenth century, though it seems overall far more likely that the Qasim in question is Qasim-i Anwar.
139. This is probably Salman Sawajī (d. 1376); Dawlatshah Samarqandi, *Tadhkirat al-Shu'arā'*, ed. Browne, 82–83.
140. Without further information, it would be misleading to identify the name listed in Müeyyedzade's inventory with specific authors. In neither of its occurrences in this document is this name vocalized. It could thus be read either Ṣāḥir or Ṣuhayr, and it may refer to several poets called Ṣuhayr, including the famous Ṣuhayr b. Abī Sulmā al-Muzanī (fl. sixth century, d. 696), of whose diwan copies are listed in Bayezid's inventory (205 {11–12, 19}). Alternatively, if read as Ṣāḥir, this author could be identified as Ṣāḥir al-Dīn Faryābī, whose diwan "was collected shortly after his death by Ṣhams-i Sudjasi (d. 1205–6)" (*EL2*, s.v., "Ṣāḥir-i Faryābī," by Cl. Huart-[J.T.P. de Bruijn]). See also Dawlatshah Samarqandi, *Tadhkirat al-Shu'arā'*, 109–13.
141. On the diwan ascribed to 'Alī b. Abi Talib, which C. E. Bosworth has described as "a *dīwān* of mediocre poetry, whose authenticity is very suspect," see C. E. Bosworth, "'Alī b. Abī Ṭālib," *EAL* 1:78. There is possibly a second copy of this diwan in a collective volume that is recorded in List II, *Dīwān Khayāl* [sic] *wa Dīwān 'Alī wa Dīwān Shāhī* (I/2a).
142. This may equally refer to the poet Alī, i.e., Muẓaffar al-Dīn 'Alī (d. 1516), one of the students of Dawānī's in Shiraz at the time of Müeyyedzade who relocated to Istanbul after 1500 and was appointed to various high teaching positions there

- thanks to Müeyyedzade's intervention. He was both known as a poet and a scholar in the areas of geometry, astronomy, and logic (Cemâl Kurnaz, *Anadolu'da Orta Asyalı Şairler* [Ankara: Yargıcı Matbaası, 1997], 62).
143. Şafâ, *Tārīkh-i adabiyât dar Īrân*, 4:456; Dawlatshah Samarqandī, *Tadhkirat al-Shu'arâ*, 352–56. Together with Katibi, whose *Kulliyât* are also listed in Müeyyedzade's inventory (*Kulliyât Kâtibî, a'lâ*, 1/2a), Bisati belonged to the circle of poets whom Mir 'Ali Shir Navâ'i enumerated in the first part of his *Majâlis al-naḡā'is*, which is dedicated to poets whose lives overlapped with Navâ'i's youth, but whom he never had a chance to meet. See Browne, *LHP*, 3:438.
 144. One of these is possibly contained in Ms. Istanbul Ayasofya 3946/12, ff. 191b–195a, a collective volume of diwans that was copied in 26 Dhul-Qa'da 879/April 3, 1475 and bears Bayezid's stamp in the front and back.
 145. *Dīwān-i Sayyid Qāsim wa dīwān-i Ḥāfiẓ bar kinār, a'lâ* (1/2a {7}).
 146. Two further copies of this diwan are found in List II: II/6b; II/8a. On possible identifications of this "Ḥasan," see above.
 147. Meant here is probably the poet and maternal nephew of Jami, 'Abd Allah Hatifi of Kharjird (near Jam) in Khurasan (Browne, *LHP*, 3:459; 4:25, 83, 227–29). On the *ta'rīkh* of "*shah-i shā'irān*" for his death date (927), when Hatifi died at the age of ninety-four or even as a centenary, see Şafâ, *Tārīkh-i adabiyât dar Īrân*, 4:438–47, with further references.
 148. On the author see above, Table 1.
 149. Şafâ, *Tārīkh-i adabiyât dar Īrân*, 4:286–93 (who gives the death date of 840 based on the *ta'rīkh "tammāt"*). Dawlatshah Samarqandī gives as his death date 829/November 13, 1425 (*Tadhkirat al-Shu'arâ*, ed. Browne, 357–66, at 361 {19–20}) and is followed by Browne, *LHP*, 3:352. Dawlatshah also states that 'Ismat was from a family of illustrious scholars whose lineage went back to Ja'far b. Abi Talib, and that he attended the same poetry sessions as Bisāṭī Samarqandī, Khayālī Bukhārī, Pīr Barandaq (?), Khwāja Rustam Khūryānī, and Ṭāhir Abiwardī. For several copies of this diwan, see the *Catalogue of Persian Manuscripts* (Hyderabad: Salar Jung Museum and Library, 1967), vol. 4, nos. 1535–37, pp. 242–43, where 'Ismat's death date is given as 840/1437.
 150. It is difficult to disambiguate this name. Bayezid's catalogue lists three types of diwan by a Nāṣir: *Nāṣir-i Khusraw* (246 {5–6}, 247 {4}), *Nāṣir-i Bukhārī* (247 {6}, 248 {4}), and simply *Dīwān Nāṣir* (240 {19}, 247 {15}). On *Nāṣir-i Khusraw*, see Browne, *LHP*, 2:218–46; Dawlatshah Samarqandī, *Tadhkirat al-Shu'arâ*, ed. Browne, 61–64. On Nāṣir-i Bukhārī, see Dawlatshah Samarqandī, *Tadhkirat al-Shu'arâ*, ed. Browne, 270–72.
 151. Since the author is referred to as Sayyid Qāsim (*Dīwān-i Sayyid Qāsim wa dīwān-i Ḥāfiẓ bar kinār, a'lâ* [II/Ila {7}]), we may identify the author as Qasim al-Anwar. A further copy of this diwan is found in List II (II/2b {8}).
 152. On the author see above, Table 1.
 153. Browne, *LHP*, 3:498, 552; Şafâ, *Tārīkh-i adabiyât dar Īrân*, 4:310–14. A copy of this diwan is also found in the Universitäts- und Landesbibliothek Bonn, So 192. Seven copies alone are held in the Salar Jung Library in Hyderabad; *Catalogue of Persian Manuscripts*, Hyderabad: Salar Jung Museum and Library, 1967, vol. 4, nos. 1545–51, pp. 247–51. Alternatively, this may refer to Amīr Shāhī.
 154. On the author see above, Table 1. A record of a third copy is found at II/9a.

BOOKS ON EXEGESIS (*TAFSĪR*) AND QUR'ANIC READINGS (*QIRĀ'ĀT*): INSPIRATION, INTELLECT, AND THE INTERPRETATION OF SCRIPTURE IN POST-CLASSICAL ISLAM

Al-Husayn b. 'Abdallah al-Tibi (d. 1342), a scholar of great learning and a man of mystical inclination, entered a highly exclusive club of Muslims on the night that he saw the Prophet Muhammad in a dream. According to al-Tibi's terse account, the Prophet offered him a bowl of milk and pointed at him. Realizing the Prophet's silent command, al-Tibi dutifully drank from the bowl and handed it back to the Prophet. Then, in a rather unexpected reversal, the Prophet himself proceeded to drink from the bowl. The meaning of this dream was clear to al-Tibi: He was going to receive divine support for the project he had underway, which was to write a monumental exposition of Jar Allah al-Zamakhshari's (d. 1144) celebrated Qur'an commentary, *al-Kashshāf 'an ḥaqā'iq ghawāmiḍ al-tanzīl wa-'uyūn al-aqāwīl fī wujūh al-ta'wīl* (Unveiler of the Truth of the Intricate Parts of Revelation and the Prominent Opinions concerning Aspects of Interpretation). To al-Tibi, the milk provided by the Prophet represented nothing short of heavenly inspiration for the exposition he was going to write. Al-Tibi thus daringly named his work "Revelations from the Unseen in Uncovering the Veil of Doubt" (*Futūḥ al-ghayb fī al-kashf 'an qinā' al-rayb*).¹

Al-Tibi's dream sets into sharp relief two intertwined hallmarks of post-classical Islamic history, both of which feature heavily in this essay. The first is the absolute centrality of al-Zamakhshari's *al-Kashshāf* to the field of Qur'anic exegesis. Al-Zamakhshari was a Mu'tazili Hanafi from Khwarazm, famous for his mastery of Arabic rhetoric and linguistics. Deploying his expertise and incisive intellect, al-Zamakhshari produced a Qur'an commentary that became a watershed in the history of the Muslim exegetical tradition. Notwithstanding this work's occasional advocacy of Mu'tazili positions, by the

fifteenth century it had become a chief textbook in madrasas and private study circles across the Islamic world, mediating the divine Word for Muslim scholars and laity alike. Al-Zamakhshari himself had anticipated the significance and success of *al-Kashshāf*, considering it "worthy of being used to invoke heavenly blessings and to pray for rain in a year of drought."² Similarly, to the many who studied and cherished *al-Kashshāf*, its status as the portal to revelation was a sign of its celestial credentials.³ How fitting, then, that al-Zamakhshari's epithet was "God's neighbor" (*jār Allāh*) when his own words served as constant companions to God's Speech.

The emergence of *al-Kashshāf* as a classic leads us to the second hallmark of the post-classical period, which is the predominance of annotations (*ḥawāshī*, *ta'līqāt*) and commentaries (*shurūḥ*) in the literary output of Muslim scholars. Because of their vital pedagogic function, classical texts such as *al-Kashshāf* were in constant need of exposition in various formats and contexts. Moreover, post-classical scholars spent much of their creative energy providing new solutions to the problems identified in the classics, and carrying the discussions of these classics in new directions. As the chief embodiments of the expository and analytical efforts of Muslim scholars, annotations represent "the most important genre of post-classical Islamic scholarship."⁴ In the case of al-Tibi, the task of unpacking and developing al-Zamakhshari's dense Qur'anic discussions was so critical that it warranted divine intervention. Ultimately, and without denying the Qur'an's distinction, revelation was thus an open-ended process, with the Qur'an being made understandable and relevant through successive layers of divinely inspired exposition. This, perhaps, was the symbolic message of the Prophet's consumption of

the milk: he and al-Tibi—and by extension al-Zamakhshari—were in fellowship as conveyors and interpreters of God's message.

The two hallmarks encapsulated in the account of al-Tibi's dream are abundantly on display in the inventory of the palace library of Sultan Bayezid II (r. 1481–1512). In an exceptional and unintended boon to modern scholars of Islamic history, the Ottoman emperor asked his librarian, Khayr al-Din al-ʿAtufi (d. 1541), to draw up a comprehensive register of all the books in the private imperial library. Compiled in 909 (1503–4), ʿAtufi's register provides us with a remarkably wide window onto Ottoman scholarly interests at the turn of the sixteenth century.⁵ This chapter investigates how the imperial library's *tafsīr* (Qur'anic exegesis) and *qirāʾāt* (variant readings) holdings corroborate, challenge, modify, and enrich our understanding of Ottoman scholarship. Specifically, this investigation shows the tenuousness of a widely held assumption in the modern academic study of *tafsīr*, namely, that the Islamic exegetical tradition was a largely conservative enterprise, according a central place to the received exegetical views of early Muslims at the expense of independent interpretation of the Qur'anic text. While such an exegetical approach had been championed by some—such as the controversial Ḥanbali scholar Taqī al-Dīn Ibn Taymiyya (d. 1328) based in Mamluk Damascus and Cairo—it was for the most part a marginal perspective in the premodern period that experienced a resurgence only in the past two centuries. The modern sway of this approach, often known as tradition-based exegesis (*al-tafsīr bi-l-maʾthūr*), has led many academics to believe that it has always been the dominant strategy in interpreting the Qur'an. However, the following analysis shows that in the Ottoman realm, as well in as the larger Persianate world stretching from the Balkans to the Bay of Bengal, a region “that was home to the absolute demographic majority of Muslims on the planet,”⁶ the prevailing mode of engagement with scripture was analytical, an approach known as *al-tafsīr bi-l-raʾy* (opinion-based exegesis).

The imperial library inventory testifies to the centrality of analytical exegesis to Ottoman scholarship, for it shows the unique importance of al-Zamakhshari's commentary as well as those of Fakhr al-Dīn al-Rāzī (d. 1209)

and Nasir al-Dīn al-Baydāwī (d. ca. 1300), the latter two being followers of the Ashʿari theological school. Like al-Zamakhshari, these two scholars were not primarily concerned with early exegetical traditions in their commentaries on the Qur'an. Indeed, in a strong upset to the conservative conceptualization of *tafsīr* by some academics, it seems that Ottoman scholars dedicated more attention to several of the glosses of al-Zamakhshari's *al-Kashshāf* than to major tradition-based works such as the commentaries of Ibn Jarir al-Tabarī (d. 923) and Ibn Kathīr (d. 1373). Furthermore, the library's holdings suggest that Sufi exegesis had a powerful appeal among Ottoman scholars. In particular, it appears that the early sixteenth-century Ottoman elite generally cherished the ideas of Ibn al-ʿArabī (d. 1240) and his prolific disciples and followers, studying as well as writing works that applied these ideas in the field of exegesis (as will be discussed below). In addition to exploring such insights, we shall cross paths with al-Tibi again and examine his previously underappreciated contribution to Qur'anic exegesis.

THE INVENTORY OF THE IMPERIAL LIBRARY

The holdings of the imperial library represent what was preserved, purchased, produced, commissioned, taught, and read in the wider Ottoman realm at the turn of the sixteenth century. Even though these works belonged specifically to the Ottoman court, the close links between the Ottoman learned class and political elite meant that the inventory also provides a snapshot of broader Ottoman scholarly interests and activities at the time. In addition to the contents of the inventory, the structure of this document is useful in gauging how the existing literary landscape was conceptualized. While my aim is to discuss the *tafsīr* works of the library, two broad observations about the entire inventory are in order. First, apart from two short prologues (one in Turkish, one in Arabic; see Appendix IV and V at the end of this volume), the catalogue can be divided into two parts: the first part is dedicated to religious works, and the second, to “secular” and scientific texts.⁷ The precedence of religious writings signals the preferential treatment that was afforded, at least in theory, to the sacred

disciplines. Indeed, according to the Arabic prologue, what motivated Sultan Bayezid II to have this register prepared was his special regard for “the books of the religious sciences.”⁸ In a similar manner, the first part of the inventory begins with the most revered holdings, namely, manuscripts of the Qur'an, followed immediately by writings on *tafsīr* and *qirā'āt*, which are in turn followed by texts on hadith, prayers, and other subjects. Second only to scripture itself, the placement of works on exegesis and Qur'anic variant readings signals their prominence among the various branches of religious learning.

Works on Exegesis and Variant Readings

Broad outline

The section on *tafsīr* and *qirā'āt* contains ninety-four titles in the former subcategory and twenty-five in the latter.⁹ While there is exactly one copy for each of the *qirā'āt* works, many works of *tafsīr* are represented by two or more copies, the inclusion of which brings the total number of *tafsīr* manuscripts to 173.¹⁰ This disparity in favor of exegetical works reflects the concerns and interests of Muslim scholarship at large, which dedicated vastly more resources to scriptural exegesis than to Qur'anic readings.¹¹ Because of the relative primacy of *tafsīr* works in our inventory and in Muslim scholarship more broadly, this paper shall focus on the exegetical holdings of the imperial library and their implications for Ottoman and Islamic intellectual life, while commenting more briefly on works of variant readings.

Exegetical holdings

The inventory of *tafsīr* books can be divided into two parts of almost exactly the same length. The first half, encompassing eighty-six manuscripts, is dominated by only three commentaries:

Fakhr al-Din al-Razi's (d. 1209) enormous *Mafātīḥ al-ghayb* (Keys to the Unseen), also known as *al-Tafsīr al-kabīr* (The Grand Commentary);

Al-Zamakhshari's (d. 1144) *al-Kashshāf*, along with several of its commentaries, glosses, and superglosses;

Nasir al-Din al-Baydawi's (d. ca. 1300) *Anwār al-tanzīl wa-asrār al-ta'wīl* (Lights of Revelation and Secrets of Interpretation), together with a number of glosses.

The prominence of the works of these three authors is consistent with what we know from other sources about Ottoman exegetical interests.¹² The second half of the *tafsīr* subsection has a more complex structure. The beginning contains a number of Sufi commentaries—such as Rashid al-Din al-Maybudi's (d. after 1126) *Kashf al-asrār wa-'uddat al-abrār* (Unveiling of Secrets and Provision for the Righteous)—while exegetical treatises dominate the latter two-thirds. Unlike conventional commentaries that interpret the Qur'an from beginning to end, these treatises focus on a specific subset of the text (sometimes one sura or even a single verse) or discuss a particular set of exegetical questions. In addition to Sufi *tafsīr* and various treatises, the second half of the catalogue is interspersed with some ten commentaries that appear in no strict chronological or thematic order. In particular, some of the oldest *tafsīr* holdings of the collection, such as Abu Bakr al-Maturidi's (d. ca. 944) *Ta'wīlāt ahl al-sunna* (Interpretations of the Adherents of Sunna), belong to this group. The relatively insignificant position of these early works in the catalogue suggests that, unlike modern academics, Ottoman scholars were not particularly fascinated with the earliest phase of the *tafsīr* tradition.

The exegetical works listed in the second half of the *tafsīr* section exhibit the breadth and diversity of Ottoman scholarly interests in the field of exegesis. However, in addition to being arranged rather haphazardly, most of these titles are represented by one copy, or a small number of copies. The contrasts in structure and frequency between the two halves of the *tafsīr* section suggest that the works listed in the first portion were of greater import to Ottoman scholarship. As such, the contents and structure of the first half of the *tafsīr* section deserve special attention. After a detailed examination of the first half, I shall examine the commentaries listed in the second half and make a number of observations about the listed exegetical treatises.

The first half: *Mafātīḥ al-ghayb*

The list of *tafsīr* works begins with the commentary of Fakhr al-Din al-Razi and proceeds to the works of al-Zamakhshari and al-Baydawi. One can think of at least two reasons why the cataloguer ignored chronological order by placing al-Razi's (d. 1209) *Mafātīḥ al-ghayb* be-

fore al-Zamakhshari's (d. 1144) *al-Kashshāf*. First, the decision might reflect unease with the Mu'tazili leanings of *al-Kashshāf*. Specifically, al-Zamakhshari considered the Qur'an to have been created in time (*ḥādith*), and in fact attempted to demonstrate this theory in the very first lines of *al-Kashshāf*.¹³ Because this idea was anathema to the theological commitments of the Sunni Ottomans, opening the *tafsīr* section with *al-Kashshāf* might have been taken as a slight to orthodox confessional sensibilities.

Second, the placing of *Mafātīḥ al-ghayb* at the beginning likely signifies the particular esteem it enjoyed among Ottoman scholars. There was little doubt concerning al-Zamakhshari's brilliance: he was widely recognized for his exceptional mastery of the Arabic language, his penetrating intellect, and his incisive and cogent expositions. But al-Razi had swum much farther and deeper than al-Zamakhshari into the Qur'anic ocean, showing the inexhaustible and all-encompassing character of revelation. In writing *Mafātīḥ al-ghayb*, al-Razi had planted a massive exegetical tree that bore abundant philological, historical, legal, theological, and philosophical fruit.¹⁴ Thus, notwithstanding his debt to al-Zamakhshari, the commentary of "the pride of religion" (Fakhr al-Din) was much more capacious than that of "the pride of Khwarazm" (Fakhr Khwārazm).¹⁵ Al-Razi had produced a virtual *summa* of Islamic thought and the consummate landmark of classical exegesis, so it was only fitting that his *Grand Commentary* should inaugurate the imperial library's *tafsīr* section.

The first half: *Al-Kashshāf*

For all the symbolic prominence of *The Grand Commentary*, it was al-Zamakhshari's *al-Kashshāf* that directly and indirectly dominated the exegetical assets of the imperial library. The hegemony of *al-Kashshāf* is most conspicuous in the first half of the *tafsīr* section. While there are only seven copies of al-Razi's commentary,¹⁶ *al-Kashshāf* is represented by thirteen copies,¹⁷ its glosses and commentaries taking up an additional thirty-six of the manuscripts.¹⁸ There are also eighteen copies of al-Baydawi's *Anwār al-tanzīl*,¹⁹ followed by nine manuscripts containing its glosses and commentaries.²⁰ However, rather than threatening *al-Kashshāf*'s influence, the proliferation of *Anwār al-tanzīl* is a testament to the

enduring success of *al-Kashshāf*. This is because much of al-Baydawi's exegetical discussions are recapitulations, rewordings, and clarifications of al-Zamakhshari's interpretations in abridged form.²¹ Even though al-Baydawi does not acknowledge this fact in his commentary, scholars of *tafsīr* were fully aware of his debt to al-Zamakhshari. In the introduction to his gloss on *Anwār al-tanzīl*, the late-Mamluk scholar Jalal al-Din al-Suyuti (d. 1505) opens his praise of this work by dubbing it "the most preeminent of [*al-Kashshāf*'s] abridgements" (*sayyid al-mukhtaṣarāt minhu*).²²

The prominence accorded to *al-Kashshāf* reflects its status as the most widely studied Qur'an commentary at the time. Interest in *al-Kashshāf* had been strong since at least the late thirteenth century,²³ and had reached new heights in the fourteenth century.²⁴ By the fifteenth century, the work was a must-read for scholars of *tafsīr* and a primary textbook in private circles and madrasas across the Islamic world,²⁵ a status it retained long thereafter.²⁶ *Al-Kashshāf* had become so integral to the study of *tafsīr* that, even after the Safavid conquest of Iran and mass conversions to Twelver Shi'ism, Iranian scholars continued using al-Zamakhshari's commentary as an essential textbook.²⁷ In the Ottoman context, a measure of the popularity of *al-Kashshāf* around the time of our inventory's preparation can be gleaned from Taşköprüzade's (d. 1561) famous biographical dictionary of Ottoman scholars. It was worthy of mention if a scholar had written *al-Kashshāf* with his own hands.²⁸ Some scholars memorized the work,²⁹ while many wrote annotations on it, or, more frequently, annotations on some of its famous glosses.³⁰ Studying al-Zamakhshari's commentary represented an important milestone in the journey to scholarly perfection.³¹

The inventory of the imperial library not only confirms the importance of *al-Kashshāf* but is also helpful in probing the specific ways in which Ottoman scholars engaged with the work at the turn of the sixteenth century. Because of *al-Kashshāf*'s outsized role in the field of exegesis, it is worth discussing the specifics of this scholarly engagement in some detail. Similar to the *tafsīr* section as a whole, the list of texts pertaining to *al-Kashshāf* begins with many copies of three well-known glosses and concludes with a number of treatises. The first of these glosses, represented in five copies, is

Kashf al-Kashshāf (Unveiling *al-Kashshāf*), written by Siraj al-Din 'Umar b. 'Abd al-Rahman al-Bihbahani al-Farisi (d. 1344). Al-Farisi was not a particularly famous scholar, but his *Kashf al-Kashshāf* was an instant hit, apparently becoming a madrasa textbook soon after its composition, at least in his native province of Fars.³² It was evidently studied by the crown jewel of the Persian poetic tradition, Hafiz of Shiraz (d. ca. 1390), who refers to *Kashf al-Kashshāf* twice in his lyric poems.³³ The other two glosses on *al-Kashshāf* were penned by scholars of much wider renown than al-Farisi. The library catalogue lists six copies of Sa'd al-Din al-Taftazani's (d. 1390) gloss and ten copies of al-Sayyid al-Sharif al-Jurjani's (1413). The latter's annotations are more extensive than al-Taftazani's, whose discussions are in turn more thorough than al-Farisi's. However, the three works are of comparable length because of their progressively shrinking coverage. Al-Farisi discusses the entirety of *al-Kashshāf*; al-Taftazani covers the first ten suras, as well as suras *Ṣād* [38] to *al-Fath* [48];³⁴ while al-Jurjani stops at the twenty-fifth verse of sura *al-Baqara* [2].³⁵

The library's holdings on *al-Kashshāf* are thus dominated by works produced in a seven-decade span, namely from 1342 (when *Kashf al-Kashshāf* was composed) to 1413 (the terminus ante quem for al-Jurjani's gloss). However, the library also owned a partial copy of the earlier work of al-Husayn b. 'Abdallah al-Tibi (d. 1342), whose dream of the Prophet was previously mentioned.³⁶ In spite of, or perhaps because of, its enormous length, al-Tibi's *Futūḥ al-ghayb* was well-known and highly valued in learned circles. To begin with, *Futūḥ al-ghayb* was an important source for the glosses of al-Farisi, al-Taftazani, and al-Jurjani.³⁷ Moreover, it is the only work on *al-Kashshāf* to be mentioned by Ibn Khaldun (d. 1406), who happily reports that al-Tibi skillfully counters al-Zamakhshari's Mu'tazili interpretations.³⁸ Writing shortly before the compilation of the imperial library's inventory, the Egyptian scholar al-Suyuti describes *Futūḥ al-ghayb* as the "most eminent" (*ajall*) of *al-Kashshāf*'s glosses.³⁹ In the Ottoman context, a *firmān* of Sultan Süleyman issued in 1565 enshrined al-Tibi's work as an integral part of the curriculum of advanced imperial madrasas.⁴⁰

In addition to these earlier works, the library contained two glosses on *al-Kashshāf* by more recent Otto-

man scholars, namely, Molla Muhyi al-Din Khatibzade (Hatibzade) (d. 1495) and Molla 'Abd al-Karim (d. ca. 1494–95).⁴¹ The inventory lists several other writings on *al-Kashshāf*. Some are simply described as "Gloss on *al-Kashshāf*," which is impossible to identify, and in fact might represent copies of the works we have already mentioned.⁴² Finally, three manuscripts seem to have dealt with the glosses of *al-Kashshāf*, a literary genre necessitated by the confusing proliferation of works on this commentary.⁴³ Unfortunately, the available bibliographical sources do not allow us to identify any of these writings.

A noteworthy feature of the library's earlier holdings on *al-Kashshāf* is that none were composed in the Islamic West. Walid Saleh has identified an eastern ("Persianate") zone and a western ("Egyptian") zone for the reception of *al-Kashshāf*, at least as presented by al-Suyuti at the end of the fifteenth century.⁴⁴ Using this bifurcation, it is clear that the imperial library's four earlier glosses on *al-Kashshāf* all originated in the eastern sphere. The multiple copies of *Kashf al-Kashshāf*, a work that emerged and circulated in "deep Persia" (Fars) and was apparently unknown to al-Suyuti, indicate that Ottoman scholarship at the time was intimately connected with the Persianate intellectual complex. Conversely, the library had no copies of the famous Egyptian glosses of *al-Kashshāf*—such as the works of Ibn al-Munayyir (d. 1284), Ibn Bint al-'Iraqi (d. 1304), and al-Samin al-Halabi, which further corroborates the eastern affiliation of Ottoman exegetical scholarship.⁴⁵ Of course, there was some interaction between the two zones, as is evident in al-Tibi's repeated quotations from and engagements with the glosses of Ibn al-Munayyir and Ibn Bint al-'Iraqi.⁴⁶ However, it is still telling that this Egyptian influence was apparently mediated to the Ottoman realm through works composed in the East, even though many Ottoman scholars were educated in Mamluk Egypt. The same reliance on eastern works is evident in the *firmān* of Sultan Süleyman, according to which advanced imperial madrasas had to use four glosses of *al-Kashshāf*, all of them composed by Persian(ate) scholars (Qutb al-Din al-Shirazi [d. 1311], al-Tibi, al-Taftazani, and al-Jarbardī [d. 1345–46]).⁴⁷

The catalogue's list of works on *al-Kashshāf* shows that Ottoman scholars approached this classical text

through a number of earlier post-classical writings. Among those who produced authoritative glosses on the earlier classics, al-Taftazani and al-Jurjani have a unique position. Like their patron, Timur (d. 1405), who conquered much of the Islamic world (including parts of the earlier Ottoman empire), al-Taftazani and al-Jurjani came to dominate the Islamic intellectual landscape, especially in the vast region that Shahab Ahmed has named “the Balkans-to-Bengal complex.”⁴⁸ These versatile scholars were expositors par excellence, writing masterful glosses and commentaries on classics from a variety of disciplines. Apart from his celebrated commentary on the creed (*‘aqīda*) of Najm al-Din al-Nasafi (d. 1142), al-Taftazani wrote on foundational texts of logic, jurisprudence, rhetoric, exegesis, and a few other subjects.⁴⁹ Al-Jurjani, a younger contemporary of al-Taftazani’s, was similarly a polymath and wrote on an even broader set of subjects, in some cases responding to and critiquing the works of al-Taftazani.⁵⁰ Owing to a combination of the brilliance and learning of the authors and favorable historical circumstances, the writings of al-Taftazani and al-Jurjani became integral parts of madrasa curricula throughout the Islamic world down to the modern period.⁵¹

Al-Taftazani and al-Jurjani were thus the twin gates to the world of the classics, the bridges that connected the ancients (*mutaqaddimūn*) to the moderns (*muta’akhhirūn*).⁵² However, their writings are not mere echo chambers for the discussions of earlier scholars. Both men had powerful analytical interests, often advancing the discussions of the classics in original ways.⁵³ Thanks to the popularity of their writings and the influence of their students and descendants, many of the issues that they raised became directions for future debate and research. Subsequent generations of scholars carried out such research by writing annotations on the glosses of al-Taftazani and al-Jurjani.⁵⁴ From biographical sources and extant manuscripts, we know of several Ottoman scholars who wrote on the glosses of al-Taftazani and al-Jurjani.⁵⁵ Indeed, both of the inventory’s identifiably Ottoman works on *al-Kashshāf* seem to be annotations on al-Jurjani’s gloss rather than firsthand commentaries on *al-Kashshāf*.⁵⁶ The analytical, if incomplete, glosses of al-Taftazani and al-Jurjani are thus fundamentally different from the

other popular work listed in the catalogue, al-Farisi’s *Kashf al-Kashshāf*, which covers the entire Qur’an and is primarily an expository text (and therefore did not generate annotations of its own).

The list of works on *al-Kashshāf* depicts Ottoman scholars as the third generation (*ṭabaqa*) of the exegetical tradition, contributing to Qur’anic scholarship through engagement with the glosses of *al-Kashshāf*. A similar picture emerges from a few other segments of the catalogue, which also feature the works of al-Taftazani and al-Jurjani. For instance, the section on legal theory (*uṣūl al-fiqh*) begins with a classic, ‘Ubaydallah b. Mas‘ūd al-Bukhari’s (d. after 1346) *al-Tawḍīḥ fī ḥall ghawāmiḍ al-Tanqīḥ* (Exposition in Solving the Difficulties of *al-Tanqīḥ*). The cataloguer then lists copies of a commentary on *al-Tawḍīḥ* by al-Taftazani, titled *al-Taṭwīḥ fī sharḥ al-Tawḍīḥ* (Illumination: Commentary on *al-Tawḍīḥ*) before mentioning a number of annotations on this commentary, including some by Ottoman scholars.⁵⁷ In the theology section, we encounter *al-Mawāqif* (Stations), a classic by ‘Adud al-Din al-Ijī (d. 1355). The inventory then lists copies of al-Jurjani’s commentary on *al-Mawāqif*, followed by annotations on this commentary, at least six of which were written by Ottoman scholars.⁵⁸ In some cases the literary cascade is even longer. One of the most widely-read classics of legal theory (*uṣūl al-fiqh*) was Ibn al-Hajib’s (d. 1249) *al-Mukhtaṣar* (The Abridgement), based on a more extensive work by the same author.⁵⁹ The catalogue lists *al-Mukhtaṣar*, its commentary by al-Ijī, the glosses of al-Taftazani and al-Jurjani on al-Ijī’s commentary, and finally a number of annotations on these two glosses, including at least two by Ottoman scholars.⁶⁰ The literary hierarchy embedded in the catalogue thus not only highlights the importance of classics but presents al-Taftazani and al-Jurjani as pivotal expositors, masters, and mediators of the classical tradition. The influence of these two giants is also evident in the hierarchy of Ottoman madrasas, some grades of which were named after works of al-Taftazani and al-Jurjani that were foci of study at those grades.⁶¹

The first half: *Anwār al-tanzīl*

If *al-Kashshāf* may be regarded as the sun of the exegetical sky, then *Anwār* was its moon, albeit one that would

come to eclipse its source in time. In the fifteenth century, *Anwār* became the subject of intense scholarly attention and spawned annotations and commentaries of its own.⁶² The inventory of the imperial library, which lists eighteen copies of *Anwār* as well as several of its glosses, testifies to this work's currency in the early sixteenth century. (The very compiler of this document, 'Atufi, wrote glosses on both *al-Kashshāf* and *Anwār*.)⁶³ Indeed, the sixteenth century witnessed "an explosion of glosses and super-commentaries on *Anwār al-tanzīl*" by Ottoman scholars.⁶⁴ While *al-Kashshāf* remained a cornerstone of studying and writing *tafsīr* in Ottoman domains, "al-Baydāwī's *tafsīr* came, by the eighteenth century, to outstrip that of al-Zamakhsharī in circulation and standing."⁶⁵ *Anwār*'s precipitous rise to prominence was likely aided by its concision and conformity with Sunni orthodoxy.⁶⁶

Although the inventory presents *Anwār* as approaching *al-Kashshāf* in significance, the make-up of the listed works on *al-Kashshāf* is radically different from that of glosses on *Anwār*. Not only are there fewer texts on the latter, but also all of its identifiable glosses are penned by Ottoman scholars. In fact, two of the listed works are dedicated to Bayezid II, their authors being Muhammad b. Mustafa b. al-Hajj Hasan ("Hajji Hasan-zade," d. 1505) and Idris al-Bidlisi (d. 1520).⁶⁷ The library contained a third gloss by another Ottoman scholar, namely, Yusuf b. Junayd al-Toqati ("Akhi Çelebi," d. ca. 1496). Finally, the inventory lists a gloss on al-Baydāwī's comments on the second and third suras, which was also likely composed in the Ottoman realm.⁶⁸ Three additional manuscripts are described simply as "Gloss on the Commentary of al-Qadi [al-Baydāwī],"⁶⁹ but it is not clear if these were different from the identifiable glosses listed in the inventory.

The apparent absence of earlier glosses on *Anwār* reflects the fact that, in the first 150 years after its composition, only a handful of scholars had written annotations on the work.⁷⁰ This is perhaps a result of its late adoption as a textbook and its dependency on *al-Kashshāf*. Given that much of *Anwār* consists of abridged reworkings of *al-Kashshāf*, the latter's already available glosses could do double duty as elucidators of *Anwār* as well. However, as mentioned above, *Anwār* was gaining in prestige and popularity in the fifteenth century, and as such gave

birth to its own tradition of commentaries and glosses. This situation presented an opportunity for Ottoman scholars to escape the hegemony of post-formative glosses and engage directly with a classic in the making.⁷¹ Although they could hardly neglect the legacy of *al-Kashshāf*,⁷² *Anwār* was a comparatively clean slate on which they could directly write their annotations. As already noted, two of the catalogue's works on *Anwār* are dedicated to Bayezid II, which suggests that the Ottoman court was interested in the burgeoning industry of *Anwār* marginalia.⁷³ Judging by the number of extant works on *Anwār* from the Ottoman realm, we can safely assume that courtly patronage of such glosses continued beyond Bayezid II. This direct engagement with the classical tradition reflects the increasing self-confidence of Ottoman scholars, whose academic standing in turn reflects the growing might and means of the Ottoman empire. One of the results of direct Ottoman engagement with *Anwār* is apparent in the aforementioned *firmān* of Sultan Süleyman, which stipulates a list of *tafsīr* works to be used in imperial madrasas. This list includes *al-Kashshāf* together with four of its glosses, all of which are written by scholars from the Islamic East. However, for *Anwār* the *firmān* mentions only one gloss, this time from an Anatolian scholar, Hamza b. Mahmud al-Qaramani (d. 1468).⁷⁴ This imperial edict, issued almost half a century after the compilation of 'Atufi's inventory, shows that Ottoman scholars had managed to make a name for themselves in the highly prolific and competitive enterprise of glossing.

The second half: Sufi *tafsīr*

The second half of the *tafsīr* section appears to be less organized than the first. It is therefore more convenient to address its holdings thematically. The strong presence of Sufi works is one of the conspicuous features of this second half. Specifically, the imperial library had at least four complete Sufi *tafsīrs* and two commentaries on sura *al-Fātiha*:

Laṭā'if al-ishārāt (Subtleties of Allusions), by Abu al-Qasim al-Qushayri (d. 1072), in one copy (no. 142);⁷⁵

Kashf al-asrār wa-'uddat al-abrār (Unveiling of Secrets and Provision for the Righteous), by Rashid al-Din al-Maybudi (d. after 1126), in three copies (nos. 92–94);

Al-Ta'wīlāt al-Najmīyya (Najmid Interpretations), attributed to Najm al-Dīn al-Kubra (d. 1221), in one copy (no. 171); *Kitāb fī asrār al-Fātiḥa* (On the Secrets of *al-Fātiḥa*), by Sadr al-Dīn al-Qunawi (d. 1274), in three copies (nos. 163–65);

Ta'wīlāt al-Qur'ān (Interpretations of the Qur'an), by 'Abd al-Razzaq al-Kashani (d. ca. 1329), in four copies (nos. 91, 100, 115, and 170);

Ayn al-a'yān (The Noblest of Nobles), a commentary on *al-Fātiḥa* by Shams al-Dīn al-Fanari (d. 1431), in two copies (nos. 128, 173).

In addition to these works, the library contained Abu Hamid al-Ghazali's (d. 1111) *Jawāhir al-Qur'ān wa-durruhu* (The Jewels and Pearls of the Qur'an), which is not so much an exegesis of the Qur'anic text as the deduction of specific lessons from certain passages. Finally, judging from their descriptions, a number of other, unidentified works in the library may also have been written from a Sufi perspective.⁷⁶

This remarkable collection of Sufi exegetical writings suggests that, notwithstanding objections from certain quarters, Ottoman elites generally valued Sufi modes of engagement with scripture. The six Sufi commentaries listed above are major works written by eminent Sufi masters, which may explain their inclusion in the palace library. The earliest exegete in the list above, al-Qushayri, was a learned scholar who played a crucial role in synthesizing and reorienting the intellectual legacy of earlier Sufi masters.⁷⁷ In his famed *al-Risāla* (The Treatise), which is one of the most widely read handbooks on Sufi terminology and lore, al-Qushayri sought to legitimize Sufism as a distinct yet decidedly law-abiding discourse and way of life.⁷⁸ In a similar vein, his commentary *Laṭā'if al-ishārāt* presents Sufi interpretation as supplementing, not subverting, conventional exegesis.⁷⁹ Perhaps owing to al-Qushayri's erudition and balanced approach, his *Laṭā'if al-ishārāt* left a deep impression on many later Sufi *tafsīrs*, including the two commentaries that follow it on the list above.⁸⁰ The first of these commentaries, al-Maybudi's *Kashf al-asrār*, is "possibly the earliest extant example of a complete Persian Qur'ān commentary with a substantial mystical content."⁸¹ In this voluminous Sufi *tafsīr*, al-Maybudi combines a broad spectrum of exoteric and esoteric interpretive approaches, from a defense of Hanbali traditionalism to a delineation of love mysticism.⁸² The third commentary

on the list also has an eminent pedigree, as it is ascribed to the eponymous founder of the Kubrawi order, Najm al-Dīn al-Kubra (d. 1221).⁸³ Being the only *tafsīr* written by a Kubrawi scholar,⁸⁴ this commentary combines exoteric and esoteric exegesis and appears to have been quite popular in Central Asia, Iran, and Anatolia.⁸⁵

The next three commentaries on the list represent a later Sufi discourse dominated by the ideas of Ibn al-'Arabi (d. 1240), the prolific and consequential mystic known among his followers as *al-shaykh al-akbar* (The Great Master). In the Saljuq era, Anatolia had served as the crucible for the development of a particular formulation of Ibn al-'Arabi's thought that eventually spread far and wide across the Islamic world. The primary force behind this development was Sadr al-Dīn al-Qunawi, the stepson and foremost disciple of Ibn al-'Arabi and the author of the first post-Akbarian commentary on our list. Active in the Anatolian city of Konya (as his *nisba* suggests), al-Qunawi was a philosophically minded systematizer who left an indelible mark on the way in which later Sufis approached the Great Master's legacy.⁸⁶ Al-Qunawi's commentary on *al-Fātiḥa* is his "longest and perhaps most important work."⁸⁷ In the Ottoman realm, he was particularly revered by Sultan Mehmed II, who commissioned four works on al-Qunawi's *Miftāḥ al-ghayb* and a commentary on his *al-Nuṣūṣ*.⁸⁸ The author of the next work on our list,⁸⁹ 'Abd al-Razzaq al-Kashani, was "[a]rguably the most important scholarly figure for the transfer of Ṣadr al-Dīn al-Qūnawī's legacy, and thus that of Ibn 'Arabī, from Saljūqīd into Ottoman times."⁹⁰ Al-Kashani himself played a crucial role in the further development of al-Qunawi's theoretically sophisticated approach to the writings and ideas of Ibn al-'Arabi.⁹¹ Al-Kashani's exegetical method in *Ta'wīlāt* consists mainly of "the *application* to the Koran of a coherent metaphysical system" that draws heavily on the works of Ibn al-'Arabi.⁹² It is a sign of the prestige accorded to *Ta'wīlāt* that it was often attributed to Ibn al-'Arabi himself.⁹³ Thanks in large part to the efforts of al-Qunawi and al-Kashani, their approach became the predominant mode of engagement with Ibn al-'Arabi's legacy in the Balkans-to-Bengal complex.⁹⁴ The last commentary from our list, al-Fanari's exegesis of *al-Fātiḥa*, is a key witness to the vitality of this intellectual tradition in Ottoman Anatolia

Table 1

Author	Title	Copies
al-Maturidi (d. 944)	<i>Ta'wīlāt ahl al-sunna</i>	2 (nos. 118–19)
Abu al-Layth al-Samarqandi (d. ca. 983)	<i>Tafsīr al-Qur'ān</i>	1 (no. 121)
al-Wahidi (d. 1076)	<i>al-Wajīz</i>	2 (nos. 96–97)
al-Baghawi (d. 1122)	<i>Ma'ālim al-tanzīl</i>	2 (nos. 60–61)
Najm al-Din al-Nasafi (d. 1142)	<i>al-Taysīr</i>	4 (nos. 89–90, 98–99)
al-'Ukbari (d. 1219)	<i>al-Tibyān fī i'rāb al-Qur'ān</i>	1 (no. 150)
al-Qurtubi (d. 1272)	<i>al-Jāmi' li-ahkām al-Qur'ān</i>	2 (nos. 58–59)
al-Kawashi (d. 1281)	<i>Tabṣīrat al-mutadhakkir</i>	3 (nos. 110–12)
Hafiz al-Din al-Nasafi (d. 1310)	<i>Madārik al-tanzīl</i>	3 (nos. 105–7)
Abu al-Thana' al-Isfahani (d. 1349)	<i>Anwār al-ḥaqā'iq</i>	1 (no. 141)
al-Siwasi (d. 1455)	<i>Uyūn al-tafsīr</i>	2 (nos. 113–14)
al-Gurani (d. 1488)	<i>Ghāyat al-āmānī</i>	2 (nos. 108–9)

and Rumelia. Al-Fanari, who was a highly accomplished scholar and often considered the first Grand Mufti of the Ottoman empire, belonged to the same school of Akbarian thought as al-Qunawi and al-Kashani.⁹⁵ Al-Fanari's commentary on *al-Fātiḥa* bears ample witness to his attachment to this intellectual lineage.⁹⁶ Moreover, al-Fanari and his influential students and descendants played an important role in the preservation and consolidation of this school of thought in the Ottoman empire.⁹⁷ Partly as a result of their efforts, Ibn al-'Arabi came to be "regarded as the patron saint of the [Ottoman] Empire."⁹⁸ Thus, the holdings of the imperial library suggest that the Ottoman establishment viewed Sufi exegesis in general, and Akbarian Sufism (i.e., the school of Ibn al-'Arabi known as Shaykh al-Akbar, the greatest shaykh) in particular, as legitimate and valuable approaches to the study of scripture. To be sure, some scholars challenged and criticized the dominance of Ibn al-'Arabi's school of thought, a discourse that came to the fore after the Ottoman conquest of Mamluk Arab lands.⁹⁹ However, the influence of Ibn al-'Arabi's thought persisted long after the conquests of Sultan Selim I (r. 1512–20). A sign of this persistence is the fact that his son, Sultan Süleyman, decreed al-Kashani's *Ta'wīlāt* to be incorporated as an essential ingredient, and indeed as the only Sufi commentary, in the curriculum of imperial madrasas of the highest level.¹⁰⁰ In so doing, this sultan promoted a vision of Islamic learning in

which the ideas of Ibn al-'Arabi were not only acceptable but indispensable for a full comprehension of the divine Word.¹⁰¹

The second half: Remaining commentaries

Apart from Sufi commentaries and the works of al-Zamakhshari, al-Razi, and al-Baydawi, the palace library contained twelve full Qur'an commentaries, which are listed in the chronologically sorted table 1.

A key feature of this list is the prominence of authors from the Islamic Far East, namely, Transoxiana. Being a bastion of Hanafism and the birthplace of Maturidism, Transoxiana exported many of its intellectual products westward to Anatolia and Rumelia, where Hanafi Maturidi Turkic tribes had settled after emigrating from Central Asia.¹⁰² The author of the earliest Qur'an commentary in the imperial library is none other than Abu Mansur al-Maturidi, whose *nisba* was retrospectively conferred on the school of theology that had emerged within the ranks of Samarqand's Hanafi scholars.¹⁰³ The library contained two partial copies of al-Maturidi's massive *Ta'wīlāt ahl al-sunna* (Interpretations of the Adherents of Sunna), along with a partial copy of the commentary on *Ta'wīlāt* by 'Ala' al-Din al-Samarqandi (d. ca. 1145), another Hanafi Maturidi scholar from Transoxiana.¹⁰⁴ The second-earliest Qur'an commentary in the library was written by Abu al-Layth al-Samarqandi (d. ca. 983), a prominent Hanafi jurist with traditionalist

leanings¹⁰⁵ and a highly revered figure in Anatolia-Rumelia.¹⁰⁶ Al-Samarqandi's commentary appears to have been quite popular in the fifteenth century, when it was translated into Turkish a number of times.¹⁰⁷ Indeed, al-Samarqandi's *tafsīr* is the main source for the imperial library's only Turkish commentary, *Jawāhir al-aṣḍāf* (Pearls within Shells), a work commissioned by the Jandarid ruler Isfendiyar Bey (d. 1439–40) in the early fifteenth century.¹⁰⁸ In addition to the works of al-Maturidi and al-Samarqandi, the inventory refers to four manuscripts titled *al-Taysīr fī al-tafsīr*, which is probably the commentary of Najm al-Din 'Umar al-Nasafi, the eponymous author of the celebrated creed known as *'Aqīdat al-Nasafiyya*. Najm al-Din's *al-Taysīr* was also among the twelve *tafsīr* works that Sultan Süleyman stipulated should be used in advanced imperial madrasas.¹⁰⁹ The last Transoxianan scholar from the above table also hailed from the town of Nasaf. Living in the post-*Kashshāf* era, Hafiz al-Din al-Nasafi wrote *Madārik al-tanzīl* by drawing heavily from *al-Kashshāf* and *Anwār al-tanzīl* as well as al-Maturidi's *Ta'wīlāt* and its commentary by 'Ala' al-Din al-Samarqandi.¹¹⁰ Both al-Nasafis were, needless to say, Hanafi Maturidi scholars. Incidentally, al-Zamakhshari was also a Hanafi scholar from the eastern region of Khwarazm, a fact that may have reinforced his popularity in the Ottoman realm.

Three other scholars on the list came from eastern and central Iran. *Al-Wajīz* was authored by al-Wahidi, a Shafi'i Ash'ari scholar from the city of Nishapur, who studied there under the famed commentator Abu Ishaq al-Tha'labi (d. 1035). The smallest of al-Wahidi's three works, *al-Wajīz*, represents a genre that may be called "pocket commentaries," i.e., texts that provide only the most essential explanatory information on the Qur'an and can therefore fit in a small volume. According to Walid Saleh, *al-Wajīz* "held sway for more than six centuries as the most accessible short commentary on the Qur'an, until the appearance of *Tafsīr al-Jalālayn* in the 10th/16th century, which was itself based on *al-Wajīz*."¹¹¹ The imperial library also contained a Persian translation of *al-Wajīz*, a fact that suggests *al-Wajīz* was of interest to a non-scholarly audience without a deep knowledge of classical Arabic. Another commentary on the list, *Ma'ālim al-tanzīl*, was produced by al-Baghawi, also a Shafi'i Ash'ari scholar from Khurasan. Al-Baghawi's

Ma'ālim is primarily a work of tradition-based exegesis, for whose traditions he is largely dependent on al-Tha'labi's *al-Kashf wa-l-bayān*.¹¹² Another Shafi'i Ash'ari author, Abu al-Thana' al-Isfahani, came from the central Iranian city of Isfahan, where he lived most of his life, although he spent his last twenty-four years in Damascus and Cairo.¹¹³ (Incidentally, one of al-Isfahani's students in Cairo was Akmal al-Din al-Babarti,¹¹⁴ who later taught the Ottoman al-Fanari during his stay in Cairo.)¹¹⁵ In his commentary, al-Isfahani draws heavily on *al-Kashshāf* and *Mafātīḥ al-ghayb*.¹¹⁶ His commentary is also included in the aforementioned edict of Sultan Süleyman.¹¹⁷

The list also features two Iraqi scholars. The first is al-'Ukbārī, a Hanbali scholar who resided in Baghdad and was famous for his grammatical works, including his *al-Tibyān fī i'rāb al-Qur'ān*. The second Iraqi scholar is Muwaffaq al-Din al-Kawashi, an ascetic who spent most of his life in Mosul.¹¹⁸ Al-Kawashi wrote two commentaries, and it is not clear which one was owned by the palace library. His first commentary is titled *Tabṣīrat al-mutadhakkir wa-tadhkirat al-mutabaṣṣir fī tafsīr al-Qur'ān* (Elucidation for the Mindful and Reminder for the Watchful: Exegesis of the Qur'an). Based on this extensive commentary, otherwise known as *al-Tafsīr al-kabīr* (The Great Commentary), al-Kawashi wrote a smaller *tafsīr*, which is known as *al-Tafsīr al-ṣaḡīr* (The Short Commentary) or *al-Talkhīṣ fī al-tafsīr* (Abridgment: On Exegesis). Because the library contained three copies of "al-Kawashi's *tafsīr*," perhaps this work can be identified as The Short Commentary. If so, then this work may have been a rival of al-Wahidi's *al-Wajīz* in the class of pocket commentaries. The popularity of The Short Commentary is confirmed by the fact that it was used by Jalal al-Din al-Mahalli (d. 1459) and subsequently by Jalal al-Din al-Suyuti for writing the *Tafsīr al-Jalālayn*, a concise *tafsīr* that came to replace the works of Kawashi and al-Wahidi as the main pocket commentary.¹¹⁹

Of all the Qur'an commentaries in the inventory, only one was authored by a scholar from the Arab lands to the west of Iraq. The scholar in question is Abu 'Abdallah al-Qurtubi (d. 1272), a Maliki jurist from Cordoba who traveled eastward and settled in Egypt. Al-Qurtubi's *tafsīr* is unique among the holdings of the library for its

focus on the legal implications of Qur'anic verses. In his commentary, al-Qurtubi utilizes previous works from the genre of legal exegesis, such as those of the Hanafi Abu Bakr al-Jassas (d. 981) and the Maliki Abu Bakr Ibn al-ʿArabi (d. 1148).¹²⁰ In examining the legal implications of the Qur'anic text, al-Qurtubi addresses diverse textual issues (from variant readings to lexicographical and grammatical analysis) and also occasionally forays into theological and historical discussions.¹²¹ Despite being a Maliki, al-Qurtubi discusses the rulings of other schools evenhandedly, and exhibits his commitment to fair analysis by occasional departures from his own school's opinions.¹²² Al-Qurtubi's commentary was also part of the curriculum of advanced imperial madrasas promulgated by Sultan Süleyman.¹²³

The final two commentaries from the list above were written in Anatolia. The author of the first, Shihab al-Din al-Siwasi, was a Maturidi Hanafi scholar from the city of Sivas who permanently relocated to the city of Selçuk in western Anatolia after joining the Zayniyya Sufi order (*ṭarīqa*).¹²⁴ In addition to composing works on Sufism, al-Siwasi produced a Qur'an commentary titled *ʿUyūn al-tafāsīr li-l-fuḍalā' al-samāsīr* (Finest Interpretations for the Benefit of Astute Scholars). As he makes clear in the introduction, *ʿUyūn al-tafāsīr* is aimed at helping non-specialists in exegesis gain convenient access to the interpretations of an array of influential commentators. In other words, it was conceived as a "madrasa commentary,"¹²⁵ meant to be taught as a *tafsīr* textbook to students. The chief sources of *ʿUyūn al-tafāsīr* are the commentaries of al-Baghawi, Abu al-Layth al-Samarqandi, and al-Zamakhshari; but al-Siwasi also used al-Wahidi's *al-Wajīz*, al-Qurtubi's *al-Jāmiʿ*, and al-Baydawi's *Anwār al-Tanzīl*. *ʿUyūn al-tafāsīr* appears to have enjoyed some popularity, as evidenced by its inclusion in the imperial library as well as its utilization by two prominent Ottoman commentators, the Grand Mufti Abu al-Suʿud Efendi (Ebussuud, d. 1574) and Ismaʿil Haqqi al-Brusawi (Ismail Hakkı Bursevi, d. 1725).

The last commentary on the list belongs to Ahmad b. Ismaʿil al-Gurani (Molla Gürani), the Grand Mufti of the Ottoman empire from 1481 to 1488, that is, early in the reign of Bayezid II.¹²⁶ Al-Gurani was from northern Iraq and spent the first three decades of his life in Iraq, Syria, and Egypt. It was during this time that he studied *al-*

Kashshāf and attended the company of the Cairene Mamluk scholar Ibn Hajar al-ʿAsqalani.¹²⁷ Originally a Shafiʿite, al-Gurani settled in Anatolia in 1441 and, sometime thereafter, adopted Hanafism.¹²⁸ He finished his Qur'an commentary, titled *Ghāyat al-amānī fī tafsīr al-kalām al-rabbānī* (The Ultimate Aim of Aspirations: Exegesis of Divine Speech), in 1463 and dedicated it to his royal student, Sultan Mehmed II.¹²⁹ According to Taşköprüzade, al-Gurani frequently criticizes al-Zamakhshari and al-Baydawi in his discussions.¹³⁰ While al-Gurani occasionally refers to early exegetical opinions or quotes hadith pertaining to circumstances of revelation (*asbāb al-nuzūl*), his focus is on variant readings and grammatical issues. It does not seem that his commentary was particularly influential or highly regarded by later scholars, even during the later years of Mehmed II's reign.¹³¹ In time, however, Ottoman investment in *tafsīr* brought forth precious fruit in the form of the commentary of the aforementioned Abu al-Suʿud Efendi, *Şeyhülislam*, during the reign of Sultan Süleyman. Abu al-Suʿud produced one of the most influential Qur'an commentaries of the post-formative period, titled *Irshād al-ʿaql al-salīm ilā mazāyā al-Qurʾān al-karīm* (Guiding the Fair-Minded to the Benefits of the Noble Qur'an). This work became the subject of several glosses and annotations.¹³² With a proper measure of exaggeration, Hajji Khalifa (d. 1657) describes the *Irshād* as the most famous and highly regarded *tafsīr* after those of al-Zamakhshari and al-Baydawi.¹³³

Qirāʾāt holdings

Whereas the *tafsīr* section has a clear structure in its first half, the *qirāʾāt* section is generally disorganized. Therefore, the existence and number of various titles (rather than their arrangement) is our only evidence from which to infer the relative importance of specific works and authors. A survey of the *qirāʾāt* holdings shows the particular importance of two scholars: al-Shatibi (Abu al-Qasim al-Qasim b. Firruh al-Ruʿayni, d. 1194) and Ibn al-Jazari (Shams al-Din Abu al-Khayr Muhammad b. Muhammad, d. 1429). Al-Shatibi hailed from the town of Shatiba (Xàtiva) in al-Andalus, but he traveled eastward and eventually took up residence in Cairo. His seminal contribution to the field of *qirāʾāt* is a masterful poem about the seven systems of reading the Qur'an, which

were promoted as especially authoritative by Ibn Mujahid (d. 936) in his *Kitāb al-Sabʿa* (The Book of the Seven).¹³⁴ Al-Shatibi's poem, titled *Ḥirz al-amānī wa-wajh al-tahānī* (Refuge of Aspirations and Abode of Pleasures), features mnemonic devices that facilitate the task of memorizing the seven readings. As a result, this poem, which is also known as *al-Shāṭibiyya*, became the foundational text for the study of these modes of recitation throughout the Islamic world.¹³⁵ The imperial library possessed one copy of *al-Shāṭibiyya* (28 {4}), along with an abridgment (28 {7}), two commentaries (27 {6–8}, 28 {6}), a supercommentary (27 {11}), a Persian translation (27 {5}), and apparently two copies of a treatise that presents *al-Shāṭibiyya*'s data in tree graphs and tables (27 {14}, 28 {2–3}).¹³⁶ Another poem by al-Shatibi, *ʿAqīlat atrāb al-qaṣāʾid fī asnā al-maqāṣid* (The Treasured Ode among Resembling Poems: In [Pursuit of] the Loftiest of Aims), also appears in the listed works, next to one of its commentaries (27 {7–8}). This poem presents information concerning the skeletal text (*rasm*) of the Qur'an.

The imperial library thus testifies to the distinction of al-Shatibi, whose focus on the seven readers selected initially by Ibn Mujahid contributed to the establishment of their canonical status.¹³⁷ However, some scholars of *qirāʾat* were dissatisfied with this state of affairs, as they believed there were other, equally legitimate systems of reading the Qur'an. A key figure in this camp was the above-mentioned Ibn al-Jazari (d. 1429), whose influence is evident in the list of *qirāʾat* works at the imperial library. A native of Damascus, Ibn al-Jazari traveled widely in the Islamic world and, incidentally, spent a few years in Bursa, where he enjoyed the support of Bayezid I (r. 1389–1403).¹³⁸ Ibn al-Jazari played a crucial role in promoting three additional systems of reading as canonical alongside the seven readings chosen by Ibn Mujahid.¹³⁹ The inventory of the imperial library lists several works that were either penned by Ibn al-Jazari or were based on his writings. There is a copy of his *Nashr al-qirāʾat al-ʿashr* (Revival of the Ten Readings);¹⁴⁰ a commentary on his *al-Durra al-muḍīʾa fī qirāʾat al-ʿamma al-thalātha al-marḍiyya* (The Shining Pearl: The Estimable Readings of the Three Imams) (27 {12}); and a commentary (27 {16}–28 {1}) on his poem titled *Nihāyat al-barara fī mā zād ʿalā al-ʿashara* (The Farthest Point for the Pious: On That Which Is beyond the Ten

[Readings]). The inventory also lists “the poem” (*naẓm*) of Ibn al-Jazari (28 {9}), which may be the aforementioned *al-Durra al-muḍīʾa*, as well as a commentary on “the poem” of Ibn al-Jazari (27 {15–16}). Less than a century after his death, then, Ibn al-Jazari appears to have succeeded in his campaign to expand the scope of authoritative readings beyond the seven systems of Ibn Mujahid.

Alongside al-Shatibi and Ibn al-Jazari, the library inventory shows the importance of a third, more recent scholar, namely, the Ottoman Grand Mufti, Molla Gurani. Four of his writings are listed, each of which is a commentary on a previous scholar's work. In fact, three of these commentaries are directly or indirectly dependent on al-Shatibi and Ibn al-Jazari: *Kashf al-asrār ʿan qirāʾat al-ʿimma al-akhyār* (Unveiling the Secrets of the Chosen Imams' Readings) is a commentary on Ibn al-Jazari's aforementioned *Nihāyat al-barara fī mā zād ʿalā al-ʿashara*, a poem of 454 verses that discusses three readings (by Ibn Muhaysin, al-Aʿmash, and al-Hasan al-Basri) in addition to the ten systems discussed in Ibn al-Jazari's *Nashr*. Al-Gurani's *al-ʿAbqarī fī sharḥ al-Jaʿbarī* (The Marvelous [Treatise]: Commentary on al-Jaʿbarī) is an annotation on al-Jaʿbarī's *Kanz al-maʿānī* (Treasure Trove of Meanings), which is a commentary on al-Shatibi's *Ḥirz al-amānī*. Finally, the catalogue lists al-Gurani's *Lawāmiʿ al-ghurar fī sharḥ Farāʾid al-durar* (Flashes of Brightness: Commentary on “Unique Pearls”), which is a commentary on Ahmad b. Muhammad al-Sharʿabī's *Farāʾid al-durar*. This latter text is a poem of 371 verses that owes its form to *al-Shāṭibiyya* and its contents primarily to Ibn al-Jazari's *Tahbīr al-Taysīr*.¹⁴¹ That al-Gurani was especially interested in variant readings and philology is clear not only from these works but also from his commentary on the Qur'an and his early education in the Arab lands to the south of Ottoman domains.¹⁴²

This last point on geography brings us to the following observation: whereas the exegetical texts of the inventory were largely produced in the eastern, Persianate Islamic world, the works of *qirāʾat* were mostly penned by scholars from the western, Arab-speaking domains. It would be imprudent to draw sweeping conclusions based on this fact, especially given the small number of *qirāʾat* works in the library. However, the preponderance of western works in the inventory may reveal more

about *qirā'āt* scholarship in general than Ottoman preferences in particular. Specifically, it seems that from the eleventh century onwards, most of the major contributions to the study of variant readings came from scholars living in the Arab-speaking parts of the Islamic world, including al-Andalus, whence several crucial figures of this discipline (including al-Shatibi) hailed.¹⁴³

Although the sections on *tafsīr* and *qirā'āt* differ in terms of the geographic origins of their works, they are similar from a temporal perspective, insofar as neither section includes a significant number of works from the formative period of each discipline. For instance, the list of *qirā'āt* texts does not include Ibn Mujahid's (d. 936) seminal *Kitāb al-Sab'a*, which established the system of seven readings that are used to this day.¹⁴⁴ Nor do we see any of the works of Abu 'Amr al-Dani (d. 1053), the Andalusian scholar who made signal contributions to the field of *qirā'āt*. Both of the abovementioned poems of al-Shatibi are in fact versifications of al-Dani's works: *Ḥirz al-amānī* is based on *al-Taysīr fī al-qirā'āt al-sab'* (Facilitation: On the Seven Readings), and *Aqīla* presents the material found in *al-Muqni' fī ma'rifat rasm maṣāḥif al-amṣār* (The Sufficer: On the Knowledge of the Skeletal Text of the Codices of the Towns). Of course, the relative absence of earlier works does not mean that Ottoman scholars lacked interest in the contributions of early scholars, which were generally preserved in the writings of the post-formative period. The prominence of later works may be attributed to two factors: first, a particular concern with pedagogy, which necessitated attention to scholastic texts and their commentaries; and second, a conceptualization of Islamic scholarship as a progressive enterprise, whereby older works were frequently rendered obsolete by new ones that incorporated recent synthetic and analytic advancements.

CONCLUSION

In a concise and widely cited examination of the Islamic exegetical tradition, Jane McAuliffe provides an account of the "traditional Muslim view" of the history of *tafsīr*. According to this account, in the early centuries of Islam, exegesis of the Qur'an was mainly a matter of compilation rather than contemplation.¹⁴⁵ That is to say, interpreting a specific Qur'anic passage primarily

entailed searching for pertinent elucidatory information in other parts of the Qur'an as well as in the statements attributed to the Prophet and the following two generations of Muslims. As a result, exegesis involved "little more than a compilation and classification of the relevant explanatory *ḥadīths*."¹⁴⁶ In McAuliffe's view, this dogged deference to received tradition was coupled with, and indeed resulted from, disdain for a commentator's personal understanding of the Qur'anic text, or what is known as *al-tafsīr bi-l-ra'y*. "Not only was *al-tafsīr bi-l-ra'y* proscribed but in the eyes of some Muslims any attempt at all to interpret the Book of God verged on blasphemy."¹⁴⁷ This traditionalist approach culminated, McAuliffe notes, in the voluminous commentary of Muhammad b. Jarir al-Tabari (d. 923), titled *Jāmi' al-bayān 'an ta'wīl āy al-Qur'ān* (Collection of Statements Concerning Interpretation of the Qur'an's Verses). Although it was perfected in the formative period, McAuliffe claims that tradition-based exegesis "remains the backbone of all subsequent Qur'anic interpretation."¹⁴⁸ She admits that some Muslim commentators did interpret the Qur'an through personal reflection. However, even though such attempts have been "occasionally tolerated," McAuliffe maintains that they were nonetheless "always distrusted as potentially misleading."¹⁴⁹ Similar descriptions of the science of exegesis as an unflinchingly conservative enterprise can be found in the works of other scholars in the field of *tafsīr*.¹⁵⁰

Such portrayals bear little resemblance, however, to the picture that emerges from our examination of Ottoman exegetical interests. For instance, whereas McAuliffe and many others hold al-Tabari to be an inordinately influential commentator, there was not a single copy of his *Jāmi' al-bayān* at the imperial library, even though his history was quite well known in the Ottoman realm.¹⁵¹ Nor is the irrelevance of *Jāmi' al-bayān* peculiar to the Ottoman context. As Walid Saleh has noted, despite the best efforts of Ibn Taymiyya and his students and followers to promote al-Tabari's commentary, Muslim exegetes generally "remained apathetic to this monumental work."¹⁵² This apathy is reflected in the fact that *Jāmi' al-bayān* does not seem to have been available to the Ottoman bibliophiles Taşköprüzade and Hajji Khalifa, whose brief remarks on this commentary simply reproduce the assessments of earlier scholars.¹⁵³ Indeed, "during the nineteenth century [*Jāmi' al-bayān*]

was presumed all but lost.”¹⁵⁴ Similarly absent from the inventory are other major works that are usually placed under the rubric of tradition-based exegesis,¹⁵⁵ such as al-Tha‘labi’s *al-Kashfwa-l-bayān*; Ibn ‘Atiyya al-Andalusi’s (d. ca. 1147) *al-Muḥarrar al-wajīz fī tafsīr al-kitāb al-‘azīz* (The Accurate Compendium: Exegesis of the Sublime Book); Ibn al-Jawzi’s (d. 1200) *Zād al-masīr fī ‘ilm al-tafsīr* (Provision for the Journey in the Science of Exegesis); and Ibn Kathir’s *Tafsīr al-Qur’ān al-‘āzīm*.¹⁵⁶ Judging from the inventory and the other pieces of evidence discussed in this essay, Ottoman scholars at the turn of the sixteenth century were chiefly interested in the commentaries of al-Zamakhshari, al-Razi, and al-Baydawi, as well as in some of the glosses on these works—none of which are focused primarily on early exegetical traditions. To the extent that exegetical reports were studied, it appears that they were seen as simply one source among many that could be utilized for elucidating the Qur’an. A similar attitude is found in the exegetical works of al-Fanari, al-Siwasi, and al-Gurani. The various sources discussed in this paper suggest that scholars from other parts of the Islamic world were also not particularly preoccupied with the exegetical views of early authorities.

It is not difficult to see why *tafsīr* is often portrayed as a predominantly traditionalist enterprise with little room for the subjective interpretations of the individual commentator. This traditionalist historiography of *tafsīr* reflects the prevailing tendency of modern Muslim scholars themselves, especially those living in Arab-majority countries.¹⁵⁷ The rise of Salafism in the modern Arab world has catapulted traditionalism to unprecedented authority, turning it into the chief yardstick for measuring the legitimacy and orthodoxy of the premodern Islamic heritage. This prevailing attitude in turn influences how modern academics assess the legacy of premodern scholars, because it is easy to extrapolate and conclude that “things have always been this way”—even when one is well aware that things have changed radically. In the case of McAuliffe’s otherwise brilliant exposition, we can see clear indications of this extrapolation. She asserts that *tafsīr* is “a remarkably uninterrupted craft,” that is to say, a craft in which modern practitioners are deeply conversant with their premodern counterparts.¹⁵⁸ It would therefore be uncommon,

she points out, to find a “modern Muslim exegete who were *not* thoroughly familiar with al-Ṭabarī (d. 923), al-Zamakhsharī (d. 1144), and Ibn Kathir (d. 1373).”¹⁵⁹ If *tafsīr* is uninterrupted, and if its modern students and practitioners are steeped in the works of al-Tabari and Ibn Kathir, then it follows that premodern commentators were also heavily reliant on these two scholars.

McAuliffe’s estimation of the centrality of Ibn Kathir is such that her portrayal of “the traditional Muslim view” of *tafsīr* is chiefly based on Ibn Kathir’s prologue to his commentary.¹⁶⁰ In fact, the relevant section of Ibn Kathir’s prologue does not represent Ibn Kathir’s own words but rather those of his teacher Ibn Taymiyya, which Ibn Kathir copied wholesale from Ibn Taymiyya’s *Muqaddima fī uṣūl al-tafsīr*.¹⁶¹ This treatise is not so much an objective description of the early history of *tafsīr* as a *prescription* for how to interpret the Qur’an and evaluate the available exegetical material.¹⁶² True to form, Ibn Taymiyya lays out a hermeneutic strategy that valorizes the views of *al-salaf al-ṣāliḥ*, the pious forebears, as the proper source for *tafsīr*. According to Ibn Taymiyya, to understand a certain Qur’anic passage one must first search the Qur’an itself for elucidatory information. If this fails to yield a result, the next step is to search the Prophet’s Sunna, and should that also fail, one may rely (with some exceptions) on the views of his companions and those of the next generation, the followers (*al-tābi‘ūn*).¹⁶³ Simultaneously, Ibn Taymiyya strongly criticizes *al-tafsīr bi-l-ra’y*, the analytical mode of exegesis where the commentator interprets the Qur’an by independent reflection on the text. Ibn Taymiyya is so opposed to this approach that he casts aspersions even on correct interpretations resulting from such reflection, citing the following prophetic hadith: “If a person comments on the Qur’an using his opinion and attains the correct interpretation, he has [nevertheless] made a mistake.”¹⁶⁴ In a sign of unease with Ibn Taymiyya’s one-sided discussion, Ibn Kathir makes a crucial insertion in his teacher’s text. He first provides a milder version of this hadith (“If a person comments on the Qur’an using his opinion, he has made a mistake”), and then notes that it has also come down in a variant form, with the citation of which he resumes copying Ibn Taymiyya’s text.¹⁶⁵ However, McAuliffe simply reproduces this radical version from Ibn Kathir’s

prologue and asserts that “such is not an uncommon view even in the later, classical period.”¹⁶⁶ Thus, the controversial approach of Ibn Taymiyya is depicted as representing early commentators and their classical peers alike.

As it happens, even Ibn Taymiyya's view is more nuanced than it seems. He admits that the quoted hadith may be inauthentic—although he thinks it is not (his double invocation of “and God knows best” aside).¹⁶⁷ Ibn Taymiyya also leaves some room for reflection in cases where helpful information cannot be found in the authoritative sources. Specifically, he notes that when the Followers (*al-tābi'ūn*) offer divergent interpretations for a certain passage, then one may refer “to the language of the Qur'an or the Sunna, or the language of the Arabs in general, or the statements of the Companions in this regard.”¹⁶⁸ However, utilizing linguistic indications from the Qur'an and the Sunna or from “the language of the Arabs in general” (*ʿumūm lughat al-ʿarab*) is in reality a conduit for personal reflection, as all such reflection is fundamentally dependent on linguistic analysis. In effect, by recognizing the conditional validity of such an analysis, Ibn Taymiyya makes room for personal reflection on the Qur'anic text. Upon closer inspection, therefore, the object of Ibn Taymiyya's denunciation appears to be not analytical interpretation as such, but rather disregard for transmitted material and arrogant reliance on one's own reflection, what he calls *tafsīr al-Qurʾān bi-mujarrad al-ra'y* (interpreting the Qur'an by opinion alone).¹⁶⁹ The addition of the term *mujarrad* (“alone”) is highly significant and opens up space for the use of personal reflection under certain (although admittedly stringent) circumstances. This reading of the treatise seems to find support in the fact that Ibn Taymiyya himself engages in subjective analysis of the Qur'anic text in order to establish one of his points.¹⁷⁰

While one may debate the details of Ibn Taymiyya's theory, there is no denying the fact that his conservative approach was quite marginal during the premodern period. Here it is worth quoting Walid Saleh's assessment of the influence of Ibn Taymiyya's treatise:

The medieval exegetical tradition simply refused to succumb to such a radical restriction on the authority of the exegete.... Only two medieval authors implemented Ibn Taymiyya's theory in the centuries after his death, namely

his student Ibn Kathir and the later al-Suyūṭī (d. 911/1505). The earlier commentaries he has championed, like those of Baqī b. Makhḷad, Ibn Abī Ḥātim, and Ibn Mardawayh, have now all been lost. The victory of Ibn Taymiyya's theory was only assured in the 20th century, and there is a danger of projecting this state of affairs back onto the medieval period. Since his treatise is one of the few available articulations of what *tafsīr* is about, some scholars have taken it to reflect the status of hermeneutical thinking prevalent in medieval tradition. Ibn Taymiyya's theory was anything but representative.¹⁷¹

While Ibn Kathir does rely heavily on exegetical traditions in writing his commentary, he frequently supplements them with his own evaluations and analyses, thereby disregarding the exhortations of Ibn Taymiyya to the contrary. In any case, Ibn Kathir's commentary does not seem to have been influential in the premodern period. There are only a few dozen extant manuscript copies of this commentary¹⁷² (compared with hundreds of copies of *al-Kashshāf*).¹⁷³ Not surprisingly, therefore, the Ottoman imperial library did not have a single copy of Ibn Kathir's commentary, even though there was a copy of his historical magnum opus, *al-Bidāya wa-l-nihāya* (186 {9–11}). As for al-Suyūṭī, his approach is faithful to Ibn Taymiyya's suggested methodology and is free of analytical comments such as those of Ibn Kathir.¹⁷⁴ However, al-Suyūṭī did not share Ibn Taymiyya's disdain for analytical exegesis and in fact indirectly critiqued and undermined the latter's arguments.¹⁷⁵ In al-Suyūṭī's view, tradition-based exegesis does not supplant but rather complements other approaches to exegesis. Placed in its proper confines, tradition-based exegesis was indeed valuable to mainstream exegetical scholarship. Al-Suyūṭī's commentary is thus included in the aforementioned *firmān* of Sultan Süleyman as one of the twelve *tafsīr* texts to be studied in advanced imperial madrasas.¹⁷⁶ Not only was Ibn Taymiyya's influence limited in the premodern period, but modern Muslim scholars have also frequently ignored or downplayed the most radical aspects of his theory. The late Muhammad Husayn al-Dhahabī (d. 1977), Egypt's minister of religious endowments and author of the widely-read *al-Tafsīr wa-l-mufasssīrūn*, goes so far as to say that the disagreement between the proponents and opponents

of *al-tafsīr bi-l-ra'y* is in fact only terminological (*lafẓī lā ḥaqīqī*).¹⁷⁷ In reality, he states, both camps agree that a scholar may interpret the Qur'an as long as he has mastery over the necessary branches of knowledge.¹⁷⁸

Documentary evidence is particularly helpful in envisioning the early modern intellectual landscape apart from the influence of modern trends and idiosyncrasies. In this regard, the inventory of the palace library of Sultan Bayezid II is an exceptionally valuable document, as it affords us an unmediated glance at the literary products that were of value and interest to the Ottoman court and more broadly to the intellectual elite at that time. Focusing on the exegetical works of the palace library, this paper has attempted to map the specific ways in which Ottoman scholars studied and contributed to the Islamic exegetical tradition. In particular, the content and structure of the *tafsīr* section demonstrate that analytical works of exegesis were the backbone of Ottoman exegetical scholarship. In addition, the inventory suggests that Sufi commentaries (including those associated with the school of Ibn al-'Arabi) were fully at home in the Ottoman context. The holdings of the library also show that glosses and commentaries were integral, indeed central, to how Ottoman scholars studied and practiced *tafsīr*. In particular, the works of al-Taftazani and al-Jurjani appear to have been highly valued—not only for the field of *tafsīr*, but for several other disciplines such as logic, rhetoric, and theology; and not only for Ottomans, but for the societies of the Balkans-to-Bengal complex as a whole.

It is therefore a desideratum for the academic study of *tafsīr* to dedicate vastly more attention to the genre of glosses than has hitherto been the case. The initial step has already been taken by scholars such as Walid Saleh who have attempted to make some sense of the staggering mass of material available in this genre.¹⁷⁹ The next step will be to produce critical editions and detailed studies of the extant glosses—starting with those that were of higher import to premodern scholars. A related project is to evaluate the pivotal role played by al-Taftazani and al-Jurjani in premodern Islamic education, with attention to the full spectrum of their scholarship. It is hard to believe that there is no major study of either figure written in any European language. In order to properly study the post-formative period, modern

academics first need to fundamentally reevaluate some basic assumptions about the trajectory of Islamic intellectual history. In particular, the notions of general decline in the post-formative period and the characterization of glosses as devoid of value and creativity need to be abandoned. To this end, we must actively resist the urge to view Islamic history through the prism of the contemporary period. It is only then that we will be able to fully appreciate the continuities, developments, and ruptures that characterized the multifaceted post-formative and early modern periods.

NOTES

Author's note: The present chapter was slated to be written by my former mentor, the late Shahab Ahmed. After his sudden and sorrowful passing, Gülru Necipoğlu and Cemal Kafadar asked me to step in and write it instead. I dedicate this essay to Shahab's memory with affection and gratitude. I also wish to thank Walid Saleh, who provided valuable feedback on an earlier draft.

2. Andrew Lane, *A Traditional Mu'tazilite Qur'ān Commentary: The Kashshāf of Jār Allāh al-Zamakhsharī (d. 538/1144)* (Leiden: Brill, 2006), xiii.
3. See, for instance, the praise that al-Tibi heaps on *al-Kashshāf* in the prologue of *Futūḥ al-ghayb* (1:610–11).
4. Asad Q. Ahmed and Margaret Larkin, "The *Ḥāshiya* and Islamic Intellectual History," *Oriens* 41 (2013): 213–16, at 216.
5. The inventory is preserved in the Library of the Hungarian Academy of Sciences (MS Török F. 59).
6. Shahab Ahmed, *What Is Islam? The Importance of Being Islamic* (Princeton, NJ: Princeton University Press, 2015), 32.
7. Apart from manuscripts of the Qur'an and exegetical works, the first section comprises works on Prophetic traditions (*aḥādīth*), prayer, theology, legal theory, positive law, and mystical writings, among other subjects. This section ends on page 151. The second section contains, inter alia, works on medicine, history, politics, warfare, collections of poetry, rhetoric, grammar, lexicography, dream interpretation, alchemy, astronomy, music, chess, and finally logic and Islamic philosophy (*al-ḥikma al-islāmiyya*). See the section titles (*tafṣīl*) discussed in Gülru Necipoğlu's essay in this volume.
8. MS Török F. 59, 12 {5–6}.
9. There is a slight uncertainty about the first number because on a few occasions two or more manuscripts on *tafsīr* are described in the same way, but it is not clear if their contents are identical. For instance, the inventory refers to

- Hāshiyat al-Kashshāf* three times without specifying an author (20 {19}–21 {1–2}). Given that many scholars wrote *hāshiyas* on *al-Kashshāf*, it is not clear whether the three listed manuscripts are the same work or represent different glosses.
10. If we were to count the volumes, the disparity between the two subcategories would increase even further, because a number of *tafsīr* works take up multiple volumes whereas none of the *qirā'āt* works goes beyond a single volume—and in a few cases, several *qirā'āt* works are bound together in the same volume.
 11. Thus, a recent comprehensive catalogue of all Arabic manuscripts pertaining to *tafsīr* takes up nearly 1,000 pages in two volumes: *Al-Fihris al-shāmil li-l-turāth al-'arabī al-Islāmī al-makhtūṭ. 'Ulūm al-Qur'ān: makhtūṭāt al-tafsīr wa-'ulūmuh*, 2 vols. (Ammān: Mu'assasat Āl al-Bayt, 1989); henceforth, *FSQT*. By contrast, the parallel catalogue for the works of *qirā'āt* (*Al-Fihris al-shāmil li-l-turāth al-'arabī al-Islāmī al-makhtūṭ. 'Ulūm al-Qur'ān: makhtūṭāt al-qirā'āt*, 2nd ed. [Ammān: Mu'assasat Āl al-Bayt, 1994]; henceforth, *FSQQ*) fills about 200 pages. The enormous exegetical output of Muslim scholars reflects the centrality of the Qur'an to the theological, legal, literary, and aesthetic pursuits of Muslims throughout their history.
 12. Susan Gunasti, "Political Patronage and the Writing of Qur'an Commentaries among the Ottoman Turks," *Journal of Islamic Thought* 24, no. 3 (2013): 335–57, at 336.
 13. Al-Zamakhshari opens his prologue by highlighting the Qur'an's composite character (on both thematic and formal levels), noting that such composition points to the Qur'an's origination in time (*muṭtada' muṭtada'*) (*Al-Qur'ān ma'a tafsīruh al-Kashshāf 'an ḥaqā'iq al-tanzīl*, ed. William Nassau Lees et al., 2 vols. [Calcutta: Maṭba'at al-Laysī, 1856–59], 1:2). To make matters worse, it was widely believed that the very first sentence of *al-Kashshāf* had been "Praise belongs to God, Who created the Qur'an," and that al-Zamakhshari later toned down this provocative formulation for fear of strong backlash from Sunni scholars. Andrew Lane rejects this story in a detailed and persuasive analysis (*A Traditional Mu'tazilite Qur'an Commentary*, 76–85). However, leaving aside such anecdotes, *al-Kashshāf* is not a polemical work oriented toward establishing principles of Mu'tazili theology (Lane, *A Traditional Mu'tazilite Qur'an Commentary*, 147).
 14. The printed edition of this commentary exceeds 8,000 pages over thirty-two volumes, a number that is even more impressive in light of the fact that there are no footnotes to this edition (*Al-Tafsīr al-kabīr aw Maṭālib al-ghayb*, ed. Muḥammad Muḥyī al-Dīn 'Abdalḥamīd, 32 vols. [Cairo: al-Maṭba'a al-Bahīyya al-Miṣriyya, 1934–64]).
 15. The title "Fakhr-i Khwārizm" was given to al-Zamakhshari by the littérateur and court-poet Rashīd al-Dīn Waṭwāt (d. 1182) (*Ḥadā'iq al-sihr fī daqā'iq al-shi'r*, ed. 'Abbās Iqbāl Āshtiyānī [Tehran: Maṭba'a-yi Majlis, 1930], 79, 84).
 16. MS Török F. 59, 18 {2}–19 {5}.
 17. MS Török F. 59, 19 {5}–19 {12}, 19 {15}.
 18. MS Török F. 59, 19 {12}–21 {6}, 24 {2}.
 19. MS Török F. 59, 21 {13}–22 {6}.
 20. MS Török F. 59, 22 {6}–22 {13}.
 21. Of course, al-Baydawi draws on other sources (such as al-Razi's commentary) and adds insights of his own (Muḥammad Ibn 'Ashūr, *al-Tafsīr wa-rijāluh* [Tunis: Dār al-Kutub al-Sharqiyya, 1966], 97). However, *Anwār al-tanzīl* is primarily derivative of *al-Kashshāf*.
 22. Aḥmad Ḥājj Muḥammad 'Uthmān, "Nawāhid al-abkār wa-shawārid al-afkār: min awwal al-kitāb ilā al-āya 20 min sūrat al-Baqara," (PhD diss., Umm al-Qurā University, 2003), 13. This is not to deny al-Baydawi's intellectual independence, which is evident both in his linguistic analyses and his theological and legal divergences from al-Zamakhshari. Some of these divergences have been explored by Luṭṭī Ibrahim in a series of short essays (e.g., "The Problem of the Vision of God in the Theology of al-Zamakhshari and al-Baidāwī," *Studies in Islam* 17 [1980]: 123–30; "The Questions of the Superiority of Angels and Prophets between al-Zamakhshari and al-Baydāwī," *Arabica* 28 [1981]: 65–75; "A Comparative Study of the Views of al-Zamakhshari and al-Baydāwī about the Position of the Grave Sinner," *Islamic Studies* 21, no. 1 [1982]: 55–73).
 23. This is clear, inter alia, from its use by al-Baydawi, its critique by Ibn al-Munayyir (d. 1284), and the response to this critique by Ibn Bint al-'Iraqi (d. 1304) (Walid A. Saleh, "Gloss as Intellectual History: The *Hāshiyas* on *al-Kashshāf*," *Oriens* 41 [2013]: 217–259, at 222). By the turn of the fourteenth century, *al-Kashshāf* had become "the staple in the curriculum of the Sunnite *tafsīr* higher education" (ibid.).
 24. This fact is seen not only in the number of commentaries and glosses written on *al-Kashshāf* but also in the number of extant manuscripts mentioned in *FSQT*, the temporal curve of which "peaks in the 8th/14th century" (Lane, *A Traditional Mu'tazilite Qur'an Commentary*, 60).
 25. In the Mamluk domains, "[a]t the mosque of al-Ashraf Barsbāy ... it was required that the man hired as professor of Ḥanafī law be able to deliver lectures on al-Zamakhshari's work" (Jonathan P. Berkey, *The Transmission of Knowledge in Medieval Cairo: A Social History of Islamic Education* [Princeton, NJ: Princeton University Press, 2014], 185–86). In two documents from early fifteenth-century Khurasan, one a license for transmission (*ijāza*) and the other a request for such a license (*istijāza*), *al-Kashshāf* is the only *tafsīr* text to be named (Maria Subtelny and Anas Khalidov, "The Curriculum of Islamic Higher Learning in Timurid Iran in the Light of the Sunni Revival under Shāh-Rukh," *Journal of the American Oriental Society* 115, no. 2 [1995]: 210–36, at 227, 230).
 26. Thus, a 1565 *fīrmān* of Sultan Süleyman (r. 1520–66) prescribes the use of twelve books of *tafsīr* in advanced imperial madrasas, the first book being *al-Kashshāf*, followed by four of its glosses (Shahab Ahmed and Nenad Filipović, "The Sultan's Syllabus: A Curriculum for the Ottoman Imperial *medreses* Prescribed in a *fīrmān* of Qānūnī I Süleymān, Dated 973 [1565]," *Studia Islamica* 98/99

- [2004]: 183–218, at 196–98). In the famous poem of ‘Ali b. ‘Abdallah al-‘Ushshaqī (“Nebī Efendizade,” d. 1785–86) about the popular books of various disciplines, *al-Kashshāf* appears (along with *Anwār*) as one of the two texts pertaining to Qur’anic exegesis (Şükran Fazlıoğlu, “Nebī Efendizade’nin ‘Kaşide fi el-kutub el-meşhûre fi el-‘ulûm’una göre bir medrese talebesinin ders ve kitab haritası,” *Kutadgubilig: Felsefe Bilim Araştırmaları* 3 [2003]: 191–221, at 197, 211). According to Ebrahim Moosa, in some South Asian madrasas, *al-Kashshāf* “remains a crucial reference work” (Ebrahim Moosa, *What Is a Madrasa?* [Chapel Hill, NC: The University of North Carolina Press, 2015], 113).
27. This can be seen in an *ijāza* issued by the influential scholar Mir Damad (d. 1631) to his son-in-law, where the only *tafsīr* works to appear are *al-Kashshāf* and its gloss by al-Jurjani (*hāshiyatuh al-sharīfa al-sharīfiyya*) (Muḥammad Bāqir Majlisī, *Biḥār al-anwār al-jāmi‘a li-durar akhbār al-a‘immat al-aṭhār*, 110 vols. [Tehran: Dār al-Kutub al-Islāmiyya, 1957], 106:153; discussed in Maryam Moazzen, “Shi‘ite Higher Learning and the Role of the Madrasa-yi Sulṭānī in Late Safavid Iran” [PhD diss., University of Toronto, 2011], 160). A later Safavid scholar, Sayyid Ni‘matallah Jaza‘iri (d. 1701), recommended four exegetical works to be taught to students, the first one being *al-Kashshāf* (Moazzen, “Shi‘ite Higher Learning,” 173).
 28. ‘Iṣām al-Dīn Aḥmad b. Muṣṭafā Ṭāshkubrīzāda, *Al-Shaqā‘iq al-nu‘māniyya fi ‘ulamā‘ al-dawla al-‘Uthmāniyya* (Beirut: Dār al-Kutub al-‘Arabī, n.d.), 62.
 29. *Ibid.*, 202, 269.
 30. *Ibid.*, 15, 37, 61, 91, 99, 101, 202, 227, 272, 310.
 31. For further evidence concerning the centrality of *al-Kashshāf* to Ottoman education, see Gunasti, “Political Patronage and the Writing of Qur’ān,” 344.
 32. According to a local history of Shiraz, al-Farisi studied *al-Kashshāf* there with Qiwām al-Dīn Abu al-Baqā’ ‘Abdallah b. Mahmud b. Hasan al-Shirazi (d. 1370) for four months, relying heavily on the latter’s explanations and annotations to write his *Kashf al-Kashshāf* (Mu‘īn al-Dīn Abū al-Qāsim Junayd b. Maḥmūd al-Shīrāzī, *Shadd al-izār fi ḥaṭṭ al-awzār ‘an zuwwār al-mazār* [Girding up the Loins in Lightening the Load of the Visitors of the Tombs], ed. Muḥammad Qazwīnī et al. [Tehran: Chāpkhāna-yi Majlis, 1950], 86).
 33. 1) *Bekhāh daftar-e ash‘ār o rāh-e ṣaḥrā gūr, che waqt-e madrasa o baḥth-e Kashf-e Kashshāf ast!* (“Ask for the book of poems and hit the road to the field; this is no time for school and discussion of *Kashf al-Kashshāf*!”); 2) *ze muṣḥaf-e rokh-e deldār āyat-i bar khwān, ke in bayān-e maqālāt-e Kashf-e Kashshāf ast* (“Read a verse from the [Qur’anic] codex of the beloved’s countenance, for this [command] is the explanation of the statements of *Kashf al-Kashshāf*”). See Mas‘ūd Farzād, *Jāmi‘-i Nusakh-i Ḥāfiẓ* (Shiraz: Intishārāt-i Dānishgāh-i Pahlawī, 1968), 47, 48.
 34. Aḥmad Farāmarz Qarāmalikī and Yaḥyā Rahā‘ī, “Taftāzānī, Sa‘d al-Dīn Mas‘ūd b. ‘Umar b. ‘Abdallāh Harawī Khurāsānī,” in *Dānishnāma-yi Jahān-i Islām* (Tehran: Bunyād-i Dā‘irat al-Ma‘ārif-i Islāmī), 7:608.
 35. *Al-Hāshiya ‘alā al-Kashshāf li-l-Zamakhsharī. Taṣnīf Abī al-Ḥasan al-Sayyid al-Sharīf al-Jurjānī*, ed. Rashīd b. ‘Umar A‘raḍī (Beirut: Dār al-Kutub al-‘Ilmiyya, 2016).
 36. Somewhat surprisingly, al-Tibi’s commentary on *al-Kashshāf* is not listed together with other glosses of the work; instead, it appears in the second half of the *tafsīr* section (immediately before the list of exegetical treatises that concludes the *tafsīr* texts, MS Török F. 59, 24 {2}). Perhaps this is because *Futūḥ al-ghayb* is so extensive that it was considered a full-fledged and independent *tafsīr* in its own right.
 37. Al-Farisi was in fact a student of al-Tibi’s, his *Kashf al-Kashshāf* drawing frequently on al-Tibi’s *Futūḥ al-ghayb* (see the examples adduced in the introduction to al-Tibi’s commentary [*Futūḥ al-ghayb*, 1:292–96]). Al-Taftazani’s gloss on *al-Kashshāf* is similarly indebted to al-Tibi’s work, as a result of which Jalal al-Dīn al-Suyuti describes al-Taftazani’s work as an abridgement of *Futūḥ al-ghayb* (“*Nawāhid al-abkār*,” 12). While al-Suyuti’s characterization downplays al-Taftazani’s original contributions, there is no denying al-Tibi’s influence on al-Taftazani, many of whose comments are made in relation to al-Tibi’s expositions. For instance, commenting on the very first sentence of *al-Kashshāf* (*al-ḥamd li-llāh alladhī anzala al-Qur’ān kalām^{an} mu‘allaḥ^{an} munazzam^{an}*), al-Tibi entertains the possibility that the term *kalām* might be either a *ḥāl muwaṭṭi‘a* (preparatory condition) for the following adjective (i.e., *mu‘allaḥ*), a *ḥāl mu‘akkida* (emphatic condition) for the object of the sentence, that is, *al-Qur’ān*, or simply a substitute (*badal*) for *al-Qur’ān* (*Futūḥ al-ghayb*, 1:617–18). In his gloss on *al-Kashshāf*, al-Taftazani does not refer to al-Tibi’s work, but seems to be responding to the latter when he deems *kalām* to be “a preparatory condition ... not an emphatic [one] or a substitute” for *al-Qur’ān* (University Library of Leipzig, MS. Cod. Arab. 067, p. 7; available online at http://www.islamic-manuscripts.net/receive/IslamHSBook_islamhs_00009678). For other instances of al-Tibi’s influence on al-Taftazani’s gloss, see *Futūḥ al-ghayb*, 1:304–7. Finally, the gloss of al-Jurjani also reflects the discussions of al-Tibi, even though al-Jurjani also relied on *Kashf al-Kashshāf* and, above all, engaged closely with al-Taftazani’s annotations on *al-Kashshāf* (*Kashf al-zunūn*, 1479; Joseph van Ess, *Die Träume der Schulweisheit: Leben und Werk des ‘Ali b. Muhammad al-Ġurġani (gest. 816/1413)* [Harrasowitz Verlag, 2013], 52). Incidentally, al-Jurjani wrote a gloss on another of al-Tibi’s works, namely, *al-Khulāṣa fi uṣūl al-ḥadīth* (*Kashf al-zunūn*, 720).
 38. Ibn Khaldūn, *The Muqaddimah: An Introduction to History*, trans. Franz Rosenthal, 3 vols., 2nd ed. (Princeton, NJ: Princeton University Press, 1967), 2:447. My own impression is that al-Tibi was not particularly concerned with rejecting al-Zamakhshari’s occasional advocacy of Mu‘tazili principles.

39. "Nawāhid al-abkār wa-shawārid al-afkār," 2, 11. Al-Suyuti wrote the *Nawāhid* from 1475 to 1494 (Saleh, "Gloss as Intellectual History," 229).
40. Ahmed and Filipović, "The Sultan's Syllabus," 198.
41. The library also had a gloss by a certain *Mawlānā Qutb al-Dīn*, who may be Qutb al-Dīn Mahmud b. Mas'ud al-Shirazi (d. 1311) or Qutb al-Dīn Muhammad b. Muhammad al-Tahtani (d. 1364–65) (Lane, *A Traditional Mu'tazilite Qur'an Commentary*, 301, 304). A third candidate would be Qutb al-Dīn al-Iznīqī (d. 1480), who appears in a later section of the catalogue as *Mawlānā Qutb al-Dīn al-Iznīqī* (127 {11}). By contrast, Qutb al-Dīn al-Shirazi is called *al-Qutb al-Shīrāzī* in a later portion of the inventory (271 {5–8}).
42. MS Török F. 59, 20 {19}–21 {2}, 21 {6}.
43. As Saleh points out, "foundational texts were glossed extensively and these accumulated glosses needed periodical indexing and a simplified tool to access them" ("Gloss as Intellectual History," 235).
44. Ibid., 232.
45. On these glosses, see *ibid.*, 232–33.
46. For a few examples, see *Futūḥ al-ghayb*, 1:277–82.
47. Ahmed and Filipović, "The Sultan's Syllabus," 196–98. Note that al-Farisi's *Kashf al-Kashshāf* and al-Jurjani's gloss are absent from this list. The last author in the list, al-Jarbardī (an Arabicized form of *Chārpardī*), is Ahmad b. Hasan, a Shafi'i scholar who spent much of his life in Tabriz, where he studied with al-Baydawi (Muḥammad Ra'īs zāda, "Jārbardī, Aḥmad b. Ḥasan," in *Dānishnāma-yi Jahān-i Islām* [Tehran: Bunyād Dā'irat al-Ma'ārif Islāmī], 9:233–34). Incidentally, al-Jarbardī exchanged letters with 'Adud al-Dīn al-Ijī on al-Zamakhshari's interpretation of *fa'tū bi-sūratin min mithlihi* ("so bring a sura like it"), a phrase that appears in Qur'an 2:23 and 10:38 (Ḥajjī Khalifa, *Kashf al-zunūn*, 222–23).
48. Ahmed, *What Is Islam?*, 32, 73–85. Linda Darling has described the reign of Sultan Bayezid II as witnessing "the peak of Timurid influence" on Ottoman cultural and intellectual life; see her "Political Literature and the Development of an Ottoman Imperial Culture in the Fifteenth Century," *Journal of the Ottoman and Turkish Studies Association* 1/1–2 (2014): 57–69, at 65.
49. Qarāmalikī and Yaḥyā Rahā'ī, "Taftāzānī," 607–8.
50. For a helpful annotated summary of al-Jurjani's oeuvre, see Joseph van Ess, *Die Träume der Schulweisheit: Leben und Werk des 'Alī b. Muḥammad al-Ġurġānī* (gest. 816/1413) (Wiesbaden: Harrassowitz, 2013), 50–88.
51. Some of their works are still studied in India and Pakistan among other places (Moosa, *What Is a Madrasa?*, 113–14).
52. An expression used of al-Taftazani (Qarāmalikī and Rahā'ī, "Taftāzānī, Sa'd al-Dīn," 7:608).
53. For their contributions to the discipline of rhetoric, for instance, see William Smyth, "Controversy in a Tradition of Commentary: The Academic Legacy of al-Sakkākī's *Miftāḥ al-Ulūm*," *Journal of the American Oriental Society* 112, no. 4 (1992): 589–97, at 591. Of course, the analytical approach is not limited to al-Taftazani and al-Jurjani, but characterizes much of the gloss literature in various fields.
54. In the field of rhetoric, the works of 'Abd al-Qahir al-Jurjani (d. 1078), Muhammad al-Sakkaki (d. 1229), and al-Khatib al-Qazwini (d. 1338) are the focus of commentaries and glosses until the end of the fourteenth century. However, when al-Taftazani and al-Jurjani composed commentaries on the writings of al-Sakkaki and al-Qazwini, these commentaries almost immediately displaced the earlier works as subjects of future scholarly interest: "While there were forty super-commentaries written on al-Taftāzānī and al-Jurjānī's works in the fifteenth and sixteenth centuries, there were only nine written on those of al-Sakkākī and al-Qazwīnī. After 1600 the disparity is even more pronounced" (Smyth, "Controversy in a Tradition of Commentary," 596).
55. *Al-Shaqā'iq al-nu'māniyya*, 37, 61, 99; Lane, *A Traditional Mu'tazilite Qur'an Commentary*, 312. The esteem accorded to al-Taftazani's gloss is captured in the following poem by Qinalizade (d. 1572), a famous Ottoman scholar who himself composed a work on *al-Kashshāf*:

I said, when I came to possess a copy of the gloss of *al-Kashshāf* by the learned man of Taftāzān:
 May God's peace be upon you, O Sa'd! For, indeed we use
 your curative gloss to treat the patient of ignorance.

This poem appears on the front page of a copy of al-Taftazani's gloss in Princeton University's Garrett collection (Yahuda section, no. 333), available online at <http://puddl.princeton.edu/viewer.php?obj=08612r145#page/5/mode/1up> (see also Rudolf Mach, *Catalogue of Arabic Manuscripts (Yahuda Section) in the Garrett Collection* [Princeton, NJ: Princeton University Press, 1977], 31). The prologue of Qinalizade's work on *al-Kashshāf* has been edited and discussed by Saleh ("Gloss as Intellectual History," 253–57).
56. In enumerating the glosses of *al-Kashshāf*, Hajjī Khalifa mentions Khatibzade's annotations on the gloss of al-Jurjani, adding that Khatibzade dedicated his work to Sultan Bayezid II (*Kashf al-zunūn*, 1479). Hajjī Khalifa does not attribute a direct gloss on *al-Kashshāf* to Khatibzade, so the work listed in our catalogue as a "Gloss on *al-Kashshāf*" may in fact be Khatibzade's notes on al-Jurjani's gloss. (Incidentally, Khatibzade also wrote annotations to al-Jurjani's gloss on al-Isfahani's commentary on *Tajrid al-'aqa'id* [*al-Shaqā'iq*, 91]). Immediately after mentioning Khatibzade's annotations, Hajjī Khalifa adds, "*wa-l-mawlā 'Abd al-Karīm ayḍan*," suggesting that Molla 'Abd al-Karīm also wrote annotations on al-Jurjani's gloss. It is interesting that, just like in our catalogue, *Kashf al-zunūn* cites the work of Molla 'Abd al-Karīm right after that of Khatibzade.
57. MS Török F. 59, 73–74. Incidentally, one of the people who wrote annotations on al-Taftazani's *al-Talwīḥ* was Burhan al-Dīn Ahmad b. Muhammad (d. ca. 1398), the sultan of Sivas (r. 1381–ca. 1398), who attempted to "prove that most of al-Taftāzānī's objections and criticisms [of *al-Tanqīḥ*] are groundless" (William Chittick, "Sultan Burhān al-Dīn's Sufi Correspondence," *Wiener Zeitschrift für die Kunde des Morgenlandes* 73 [1981]: 33–45, at 36).
58. MS Török F. 59, 56–58.

59. Namely, *Muntahā al-su'l wa-l-amal fī 'ilmay al-uṣūl wa-l-jadal*.
60. MS Török F. 59, 75–77. Al-Taftazani and al-Jurjani also have a strong presence in the list of books on rhetoric, where their works are similarly accompanied by annotations from Ottoman scholars (MS Török F. 59, 268–77).
61. The lowest-ranking madrasas in the educational hierarchy laid out by Mehmed II “were called *Hāṣiye-i Tecrid medreses* after the commentary by al-Sharīf al-Jurjānī (d. 816/1414) on the theology primer entitled *Tajrid al-kalām* ... while the intermediate ... *medreses* were known as *Telviḥ medreses* after the work on jurisprudence (*uṣūl al-fiqh*) by Sa'd al-Dīn al-Taftāzānī (d. 791/1389), entitled *al-Talwiḥ fī kashfḥaqā'iq al-Tanqīḥ*” (Ahmed and Filipović, “The Sultan’s Syllabus,” 191–92).
62. *FSQT*, 320.
63. *Al-Shaqā'iq*, 202, 272, 310. Saleh, “Gloss as Intellectual History,” 237–38, 248. For ‘Atufi, see Gülrü Necipoğlu’s essay in this volume. Cf. Lane, *A Traditional Mu'tazilite Qur'an Commentary*, 316.
64. Gunasti, “Political Patronage and the Writing of the Qur'an,” 345. “In the seventeenth century, glosses and super-commentaries on the *Kashshāf* peter out: only two are produced; in the eighteenth century there is just one. In contrast, 20 glosses and super-commentaries on *Anwār al-tanzīl* were written in the seventeenth century and 33 in the eighteenth” (ibid.).
65. Ahmed and Filipović, “The Sultan’s Syllabus,” 209. A similar trend may have existed in the Mughal empire, where a curriculum from the early eighteenth century contained *Anwār* (and the brief *Jalālayn*) but not *al-Kashshāf* (Francis Robinson, “Ottomans-Safavids-Mughals: Shared Knowledge and Connective Systems,” *Journal of Islamic Studies* 8, no. 2 [1997]: 151–84, at 182–83).
66. The doctrinal factor should not be overstated, because although the *Anwār*’s interpretations frequently diverge from those of *al-Kashshāf* on theologically sensitive issues, al-Baydawi did not conduct a thorough purge of *al-Kashshāf*’s Mu'tazilite leanings (Lane, *A Traditional Mu'tazilite Qur'an Commentary*, 90). Walid Saleh notes that al-Suyuti’s decision to teach the *Anwār* instead of *al-Kashshāf* may have also contributed to the former’s overtaking of the latter (“Gloss as Intellectual History,” 228).
67. For Hajj Hasan-zade’s work, see *İstanbul Üniversitesi Kütüphanesi: Arapça yazmalar kataloğu*, 223, no. 524. Bidlisi was a scholar-diplomat of Kurdish stock who was originally active in the Akkoyunlu court but, as the Safavid Shah Isma'il’s military campaigns unfolded, moved to the service of Bayezid II (and later Selim I [r. 1512–20]). Bidlisi is mainly famous for his *Hasht Biḥisht* (Eight Paradises), a Persian history of the Ottoman dynasty commissioned by Bayezid II (*Kashf al-zunūn*, 283).
68. *Kashf al-zunūn* (190–93) mentions two glosses with the same exact scope, one attributed to Nur al-Din Hamza b. Mahmud al-Qaramani (d. 1466–67) and the other to Muhyi al-Din Muhammad b. al-Qasim (d. 1498–99).
69. MS Török F. 59, 22 {7–8}, 22 {13}.
70. See the chronologically sorted list in *FSQT*, 320.
71. Some biographical sources (such as al-Sakhāwī’s *al-Daw' al-lāmi' fī a'yān al-qarn al-tāsi'* [Beirut: Dār Maktabat al-Ḥayāh, n.d.], 5:329) attribute a gloss on *Anwār al-tanzīl* to al-Jurjani. This is rather unlikely, however, because no manuscript of such a gloss exists (Joseph van Ess, *Die Träume der Schulweisheit*, 52–53). If al-Jurjani had commented on the *Anwār*, his commentary would have likely been well known and popular. The absence of any manuscripts suggests that the attribution of such a gloss to al-Jurjani may be a mistake, perhaps a result of conflating his gloss on *al-Kashshāf* with a work on *Anwār al-tanzīl*.
72. For instance, Akhi Çelebi’s annotations on *Anwār*’s discussion of suras *Hūd* and *Yūsuf* engages with *Kashf al-Kashshāf* (manuscript no. 2882 in the library of Iran’s Majlis, p. 690, available online at <http://94.232.175.44/index.aspx?pid=6&ID=43028>; accessed July 26, 2016). Similarly, according to Taşköprüzade, Muslid al-Din Ibn al-Tamjid (d. ca. 1475) wrote his annotations on *Anwār al-tanzīl* based on the glosses of *al-Kashshāf* (*al-Shaqā'iq al-nu'māniyya*, 62). See also Ibn ‘Ashūr, *al-Tafsīr wa-rījāluḥ*, 104–5; Saleh, “Gloss as Intellectual History,” 229.
73. Another gloss on the *Anwār* dedicated to Bayezid II is found at the beginning of a manuscript at the library of Iran’s Majlis (no. 2882). The gloss in question is limited to sura *al-Qadr* (pp. 1–42). A digitized version of this manuscript is available at <http://94.232.175.44/index.aspx?pid=13&GID=23058&ID=43028>; accessed July 26, 2016.
74. Ahmed and Filipović, “The Sultan’s Syllabus,” 197–98.
75. The numbers refer to the order of appearance of the titles within the inventory’s *tafsīr* and *qirā'āt* section. For more information about each title, see the bibliography that accompanies this chapter.
76. Examples include a treatise by “*quṭb al-‘arīfīn* ‘Abd al-Raḥmān,” who might be Nur al-Din al-Jami, on Qur'an 2:256 (MS Török F. 59, 25 {15–17}, no. 143); or a commentary on *al-Fāṭiḥa* by “a certain master” (*ba'd al-mashāyikh*) (24 {14–15}, no. 138).
77. Al-Qushayrī’s Sufi teachings combine “the eastwardly migrating Baghdad Sufi tradition as well as the local Khurasani tradition of mysticism and piety” (Martin Nguyen and Matthew Ingalls, “Introduction: Al-Qushayrī and His Legacy,” *Journal of Sufi Studies* 2 [2013]: 1–6, at 2).
78. Jawid Mojaddedi, “Legitimizing Sufism in al-Qushayrī’s ‘Risala’,” *Studia Islamica* 90 (2000): 37–50. For a recent annotated translation of the *Risāla*, see *Al-Qushayrī’s Epistle on Sufism: Al-Risala al-qushayriyya fī 'ilm al-tasawwuf*, trans. Alexander D. Knysh (Reading, UK: Garnet Publishing, 2007).
79. For a comprehensive analysis of al-Qushayrī’s approach to Qur’anic interpretation, see Martin Nguyen, *Sufi Master and Qur'an Scholar: Abū al-Qāsim al-Qushayrī and the Laṭā'if al-ishārāt* (Oxford: Oxford University Press, 2012).
80. Alan Godlas, “Influences of Qushayrī’s *Laṭā'if al-ishārāt* on Sufi Qur’anic Commentaries, Particularly Rūzbihān

- al-Baqlī's *Arā'is al-bayān* and the Kubrawī *al-Ta'wīlāt al-Najmīyya*, *Journal of Sufi Studies* 2 (2013): 78–92. The abiding influence of *Latā'if al-ishārāt* can be seen in the fact that it was used by two later scholars, namely, the Ottoman Isma'īl Haqqī al-Brusawī (d. 1725) and the North African Abu al-'Abbas Ibn 'Ajība (d. 1809) in their commentaries on the Qur'an (Nguyen, *Sufi Master and Qur'an Scholar*, 11).
81. *Encyclopaedia Iranica*, s.v. "Meybodi, Abu'l-Fazl Rašīd-al-Dīn," by Annabel Keeler.
 82. Ibid. For a detailed study of al-Maybudi's methodology in *Kashf al-asrār*, see Annabel Keeler, *Sufi Hermeneutics: The Qur'an Commentary of Rashīd al-Dīn Maybudī* (Oxford University Press, 2006).
 83. On the complicated issue of the authorship of this work, see Jamal Elias, *The Throne Carrier of God: The Life and Thought of 'Ala' al-Dawla al-Simnani* (Albany, NY: SUNY Press, 1995), 203–5.
 84. *Encyclopaedia Iranica*, s.v. "Kobrawiya, i. The Eponym," by Hamid Algar.
 85. For instance, the Turkish Sufi Isma'īl Haqqī al-Brusawī (d. 1725) frequently quotes from *al-Ta'wīlāt al-Najmīyya* in his own commentary on the Qur'an, titled *Rūḥ al-bayān fī tafsīr al-Qur'ān* (e.g., *Rūḥ al-bayān fī tafsīr al-Qur'ān*, ed. 'Abd al-Laṭīf Ḥasan 'Abd al-Raḥmān, 10 vols. [Beirut: Dār al-Kutub al-'Ilmiyya, 2003], 1:10, 1:18, 1:22, 1:25).
 86. In addition to elucidating the ideas of his master, al-Qunawī laid institutional foundations for the transmission and growth of the school of Ibn al-'Arabi. For instance, al-Qunawī founded a hospice (including a library) for the instruction of new disciples, the congregation of followers, and the preservation of the ever-growing textual corpus of Ibn al-'Arabi's school (Ahmed Zildzic, "Friend and Foe: The Early Ottoman Reception of Ibn 'Arabi" [PhD diss., University of California, Berkeley, 2012], 62–66).
 87. *Encyclopaedia of Islam, Second Edition* (hereafter *El2*), s.v. "Šadr al-Dīn Muḥammad b. Ishāk b. Muḥammad b. Yūnus al-Kūnawī," by William Chittick.
 88. Three commentaries (two in Arabic, one in Persian) along with a Persian translation (Chittick, "Sultan Burhān al-Dīn," 37n14).
 89. The imperial library may have also contained Jamal al-Din Yusuf b. Hilal al-Safadi's (d. 1296) *Kashf al-asrār wa-hatḥ al-astār* (Unveiling of Secrets and Rending of Veils), a work that was "influenced by Ibn 'Arabi's school of thought" (Godlas, "Sūfism," in *The Blackwell Companion to the Qur'an*, ed. Andrew Rippin [Oxford: Blackwell, 2006], 356). See the annotations to no. 95 in the catalogue.
 90. Zildzic, "Friend and Foe," 69.
 91. James Winston Morris, "Ibn 'Arabi and His Interpreters. Part II: Influences and Interpretations," *Journal of the American Oriental Society* 106, no. 4 (1986): 733–56, at 751. Work no. 155 in the list of *tafsīr* and *qirā'āt* titles should also be counted as part of this same tradition if its author was 'Abd al-Rahman al-Jami, who "could quite justifiably be considered a major figure in the 'school' of Ibn 'Arabi and Qūnawī" (Morris, "Ibn 'Arabi and His Interpreters. Part II [Conclusion]," 110).
 92. Ibid., 102–3; original emphasis.
 93. Osman Yahia, *Histoire et Classification de l'Œuvre d'Ibn 'Arabi: étude critique*, 2 vols. (Damascus: Institut français de Damas, 1964), 2:483.
 94. Or, in Morris's unpacked description, "the eastern Islamic world (including the Ottoman realms, Central Asia, Muslim India, and other lands where Persian was for many centuries the *lingua franca* of higher culture)" (*Ibn 'Arabi and His Interpreters. Part II*, 752).
 95. This can be seen, inter alia, in the fact that al-Fanari wrote a commentary on al-Qunawī's *Miftāḥ al-ghayb* (Key to the Unseen), titled *Miṣbāḥ al-uns* (Lamp of Intimacy). In fact, al-Fanari's father was said to be a disciple of al-Qunawī (*El2*, s.v. "Fenārī-Zāde," by J. R. Walsh). For some of the potential political ramifications of al-Fanari's mystical bent, see Richard C. Repp, *The Müfti of Istanbul: A Study in the Development of the Ottoman Learned Hierarchy* (London: Ithaca Press, 1986), 86–87. Incidentally, al-Fanari's descendants held important positions in the Ottoman administration. For instance, one of his grandsons ('Ala' al-Din 'Ali b. Yusuf Bali) was appointed Kazasker of Rumelia and then the chief Kazi of Anatolia during the reign of Bayezid II (Walsh, "Fenārī-Zāde").
 96. Throughout *ʿAyn al-aʿyān*, al-Fanari frequently quotes from the writings of Ibn al-'Arabi (108, 164, 376) and al-Qunawī (5, 9, 10, 11, 32, 111, 156, 376), especially from the latter's commentary on *al-Fātiḥa*. Al-Fanari also critically engages with *al-Kashshāf* (e.g., 28, 29, 38, 39, 43, 135) and its glosses (e.g., 4 [Qutb al-Din al-Razi and al-Taftazani], 92 [al-Taftazani]), al-Razi's *Mafātiḥ al-ghayb* (e.g., 125, 136, 148), and al-Baydawi's *Anwār al-tanzīl* (e.g., 125, 146), among many other works. Page references in this footnote are to the following edition: Muḥammad b. Ḥamza al-Fanārī, *ʿAyn al-aʿyān* (Istanbul: Rifʿat Bey Matbaʿası, 1325 [1907–8]). It also bears mentioning that during his stay in Cairo, al-Fanari studied with Akmal al-Din al-Babarti (d. 1384), one of the glossators of *al-Kashshāf* (Repp, *Müfti of Istanbul*, 77; Saleh, "Gloss as Intellectual History," 236). Al-Fanari himself wrote annotations on *al-Kashshāf*'s beginning section and a gloss on the *Anwār* (FSQT, 456–57).

 124. The information provided for al-Siwasi in this paragraph is based on Fidā’ Ḥassān Muḥammad al-Majdhūb, “*Uyūn al-tafsīr li-l-ḥudalā’ al-samāsīr: dirāsa wa-taḥqīq min awwal sūrat al-Naḥl ilā ākhir sūrat al-Aḥzāb*” (master’s thesis, al-Azhar University, n.d.), 14–19.
 125. For the distinction between “madrasa-style” and “encyclopedic” commentaries, see Saleh, *Formation of the Classical Tafsīr Tradition* (Leiden: Brill, 2004), 16–22. For a tripartite classification of *tafsīr* works according to length, see Ṭashkubrīzāda, *Miftāḥ al-saʿāda wa-miṣbāḥ al-siyāda* (Hyderabad: Dāʾirat al-Maʿārif al-Nizāmiyya, 1911), 1:430.
 126. Repp, *The Müfti of Istanbul*, 173–74.
 127. Al-Sakhāwī, *al-Ḍaw’ al-lāmi’* (Beirut: Dār Maktabat al-Ḥayāh), 1:241–42. For Ibn Hajar’s rather condescending remarks about al-Gurani, see *Inbā’ al-ghumr bi-abnā’ al-ghumr* (Cairo, 1969), 4:159. Cf. Repp, *The Müfti of Istanbul*, 167.
 128. Repp, *The Müfti of Istanbul*, 168–69.
 129. Hellmut Ritter, “Ayasofya kütüphânesinde tefsir ilmine âit arapça yazmalar,” *Türkiyat Mecmuası* 7–8 (1945): 1–93, at 64 (no. 52). Like the commentary of al-Kawashī, al-Gurani’s *tafsīr* is not published, nor does there seem to be a study of it in any European language. Its text has been edited piecemeal in several dissertations at al-Imam Muhammad Ibn Saud Islamic University in Riyadh, Saudi Arabia, but unfortunately I was not able to access any of these dissertations while writing this essay.
 130. *Al-Shaqāʾiq al-nuʾmāniyya*, 1:53. Hajji Khalifa reproduces the same characterization (*Kashf al-ẓunūn*, 1190). However, my perusal of the first few pages of al-Gurani’s *tafsīr* did not reveal an explicit reference to any commentary (based on Feyzullah Efendi 14253, available for download at <https://archive.org/download/M-turkiao2/14253.zip>, accessed July 25, 2016).
 131. There are only some twenty extant copies of this commentary (*FSQT*, 507).
 132. *FSQT*, 631.
 133. *Kashf al-ẓunūn*, 65–66.
 134. The seven readers whose systems were promoted by Ibn Mujahid are ‘Abdallah b. ‘Amir (d. 736), ‘Abdallah b. Kathir (d. 738), ‘Asim b. Abi l-Najud (d. 745), Abu ‘Amr b. al-‘Ala’ (d. 770), Hamza b. Habib al-Zayyat (d. 773), Nafi’ b. ‘Abd al-Rahman (d. 785), and ‘Ali b. Hamza al-Kisa’i (d. 804). See *Encyclopaedia of the Qurʾān* (Leiden: Brill, 2005–), s.v. “Readings of the Qurʾān,” by Fred Leemhuis.
 135. According to Shady Nasser, *al-Shāṭibīyya* “is still being memorized by hundreds, if not thousands, of professional Qurra’ and it is even being recorded in audio and video formats to make its memorization more accessible” (“The Two-Rāwī Canon before and after ad-Dānī (d. 444/1052–3): The Role of Abū’l-Ṭayyib Ibn Ghalbūn (d. 389/998) and the Qayrawān/Andalus School in Creating the Two-Rāwī Canon,” *Oriens* 41 [2013]: 41–75, at 73).
 136. This would be the *Kitāb al-Mabsūṭ* authored by Shams al-Din Muhammad b. Muhammad al-Samarqandi (fl. fourteenth century). However, an earlier scholar, Ibn Mihran (d. 991), had also produced a work titled *Kitāb al-Mabsūṭ*. The identity of the library’s *Kitāb al-Mabsūṭ* is therefore not clear.
 137. Nasser, “The Two-Rāwī Canon,” 43.

149. *Ibid.*, 53; emphasis added.
150. Thus, in an attempt to investigate the issue of decline ("décadence") in various fields of Sunni Muslim learning, Claude Gilliot posits that *tafsīr* was particularly susceptible to "sclerosis," because "un commentaire coranique classique est essentiellement un commentaire «en tradition», c'est-à-dire qu'une grande partie du texte est occupé par des traditions attribuées au Prophète et surtout à d'anciens exégètes, le reste l'étant essentiellement par des questions philologiques, grammaticales ou juridiques" (Claude Gilliot, "Évolution ou sclérose de la tradition," in *États, sociétés et cultures du monde musulman médiéval (X^e-XV^e siècle)*. Tome 3, *Problèmes et perspectives de recherche* [Paris: Presse Universitaires de France, 2000], 189). Bruce Fudge speaks of an "insistence on transmitted materials" among Muslim exegetes, and claims that "in the mainstream works this opinion is unanimous and unambiguous" (Bruce Fudge, "Qur'anic Exegesis in Medieval Islam and Modern Orientalism," *Die Welt des Islams* 46, no. 2 [2006]: 115–47, at 125). Farid Esack asserts that transmitted exegetical lore is "the bedrock of what is viewed as orthodox exegesis and represents the most commonly accepted mode of interpretation" (Farid Esack, *The Qur'an: A User's Guide* [Oxford: Oneworld, 2005], 131). In the same vein, he claims that al-Tabari's commentary is "[u]ndoubtedly the pinnacle of traditional *Tafsīr*" (*ibid.*, 132). However, Esack also recognizes the indispensability of analytical exegesis to the Muslim scholarly tradition (*ibid.*, 133).
151. The only evidence of influence that McAuliffe mentions for *Jāmi' al-bayān* is the fact that the Sāmānid Maṣṣūr b. Nūḥ (d. 976) "commissioned a Persian adaptation of it" soon after al-Tabari's death. As it happens, the imperial library's catalogue mentions a Persian "translation" (*tarjuma*) of al-Tabari's commentary on the second and third suras (no. 127). However, *Tafsīr-i Ṭabarī*, as this Persian work was usually known, is not exactly a translation of *Jāmi' al-bayān*. Rather, it is primarily a reproduction of some of the historical material available in al-Tabari's commentary as well as his *Annals*. The many exquisite manuscripts of *Tafsīr-i Ṭabarī* suggest that it was primarily an *objet d'art*, of interest not to scholars but to courts that could afford precious collectibles. Thus, the commissioning of this work does not show that al-Tabari's commentary was particularly influential in the field of exegesis. For a lucid analysis of the origins and literary character of *Tafsīr-i Ṭabarī*, see Travis Zadeh, *The Vernacular Qur'an: Translation and the Rise of Persian Exegesis* (Oxford: Oxford University Press, 2012), 310–15.
152. Saleh, *The Formation of the Classical Tafsīr Tradition*, 207.
153. Ṭāshkubrīzāda, *Miftāḥ al-sa'āda*, 1:415; Ḥājī Khalifa, *Kashf al-ẓunūn*, 437. See also Walid Saleh, "Marginalia and Peripheries: A Tunisian Historian and the History of Qur'anic Exegesis," *Numen: International Review for the History of Religions* 58, nos. 2–3 (2011): 284–313, at 298.
154. Saleh, *The Formation of the Classical Tafsīr Tradition*, 207. Cf. Saleh, "Marginalia and Peripheries," 298.
155. See, for instance, al-Dhahabī's categorization of these works in *al-Tafsīr wa-l-mufasssīrūn*, 1:163–74.
156. It is noteworthy that while these works have a conservative character, none of them is a mere collection of early exegetical lore. The personal judgment of the author is essential to the selection of material, and there is in fact much independent analysis of the Qur'anic text and the views of previous scholars. It may be possible to develop accurate definitions for *al-tafsīr bi-l-ma'thūr* and *al-tafsīr bi-l-ra'y* as mutually exclusive approaches to exegesis. However, historically speaking, these terms have been used in a variety of ways. For instance, *al-tafsīr bi-l-ra'y* is often used disparagingly to refer to unfounded exegetical speculation, not to analytical exegesis as such. A clear example of this usage appears in Ṭāshkubrīzāda's *Miftāḥ al-sa'āda*, 1:197. I am thankful to Khaled El-Rouayheb for drawing this passage to my attention.
157. An important exception to this dominant current is the late Ibn 'Ashur (d. 1970), the Grand Mufti of Tunisia, whose brief historical survey of Qur'anic exegesis—*al-Tafsīr wa-rījālūh*—provides a faithful depiction of the field of *tafsīr* as it was practiced in the premodern period. For a helpful introduction to this work and its significance, see Walid Saleh, "Marginalia and Peripheries."
158. McAuliffe, *Qur'anic Christians*, 28.
159. *Ibid.*

160. Ibid., 16–17.
161. McAuliffe discusses the same passage in an earlier study (“Quranic Hermeneutics: The Views of al-Ṭabarī and Ibn Kathīr,” in *Approaches to the History of the Interpretation of the Qurʾān*, ed. Andrew Rippin [Oxford: Clarendon Press, 1988], 46–62), which similarly does not mention the source of Ibn Kathīr’s remarks. In subsequent publications, McAuliffe provides a translation of select sections of Ibn Taymiyya’s *Muqaddima* (“Ibn Taymiyya: Treatise on the Principles of Tafsīr,” in *Windows on the House of Islam: Muslim Sources on Spirituality and Religious Life*, ed. John Renard [Berkeley: University of California Press, 1998], 35–43) and explicitly notes Ibn Kathīr’s indebtedness to this work (“The Tasks and Traditions of Interpretation,” in *The Cambridge Companion to the Qurʾān*, ed. Jane Dammen McAuliffe [Cambridge, UK: Cambridge University Press, 2006], 181–209, esp. 198). On Ibn Taymiyya’s treatise and its influence on Ibn Kathīr, see also Walid Saleh, “Ibn Taymiyya and the Rise of Radical Hermeneutics: An Analysis of *An Introduction to the Foundations of Qurʾānic Exegesis*,” in *Ibn Taymiyya and His Times*, ed. Shahab Ahmed and Yossef Rapoport (Oxford: Oxford University Press, 2010), 123–63, at 124.
162. Of course, McAuliffe recognizes that this part of the *Durr*’s prologue is a theoretical discussion of “the principles of Qurʾānic exegesis,” not a historical sketch of early *tafsīr* (McAuliffe, *Qurʾānic Christians*, 17; McAuliffe, “Quranic Hermeneutics,” 56–58). Nevertheless, she claims that “[t]he stages in this progression [of authoritative sources] nicely parallel the traditional Islamic view of the history of *tafsīr*” (McAuliffe, *Qurʾānic Christians*, 17).
163. Ibn Taymiyya, *Muqaddima fī uṣūl al-tafsīr*, ed. ‘Adnān Zarzūr (Kuwait: Dār al-Qurʾān al-Karīm, 1971), 93–104. An exception is when these early authorities are channeling Jewish and Christian lore, or what Ibn Taymiyya calls “the stories of the Israelites” (*al-aḥādīth al-isrāʾīliyya*) (ibid., 100). One should abandon such material, as it contradicts the knowledge available to Muslims (*mā ʿindanā*), by which Ibn Taymiyya presumably means the Qurʾān and the Sunna (ibid.).
164. Ibid., 46.
165. Ibn Kathīr, *Tafsīr al-Qurʾān al-ʿaẓīm*, ed. Sāmī b. Muḥammad al-Salāma, 8 vols. (Riyadh: Dār Tayyiba, 1999), 1:11.

167. Ibn Taymiyya, *Muqaddima*, 106.
168. Ibid., 105.
169. Ibid.
170. This concerns Qurʾān 18:22, which relates three views from Christians concerning the Sleepers of Ephesus: “They will say [the sleepers] were three, their dog being the fourth of them; and they will say five, their dog being the sixth of them. Guessing at the unseen! And they will say seven, their dog being the eighth of them.” In a clear example of *al-tafsīr bi-l-raʾy*, Ibn Taymiyya argues that the correct view is indeed the third one (i.e., there were seven sleepers). This is because, he notes, the interjection “guessing at the unseen” appears after the first two theories—thereby rejecting them—while no such interjection follows the third theory. Had this theory also been incorrect, Ibn Taymiyya asserts, the Qurʾān would have surely rejected it as well (Ibn Taymiyya, *Muqaddima*, 101).
171. Walid Saleh, “Radical Hermeneutics,” 152–53. Note, however, that the commentary of Ibn Abi Hatim is extant and has been published (*Tafsīr Ibn Abī Ḥatīm al-Rāzī*, ed. Aḥmad Fathī ‘Abd al-Raḥmān Ḥijāzī, 7 vols. [Beirut: Dār al-Kutub al-ʿIlmiyya, 2006]).

24. Same as no. 8, the first half missing, 19 {15}.
25. Same as no. 20, 19 {16–17}.
26. “*Ḥāshiyat Sharḥ al-Kashshāf*,” 19 {17}. A gloss on a commentary on *al-Kashshāf*.
27. Sa’d al-Dīn Mas‘ūd b. ‘Umar al-Taftāzānī (d. 1390). *Ḥāshiyat al-Kashshāf* (Gloss on *al-Kashshāf*), ca. 1390,⁷ Arabic, 19 {17–18}.
28. Same as above, 19 {18–19}.
29. Same as above, 19 {19}.
30. Same as above, 20 {1–2}. From sura *al-Nisā’* [4] to the middle of sura *Yūnus* [10].
31. “*Kitāb ḥāshiyat ḥāshiyat Sa’d al-Dīn li-l-Kashshāf*,” 20 {2–3}. A gloss on no. 27, that is, a supergloss on *al-Kashshāf*.⁸
32. Same as no. 27, 20 {3–4}.
33. Same as above, partial, 20 {4–5}. From sura *Ṣād* [38] to sura *al-Fath* [48].
34. Abū al-Ḥasan ‘Alī b. Muḥammad b. ‘Alī al-Ḥanafī al-Jurjānī (al-Sayyid al-Sharīf) (d. 1413). *Ḥāshiyat al-Kashshāf* (Gloss on *al-Kashshāf*), Arabic, 20 {5–6}. EDITION: Abū al-Ḥasan al-Sayyid al-Sharīf al-Jurjānī, *al-Ḥāshiya ‘alā al-Kashshāf li-l-Zamakhsharī*, ed. Rashīd b. ‘Umar A’raḍī (Beirut: Dār al-Kutub al-‘Ilmiyya, 2016).
35. Same as above, 20 {6}.
36. Same as above, 20 {6–7}.
37. Same as above, 20 {7}.
38. Same as above,⁹ 20 {8–9}.
39. Same as above, 20 {9–10}.
40. Same as above, 20 {10–11}.
41. Same as above, 20 {11–12}.
42. Same as above, 20 {12}.
43. Same as no. 38, 20 {13–14}.
44. “*Risālat al-I’tirāḍāt ‘alā ḥāshiyat al-Sayyid al-Sharīf ‘alā al-Kashshāf*,” 20 {15–16}. An examination of criticisms leveled against al-Jurjānī’s gloss on *al-Kashshāf*.
45. Muḥyī al-Dīn Muḥammad b. Ibrāhīm b. al-Khaṭīb al-Rūmī (Khaṭīb-zāde) (d. 1495). *Ḥāshiyat al-Kashshāf* (Gloss on *al-Kashshāf*),¹⁰ Arabic, 20 {16–17}.
46. ‘Abdalkarīm b. ‘Abdallāh al-Ḥanafī (Abdülkerim Efendi) (d. ca. 1494–95),¹¹ *Ḥāshiyat al-Kashshāf fī al-zahrāwayn* (Gloss on *al-Kashshāf* Concerning the Two Brilliant Suras [*al-Baqarah* and *Āl-i ‘Imrān*]),¹² Arabic, 20 {17–18}.
47. “*Kitāb Tawḍīḥ mushkilāt al-Kashshāf*” (Treatise on Elucidating the Problems of *al-Kashshāf*),¹³ 20 {18}.
48. “*Miftāḥ al-kunūz al-muntakhab min al-Kashshāf*” (Key to Treasures Selected from *al-Kashshāf*). The first volume extant (not clear how many in total), 20 {19}.
49. “*Kitāb Ḥāshiyat al-Kashshāf*” (Gloss on *al-Kashshāf*). 20 {19}–21 {1}.

50. Same as above, 21 {1}.
51. "*Ḥāshiyat Kashshāf*" (Gloss on *al-Kashshāf*), 21 {1–2}. A work containing annotations on *al-Kashshāf* from sura *Maryam* [19] to sura *al-Shu'arā'* [26]. Not clear how many volumes in total.
52. "*Kitāb al-abḥāth fī al-Kashshāf wa-ḥawāshih*" (Investigations Concerning *al-Kashshāf* and Its Glosses), 21 {2–3}.
53. "*Risālat ḥāshiya li-ḥawāshī al-Kashshāf*" (A Gloss on the Glosses of *al-Kashshāf*), 21 {3–4}.
54. "*Risālat ḥāshiya li-l-Kashshāf wa-li-ḥawāshih*" (Gloss on *al-Kashshāf* and Its Glosses), 21 {4}.
55. "*Kitāb ḥāshiyat mawlānā Quṭb al-Dīn 'alā al-Kashshāf*" (Gloss on *al-Kashshāf*), 21 {5}. The author of this gloss may be Quṭb al-Dīn al-Rāzī al-Taḥṭānī (Muḥammad b. Muḥammad, d. 1364),¹⁴ or perhaps the later Quṭb al-Dīn al-Iznīqī (Muḥammad b. Muḥammad, d. 1480), who is cited elsewhere in the inventory as "*mawlānā Quṭb al-Dīn al-Iznīqī*" (127 {11}).¹⁵
56. "*Ḥāshiyat al-Kashshāf*" (Gloss on *al-Kashshāf*), 21 {6}.
57. Attributed to Muḥyī al-Dīn Abū 'Abdallāh Muḥammad b. 'Alī b. al-'Arabī (Ibn al-'Arabī, d. 1240). *Al-Taḥsīr* (Exegesis [of the Qur'an]), 3 vols., 21 {6–7}. According to the inventory, "it is written" (*marqūm*) that this commentary belongs to Ibn al-'Arabī. Such a turn of phrase suggests the cataloguer was skeptical about this attribution. Indeed, in the premodern period (and even until the present day) the Qur'an commentary of 'Abd al-Razzāq al-Kāshānī (d. 1330) was often attributed mistakenly to Ibn al-'Arabī, so perhaps the volume in question contained al-Kāshānī's commentary.¹⁶ Nevertheless, it appears that Ibn al-'Arabī did write exegetical works on the Qur'an, even though none seems to have survived.¹⁷
58. Abū 'Abdallāh Muḥammad b. Aḥmad b. Abī Bakr al-Qurṭubī (d. 1272). *Al-Jāmi' li-aḥkām al-Qur'ān wa-al-mubayyin li-mā taḍammanahu min al-sunna wa-āy al-Furqān* (The Compendium of the Legal Rulings of the Qur'an, and the Elucidator of What Pertains to It [the Compendium] from the Sunna and the Verses of the Furqān),¹⁸ Arabic, 3 vols., 21 {7–9}. EDITION: *Al-Jāmi' li-aḥkām al-Qur'ān*, ed. Aḥmad 'Abd al-'Alīm al-Bardūnī et al., 20 vols. (Cairo: Dār al-Kātib al-'Arabī, 1967).
59. Same as above, in 4 vols., 21 {9–10}.
60. Abū Muḥammad al-Ḥusayn b. Mas'ūd b. Muḥammad al-Baghawī (d. 1122).¹⁹ *Ma'ālim al-tanzīl* (Guideposts of Revelation), Arabic, 21 {11}. EDITION: *Ma'ālim al-tanzīl*, Beirut: Dār al-Ma'rifa, 1987.
61. Same as above, in 3 vols., 21 {12}.
62. Nāṣir al-Dīn Abū Sa'īd 'Abdallāh b. 'Umar b. Muḥammad al-Bayḍāwī (d. ca. 1300).²⁰ *Anwār al-tanzīl wa-asrār al-ta'wīl* (Lights of Revelation and Secrets of Interpretation), before 685 H, Arabic, 21 {13}. EDITION: *Anwār al-tanzīl wa-asrār al-ta'wīl, al-ma'rūf bi-tafsīr al-Bayḍāwī*, ed. Muḥammad 'Abd al-Raḥmān al-Mar'ashlī, 5 vols. (Beirut, Dār Iḥya' Turāth al-'Arabī, 1998).
63. Same as above, 21 {13–14}.
64. Same as above, 21 {14–15}.
65. Same as above, 21 {15}.
66. Same as above, 21 {16}.
67. Same as above, 21 {16–17}.
68. Same as above, 21 {17–18}.
69. Same as above, 21 {18}.
70. Same as above, 21 {18.5}.
71. Same as above, 21 {19}.
72. Same as above, 21 {19}–22 {1}.
73. Same as above, 22 {1–2}.
74. Same as above, 22 {2}.

75. Same as above, 22 {3}.
76. Same as above, 22 {3–4}.
77. Same as above, 22 {4}.
78. Same as above, 22 {5}.
79. Same as above, 22 {5–6}.
80. “*Hāshiyat Tafṣīr al-Qāḍī li-l-zahrāwayn*,” 22 {6}. Based on the information provided in *Kashf al-ẓunūn* (Istanbul: 1941–43), 190–93, on the works written on *Anwār al-tanzīl*, this gloss may belong to Nūr al-Dīn Ḥamza b. Maḥmūd al-Qarāmānī (d. 1466–67) or Muḥyī al-Dīn Muḥammad b. al-Qāsim (d. 1498–99).
81. Same as above, 22 {7}.
82. “*Hāshiyat Tafṣīr al-Qāḍī*,” 22 {7}. A gloss on no. 62 (al-Bayḍāwī’s *Anwār al-tanzīl*).
83. Same as above, the first half missing, 22 {8}.
84. Yūsuf b. Junayd al-Tūqātī Akhī Ḥelebi (d. ca. 1496).²¹ *Mushāhadat anwār al-tanzīl fi mujāhadat asrār al-ta’wīl* (Witnessing the Lights of Revelation in Striving for the Secrets of Interpretation), Arabic, 22 {9–10}. A gloss on the commentary of al-Bayḍāwī on suras *Hūd* [11] and *Yūsuf* [12].²²
85. Muḥammad b. Muṣṭafā b. al-Ḥājj Ḥasan (Ḥājj Ḥasan-zāde) (d. 1505).²³ *Al-Risāla al-sultāniyya fi ḥawāshī tafṣīr al-Qāḍī al-Bayḍāwī li-sūrat al-An’ām* (A Treatise for the Sultan concerning Glosses on the Commentary of the Judge al-Bayḍāwī on Sura *al-An’ām*), ca. 900,²⁴ Arabic, 22 {10–11}. Dedicated to Sultan Bayezid II.²⁵
86. “*Risāla fi āyat Hārūt wa-Mārūt ‘alā mā fi tafṣīr al-Qāḍī*” (A Treatise concerning the Verse of Hārūt and Mārūt [Q 2:102] Based on the Commentary of al-Qāḍī [al-Bayḍāwī]), 22 {11–12}.
87. Ḥakīm al-Dīn Idrīs b. Ḥusām al-Dīn ‘Alī al-Bidlīsī (d. 1520). *Hāshiyat Tafṣīr al-Qāḍī* (Gloss on the Commentary of al-Qāḍī [al-Bayḍāwī]),²⁶ Arabic, 22 {12–13}.
88. “*Hāshiyat Tafṣīr al-Qāḍī*” (Gloss on the Commentary of al-Qāḍī), Arabic, 22 {13}.
89. “*Kitāb al-Taysīr fi al-tafṣīr*,” Arabic 22 {13–14}. This work, of which the inventory lists three more copies (nos. 90, 98, 99), is most likely the popular commentary by Najm al-Dīn Abū Ḥafṣ ‘Umar b. Muḥammad al-Nasafī (d. 1142), the eponymous author of the celebrated *‘Aqīdat al-nasafiyya*.²⁷ Al-Nasafī wrote this commentary in two years (January 1127 to February 1129).²⁸
90. Same as above, Arabic, 22 {14–15}.
91. Kamāl al-Dīn ‘Abd al-Razzāq al-Kāshānī (d. ca. 1329).²⁹ *Ta’wīlāt al-Qur’ān* (Interpretations of the Qur’an) = *Ḥaqā’iq al-ta’wīl fi daqā’iq al-tanzīl* (True Interpretations concerning the Subtleties of Revelation),³⁰ Arabic, 22 {15}. EDITION: *Tafṣīr al-Qur’ān al-karīm* (Beirut: Dār al-Yaqza al-‘Arabiyya, 1968).
92. Rashīd al-Dīn Abū al-Faḍl Aḥmad b. Abī Sa’d al-Maybudī (d. after 1126). *Kashf al-asrār wa-‘uddat al-abrār*³¹ (Unveiling of Secrets and Provision for the Righteous), begun in 520/1126,³² Persian-Arabic,³³ 22 {16–17}. EDITION: *Kashf al-asrār wa-‘uddat al-abrār, ma’rūf be Tafṣīr-e Khwāja ‘Abdallāh Anṣārī*, ed. Ali Asghar Hekmat, 10 vols. (Tehran: Intishārāt-i Dānishgāh-i Tihirān, 1953–61).
93. Same as above, 22 {17–18}.
94. Same as above, 22 {18–19}.
95. “*Kashf al-asrār*” (Unveiling of Secrets), 2 vols., Arabic, 22 {19}. This may be the work of Jamāl al-Dīn Abū al-Faḍā’il Yūsuf b. Hilāl al-Ṣafādī (d. 1296), who wrote a commentary titled *Kashf al-asrār wa-hatḥ al-astār*.³⁴
96. Abū al-Ḥasan ‘Alī b. Aḥmad b. Muḥammad al-Naysābūrī al-Wāḥidī (d. 1076). *Al-Wajīz fi tafṣīr al-Qur’ān al-‘azīz* (The Compendium: Exegesis of the Sublime Qur’ān) = *al-Tafṣīr al-wajīz* (The

- Compendious Commentary),³⁵ written before 446/1054,³⁶ Arabic, 23 {1}. EDITION: *al-Wajīz*, ed. Ṣafwān 'Adnān Dāwūdī (Damascus: Dār al-Qalam, 1995).
97. Same as above, 23 {1–2}.
 98. Same as no. 89, 4 vols., 23 {2}.
 99. Same as no. 89, 23 {3}.
 100. Same as no. 91, in 3 vols. (2nd volume missing), 23 {3}.
 101. Ḥujjat al-Islām Abū Ḥamid Muḥammad b. Muḥammad al-Ghazālī (d. 1111). *Jawāhir al-Qur'ān wa-duraruh* (The Jewels and Pearls of the Qur'an), ca. 495/1102,³⁷ Arabic, 23 {4}. EDITION: *Jawāhir al-Qur'ān wa-dururuhu*, ed. Riḍwān Jāmi' Riḍwān (Cairo: Dār al-Ḥaram li-l-Turāth, 2004).
 102. Same as above, 23 {4–5}.
 103. "*Risāla fī Tafsīr al-Fakhr al-Rāzī fī sūrat al-'Aṣr*" (A Treatise on the Commentary of al-Fakhr al-Rāzī on Sura *al-'Aṣr*), 23 {5–6}.
 104. "*Tarjamat al-Tafsīr al-wajīz bi-al-fārisiyya*" (Persian Translation of *al-Tafsīr al-wajīz*), Persian, 23 {6}.³⁸ A translation of no. 96, above.
 105. Ḥāfiẓ al-Dīn Abū al-Barakāt 'Abdallāh b. Aḥmad al-Nasafī (d. 1310). *Madārik al-tanzīl wa-ḥaqā'iq al-ta'wīl* (Insights of Revelation and Truths of Interpretation), Arabic, 23 {7}. EDITION: *Tafsīr al-Nasafī: Madārik al-tanzīl wa-ḥaqā'iq al-ta'wīl*, ed. Yūsuf 'Alī Bdaiwī, 3 vols. (Beirut: Dār al-Kalim al-Ṭayyib, 1998).
 106. Same as above, 23 {7–8}.
 107. Same as above, 2 vols., 23 {8}.
 108. Shihāb al-Dīn Abū al-'Abbās Aḥmad b. Ismā'īl Mullā al-Gūrānī (d. 1488). *Ghāyat al-amānī fī tafsīr al-kalām al-rabbānī* (The Ultimate Aim of Aspirations: Exegesis of Divine Speech) = *Ghāyat al-amānī fī tafsīr al-sab' al-mathānī* (The Ultimate Aim of Aspirations: Exegesis of the Seven Oft-Repeated Texts),³⁹ 860/1456–867/1463,⁴⁰ Arabic, 23 {9}. Edited in seven dissertations at Al-Imam Muhammad Ibn Saud Islamic University in Riyadh, Saudi Arabia: Ḥamid b. Ya'qūb al-Furayh (suras 1–3), Yūsuf b. 'Abd al-'Azīz al-Shibil (suras 4–7), Muḥammad b. Sarī' al-Sarī' (suras 8–14), al-'Abbās b. Ḥusayn al-Ḥāzimī (suras 15–22), Hādī b. 'Alī al-Radīnī (suras 23–35), 'Abdallāh b. 'Alī al-Mujhidī (suras 36–52), al-Jawhara Muḥammad al-'Anqarī (suras 53–114).
 109. Same as above, 23 {9–10}.
 110. Muwaffaq al-Dīn Abū al-'Abbās Aḥmad b. Yūsuf al-Shaybānī al-Kawāshī (d. 1281),⁴¹ Arabic, 23 {10}. Al-Kawāshī wrote an extensive commentary, on the basis of which he then produced a shorter commentary. The former work is known as *Tabṣīrat al-mutadhakkir wa-tadhkirat al-mutabaṣṣir fī tafsīr al-Qur'ān* (Elucidation for the Mindful and Reminder for the Watchful: Exegesis of the Qur'an), as well as *al-Tafsīr al-kabīr* (The Great Commentary).⁴² The latter is known as *al-Talkhīṣ fī al-tafsīr* (Abridgment: On Exegesis), as well as *al-Tafsīr al-ṣaghīr* (The Short Commentary).⁴³ He finished The Short Commentary in 649/1251.⁴⁴ Various overlapping parts of the larger text have been edited in dissertations at the Islamic University in Medina and al-Azhar University in Cairo.⁴⁵
 111. Same as above, 23 {11}.
 112. Same as above, the second half missing, 23 {11–12}.
 113. Shihāb al-Dīn Aḥmad b. Maḥmūd al-Sīwāsī (d. 1455).⁴⁶ *Uyūn al-tafāsīr li-l-fuḍalā' al-samāsīr* (Finest Interpretations for the Benefit of Astute Scholars)⁴⁷ = *Tafsīr al-Shaykh* (The Master's Commentary), Arabic, 23 {12–13}. EDITION: *Uyūn al-tafāsīr li-l-fuḍalā' al-samāsīr al-mashhūr bi-Tafsīr al-Shaykh*, ed. Bahattin Dartma, 4 vols. (Beirut: Dār Ṣādir, 2006).
 114. Same as above, 2 vols., 23 {13–14}.
 115. Same as no. 91, 23 {14}.

116. “*As’īlat al-Qur’ān*” (Questions about the Qur’an), 23 {15}. Perhaps the same as no. 125, below.⁴⁸
117. “*Asbāb nuzūl al-Qur’ān al-karīm*” (Occasions of the Noble Qur’an’s Revelation),⁴⁹ 23 {15–16}.
118. Abū Maṣṣūr Muḥammad b. Muḥammad al-Māturīdī (d. ca. 944).⁵⁰ *Ta’wīlāt ahl al-sunna* (Interpretations of the Adherents of Sunna) = *Ta’wīlāt al-Qur’ān* (Interpretations of the Qur’an), Arabic, 3 vols. extant (from beginning until end of sura *al-Ra’d* [13]), 23 {16–17}. EDITION: *Ta’wīlāt al-Qur’ān*, ed. Ahmet Vanhoğlu et al., 18 vols. (Istanbul: Dār al-Mizān, 2005–11).
119. Same as above, 3 vols. extant, 23 {17–18}.
120. ‘Alā’ al-Dīn Abū Bakr Muḥammad b. Aḥmad al-Māturīdī al-Samarqandī (d. ca. 1145).⁵¹ *Sharḥ Ta’wīlāt al-Māturīdī* (Commentary on the *Ta’wīlāt* of al-Māturīdī), Arabic, 23 {19}–24 {1}. MANUSCRIPTS: Süleymaniye, Hamidiye 176, 1765–67 (commissioned by Sultan Mustafa III, stamp of Sultan Abdulhamid I).⁵²
121. Abū al-Layth Naṣr b. Muḥammad al-Samarqandī (d. ca. 983).⁵³ *Tafsīr al-Qur’ān* (Commentary on the Qur’an), Arabic, 24 {1}. EDITION: *Tafsīr al-Samarqandī al-musammā Baḥr al-‘ulūm*, ed. ‘Alī Muḥammad Mu‘awwaḍ et al. (Beirut: Dār al-Kutub al-‘Ilmiyya, 1993).⁵⁴
122. Sharaf al-Dīn Abū ‘Alī al-Ḥusayn b. ‘Abdallāh b. Muḥammad al-Ṭībī (d. 1342).⁵⁵ *Futūḥ al-ghayb fī al-kashf ‘an qinā’ al-rayb* (Revelations from the Unseen in Uncovering the Veil of Doubt), Arabic, 24 {2}. EDITION: *Futūḥ al-ghayb fī al-kashf ‘an qinā’ al-rayb wa-huwa ḥāshiyat al-Ṭībī ‘alā al-Kashshāf*, ed. Muḥammad ‘Abd al-Raḥīm Sulṭān al-‘Ulamā’ et al., 17 vols. (Dubai: Jā’izāt Dubayy al-Duwaliyya li-l-Qur’ān al-karīm, 2013).
123. “*Risāla fī tafsīr ba’ḍ āyāt al-Ḥajj*” (A Treatise on the Exegesis of Some Verses of al-Ḥajj),⁵⁶ 24 {3}.
124. “*Al-Tafsīr al-Fārisī*,” second half missing, 24 {3–4}. Either a Persian commentary or a commentary by a scholar named al-Fārisī.⁵⁷
125. Zayn al-Dīn Abū ‘Abdallāh Muḥammad b. Abī Bakr al-Rāzī (d. after 1268).⁵⁸ *Unmūdhaj Jalīl fī as’īla wa-ajwiba min gharā’ib āy al-tanzīl* (A Noble Exemplar: Questions and Answers for Recondite Issues in the Verses of Revelation) = *As’īlat al-Qur’ān wa-ajwibatuhā* (Questions about the Qur’an and Their Answers).⁵⁹ EDITION: *Tafsīr al-Rāzī al-musammā bi-Unmūdhaj Jalīl fī as’īla wa-ajwiba min gharā’ib āy al-tanzīl*, ed. Muḥammad Riḍwān al-Dāya (Beirut: Dār al-Fikr al-Mu‘āṣir, 1990).
126. “*Kitāb al-Tafsīr min sūrat al-Mulk ilā ākhir al-Qur’ān*” (Commentary from Sura *al-Mulk* [67] to the End of the Qur’an), 24 {5}.
127. “*Kitāb Tarjamat Tafsīr al-Ṭabarī bi-al-fārisiyya li-l-zahrāwayn*,” Persian, 24 {6}. Persian Translation of Ṭabarī’s *Tafsīr* on the Two Luminaries (al-Baqarah [Qur’an 2] and Āl-i ‘Imrān [Qur’an 3]). EDITION: *Tarjama-yi Tafsīr-i Ṭabarī: Farāham āmada dar zamān-i saltanat-i Maṣṣūr b. Nūḥ Sāmānī, 350 tā 366 hījri*, ed. Ḥabīb Yaghmā’ī, 7 vols. (Tehran: Intishārāt-i Dānishgāh-i Tihirān, 1961–88).
128. Shams al-Dīn Muḥammad b. Ḥamza al-Fanārī (d. 1431). *Tafsīr sūrat al-Fātiḥa* (Commentary on Sura *al-Fātiḥa* [1]) = ‘*Ayn al-a’yān*’ (The Noblest of Nobles), ca. 1402,⁶⁰ Arabic, 24 {6–7}. EDITION: ‘*Ayn al-a’yān*’, Istanbul: Rıfat Bey Matbaası, 1325 [1907–8].
129. “*As’īla wa-ajwiba ‘alā kutub al-tafāsīr*” (Questions and Answers Pertaining to Books of [Qur’anic] Exegesis), 24 {7}.
130. Ḥamid al-Dīn Aḥmad b. Afḍal al-Dīn Muḥammad al-Ḥusaynī (Efdalzade) (d. 1502–3). “*Kitāb fī tafsīr al-āyāt wa-tabyīn ṣifāt Allāh ta’ālā*” (A Book concerning Exegesis of [Qur’anic] Verses and Elucidation of the Attributes of God), 24 {8–9}.
131. Same as no. 125, 24 {9}.
132. “*Khulāṣat al-Fātiḥa*” (Core [Teachings] of al-Fātiḥa [1]), 24 {10}.

133. "*Nāsikha wa-mansūkha*" (Abrogating and Abrogated [Verses]),⁶¹ 24 {10–11}.
134. "*Risāla fī tafsīr sūrat al-Ikhlāṣ wa-al-Mu'awwidhatayn wa-risāla fī ba'd al-asrār fī al-suwar fī mujallad wāḥid*," 24 {11–12}. A treatise on the last three suras of the Qur'an,⁶² and a treatise on "some secrets in the suras."
135. "*Tafsīr sūrat al-Dukhān*," 24 {12}. A commentary on sura *al-Dukhān* [44].⁶³
136. "*As'ūlat al-Qur'ān wa-al-ḥadīth*" (Questions on the Qur'an and Hadith), 24 {13}. The author may be Jalāl al-Dīn Muḥammad b. Maḥmūd al-Āqsarā'ī (d. 1512), a contemporary of Sultan Bayezid II.⁶⁴ A later section of the inventory (96 {17–18}, on *fiqh*) refers to *As'ila li-Āqsarā'ī bi-al-fārisiyya*, which may be the same work.
137. "*Kitāb fī daqā'iq ba'd al-suwar*," 24 {13–14}.
138. "*Kitāb tafsīr al-Fātiḥa*," 24 {14–15}. A commentary on sura *al-Fātiḥa* [1].⁶⁵
139. "*Risālat tarjamāt tafsīr sūrat al-Ikhlāṣ bi-al-fārisiyya wa-Risālat tafsīr sūrat al-Ikhlāṣ bi-al-'arabiyya fī mujallad*," 24 {15–16}. An Arabic commentary on sura *al-Ikhlāṣ* [112], and a Persian translation of the (same?) commentary on sura *al-Ikhlāṣ* [112], in one volume.
140. "*Tafsīr sūrat Yūsuf 'alayhi al-salām ma'a qisṣat Yūsuf 'alayhi al-salām wa-tafsīr sūrat al-Ra'd bi-al-fārisiyya*," Persian, 24 {16–18}. A commentary on sura *Yūsuf* [12], the story of Joseph, and a commentary on sura *al-Ra'd* [13].
141. Shams al-Dīn Abū al-Thanā' Maḥmūd b. 'Abd al-Raḥmān al-Iṣfahānī (d. 1349). *Anwār al-ḥaqā'iq al-rabbāniyya fī tafsīr al-Laṭā'if al-qur'āniyya*⁶⁶ (Lights of Divine Truths in Exegesis of the Qur'an's Subtleties), ca. 1345,⁶⁷ Arabic, 24 {18–19}. Walid Saleh ("Gloss as Intellectual History: The *Ḥāshiyas* on *al-Kashshāf*," *Oriens* 41 (2013), 230n36) describes this work as "one of the most popular glosses on *al-Kashshāf*," though this is not borne out by the number of copies recorded in *FSQT* (405–6). According to *Kashf al-zunūn* (1482), this work brings together the insights of *al-Kashshāf* and *Maḥfātīḥ al-ghayb*. Edited piecemeal in the following dissertations at Imam Muhammad Ibn Saud Islamic University at Riyadh: Ibrāhīm b. Sulaymān b. Qumaysh al-Huwaymil (suras 1–2), 'Abd al-Raḥmān b. Nāṣir b. 'Abd al-'Azīz al-Yūsuf (suras 4–5), Badr b. Nāṣir al-Badr (suras 6–7), 'Abdallāh b. 'Abd al-'Azīz al-Ḥikma Āl Ḥusayn (suras 8–10), Riyāḍ Muḥammad al-Musaymīrī (suras 11–16), Jamāl al-Dīn b. Aḥmad al-Qādirī (suras 17–22), Wafā' bt. Ibrāhīm b. 'Abd al-Hādī al-'Assāf (suras 23–29), Al-Zahrā' bt. Muḥammad b. 'Abd al-'Azīz al-Tuwayjirī (suras 30–38), Ṣalāḥ al-Dīn Zaytara (suras 39–53), 'Abd al-Mun'im b. Ḥawās b. Muḥammad al-Ḥawās (suras 54–114).
142. Abū al-Qāsim 'Abd al-Karīm b. Hawāzin al-Qushayrī (d. 1072). *Laṭā'if al-ishārāt* (Subtleties of Allusions), begun in 437/1045–46,⁶⁸ Arabic, 24 {19}–25 {1}. EDITION: *Laṭā'if al-ishārāt: Tafsīr ṣūfi kāmīl li-l-Qur'ān al-karīm*, ed. Ibrāhīm Basyūnī (Cairo: Dār al-Kātib al-'Arabī, 1968).
143. Muḥammad b. Farāmarz al-Rūmī al-Ḥanafī (Mullā Khusraw) (d. 1480).⁶⁹ *Naqd al-afkār fī radd al-anzār* (Examination of Ideas in Refutation of Speculations), Arabic, 25 {2–3}.⁷⁰
144. "*Bayān al-isti'ādha wa-al-basmala*," 25 {3–5}. A treatise on the two speech acts that precede recitation of the Qur'an, namely, seeking refuge in God from Satan (*isti'ādha*) and invoking God's name (*basmala*).⁷¹
145. "*Risāla fī khawāṣṣ al-isti'ādha wa-al-tasmiya wa-āyat al-kursī*," 25 {5–6}. A treatise on the two just-mentioned speech acts (*isti'ādha* and *basmala/tasmiya*) as well as the "Throne Verse" (i.e., Q 2:255).
146. "*Risāla fī qawlihi ta'ālā 'inna Allāh ishtarā min al-mu'minīn anfusahum wa-amwālahum' al-āya*," 25 {6–7}. A treatise on Q 9:111, which is the only verse that mentions the Torah, the Gospel, and the Qur'an.

147. "*Kitāb al-Madārik fī tafsīr al-Qurʾān al-ʿazīm*,"⁷² 25 {7–8}.
148. "*Kitāb al-Asʿila al-mutaʿalliqa bi-al-Qurʾān*," 25 {8–9}. A treatise containing questions about the Qurʾan.
149. Nūr al-Dīn Abū Ḥanīfa ʿAbd al-Wahhāb b. Muḥammad al-Būnī (d. fifth century).⁷³ *Al-Fuṣūl* (The Divisions), Arabic, 25 {9–10}.
150. Muḥibb al-Dīn Abū al-Baqāʾ ʿAbdallāh b. al-Ḥusayn al-ʿUkbarī (d. 1219). *Al-Tibyān fī iʿrāb al-Qurʾān* (The Exposition: On the Qurʾan's Grammar), Arabic, 25 {10}. EDITION: *Al-Tibyān fī iʿrāb al-Qurʾān*, ed. ʿAlī Muḥammad al-Bajāwī (Cairo: ʿIsā al-Bābī al-Ḥalabī, 1976).
151. "*Mukhtaṣar fī tafsīr al-Qurʾān*," 25 {11}. This might be the same work as no. 96, above.⁷⁴
152. Shams al-Dīn Aḥmad b. Khalīl al-Khuṭī (d. 1240).⁷⁵ *Aqālīm al-taʿālīm fī al-funūn al-sabʿa* (Climes of Learning: On the Seven Disciplines) = *Yanābīʿ al-ʿulūm* (Wellsprings of Sciences), 630/1232,⁷⁶ Arabic, 25 {11–12}.
153. "*Ijāz al-bayān*,"⁷⁷ 25 {12–13}.
154. Muḥyī al-Dīn Abū ʿAbdallāh Muḥammad b. Sulaymān al-Kāfiyājī (d. 1474). *Nuzhat al-ikhwān fī tafsīr qawlihi taʿālā* "*qālū yā Lūṭ innā rusul rabbik*" *ilā ākhirih* (Delight of the Brethren: On the Exegesis of God's Statement, "They said: 'O Lot, we are the messengers of your Lord' [Q 11:81], etc."), Arabic, 25 {13–14}.
155. "*Risāla fī kashf... ʿan qawlihi taʿālā* ʿAllāh waliyy alladhīna āmanū yukhrijuhum min al-ẓulumāt ilā al-nūr," 25 {15–17}. A treatise on Q 2:256, or perhaps on a certain scholar's commentary on Q 2:256. The author (of the treatise or of the commentary discussed in the treatise) is described as *quṭb al-ʿarifīn* ʿAbd al-Raḥmān quddisa sirruh. Perhaps this is the famed poet ʿAbd al-Raḥmān al-Jāmī (d. 1492), who began writing a commentary on the Qurʾan,⁷⁸ and whose name appears elsewhere in the inventory in a similarly reverent fashion (although never with the epithet *quṭb al-ʿarifīn*).⁷⁹
156. "*Risāla fī qawlihi taʿālā* ʿAllāh waliyy alladhīna āmanū yukhrijuhum min al-ẓulumāt ilā al-nūr" *al-āya*,"⁸⁰ 25 {17–18}. A treatise on Q 2:256.
157. "*Risāla fī tafsīr sūrat al-ʿAṣr wa-Risālat tafsīr qawlihi taʿālā* ʿyā ayyuhā alladhīna āmanū iṣbirū wa-ṣābirū" *al-āya*," 25 {18}–26 {1}. A treatise on sura *al-ʿAṣr* [103], and another on Q 3:200.⁸¹
158. "*Nuzhat al-aṣḥāb fī tafsīr qawlihi taʿālā* ʿwa-law yuʾakhid Allāh al-nās bi-mā kasabū mā taraka ʿalā ẓahrihā min dābbaʾ," 26 {1–3}. A commentary, named "Delight of the Companions," on Q 35:45.
159. Fakhr al-Dīn Abū ʿAbdallāh Muḥammad b. ʿUmar b. al-Ḥusayn al-Rāzī (d. 1210). *Risāla fī al-tanbīh ʿalā baʿḍ al-asrār al-mūdaʿa fī baʿḍ suwar al-Qurʾān al-ʿazīm wa-al-Furqān al-karīm* (A Treatise Calling Attention to Some of the Secrets Deposited in Some of the Suras of the Great Qurʾan and the Noble Furqān), Arabic, 26 {3–5}. A work discussing various aspects of the four suras of *al-Ikhḷāṣ* [112], *al-Aʿlā* [87], *al-Tīn* [95], and *al-ʿAṣr* [103]. EDITION: *Risāla fī al-tanbīh ʿalā baʿḍ al-asrār al-mūdaʿa fī baʿḍ suwar al-Qurʾān al-ʿazīm*, ed. Bahattin Dartma (Amman, Jordan: Dār Ibn al-Jawzī, 2004).
160. "*Risāla fī bayān al-Fātiḥa*," 26 {5}. A commentary on sura *al-Fātiḥa* [1].
161. "*Risālat al-asʿila wa-al-ajwiba al-wāqiʿa fī ʿurs al-Sulṭān*," 26 {5–6}. Apparently the account of a discussion session pertaining to Qurʾanic exegesis held in the Sultan's presence during a feast.⁸²
162. "*Al-Rawḍa al-fāʾiḥa fī tafsīr al-Fātiḥa*" (The Verdant Garden: Exegesis of *al-Fātiḥa* [1]), 26 {7}.
163. "*Kitāb fī asrār al-Fātiḥa*,"⁸³ 26 {7–12}. A commentary on sura *al-Fātiḥa* [1]. Considering the next two items in the catalogue, this work may belong to Ṣadr al-Dīn al-Qūnawī.
164. Ṣadr al-Dīn Abū al-Maʿālī Muḥammad b. Ishāq al-Qūnawī (d. 1274). *Kitāb fī asrār al-Fātiḥa* (On the Secrets of *al-Fātiḥa* [1]) = *Ijāz al-bayān fī kashf baʿḍ asrār Umm al-Qurʾān* (Unmatched Explanation: Unveiling Some of the Secrets of the Mother of the Qurʾan),⁸⁴ before 669/1271,⁸⁵ Ara-

- bic, 26 {12–14}. EDITION: *I'jāz al-bayān fi ta'wīl Umm al-Qur'ān*, ed. 'Abdallāh b. Aḥmad al-'Alawī al-Ḥaḍramī (Hyderabad: Osmania Oriental Publications Bureau, 1949).
165. Same as above, 26 {14–15}.
166. "*Kitāb fi dhikr āyāt al-Qur'ān al-muttafaq 'alayhā wa-al-mukhtalaf fihā*," 26 {15–16}.
167. "*Kitāb as'ilat al-Qur'ān wa-al-ḥadīth*," 26 {16–17}. See no. 136, above.
168. "*Kitāb 'adad āyāt nāsikha wa-mansūkha*," 26 {17–18}. A book on the number of abrogating and abrogated verses in the Qur'an.
169. "*Jawāhir al-aṣḍāf*" (Pearls within Shells), 2 vols., ca. early 14th century,⁸⁶ Turkish, 26 {18–19}.
170. Same as no. 91 above, 26 {19}–27 {1}.
171. Attributed to Najm al-Dīn al-Kubrā (d. 1221). *Al-Ta'wīlāt al-najmiyya* (Najmid Interpretations) = *Baḥr al-ḥaqā'iq wa-al-ma'ānī fi tafsīr al-Sab' al-Mathānī* (Sea of Truths and Meanings Concerning Exegesis of the Seven Oft-Repeated Texts) = *Ayn al-ḥayāt* (Wellspring of Life), Arabic, 27 {1}.⁸⁷ EDITION: *Al-Ta'wīlāt al-najmiyya fi al-tafsīr al-ishārī al-ṣūfī*, ed. Aḥmad Farīd al-Mazīdī (Beirut: Dār al-Kutub al-'Ilmiyya, 2009).
172. "*Risāla fi al-tafsīr*," 27 {1–3}. A treatise on Qur'anic exegesis, bound with two other non-exegetical works in the same volume.
173. Same as no. 128, above, 27 {4}.
174. "*Tarjamat qaṣīdat al-Shāṭibī bi-al-fārisiyya al-manẓūma*," 27 {8}. A versified Persian translation of *Ḥirz al-amānī wa-wajh al-tahānī* (also known as "al-Shāṭibiyya," no. 187 below).⁸⁸
175. Shams al-Dīn Abū al-Khayr Muḥammad b. Muḥammad al-Jazarī (d. 1429). *Nashr al-qirā'āt al-'ashr* (Revival of the Ten Readings) = *al-Nashr fi al-qirā'āt al-'ashr* (The Revival: On the Ten Readings), 1396–97.⁸⁹ Arabic, 27 {9}. EDITION: *Al-Nashr fi al-qirā'āt al-'ashr*, ed. 'Alī Muḥammad al-Ḍabbā', 2 vols. (Beirut: Dār al-Kutub al-'Ilmiyya, n.d.).
176. Burhān al-Dīn Abū Muḥammad Ibrāhīm b. 'Umar al-Ja'barī (d. 1333).⁹⁰ Arabic, 27 {9–10}.
- 176a. *Kanz al-ma'ānī fi sharḥ Ḥirz al-amānī wa-wajh al-tahānī* (Treasure Trove of Meanings: Commentary on "Refuge of Aspirations and Abode of Pleasures"), 691/1292,⁹¹ Arabic, 2 volumes. A commentary on the above mentioned *lāmiyya* of al-Shāṭibī (no. 174), which pertains to the science of Qur'anic readings (*qirā'āt*).
- 176b. *Jamīlat arbāb al-marāṣid fi sharḥ 'Aqīlat atrāb al-qaṣā'id* (Fine Companion to Wayfarers: Commentary on "The Treasured Ode among Resembling Poems") = *al-Abḥāth al-jamīla fi sharḥ al-'Aqīla* (Fine Investigations: Commentary on "The Treasured Ode"),⁹² Arabic, 1 volume. A commentary on a different poem of al-Shāṭibī, a *rā'īyya* titled '*Aqīlat atrāb al-qaṣā'id fi asnā al-maqāṣid*, which is a versification of al-Dānī's *al-Muqni' fi rasm maṣāḥif al-amṣār* that discusses the skeletal text (*rasm*) of the 'Uthmānic codices.⁹³ Al-Ja'barī wrote this work after *Kanz al-ma'ānī*.⁹⁴ EDITION: *Jamīlat arbāb al-marāṣid: fi sharḥ 'Aqīlat atrāb al-qaṣā'id*, ed. Muḥammad Khudāyir al-Zawba'ī (Damascus: Dār al-Ghawthānī, 2010).
177. Volume containing (Arabic, 27 {11–13}):
- 177a. Abū al-Qāsim al-Qāsim b. Firruḥ al-Ru'aynī al-Shāṭibī (d. 1194). '*Aqīlat atrāb al-qaṣā'id fi asnā al-maqāṣid* (The Treasured Ode among Resembling Poems: In [Pursuit of] the Loftiest of Aims) = *al-Qaṣīda al-rā'īyya* (The Ode in *rā'*). A versification of Abū 'Amr al-Dānī's *al-Muqni' fi rasm maṣāḥif al-amṣār*. EDITION: *Manẓūmat 'Aqīlat atrāb al-qaṣā'id fi asnā al-maqāṣid: fi 'ilm rasm al-maṣāḥif*, ed. Ayman Rushdī Suwayd (Jiddah: Dār Nūr al-Maktabāt, 2001).
- 177b. Shihāb al-Dīn Abū al-'Abbās Aḥmad b. Ismā'īl Mullā al-Gūrānī (d. 1488). *Raḳ' al-khitām fi waqf Ḥamza wa-Hishām* (Lifting the Seal: On the Pausal Stops of Ḥamza and Hishām).⁹⁵ A commentary on al-Ja'barī's *Farā'id al-asrār min waqf Ḥamza wa-Hishām*.

178. Shihāb al-Dīn Abū al-‘Abbās Aḥmad b. Ismā‘īl Mullā al-Gūrānī (d. 1488). *Al-‘Abqarī fī sharḥ al-Ja‘barī* (The Marvelous [Treatise]: Commentary on al-Ja‘barī), Arabic, 27 {14}. A commentary on al-Ja‘barī’s *Kanz al-ma‘ānī* (no. 176a, above).
179. “*‘Iqd al-durar al-muḍī‘a fī sharḥ al-qirā’āt al-thalāth al-marwiyya*” (A Necklace of Shining Pearls: Commentary on the Three Reported Readings), Arabic, 27 {15}. A commentary on Ibn al-Jazarī’s *al-Durra al-muḍī‘a fī qirā’āt al-a’imma al-thalātha al-marḍiyya*, a poem of 241 verses that discusses the three readers who are next in prestige to the widely-known Seven Readers. According to *Kashf al-zunūn* (743), which does not name the author of *‘Iqd al-durar* (instead referring to him as *ba‘ḍ al-‘ulamā’*, “a certain scholar”), this work was dedicated to Sultan Mehmed II.⁹⁶
180. “*Kitāb sharḥ fī ṭabaqāt al-qurrā’ al-sab‘a*,” 27 {16}. This may be the work by Amīn al-Dīn Abū Muḥammad ‘Abd al-Wahhāb b. al-Sallār al-Dimashqī al-Shāfi‘ī (d. 1380), a teacher of Ibn al-Jazarī’s. EDITION: *Kitāb Ṭabaqāt al-qurrā’ al-sab‘a wa-dhikr manāqibihim wa-qirā’ātihim*, ed. Aḥmad Muḥammad ‘Azzūz (Beirut: al-Maktaba al-‘Aṣriyya, 2003).⁹⁷
181. “*Kitāb al-mabsūt*,” 27 {17}. Perhaps to be identified with *al-Mabsūt fī al-qirā’āt al-sab‘ wa-al-maḍbūṭ min idā’āt al-ṭab’*, attributed to one Shams al-Dīn Muḥammad b. Maḥmūd al-Samarqandī (d. 1378–79).⁹⁸ This is a tripartite work that aims to elucidate al-Shāṭibī’s famous poem for students of Qur’anic readings. After a basic Persian introduction, the second and third parts respectively utilize tree graphs and tables to organize and present the data of *al-Shāṭibīyya* in a convenient manner. Having thus covered the *uṣūl* (general rules of recitation), the work ends with a supplement on *farsh al-ḥurūf* (idiosyncratic variants). Except for the introduction, the text is in Arabic.⁹⁹ See also no. 185b, below. Alternatively, this work could be *al-Mabsūt fī al-qirā’āt al-‘ashr*, written by Ibn Mihrān (Abū Bakr Aḥmad b. al-Ḥusayn b. Mihrān al-Iṣfahānī, d. 991) and published as *al-Mabsūt fī al-qirā’āt al-‘ashr*, ed. Sabī‘ Ḥamza Ḥākīmī (Damascus: Majma‘ al-Lughā al-‘Arabiyya, 1986). Ibn Mihrān’s *al-Mabsūt* is an extensive commentary on another work of his, namely, *al-Shāmīl*.
182. “*Ḥilyat al-‘adani*” (The Precious Garment’s Ornament), 27 {18}.
183. “*Maslak al-qurrā’*” (The Path of Readers), 27 {18–19}. According to the inventory, a commentary on a poem of Ibn al-Jazarī (for which see no. 192a, below).
184. Shihāb al-Dīn Abū al-‘Abbās Aḥmad b. Ismā‘īl Mullā al-Gūrānī (d. 1488), 27 {19}–28 {1}.
 - 184a. *Lawāmi‘ al-ghurar fī sharḥ Farā’id al-durar* (Flashes of Brightness: Commentary on “Unique Pearls”),¹⁰⁰ before 884/1479,¹⁰¹ Arabic. Dedicated to Sultan Bayezid II,¹⁰² this is a commentary on *Farā’id al-durar*, which is a poem by Shihāb al-Dīn Aḥmad b. Muḥammad al-Shar‘abī (d. ca. 1434).¹⁰³ EDITION: *Lawāmi‘ al-ghurar: sharḥ Farā’id al-durar (fī al-qirā’āt al-thalāth)*, 2 vols., ed. Nāṣir b. Sa‘ūd al-Qathāmī (Riyadh: Maktabat al-Rushd, 2009).
 - 184b. *Kashf al-asrār ‘an qirā’at al-a’immat al-akhyār* (Unveiling the Secrets of the Chosen Imams’ Readings), 890/1485,¹⁰⁴ Arabic. A commentary on Ibn al-Jazarī’s *Nihāyat al-barara fī mā zād ‘alā al-‘ashara*, a poem of 454 verses that discusses three readers (Ibn Muḥayṣin, al-A‘mash, and al-Ḥasan al-Baṣrī) in addition to the ten canonical readers.¹⁰⁵ Edited in a 2007 dissertation at Mecca’s Umm al-Qurā University, by ‘Abdallāh b. Ḥammād al-Qurashī.
185. Volume containing (28 {1–3}):
 - 185a. “*Kitāb fārisī fī ‘ilm al-qirā’a*.” A Persian treatise on the science of Qur’anic readings.
 - 185b. “*Al-Mabsūt*.” The latter two parts of *al-Mabsūt*, which may refer to Muḥammad b. Maḥmūd al-Samarqandī’s treatise on al-Shāṭibīyya (see no. 181, above).
186. “*Al-Sirr al-maktūm*,” 28 {3}. Attributed to “al-Tirawī,” who may be Muṣliḥ al-Dīn Muṣṭafā b. Muḥammad b. Ismā‘īl al-Tirawī (known as Ibn al-Qaṣṣā’, d. after 1475).¹⁰⁶

187. Abū al-Qāsim al-Qāsim b. Firruḥ al-Ru'aynī al-Shāṭibī (d. 1194). *Ḥirz al-amānī wa-wajh al-tahānī* (Refuge of Aspirations and Abode of Pleasures) = *al-Shāṭibīyya* (al-Shāṭibī's Poem), Arabic, 28 {4}. One of the most widely-studied works on the seven famous Qur'anic readings (*al-qirā'āt al-sab'*), this is a *lāmīyya* poem of 1173 verses based on Abū 'Amr 'Uthmān b. Sa'īd al-Dānī's (d. 1053) *al-Taysīr fī al-qirā'āt al-sab'*. EDITION: *Manẓūmat Ḥirz al-amānī wa-wajh al-tahānī fī al-qirā'āt al-sab'*, ed. Ayman Rushdī Suwayd (Jiddah: Dār Nūr al-Maktabāt, 2008).
188. Same as no. 150, above.
189. 'Alī b. Nāṣir al-Makkī al-Ḥijāzī (d. after 1510–11). *Al-Durar al-muḍī'a fī ḥall rumūz al-Shāṭibīyya* (Shining Pearls: Solving the Mysteries of *al-Shāṭibīyya*),¹⁰⁷ Arabic, 28 {6}.
190. "*Ḥizb al-qirā'a li-l-ikhwān wa-al-khullān*" (A Selection of Readings for Brethren and Friends), Arabic, 28 {7}. A poetical abridgment of *al-Shāṭibīyya* in 673 verses.¹⁰⁸ The manuscript at the imperial library seems to have ended up at Princeton, because the Garrett collection contains an exquisite copy dedicated to Sultan Bayezid II with the exact same description given in our inventory: *Ḥizb al-qirā'a fī 'ilm al-qirā'a*.¹⁰⁹ MANUSCRIPTS: Princeton, Garrett 202L.
191. "*Risāla turkiyya fī 'ilm al-qirā'a wa-risālat tafsīr ba'd al-suwar bi-al-turkiyya*," 28 {7–8}. Two works in Turkish, one on Qur'anic readings, the other on exegesis of a sura.
192. Volume containing (28 {8–11}):
 - 192a. "*Naẓm al-shaykh al-Jazarī*." This may be Ibn al-Jazarī's *al-Durra al-muḍī'a* (241 verses; see nos. 179, 183), his *Muqaddima* (107 verses), or perhaps his more extensive *Ṭayyibāt al-nashr fī al-qirā'āt al-'ashr* (1,000 verses).¹¹⁰
 - 192b. "*Al-Naẓm al-turkī fī 'ilm al-qirā'a*." A Turkish poem on Qur'anic readings.
 - 192c. "*Zīnat al-qārī*" (Adornment for the Reader).¹¹¹
 - 192d. "*Qawā'id al-Qur'ān*" (Rules Pertaining to the Qur'an).

NOTES

1. There are uncertainties about this date range, primarily because al-Rāzī provides the date of completion for his exegesis of some suras but not for others. The earliest of these dates—given for sura *Āl-i Imrān*—is 1 Rabi' al-Ākhir 595 (January 31, 1199), while the latest given dates fall in Dhū al-Ḥijja of 603 (July 1207) (Jacques Jomier, "Les Mafatih al-ghayb de l'imam Fakhr al-Din al-Razi: quelques dates, lieux, manuscrits," *Mélanges de l'Institut Dominicain d'Études Orientales du Caire* 13 [1977]: 255, 261; Frank Griffel, "On Fakhr al-Din al-Rāzī's Life and the Patronage He Received," *Journal of Islamic Studies* 18, no. 3 [2007]: 325). However, considering the many undated chapters, it is possible that al-Rāzī was writing before and/or after the 1199–1207 interval. In fact, according to several pre-modern biographers and a number of modern academics, al-Rāzī did not manage to finish his commentary, with the result that some parts of the extant work—written by his students—date after 1210 (Richard Gramlich, "Faḥr ad-dīn ar-Rāzī's Kommentar zu sure 18, 9–12," *Asiatische Studien* 33 [1979]: 99–152; Jacques Jomier, "Qui a commenté l'ensemble des sourates al-'Ankabūt a Yāsīn (29–36) dans '*Le Tafsīr al-Kabīr*' de l'imām Fakhr al-Dīn al-Rāzī?," *International Journal of Middle Eastern Studies* 11, no. 4 [1980]: 467–85). However, Tariq Jaffer claims that recent scholarship has shifted in favor of considering al-Rāzī the sole author of *Mafāṭih al-ghayb*, although he does not provide any references in support of this assertion (*Rāzī: Master of Quranic Interpretation and Theological Reasoning* [New York, 2015], 5).
2. A common variant of this title lacks the term *ghawāmiḍ* (Andrew Lane, *A Traditional Mu'tazilite Commentary on the Qur'ān: The Kashshāf of Jār Allāh al-Zamakhsharī* (d. 538/1144) [Leiden, 2006], 92). Another variant is *al-Kashshāf 'an ḥaqā'iq al-tanzīl al-nāṭiq 'an daqā'iq al-ta'wīl* (ibid., n. 88).
3. During these two years, al-Zamakhsharī resided in Mecca, hence his title Jār Allāh ("God's Neighbor"). According to Lane's analysis of the available evidence, al-Zamakhsharī did not begin writing *al-Kashshāf* in 1132 "from scratch" (*A Traditional Mu'tazilite Commentary*, 53): "Rather, at this time he organized his thoughts and his material, and between teaching, studying and spiritual exercises,

put down on paper the final draft of the *Kashshāf* (ibid.). However, this position does not explain why, in the prologue to *al-Kashshāf*, al-Zamakhsharī boasts that he has done in two years what would normally take twenty years. This statement suggests that he had indeed started from scratch.

4. This is in fact the oldest print of *al-Kashshāf* and is also the only one to utilize several manuscripts and thereby approach a critical edition (Lane, *A Traditional Mu'tazilite Commentary*, 97).
5. Some pre-modern sources (perhaps the oldest being *Kashf al-zunūn* [1480]) and most modern studies provide his *nisba* as "al-Qazwīnī." However, this might be the result of conflating our author with another Sirāj al-Dīn Abū Ḥafṣ 'Umar, whose father's name was 'Alī and whose *nisba* was al-Qazwīnī (mentioned in Ibn al-Jazarī, *Ghāyat al-nihāya fī ṭabaqāt al-qurrā'* [*Das biographische Lexikon der Koranlehrer*, ed. Gotthelf Bergsträsser and Otto Pretzl, 2 vols. (Cairo, Leipzig, 1932–33)], 1:594–95, and Ibn Ḥajar al-ʿAsqalānī, *al-Durar al-kāmina fī a'yān al-mī'a al-thāmina*, ed. Muḥammad 'Abd al-Mu'īd Khān, 6 vols., 2nd ed. [Hyderabad, 1972], 4:211). For a persuasive argument as to why these are two different people, see Sayyid Muḥammad Maṣṣūr Ṭabāṭabā'ī, "Naẓarī Jadīd darbāra-yi Kitāb-i '*Kashf al-Kashshāf*' wa Mu'allif-i Ān," *Bahār-i Adab* 16 (2012): 493–504.
6. Al-Fārisī's work is known also as *Kashf al-Kashshāf* (thus in our inventory), *al-Kashf 'alā al-Kashshāf*, and *ḥāshiyat al-Kashshāf* (Lane, *A Traditional Mu'tazilite Qur'ān Commentary*, 303; FANKHA, 26: 308). A longer title, not given in the secondary sources, appears on a manuscript at Princeton (available at <http://pudl.princeton.edu/objects/3x816n9op>): *Kashf al-Kashshāf al-mufajjir yanābī' al-ma'ānī al-'udhba al-irtishāf* [The Unveiler of *al-Kashshāf*: The Opener of Founts of Meanings Sweet to Imbibe]).
7. The sources provide contradictory information about the composition date of this work, although all agree that al-Taftāzānī wrote it in his last few years (*Shadharāt al-dhahab*, ed. 'Abd al-Qādir al-ʿArna'ūt, 11 vols. [Damascus, 1986], 8:548; *Kashf al-zunūn*, 1:1479; Lane, *A Traditional Mu'tazilite Qur'ān Commentary*, 306).
8. A few scholars, including al-Taftāzānī's grandson (Yaḥyā b. Muḥammad, d. 877), wrote works on his gloss on al-Kashshāf (*FSQT*, 185, 430; Lane, *A Traditional Mu'tazilite Qur'ān Commentary*, 307n10).
9. This volume also contains a work on jurisprudence, namely, al-Jurjānī's *ḥāshiya* on the commentary of his teacher, 'Aḍud al-Dīn al-Ījī (d. 1355), on Ibn al-Ḥājjib's (d. 1249) abridgment (*al-Mukhtaṣar*) of his own *Muntahā al-su'l wa-al-amal fī 'ilmay al-uṣūl wa-al-jadal*.
10. According to *Kashf al-zunūn* (1479), Khaṭīb-zāde wrote a gloss on al-Jurjānī's gloss on *al-Kashshāf* and dedicated it to Sultan Bayezid II. The manuscript here described as "gloss on *al-Kashshāf*" might be the same work.
11. Various death dates are given for Molla Abdülkerim, as early as 1469–70 and as late as 1501–2. For a discussion of this issue, see R. C. Repp, *The Müfti of Istanbul: A Study in the Development of the Ottoman Learned Hierarchy* (London, 1986), 154.
12. *Kashf al-zunūn* (1479), which also mentions Mollā 'Abd al-Karīm's gloss immediately after that of Khaṭīb-zāde, seems to suggest that 'Abd al-Karīm's work was also an annotation on al-Jurjānī's gloss.
13. This exact title is not attested in the bibliographical sources. However, *FSQT* (1:188) lists four titles on *al-Kashshāf* that feature the term *mushkilāt*. The first one is the already cited work of al-Fārisī (no. 20), titled *al-Kashf 'an mushkilāt al-Kashshāf*. The other two works are *Sharḥ mushkilāt al-Kashshāf* and *Kitāb fī ḥall mushkilāt al-Kashshāf*, given as anonymous works. In fact, we cannot rule out the possibility that the latter two are identical. Finally, *FSQT* (1:352) and *FANKHA* (12:288) refer to a certain *Sharḥ mushkilāt kitāb al-Kashshāf*, attributing it to al-Quṭb al-Shīrāzī (likely Maḥmūd b. Mas'ūd, d. 1311).
14. His gloss on *al-Kashshāf* is mentioned at the very beginning of al-Fanārī's '*Ayn al-a'yān*, who refers to al-Rāzī as *mawlānā Quṭb al-Dīn al-Rāzī* (4).
15. While the biographical sources do not mention such a gloss by al-Iznīqī, we know of his interest in Qur'anic exegesis because Ḥājji Khalīfa attributes a *tafsīr* to him, describing it as voluminous (*Kashf al-zunūn*, 457).
16. For a brief discussion of this issue, see Osman Yahia, *Histoire et classification de l'œuvre d'Ibn 'Arabī: Étude critique*, 2 vols. (Damascus, 1964), 2:483 (no. 732). Notwithstanding the efforts of pre-modern scholars and modern academics, some publishers continue to print al-Kāshhānī's work under Ibn al-ʿArabī's name—perhaps out of commercial considerations. A relatively recent example is *Tafsīr al-Qur'ān al-karīm li-l-Shaykh al-Akbar al-ʿarīf bi-l-llāh al-ʿallāma Muḥyi al-Dīn Ibn 'Arabī* (Beirut, 1978). The oldest misattribution of al-Kāshhānī's *Ta'wīlāt* in print seems to be that of the Būlāq version of 1867.

17. *Kashf al-zunūn* (438) mentions two commentaries for Ibn al-ʿArabī: a short work of “conventional” exegesis (*ʿalā tariqat al-mufasssīrīn*), and a larger (but incomplete) one “written in the manner of the Sufis (*ahl al-taṣawwuf*).” The latter work’s title appears in Ibn al-ʿArabī’s own works as *al-Jamʿ wa-al-taḥṣīl fī asrār maʿānī al-tanzīl* (Osman Yahia, *Histoire et classification*, 1:266). For a few other exegetical works attributed to Ibn al-ʿArabī, see *ibid.*, 2:480–85. Another work worth mentioning is *Ījāz al-bayān fī al-tarjama ʿan al-Qurʾān*, a recently published commentary on the first two suras of the Qurʾān, attributed to Ibn al-ʿArabī based on a manuscript at Dār al-Kutub al-Miṣriyya (Muḥammad Ibrāhīm Muḥammad Sālim, *ʿAjāʾib al-ʿirfān fī tafsīr Ījāz al-bayān fī al-tarjama ʿan al-Qurʾān* [Beirut, 1999]).
18. Shorter variant titles are also attested for al-Qurṭubī’s commentary. For instance, Ḥājjī Khalifa lists it as *Jāmiʿ aḥkām al-Qurʾān wa-al-mubayyin li-mā taḍammāna min al-sunna wa-āy al-Furqān* (*Kashf al-zunūn*, 534).
19. His death date is also given as 1117 (see Robson, “al-Baghawī,” *Encyclopaedia of Islam*, 2nd ed.).
20. Al-Bayḍāwī’s death date is given as early as 641 AH (which is almost certainly incorrect) and as late as 719 AH (Luṭfi Ibrāhīm, “al-Bayḍāwī’s Life and Works,” *Islamic Studies* 18, no. 4 (1979): 315; Morteza Kariminia, “Bayḍāwī,” *Dānishnāma-yi Jahān-i Islām*). In the modern period, many scholars have opted for the year 685 (=1286) as a reasonable compromise (e.g., Brockelmann endorses 685 as the most probable date: *GAL I*, 416). However, based on references to al-Bayḍāwī in contemporaneous sources, some recent studies have argued for the likelihood of the later dates (Etan Kohlberg, “Bayḍāwī, Nāṣer-al-Dīn,” *Encyclopaedia Iranica*). According to Kohlberg, who cites these studies and adds further indications, al-Bayḍāwī likely “died in 716” (*ibid.*), which would overlap with the years 1300 CE and 1301 CE.
21. Brockelmann provides al-Tūqāṭī’s death date variously as 1498 (*GAL S II*, 318f.) and 1499 (*GAL S I*, 646), while *FSQT* gives it as 902 *hijrī* (516).
22. Fehmi Edhem Karatay, *İstanbul Üniversitesi Kütüphanesi: Arapça yazmalar kataloğu* (Istanbul, 1951–53), 206f. (no. 483). There is a copy of this work in the library of Iran’s Majlis, within a collection of exegetical treatises (pp. 652–99), some of which are dedicated to Sultan Bayezid II. (<http://94.232.175.44/index.aspx?pid=13&GID=23058&ID=43028>; accessed July 26, 2016). This library’s website (http://Dlib.ical.ir/faces/search/bibliographic/biblioFullView.jspx?_afPfm=-j8wcik9tm, accessed June 2, 2016) provides two dates for the copy: 894 *hijrī* and 943 *hijrī*. No explanation is given for these two dates, but perhaps the first is the date of composition the second that of the copy’s transcription.
23. The inventory does not provide the name of the author, but *FSQT* (520) attributes this title to Muḥammad b. Muṣṭafā (known as known as Ḥājjī Ḥasan-Zade). This attribution is corroborated by the data given in *Kashf al-zunūn* (191): of the several glosses mentioned there on al-Bayḍāwī’s commentary on sura *al-Anʿām*, the only one to precede the year 908 *hijrī* seems to be the work of Muḥammad b. Muṣṭafā b. al-Ḥājjī Ḥasan.
24. Peter Voorhoeve, *Handlist of Arabic Manuscripts in the Library of the University of Leiden and Other Collections in the Netherlands* (Leiden, 1980), 16, lists a copy of this work. At the end of its entry, the following phrase is given: “before H. 902.” I do not know if this means the manuscript predates 902 AH or the work itself.
25. Karatay, *İstanbul Üniversitesi Kütüphanesi: Arapça yazmalar kataloğu*, 223, no. 524.
26. According to Charles Rieu (*Catalogue of the Persian Manuscripts in the British Museum* [London, 1966], 216), al-Bidlīsī “dedicated a *tafsīr* to Sulṭān Bāyazīd.” Rieu does not provide a title, but said *tafsīr* must be the same as the work mentioned here in ʿAṭūfī’s inventory, because this is al-Bidlīsī’s only exegetical work (Mehri Pākzād, “Idrīs-i Bidlīsī, Hasht Bihiṣht wa digar āthār-i ū,” *Pazhūhish-nāma-yi Farhang wa Adab* 6 [2010]: 84–85).
27. *FSQT*, 151–55. Another, less likely candidate would be *The Great Commentary* (*al-Tafsīr al-kabīr*) by the Sufi master al-Qushayrī (Abū al-Qāsim ʿAbd al-Karīm b. Hawāzin, d. 1072), which was also (erroneously) known as *al-Taysīr fī al-tafsīr* (Martin Nguyen, “*Al-Tafsīr al-kabīr*: An Investigation of al-Qushayrī’s Major Qurʾān Commentary,” *Journal of Sufi Studies* 2 [2013]: 22). The fact that *al-Tafsīr al-kabīr* is not extant even in a single full copy suggests that the work titled *al-Taysīr* in the inventory, of which the imperial library had four copies (this entry as well as nos. 90, 98, 99), was likely not al-Qushayrī’s commentary. Yet a third candidate would be the work of a later scholar, ʿIzz al-Dīn Abū Muḥammad ʿAbd al-ʿAzīz b. Aḥmad b. Saʿīd al-Damīrī al-Dīrīnī (d. 1297), who wrote an exegetical poem (of about 3,200 verses) titled *al-Taysīr fī al-tafsīr* (*Kitāb al-Taysīr fī ʿulūm al-tafsīr* [Miṣr, 1310 (1892–93)], 142).
28. Based on the short poem at the end of this work (for which see MS Nurosmāniye 255, p. 428, available online at <https://archive.org/stream/M-000p73/NURUOSMANIYE255#page/n441/mode/2up>; accessed

August 8, 2016). However, the five verses that specify the dates when al-Nasafī began and finished writing are missing from the corresponding poem at the end of MS 4867.2 at King Saud University (available at <http://makhtota.ksu.edu.sa/makhtota/5245/507#.V6iRKLgr1I>; accessed August 8, 2016).

29. Also known as “al-Qāshānī” (FSQT, 1:369).
30. According to *Kashf al-ẓunūn* (336), al-Kāshānī’s commentary covers the first thirty-eight suras of the Qur’an. Indeed, some extant manuscripts of *Ta’wīlāt* do not go beyond sura *Ẓād* (Q 38), but others are complete (Yahia, *Histoire et Classification*, 2:483). Perhaps al-Kāshānī had initially commented on the first thirty-eight suras and then either he himself or a later student discussed the remainder of the Qur’an.
31. The inventory uses the term ‘*umda* instead of ‘*udda*. However, this variant is not attested in any of the biographical sources, so the extra *mīm* may be a mistake, perhaps on the part of the scribe who prepared the fair copy based on ‘Atufī’s draft version.
32. Annabel Keeler, “Meybodi, Abu’l-Faḡl Raṣīd-al-Dīn,” *Encyclopaedia Iranica*.
33. While al-Maybūdī uses Arabic sporadically in his esoteric interpretations of the Qur’anic text, a significant portion of his exoteric discussions are in Arabic. According to Annabel Keeler, “the proportion of Arabic in the exoteric ... sections of the *Kashf al-asrār* steadily increases during the course of the commentary, from an average of 5 percent in the first two volumes to around 80 percent in the last two” (*Sufi Hermeneutics: The Qur’an Commentary of Rashīd al-Dīn Maybūdī* [Oxford, 2006], 19).
34. FSQT, 346; Süleyman Mollaibrahimoğlu, *Süleymaniye Kütüphanesi’nde bulunan yazma tefsirler: metot ve kaynakları* (Istanbul, 2002), 179–84. Another work titled *Kashf al-asrār* is attributed to one Jamāl al-Dīn Yūsuf al-Qarāmānī (FSQT, 878), whose death date is not known.
35. Our inventory introduces this work as *Kitāb al-Tafsīr al-mukhtaṣar* (The Concise Commentary), adding that it is known as *al-Wajīz*. The term *al-mukhtaṣar* sheds light on a common misunderstanding about al-Wāḥidī’s exegetical writings. In the prologue to his “Medium-Sized Commentary” (*al-Wasīṭ*), al-Wāḥidī classifies his exegetical materials into three groups, called *ma’ānī al-tafsīr*, *musnad al-tafsīr*, and *mukhtaṣar al-tafsīr* (Walid Saleh, “The Last of the Nishapuri School of Tafsīr: Al-Wāḥidī (d. 1076) and His Significance in the History of Qur’anic Exegesis,” *Journal of the American Oriental Society* 126, no. 2 [2006]: 235). Some scholars have taken these to refer to three works—now lost—other than his well-known commentaries of *al-Basīṭ*, *al-Wasīṭ*, and *al-Wajīz*. However, according to Walid Saleh, *ma’ānī al-tafsīr*, *musnad al-tafsīr*, and *mukhtaṣar al-tafsīr* in fact designate *al-Basīṭ*, *al-Wasīṭ*, and *al-Wajīz*, respectively (ibid.). The fact that our inventory describes *al-Wajīz* as *Kitāb al-Tafsīr al-mukhtaṣar* confirms Saleh’s position.
36. Saleh, “Last of the Nishapuri School of Tafsīr,” 230.
37. Al-Ghazālī wrote *Jawāḥir* after he left the Baghdad Niẓāmiyya (in 1095) but before he resumed teaching in the Nishapur Niẓāmiyya (in 1106). However, the precise date of this work is not known (George F. Hourani, “A Revised Chronology of Ghazālī’s Writings,” *Journal of the American Oriental Society* 104, no. 2 [1984]: 299).
38. FANKHA (34:269) knows one copy of this work in the Astan Quds library. The author is unknown but the work is dedicated to a certain Mu’īn al-Dīn Mas’ūd b. Maḥmūd.
39. The latter title appears in Taṣkōprüzade’s *al-Shaqā’iq al-nu’māniyya fī ‘ulamā’ al-dawla al-‘Uthmāniyya* (Beirut, n.d.), 1:53. The term *al-sab’ al-mathānī* (“the seven oft-repeated texts”) refers to the entire Qur’an here, but in some contexts it may refer to select suras of the scripture or indeed even to the first sura alone (Uri Rubin, “Oft-Repeated,” *Encyclopaedia of the Qur’ān*).
40. Hellmut Ritter, “Ayasofya kütüphanesinde tefsir ilmine âit arapça yazmalar,” *Türkiyat Mecmuası* 7–8 (1945): 64 (no. 52).
41. GAL I, 416. In GAL S I, 737, the title mistakenly features *al-mudhakkir* instead of *al-mutadhakkir*.
42. *Kashf al-ẓunūn* (1: 339); FSQT, 275–77.
43. FSQT, 277–79.
44. Ritter, “Ayasofya kütüphanesinde,” 28f. (no. 20), so the original work must have been composed earlier.
45. A list of these dissertations can be found at <http://www.quran-c.com/display/Disptitle.aspx?UID=1220&CID=170>, accessed June 4, 2016.
46. Other death dates are provided for al-Sīwāsī (including 800 *hijrī* by Ḥājji Khalifa [*Kashf al-ẓunūn*, 1185]), but in his recent study of al-Sīwāsī, Bahattin Dartma opts for 1455 (*İlk Osmanlı müfessirlerinden Şihâbüddin Es-Sivâsî ve Kur’ân yorumu* [Sivas, 2011], 39–42).

47. As outlined in its prologue, al-Sīwāsī wrote *Uyūn al-tafāsīr* for students of exegesis. His aim was to present a selection of the views expressed in major commentaries so that students of *tafsīr* could access these works in a brief and convenient manner (*Uyūn al-tafāsīr li-l-fuḍalā' al-samāsīr*, 1:19).
48. Apart from the well-known work of Zayn al-Dīn al-Rāzī (no. 125 on this list), several treatises on the Qur'an bear the title *As'ilat al-Qur'ān* or similar names (FSQT, 1093–94).
49. A number of scholars composed works entitled *Asbāb al-nuzūl* (FSQT, 1092). Perhaps the most famous of these belongs to al-Wāḥidī, whose commentary (*al-Wajīz*) appeared earlier in the present inventory.
50. Wilferd Madelung, “al-Māturīdī,” *Encyclopaedia of Islam*, 2nd ed.
51. GAL I, 374; GAL S I 640; Wilferd Madelung, “Alā'-al-Dīn Samarqandī: Ḥanafī Jurist and Māturīdī Theologian,” *Encyclopaedia Iranica*.
52. Described in Manfred Götz, “Māturīdī und sein Kitāb Ta'wīlāt al-Qur'ān,” *Der Islam* 41 (1965): 69.
53. Various later death dates are also reported for al-Samarqandī (such as 393 AH, reported by Ibn Qutlubugha, *Tāj al-tarājīm fi ṭabaqāt al-ḥanafīyya*, ed. Muḥammad Khayr Ramaḍān Yūsuf, 3 vols. [Damascus, 1992], 2:118). However, van Ess rejects the later dates on account of “the exact correspondence of day and date” for the earliest date, namely, “Monday night, 10/11 Jomādā II 373/19 November 983” (Joseph van Ess, “Abu'l-Layṭ Samarqandī,” *Encyclopaedia Iranica*).
54. There is some confusion about the title of al-Samarqandī's commentary. Some copies have the title *Baḥr al-'ulūm*, but this name does not appear in the biographical dictionaries. Ḥajjī Khalifa attributes a commentary named *Baḥr al-'ulūm* to another al-Samarqandī who lived in the ninth century *hijrī* (*Kashf al-ẓunūn*, 225).
55. Al-Ṭibī's name appears in the epilogue of his commentary (*Futūḥ al-ghayb*, 16:657). His *kunya* is sometimes given as Abū Muḥammad and his *nisba* as al-Ṭayyibī (Lane, *A Traditional Mu'tazilite Commentary*, 302). Our inventory opts for al-Ṭibī.
56. It is not clear whether the term *al-ḥajj* in the title refers to the sura of *al-Ḥajj* or to the topic of pilgrimage.
57. FSQT names two scholars of this *nisba* who wrote works on the Qur'an: the first (Abū 'Alī al-Fārisī, d. 377) composed a work on Qur'anic grammar (*al-Ighfāl fi i'rāb al-Qur'ān*; FSQT, 61), the second (al-Ḥusayn b. Zayd, d. 457) on the abrogating and abrogated verses (*Jāmi' mā fi al-Qur'ān al-karīm min al-āyāt al-karīma al-nāsikha wa-al-mansūkha*; FSQT, 100). But none of these works are commentaries per se, so it is doubtful that either is the referent of the inventory's description.
58. Possibly after 1291 ('Abdallāh Mukhlis, “Kitāb *Rawḍat al-fasāḥa*,” *Majallat al-majma' al-'ilmī al-'arabī* 22:425).
59. *Kashf al-ẓunūn*, 1:92; FANKHA, 3:207.
60. In the prologue, al-Fanārī praises the Karamanid bey, Mehmed II, calling him *al-sultān b. al-sultān* ('*Ayn al-ā'yān*, 3). Al-Fanārī's association with the Karamanid ruler is mentioned by Taşköprüzade (*Shaqā'iq*, 1:19) and a number of other sources, although the exact reasons and dates of this association are not certain. Based on a discussion of the available evidence, Repp suggests that al-Fanārī resided in Karaman at least from 1406 to 1417, if not longer (*Müfti of Istanbul*, 83–86). Thus, he must have written his commentary of al-Fātiḥa sometime in the first two decades of the fifteenth century.
61. FSQT (1242f.) lists some three dozen works with similar titles.
62. FSQT (1123) lists three treatises on the last suras of the Qur'an, two by unknown authors (pp. 955, 967), one by Muḥammad b. 'Abd al-Wahhāb (d. 1792).
63. FSQT (1125) lists six works on this sura, one of which is attributed to Khaṭīb-zāde (d. 901), although the relevant listing (515) notes that this work has been also attributed to Faḍl al-Nīksār, who would not fit our timeline.
64. GAL S II, 325 provides the title as *al-As'ila wa-al-ajwiba al-muta'alliqa bi-al-Qur'ān wa-al-ḥadīth*. There is an earlier al-Āqsarā'ī, Jamāl al-Dīn Muḥammad b. Muḥammad (d. after 1378), who also composed works of exegesis (GAL S II, 328; *al-Shaqā'iq al-nu'māniyya*, 1: 14). While GAL attributes *al-As'ila* to the later al-Āqsarā'ī, FANKHA (3: 213) attributes it to the earlier one (see also Repp, *The Müfti of Istanbul*, 76–77). (Incidentally, the inventory (275 {9–10}) attributes a book on Arabic, *Sharḥ Idāḥ al-ma'ānī*, to “*mawlānā* Jamāl al-Dīn al-Āqsarā'ī,” who seems to be the earlier figure.) Jamāl al-Dīn al-Āqsarā'ī was a teacher of Mollā Fenārī (*al-Shaqā'iq al-nu'māniyya*, 14–16). There are several other works that discuss questions pertaining to exegesis and *ḥadīth*, but they are not limited to these fields (see *Kashf al-ẓunūn*, 92f.).
65. See FSQT (1126f.) for a number of commentaries on the opening chapter of the Qur'an.
66. FSQT (405) provides a slightly different title, using *al-āyāt* instead of *al-laṭā'if*.

67. Ṣalāḥ al-Dīn l-Ṣafadī, *al-Wāfi bi-al-Wafayāt*, ed. Aḥmad al-Arna'ūṭ and Turkī Muṣṭafā, 29 vols. (Beirut, 2000), 25:204.
68. Martin Nguyen and Francesco Chiabotti, "The Textual Legacy of Abū l-Qāsim al-Quṣayrī: A Bibliographic Record," *Arabica* 61 (2014): 363. It is not clear when al-Qushayrī finished this work but the terminus ante quem would be 451/1059–60, when a number of his students began reading *Laṭā'if* with him (*ibid.*, 364).
69. 'Umar Riḍā Kaḥḥāla, *Muḥjam al-mu'allifin* (Damascus, 1957–61), 11:122f., lists his father's name as Farāmūz (فراموز). According to the editor of *Shadharāt al-dhahab* (9: 512, n. 3), other variants such as قراموز and قراموز also appear in the manuscripts. See also the article "Khusrew" in the *Encyclopaedia of Islam*, 2nd ed.
70. According to *Kashf al-zunūn* (91), Mullā Khusraw's book consists of two sections. The first part responds to the questions of 'Alā' al-Dīn 'Alī b. Mūsā al-Rūmī (d. 841)—whose work is described in our inventory as *As'ilat 'Alā'*. The second part addresses the answers previously furnished for these questions by Sirāj al-Dīn al-Tawqī'ī (d. 886) (*Kashf al-zunūn*, 91). Ḥājji Khalifa adds that *Naqd al-afkār* is the title of the first section only, but he does not provide a separate title for the second part. Our inventory notes that the beginning of Mullā Khusraw's work concerns Qur'anic exegesis.
71. The author is described as "Fakhr al-mawālī 'Alī b. Mawlānā Yigān, sallamahu Allāh." Perhaps he is 'Alā' al-Dīn 'Alī al-Yigānī (d. 909), or Molla Yegan, for whom, see *al-Shaqā'iq al-Nu'māniyya* (1:169).
72. This might be al-Nasafī's *Madārik al-tanzil* (no. 105, above).
73. *FSQT* (119).
74. See also the work titled *Mukhtaṣar fī 'ilm al-Qur'ān* (*FSQT*, 9999; author unknown).
75. *GAL* I, 508. *Kashf al-zunūn* lists *Aqālīm al-ta'ālīm* and *Yanābī' al-'ulūm* separately (134, 2051), attributing the latter to Aḥmad b. Khalīl (a judge of Damascus) and the former to his son, Muḥammad b. Aḥmad b. Khalīl (d. 1294, also judge of Damascus). (*GAL* reflects the same confusion by attributing *Aqālīm al-ta'ālīm* to the son in *S* I, 612.) However, the two titles seem to refer to the same work. This is because Ḥājji Khalifa provides the same incipit for the two works, and also describes each as concerned with the seven disciplines of exegesis (*tafsīr*), *ḥadīth*, jurisprudence (*fiqh*), belles-lettres (*adab*), medicine (*ṭibb*), geometry (*handasa*), and arithmetic (*ḥisāb*). The work should be attributed to the father, because an early copy of this work (Raghib Pasha 1223, transcribed in 673 *hijrī*, available at <https://archive.org/download/M-00040/RAGIPPASA1223.pdf>) provides the date of composition as 630, when Muḥammad b. Aḥmad would have been only four years old (al-Suyūṭī, *Bughyat al-wi'āt fī ṭabaqāt al-naḥwīyyīn wa-al-nuḥāt*, ed. Muḥammad Abū al-Faḍl Ibrāhīm, 2 vols. [Cairo, 1964–65], 1:23). Incidentally, our inventory signals suspicion about the name *Aqālīm al-ta'ālīm*. Instead of using this title directly, the inventory describes the work as "a book about the seven disciplines," and adds that "it is written [that it is] the book *Aqālīm al-ta'ālīm*." Perhaps 'Atufi considered the existing manuscript to be *Yanābī' al-'ulūm*, while viewing *Aqālīm al-ta'ālīm* as a different work. For another use of the formula "it is written" as a marker of skepticism, see no. 57, above.
76. *GAL* I, 508.
77. At least two works on the Qur'an feature the phrase *ījāz al-bayān* in their titles: (a) *Ījāz al-bayān li-ma'ānī al-Qur'ān* (*FSQT*, 203), by Najm al-Dīn Abū al-Qāsim Maḥmūd b. Abī al-Ḥasan al-Naysābūrī (d. after 1158); and (b) *Ījāz al-bayān 'an ma'ānī al-Qur'ān* (*FSQT*, 250), by Muntajab al-Dīn Abū Yūsuf al-Muntajab b. Abī al-'Izz (d. 643). Only the first work appears in *Kashf al-zunūn* (205), which uses *fī ma'ānī* instead of *li-ma'ānī* in the title.
78. Paul Losensky, "Jāmī. i. Life and Works," *Encyclopaedia Iranica*.
79. E.g., 114 {11–13}, 126 {9–10}, and 222 {3–4}.
80. *FSQT* (1139) lists one work concerned with the same verse, attributing it to Abū al-Ma'ālī Kamāl al-Dīn Muḥammad b. Muḥammad b. Abī Sharīf al-Maqdisī (d. 1499–1500).
81. There are several commentaries on sura *al-Aṣr* (*FSQT*, 150, 810, 924, 925, 940, 967).
82. Perhaps an account of the exegetical debate held in the circumcision feast of Sultan Mehmed II's sons (Bayezid and Mustafa Çelebi) or a similar such festivity (see Repp, *Müfti of Istanbul*, 109–10).
83. This book is part of a volume that contains nine other treatises on various subjects (theology, ethics, pilgrimage, etc.).
84. William Chittick, "Ṣadr al-Dīn Muḥammad b. Ishāq b. Muḥammad b. Yūnus al-Kūnawī," *Encyclopaedia of Islam*, 2nd ed.; *GAL* I, 449.
85. An extant copy of this work was finished in 669/1271, so the work must precede this date (Richard Todd, *The Sufi Doctrine of Man*, 183).

86. Eleazar Birnbaum, *Ottoman Turkish and Çağatay MSS in Canada: A Union Catalogue of the Four Collections* (Leiden, 2014), 222–25 (no. 103, T9).
87. For the various titles, see Moḥammad-Amīn Riāḥī, “Dāya, Najm al-Dīn Abū Bakr ‘Abd-Allāh,” *Encyclopaedia Iranica*. This commentary, which ends at Q 51:19, has also been attributed to Najm al-Dīn Dāya al-Rāzī (d. 1256), who was a disciple of Najm al-Dīn al-Kubrā (e.g., in *Kashf al-ẓunūn*, 224). Although both scholars seem to have played a role in its composition, their respective contributions are not entirely clear (Jamal Elias, *The Throne Carrier of God: The Life and Thought of ‘Ala’ al-Dawla al-Simnāni* [Albany, 1995], 203–5). Al-Rāzī began working on this commentary in 635/1237–38 and probably continued to do so until his death in 1256 (William Shpall, “A Note on Najm al-Dīn al-Rāzī and the *Baḥr al-Haqā’iq*,” *Folia Orientalia* 22 (1981–84): 76f.). ‘Alā’ al-Dawla al-Simnānī (d. 1336) finished this work by writing a commentary on suras 52–114. According to Jamal Elias, even though al-Simnānī continued *al-Ta’wīlāt* in terms of scope, his commentary “is an independent work differing from the earlier commentary both in style and content” (*Throne Carrier of God*, 205). On the fraught issue of the authorship of *al-Ta’wīlāt al-Najmiyya*, see also Alan Godlas, “Influences of Qushayrī’s *Laṭā’if al-ishārāt* on Sufi Qur’anic Commentaries, Particularly Rūzbihān al-Baqlī’s *Arā’is al-bayān* and the Kubrawi *al-Ta’wīlāt al-Najmiyya*,” *Journal of Sufi Studies* 2 (2013): 87–91.
88. The Caro Minasian Collection of Persian and Arabic Manuscripts at UCLA has a manuscript (no. 617) that contains a Persian versification of al-Shāṭibiyya. However, this poem is dedicated to “Sultan Safi Shah”—who is either Shah Safi I (r. 1629–42) or Shah Safi II (“Suleiman I,” r. 1666–94)—which means the poem was authored long after our inventory was created. I thank David Hirsch for generously taking images of this manuscript and sharing them with me.
89. At the end of his book (2:496), Ibn al-Jazarī informs us that he began writing in Bursa in Rabī’ al-Awwal of 799 (December 1396–January 1397) and finished the work in Dhū al-Hijja of the same year (August–September 1397).
90. *GAL S II*, 134.
91. *Kashf al-ẓunūn*, 646.
92. *Jamīlat arbāb al-marāṣid*, 27.
93. Sometimes this poem is named *al-Shāṭibiyya fī al-rasm*, while *Ḥirz al-amānī* is called *al-Shāṭibiyya fī al-qirā’āt* (see *Jamīlat arbāb al-marāṣid*, 10). For other titles of al-Dānī’s work, see Theodore Nöldeke et al., *The History of the Qur’ān*, ed. and trans. Wolfgang H. Behn (Leiden, 2013), 405.
94. *Jamīlat*, 37.
95. *Daf’* (instead of *Raf’*), according to *GAL S II*, 320 (lists one copy, “Lālelī 57”).
96. *FSQQ* (137) provides the author’s name as Muḥammad b. Maḥmūd al-Samarqandī, adding that he died circa 780 *hijrī*. This death date is problematic because Ibn al-Jazarī wrote *al-Durra al-muḍī’a* decades later (in 823 *hijrī*, as he tells us in verse 235 in abjad letters). Either the given death date for al-Samarqandī is a mistake or the author is someone else. Another person to whom this work has been attributed is a certain Shams al-Dīn Abū ‘Abdallāh Muḥammad “al-Ḥāfiẓ-chirāgh” (d. 884). See the introduction to al-Gūrānī’s *Lawāmi’ al-ghurar: Sharḥ Farā’id al-durar*, 44. There is also a commentary on *al-Durra* that is known as *Aqd* (*‘Iqd?*) *al-Durra* and attributed to a student of Ibn al-Jazarī, namely, Muḥammad b. Muḥammad al-Nuwayrī (d. 1453). Given the similarity of its title to *Iqd al-durar*, there is a possibility that it is the same work mentioned in our inventory. There are two copies of this manuscript, one in the Al-Aqsa Mosque Library (digitized by the British Library [no. EAP521/1/4], accessible here: http://eap.bl.uk/database/overview_item.aqd?catId=55828) and the other copy housed at the manuscript collection at King Saud University (no. 6643, available at <https://ia600700.us.archive.org/23/items/MakhtoutChar7AddoorahNouwairiz/MakhtoutChar7AddoorahNouwairiz.pdf>). This commentary was finished in 872 *hijrī* (see p. 278 in the Al-Aqsa copy). However, its text does not mention a title or the name of its author, and the colophon pages are either missing or illegible, so it is not clear why the catalogues attribute this work to Muḥammad al-Nuwayrī or why the Al-Aqsa version names it *Aqd al-Durra*. Al-Sakhāwī mentions several of al-Nuwayrī’s works, but makes no reference to him having commented on *al-Durra al-muḍī’a* (*al-Ḍaw’ al-lāmi’ li-ahl al-qarn al-tāsi’*, 12 vols. [Cairo, 1353–55 A.H.], 9:246–48).
97. This edition is based on a manuscript of *Ṭabaqāt al-qurrā’ al-sab’a* that bears the seal of an Ottoman Sultan (apparently Sultan Maḥmūd) on the first page (13). Furthermore, the first page of this manuscript contains the following description of the work: *Kitāb sharīf fī ṭabaqāt al-qurrā’ al-sab’a min qibal al-tafsīr*. This phrase is nearly identical to the description found in our inventory. Unfortunately, the editor does not provide any information about the location of this manuscript. However, he notes

that it was produced during the lifetime of al-Sallār (8), so there is a possibility that it is the same manuscript that existed in the imperial library.

98. The description in this paragraph is based on a manuscript of this work at King Saud University (no. 2810), which is available online at <http://makhtota.ksu.edu.sa/makhtota/3073/172> (accessed June 25, 2016). For al-Samarqandī, see Ibn al-Jazarī, *Ghāyat al-nihāya*, 2:260. The death date is not provided by Ibn al-Jazarī but given by the editor of *Lawāmiʿ al-ghurar* in his introduction (p. 44, n. 4). This death date is consistent with al-Samarqandī's list of teachers (which includes, e.g., Muḥammad b. ʿAbdallāh al-Baghdādī (d. after 1339–40); see Ibn al-Jazarī, *Ghāyat al-nihāya*, 2:186). Hence, Brockelmann's date, "um 600/1203" (*GAL* S I, 727), is incorrect.
99. The descriptions of this work in the bio-bibliographical literature are not entirely accurate. For instance, *Kashf al-zunūn* (1582) suggests that it is wholly in Persian. On the other hand, Brockelmann describes *al-Mabsūt* as a bipartite commentary on al-Shāṭibī's *Ḥirz al-amānī*, the first part in Persian and the second part in Arabic (*GAL* S I, 725). This is not exactly correct, unless we lump the second and third parts together. Brockelmann provides al-Samarqandī's death date as ca. 1203, whereas al-Ziriklī opts for ca. 1378 (*al-Aʿlām* [Beirut: Dār al-ʿIlm li-l-Malāyīn, 2002], 7:87).
100. Our inventory (and some other bibliographic works, such as *GAL* S II, 320) uses the term *fawāʿid* instead of *farāʿid*.
101. There is a manuscript of this work (Süleymaniye 47/2) that is dated 17 Muḥarram 884 (April 10, 1479) (*Lawāmiʿ*, 1:185). In fact, given the absence of a scribal name for this copy and the fact that al-Gūrānī was alive when it was copied, this manuscript might be an autograph, in which case 884/1479 may be when al-Gūrānī finished writing *Lawāmiʿ al-ghurar*. The editor of *Lawāmiʿ al-ghurar* (1:88) describes another manuscript (Maktabat ʿĀrif Hikmat, no. 68) that was written by a student of al-Gūrānī—one Muḥammad ʿAlī—and contains a certificate in the hand of al-Gūrānī at the end, dated early Shaʿbān 892 *hijrī* (1487), where the latter verifies that his student read the work with him. Both of these manuscripts also contain al-Gūrānī's *Kashf al-asrār*, which also accompanied *Lawāmiʿ* in the present volume at the Imperial Library.
102. *Lawāmiʿ al-ghurar*, 1:218.
103. It was al-Gūrānī who dubbed this poem *Farāʿid al-durar* (*Lawāmiʿ*, 1:217). Ḥājji Khalifa knows it as *Takmila fī al-qirāʾāt al-thalāth* (649), and other names are attested for it in its manuscripts, including *Tatimmat al-maʿānī fī takmilat al-Mathānī* and *al-Durra al-Yamāniyya* (*Lawāmiʿ*, 1:133f.). For the scant available biographical information on al-Sharʿabī (including his death date), see *Lawāmiʿ*, 1:125f. Modeled on al-Shāṭibī's *Ḥirz al-amānī* concerning the Seven Readers, al-Sharʿabī's poem discusses the three readers "after the seven," namely, Abū Jaʿfar, Yaʿqūb, and Khalaf. Hence, it is similar in form and subject matter to Ibn al-Jazarī's *al-Durra al-muḍīʿa* (see no. 179, above).
104. *Kashf al-zunūn*, 1486.
105. Finished in Bursa in 798/1396, Ibn al-Jazarī's poem has been published as part of the following anthology: Jamāl al-Sayyid Rifāʿī, *Majmūʿa muhimma fī al-tajwīd wa-al-qirāʾāt wa-al-rasm wa-add al-āy* (Cairo, 2006), 126–56. There, its title is given as *al-Nihāya fī al-qirāʾāt al-thalāth al-zāʿida ʿan al-ʿashara*.
106. Al-Ziriklī, *al-Aʿlām*, 7:240.
107. *FSQQ*, 86; *al-Ikhtiyār ʿind al-qurrāʾ*, 545. None of these sources list manuscripts for this work.
108. *A Descriptive Catalogue of the Garrett Collection*, 383; *Fihris al-kutub al-mawjūda bi-al-Maktaba al-Azhariyya*, 1:63.
109. Philip Hitti et al., *Descriptive Catalogue of the Garrett Collection of Arabic Manuscripts in the Princeton University Library* (Princeton, 1938), 383. See also *FSQQ*, 87.
110. For other poetical works of Ibn al-Jazarī, see M. Ben Cheneb, "Ibn al-Djazarī," *Encyclopaedia of Islam*, 2nd ed.
111. Mentioned in *Kashf al-zunūn* (972), which does not name an author.

ON THE HADITH COLLECTION OF BAYEZID II'S PALACE LIBRARY

The manuscript Török F. 59, preserved in the Library of the Hungarian Academy of Sciences, contains an inventory of books found in the palace library of Sultan Bayezid II. The inventory was prepared in 908 (1502–3) and was recorded in a clean copy in 909 (1503–4) by the court librarian Hayreddin Hızır b. Mahmud el-‘Atufi¹ (d. 1541) at the behest of the sultan himself.² According to one count, the library holds about 5,700 volumes and 7,200 titles.³ This is clearly an amazing number for its time, when the library of a member of the cultured elite rarely held more than several hundred books.

One wonders how these thousands of books were accumulated in the imperial library. Why did Bayezid have this particular set of books and not others? What might have determined the nature and variety of the holdings? The present essay offers an assessment of the hadith collection in the library and attempts to answer these questions as far as hadith works are concerned.

Bayezid's interest in books in general is very well attested in the primary sources and has been discussed in previous studies,⁴ but his interest in hadith has yet to be investigated. One can guess that he must have read at least several popular hadith collections under a teacher or by himself. He must have familiarized himself not only with specific hadiths but also with major examples of hadith literature. In fact, a copy of *Ṣaḥīḥ al-Bukhārī* includes a note saying that Bayezid perused it (*muṭā-la'a*).⁵ Notes and records on books also show that some hadith-related works were either composed or copied for Bayezid.⁶ Several others were presented to him.⁷

I have counted 338 volumes of books⁸ listed in the section on hadith, hadith transmitters, and the Prophet's character (*shamā'il*).⁹ If we take into consideration the multi-volume sets, duplicate titles, and compendia

(*majmū'as*) in which various works are bound together, we can say that there are approximately 180 separate works in the section, about 150 to 160 of which are related to hadith. *Majmū'as* include several other books, the titles of which are not provided by the cataloguer.¹⁰ In addition to these, there are also hadith-related works in other sections. For example, several works on rare vocabulary found in hadith texts (*gharīb al-ḥadīth*) are quite understandably listed in the section on dictionaries.¹¹ There are other works in the sections on prayers and devotions, law, and Sufism that could have been incorporated in the hadith section.¹² All these considerations make it very difficult to determine the exact number of hadith works in the sultan's library.

It only makes sense that 'Atufi began his list with al-Bukhari's (d. 870) *Ṣaḥīḥ* (The Sound One) and its commentaries, for this is traditionally the most respected and authoritative of all hadith books. The second book in the list is Muslim's *Ṣaḥīḥ* (The Sound One), which comes right below al-Bukhari's in the hierarchy of hadith books. It seems that the cataloguer had the hierarchy of books in mind while making the list. In fact, one observes that the first half of the hadith section, where the most authoritative books were placed, was prepared with more care. Here the cataloguer lists the copies of the same title one after another, whereas in the following part, copies of the same book are sometimes separated from each other,¹³ and it seems that subsequent books are often listed randomly.

One wonders who sorted the books according to subject matter. Who decided which books were to be placed in the hadith section? Was 'Atufi classifying the books as he was preparing the inventory, or was he making a handlist of sections that had already been sorted out?

While some works evidently had been classified earlier by previous librarians, not all of them had been classified, as his Turkish introduction and physical examination of extant volumes clearly indicate.¹⁴ Whatever 'Atufi's role was in sorting the material, he expended considerable effort in placing copies of the same book together in the inventory, especially those books that were highly regarded by the Ottomans. Yet when it came to books of lesser renown, he did not seem to have shown the same organizational concern. The existence of blank lines in the hadith section could be related to the special attention given to certain titles. After listing all the copies of the esteemed books such as *Bukhārī*, *Muslim*, and *Maṣābīḥ*, 'Atufi almost always leaves one or more lines blank, as if he was expecting new copies of these popular books to arrive. However, with one exception, he does not leave empty lines between titles in the last few pages of the section. Instead, he leaves ample space at the end of the section for the likely addition of other new titles.

As mentioned above, not all the works listed in the hadith section are about hadith per se, and the relation of several other works to hadith is superficial at best. Some of the non-hadith works, including those of Ibn Sina (d. 1037), al-Ghazali (d. 1111), Ibn al-'Arabi (d. 1240), and al-Tusi (d. 1274) in *majmū'as*, are listed here mainly because the first work in a *majmū'a* is a hadith work. The *as'ila* (questions) of 'Ala'eddin Rumi (d. 1438) and responses (*ajwiba*) to these questions by Molla Siraceddin (d. ca. 1446) and Molla Hüsrev (d. 1480) are included because one of the questions discussed concerns hadith. Some works listed in this section can be considered hadith books only if we use the term loosely. Books such as *Shir'at al-Islām* (Laws of Islam) of Imamzada (d. 1177) and *al-Shifā'* (The Healing) of al-Qadi 'Iyad (d. 1149) are counted among the hadith books not because they are devoted specifically to this discipline but because *aḥādīth* constitute their primary source. Ottoman scholars usually considered them to belong to the hadith category for the same reason. A collection of daily prayers, which includes many prophetic ones, is also on the borderline. That is why a book like *al-Ḥiṣn al-ḥaṣīn* (The Strong Fortress) is listed in both the hadith and *ad'iya* (prayers and devotions) sections. Contemporary librarians face similar questions: for example, should a

long Sufi commentary on a single hadith be classified as a Sufi work or a hadith work? The cataloguing challenges of the past continue to exist today.

Several works have titles that cannot easily be traced in bio-bibliographical sources and library catalogues. Often they are too vague to be ascribed to a certain author. For example, a book called *Arba'ūn ḥadīthan* (Forty Hadith) is almost impossible to pinpoint, as there are literally hundreds of books prepared in this genre. Or a book simply called *Sharḥ al-Maṣābīḥ* (Commentary on the Lamps) is not easy to identify because there are multiple commentaries on this book, all of which are very commonly used in Ottoman scholarly circles.

Often the compiler of the inventory gives neither the title nor the author of a work and only describes its content briefly with a claim that it is related to hadith. He usually does so by adding the words *fī al-ḥadīth*¹⁵ ("on hadith") or a rather awkward phrase *min qibal al-ḥadīth* ("pertaining to hadith") after the title or description of the book. It is as if he were giving general subject headings as in modern library catalogues. Sometimes the description literally does not tell us anything. A good illustration of this is a book described as: *Kitābun mukhtaṣarun mushtamilun 'alā muqaddimatin wa-taqṣīmīn wa-khātimatin fī 'ilmi al-ḥadīthi* ("A concise book comprising an introduction, divisions, and a conclusion in the science of hadith") (40 {16–17}). It seems that if the title and the author are not easily identifiable from a given book, and if it is not a book 'Atufi was already familiar with, he did not feel compelled to identify the book, or perhaps he attempted to identify it but could not. In the inventory, a book may simply be called *Risāla fī al-ḥadīth* (Treatise on Hadith) (40 {1}) or *Kitāb fī al-ḥadīth* (Book on Hadith) (40 {3}). We may never learn which book the cataloguer was referring to from these generic descriptions.¹⁶

Many but not all of the hadith manuscripts seem to have been preserved in the Library of the Topkapı Palace Museum. However, it is not always easy to match the books in the Török F. 59 manuscript with those in the current catalogues of the palace library, partly because of the problems I mentioned above and partly because we do not have physical descriptions by 'Atufi of the books whose titles and authors are known. How can one match a copy of al-Bukhari's *al-Jāmi' al-ṣaḥīḥ*

(The Sound Collector) in the inventory with any one of several manuscripts in the Topkapı Palace Library—or any other library for that matter—without knowing its physical description, number of leaves, the date of copying, and so on? Even if the book carries the seal of Bayezid II, that particular copy could have been acquired after the list was prepared, or it may have been overlooked during cataloguing for one reason or another.

The majority of the books in the inventory's hadith section are in Arabic; only eight books (in ten copies)¹⁷ are said to be in Persian, in addition to a few non-hadith books found in *majmū'as*. Most of the Persian books are translations from Arabic. Although it is possible that some of the shorter books and treatises were written in Turkish, they are not identified as such. The first eight pages of the hadith section include well-known collections and their commentaries, whereas the remaining pages comprise a variety of books, most of which are smaller works on specific topics, and some of which are hard to identify. In this first section, many of the books are represented in multiple copies, which shows their popularity. Below I will list works that are represented by more than three copies, together with the books that are based on these (translations, commentaries, abridgments, etc.). Note that the commentaries often include the entire text that is being commented upon. Some copies appear as "incomplete"¹⁸ in the inventory.

- *al-Jāmi' al-ṣaḥīḥ* (The Sound Collector) by al-Bukhari (d. 870), twenty-eight copies; with six different commentaries in sixteen copies.
- *al-Jāmi' al-ṣaḥīḥ* (The Sound Collector) by Muslim (d. 875), eight copies; with two or three different commentaries in six copies; also two different *al-Jam' bayn al-ṣaḥīḥayn*¹⁹ books in three copies.
- *Maṣābiḥ al-sunna* (The Lamps of Sunna) by al-Baghawi (d. 1122), twenty-three copies; one Persian translation; one reworking called *Mishkāt al-Maṣābiḥ* (The Niche of the Lamps) by al-Tibrizi (d. 1340); one *takhrīj*²⁰ work on *Maṣābiḥ* and *Mishkāt*; six different commentaries on *Maṣābiḥ* in seven copies; and two commentaries on *Mishkāt*.

- *Mashāriq al-anwār* (Rising Places of Lights)²¹ by al-Saghani (d. 1252), seven or eight copies; with five to seven different commentaries in fourteen copies.
- *Jāmi' al-uṣūl* (The Collector of the Roots) by Ibn al-Athir (d. 1210), six copies; also two different abridgments (*mukhtaṣar*).
- *al-Shifā'* (The Healing) by al-Qadi 'Iyad (d. 1149), fourteen copies.
- *Shir'at al-Islām* (Laws of Islam) by Imamzada (d. 1177), eight copies; also two or three copies of the commentary of Seyyid 'Alizade (d. 1524–25).
- *Shihāb al-akhbār* (Shooting Stars of Reports) by al-Quda'i (d. 1062), five copies.
- *Shamā'il al-nabī* (High Character of the Prophet) by al-Tirmidhi (d. 892), possibly four copies; also one Persian translation.
- *al-Ḥiṣn al-ḥaṣīn* (The Strong Fortress) by Ibn al-Jazari (d. 1429), two copies (at least one additional copy is in the *ad'īya* section); with two copies of its *mukhtaṣar* by the author himself; and three Persian translations of *al-Ḥiṣn al-ḥaṣīn*, or possibly of its *mukhtaṣar*.

According to 'Atufi's list, the palace library at the time held more than a hundred copies of these ten books in addition to more than thirty different works based on them, represented by about sixty copies. When we take into account the multi-volume sets, it turns out that, of the 338 volumes in the hadith section, roughly 215 (i.e., 64 percent) are directly related to these ten titles.

The popularity of the above-mentioned books in the Ottoman world can also be shown by the number of manuscript copies in other Turkish libraries. (One might simply check the catalogue of any manuscript library or refer to yazmalar.gov.tr.) For example, the famous library of the scholar Veliyyüddin Carullah (d. 1738) holds all ten of the titles mentioned here and many of the works that are based on them.²² Especially the first five books, namely al-Bukhari's *Ṣaḥīḥ*, Muslim's *Ṣaḥīḥ*, al-Baghawi's *Maṣābiḥ*, al-Saghani's *Mashāriq*, and Ibn al-Athir's *Jāmi' al-uṣūl*,²³ seem to have been studied in Ottoman madrasas and hadith colleges (*dār al-ḥadīths*) before, during, and after Bayezid's time. These books are among those listed in the endowment deed (*waqfiyya*) of the *dār al-ḥadīth* established by the Ottoman sultan Murad II (r. 1421–44; 1446–51) in Edirne.²⁴ The same

titles also appear in the book list at the end of the *waqfiyya* of the Dar al-Hadith of the Süleymaniye complex in Istanbul, some in multiple copies and with various commentaries.²⁵ The Ottoman scholar Taşköprizade (d. 1561) reveals in his autobiographical account that he taught *Şaḥīḥ al-Bukhārī*, *Maṣābīḥ*, and *Mashāriq* at various times and places in his long teaching career.²⁶ Later references to hadith textbooks highlight the same titles.²⁷

The popularity of *al-Shifā'*,²⁸ *al-Shamā'il*,²⁹ and *al-Ḥiṣn al-Ḥaṣīn* stems from their subject matter. The first two deal with the person and character of the Prophet, while the last one includes examples of prophetic prayers. Over time, their popularity increased to such an extent that many more commentaries were written on them after Bayezid II's reign. Research has shown that *Shihāb al-akhbār* (897 hadiths), with its short and memorable hadiths, had a remarkable influence on Anatolian and Rumelian Muslims and was the primary source of the hadiths used in the arts and inscribed on buildings since the time of the Seljuqs.³⁰ Although it contained some dubious traditions and was not accepted as a standard textbook, the popularity of *Shihāb al-akhbār* extended beyond scholarly circles.

It should be noted that several of the commentaries on the books listed above were written by Ottoman scholars or by pre-Ottoman Anatolian scholars. These observations attest to the enduring popularity of these works in Ottoman hadith education over the course of centuries. It can also be deduced that these books were not just read but were extensively studied by the Ottomans. Their popularity in teaching circles before the era of Bayezid partially explains why so many copies of these books are listed in 'Atufi's inventory of the palace library. The works were so highly regarded and copies of them were so abundant in Istanbul as well as in the provinces³¹ that it is only natural that they are strongly represented in Bayezid's library.

Now we turn to consider the question as to why these books and not others stood at the center of Ottoman hadith education. From the time they were written, the books of al-Bukhari and Muslim were considered by many to represent the highest achievements in hadith scholarship. By the thirteenth century, their authority was so firmly established that Sunni scholars agreed

upon the soundness of almost all the hadiths in them.³² Together, they were dubbed *Şaḥīḥayn* (The Two Sound Ones) and acquired a special status and utmost respect, al-Bukhari's book being one step ahead of Muslim's. Thus we can understand why these works were studied in madrasas and hadith colleges, despite the fact that, pedagogically speaking, they are not the best hadith books for Ottoman scholars, as we will explain below. These books were not always studied in madrasas from beginning to end, however; sometimes only selected passages of them were read for the purpose of obtaining blessings.³³

Secondary collections such as *Maṣābīḥ*, *Mashāriq*, and *Jāmi' al-uṣūl* had some advantages over the primary collections they were based on. The primary collections contained *isnāds*, repetitions, and other technical characteristics that made their use difficult for scholars who were not hadith experts. After all, Ottoman scholars—and most other scholars in the Islamic world, for that matter—ordinarily were not equipped to deal with all of the technical issues of hadith. Hadith scholars offered them some assistance by compiling hadith collections in manageable sizes, including reasonably sound traditions that were devoid of many technical problems of hadith and were thus easier for jurists and theologians to use. *Maṣābīḥ* (4931 hadiths),³⁴ *Mishkāt* (6442 hadiths), and *Mashāriq* (2267 hadiths) are works of this kind. *Jāmi' al-uṣūl* (9523 hadiths) is a larger collection that aims to bring together all the different traditions found in a number of primary collections. Although there are indications that *Jāmi' al-uṣūl* was used at the madrasas, it seems that the work mostly functioned as a reference book.³⁵ Instead of keeping six or ten books in one's library and searching a single hadith in several different books, one could simply refer to *Jāmi' al-uṣūl*, as it contained nearly all the important hadiths that one might wish to employ.

Among hadith commentaries, Ottoman scholars seem to have been interested in the ones focusing primarily on the textual content of the hadith. The most popular hadith commentaries in 'Atufi's inventory are al-Kirmani's (d. 1384) commentary on *Şaḥīḥ al-Bukhārī* (ten copies), Ibn Malak's (d. after 1418) commentary³⁶ on *Mashāriq* (seven copies), and al-Nawawi's (d. 1277) commentary on *Şaḥīḥ Muslim* (five copies). There are

also several other commentaries on *Mashāriq* and *Maṣābīḥ*, which seem to have been very popular among Ottoman scholars. Many of these commentaries are represented in one or more copies in Bayezid's library collection. These relatively short commentaries on both works aim primarily to teach readers what they should know about the text of a hadith at a quick glance. Just as it is practical to have a handy selection of important hadiths drawn from the primary collections, so too is studying all these hadiths from one commentary.

In addition to their desirable qualities of accessibility and manageability, these commentaries also appealed to Ottoman scholars because they seem to have been written by scholars of the Eastern tradition, with whom the Ottomans felt an affinity. This style of commentary is quite different from that of the "classical commentaries" on hadith that originated in Arab lands, primarily in Syria and Egypt, and that culminated in the works of Ibn Hajar (d. 1449) and al-ʿAyni (d. 1451).³⁷ Written from the hadith scholars' perspective, the latter works often paid too much attention to the "boring" technical aspects of hadith such as *rijāl* criticism (evaluation of hadith transmitters), *isnād* (chain of hadith transmitters), and comparative study of variants and versions of a hadith. Besides, these works are usually much longer than the commentaries from the Eastern tradition, and the size of books was extremely important in the manuscript age. This helps to explain why Ottoman scholars preferred al-Kirmani's commentary on al-Bukhari over those of others, even ones that are considered far superior by most hadith scholars.³⁸ Not only was al-Kirmani's commentary shorter, but also as a student of ʿAdud al-Din al-Ijī (d. 1355), a famous Iranian scholar whose several works were highly regarded in the Turco-Iranian scholarly circles, al-Kirmani clearly spoke the language of the Ottoman scholars more fluently than his Egyptian/Syrian counterparts. To put it differently, Iranian/Central Asian theology had merged with philosophy culminating in the works of al-Taftazani (d. 1389) and al-Jurjani (d. 1413) in the fourteenth century, which constituted the basis of the Ottoman tradition, whereas contemporary Mamluk theological thought was more hadith-centered.

The size of works should be taken into account when considering the reasons for the popularity of books as

well as the selection of textbooks. It would be possible to read *Mashāriq* with students following Ibn Malak's concise commentary on it in a relatively short period of time. But the same cannot be done with Ibn Hajar's colossal commentary on *Ṣaḥīḥ al-Bukhārī*. So, one copy of Ibn Hajar's book in a library would suffice as a reference work, since its overwhelming size would have prevented it from being easily circulated in multiple copies as a textbook.

In general, Ottoman scholars of Anatolia and Rumeia seem to have had an aversion to technical aspects of hadith scholarship.³⁹ Or at least we can say that they simply were not extremely interested in the *rijāl* and *isnād* studies.⁴⁰ We rarely see them dealing with such matters except when they quote from earlier discussions.⁴¹ According to one count, Ottoman scholars produced about 700 works in the field of hadith over the centuries,⁴² and more than 200 of these are "forty-hadith" or *arbāʿīn* collections. Quite a number of them are selections made from earlier collections and commentaries on those.⁴³ Some of these commentaries belong to the genre of *ḥāshiya* (supercommentaries, annotations) and *taʿlīqāt* (glosses) on large hadith collections, especially on those popular textbooks mentioned above. Only a handful of hadith works written by Ottoman scholars deal with the technical and terminological issues of the science of hadith. *Uṣūl al-ḥadīth* works written by Ottoman scholars are few and far between. Judging from their format, it appears that these works do not intend to contribute to universal hadith studies; rather, they take the form of textbooks or educational aids for students.⁴⁴ In addition, Ottoman scholars produced only a few insignificant *rijāl* books of dubious quality. In their studies on hadith, they mostly focus on understanding and interpreting the hadiths, to the exclusion of the technical problems these hadiths may generate. Ottoman scholars pondered what they might derive from these hadiths (assuming that they were "authentic") from various perspectives, especially in relation to actual problems they had to confront.

Only a few different *uṣūl al-ḥadīth* works are mentioned in the inventory, none of which was written by an Ottoman scholar. These works are Ibn al-Salah's (d. 1245) *ʿUlūm al-ḥadīth*, al-Tibī's (d. 1342) *Khulāṣa*, al-ʿIrāqī's (d. 1402) *Alfiyya* with his own commentary, and

Ibn Hajar's *Nukhbat al-fikar* (seven copies in total).⁴⁵ These are the books commonly listed as the *uṣūl* books studied at *dār al-hadīth*s and madrasas in the Ottoman world. So it should come as no surprise that we find several copies of them in the palace library. As for *rijāl* works, Bayezid's library is not so rich.⁴⁶ In addition to two famous books, one by Ibn Hajar and one by al-Dhahabi (d. 1348), there are three other volumes listed as *Kitāb asmā' al-rijāl* (Book of Names of Transmitters), which are not conclusively identifiable. It is also unclear whether they are volumes or different copies of the same work or three separate *rijāl* works, which the cataloguer could not identify and to which he assigned the same descriptive title.⁴⁷ There are only a couple other books that deal with biographies, one on the companions of the Prophet and the other on ascetics, most of whom were also hadith transmitters.

While hadith books that deal with technical aspects of hadith scholarship are underrepresented in the palace library, most of the books listed in the last few pages of the inventory contain hadith selections, sometimes with commentaries. There are about forty different titles that contain selections of various sizes, and about forty books designed to be commentaries on either a single hadith or a selected number of hadiths, or an entire book. Selecting hadiths on particular topics and commenting on them is quite typical of Ottoman hadith studies. Jihad, prayers, and devotion are the most popular topics. Several books have been compiled to encourage people to do good or develop a positive character. There are at least seventeen forty-hadith collections, which is by far the most popular hadith genre of Ottoman scholars, as noted above. Several of these *arba'īn* collections cannot be definitively identified, given the paucity of information provided in their generic titles.

The palace library contains other secondary hadith collections, which were very popular in the Ottoman lands, and which quite expectedly made their way into the library collection in multiple copies: al-Mundhiri's (d. 1258) *al-Targhib wa-l-tarhīb* (The Book of Enjoining and Warning); al-Nawawi's *Riyāḍ al-ṣāliḥīn* (Gardens of the Righteous), *al-Adhkār* (Remembrances), and *al-Arba'ūn* (Forty Hadith); al-Uqlishi's (d. 1155) *al-Kawkab* (The Planet); al-Kalabadhi's (d. 990) *Baḥr al-fawā'id* (Ocean of Benefits); and Sadr al-Din al-Qunawi's

(d. 1274) *Sharḥ al-arba'īn ḥadīthan* (Commentary on Forty Hadiths).⁴⁸ The last two works and several others in the library, such as Ibn Abi Jamra's (d. 1300) *Bahjat al-nufūs* (Delight of Souls), are Sufi commentaries on selected hadiths, which highlights the interaction between Sufism and hadith in the Ottoman world.

Several works in the inventory were written by contemporary scholars (Molla Gurani's commentary on *Ṣaḥīḥ al-Bukhārī* comes to mind), but most are copies of works produced in earlier centuries. Aside from the classical hadith compilations, the majority of the books in the collection are by authors who lived after the 1200s—that is, closer to the time of Bayezid. This is in line with the general tendency of the Ottoman ulema, who focused primarily on studying late medieval works written a few generations earlier, as can be seen in the curricula of Ottoman madrasas. With few exceptions, all the works taught at madrasas were written in or after the thirteenth century.⁴⁹

A striking lacuna in the palace library is a collection of early hadith sources. It seems that Bayezid II, his father Mehmed II, and their librarians were not particularly interested in collecting the earliest and rarest works of hadith. With only a few exceptions, the hadith collection as it appears in the inventory includes mostly well-known and common works that could have been easily gathered from those available in Istanbul, Anatolia, or Rumelia at the time. Going one step further, one might even claim that the hadith collection in the palace library was gathered somewhat randomly without any serious effort to curate a coherent collection.⁵⁰

The librarians were also evidently not interested in collecting some of the most celebrated hadith works such as al-Tirmidhi's (d. 892) *al-Jāmi'*, one of the famous six books (*al-kutub al-sitta*).⁵¹ Shockingly, not a single copy of this book is found in the imperial library despite its tremendous authority. On the other hand, it is a nice surprise to see Ahmad b. Hanbal's (d. 855) colossal and rather rare *al-Musnad* in the collection, which I suppose made its way to the collection by mere chance. Many of the major collections of the ninth and tenth centuries, and also quite a few pre-twelfth-century technical works are likewise nowhere to be found in the palace library.⁵²

I do not mean to suggest, of course, that the hadith collection of Bayezid's library would not have been

valuable. Some of these books were probably priceless autograph copies and unica. They might have been exceptional exemplars of book arts: superb in terms of calligraphy, binding, and illuminations—although only one book in the hadith list, a work on the *Mi'rāj* (Ascension of the Prophet), is identified as being illustrated (*muṣawwar*) (39 {15}). Some of the books clearly had sentimental value for the royal family, since the books originally belonged to their ancestors.⁵³ Some of these books had been copied at the request of the sultans themselves. Others were presented or dedicated to them, having been sent from outside the Ottoman realm.⁵⁴ At least two books in the inventory were written for the kings of previous dynasties,⁵⁵ and the actual copies held by Bayezid's library might have originated from the libraries of these rulers. Unfortunately, these are issues that extend beyond the purview of the present essay.

In conclusion, a person seeking old and rare hadith books might be somewhat disappointed by the holdings of Bayezid's library. On the other hand, it is my opinion that the imperial character of the library should not be sought in its holdings of famous hadith collections and commentaries, but rather in its shorter and lesser-known works, as listed in the second half of the section on hadith. Some of these works were compiled by Ottoman scholars and dedicated to the sultans, although they cannot be identified as such from the scant entries of 'Atufi's inventory. The topics of these works and how those topics were treated might yield insights on their owners as well as their authors. For example, there are at least six books on jihad (38 {3}; 39 {16–17}; 40 {8–9}; 55 {9–10}; 55 {10–11}; 55 {13–14}) and two on kings and kingship (40 {9}; 41 {7}). Other sections of the inventory comprise more titles on these topics. It is only natural for a ghazi sultan to have hadith works on jihad and kingship. It would be interesting to examine how such topics are treated in these highly neglected works. Not only can these books (which are mostly selections of hadiths interspersed with commentary) give us a sense of Ottoman scholars' knowledge of hadith, but also, and more importantly, they show how scholars used and interpreted hadith in their own particular social, political, and cultural contexts.⁵⁶ This is where the originality of Ottoman works on hadith should perhaps be sought, rather than in their contribution to the technical aspects

of universal hadith studies. An approach from such a regional perspective may accelerate Ottoman hadith studies, which are still in their infancy. If we can learn to appreciate these works, we will be better equipped to evaluate Bayezid's world, including his palace library.

NOTES

Author's note: I would like to thank my friends Muhammet Emin Eren and Mehmet Kalaycı for reading an earlier version of this essay and providing me with useful feedback. I learned a lot, as everybody does, from the conversations I had with Himmet Taşkömür. Finally, I am grateful for the editors of this volume for their corrections and suggestions.

1. On Hayreddin Hızır b. Mahmud el-'Atufi see Taşköprizâde, *al-Shaqā'iq al-nu'māniyya fī 'ulamā' al-dawla al-'uthmāniyya*, ed. Ahmed Subhi Furat (Istanbul, 1985), 416–17; Hızır Yağcı, *Hayreddin Atûfî'nin Hadis Şerhçiliği* (Istanbul, 2017); Sadık Cihan, "Hayreddin Hızır b. Mahmud b. Ömer el-'Atufi 'Kastamoni' ve Hadis Eserleri," *Atatürk Üniversitesi İslâmî İlimler Fakültesi Dergisi* 3 (1979): 65–75. Cihan introduces five hadith-related works by 'Atufi, all of which are commentaries, one of them on al-Saghani's *Mashāriq al-anwār*. None of these commentaries appears in the inventory 'Atufi prepared, although some of them were presented to Bayezid. They seem to have been written after the inventory was prepared. One wonders whether 'Atufi ever used the palace library for his own research and writing. It is more likely that his books on medicine rather than hadith will supply us with clues regarding this question.
2. MS Török F. 59, 12.
3. Miklós Maróth, "The Library of Sultan Bayazıt II," in *Irano-Turkic Cultural Contacts in the 11th–17th Centuries*, ed. Éva M. Jeremiás (Piliscsaba, 2003), 112.
4. Numerous anecdotes found in Taşköprizâde's *al-Shaqā'iq al-nu'māniyya fī 'ulamā' al-dawla al-'uthmāniyya* and other sources show Bayezid's interest in books. In one of them, he is said to have practically forced the bedridden Hocaşade (d. 1488) to write a *ḥāshiya* on *Sharḥ al-Mawāqif* (Commentary on the Stations) (Taşköprizâde, *Shaqā'iq*, 137–38). Bayezid was very fond of Seyyid 'Alizade's (d. 1524–25) commentary on *Shir'at al-Islām* and because of that, gave him the nickname *Shāriḥ al-Shir'a* (The Commentator of *al-Shir'a*) (Taşköprizâde, *Shaqā'iq*, 315). Also see Süheyl Ünver, "İkinci Sultan Bâyezid'in Edirne'deki Vakıf Kitaplarına Dair," *Vakıflar Dergisi* 4 (1958): 105–6; İsmail Erünsal, *Osmanlılarda Kütüphaneler ve Kütüphanecilik: Tarihî Gelişimi ve Organizasyonu* (İstanbul, 2015), 115–18; Feridun Emecen, "II. Bâyezid'in Tarih Merakı Üzerine Bir Not: Fenarîzâde Alâeddin Alî'nin Anonim Osmanlı Tarihî Derlemesi," in *Kitaplara Vakfedilen Bir Ömre Tuhfe: İsmail E. Erünsal'a Armağan*, ed. H. Aynur, B. Aydın, and M. B. Ülker, 2 vols. (Istanbul, 2014), 1:331–44.

5. Manisa İl Halk Kütüphanesi, 45 Hk 183.
6. The famous Ottoman calligrapher Şeyh Hamdullah Efendi (d. 1520) copied *Mashāriq al-anwār* during Bayezid II's reign and most probably for him (Süleymaniye Kütüphanesi, Ayasofya, 898). A hadith work dedicated to Bayezid II is Muhyiddin Seydi Çelebi's (d. 1525) *al-Mustakhrāj min al-Bukhārī* (An Extract from al-Bukhari's *Şaḥīḥ*), a work that includes hadith commentaries on how to be a good ruler. See *Buhārī'de Yönetim Esasları: Müstahrec mine'l-Buhārī*, ed. and trans. Mehmet Erdoğan (Istanbul, 2000). Seydi Çelebi's book is unfortunately not found in the inventory, perhaps because it was written after the inventory was prepared. At least two books in the inventory appear to have been copied for Bayezid according to library catalogues: *Kitāb al-fawā'id wa-al-farā'id* (Book of Benefits and Precious Gems) by Ibn al-Hafid al-Taftazani of Herat (d. 1510) and *al-İjtihād fi faḍl al-jihād* (An Endeavor regarding the Virtues of Holy War) by Ibn al-Waiz al-Qaysari (a contemporary of Bayezid). One of the unidentified works on jihad must be the *Faḍā'il al-jihād* (Virtues of Holy War) of Hatibzade (d. 1495), another book dedicated to Bayezid (Süleymaniye Library, Ayasofya, 1989).
7. The Egyptian scholar al-'Abbasi's (1463–1556) commentary on *Şaḥīḥ al-Bukhārī* was a gift to Bayezid made during al-'Abbasi's visit to Istanbul as an envoy of the Mamluk ruler al-Ghawri (r. 1501–16) (Taşköprüzade, *Şaḡā'iq*, 411–12). The manuscript in the Topkapı Palace Library (Ahmed III, 391) is dated to 1501, only a couple of years before the preparation of the inventory. This is the year al-Ghawri ascended to the throne and probably also the year al-'Abbasi was sent to Istanbul as an ambassador.
8. When counting, I assumed that multi-volume sets are always indicated in the inventory, but this may not be the case.
9. *Taḡşilu kutubi al-aḥādīthi wa-kutubi asmā'i al-rijālī wa-ansābihim wa-kutubi manāqibi aṣḥābi al-ḥadīthi wa-kutubi shamā'ili al-nabī -ṣallā Allāhu 'alayhi wa-sallama-* (Documentation of the books of hadith, books of names of transmitters and their genealogies, books of glorious deeds of the people of hadith, and books of the character of the Prophet) (MS Török F. 59, 30–42; 54–55). A leaf in the hadith section is clearly misplaced. The folio that covers pages 54–55 after the *ad'ya* section should come between pages 37 and 38 in the hadith section.
10. *Majmū'atun min rasā'ili al-funūni al-mukhtalifati ūlāhā majmū'atun min al-aḥādīthi* (A compendium comprising treatises on different arts, first of which is a collection of traditions) (MS Török F. 59, 41 {14}); *Kitābu al-ḥiṣni al-ḥaṣni fi al-ḥadīthi wa-thalātha 'ashara risālatan min qibali al-ḥadīth fi mujalladin wāhidin* (The Book of Strong Fortress and thirteen treatises pertaining to hadith bound in a single volume) (MS Török F. 59, 37 {1–2}). This kind of entry prevents us from determining the exact number of hadith works in the inventory, but the actual number is probably higher.
11. See MS Török F. 59, 295 {4–5, 16}; 297 {13–17}; 299 {1–3, 7–10}.
12. For example, in the section on prayers and devotions: *Kitābu al-jāmi'i al-bahī li-da'awāti al-nabī -ṣallā Allāhu 'alayhi wa-sallama- fi al-ad'iyaṭi. Kitābu al-ḥiṣni al-ḥaṣni min qibali al-adhkāri wa-al-ad'iyaṭi* (The Splendid Collector of the Prayers of the Prophet on Prayers. The Strong Fortress pertaining to Remembrances and Prayers) (MS Török F. 59, 52 {1–2}). Several other copies of *al-Ḥiṣn al-ḥaṣn* are placed in the hadith section. Judging from the title, *al-jāmi' al-bahī* may also have been placed in the hadith section just like many other prayer books.
13. For example, al-Kalabadhi's *Ma'ānī al-akhbār* (Meanings of Reports) is listed under three different titles in three different places (MS Török F. 59, 55 {9}; 55 {11–12}; 40 {12–13}).
14. An examination of manuscripts reveals that the titles or the descriptive statements found in the inventory are written verbatim on the first leaves of many manuscripts. They are obviously later additions, and it is very likely that it was 'Atufi who wrote these titles on the manuscripts during the preparation of the inventory.
15. The compiler uses this phrase even after such well-known hadith books as al-Bukhari's *Şaḥīḥ*, but he does not do so after every book.
16. There are about forty books that cannot be identified because of this problem.
17. The actual number of Persian books is probably much higher. In addition to some unidentified books, at least two books in the inventory are said to be Persian in other sources: *Najāt al-dhākirin* (Salvation of Rememberers) (MS Török F. 59, 42 {8}) and *Miftāḥ al-jinān* (Key to the Gardens) (MS Török F. 59, 55 {12–13}).
18. 'Atufi does not use a specific term to indicate that a book is incomplete. Only when the library does not hold all the volumes of a multi-volume set does he regularly make note of which volume(s) the library has. I can only infer from this that certain books (about fifteen sets) are incomplete. However, an examination of the manuscripts shows that several other books in the Hadith section were actually incomplete at the time of the preparation of the inventory. For example, a volume of *Sharḥ al-sunna* (The Commentary on Traditions) by al-Baghawi (d. 1122), comprising about one fifth of the book, could not be identified by 'Atufi, who gave it the title *Ādāb al-Islām* (Manners of Islam) based on the surviving chapters of the book.
19. Works that combine the hadiths of the books of al-Bukhari and Muslim.
20. Works that trace the original primary sources of the hadiths found in later collections.
21. See Mustafa Celil Altuntaş, "Osmanlı Hadis Eğitiminde *Meşāriku'l-Envār*," in *Osmanlı'da İlim ve Fikir Dünyası: İstanbul'un Fethinden Süleymaniye Medreselerinin Kuruluşuna Kadar*, ed. Ömer Mahir Alper and Mustakim Arıcı (Istanbul, 2015), 147–78.
22. For an incomplete list of Carullah Efendi's hadith books, see Abdullah Taha İmamoğlu, "Osmanlı'da Kitap Kültürü

- Açısından Veliyyüddin Cârullah Efendi'nin Hadis Kitaplarındaki Notları," in *Osmanlı Kitap Kültürü: Cârullah Efendi Kütüphanesi ve Derkenar Notları*, ed. Berat Açıl (Ankara, 2015), 100–103. *Shihâb al-akhbâr* and *Shir'at al-Islâm* are not found in this list because they are not categorized as hadith books in the old catalogue of the library of Carullah Efendi. The fact that some of these books are placed under other topics also indicates the hesitation on the part of Ottoman scholars regarding the classification of certain books.
23. According to *samâ'* (audition) records of a manuscript, Sadr al-Din al-Qunawi taught *Jâmi' al-uşul* to a number of students in Konya. See Muhammet Yılmaz, "Sadreddin el-Konevî'nin Huzurunda Okunan Mecdüddîn İbnül-Esîr el-Cezerî'nin Câmî'u'l-Uşûl İsimli Eserinin Kiraat ve Semâ Kayıtları Üzerine Bir Değerlendirme," in *Anadolu'nun İslamlaşma Sürecinde Dârul-Hadisler*, ed. Salih Kesgin and Muhittin Düzenli (Samsun, 2013), 261–74. The popularization of this book in Anatolia can probably be credited largely to Sadr al-Din al-Qunawi.
 24. Mustafa Bilge, *İlk Osmanlı Medreseleri* (Istanbul, 1984), 225–31, quoted in Selahattin Yıldırım, *Osmanlı İlim Geleneğinde Edirne Dârulhadîsi ve Müderrisleri* (Istanbul, 2001), 187–88.
 25. See Mehdi Çiftçi, *Süleymaniye Dârulhadîsi: XVI-XVII. Asırlar* (Istanbul, 2013), 152–63.
 26. See Taşköprizade, *Shaqâ'iq*, 556–58. Note that the word he uses for teaching hadith books is the more modest *naqaltu* ("I transmitted") instead of the usual *darrastu* ("I taught") that he uses for other books.
 27. For example, Nebi Efendizade (d. 1785–86), in his famous *Qasida*, names *Bukhârî*, *Maşâbîh*, and *Ibn Malak* (*Sharh al-Mashâriq*) as books to be studied in hadith. See Cevat İzgi, *Osmanlı Medreselerinde İlim*, 2 vols. (Istanbul, 1997), 1:96.
 28. For the authority this book carries, one has only to remember the *Şifahanlık* institution (public recitation of al-Qadi İyad's book *al-Shifâ*), similar to *Buharihanlık* (public recitation of al-Bukhari's *al-Şahîh*), both of which were established to publicize hadith as well as to receive blessings, relief, or victory especially in times of trouble such as war, famine, and natural disasters. These texts about the beloved Prophet were read publicly and ceremonially from beginning to end. For an introductory essay on Buharihanlık, see Mustafa Celil Altuntaş, "Osmanlı İlim Geleneğinde Buhârîhanlık," *Hadis Tetkikleri Dergisi* 8:1 (2010): 33–67. For *al-Shifâ* and Şifahanlık, see *Türkiye Diyanet Vakfı İslam Ansiklopedisi*, s.v. "eş-Şifâ," by M. Yaşar Kandemir.
 29. Though not a textbook, al-Tirmidhi's *Shamâ'il* was very commonly studied. After the fifteenth century, the popularity of this text grew, and more than sixty commentaries were written on it. Ottoman scholars contributed to its renown by translating and reworking the book at least a dozen times. See Ali Yardım, "Şemâil Nev'inin Doğuşu ve Tirmizi'nin Kitâb'üş-Şemâil'i," *Dokuz Eylül Üniversitesi İlahiyat Fakültesi Dergisi* 1 (1983): 349–409.
 30. See Ali Yardım, *Hadis Kivulcimleri: Şihâb'ül-Ahbâr Tercümesi* (Istanbul, 2007), 10–20.
 31. Leaving aside the literary references to these books, even a cursory look at the copying dates and places of the manuscripts preserved in libraries today will demonstrate that these titles were popular in the Ottoman realm long before Bayezid.
 32. See Kamil Çakın, "Buhârî'nin Otoritesini Kazanma Süreci," *İslâmî Araştırmalar* 10 (1997): 100–109; Jonathan Brown, *The Canonization of al-Bukhārī and Muslim: The Formation and Function of the Sunni Hadīth Canon* (Leiden, 2007).
 33. How exactly these works were studied is still far from clear. One wonders how staunchly Hanafi Ottoman scholars dealt with Bukhari hadiths that went against the rulings of the Hanafi *madhhab* (school of law) in their teaching circles, for example.
 34. The number of hadiths in these books may change from edition to edition.
 35. That the book did not attract commentaries, probably due to its size, may be taken to indicate that it was not a classroom text.
 36. For this commentary, which was written by a very influential Anatolian scholar on Ottoman madrasa education, see Suat Koca, "İbn Melek'in *Mebâriku'l-Ezhâr Şerhu Meşâriki'l-Envâr*'ındaki Şerh Yöntemi ve Eserin Hadis Şerh Literatüründeki Yeri," *Ankara Üniversitesi İlahiyat Fakültesi Dergisi* 53, no. 1 (2012): 1–33. This text discusses the features that Ottoman scholars consider desirable in a hadith commentary.
 37. See Zişan Türcan, *Hadis Şerh Geleneği* (Ankara, 2011). See also Türcan's article on the Anatolian tradition of hadith commentaries, "Anadolu'da Hadis Şerhçiliği," in *Anadolu'da Hadis Geleneği ve Dârul-Hadisler*, ed. Muhittin Düzenli (Çankırı, 2011), 339–51.
 38. Taşköprizade calls al-Kirmani's commentary *amthal* and *afdal* ("exemplary" and "superior") and Ibn Hajar's *ajma'* and *anfa'* ("extensive" and "more beneficial") (Taşköprizade, *es-Se'âdetü'l-Fâhira fî Siyâdeti'l-Âhira: İlimler Tasnifi*, ed. Sami Turan Erel [Istanbul, 2016]), 147).
 39. It is interesting here to note that many scholars called "hadith experts" came from Syria and Egypt, or were educated there. Ibn al-Jazari is one early example of these scholars. Molla Gurani, a student of Ibn Hajar in Egypt, was introduced to Murad II as a tafsir and hadith scholar. The Mamluk envoy al-'Abbasi, who presented to Bayezid II his commentary on *al-Bukhârî*, declined Bayezid's offer of a position to teach hadith in Istanbul, but later on he settled in Istanbul (Taşköprizade, *Shaqâ'iq*, 411–12). Taşköprizade's hadith teacher was a scholar originally from Tunisia (ibid., 451–52, 555). The anonymous author of *Kevâkib-i Seb'a* (Seven Planets), a treatise on the Ottoman scholarly tradition, calls Misri Mustafa Efendi *tabaka-ı muhaddisînin tâc-ı sırrı* [read: *tâc-ı serî*] ("the crown of the class of hadith scholars") in the first half of the eighteenth century (XVIII. Asrın Ortalarına Kadar Türkiye'de İlim ve İlimiyeye Dâir Bir Eser: *Kevâkib-i Seb'a Risâlesi*, ed. Nasuhi Ünal Karaarslan [Ankara, 2015], 107). One can find more examples. Of course what makes someone a great hadith expert in the view of

- an Ottoman scholar might differ from the opinion of their contemporaries in Egypt or from a modern scholarly perspective. To give an example, the Mamluk scholar Taj al-Din al-Subki (d. 1370) complained about people who were called "hadith scholars" (*muḥaddithūn*) by merely studying *Mashāriq*, *Maṣābiḥ*, and *Jāmi' al-uṣūl*; according to him, even if someone memorizes these and other similar books and studies *uṣūl* books, this would still not qualify him to be called a *muḥaddith*. Al-Subki goes on to define what he considers to be the lowest degree of hadith scholarship. In order to be called a *muḥaddith*, he says, that person should be familiar with technical matters of *isnād* and *rijāl*, memorize a substantial number of hadiths, and study the six books under teachers, in addition to several other important collections. See al-Subki, *Mu'īd al-ni'am wa-mubīd al-niqam*, ed. M. 'A. al-Najjār, Abū Zayd al-Shalabī, and Muḥammad Abū al-'Uyūn (Cairo, 1948), 81–83. Al-Subki seems to have been attacking scholars who came to the Mamluk world from the east, but one could also easily read this as a Mamluk criticism of Ottoman hadith scholarship.
40. It is striking that of the almost 200 identified *mudarris*es who taught at the Edirne Darūlhadisi and the Süleymaniye Darūlhadisi, none produced a work of this kind. In fact, only a handful of hadith-related works appear to have been written by them. These works all fit perfectly within the usual trend in Ottoman hadith studies. See Yıldırım, *Edirne Dârulhadîsi*, 61–158; Çiftçi, *Süleymaniye Dârulhadisi*, 289–414.
 41. According to a recent study, in an exegetical work, our own 'Atufi uses only *Mashāriq al-anwār* as his hadith source with two commentaries (one of them being his own) on the work, and he hardly ever discusses any technical aspects of the hadiths he uses. See Hızır Yağcı, "Beyzâvî'nin *Envârü't-Tenzîl* Adlı Eserine, Atûfî'nin Yazdığı *Mir'âtü't-Te'vîl* Adlı Haşiyesinde Rivayet Kullanımı," *Kafkas Üniversitesi İlahiyat Fakültesi Dergisi* 5 (2016): 1–24.
 42. These figures are helpful estimates, but they may not be totally accurate because 1) not all hadith-related works by Ottoman scholars have been identified and studied; and 2) the boundaries of the field of hadith are ambiguous.
 43. See Selahattin Yıldırım, "Osmanlı Muhaddisleri'nin Eserleri ve Bunlar Arasında Kırk Hadis Çalışmalarının Yeri," in *Anadolu'da Hadis Geleneği ve Dâru'l-Hadisler*, 141–42. For the genre of forty hadiths and the books of this genre compiled by Ottoman scholars, see Abdülkadir Karahan, *İslâm-Türk Edebiyatında Kırk Hadisler* (Ankara, 1991); Selahattin Yıldırım, *Osmanlı'da Kırk Hadis Çalışmaları – 1* (İstanbul, 2000). For a list of eighteenth- and nineteenth-century Ottoman hadith works, see Yunus Macit, "Osmanlı Gerileme Dönemi Hadis Öğretimi," in *Anadolu'da Hadis Geleneği ve Dâru'l-Hadisler*, 257–68. Bayezid's contemporary Kemalpaşazade, a very prolific and highly esteemed scholar, wrote about fifteen works related to the hadith discipline and, with the exception of a short *uṣūl* work that contains only explanations of about twenty terms, all of them are selections and commentaries. Unsurprisingly, the sources utilized in his commentaries are not technical hadith works, but rather are what might be expected from an Ottoman scholar of his age: linguistic, rhetorical, and theological works, Hanafi legal books, and Qur'anic commentaries. See Salih Özer, "Şeyhu'l-İslam Kemâl Paşazâde'nin (ö. 1534) Hadis İlmine İlişkin Faaliyetleri, Şerhçiliği ve Hadis Usûlü Risâlesinin Tercümesi," *Dinî Araştırmalar* 9 (2006): 193–210.
 44. Birgivi's (d. 1571) famous *Uṣūl al-ḥadīth* (Methodology of Hadith) is a good example. For an incomplete and not totally reliable list of *uṣūl al-ḥadīth* works by Ottoman scholars, see Sadık Cihan, "Osmanlı Devrinde Türk Hadisçileri Tarafından Yazılan Usulü Hadis Eserleri, Risâleleri ve Nuhbetü'l-Fiker Üzerine Yapılan Şerh ve Tercümeler," *Atatürk Üniversitesi İslâmî İlimler Fakültesi Dergisi* 1 (1975): 127–36.
 45. Judging from the entries in the inventory, there appear to be three additional *uṣūl* works among the unidentified titles. 'Atufi seems to have used the phrase *fi 'ilm al-ḥadīth* ("on the science of hadith") for *uṣūl* works rather than the usual *fi al-ḥadīth* ("on hadith").
 46. The title given to the hadith section by 'Atufi is more promising in terms of biographical works but the collection itself is rather poor.
 47. Two of these three volumes could be copies of *Asmâ' rijāl Mishkât al-Maṣābiḥ* (The Book Concerning the Men of the Niche of the Lamps) by al-Khatib al-Tibrizi (d. 1340). There are two copies of this work in the Topkapı Palace Library today that have Bayezid's stamps on them. The third volume could be *Asmâ' rijāl al-Bukhārī* (The Book of Names in al-Bukhari's Book), another work in the library with a Bayezid stamp.
 48. Although this work is known as *Sharḥ al-arba'in* (Commentary on Forty Hadiths), all the manuscripts of this work contain only 27 to 29 hadiths.
 49. For the dates of common textbooks and reference works, see Francis Robinson, "Ottomans-Safavids-Mughals: Shared Knowledge and Connective Systems," *Journal of Islamic Studies* 8, no. 2 (1997): 174–77; Shahab Ahmed and Nenad Filipović, "The Sultan's Syllabus: A Curriculum for the Ottoman Imperial *Medreses* Prescribed in a *Fermân* of Qānūnī I Süleymân, Dated 973 (1565)," *Studia Islamica* 98–99 (2004): 183–218, at 196.
 50. The reason there are so many copies of certain works might be that they were intended to educate the palace inhabitants and the sultans. However, this does not explain all the works in multiple copies and it cannot be the only reason, since these books were occasionally sent out to public libraries established by the royal family. On the other hand, books that had been gifted or dedicated to the royal family were also sent out, and these books were often unique and autograph copies. Obviously, those who made decisions concerning the library collection had very different standards from those of modern librarians.
 51. The library held only one copy each of the other three *Sunans* in *al-kutub al-sitta*.

52. If today we have many of these works in Istanbul libraries, including the Topkapı Palace Library, their transfer to the Ottoman capital must have taken place after the conquest of Arab lands in the sixteenth century. Individual bibliophiles from among the scholars and statesmen must have played an important role in acquiring these works.
53. Although Bayezid inherited the majority of his library from his father, only one book in the section is specifically related to Mehmed II: *Kitābu nuzhati al-sultāni li-khizānati Mehemmed bin Murād Khān fī faḍli al-jihādi* (The Stroll of the Sultan written/copied for the library of Mehmed II on the virtues of holy war) (55 {13–14}).
54. Books that were dedicated or sent to the sultan from afar include: an autograph copy (*bi-khaṭṭi shāriḥihi*) of *al-Jawhar al-farīd* (The Unique Gem) by ‘Alī b. Nasir of Mecca (d. 1509) (41 {3–5}) and *Jawāhir al-‘iqdayn* (Gems of Two Necklaces) by Nur al-Dīn al-Samhūdī of Medina (d. 1506). Another Hijāzī scholar, ‘Afif al-Dīn al-Madani (fl. 1482), personally came and presented his book, *Ighthinām al-furṣa li-qirā’at al-ḥadīth bi-Burṣa* (The Book of Seizing the Opportunity for Reading Hadith in Bursa), to Bayezid.
55. *Al-Tuḥfa al-najībīyya al-uwaysīyya* (The Noble Gift to the Uwaysi Dynasty) (41 {5–6}) of al-Damaghani (d. before 1407) compiled for the Jalayirid ruler Uways Khan (r. 1356–74); and *Tuḥfat al-khāqān* (The Gift to the King) (41 {12}), written for Jani Beg (r. 1342–57), the sultan of the Golden Horde. Another book in the collection, namely *al-Risāla al-ghiyāthiyya* (The Epistle for Ghiyath al-Dīn) by ‘Abd al-Karīm al-Hamadani (fl. 1317), appears to have been the actual copy presented to the Ilkhanid vizier Ghiyath al-Dīn b. Rashid al-Dīn Fadl Allāh (d. 1336).
56. Books classified as hadith are not our only source for observing how Ottoman scholars worked with hadith. As a main source of religious knowledge, hadith was heavily drawn upon in all types of religious literature; by examining such works, we may be able to learn even more about how hadith was used, interpreted, and reinterpreted in the Ottoman world. For an introductory essay on the place of hadith in the Ottoman culture, see Mehmet Emin Özafşar, “Osmanlı Eğitimi, Kültür ve Sanatında Hadis,” in his *Hadis ve Kültür Yazıları* (Ankara, 2015), 111–56.

Note: I use *i'rāb* (case endings) only for titles taken from the inventory.

I. IDENTIFIED BOOKS

al-'ABBĀSĪ, Badr al-Dīn Abū al-Faṭḥ 'Abd al-Raḥīm b. 'Abd al-Raḥmān b. Aḥmad al-Ḥamawī al-Qāhirī (d. 963/1556)

1. *al-Ḍaw'* *al-sārī sharḥ Ṣaḥīḥ al-Bukhārī*: see al-BUKHĀRĪ 1.5.

ABŪ DĀWŪD Sulaymān b. al-Ash'ath al-Sijistānī al-Azdī (d. 275/888)

1. *al-Sunan* (Traditions), in 1 vol., Arabic, 34 {16}. MANUSCRIPT: Topkapı Sarayı Müzesi Kütüphanesi (hereafter TSMK), A. 260 (Karatay 2525), 819/1416 (seal of Bayezid II). EDITION: *Sunan Abī Dāwūd*. Ed. Muḥammad Muḥyī al-Dīn 'Abd al-Ḥamīd. Egypt, 1354/1935.
- 1.1. Zakī al-Dīn 'Abd al-'Azīm b. 'Abd al-Qawī al-Mundhirī (d. 656/1258), *Mukhtaṣar Sunan Abī Dāwūd* (Abridgement of Abū Dāwūd's *Sunan*), Arabic, 34 {15}. EDITION: *Mukhtaṣar Sunan Abī Dāwūd* (together with al-Khaṭṭābī's *Ma'ālim al-sunan* and Ibn Qayyim al-Jawziyya's *Tahdhīb Sunan Abī Dāwūd*). Ed. Aḥmad Muḥammad Shākir and Muḥammad Ḥāmid al-Fiḳī. Cairo, 1367–69.

ABŪ ḤANĪFA al-Nu'mān b. Thābit al-Kūfī (d. 150/767)

1. *Musnad Abī Ḥanīfa*: see al-KHWĀRIZMĪ 1.

AḤMAD B. MUḤAMMAD B. ḤANBAL, Abū 'Abd Allāh al-Shaybānī al-Baghdādī (d. 241/855)

1. *al-Musnad* (The Supported), in 8 vols., Arabic, 34 {12–13}. MANUSCRIPTS: TSMK, A. 369 (Karatay 2551–55), 5 vols., vol. 1: 837/1433; vol. 2: 838/1434 (seal of Bayezid II). The other three volumes might have been removed from the library. EDITION: *Musnad al-Imām Aḥmad ibn Ḥanbal*. Ed. Shu'ayb al-Arnā'ūt et al. Beirut, 1993.

‘ALĀ’ AL-DĪN AL-RŪMĪ, Abū al-Ḥasan ‘Alī b. Muṣliḥ al-Dīn Mūsā (d. 841/1438)

1. *Risālat al-nikāt (al-nukat) wa-al-as’ila* (Treatise of Subtleties and Questions) = *As’ilat ‘Alā’ al-Dīn al-Rūmī* (Questions of ‘Alā’ al-Dīn al-Rūmī), in a *majmū’a*, Arabic, 39 {12–13}.
- 1.1. Mollā Sirāj al-Dīn Muḥammad b. ‘Umar al-Ḥalabī (d. ca. 850/1446), *Kāshifat al-shubuhāt al-‘alā’iyya* (Discloser of Uncertainties of ‘Alā’ al-Dīn), in a *majmū’a*, Arabic, 39 {13–14}. This book is commonly ascribed to Sirāj al-Dīn al-Tawqī’ī (d. 886/1481) (*KZ*, I:91) but recent research shows that he cannot be the author. See Musa Alak, “Molla Hüsrev’in Belâgat İlimlerine Dair *Hâşiye ale’l-Mutarvel* Adli Eseri,” in *Uluslararası Molla Hüsrev Sempozyumu: 18–20 Kasım 2011 Bursa, Bildiriler*, ed. Tevfik Yücedoğru et al. (Bursa, 2013), 203n13.
- 1.2a. Mollā Khusraw Muḥammad b. Farāmurz b. ‘Alī (d. 885/1480), *Naqd al-afkār fī radd al-anzār* (Critique of Ideas in Refutation of Thoughts), in a *majmū’a*, Arabic, 39 {14–15}.
- 1.2b. Same as above, 25 {2–3}.

al-ANDARASFĀNĪ, Abū al-Karam ‘Abd al-Salām b. Muḥammad b. al-Ḥasan al-Ḥijjī al-Firdawsī al-Khwārizmī (6th/12th cent.)

- 1a. *al-Jāmi’ al-bahī li-da’awāt al-Nabī* (The Splendid Collector of the Prayers of the Prophet), *GAL-S*, I:624, Arabic, 51 {18}. MANUSCRIPT: TSMK, A. 519 (Karatay 5396) (seal of Bayezid II).
- 1b. Same as above, 52 {1}.

al-ARDABĪLĪ, Jamāl al-Dīn Yūsuf b. Ibrāhīm (d. 779/1377)

1. *al-Azhār fī sharḥ al-Maṣābiḥ min aḥādīth Sayyid al-abrār*: al-BAGHAWĪ 1.4.

- 1.2. Muḥzir al-Dīn al-Ḥusayn b. Maḥmūd al-Zaydānī (d. 727/1327), *al-Maḥfātīḥ fī sharḥ al-Maşābīḥ* (The Keys in the Commentary on the Lamps), Arabic, 36 {10}. MANUSCRIPT: TSMK, A. 428 (Karatay 2705), 739/1336. EDITION: Nūr al-Dīn Ṭālib et al., eds. Beirut, 2012.
- 1.3a. ‘Alā’ al-Dīn ‘Alī b. Ṣalāḥ al-Dīn al-Sakhūmī (d. after 762/1360), *Manḥal al-yanābī’ fī sharḥ al-Maşābīḥ* (The Pool of Springs in the Commentary on the Lamps), Arabic, 36 {12–13}.
- 1.3b. Same as above, 36 {13–14}.
- 1.4. Jamāl al-Dīn Yūsuf b. Ibrāhīm al-Ardabīlī (d. 779/1377), *al-Azhār fī sharḥ al-Maşābīḥ min aḥādīth Sayyid al-abrār* (The Flowers in the Commentary of Traditions of the Master of the Righteous in the Lamps) Arabic, 36 {14}. KZ, II:1699, does not give the author’s name: *wa-min shurūḥihi al-Azhār*. MANUSCRIPT: Millet-Feyzullah 464 (seal of Bayezid II).
- 1.5. “*Sharḥu Maşābīḥa fī al-ḥadīthi*,” Arabic, 36 {8}.
- 1.6. “*Kitābu sharḥi al-Maşābīḥi fī al-ḥadīthi*,” Arabic, 36 {8}.
- 1.7. “*Hawāshī li-l-Maşābīḥi fī al-ḥadīthi*,” Arabic, 36 {9–10}. MANUSCRIPT: ‘Uthmān b. al-Ḥājj Muḥammad al-Harawī, *Kitāb al-ḥawāshī li-l-Maşābīḥ* (Book of Glosses on the Lamps), TSMK, A. 427 (Karatay 2716) (seal of Bayezid II), KZ, II:1702; GAL, I:364; GAL-S, I:620.
- 1.8. Walī al-Dīn Muḥammad b. ‘Abd Allāh al-Khaṭīb al-Tibrizī (d. 741/1340), *Mishkāṭ al-Maşābīḥ* (The Niche of the Lamps), Arabic, 36 {7}. MANUSCRIPTS: TSMK, A. 295 (Karatay 2944), 805/1402; TSMK, A. 296 (Karatay 2945), 873/1469. EDITION: Muḥammad Nāṣir al-Dīn al-Albānī, ed. 3 vols. Damascus, 1960–62.
- 1.8.1a. Sharaf al-Dīn al-Ḥusayn b. Muḥammad al-Ṭībī (d. 743/1342), *al-Kāshif ‘an ḥaqā’iq al-sunan* (The Uncoverer of the Truths of Traditions), in 2 vols., Arabic, 36 {11–12}. MANUSCRIPTS: TSMK, A. 434 (Karatay 2950–51), 2 vols. (seal of Bayezid II). EDITION: *Sharḥ al-Ṭībī ‘alā Mishkāṭ al-Maşābīḥ al-musammā bi-al-Kāshif ‘an ḥaqā’iq al-sunan*. Ed. ‘Abd al-Ḥamīd Hindāwī. 13 vols. Mecca and Riyadh, 1997.
- 1.8.1b. Same as above, 36 {10–11}.
- 1.9. Shihāb al-Dīn Abū al-Faḍl Aḥmad b. ‘Alī Ibn Ḥajar al-‘Asqalānī (d. 852/1449), *Hidāyat al-ruwāt ilā takhrīj aḥādīth al-Maşābīḥ wa-al-Mishkāṭ* (The Guidance of Transmitters to the Sources of Traditions of the Lamps and the Niche), Arabic, 36 {9}. MANUSCRIPT: TSMK, A. 477 (Karatay 3012) (seal of Bayezid II). EDITION: ‘Alī b. Ḥasan ‘Abd al-Ḥamīd al-Ḥalabī, ed. 6 vols. al-Dammam, 2001.
2. *Sharḥ al-sunna* (Commentary on Traditions), Arabic, 40 {13–14}. MANUSCRIPT: *Ādāb al-Islām* (Manners of Islam), TSMK, A. 559 (Karatay 3166), 664/1266 (seal of Bayezid II). The descriptive title *Ādāb al-Islām* seems to have been given to this incomplete book by an evaluation of the contents and possibly during the preparation of the inventory. The manuscript has a note identical with what the inventory says about this work: *Kitābun murattabun ‘alā ‘asharati kutubīn marqūmun bi-Ādābi al-islāmī fī al-ḥadīthi*. EDITION: Shu‘ayb al-Arnā’ūṭ and Muḥammad Zuhayr

al-Shāwīsh, eds. 16 vols. Beirut, 1983. The manuscript corresponds to vol. 10, p. 247–vol. 13, p. 192 of the edition.

al-BIṢṬĀMĪ, Abū Muḥammad ‘Abd Allāh b. Muḥammad (d. 452/1060)

Saʿd Ibn Abī Jamra al-Azdī (d. 699/1300), *Bahjat al-nufūs wa-taḥallihā bi-maʿrifat mā laḥā wa-mā ʿalayhā* (Delight of Souls and Their Adornment with the Knowledge of What Is for and against Them), a commentary on his own selection of traditions from al-Bukhārī's *Ṣaḥīḥ*. 2 vols., Arabic, 33 {3–4}. MANUSCRIPT: TSMK, A. 406 (Karatay 2335–36), 2 vols., vol. 1: 786/1384 (seal of Bayezid II). EDITION: Bakrī Shaykh Amīn, ed. Beirut, 1997.
 - 1.6b. Same as above, vol. 3 only, together with Ibn Abī Jamra's *al-Marāʾī al-ḥisān*, Arabic, 33 {5–6}.
- al-CĀMĪ, Nūr al-Dīn ʿAbd al-Raḥmān b. Nizām al-Dīn (d. 898/1492)
1. “*Risālatun fī ḥadīthi al-ʿamāʾi fī al-taṣawwufi*” (An Epistle on the Hadith “He Was in Obscurity”), Persian, 126 {19}.
- al-DĀMAGHĀNĪ, Muḥammad b. al-Ḥusayn b. Aḥmad (d. before 810/1407)
1. *al-Tuḥfa al-najībīyya li-ḥadrat al-saltāna al-uwaysīyya* (The Noble Gift to the Presence of the Uwaysi Dynasty), written for Jalāyirid Uways Khān (r. 757–76/1356–74), Arabic and Persian, 41 {5–6}. MANUSCRIPT: TSMK, A. 656 (Karatay 2965) (seal of Bayezid II).
- al-DHAHABĪ, Shams al-Dīn Abū ʿAbd Allāh Muḥammad b. Aḥmad b. ʿUthmān b. Qaymāz (d. 748/1348)
1. *Tadhīb Tahdhīb al-Kamāl fī asmāʾ al-rijāl* (The Gilding of the Refinement of the Perfection about the Names of Men [hadith transmitters]), 4 vols., Arabic, 42 {2–3}. MANUSCRIPT: TSMK, A. 2849 (Karatay 6314–16), 745/1344–45, vols. 2–4 (seal of Bayezid II on vol. 2), vol. 1 seems to have been lost. EDITION: Ghunaym ʿAbbās Gunaym and Majdī al-Sayyid Amīn, eds. 11 vols. Cairo, 2004.

al-FĪRŪZĀBĀDĪ, Majd al-Dīn Muḥammad b. Ya'qūb (d. 817/1415)

1. *Adawāt al-su'l min da'awāt al-Rasūl* (Devices of Request from the Prayers of the Messenger), Arabic, 51 {17}. MANUSCRIPT: "Ad'iya ma'thūra marwīyya 'an al-nabī" (Prayers Transmitted from the Prophet), TSMK, A. 526 (Karatay 5446) (seal of Bayezid II).

al-HAMADĀNĪ, 'Abd al-Karīm b. 'Abd al-Malik b. al-Muṣliḥ (fl. 717/1317)

1. *al-Risāla al-ghiyāthiyya fī al-aḥādīth al-nabawiyya* (The Epistle for Ghiyāth al-Dīn about Prophetic Traditions), Arabic, 39 {2}. MANUSCRIPT: SK, Ayasofya 1204, 729/1328–29 (seal of Bayezid II). Presented to the Ilkhanid vizier Ghiyāth al-Dīn Muḥammad b. Rashīd al-Dīn Faḍl Allāh (d. 736/1336).

al-HAMADĀNĪ, Abū al-Futūḥ Muḥammad b. Muḥammad b. 'Alī al-Ṭā'ī (d. 555/1160)

- 1a. *Kitāb al-arba'in fī irshād al-sā'irīn ilā manāzil al-muttaqīn* (Book of Forty Traditions about Guiding the Wanderers towards the Stations of the God-Fearing), Arabic, 38 {11}. MANUSCRIPT: SK, Ayasofya 512 (seal of Bayezid II). EDITION: 'Abd al-Sattār Abū Ghudda, ed. Beirut, 1999. In the old catalogue of Ayasofya Library (p. 34), the author's name is given as Jamāl al-Dīn Abū Muḥammad Yūnus b. Abī al-Ḥasan Yahyā al-Hāshimī, who is actually the transmitter of the book.
- 1b. Same as above, 38 {18–19}.

al-HARAWĪ, Abū 'Ubayd Aḥmad b. Muḥammad (d. 401/1011)

- 1a. *Kitāb al-gharībayn fī al-Qur'ān wa-al-ḥadīth* (Book of Rare Words in the Qur'an and Hadith), in 2 vols., Arabic, 299 {2–3}. MANUSCRIPT: TSMK, A. 2771 (Karatay 7540–41), 2 vols. EDITION: Aḥmad Farīd al-Mazīdī, ed. 6 vols. Mecca and Riyadh, 1999.
- 1b. The following could be another copy of *Kitāb al-gharībayn*: "*Kitābun fī gharībī al-Qur'āni wa-al-ḥadīthi 'alā tartībī al-ḥurūfī fī al-lughati*," 295 {16}.

al-HARAWĪ, Shams al-Dīn Muḥammad b. 'Aṭā' Allāh (d. 829/1425–26)

1. *Maṭālī' al-asrār li-sharḥ Mashāriq al-anwār*: see al-ṢAGHĀNĪ 1.5.

al-HARAWĪ, 'Uthmān b. al-Ḥājj Muḥammad (d. ?)

1. *Kitāb al-ḥawāshī li-l-Maṣābiḥ*: see al-BAGHAWĪ 1.7.

al-HAYTHAMĪ, Abū al-Ḥasan Nūr al-Dīn 'Alī b. Abī Bakr (d. 807/1405)

- 1a. *Majma' al-zawā'id wa-manba' al-fawā'id* (The Collection of Additions [traditions not found in the six books] and the Source of Benefits), in 7 vols., Arabic, 54 {18}. MANUSCRIPT: TSMK, A. 510 (Karatay 2986–92), 7 vols. (seal of Bayezid II). EDITION: Cairo, 1352–53 [1933–34].
- 1b. Same as above, 1 vol. of a multi-volume set, 41 {6–7}.

IBN 'ABD AL-BARR, Abū 'Umar Yūsuf b. 'Abd Allāh al-Namarī (d. 463/1071)

1. *al-Istī'āb fī ma'rifat al-aṣḥāb* (The Exhaustive Book on the Knowledge of Companions), 6 vols., Arabic, 55 {5}. MANUSCRIPTS: TSMK, A. 501/1, 501/5, 501/6 (Karatay, 6246–48), vol. 1: 850/1466; vol. 5: 577/1181. The other three volumes are not located in the library. EDITION: 'Alī Muḥammad al-Bajāwī, ed. Cairo, n.d.

IBN ABĪ JAMRA, Abū Muḥammad 'Abd Allāh b. Sa'd al-Azdī (d. 699/1300)

1. *Bahjat al-nufūs wa-taḥallihā bi-ma'rifat mā lahā wa-mā 'alayhā*: see al-BUKHĀRĪ 1.6.

2. *Kitāb al-marāʾi al-ḥisān* (Book of Beautiful Visions), Arabic, 33 {6–7}. MANUSCRIPT: It could be at the end of one of the manuscripts of *Bahjat al-nufūs* and not catalogued separately. EDITION: Together with Ibn Abī Jamra's *Bahjat al-nufūs*. Ed. Bakrī Shaykh Amīn. Beirut, 1997.

IBN AL-ATHĪR, Abū al-Saʿādāt Majd al-Dīn Mubārak b. Muḥammad (d. 606/1210)

- 1a. *Jāmiʿ al-uṣūl li-aḥādīth al-rasūl* (The Collector of the Roots [Primary Sources] for the Traditions of the Prophet), in 1 vol., Arabic, 34 {4}. (seal of Bayezid II); TSMK, R. 354 (Karatay 2838), 724/1324 (seal of Bayezid II); SK, Turhan Valide 48 (seal of Bayezid II). EDITION: *Jāmiʿ al-uṣūl fi aḥādīth al-rasūl*. Ed. ʿAbd al-Qādir al-Arnāʾūt. Damascus, 1969.
- 1b. Same as above, in 1 vol., 34 {4–5}.
- 1c. Same as above, in 1 vol., 34 {5–6}.
- 1d. Same as above, in 1 vol., 34 {6–7}.
- 1e. Same as above, in 1 vol., 34 {7}.
- 1f. Same as above, in 2 vols., 34 {8}.
- 1.1. *Mukhtaṣar Jāmiʿ al-uṣūl* (Abridgement of the Collector of the Primary Roots), in 1 vol., 34 {8–9}. This must be Abū Jaʿfar Muḥammad b. Maḥmūd al-Marwazī al-Astarābādī (fl. 682/1283), *Mukhtaṣar Jāmiʿ al-uṣūl*. MANUSCRIPT: TSMK, A. 306 (Karatay 2851), copied for Mehmed II (seal of Bayezid II); KZ, I:536.
- 1.2. “*Mukhtaṣaru Jāmiʿi al-uṣūli fi al-ḥadīthi*,” in 2 vols., 34 {9–10}.
- 2a. *al-Nihāya fi gharīb al-ḥadīth wa-al-athar* (The Ultimate Outcome regarding the Rare Words in Traditions and Reports), Arabic, 299 {10}. MANUSCRIPTS: TSMK, A. 516 (Karatay 2852–53), 2 vols., vol. 2: 831/1427 (seal of Bayezid II); SK, Süleymaniye 1025 (seal of Bayezid II). EDITION: Ṭāhir Aḥmad al-Zāwī and Maḥmūd Muḥammad al-Ṭanāḥī, eds. 5 vols. Cairo, 1963–65.
- 2b. Same as above, vol. 2 only, 299 {1}.
- 2c. Same as above, vol. 1 only, 299 {7–8}.
- 2d. Same as above, vol. 1 only, 299 {8–9}.
- 2e. Same as above, 2 vols., 299 {9–10}.

IBN AL-ḤAFĪD, Aḥmad b. Yaḥyā b. Muḥammad b. Saʿd al-Dīn al-Taftāzānī (d. ca. 916/1510)

1. *Kitāb al-fawāʾid wa-al-farāʾid* (Book of Benefits and Precious Gems), GAL, II:218, Arabic, 54 {19}–55 {1}. MANUSCRIPT: TSMK, A. 576 (Karatay 3081), copied for Bayezid II (Abū Yazīd Bahādur Khān) in 900/1494 (seal of Bayezid II). EDITION: *al-Durr al-naḍīd li-majmūʿat Ibn al-Ḥafīd* (Stringed Pearl for the Compendium of Ibn al-Ḥafīd). Egypt, 1322; Beirut, 1980.

IBN AL-IMĀM, Taqī al-Dīn Abū al-Faṭḥ Muḥammad b. Muḥammad b. ʿAlī b. Humām al-ʿAsqalānī al-Miṣrī (d. 745/1344)

1. *Silāḥ al-muʾmin* (The Weapon of the Believer), Arabic, 42 {7}. MANUSCRIPT: TSMK, A. 573 (Karatay 5438), 839/1436 (seal of Bayezid II). EDITION: *Silāḥ al-muʾmin fi al-duʿāʾ wa-al-dhikr*. Ed. Muḥyī al-Dīn Dīb Mistū. Damascus, 1993.

IBN AL-JAWZĪ, Abū al-Faraj Jamāl al-Dīn ʿAbd al-Raḥmān b. ʿAlī al-Baghdādī (d. 597/1200)

1. *Ṣifāt al-ṣafwa* (Description of the Elite) or *Ṣafwat al-ṣafwa* (The Elite of the Elite), vol. 1 only, 55 {16–17}. MANUSCRIPT: TSMK, A. 2807 (6275–77), 846/1442. EDITION: *Kitāb Ṣifāt al-ṣafwa*. Ed. Maḥmūd Fakhūrī. Aleppo, 1969–73.

2. *al-Waḡfā' bi-aḥwāl al-Muṣṭafā* (Loyalty to the States/Affairs of the Chosen One), Arabic, 176 {6–7}. MANUSCRIPT: "*Aḥwāl al-nabī*" (The States/Affairs of the Prophet), TSMK, A. 578 (Karatay 3171), 842/1438 (seal of Bayezid II). EDITION: Muḥammad Zuhri al-Najjār, ed. Riyadh, [1976?]. This and other editions do not contain the chains of transmitters that TSMK, A. 578 has. The book seems to exist in two versions, one with *isnāds*, and one without.

IBN AL-JAZARĪ, Shams al-Dīn Abū al-Khayr Muḥammad b. Muḥammad (d. 833/1429)

- 1a. *al-Ḥiṣn al-ḥaṣīn min kalām Sayyid al-mursalīn* (The Strong Fortress from the Speech of the Master of the Messengers), in a *majmū'a* with 13 treatises, KZ, I:669, Arabic, 37 {1}. MANUSCRIPT: TSMK, A. 340 (Karatay 5451). EDITION: Khayr Allāh al-Sharīf, ed. Beirut, 1421/2000.
- 1b. Same as above, together with *Arf al-ta'rīf fi al-mawlid al-sharīf*, Arabic, 37 {2}.
- 1c. Same as above, 52 {2}.
- 1.1a. Ibn al-Jazarī's own abridgement, *Uddat (Muhktaṣar) al-Ḥiṣn al-ḥaṣīn min kalām Sayyid al-mursalīn* (Preparation [Abridgement] of the Strong Fortress from the Speech of the Master of the Messengers), KZ, I:669, Arabic, 36 {17}. MANUSCRIPT: TSMK, A. 346 (Karatay 5456). EDITION: Beirut, 1979.
- 1.1b. Same as above, 36 {19}.
- 1.2a. *Tarjuma-i Ḥiṣn al-ḥaṣīn* (Translation of the Strong Fortress), trans. Aṣīl al-Dīn 'Abd Allāh b. 'Abd al-Raḥmān al-Ḥusaynī al-Wā'iz, KZ, I:669, Persian, 36 {18–19}. MANUSCRIPT: SK, Ayasofya 2780.

al-QŪNAWĪ, Ṣadr al-Dīn Muḥammad b. Ishāq (d. 673/1274)

- 1a. *Sharḥ al-arbaʿīn ḥadīthan* (Commentary on Forty Traditions), in a *majmūʿa*, Arabic, 38 {3–5}. MANUSCRIPT: Could be Köprülü-Fazıl Ahmed Paşa 1594, leaves 1–64. EDITION: *Kırk Hadis Şerhi* = *Sharḥ al-aḥādīth al-arbaʿīn: Kashfastār jawāhir al-ḥikam al-mustakhraja min jawāmiʿ al-kalim*. Ed. Abdullah Aydınlı. Istanbul, 2015.
- 1b. Same as above, 41 {2–3}. MANUSCRIPT: TSMK. A. 556 (Karatay 8655) (Seal of Bayezid II).

ŞAFĪ AL-AKHAWAYN (fl. 810/1408)

- 1. *al-Hādī ilā dār al-salām* (The Guide to the Land of Peace), Arabic, 38 {16–17}. MANUSCRIPT: SK, Ayasofya 2158 (seal of Bayezid II). The author's name is given in the ms (142b.) as Şafī al-Akawayn, who finished the work in 810/1408. In *İdāḥ al-Maknūn*, II:715: *al-Hādī ilā dār al-salām: mawjūd bi-Dār al-Kutub Ayāşūfiyya*.

al-ŞAGHĀNĪ, Raḍī al-Dīn Ḥasan b. Muḥammad (d. 650/1252)

- 1a. *Mashāriq al-anwār al-nabawīyya min şihāḥ al-akhbār al-muṣṭafawīyya* (The Rise of Prophetic Lights from the Sound Reports of Mustafa), Arabic, 34 {17}. MANUSCRIPT: SK, Şehzade Mehmed 15, 803/1401 (seal of Bayezid II). EDITION: *al-Jamʿ bayn al-Şaḥīḥayn al-Bukhārī wa-Muslim: Mashāriq al-anwār al-nabawīyya ʿalā şihāḥ al-akhbār al-muṣṭafawīyya*. Ed. Ashraf ibn ʿAbd al-Maqṣūd. Beirut, 1989.
- 1b. Same as above, 34 {17}.
- 1c. Same as above, 34 {17}.
- 1d. Same as above, 34 {17}.
- 1e. Same as above, 34 {18}.
- 1f. Same as above, 34 {18}.
- 1g. Same as above, 34 {18}.
- 1.1a. ʿAbd al-Laṭīf b. ʿAbd al-ʿAzīz Ibn Malak (d. after 821/1418), *Mabāriq al-azhār sharḥ Mashāriq al-anwār* (Glitters of Flowers, Commentary on the Rise of Lights), Arabic, 35 {3}. MANUSCRIPTS: Several MSS in TSMK with a date prior to the inventory. EDITION: Istanbul, 1287 [1870–71]; *Mabāriq al-azhār sharḥ Mashāriq al-anwār fī al-jamʿ bayn al-Şaḥīḥayn li-l-Şaghānī*. Ed. Ashraf ibn ʿAbd al-Maqṣūd. 3 vols. Beirut, 1995.
- 1.1b. Same as above, 35 {3–4}.
- 1.1c. Same as above, 35 {4}.
- 1.1d. Same as above, 35 {5}.
- 1.1e. Same as above, 35 {5–6}.
- 1.1f. Same as above, 35 {6–7}.
- 1.1g. Same as above, 35 {7}.
- 1.2. ʿAfīf al-Dīn Saʿīd b. Muḥammad al-Kāzarūnī (d. 785/1383), *Maṭāliʿ al-anwār al-muṣṭafawīyya* (The Rise of the Lights of Mustafa), KZ, II:1689, Arabic, 35 {8}. MANUSCRIPT: TSMK, A. 451 (Karatay 2879), 792/1391.

- 1.3. Akmal al-Dīn Muḥammad b. Maḥmūd al-Bābartī (d. 786/1384), *Tuhfat al-abrār fi sharḥ Mashāriq al-anwār* (The Gift to the Righteous in the Commentary on the Rise of Lights), *KZ*, II:1688; *GAL*, I:361; *GAL-S*, I:614, in 3 vols., Arabic, 35 {9–10}. MANUSCRIPTS: TSMK, A. 454 (Karatay 2883). Many MSS in Istanbul libraries. Not published yet.
- 1.4. “*Maṭāli‘u al-asrārī fi tahshiyati Sharḥi Mashāriqi al-anwārī fi al-ḥadīthi*” (The Rise of the Secrets in Glossing on the Commentary on the Rise of Lights), Arabic, 35 {10–11}. MANUSCRIPTS: TSMK, A. 452 (Karatay 2898); SK, Turhan Valide 62. Karatay (II:209) says that *Maṭāli‘ al-asrār* is written by a mudarris during Süleyman I’s reign. *KZ*, II:1710: *Maṭāli‘ al-asrār li-sharḥ Mashāriq al-anwār, marra*. However, in the entry on *Mashāriq al-anwār*, the title is not mentioned. Turhan Valide 62 is ascribed in the catalogue to Shams al-Dīn Muḥammad b. ‘Aṭā’ Allāh al-HARAWĪ (d. 829/1425–26), who is known to have written a commentary on *Mashāriq*.
- 1.5. “*Sharḥu al-Mashāriqi fi al-ḥadīthi*,” 35 {8–9}.
- 1.6. “*Sharḥu al-Mashāriqi fi al-ḥadīthi*,” 35 {10}.
- 1.7. “*Mujalladun wāḥidun min Kitābi sharḥi al-Mashāriqi fi al-ḥadīthi*,” 35 {11–12}.

al-SAKHŪMĪ, ‘Alā’ al-Dīn ‘Alī b. Ṣalāḥ al-Dīn (d. after 762/1360)

1. *Manḥal al-yanābī‘ fi sharḥ al-Maṣābiḥ*: see al-BAGHAWĪ 1.3.

al-SAM‘ĀNĪ, Abū Sa‘d ‘Abd al-Karīm b. Muḥammad b. Maṣṣūr al-Tamīmī (d. 562/1166)

1. *al-Muntakhab min Mu‘jam al-shuyūkh* (A Selection from the Dictionary of Informants), Arabic, 178 {16–17}. MANUSCRIPT: TSMK, A. 2953 (Karatay 6270), 647/1250 (seal of Bayezid II). EDITION: Muwaffaq b. ‘Abd Allāh b. ‘Abd al-Qādir, ed. 4 vols. Riyadh, 1996.

al-SAMHŪDĪ, Nūr al-Dīn Abū al-Ḥasan ‘Alī b. ‘Abd Allāh b. Aḥmad (d. 911/1506)

1. *Jawāhir al-‘iqdayn fi faḍl al-sharafayn sharaf al-‘ilm al-jalī wa-al-nasab al-‘alī* (Gems of the Two Necklaces on Virtues of the Two Dignities: Manifest Knowledge and Noble Lineage), Arabic, 41 {16–17}. MANUSCRIPT: TSMK, A. 596 (Karatay 3027) (sent as a gift to Bayezid II, seal of Bayezid II), EDITION: Mūsā Bināy al-‘Alilī, ed. 2 vols. Baghdad, 1984–87.

al-SAYLĀNĪ, Abū Bakr b. Muḥammad b. Ḥusayn (6th/12th cent.)

1. *Najāt al-dhākirīn* (Salvation of the Rememberers), *KZ*, II:1928, Persian, 42 {8}. MANUSCRIPT: SK, Ayasofya 2125, 898/1492.

SAYYID ‘ALĪZĀDA, Ya‘qūb b. Sayyid ‘Alī al-Rūmī al-Burūsawī (d. 931/1525)

1. *Maḥāṭiḥ al-jinān wa-maṣābiḥ al-janān*: see IMĀMZĀDA 1.1.

al-SUBKĪ, Taqī al-Dīn ‘Alī ibn ‘Abd al-Kāfi (d. 756/1355)

1. *Shifā’ al-saqām fi ziyārat khayr al-anām* (Healing of Sickness through Visiting the Best of Mankind), bound together with *al-Sayf al-maslūl*, Arabic, 97 {7–8}. MANUSCRIPT: TSMK, A. 324 (Karatay 2963), 775/1374 (seal of Bayezid II). EDITION: Ḥasan Muḥammad ‘Alī Shukrī, ed. Casa-blanca, 2010.
2. *al-Sayf al-maslūl ‘alā man sabba al-Rasūl* (Drawn Sword upon Those Who Insult the Prophet), bound together with *Shifā’ al-saqām*, Arabic, 97 {8–9}. MANUSCRIPT: Possibly at the end of TSMK, A. 324. EDITION: Iyād Aḥmad al-Ghawj, ed. Amman, 2000.

al-ṬĪBĪ, Sharaf al-Dīn al-Ḥusayn b. Muḥammad (d. 743/1342)

1. *al-Kāshif 'an ḥaqā'iq al-sunan*: see al-BAGHAWĪ 1.8.1.
2. *al-Khulāṣa fi ma'rifat al-ḥadīth* (An Epitome on the Knowledge of Hadith), in a *majmū'a*, Arabic, 74 {9}. EDITION: *al-Khulāṣa fi uṣūl al-ḥadīth*, ed. Ṣubḥī al-Sāmarrā'ī. Beirut, 1985.

al-TIBRĪZĪ, Walī al-Dīn Muḥammad b. 'Abd Allāh al-Khaṭīb (d. 741/1340)

1. *Mishkāṭ al-Maṣābiḥ*: see al-BAGHAWĪ 1.8.

al-TIRMIDHĪ, Abū 'Isā Muḥammad b. 'Isā b. Thawra (d. 279/892)

- 1a. *Shamā'il al-Nabī* (High Character of the Prophet), Arabic, 41 {15}. MANUSCRIPTS: Several MSS in TSMK predating the inventory. EDITION: *al-Shamā'il al-muḥammadiyya*. Ed. 'Abduh 'Alī Kūshak. Beirut, 2013.
- 1b. Same as above, 41 {15}.
- 1c. Same as above, 41 {19}.
- 1.1. *Tadhkirat al-faḍā'il fi tarjamat al-Shamā'il* (Remembrance of the Virtues in Translation of the High Character), Persian, 41 {18}.

al-UQLĪSHĪ, Abū al-'Abbās Shihāb al-Dīn Aḥmad b. Ma'add (d. 550/1155)

- 1a. *al-Kawkab al-durrī al-mustakhrāj min kalām al-nabī al-'arabī* (Twinkling Planet Extracted from the Speech of the Arab Prophet), Arabic, 32 {4–5}. MANUSCRIPT: TSMK, A. 560 (Karatay 2818), 709/1309.
- 1b. Same as above, 39 {17–18}.

al-WĀSITĪ, Shams al-Dīn Muḥammad b. al-Ḥasan al-Ḥusaynī (d. 776/1374)

1. *Majma' al-aḥbāb wa-tadhkirat ulī al-albāb* (The Assembly of the Dear Ones and the Reminder of the Intelligent), vol. 3 only, Arabic, 55 {14–16}. MANUSCRIPT: TSMK, A. 1604 (Karatay 5155): *al-Cuz' al-thālith min Majma' al-aḥbāb*. EDITION: 'Abd Allāh Ḥumaydān et al., eds. Jidda, 2008.

al-ZAMAKHSHARĪ, Jār Allāh Maḥmūd b. 'Umar (d. 537/1144)

- 1a. *al-Fā'iḳ fi gharīb al-ḥadīth* (The Exquisite One on the Rare Words of Traditions), in 2 vols., Arabic, 295 {4}. EDITION: 'Alī Muḥammad al-Bajāwī and Muḥammad Abū al-Faḍl Ibrāhīm, eds. 4 vols. Cairo, 1969–71.
- 1b. Same as above, vol. 1 only, 295 {4–5}.
- 1c. Same as above, vol. 1 only, 297 {15–16}.
- 1d. Same as above, vol. 2 only, 297 {17}.

al-ZARKASHĪ, Badr al-Dīn Muḥammad b. Bahādur (d. 794/1392)

1. *al-Tanqīḥ li-alfāẓ al-jāmi' al-ṣaḥīḥ*: see al-BUKHĀRĪ 1.3

al-ZAYDĀNĪ, Muḥḥir al-Dīn al-Ḥusayn b. Maḥmūd (d. 727/1327)

1. *al-Mafātīḥ fi sharḥ al-Maṣābiḥ*: see al-BAGHAWĪ 1.2.

II. POSSIBLE IDENTIFICATIONS

1. "*Bābun 'āshirun min Mawā'izi al-mulūki*," in a *majmū'a*, 41 {7}. This book could be Abū al-Faraj Ibn al-Jawzī's (d. 597/1200) *Mawā'iz al-mulūk* or *al-Shifā' fi mawā'iz al-mulūk wa-al-khulafā'*,

which has ten chapters; the tenth and last chapter is titled *al-Bāb al-āshir: muntakhab min al-adhkār wa-al-ad'iya*, which includes prophetic prayers. EDITION: *al-Shifā' fi mawā'iz al-mulūk wa-al-khulafā'*. Ed. Fu'ād 'Abd al-Mun'im Aḥmad. Alexandria, 1985.

2. "*Daqā'iqu al-akhbārī 'an al-nabī al-mukhtārī*" (Niceties of Reports from the Chosen Prophet), 39 {7–8}. There seem to be a few different books that bear the title *Daqā'iq al-akhbār*, such as *Daqā'iq al-akhbār wa-ḥadā'iq al-i'tibār* (Niceties of Reports and Gardens of Reflection) ascribed to al-Quḍā'ī (GAL-S, I:585). Many of the MSS appear without authorship in catalogues.
3. "*Du'ā'-i sayfī*" (Prayer of Sword [?]), in a *majmū'a*, Arabic, 36 {17}. MANUSCRIPT: SK, Fatih 1130, leaves 1–28. Several copies of *Du'ā' sayfī* are listed in other sections of MS Török F. 59.
4. "*Kitābu al-aḥādīthi al-arba'ina fi faḍli al-jihādī*" (The Book of Forty Traditions on the Virtues of Jihad), 39 {16–17}. MANUSCRIPT: TSMK, A. 356 (Karatay 3154) is a book titled *Arbā'ūn ḥadīthan fi faḍl al-jihād*; the author is identified in the Topkapı catalogue as Nūr al-Dīn Abū al-Ḥasan 'Alī b. Aḥmad al-Anṣārī al-Qarāfī (d. ca. 940/1533). See GAL-S, II:964. Jalāl al-Dīn al-Suyūṭī (d. 911/1505) has a book with a similar title (KZ, I:56).
5. "*Kitābu al-anwārī al-nabawīyyati min ṣiḥāhi al-aḥādīthi al-muṣṭafawīyyati*," 40 {14}. Could be another copy of al-Ṣaghānī's *Mashāriq al-anwār al-nabawīyya min ṣiḥāḥ al-aḥādīth al-muṣṭafawīyya*.
6. "*Kitābu al-arba'ina fi faḍli al-jihādī*" (Book of Forty Hadiths on the Virtues of Jihad), 40 {8–9}. See the note for "*Kitābu al-aḥādīthi al-arba'ina fi faḍli al-jihādī*" above.
7. "*Kitābu al-as'īlati wa-al-ajwibati fi al-tafsīri wa-al-ḥadīthi*," 38 {13}. Possibly Jamāl al-Dīn Muḥammad b. Maḥmūd al-Aqsarāyī's (d. 791?/1388–89) *al-As'ila wa-al-ajwiba*, a popular question and answer book about *tafsīr*, *ḥadīth*. MANUSCRIPTS: SK, Ayasofya 69, 70, 71, 72, 1033; SK, Fatih 89. Similar titles are found elsewhere in the inventory. See, for example, 24 {3} and 26 {16–17}.
8. "*Kitābu al-ḥikami al-marwīyyati 'an Sayyid al-mursalīn Muḥammad wa-'Alī amīri al-mu'minīna fi al-ḥadīthi*" (Book of Wisdom Related from Muhammad, the Master of the Messengers, and 'Alī, the Prince of Believers), Arabic, 40 {18}. Must be *Akhbār wa-ḥikam wa-mawā'iz wa-nawādir wa-mulaḥ marwīyya 'an Sayyid al-mursalīn Muḥammad wa-'Alī amīr al-mu'minīn* (Reports, Wisdoms, Exhortations, Anecdotes, and Witticisms Related from Muhammad, the Master of the Messengers and 'Alī, the Prince of the Believers): MANUSCRIPT: TSMK, B. 67 (Karatay 2825) (seal of Bayezid II). The title page of the manuscript also has the exact title given in the inventory in a different hand.
9. "*Kitābu al-irshādi fi al-arba'ina ḥadīthan*," 39 {4}. Could be *Risālat al-Irshād fi faḍl al-jihād* of Khaṭīb-zāda Muḥyī al-Dīn Muḥammad b. Ibrāhīm (d. 901/1495). MANUSCRIPT: TSMK, A. 2674 (Karatay 5257) (presented to Bayezid II). KZ, I:859.
10. "*Kitābu arba'ina al-'alā' fi kalāmi al-'Alī raḍiya Allāhu bi-al-tarjamati al-fārisiyyati min qibali al-ḥadīthi*" (The Book of Forty Lofty Sayings from the Speech of 'Alī = 'Ala' al-Dīn's (?) Selection of Forty Sayings from the Speech of 'Alī), Persian, 39 {1–2}. MANUSCRIPT: Anonymous, *Arba'in al-'alā' fi kalām al-'Alī* [sic], SK, Fatih, 2653/1, Persian, 783/1381.
11. "*Kitābu asmā'i al-rijālī min ahli al-ḥadīthi*" (The Book of Names of Men), Arabic, 42 {4}. Seems to be al-Khaṭīb al-Tibrīzī (d. 741/1340), *Asmā' rijāl Mishkāt al-Maṣābiḥ*. MANUSCRIPT: TSMK, A. 508 (Karatay 6370) (seal of Bayezid II). EDITION: al-Khaṭīb al-Tibrīzī. *al-Ikmāl fi asmā' al-rijāl*. In vol. 11 of 'Alī al-Qārī. *Mirqāt al-maḥāṭiḥ sharḥ Mishkāt al-Maṣābiḥ*. Ed. Jamāl 'Ayntābī. Beirut, 2001.

12. "*Kitābu asmā'i al-rijāl min ahli al-ḥadīthi*" (The Book of Names of Men), Arabic, 42 {4–5}. Seems to be another copy of al-Khaṭīb al-Tibrīzī's (d. 741/1340) *Asmā' rijāl Mishkāt al-Maṣābiḥ*. MANUSCRIPT: TSMK, A. 2852 (Karatay 6369) (seal of Bayezid II).
13. "*Kitābu asmā'i al-rijāl min ahli al-ḥadīthi*" (The Book of Names of Men), Arabic, 42 {5}. MANUSCRIPT: Probably *Kitābu Asmā' ricāl al-Bukhārī* (The Book of Names of the Transmitters of al-Bukhari), TSMK, A. 509 (Karatay 2617) (seal of Bayezid II). The manuscript is a commentary on *thulāthiyyāt* of al-Bukhārī, i.e., hadiths with only three transmitters between al-Bukhārī and the Prophet.
14. "*Kitābu durri al-wā'izīna wa-dhukhri al-'ābidīna bi-al-aḥādīthi*" (The Book of Pearls of the Preachers and Supplies of the Worshipers), Arabic, 38 {17–18}. Many MSS in Istanbul libraries with the same or similar titles, some of which are anonymous. *KZ*, I:745, ascribes the book to Abū 'Abd Allāh Muḥammad b. Salāma b. Ja'far al-Qudā'ī (d. 454/1062), *Durr(at) al-wā'izīn wa-dhukr al-'ābidīn*. However, it is said that it is written by one of the scholars of Mehmed II's reign (see *GAL-S*, II:325; "Kudāi," *DĪA*, XXVI:309–10). While in the introduction of some of the manuscripts Mehmed II and his vizier Mahmud Pasha are mentioned, in others Bayezid b. Mehmed appears instead. The relation of this book to *Badr al-wā'izīn wa-dhukr al-'ābidīn* ascribed to 'Izz al-Dīn 'Abd al-Laṭīf Ibn Malak (d. after 821/1418) (see *KZ*, I:231) or to his son Muḥammad (d. 854/1450) (*Osmanlı Müellifleri*, I:220) is not clear.
15. "*Kitābun fī al-ad'iyyati al-ma'thūratī bi-al-aḥādīthi*" (A book on transmitted prayers), 42 {8–9}. Could be *Ad'iya ma'thūra muntakhaba marwiyya 'an Rasūl Allāh wa-'an ba'd aṣḥābihi* (Selected Prayers Transmitted from the Messenger of God and from Some of His Companions), TSMK, B. 81 (Karatay 5609), 698/1293 (seal of Bayezid II).
16. "*Kitābun fī al-as'ḥātī wa-al-ajwibati fī 'ilmi al-tafsīri wa-al-ḥadīthi*," 39 {15–16}. Possibly another copy of Jamāl al-Dīn Muḥammad b. Maḥmūd al-Aqsarāyī's (d. 791?/1388–89) *al-As'ila wa-al-ajwiba*. See above.
17. "*Kitābun fī shamā'ili al-nabī*" (A book on the character of the prophet), 41 {17–18}. Could be another copy of al-Tirmidhī's *Shamā'il al-nabī* or another book on the topic such as *Shamā'il al-nabī* of Abū Bakr 'Afif al-Dīn Muḥammad b. Nūr al-Dīn Muḥammad b. 'Abd Allāh al-Nayrizī al-Ījī (d. 855/1451), TSMK, A. 349 (Karatay 3005), written in 847/1443, copied in 855/1451.
18. "*Kitābu kashfī mushkilāti al-aḥādīthi al-marwiyyati 'an al-ṣaḥābī al-madfūni bi-aṣli ḥiṣni al-Qusṭantīniyyati*" (The Book of Explanation of the Difficulties of Traditions Related on the Authority of the Companion Buried inside the Citadel of Istanbul), Arabic, 39 {3–4}. MANUSCRIPT: See Anonymous, *Kashf mushkilāt al-aḥādīth al-marwiyya 'an al-ṣaḥābī*, Beyazıt Devlet-Beyazıt 1054 (undated).
19. "*Kitābu mawāṭini al-ṣalāti 'alā al-nabī*" (The Book of Places of Sending Blessings on the Prophet), Arabic, 40 {9–10}. Possibly *Mawāṭin al-ṣalāt 'alā al-Nabī* of Quṭb al-Dīn Muḥammad b. Muḥammad al-Khayḍirī al-Ramlī (d. 894/1499). See *KZ*, II:889. EDITION: In his own commentary on the book: *al-Liwā' al-Mu'lam bi-Mawāṭin al-Ṣalāt 'alā al-Nabī*. Ed. 'Alī Muḥammad Zaynū. Amman (?), 2016.
20. "*Kitābu miftāḥi al-jināni fī faḍā'ili al-ṣalāti wa-ghayrihā bi-al-aḥādīthi*" (The Book of Keys to the Gardens in Virtues of Prayer and Other Things), Arabic, 55 {12–13}. According to *KZ*, II:760 and *Idāḥ al-Maknūn*, II:523, the book is in Persian: *Miftāḥ al-jinān, fārisī, fī faḍā'il al-ṣalāt*. Kātib Ḥalebi ascribes it to someone called Wajīh al-Dīn and Ismā'īl Pāšā ascribes it to Wajīh al-Dīn Abū al-Muzaḥḥar Manṣūr b. Salīm al-Hamdānī al-Iskandarī Ibn al-'Imādiyya (d. 673/1275). The ascription might be incorrect.

21. “*Kitābu waṣāyā al-Nabī-ṣallā Allāhu ‘alayhi wa-sallama- li-‘Alī-raḍiya Allāhu ‘anhu-*” (The Book of Admonitions of the Prophet to ‘Alī), Arabic, 39 {18–19}. MANUSCRIPT: SK, Ayasofya 945, 704/1304 (seal of Bayezid II).
22. “*Kitābu zubdati al-jawāmi‘i al-muḥammadiyyati wa-barqati al-lawāmi‘i al-aḥmadiyyati fī al-jihādi bi-al-aḥādīthi*” (The Book of Cream of Muhammadi Collections and Flash of Ahmadi Lights on Jihad), Arabic, 55 {10–11}. MANUSCRIPT: TSMK, A. 558 (Karatay 3176) (seal of Bayezid II). The author cannot be identified.
23. “*Mujalladun awwalu min Sharḥi Ṣaḥīḥi Muslim fī al-ḥadīthi,*” Arabic, 34 {1–2}: see MUSLIM 1.2. This MS could be either: (a): al-Qāḍī ‘Iyāḍ b. Mūsā al-Yaḥṣubī (d. 544/1149), *Ikmāl al-Mu‘lim bi-fawā'id Muslim* (Completion of the Informer of the Benefits of Muslim). MANUSCRIPT: TSMK, A. 413 (Karatay 2481), 670/1272. EDITION: *Sharḥ Ṣaḥīḥ Muslim li-l-Qāḍī ‘Iyāḍ al-musammā Ikmāl al-Mu‘lim bi-fawā'id Muslim*. Ed. Yahyā Ismā‘īl. al-Mansura, 1998; or (b): Aḥmad b. ‘Umar al-Anṣārī al-Qurṭubī (d. 656/1258), *al-Mufḥim li-mā ashkala min talkhīṣ Ṣaḥīḥ Muslim* (The Explainer of What is Ambiguous in the Extract of the Ṣaḥīḥ of Muslim). MANUSCRIPT: TSMK, A. 415 (Karatay 2482), 729/1329. EDITION: ‘Abd al-Hādī et-Tāzī, ed. Rabat, 2004.
24. “*Mukhtaṣaru Jāmi‘i al-uṣūli,*” in 2 vols., 34 {9–10}: see IBN AL-ATHĪR 1.2. Perhaps another copy of al-Astarābādī’s *Mukhtaṣar* but probably: Sharaf al-Dīn Hibat Allāh b. ‘Abd al-Raḥīm Ibn al-Bārizī al-Ḥamawī (d. 738/1338), *Tajrīd al-uṣūl min aḥādīth al-rasūl* (Abstraction of the Roots from the Traditions of the Messenger), TSMK, A. 307 (Karatay 2943); *KZ*, I:536; *GAL*, I:438–39; *GAL-S*, I:608.
25. “*al-Munabbihāt ‘alā al-isti‘dād li-yawm al-ma‘ād li-l-nuṣṣ wa-al-widād*” (Warnings about the Preparation for the Day of Return in Advice and Friendship), in a *majmū‘a*, Arabic, 36 {18}. MANUSCRIPT: SK, Fatih 1130, leaves 163–274, 879/1474. EDITION: *Munabbihāt Ibn Ḥajar al-‘Asqalānī*. Cawnpore, 1307 [1890]; *al-Munabbihāt ta’līf Ibn Ḥajar al-‘Asqalānī*. Ed. Muḥammad Adīb al-‘Asqalānī. Damascus, 2003. Published multiple times mistakenly as a book of Ibn Ḥajar al-‘Asqalānī (d. 852/1449). See *GAL*, II:69; *GAL-S*, II:74. *KZ*, II:1848, where it is ascribed to Zayn al-Qudāt Aḥmad b. Muḥammad al-Ḥijjī, and several MSS have his name; but the book probably belongs to Abū al-‘Abbās Shihāb al-Dīn Aḥmad b. ‘Alā’ al-Dīn Ibn Ḥijjī al-Dimashqī (d. 816/1413). The name Ibn Ḥijjī seems to have been corrupted to Ibn Ḥajar. See “İbn Hicci,” *DİA*, XX, 66–67.
26. “*Risālatun fī aḥādītha mutafarriqatin,*” 40 {6}. MANUSCRIPT: “*Risāla fī al-aḥādīth al-mutafarriqa,*” SK, Ayasofya 533 (seal of Bayezid II).
27. “*Risālatun fī baḥṭhi ziyādati al-īmānī*” (An Epistle on the Increase of Faith), in a *majmū‘a*, Arabic, 40 {4–5}. Possibly: *Risāla fī ziyādat al-īmān wa-nuṣṣānih* (An Epistle on the Increase and Decrease of Faith) by Jalāl al-Dīn Rasūlā b. Aḥmad b. Yūsuf al-Tabbānī al-Ḥanafī (d. 793/1391). See *KZ*, I:870.
28. “*Risālatun fī faḍīlati shahri al-muḥarrami wa-yawmi ‘āshūrā*” (A Treatise on the Virtues of the Month of Muharram and the Day of ‘Ashura’), Arabic, 40 {5–6}. MANUSCRIPT: “*Risāla fī faḍīlat shahr Allāh al-muḥarram al-ḥarām wa-yawm ‘āshūrā,*” SK, Ayasofya 534 (seal of Bayezid II). The author is unidentified.
29. “*Risālatu al-aḥādīthi fī fawā’idi al-mawā’idi*” (The Treatise of Traditions about Benefits of Tables), Arabic, 40 {19}. Probably: SK, Ayasofya 1755: “*Aḥādīth fī fawā’id al-mawā’id.*” This MS could be a copy of *Fawā’id al-mawā’id* by Jamāl al-Dīn Abū al-Ḥusayn Yahyā b. ‘Abd al-‘Azīm al-Jazzār (d. 679/1281). See *GAL-S*, I:574; *KZ*, II:1302. EDITION: In *Rasā’il wa-nuṣṣ fī al-lughā wa-al-adab wa-al-tārīkh*. Ed. Ibrāhīm al-Samarrā’ī. al-Zarqā’, 1988. Pp. 302–68.
30. “*Tarjuma-i Nathr al-la’ālī min kalām ‘Alī*” (Translation of Scattering the Pearls from the Speech of ‘Alī), in a *majmū‘a*, Persian, 37 {4–5}. MANUSCRIPT: SK, Ayasofya 4795, leaves 33–78. EDI-

TION: Abū 'Alī al-Faḍl b. al-Ḥasan al-Ṭabrisī (d. 548/1153). Ed. Sayyid Muḥammad Riḍā al-Ḥusaynī al-Jalālī. Qum, n.d. Edition of the Arabic original with Latin translation: *Sententiae Ali ebn Abi Talebi, arabice et latine. E codicibus manuscriptis descripsit, latine vertit, et annotationibus illustravit, Cornelius van Waenen. Oxoniæ: typographeo Clarendoniano*, 1806. KZ, II:1928 identifies the compiler as Muḥammad b. 'Alī al-Aḥsā'ī Ibn Abī Jumhūr (d. 878/1473), which cannot be correct, as there are manuscripts with much earlier dates. A similar title is also ascribed to both Quṭb al-Dīn Sa'īd b. Hibat Allāh al-Rāwandī (d. 573/1177) and Rashīd al-Dīn al-Waṭwāt (d. 573/1177). Several copies of *Nathr al-la'ālī* are listed in other sections of MS Török F. 59. See Karatay, *Farsça Yazmalar Kataloğu* 23.

31. "*Tarjuma-i Ṣad kalima-i 'Alī*" (Translation of A Hundred Sayings of 'Ali), in a *majmū'a*, Persian, 37 {10–11}. MANUSCRIPT: SK, Ayasofya 4795, leaves 416–41. The original Arabic collection of the hundred sayings of 'Ali seems to have been collected by al-Jāhīz (d. 255/869) (see Qāsim Khalaf al-M. shawī al-Sukaynī, "Athar al-Jāhīz fī Jam' Nahj al-Balāgha," *Majallat Dirāsāt al-Baṣra* 12 [2011]: 29–54). The translation into Persian and the commentary appear to belong to Rashīd al-Dīn Muḥammad b. Muḥammad al-Waṭwāt (d. 573/1177) (Ahmed Ateş, "Raşid al-Din Waṭwāt'ın Eserlerinin Bazı Yazma Nüshaları," *Tarih Dergisi* 10 [1959]: 17–19). Al-Waṭwāt's commentary is titled *Maṭlūb kull ṭālib min kalām Amīr al-Mu'minīn 'Alī b. Abī Ṭālib* (Every Seeker's Desire for the Sayings of 'Ali, the Prince of the Believers) (ed. Mīr Jalāl al-Dīn Urmawī, Tehran, 1348). A copy of *Maṭlūb* is in MS Török F. 59, 137 {2–3}. Several other copies are listed in the inventory with the title *Ṣad kalima* (for example: 137 {9–10} and {13–15}). Also see Karatay, *Farsça Yazmalar Kataloğu* 21–22.
32. "*Tuḥfatu al-khāqāni fī sharḥi al-arba'ina ḥadīthan*" (A Gift to the King through the Commentary on Forty Traditions), Persian, in verse, 41 {13}. MANUSCRIPT: TSMK, R. 325, 751/1350–51 (Karatay, *Farsça Yazmalar Kataloğu* 15) (seal of Bayezid II). Written for Jānī Beg (r. 1342–57), the sultan of the Golden Horde.

III. UNIDENTIFIED BOOKS:

1. "*al-Arbā'ūna ḥadīthan*," in a *majmū'a*, 129 {13}.
2. "*Da'awātu al-ayyāmi fī al-ḥawāshī*," 41 {1}.
3. "*Kitābu aḥādītha fī al-mi'rāji muṣawwarun*," illustrated, 39 {15}.
4. "*Kitābu al-ālī fī ma'rifati al-nabī -'alayhi al-salām- wa-awlādihi wa-aṣḥābihi -raḍiya Allāhu 'anhum-*," 41 {19}–42 {1}.
5. "*Kitābu al-arba'ina fī al-ḥadīthi*," 39 {6}.
6. "*Kitābu al-arba'ina fī al-ḥadīthi*," 39 {19}.
7. "*Kitābu al-hanā'ī al-manūṭi fī sharḥi al-aḥādīthi al-'ashri*," 41 {11}.
8. "*Kitābu al-majmū'ati min al-akhbāri wa-al-ḥikami ma'a ba'di al-aḥādīthi*," 39 {5}.
9. "*Kitābun fī al-aḥwālī al-muta'alliqati bi-nubuwwati Muḥammad-ṣallā Allāhu 'alayhi wa-sallama-min qibali al-ḥadīthi*," Arabic, 38 {12–13}.
10. "*Kitābun fī al-ḥadīthi*," 40 {3}.
11. "*Kitābun fī faḍā'ili al-mulūki min qibali al-ḥadīthi*," 40 {9}.
12. "*Kitābu lawāmi'i al-anwāri al-manẓūmi fī 'ilmi al-ḥadīthi*," 40 {10–11}.
13. "*Kitābun mukhtaṣarun mushtamilun 'alā muqaddimatin wa-taqṣimin wa-khātimatīn fī 'ilmi al-ḥadīthi*," 40 {16–17}.

14. "*Kitābu nuzhati al-sultāni li-khizānati Meḥemmed ibn Murād Khān fī faḍli al-jihādi bi-al-aḥādīthi*," 55 {13–14}.
15. "*Kitābu qawā'idi al-uşūli fī 'ilmi ḥadīthi al-rasūli*," 41 {1–2}.
16. "*Kitābu sharḥi al-Maşābīḥi fī al-ḥadīthi*," Arabic, 36 {8}: see al-BAGHAWĪ 1.6.
17. "*Kitābun yashtamilu 'alā faḍā'ili al-jihādi wa-al-ribāṭi bi-al-aḥādīthi*," 38 {3}.

THE SECTION ON PRAYERS, INVOCATIONS, UNIQUE QUALITIES OF THE QUR'AN, AND MAGIC SQUARES IN THE PALACE LIBRARY INVENTORY

When reviewing the section of the inventory titled *Tafṣīl kutub al-ad'īya wa kutub khawāṣṣ al-Qur'ān wa-kutub 'ilm al-wafq* (The Section Containing Books of Prayers, Books on the Special Qualities of the Qur'an, and Books on the Science of Magic Squares, 45–55), one is tempted to imagine 'Atufi or one of his assistants surveying the shelves of the palace library, pulling out volumes and chests full of inscribed artifacts of different sorts: talismanic shirts, skullcaps, amulets and tablets made of wood, copper, and silver. This must have been a fairly large section of the library, as the inventory records 208 items, written or inscribed in Arabic, Persian, and Turkish, many of which are unidentifiable by the generic titles and descriptions that 'Atufi provides. As indicated by the entries in this section, some of the compilations of prayers and invocations were produced over the course of centuries and arrived in the Ottoman domains from different parts of the Islamic East. This section of the inventory, then, offers a glimpse into supplicatory, devotional, and talismanic practices that prevailed not only in the Ottoman realms, but across the Islamic East (and the Mamluk sultanate). The organizational logic of the section is not easily discernible: talismanic shirts seem to have been mixed with bound volumes, and amulets were apparently kept in the same chests or on the same shelf as tablets. It is clear, however, that either 'Atufi or previous librarians did try, to some extent at least, to cluster the items by type and title (as the group of amulets at the beginning of the section indicates). Another possibility is that 'Atufi kept the contents of the chests intact and placed them in the section of the palace library where other items and volumes dealing with similar subjects were held. It is also possible that there may have been some thematic correspondence among

the items or that the texts were linked in the way they were used. Future studies may further illuminate some of these connections.

Be the case as it may, the grouping of prayers, supplications, works on lettrism, treatises on the unique qualities of the Qur'anic verses, God's Beautiful Names, and magic squares in the same part of the sultan's library would not surprise anyone who has studied Ottoman compilations of treatises (*majmū'a*, Turkish *mecmū'a*); talismanic shirts containing various combinations of prayers, talismans, and magic squares; or Ahmad al-Buni's (d. ca. 1225) *Shams al-ma'ārif* (The Sun of Gnosis).¹ However, as will be discussed in the next section, the connection between prayers and the occult sciences was not an obvious one. This section of the inventory, then, deepens our understanding of the relationship between such bodies of knowledge in the Ottoman domains and, more generally, throughout the eastern Islamic lands in the fifteenth and early sixteenth centuries. Furthermore, it provides a sense of how prayers and talismanic texts were read, consumed, and integrated into the daily life of the palace and beyond.

The inclusion of talismanic objects and texts on lettrism in the palace library stems, at least in part, from the interest of Bayezid II and his ancestors in understanding their mission on Earth and deciphering the secrets of their names. This interest, it seems, led scholars from the Ottoman dominions and beyond to compile prayer books, magic squares, and amulets. One of these individuals was Muhammad b. Sharaf al-Din, a custodian of the pious foundations of Mecca and Medina, who presented a talismanic prayer book to Bayezid II. According to Hüseyin Yılmaz, Muhammad b. Sharaf al-Din formulated specific incantations based on the

symbolism in the sultan's name. Moreover, as Muhammad b. Sharaf al-Din explained in the introduction to the book, he seeks to explore the correlation between the sultan's name and God's names for the purpose of discovering specific invocations and magic squares (*adhkār/awrād* and *awfāq*, respectively). Muhammad b. Sharaf al-Din assumed that there was an existential correlation between Bayezid's name, his character, and his destiny, status, and mission as "the true manifestation of God on Earth."²

CONSTELLATION OF SCIENCES

In the Turkish introduction to the inventory (see translation in Appendix IV), 'Atufi emphasizes the importance of the disciplines and sciences as the organizing principle of the inventory. As Abdurrahman Atçıl observes in his contribution to the present volume, this was not always an easy task, as volumes and compilations (*mecmū'as*) could have been placed in multiple locations in the collection. But the titles of the inventory sections may reveal an ideal classification and constellation of the sciences. It is therefore worth devoting a few words to the title of the section that constitutes the subject of the present essay, namely Prayers, Invocations, Unique Qualities of the Qur'an, and Magic Squares.

The placement of these specific bodies of knowledge in a single section of the library suggests that 'Atufi was sympathetic to the classification of the sciences that was prevalent in the Persian-speaking parts of the Islamic world from the fifteenth through the seventeenth centuries. As Matthew Melvin-Koushki has argued, from the mid-fourteenth century onward, the occult sciences were increasingly "mathematicalized" and sanctified through association with Sufism, and particularly with the figures of Ibn 'Arabi (d. 1240) and al-Buni. In this process, lettrism, along with astrology and geomancy, was classified as one of the mathematical sciences and as one of the sciences of *walāya* (sainthood or sacral power).³ The growing sense of sacral power was also captured in the involvement of Sufi masters in the production of talismans and amulets. As Hülya Tezcan and Özgen Felek have pointed out, Sufi masters decided

which Qur'anic chapters, prayers, and talismanic numbers and letters would be inscribed on talismanic shirts.⁴

Other scholars, such as Ahmed El Shamsy and Liana Saif, have suggested that significant aspects of the process described by Melvin-Koushki can be already discerned in the thirteenth century. Along with the growing consolidation of Sufi networks across the eastern Islamic lands at this time, Sufi doctrines increasingly informed the production and use of amulets, and the Sufi perception of revealed, sacred language as a means to establish direct access to the divine became ever more central. In Ahmed El Shamsy's words, "it is this notion of the nature of sacred language that underpins the idea that the repetition of divine names leads one to approach the named."⁵ Such an understanding of language ties together the various bodies of knowledge included in this section of the inventory: invocations, prayers, magic squares, the study of God's names, and the science of letters. As Liana Saif has remarked,

We can now [from the thirteenth century onward] discern an epistemological shift in Islamic occult thought from magical theories drawn from natural philosophy to foundations drawn from Sufi doctrines. The "hidden" (*bāṭin*) in magic is no longer the *ḥawāṣṣ* (occult properties) of natural things (minerals, plants, and animals), but the powers of subtle levels of reality (*laṭā'if*), whether as cosmic principles (letters and Divine Names) or as inner human faculties (heart, soul, spirit, and intellect) that can only be understood through abstraction guided by revelation.⁶

At the same time, this process also led to closer connections between the science of letters and the science of the special qualities of the Qur'an and the Beautiful Names, on the one hand, and invocations and prayers, on the other. Compositions of invocations and prayers became fairly common after the twelfth century and were often associated with saintly figures, usually senior members of their respective Sufi networks or the eponymous founders of Sufi paths.⁷ The close connections between Sufi doctrines and discourses and certain occult sciences are reflected in 'Atufi's inventory. Furthermore, it appears that certain invocations, such as al-Shadhili's *Ḥizb al-baḥr* (The Litany of the Sea), served to establish conduits to the transmission of occult knowledge and specifically of the Science of Letters through dreams.⁸

It is worth stressing that the inclusion of these bodies of knowledge in the same section was not unanimously accepted. In his extensive work on the classification of the sciences, titled *Miftāḥ al-sa'āda wa-mibṣāḥ al-siyādah fī mawḍū'āt al-'ulūm* (Key to Happiness and the Lantern of Mastery on the Subject Matters of the Sciences),⁹ the sixteenth-century Ottoman scholar and jurist Ahmed ibn Mustafa Taşköprüzade classified the science of the special qualities of the Qur'an, the science of the use of the letters and divine names, and numerical divination (*jafr*) as part of the science of Qur'anic exegesis (*tafsīr*).¹⁰ Much later in the *Miftāḥ*, in the section on the interior sciences (*'ulūm al-bāṭin*), Taşköprüzade devotes lengthy discussions to the canonical prayers (*ṣalāt*),¹¹ invocations (*adḥkār*, *ad'īya*, *awrād*), and supplications (*du'ā*).¹² The fact that these subject matters were not treated in the same section/chapter of the *Miftāḥ* suggests that Taşköprüzade did not consider these bodies of knowledge to be closely interrelated. Much like Taşköprüzade, the seventeenth-century Ottoman scholar and bibliographer Katip Çelebi (d. 1657) adhered to the view that invocations and the occult sciences are not intrinsically connected.¹³

Finally, it is worth pointing out that a few treatises and works dealing with invocations and the science of letters are also recorded in other sections of 'Atufi's inventory. For instance, the section on medicine contains copies of *Risālat da'wat al-aṭibbā'* (The Treatise of the Prayer of the Physicians, 164 {13–14}). Similarly, 'Atufi placed a compilation of invocations and supplications (*adḥkār wa-da'wāt*, 115 {1–2}) in the section on Sufism (*taṣawwuf*). Moreover, although al-Ghazali's (d. 1111) magnum opus, *Iḥyā 'ulūm al-dīn* (The Revival of the Religious Sciences), has a lengthy discussion of prayers and invocations and Ibn 'Arabi devotes two chapters of his *al-Futūḥāt al-Makkiyya* (The Meccan Revelations) to the Beautiful Names,¹⁴ both works appear in other sections of 'Atufi's inventory.

PRAYERS

Scholarship has paid remarkably little attention to prayers and invocations in the eastern Islamic lands in general and in the fifteenth-century Ottoman domains

in particular. This lack of attention stands in inverse relation to the number of manuscripts containing prayers and invocations in Ottoman libraries (and in other manuscript collections throughout the world). It would not be an exaggeration to say that Ottoman society was saturated with prayers: in addition to canonical prayers (*namaz* or *ṣalāt*), there were specific supplications and prayers for all sorts of purposes, from the most momentous events, such as the prayers sultans recited on the battlefield,¹⁵ to the most mundane occasions, such as entering a bathhouse.¹⁶ Moreover, the years and days were dotted with particularly favorable times for certain supplications. Prayers and supplications, however, varied in terms of popularity and proliferation: some were extremely popular and exist in numerous copies, while others circulated in fairly small circles.

Numerous terms were used to refer to different types of prayers, supplications, and invocations, although their usage is somewhat inconsistent: *ṣalāh* (pl. *ṣalāwāt*, Turkish *şelāvāt*), *du'ā'* (pl. *ad'īya*, Turkish *ed'īye*), *hizb* (pl. *aḥzāb*), and *wird* (pl. *awrād*, Turkish *evrād*). As Richard McGregor has observed for the Mamluk period, "although the terminology is inconsistent, with prayers referred to by more than one term, the genre as a whole is clearly identifiable as consisting of supererogatory petitionary prayer compositions."¹⁷ Moreover, it is not fully clear how each of these compilations and genres was employed. It is possible that some texts were considered more petitionary, intended to persuade God to intervene on behalf of the supplicant on specific issues, while others were more supererogatory in nature. However, it is quite difficult to draw a clear line between uses of the texts, as it is quite likely that there were cases in which the same text was used for different purposes. This vast textual corpus also includes a significant number of commentaries (usually referred to as *sharḥ*, pl. *shurūḥ*) on prayers, invocations, and supplications. In addition, as the inventory attests, prayers vary in terms of the medium through which they circulated.

The palace library inventory reflects the diversity within the textual corpus of invocations and prayers. Some prayers in the inventory were intended to be recited on specific occasions and times ("the last third of the night," or "seven days"), while others were more general in terms of their recitation time. Moreover, some

prayers were attributed to a specific figure (such as ‘Ali and Zayn al-‘Abidin), while the authors of other invocations remain unidentified. In addition, the inventory lists commentaries on the “Thousand and One Names” prayer, the “Prayer of the Sword Bearer,” and the “Forty Names.”

The tone of these prayers is often petitionary, and their content is commonly derived from the Qur’an (as the term *wird* indicates) and/or the prophetic tradition (hadith). As Richard McGregor has explained, “the Qur’anic passages in these prayer texts vary in length and style, and they are also edited in order to preserve the voice and syntax of the prayer narrative [...] Used this way, the Qur’anic text is both an integral component of the prayer text, and yet is altered to serve in its new context.”¹⁸

LETTERS, AMULETS, TALISMANIC SHIRTS, AND MAGIC SQUARES

Multiple terms are used to refer to amulets and talismans throughout the Islamic world: *hīrz* (mostly in the Islamic West), *hijāb* (mostly in Egypt), *ṭilasm/ṭillasm*, and *ḥamla* (pl. *ḥamāl’il*).¹⁹ Despite the variation in terminology, all these terms seem to denote inscribed objects that are “used as magic charms to protect and avert the evil eye.”²⁰

As will be further discussed below, amulets varied considerably in terms of their materiality and the texts inscribed on them. The inscriptions on amulets and talismans draw on a wide repertoire consisting of Qur’anic verses, the Beautiful Names of God, invocations, various symbols, and magic squares. As Venetia Porter has pointed out, “many of the [Qur’anic] phrases belong to a general repertoire of protective phrases found in numerous contexts, such as in architecture and metalwork, while the signs and symbols also appear on ‘magical’ objects, such as magic-medicinal bowls, talismanic shirts and so on.”²¹ Similarly, in her comprehensive study of talismanic shirts held at the Topkapı Palace Museum, Hülya Tezcan has observed that the shirts are inscribed with Qur’anic verses in addition to magic squares and divinations. She notes that the most frequently cited sura is the opening sura, *al-Fātiḥa*, but verses are drawn

from other suras as well. Besides the Qur’an, sixteenth-century (and later) talismanic shirts were inscribed with the Names of God, the names of the four archangels, hadiths, literary descriptions of the appearance of the Prophet (*ḥilyas*), and the Ode of the Prophet’s Mantle (*Qaṣīdat al-Burda*).²² Indeed, many of these elements appear on the short-sleeved cotton talismanic shirt produced between March 1477 and March 1480 during the reign of Mehmed II for Prince Cem, brother and eventual rival of Bayezid II. The shirt is inscribed with several magic squares, the Names of God, and Qur’anic verses written in black, gold, green, and red ink.²³ However, a late fourteenth- to early fifteenth-century talismanic shirt, possibly made during the reign of Bayezid I (r. 1389–1402), does not include magic squares, as opposed to the later Ottoman practice, and resembles Timurid talismanic shirts.²⁴

As I have suggested above, the science of letters (*‘ilm al-ḥurūf*), which attached numerical values to specific letters, was central to the production of amulets, talismans, and magic squares, as well as to divinations. Based on the letter’s numerical value, calculations of various degrees of complexity were performed. As Shahzad Bashir and Evrim Binbaş have shown, the second half of the fourteenth and fifteenth centuries witnessed the growing popularity of the science of letters throughout the intellectual circles of the Islamic East.²⁵ As will be further discussed below, several key fifteenth-century practitioners of the science of letters appear in the section of the inventory surveyed here.

IDENTIFIED WORKS

As ‘Atufi explains in his Arabic and Turkish introductions, he usually provides the original title of the work as assigned by its author or the assumed title (see Appendix IV and V at the end of this volume). This title also appears on the first page of the volume containing the work and on its binding. ‘Atufi occasionally provides alternative titles as well. He is quite inconsistent, however, in the manner in which he records the authors of the works. Occasionally, though not always, the author is mentioned explicitly in the inventory. In other cases, only the title of the work is recorded.

'Atufi's descriptive practices pose considerable challenges for identifying the works listed in the inventory, particularly works with generic titles.²⁶ The section on prayers contains numerous generic titles that cannot be easily associated with a specific text. Such, for example, are the numerous volumes titled *Ad'iyat al-ayyām al-sab'a* (The Prayers for the Seven Days [of the Week], 45 {6}, 46 {8–10, 13}, 47 {12}, 48 {7, 9}, 49 {4–5, 7–8, 11, 18–19}, 50 {2, 4}), or the treatises dealing with the Beautiful Names of God. Without a close examination of the manuscripts, it is impossible to know whether they all contain the exact same text. It is quite possible that numerous versions of The Prayers for the Seven Days coexisted in the Ottoman lands in the fifteenth century. Similarly, it is likely that the various amulets (*ḥamā'il*) that appear in the inventory were not identical in terms of their inscribed texts. Even as far as the identifiable titles are concerned, it is possible that there would have been considerable variations among the numerous copies of the same work held at the palace library.

Generally speaking, the volumes and works in this section deal with one or more of the following subject matters: (a) prayers, invocations, and supplications by known or anonymous authors; (b) the special qualities of the Qur'anic verses (for accessing God) and the special qualities of God's Beautiful Names; and (c) amulets, talismans, magic squares (*wafq*), and the science of letters. Given the significant overlaps and interconnections between these bodies of knowledge, assigning a work to a single thematic cluster may turn out to be a fairly complex task. For instance, in his treatise, as its title suggests, the ninth-century scholar Hakim al-Tirmidhi deals with both invocations and amulets.²⁷

Prayers, invocations, and supplications

Numerous works in this section contain prayers, invocations, and supplications. As has already been pointed out, many of these works have a generic title. Other invocations and prayer cycles are attributed to one of the companions of the Prophet, such as 'Ukasha,²⁸ and possibly Muhammad ibn Ka'b al-Qarthi,²⁹ or the imams. Among the latter, we should particularly mention the prayer ascribed to Zayn al-'Abidin (d. 710), Husayn's son (and the fourth imam of the Shi'a).³⁰ The attribution of the prayer to one of the prominent figures of the Islam-

ic distant past does not necessarily make the identification of the text easier, as there are often multiple prayers associated with these figures. In other instances, however, the supplicatory text seems to have been fairly stable. The *Du'ā sayfi* (The Prayer of the Sword Bearer, 45 {4, 16}, 46 {13}, 47 {3, 10}, 48 {4–6, 8}, 49 {10, 13–14, 18, 19}), attributed to 'Ali ibn Abi Talib (d. 661), is one example of a stable supplicatory text. The work circulated widely throughout the eastern Islamic lands in the fifteenth century in general and in the Ottoman lands in particular.³¹

Among the identifiable titles are several collections of prayers by eminent scholars and Sufi masters, such as those attributed to Ibn 'Arabi (d. 1240),³² *The Splendid Collection* by Zayn al-Din 'Abd al-Salam ibn Muhammad Abu al-Karam (d. 1178–79),³³ Shahab al-Din Yahya ibn Habash al-Suhrawardi (d. 1191),³⁴ and Muhammad ibn Ahmad al-Qurtubi (d. 1273).³⁵ The inventory also lists *al-Ḥizb al-baḥr* (The Litany of the Sea, 46 {15–16}, 48 {1}, 49 {2}) by the eponymous founder of the Shadhili order, Abu al-Hasan 'Ali ibn 'Abd Allah al-Shadhili (d. 1258); the collection of prayers by Yahya ibn Sharaf al-Nawawi (d. 1277),³⁶ the collection of invocations by 'Ali bin Shihab al-Din al-Hamadani (d. 1385), known as *al-Awrād al-fathiyya* (The Invocations of Revelation, 50 {6}),³⁷ the invocations of Hamid al-Din Hamid ibn Musa Aqsara'i (d. 1402),³⁸ the collections of prayers by Kutbüddinzade İzniki (d. 1480),³⁹ and those compiled by Şeyh Vefa (d. 1491), the eminent Sufi master and the founder of the Zeyniyye branch of the Vefaiyye order.⁴⁰ This list of authors casts light on the geographical circulation of these collections. While some authors, like Şeyh Vefa and Kutbüddinzade, were Anatolian, others operated in different parts of the Islamic world, from the Maghrib (as in the case of al-Shadhili) to Kashmir (as in the case of al-Hamadani). It is worth stressing that the inventory includes works by several eminent Sufi figures, such as Ibn 'Arabi and Suhrawardi, whose works were extremely popular in the "Balkans-to-Bengal complex."⁴¹ Compare, for instance, the works listed in 'Atufi's inventory with those mentioned in a later Mughal work on the classification of the sciences written for Emperor Humayun (r. 1530–56) by Muhammad Fazil Miskini Qazi Samarqandi. Samarqandi mentions the science of the special qualities of [al-Hamadani's] *al-Awrād al-fathiyya*, a rhymed

translation of [al-Busiri's] *Qaṣīdat al-burda* (Ode of the Mantle of the Prophet), and [al-Shadhili's] aforementioned *al-Ḥizb al-baḥr*, three works that were also held at Bayezid II's palace library.⁴² The presence of these authors in the inventory suggests that some of the unidentified prayers and supplications also circulated across vast territories. The circulation of *The Prayer of the Sword Bearer* across the Timurid lands and Anatolia in the fifteenth century further strengthens this possibility.

The inventory also lists several prayer manuals, including Muhammad ibn al-Jazari's (d. 1420) *Kitāb 'Uddat al-ḥiṣn al-ḥaṣīn* (The Equipment of the Strong Bastion, 52 {2}), and the collection of prayers by Şükru'llah ibn Shihab al-Din (d. after 1460, possibly his *Jāmi' al-da'wāt* (Comprehensive [compilation of] Prayers).⁴³ In addition to prayers and invocations, the manuals contain chapters dealing with the act of prayer. Ibn al-Jazari, for instance, discusses the most appropriate places and times for prayer, the signs of the prayer's acceptance, and he devotes lengthy sections to the virtuous qualities of different types of prayers.⁴⁴ In this sense, the manuals may be seen as predecessors of the Ottoman shaykh al-Islam Ebu's-Su'ud Efendi's (d. 1574) *Du'ā-nāme* (Book of Prayer).

Furthermore, the inventory includes several commentaries (*sharḥ*, pl. *shurūḥ*) on prayers and invocation cycles, such as the *Sharḥ Du'ā' Sayfī* (Commentary on the Prayer of the Sword Bearer, 48 {6}), *Sharḥ du'ā' hazar yak nām* (Commentary on the Prayer of One Thousand and One Names, 48 {2}), and *Sharḥ Chihil nām* (Commentary on the Prayer of the Forty Names, 47 {17}). Based on the titles alone, it is difficult to determine the exact content of these commentaries.⁴⁵ Based on their description in the inventory, however, it is known that some of the commentaries were written in Persian while others were compiled in Arabic (and possibly also in Turkish).

It is worth dwelling on the inclusion of a fairly large number of prayers attributed to 'Ali and to Zayn al-'Abidin, the fourth imam in the Shi'i tradition who is revered by Sunnis as well. Their presence serves as an example of what Muhammad Ahmad Masad has called "the legacy of *Ahl al-Bayt* within the Islamic divinatory tradition,"⁴⁶ and in the occult literature more generally,

among both Sunnis and Shi'is from at least the thirteenth century. According to this tradition, the imams were perceived as an authoritative channel for the transmission of occult knowledge.

The special qualities of the Qur'an and God's Beautiful Names

Several treatises and commentaries in this section of the inventory deal with the special qualities of the Qur'an and/or God's Beautiful Names. 'Atufi repeatedly indicates in his comments on the content of the works (*fī al-ad'īya, min qibal al-ad'īya*) that these treatises are related to invocations and prayers. The tenth-century physician Abu 'Abd Allah Muhammad al-Tamimi's (d. ca. 980) *Manāfi' al-Qur'ān* (The Benefits of the Qur'an, 47 {14}),⁴⁷ and the fourteenth-century scholar and Sufi 'Abd Allah ibn As'ad al-Yafī's (d. 1367) *al-Durr al-naẓīm fī manāfi' al-Qur'ān* (The Well-Ordered Pearl on the Benefits of the Qur'an, 50 {14})⁴⁸ are the only two works on the special qualities of the Qur'anic verses that I have been able to identify.

Among the identified works are the commentaries on the Beautiful Names by the Andalusians 'Abd al-Salam Ibn Barrajan (d. 1141)⁴⁹ and Muhammad ibn Ahmad al-Qurtubi (d. 1273).⁵⁰ As Yousef Casewit has recently demonstrated, Ibn Barrajan was a central figure in the evolution of the mystical tradition in the Islamic West, and a proponent of the view that the Names can help the believer to cross (*'ibra*) into the unseen world.⁵¹ Moreover, he contended that the Beautiful Names could serve as spiritual guides. Until recently, Ibn Barrajan's work has received very little attention among scholars of mysticism in the Islamic West, and even less so among scholars of mysticism/Sufism in the Ottoman lands. His appearance in the inventory (and the fact that his commentary on God's names exists in numerous copies in Ottoman libraries) indicates that, at least by the fifteenth century, Ibn Barrajan was read by Ottoman scholars (and, presumably, by their colleagues throughout the Islamic East) along with the works of other thinkers from the Western Islamic mystical tradition, most notably Ibn 'Arabi.

It is quite remarkable that al-Ghazali's work on God's Beautiful Names is not listed, or at least is not explicitly recorded as such, in the inventory. Al-Ghazali is well

represented in the inventory, and it is likely that the work circulated in the Ottoman lands in the fifteenth century. Clearly, as Taşköprüzade's *Miftāh* attests, in the mid-sixteenth century, al-Ghazali's work on God's names was praised as one of the most important compilations on the Beautiful Names.

Amulets, talismans, magic squares, and the science of letters

The section includes a large number of amulets, talismans, and magic squares of different shapes and materials. 'Atufi probably thought it appropriate to keep such items in the same place as the manuals and treatises dealing with amulets and magic squares. Among the treatises and manuals on amulets and special qualities of the Arabic letters are a treatise by Abu Salim Ibn Talha (d. 1254) on magic squares and divination,⁵² a work attributed to Ibn 'Arabi on the science of letters,⁵³ and several works by Ibn 'Arabi's near contemporary Ahmad al-Buni.

The Ayyubid scholar, courtier, jurisconsult, and ascetic Kamal al-Din Muhammad ibn Ahmad Ibn Talha's *al-Durr al-munazzam fi al-sirr al-a'zam* (The Well-Ordered Pearl on the Great Secret, 51 {7}) is a short apocalyptic prophecy on the imminent evils that were to precede the end of the world. According to Muhammad Masad, the work did not survive independently, but was incorporated into other works, such as 'Abd al-Rahman al-Bistami's (d. 1454) *Miftāh al-jāfir al-jāmi'* (The Comprehensive Key of Divination), "a masterpiece of divination and apocalyptic writing."⁵⁴ Moreover, at the basis of the *Durr* lies a mysterious circular tablet that Ibn Talha describes in detail. The tablet was filled and surrounded with the Beautiful Names, Qur'anic verses, and Arabic letters, which Ibn Talha used to calculate the exact date of the end of the world based on the numerical values of the letters and names.⁵⁵

The palace library of Bayezid II also held a work on the science of letters attributed to Ibn 'Arabi and titled *'Iqd al-manẓūm* (The Well-Ordered Necklace, 50 {9}). The *'Iqd* was not, as has been pointed out above, the only work Ibn 'Arabi devoted to the science of letters. Much like other mystics of the Andalusī mystical tradition, such as his tenth-century predecessor Ibn Masarra (d. 931), Ibn 'Arabi was concerned with the classification

of letters and tried to establish the relationships between letters and the divine. In his aforementioned *Futūḥāt al-Makkiya*, for instance, Ibn 'Arabi even linked each letter of the Arabic alphabet to one of the Beautiful Names and to one of the lunar mansions.⁵⁶ Much like in Ibn 'Arabi's other lettrist work, the *'Iqd* includes various classifications of the letters, such as classifications according to the four humors, the zodiac signs, and the planets; it also lists the numerical values of the letters.⁵⁷

As I have already mentioned, the palace library held only a small portion of the works that have been attributed to Ahmad al-Buni over the centuries.⁵⁸ Yet the works of al-Buni that are listed in the inventory are generally the author's most important and popular treatises. Al-Buni's oeuvre contributed to the diverse bodies of knowledge represented in the section of the inventory that is analyzed here, and indeed, it epitomizes the close connections between them.

Most of the Bunian works in the inventory deal with the science of letters and the special capacity of God's names to access the divine (see below). In recent years, several important studies have drawn attention to the complex transmission history of the Bunian corpus.⁵⁹ These studies have also demonstrated the fairly unstable nature of this corpus, as reflected in significant variations between manuscripts of the same work. The complex transmission poses serious challenges for identifying al-Buni's works in the inventory.

Consider, for instance, the case of *Shams al-ma'ārif* (The Sun of Gnosis, 48 {2}), a title that appears several times in the section. *Shams al-ma'ārif wa-laṭā'if al-'awārif* is a manual on the science of letters (*ḥurūfiyya*) that was copied extensively throughout the fifteenth century.⁶⁰ As Yasmine el-Saleh has shown, much of the discussion in the *Shams* was intended to provide information on the production of magic squares.⁶¹ However, the title *Shams al-ma'ārif* was also assigned to other, very different texts. And to complicate matters even further, *Shams al-ma'ārif wa-laṭā'if al-'awārif* was occasionally conflated with *Laṭā'if al-ishārāt*. For example, according to Noah Gardiner,

Süleymaniye MS Ayasofya 2799, a copy of *Laṭā'if al-ishārāt* copied in 861/1457, is simply titled *Shams al-Ma'ārif*. [However,] Süleymaniye MS Ayasofya 2802, an undated but most likely fifteenth-century copy of *Laṭā'if al-ishārāt*, is declared

on its opening leaf to be “the book *Shams al-ma‘ārif* of which no [other] copy exists,” with a further claim that “this copy is not the one found among the people, and in it are bonuses and additions to make it complete.”⁶²

A close examination of the manuscripts of *Shams al-ma‘ārif* with Bayezid II’s seal is needed to determine which version of this work was held at the palace library.

The third work by al-Buni, which deals with the science of letters and its practices, is *al-Lum‘a [Lum‘a] al-nūrāniyya fī awrād al-rabbāniyya* (The Luminous Glitter on the Divine Invocations, 50 {12, 17}). The *Lum‘a*, too, was widely copied in the fifteenth century.⁶³ As with the prayer and invocations books, al-Buni’s works were consulted and copied in the Mamluk sultanate, the Timurid lands, and, as the inventory attests, the Ottoman domains. Moreover, a work described as *Kitāb fī kayfiyyat al-‘amal bi-al-asmā’ wa-al-awfāq* (Book on the Manner of Using the [beautiful] Names and Magic Squares, 48 {12, 15–16}, 49 {10}) appears in five copies in the inventory. It is not easy to determine which work in the Bunian corpus this description relates to without examining the manuscripts.

In addition to the works by al-Buni, the palace library held a commentary by the famous fifteenth-century scholar ‘Abd al-Rahman ibn Muhammad al-Bistami (d. 1454) on al-Buni’s *Lum‘a*.⁶⁴ Al-Bistami also wrote another work on magic squares, titled *Shams al-āfāq fī ‘ilm al-awfāq* (The Sun of the Horizons on the Science of Magic Squares, 48 {3}) whose title may be an allusion to al-Buni’s *Shams al-ma‘ārif*.⁶⁵ As Evrim Binbaş has recently demonstrated, al-Bistami was part of a network of scholars who practiced and wrote on the science of letters in the Mamluk sultanate, the Timurid lands, and in Anatolia. An eminent member of this network was Sharaf al-Din Yazdi (d. 1454), who also authored a work on magic squares, titled *Kunh al-murād fī wafq al-a‘dād* (The Essence of the Desired on Magic Squares and Numbers). As the relevant section of the inventory attests (49 {1}), an abridged version of Yazdi’s work was available at Bayezid II’s palace library.⁶⁶

The works on magic squares seem to have been of personal interest to this sultan, or at least so the author/copyist must have hoped, as a treatise dedicated to Bayezid II is also recorded in the same section. It is worth pointing out that any treatises containing magic

squares made for Bayezid’s predecessors are absent from the collection. While it is possible that Bayezid’s interest in magic squares was indeed unique, this is somewhat unlikely given that the interest in magic squares and the science of letters predated his reign.⁶⁷ It is possible that treatises prepared for earlier Ottoman sultans had been removed from the palace library before the inventory was compiled.

Finally, it is worth devoting a few words to the compilations of treatises (commonly known as *majmū‘as* in Arabic, *mecmū‘as* in Turkish) in the section examined here. When ‘Atufi describes these compilations, he tends to mention only the first treatise in the compilation. Other compilations of multiple works are simply described as “volume” (*mujallad*), in which case the descriptions of the works in the volume are more complete, containing the title, or at least a description, of each individual work. The *mujallads* reveal how fifteenth-century readers perceived the relationships between different disciplines and sciences. One volume, for instance, consisted of one treatise on geometry (*handaṣa*) and another on magic squares.⁶⁸ Another compilation contained al-Tamimi’s work on the benefits of the Qur’an, al-Busiri’s *Ode of the Mantle of the Prophet*,⁶⁹ and *The Prayers for the Seven Days of the Week*, which were bound together with a Persian translation of prophetic traditions.⁷⁰

OBJECTS

‘Atufi was clearly struck by the materiality of the objects he found; or, at least, he presumed that a description of the material qualities of the objects would be of interest to the sultan and future users of the palace library. He therefore paid considerable attention to the materials and physical shape of the artifacts, and to the identity of the calligraphers. This section of the library is therefore quite different from most other sections, and is somewhat similar to the section of the inventory dealing with the copies of the Qur’an. In the latter, too, ‘Atufi devotes much attention to the identity of the calligrapher and to the physical shape of the *maṣāḥif*. His description of the amulets, talismanic shirts, skullcaps, and other devotional/talismanic objects renders the inventory indispensable for understanding certain aspects

of fifteenth-century piety in the Ottoman context, and the Islamic East more generally. Furthermore, the inclusion of objects in the palace library inventory, presumably due to the texts inscribed on them, raises important questions concerning the relationship between texts and their material manifestations in different moments in the "life cycle" of objects: Were amulets, talismanic shirts, and skullcaps that were still in use as devotional/talismanic objects kept elsewhere in the palace? When were they moved to the library? And how were they used or consulted thereafter? Furthermore, since many of the amulets and talismanic shirts were produced for specific individuals or for particular events, as was the case with the talismanic shirt made for Cem Sultan, their subsequent storage in the palace library may have signaled the end of their effectiveness. Alternatively, newly made and more generic amulets may have been requested from the palace library by the sultan on special occasions, for himself or perhaps even to be presented to family members or privileged courtiers as gifts (as were some of the books).

Among the objects listed in this section of the inventory, amulets (*ḥamā'il*) of different shapes (round, triangular, and square) occupy a prime place. The material on which the text was written is unclear from 'Atufi's descriptions. It is possible that, at least in some cases, the text was written on a paper scroll, as such amulet scrolls had been common in the Islamic East for centuries.⁷¹ Most of the amulets were bound, likely with leather (*mujallad*). It is possible that some of them were enclosed in metal cases. Several amulets were wrapped in silk as well. In addition, the inventory lists four square silver tablets (45 {18}, 46 {1–2}) and one square copper tablet inscribed with magic squares (46 {2}), as well as a round, three-handspan-long wooden [piece?] with four amulets, magic squares, and prayers (46 {7}).

The inventory also mentions several talismanic shirts and skullcaps inscribed with invocations and magic squares (figs. 2, 3). It is difficult to identify these, but it is possible that they were made for the sultan and, perhaps, for his predecessors. The talismanic shirts held at the Museum of Turkish and Islamic Art (possibly made for Bayezid I)⁷² and the Topkapı Palace Museum (made during Mehmed II's reign, fig. 1)⁷³ may be two of the shirts mentioned in the inventory.

'Atufi also pays close attention to the calligraphic style employed, and he even occasionally mentions the calligrapher: "the Beautiful Names in Kufic script" (45 {6}), "invocations in Yaqut's hand" (*khatt Yāqūt*, 46 {8}), "the supplication of the morning and the supplications for the seven days [of the week] in Arghun's hand" (47 {12}), "invocations in the hand of Ibn Jalal al-Din" (46 {12}), "The Litany of the Sea written in single [or cut out] letters (*khatt muqatta'*)" (46 {15}), "the invocations of al-Hamadani written by 'Abd Allah al-Hirawi" (46 {18}), "the Prayer of the Sword Bearer written by Şeyhzade" (48 {4}), or simply "an unparalleled exquisite *muḥaqqaq* hand" (47 {7}). In other instances, when the calligrapher used gilded ink, 'Atufi recorded this feature as well.

Some of the calligraphers 'Atufi mentions by name above were well known. Yaqut al-Musta'simi (d. 1268), who, according to Mustafa 'Ali, was known as "the Sultan of the masters of the pen,"⁷⁴ and his Baghdadi student, 'Abd Allah Arghun Kamil (d. after 1352/53), were renowned calligraphers from the more distant past.⁷⁵ 'Ali considered Yaqut and Arghun part of the "Seven Masters" of calligraphy.⁷⁶ In addition to these seven masters, 'Ali explains, "the calligraphers of Rum also have their own 'Seven Masters.'" ⁷⁷ Dede Çelebi, the abovementioned Shaykhzada (Şeyhzade, d. 1531) who copied one of the works (the Prayer of the Sword Bearer) listed in the inventory, was the son and student of the eminent calligrapher Shaykh Hamdullah of Amasya (d. 1520) and was considered one of those seven masters.⁷⁸ Other members of the prestigious group included Muhyi al-Din of Amasya, Ibn Jalal, and his younger brother Mawlana Jamal of Amasya (who was likely the "Ibn Jalal al-Din" referred to above in the inventory).⁷⁹ In his *Epic Deeds of the Artists*, Mustafa 'Ali mentions that Muhyi al-Din was known for his excellence in *naskh*.⁸⁰

It is very likely that 'Atufi believed that listing the calligraphers' names would please his patron. After all, Bayezid II himself was an accomplished calligrapher and disciple of the Sufi Shaykh Hamdullah, whose extended family became intimately affiliated with Bayezid's princely court in Amasya, rising to further prominence in the courtly circles of Istanbul after his accession to the throne.⁸¹

Fig. 1. Talismanic shirt made for Bayezid II's brother and rival Cem Sultan. Produced between 14 Zilhicce 881 (March 30, 1477) and 16 Muharrem 885 (March 29, 1480). Cotton, ink, and gold. 123 cm. TSM Padişah Elbiseleri, 13/1404.

Fig. 2. Talismanic skullcap. Cotton, silk, ink, and gold. Sixteenth to seventeenth centuries. Diameter: 17 cm; height: 16 cm. TSM Padişah Elbiseleri, 13/2291b.

Fig. 3. Talismanic skullcap. Cotton, silk, ink, and gold. Sixteenth to seventeenth centuries. Diameter: 18 cm; height: 10 cm. TSM Avadancılar Bölümü, 24/1737.

But beyond the pride of 'Atufi and his patron Bayezid II in possessing works by these prominent calligraphers, it appears that the emphasis on the identity of the calligrapher was intended to further cement the connection between the Qur'anic corpus and prayer books, invocations, and talismanic objects. Indeed, the only other section in the inventory to devote attention to the identity of the calligraphers or calligraphic style is the section on Qur'an manuscripts. 'Atufi also drew on a long tradition of Sufi writings on penmanship and the shape of letters. Ibn Massara and Ibn 'Arabi, for instance, argued that the ideal human being corresponded to *alif*. Ibn 'Arabi added that the universal intellect corresponded to *hamza*, and he believed that the letter *nūn* reflected the lower aspects of reality.⁸²

It seems that the inventory's description of calligraphy and gilded ink was intended to supplement the sensory experience of touch. In other words, for 'Atufi and many of his contemporaries, prayers and talismans could be employed in diverse ways, including bodily engagement with the sacred through various objects.⁸³ Moreover, certain calligraphic styles were thought to

possess special talismanic qualities. The best studied example is the use of linear Kufic script in amulets. As Venetia Porter has observed, in al-Buni's *Shams al-ma'ārif*, linear Kufic appears in a number of drawn amulets. It is very likely that Kufic script had been in use some centuries before.⁸⁴ In the fifteenth- and sixteenth-century Ottoman context, square panels with Kufic script appear in compilations of invocations and talismanic shirts.⁸⁵ It is possible that future studies will reveal special qualities attributed to other scripts.

CONCLUDING REMARK

The section of the inventory that I have focused on in this essay raises important questions: Why were the amulets, talismanic shirts, and skullcaps included in the sultan's library collection? Why were they not placed in a depository where other objects were kept? What can their inclusion in the palace library tell us about the perception of libraries and texts in late-fifteenth- to early-sixteenth-century Istanbul? Clearly, the texts inscribed

on the objects justified their inclusion in the library. But, then, one must reflect on the manner in which these objects may have been used once they became part of the library collection: Did the sultan and/or his intimates wear the talismanic shirts and amulets? Or were these objects archived for their textual qualities, but no longer in use? It is rather difficult to answer these questions, but they are crucial for understanding the processes through which this section of Bayezid II's library inventory came into being.

 8. Noah Gardiner, "The Occult Encyclopedism of 'Abd al-Raḥmān Bisṭāmī," *Mamluk Studies Review* 20 (2017): 25–27.
 9. The work was completed in 1541.
 10. Aḥmad ibn Muṣṭafā Ṭāshkubrī'zāda (Taşköprüzade), *Miftāḥ al-sa'āda wa-miṣbāḥ al-siyāda fī mawḍū'āt al-'ulūm*, 4 vols. (Cairo: Dār al-Kutub al-Ḥaditha, 1968), 2:568. Among the titles he lists under this heading are the works by al-Tamimi, al-Ghazali (d. 1111), and al-Yafī's *al-Durr al-naẓīm fī khawāṣṣ al-Qur'ān al-'aẓīm*. It is worth noting that al-Tamimi's and al-Yafī's titles also appear in the inventory.
- However, Taşköprüzade additionally included the science of the special qualities of the names of God and the Qur'an (*ilm al-khāwaṣṣ*) in the section on the "branches of magic" (*furū' al-sihr*) in his *Miftāḥ*: "The Science of the Special Qualities: this is the science dealing with the special qualities that follow (*mutarattiba*) the readings of the names of God Most High or his Book, including Psalms (*Zabūr*), the Gospel, and the Qur'an. Each of these names and supplications has unique qualities attached to it" (ibid., 1:365).
11. Ibid., 3:33–55.
 12. Ibid., 3:113–81. See also Melvin-Koushki, "Powers of One," 174–76.
 13. Katip Çelebi, *Kashf al-zunūn 'an asāmī al-kutub wa-al-funūn*, 2 vols. (Istanbul: Milli Eğitim Basımevi, 1971–72). Katip Çelebi has fairly detailed entries on the "science of letters and names" (*Kashf al-zunūn*, 1:650–60) and the "science of the famous invocations and revealed supplications" (*Kashf al-zunūn*, 1:200). There is also an incomplete entry on magic squares (*wafq*) (*Kashf al-zunūn*, 2:2017).
 14. Al-Ghazālī, *Invocations & Supplications = Kitāb al-adhkār wa-al-da'wāt: Book IX of the Revival of the Religious Sciences, Iḥyā' 'ulūm al-dīn* (Cambridge: The Islamic Texts Society, 2016). On Ibn 'Arabi and the science of letters, see P. Lory, "The Symbolism of Letters and Language in the Work of Ibn 'Arabi," *The Journal of Muhyiddin Ibn 'Arabi Society* 23 (1998): 32–42; Gerald Elmore, "Four Texts of Ibn al-'Arabi on the Creative Self Manifestation of the Divine Names," *Journal of Muhyiddin Ibn 'Arabi Society* 29 (2001): 1–43; and Michael Ebstein, *Mysticism and Philosophy in al-Andalus: Ibn Masarra, Ibn al-'Arabi and the Isma'ili Tradition* (Leiden: Brill, 2014), 77–119.
 15. Barbara Fleming, "The Sultan's Prayer before the Battle," in *Studies in Ottoman History in Honor of Professor V. L. Menage*, ed. Colin Imber and Colin Heywood (Istanbul: ISIS Press, 1994), 63–75.
 16. Consider, for example, Ebu's-Su'ud Efendi's (d. 1574) *Du'ā'-nāme* (Book of Prayer). In this work, the chief imperial mufti lists prayers for different occasions. Abdullah Kaleli, "*Du'ā'-nāme: İnceleme-Çeviri Yazılı Metin-Özel Adlar Dizini-Tıpkıbasım*" (master's thesis, Adıyaman Üniversitesi, 2014).
 17. McGregor, "On the Literature of Sufi Prayer Commentaries," 201. The term *wird* often refers to Sufi arrangements of standard litanies and supererogatory devotions (in this sense, the *wird* is not unlike *dhikr* and *ḥizb*). *El2*, s.v. "Wird," by F. N. Denny; *El2*, s.v. "Ḥizb"; and *El2*, s.v. "Du'ā'," by L. Gardet.
 18. McGregor, "On the Literature of Sufi Prayer Commentaries," 205.

1. “*Ḥamā’ilu ad’iyatin fī mujalladin*” (An Amulet Containing Prayers in a Binding), 45 {2}.
2. Same as above, 45 {2}.
3. Same as above, 45 {2–3}.
4. Same as above, 45 {3}.
5. Same as above, 45 {3}.
6. “*Ad’iyatu al-ayyāmi al-sab’ati fī mujalladin*” (Prayers for the Seven Days [of the Week], in a Binding), 45 {3–4}. MANUSCRIPT: A manuscript with this title stamped with Bayezid II’s seal is TSMK, R. 82 (Karatay: A 5613). Another manuscript with the same title, allegedly copied by “Yāqūt al-Mu’taṣimī” and stamped with Bayezid II’s seal, is held at the Süleymaniye Library, MS Ayasofya 2765.
7. ‘Alī ibn Abī Ṭalib (d. 661) (attributed to), *Du‘ā’un sayfiyyun fī mujalladin* (The Prayer of the Sword Bearer, in a Binding), 45 {4}.
8. “*Du‘ā’u hazār-yak¹ nām fī mujalladin*” (The Prayer of [God’s] One Thousand and One Names, in a Binding), 45 {4–5}.
9. “*Ḥamā’ilu malfūfun mustadīrun*” (A Round Folded/Wrapped Amulet), 45 {5}.
10. Same as above, 45 {5}.
11. Same as above, 45 {6}.
12. “*Asmā’u ḥusnā bi-khaṭṭi[n] kūf[iyyin] ghayru mujalladin*” ([God’s] Beautiful Names in Kufic Script, without a Binding), 45 {6}.
13. “*Ḥamā’ilu malfūfun mustadīrun fī ghilāfin mustadīrin*” (A Round Folded/Wrapped Amulet, in a Cylindrical [?] Case), 45 {7}.
14. “*Qamişun maktūbun fīhi al-ad’iyatu*” (A [Talismanic] Shirt Inscribed with Prayers), 45 {7–8}.
15. Same as above, 45 {8}.
16. “*Araqiyyatun maktūbun fīhā al-awfāqu*” (A Skullcap Inscribed with Magic Squares), 45 {8–9}.
17. “*Ḥamā’ilu malfūfun mustadīrun*” (A Round Folded/Wrapped Amulet), 45 {9}.
18. “*Naṭ’un a’ṣamu min al-kāghidi fīhi al-awfāqu*” (A Large Paper Sheet/Mat with Magic Squares), 45 {9–10}.
19. “*Ḥamā’ilu malfūfun muthallathun*” (A Triangular Folded/Wrapped Amulet), 45 {10}.
20. Same as above, 45 {10–11}.

21. Same as above, 45 {11}.
22. Same as above, 45 {11–12}.
23. Same as above, 45 {12}.
24. Same as above, 45 {12}.
25. Same as above, 45 {13}.
26. Same as above, 45 {13}.
27. Same as above, 45 {13–14}.
28. Same as above, 45 {14}.
29. Same as above, 45 {14}.
30. Same as above, 45 {15}.
31. “*Ḥamā’ilu malfūfun murabba’un*” (A Square Folded/Wrapped Amulet), 45 {15}.
32. Same as above, 45 {15–16}.
33. “*Naṭ’un ‘aẓīmun min al-kāghidi fihi al-awfāqu*” (A Large Paper Sheet/Mat with Magic Squares), 45 {16}.
34. “*Du’ā’un sayfiyyun malfūfun mustadīrun*” (A Round Folded/Wrapped [Scroll?] [Containing] the Prayer of the Sword Bearer), 45 {16–17}, similar to no. 7 above.
35. “*Ḥamā’ilu malfūfun mustadīrun ‘arīḍun fi ghilāfin a Akhḍara*” (A Wide Folded/Wrapped Round Amulet in a Green Case), 45 {17–18}.
36. “*Kāghidun murabba’un fihi al-awfāqu bi-ghilāfi kāghidin*” (A Square Sheet of Paper Containing Magic Squares, in a Paper Wrap), 45 {18}.
37. “*Lawḥun murabba’un min fiḍḍatin fihi al-awfāqu*” (A Square Silver Tablet Containing Magic Squares), 45 {18–19}.
38. Same as above, 45 {19}.

[46]

39. Same as above, 46 {1}.
40. “*Lawḥun murabba’un min nuḥāsīn fihi al-awfāqu*” (A Square Copper Tablet Containing Magic Squares), 46 {1}.
41. “*Lawḥun mudawwarun min fiḍḍatin mudhahhabun fihi al-awfāqu*” (A Round Silver Tablet Containing Magic Squares), 46 {2}.
42. “*Thalāthatu ajzā’i fiḥā Du’ā’un*” (Three Booklets Containing a Prayer), 46 {2–3}.
43. “*Hazār-yak nām*” ([The Prayer of] One Thousand and One Names), 46 {3}, same as no. 8 above.
44. “*Ḥamā’ilu malfūfun muthallathun*” (A Triangular Folded/Wrapped Amulet), 46 {3}.
45. Same as above, 46 {3}.
46. Same as above, 46 {4}.
47. Same as above, 46 {4}.
48. Same as above, 46 {4–5}.
49. “*Ḥamā’ilu malfūfun muthallathun makhīṭun fi al-ḥarīri*” (A Triangular Amulet Wrapped in Silk), 46 {5}.
50. “*Ḥamā’ilu malfūfun muthallathun makhīṭun fi ḥarīrin lahū ‘ilāqatun min ḥarīrin*” (A Triangular Folded/Wrapped Amulet Wrapped in Silk with a Silk Strap), 46 {5–6}.
51. “*Ḥamā’ilu malfūfun muthallathun*” (A Triangular Folded/Wrapped Amulet), 46 {6}.
52. “*Khashabun mustadīrun ṭūluḥ thalāthatu ashbārīn luffa ‘alayhi arba’a ḥamā’ila bi-al-awfāqi wa-al-ad’iyati*” (A Round Three-Hand-Span-Long Wooden [Cylindrical Case?], Containing Four Amulets [Scrolls?] with Magic Squares and Prayers), 46 {7–8}.

53. "*Ad'iyatun bi-khaṭṭi Yāqūt fi mujalladin*" (Prayers in Yaqut's Hand, in a Binding), 46 {8}.
54. "*Ad'iyatu al-ayyāmi al-sab'ati fi mujalladin*" (Prayers for the Seven Days [of the Week], in a Binding), 46 {8–9}.
55. Same as above, 46 {9}.
56. Same as above, 46 {9–10}.
57. "*Ad'iyatu al-ayyāmi al-sab'ati*" (Prayers for the Seven Days [of the Week]), 46 {10}.
58. Imām Zayn al-Ābidīn 'Alī ibn al-Ḥusayn (d. 710 [?]) (attributed to), *Du'a'un fi makārimi al-akhlāqi 'an Zayn al-Ābidīn -raḍiya Allāhu 'anhu- fi mujalladin* (The Prayer of the Honorable Morals [transmitted from] Zayn al-Ābidīn RA, in a Binding), 46 {10–11}. EDITIONS: Beirut: 'Abd al-Amīr Qabalān, 2007; and a 2002 edition by an unknown publisher in Iran.
59. "*Ad'iyatu al-hayākili al-sab'ati fi mujalladin*" (Prayers of the Seven Temples, in a Binding), 46 {11–12}.
60. "*Ad'iyatun ba'da al-ṣalawāti fi mujalladin bi-khaṭṭi Ibn Jalāl al-Dīn*" (Prayers for after the Ritual Prayers, in a Binding, Transcribed by Ibn Jalāl al-Dīn), 46 {12}. The calligrapher might be the Ottoman scholar/shaykh Muḥyi al-Dīn ibn Jalāl al-Dīn (fl. 15th century).
61. Muṣliḥ al-Dīn Muṣṭafā al-Qunawī, also known as Shaykh Wafā' (Ṣeyh Vefa, d. 1491), *Awrādu al-Shaykh Abī al-Wafā' fi mujalladin* (The Invocations of Shaykh Abū al-Wafā', in a Binding), 46 {13}. The author was the founder of the Zeyniyye branch of the Vefāiyye order. MANUSCRIPTS: Süleymaniye Library (MS Kadızade Mehmed 332; Yazma Bağışlar 1081).
62. "*Du'a'un sayfiyyun fi mujalladin*" (The Prayer of the Sword Bearer, in a Binding), 46 {13}, same as no. 7 above.
63. "*Ad'iyatu al-ayyāmi al-sab'ati fi mujalladin*" (Prayers for the Seven Days [of the Week], in a Binding), 46 {13–14}.
64. "*Risālatu māḥiyu al-dhunūbi fi al-ad'iya wa-al-aḥādīthi*" (A Treatise that Effaces Sins, on Prayers and Hadith), 46 {14–15}.
65. Abū al-Ḥasan 'Alī ibn 'Abd Allāh al-Shādhilī (d. ca. 1258), *Du'a'u ḥizbi al-baḥri wa-ghayruhū bi-khaṭṭi[n] muqatta'in fi mujalladin* (The Prayer of the Litany of the Sea and other [prayers], Written in Single/Cut-out Letters, in a Binding), 46 {15}. EDITIONS: Pishawar: Maktaba-i Akramiyya, 2000; Arrah: [n.p.], 1892. There are numerous published commentaries on this prayer. See GAL 1:449; GAL S, 1:805.
66. "*Du'a'u ḥizbi al-baḥri wa-ghayruhū fi mujalladin*" (The Prayer of the Litany of the Sea and other [prayers], in a Binding, 46 {16}), same as no. 65 above.
67. Ḥamīd al-Dīn Ḥamīd ibn Mūsā Aqsarāi (d. 1402), *Suwaru al-wirdi wa-awrādu al-Shaykh Ḥamīd al-Dīn fi mujalladin* (The Suras of the Invocation and the Invocations of Shaykh Ḥamīd al-Dīn, in a Binding), 46 {16–17}. MANUSCRIPT: Fatih, Millet Kütüphanesi, MS Ali Emiri, Arabi 730.
68. "*Du'a'u Najm al-Dīn al-Kubrā fi mujalladin*" (The Prayer of Najm al-Dīn al-Kubrā, in a Binding), 46 {17}.
69. "*Awrādu al-Shaykh Ḥamīd al-Dīn -quddisa sirruhū- fi mujalladin*" (The Invocation of Shaykh Ḥamīd al-Dīn—May His Mystery Be Hallowed—in a Binding), 46 {17–18}, similar to no. 67 above.
70. 'Alī ibn Shihāb al-Dīn al-Hamadānī (d. 1385), *Ad'iyatu Sayyid 'Alī al-Hamadānī bi-khaṭṭi 'Abd Allāh al-Hirawī fi mujalladin* (The Prayers of Sayyid 'Alī al-Hamadānī, copied by 'Abd Allāh al-Hirawī, in a Binding), 46 {18–19}.
71. "*Risālatu maslaki al-qāṣidīna fi mujalladin*" (The Treatise of the Path of the Intenders, in a Binding), 46 {19}.

[47]

72. Yahyā ibn Sharaf al-Nawawī (d. 1277), *Kitābu ḥilyati al-abrārī fī al-adʿiyati* (The Book of the Jewel of the Pious, on Prayers), 47 {1}. EDITIONS: Beirut: Muʾassasat al-Risāla, 1992; Limassol: al-Jaffān wa-al-Jābī, 2004. GAL 1:397; GAL S 1:617; 2:533; KZ, 1:688–89.
73. “*Kitābu al-ʿuddati ʿinda al-kurabi wa-al-shiddati fī al-adʿiyati wa-al-awfāqi wa-al-juzʿu al-awwalu min Kitābi subuli al-khayrāti min qibali al-naṣīhati fī mujalladin wāḥidin*” (The Book of Equipment for [Times of] Concerns and Trouble [Containing] Prayers and Magic Squares, and the First Part of the Book on the Paths of Good Deeds, Pertaining to [Moral] Advice, Bound in a Single Volume), 47 {1–3}. MANUSCRIPT: TSMK, A. 617 (Karatay: A 5445). GAL S, 2:65.
74. “*Risālatu al-duʿāʾi al-sayfī wa-iʿtiṣāmihī wa-duʿāʾi al-miʿrājī*” (A Treatise [about] the Prayer of the Sword Bearer and His Refuge and The Prayer of the [Prophet’s] Ascension [to Heaven]), 47 {3–4}.
 - 74a. Same as no. 7 above.
 - 74b. Anonymous.
75. “*Risālatu istifādati al-murādāti bi-asmāʾi Allāhi taʿālā ʿalā al-wajhi al-khāṣṣi*” (A Treatise on Seeking Fulfillment of Wishes through the Names of God, from the Perspective of the Special Qualities [of the Qurʾan]), 47 {4–5}. GAL S, 1:772.
76. “*Risālatu asmāʾi Allāhi taʿālā li-maṭāliba shattā*” (A Treatise on the Names of God, Most High, for Different Wishes), 47 {5}.
77. “*Risālatu awrādi al-ṣalāwāti li-Shaykh Waḥā[ʿ] -raḥimahū Allāhu taʿālā*” (A Treatise [Containing] the Invocations of Shaykh Waḥāʿ—May God Bless His Soul), 47 {6}, probably the same as no. 61 above.
78. “*Risālatu khawāṣṣi al-Qurʾāni min qibali al-adʿiyati*” (A Treatise on the Special Qualities of the Qurʾan, Pertaining to Prayers), 47 {6–7}.
79. “*Kitābu al-adʿiyati al-mubārakati al-jalīlati bi-khaṭṭin naḥṣin muḥaqqaqin lam yura mithlahū*” (A Book of Blessed and Exalted Prayers in an Unparalleled Exquisite Muḥaqqaq Script), 47 {7–8}.
80. “*Risālatu wirdin jalīlin wa-duʿāʾin jamīlin*” (A Treatise [Containing] an Exalted Invocation and a Beautiful Prayer), 47 {8}.
81. “*al-Daʿawātu baʿda al-ṣalawāti ʿan al-aʿimmati*” (Supplications for after the Ritual Prayers, Transmitted from the Imams), 47 {9}.
82. “*Risālatun fihā wirdāni naḥṣāni*” (A Treatise Containing Two Exquisite Invocations), 47 {9}.
83. “*Mujalladun fihī daʿawātu al-ṣalawāti wa-al-duʿāʾu al-sayfī wa-sharḥuhū wa-duʿāʾu qarṭhiyyā*” (A Bound Volume Containing Supplications; Prayers; and the Prayer of the Sword Bearer with a Commentary on It; and the Prayer [of Muḥammad ibn Kaʿb ?] al-Qarṭhī), 47 {10}.
 - 83a. For the “Prayer of the Sword Bearer,” see no. 7 above.
 - 83b. The remaining works are anonymous.
84. “*Risālatun fī al-duʿāʾi bi-makārimi al-akhlāqi ʿan Zayn al-ʿĀbidīn -raḍiya Allāhu ʿanhu*” (Treatise Containing a Prayer of the Honorable Morals, [transmitted] by Zayn al-ʿĀbidīn), 47 {11}, same as no. 58 above.
85. “*Adʿiyatun maʿthūratun bi-khaṭṭin naḥṣin*” (Revealed Prayers Written in an Exquisite Script), 47 {12}, possibly Muḥammad ibn Yaʿqūb al-Firūzābādī’s *Adʿiya maʿthūra marwīya ʿan al-nabī*. MANUSCRIPTS: A copy stamped with Bayezid II’s seal is held at the Topkapı Library: TSMK, A. 526 (Karatay: A 5446). Another manuscript with a similar title also has Bayezid II’s seal: TSMK, B. 81 (Karatay: A 5609).
86. “*Daʿawātu al-ṣubḥi wa-daʿawātu al-ayyāmi al-sabʿati bi-khaṭṭi Arghūn*” (Supplications of the Morning and Supplications for the Seven Days [of the Week], copied by Arghūn), 47 {12–13}.

87. "*Risālatu al-musabba'āti al-'ashri bi-khaṭṭi al-dhahabi fī al-ad'iyati*" (A Treatise Containing the Seventeenth [Prayers] in Gold Script, on Prayers), 47 {13}.
88. "*Risālatu khawāṣṣi āyātīn min qibali al-ad'iyati*" (A Treatise on Special Qualities of the [Qur'anic] Verses, Pertaining to Prayers), 47 {14}.
89. "*Kitābu al-Tamīmī fī manāfi'i al-Qur'āni min qibali al-ad'iyati wa-Qaṣīdatu burdata fī mujalladin wāḥidin*" (The Book by al-Tamīmī on the Benefits of the Qur'an, Pertaining to Prayers; and *The Ode of the Mantle [of the Prophet]*, Bound in a Single Volume), 47 {14–15}.
- 89a. Abū 'Abd Allāh Muḥammad ibn Aḥmad ibn Sa'īd al-Tamīmī (d. 980–81), *Manāfi' al-Qur'ān*. MANUSCRIPTS: Beyazıt Library, MS Veliyüddin Efendi 69. See also GAL G 1:237; GAL S, 1:422.
- 89b. Most likely Sharaf al-Dīn Muḥammad ibn Sa'īd al-Būṣīrī's (d. 1296) Qasida. EDITIONS: Damascus: Dār Manābi' al-Nūr, 2004; 'Amman: Wizārat al-Thaqāfa, 2009. See also KZ, 2:1331–36.
90. "*Kitābu ḥilyati al-abrārī fī al-ad'iyati wa-risālatu shu'abi al-īmāni fī mujalladin wāḥidin*" (The Book of the Jewel of the Pious, on Prayers; and the Treatise of the Branches of Faith, Bound in a Single Volume), 47 {15–16}.
- 90a. Same as no. 72 above.
- 90b. Most likely Muḥyī al-Dīn Muḥammad ibn 'Alī Ibn al-'Arabī (d. 1240). KZ, 2:1348. It could also be a work by Aḥmad ibn al-Ḥusayn al-Bayhaqī (d. 1066). EDITIONS OF AL-BAYHAQI: Beirut: Dār al-'Ilmiyya, 1990; Riyadh: Markaz al-Turāth li-al-Barmajjiyyāt, 2012. See KZ, 2:1048.
91. "*Du'ā'u hazār-yak nām*" (The Prayer of One Thousand and One Names [of God]), 47 {16–17}, same as no. 8 above.
92. "*Kitābun fihi du'ā'u hazār-yak nām wa-Sharḥu Chihil nām*" (A Book Containing the Prayer of One Thousand and One Names [of God], and the Commentary of the Forty Names), 47 {17}.
- 92a. Same as no. 8 above.
- 92b. MANUSCRIPTS: Süleymaniye Library (MS Ayasofya 2811-10; MS Ayasofya 377-4; MS Hacı Beşir Ağa 654-53).
93. "*Risālatu da'awāti al-nabī -ṣallā Allāhu 'alayhi wa-sallama*" (A Treatise on Supplications to/for the Prophet SAS), 47 {18}. MANUSCRIPT: A copy with this title bearing Bayezid II's seal is TSMK, A. 518 (Karatay: A 5677).
94. "*Qamiṣun min niqābi al-janīni fihi awfāqun wa-ad'iyatun*" (A Shirt Made of ...? Inscribed with Magic Squares and Prayers), 47 {18–19}.
95. "*Kirbāsun fihi arba'atu suṭūrin min al-āyāti wa-al-ad'iyati*" (A Cotton Fabric/Linen Inscribed with Four Lines of Qur'anic Verses and Prayers), 47 {19}–48 {1}.
- [48]
96. "*Qamiṣun fihi awfāqun wa-ad'iyatun*" (A Shirt Containing Magic Squares and Prayers), 48 {1}.
97. Same as above, 48 {1–2}.
98. "*Sharḥu du'ā'i hazār-yak nām bi-al-'arabiyyati*" (An Arabic Commentary on the Prayer of One Thousand and One Names), 48 {2}.
99. Aḥmad ibn 'Alī ibn Yūsuf al-Būnī (d. 1225) (attributed to), *Kitābu shamsi al-ma'ārifi li-l-Būnī min qibali al-adhkāri wa-al-ad'iyati* (The Sun of Gnosis and Delicacies of Knowledge, by al-Buni, Pertaining to Invocations and Prayers), 48 {2–3}, most likely a version of *Shams al-ma'arif wa-laṭā'if al-'awārif*, a manual on the science of letters (*hurufiyya*). See Gardiner, 16.
100. 'Abd al-Raḥmān ibn Muḥammad al-Biṣṭāmī (d. 1454), *Kitābu shamsi al-āfāqi fī 'ilmi al-awfāqi* (The Book of the Sun of the Horizons, on the Science of Magic Squares), 48 {3–4}. MANUSCRIPTS:

Süleymaniye Library (MS Ayasofya 2807; MS Fatih 3433); TSMK, R. 1743 (Karatay: A 7472). See also KZ, 2:1061; Gardiner, 422.

101. “*Du‘ā’un sayfiyyun bi-khaṭṭi Shaykh-zāda*” (The Prayer of the Sword Bearer, Copied by Shaykh-zāda), 48 {4–5}, same as no. 7 above.
102. “*Du‘ā’un sayfiyyun muqayyadun bi-al-fārisiyyati*” (The Prayer of the Sword Bearer, Written in Persian), 48 {5}, same as no. 7 above.
103. Same as above, 48 {5}.
104. “*Du‘ā’un sayfiyyun*” (The Prayer of the Sword Bearer), 48 {6}, same as no. 7 above.
105. “*Du‘ā’un sayfiyyun ma‘a sharḥihī bi-ḥibri al-dhahabī*” (The Prayer of the Sword Bearer with Its Commentary, Written in Gilded Ink), 48 {6}, same as no. 7 above.
106. “*Du‘ā’un sayfiyyun muqayyadun bi-al-turkiyyati*” (The Prayer of the Sword Bearer, Written in Turkish), 48 {6–7}, same as no. 7 above.
107. “*Du‘ā’u istiftāḥin wa-da‘awātu al-ayyāmi al-sab‘ati*” (The Prayer Opening the Supplications of the Seven Days [of the Week]), 48 {7}.
108. “*Du‘ā’un sayfiyyun*” (The Prayer of the Sword Bearer), 48 {8}, same as no. 7 above.
109. Same as above, 48 {8}.
110. “*Kitābu al-ḥikmatī fi al-ad‘iyati wa-al-maw‘izati bi-al-fārisiyyati*” (The Book of Wisdom, on Prayers and Sermons, in Persian), 48 {8–9}.
111. “*Tafsīru al-asmā‘i al-ḥusnā ma‘a khawāṣṣihā bi-al-fārisiyyati min qibali al-ad‘iyati*” (An Exegesis on the Beautiful Names [Prayer] with Its Special Qualities, in Persian, Pertaining to Prayers), 48 {9–10}.
112. “*Shamsu al-ma‘ārifi li-l-Aḥmad al-Būnī min qibali al-ad‘iyati*” (The Sun of Gnosis by Aḥmad al-Būnī, Pertaining to Prayers), 48 {10}, same as no. 99 above.
113. “*Kitābu asāsi al-‘ulūmi fi ‘ilmi al-ḥurūfi wa-al-awfāqi*” (The Foundation of the Sciences, on the Science of Letters and Magic Squares), 48 {11}.
114. “*Sūratu al-an‘āmi wa-Ḥizbu al-baḥri min qibali al-ad‘iyati*” (The An‘ām Sura and the Litany of the Sea, Pertaining to Prayers), 48 {11–12}. The latter is the same as no. 65 above. MANUSCRIPT: TSMK, K. 968 (Karatay A: 5351) has Bayezid II’s seal.
115. Aḥmad ibn ‘Alī ibn Yūsuf al-Būnī (d. 1225), *Kitābu al-Aḥmad al-Būnī fi kayfiyyati al-‘amal bi-al-asmā‘i wa-al-awfāqi* (A Book by Aḥmad al-Būnī on the Use of the Names and the Magic Squares), 48 {12–13}, possibly his *‘Alam al-hudā wa-asrār al-ihtidā’ fi sharḥ asmā’ Allāh al-ḥusnā*. MANUSCRIPT: Süleymaniye Library, MS Carullah 2083. Alternatively, a treatise titled *Risāla fi kayfiyyat al-‘ilm bi-āyāt al-Qur’ān wa-asmā’ al-ḥusnā*. MANUSCRIPT: Süleymaniye Library, MS Carullah 2083.
116. “*Kitābu al-‘uddati al-kāmilati ‘inda al-shiddati al-shāmilati min qibali al-ad‘iyati*” (The Complete Equipment in the Full Prowess, Pertaining to Prayers), 48 {13–14}, same as no. 73 above.
117. “*Kitābu al-ḥikmatī fi al-ad‘iyati wa-al-maw‘izati bi-al-fārisiyyati*” (The Book of Wisdom, on Prayers and Sermons, in Persian), 48 {14–15}, same as no. 110 above.
118. “*Kitābu Aḥmad al-Būnī fi kayfiyyati al-‘amali bi-al-asmā‘i wa-al-awfāqi*” (The Book by Aḥmad al-Būnī Pertaining to the Manner of Using [God’s] Names and Magic Square), 48 {15–16}, same as no. 115 above.
119. Same as above, 48 {16}.
120. Same as above, 48 {17}.
121. Aḥmad ibn ‘Alī ibn Yūsuf al-Būnī (d. 1225), *Sharḥu al-Asmā‘i al-ḥusnā li-l-Shaykh al-Būnī min qibali al-ad‘iyati* (A Commentary on the Beautiful Names by the Shaykh al-Būnī, Pertaining to Prayers, 48 {17–18}. MANUSCRIPTS: Beyazıt Library, MS Beyazıt 1362; and MS Beyazıt 1377.

- Süleymaniye Library (MS Hamidiya 260; MS Şehid Ali Paşa 427; MS Nurosmeniye 2822). TSMK A. 1494 (Karataş: A 5412) has Bayezid II's seal. See also Gardiner, 411.
122. "*Kitābu al-ḥikmatī wa-al-ad'iyatī wa-al-maw'izati bi-al-fārisiyyati*" (The Book of Wisdom), 48 {18–19}, same as no. 111 above.
123. "*Sab'atu ḥuşūnin li-l-ayyāmi al-sab'ati min al-ad'iyatī bi-khaṭṭi al-Hirawī*" (Seven Strongholds for the Seven Days [of the Week] Copied by al-Hirawī), 48 {19}–49 {1}.
- [49]
124. "*Mukhtaṣaru Kunhi al-murādi fī waḥḍi al-a'dādi*" (An Abridgment of the Essence of the Desired, on Magic Squares and Numbers), 49 {1}, most likely an abridged version of Sharaf al-Dīn 'Alī Yazdī's (d. 1454) work. KZ, 2:1021.
125. Shukr Allāh ibn Aḥmad al-Hasanī, also known as Shukr Allāh Amasyawī (Şükruallah al-Amasi, d. 1464), *Kitābu al-da'awāti alladhī jama'ahū Mawlānā Shukr Allāh* (A Book of Supplications Compiled by Mawlānā Shukr Allāh), 49 {2}. MANUSCRIPTS: Fatih, Millet Kütüphanesi, MS Ali Emiri, Arabi 1924; Süleymaniye Library, MS Ayasofya 2783 and MS Ayasofya 2793.
126. "*Ḥizbu al-baḥri wa-ghayruhū min al-ad'iyatī*" (The Litany of the Sea and Other [Invocations], on Prayers), 49 {2–3}, same as no. 65 above.
127. "*Asmā'u Allāhi ta'ālā alfun wa-wāḥidun wa-Kitābu da'awāti sātī al-layli wa-al-nahāri al-mustajābatī*" (The One Thousand and One Names of God; and a Book of the Answered Supplications for Hours of the Night and Day), 49 {3–4}, possibly the same as no. 8 above.
128. "*Ad'iyatu al-ayyāmi al-sab'ati wa-Risālatu al-aḥādīthi al-mutarjamati bi-al-fārisiyyati al-man-ẓūmati fī mujalladin wāḥidin*" (The Prayers for the Seven Days [of the Week]; and a Treatise on Hadith, Translated into Rhymed Persian, Bound in a Single Volume), 49 {4–5}.
129. "*Ad'iyatu al-ayyāmi al-sab'ati bi-[al-]midādi al-dhahabi*" (The Prayers for the Seven Days [of the Week] in Gilded Ink), 49 {5–6}.
130. "*Du'ā'u al-munājātī bi-al-asmā'i al-ḥusnā*" (A Silent Prayer with the Beautiful Names), 49 {6}.
131. Attributed to Muḥyi al-Dīn Muḥammad ibn 'Alī Ibn al-'Arabī (d. 1240), "*Ad'iyatun wa-Risālatu rijālī al-ghaybi bi-al-fārisiyyati*" (Prayers and a Treatise on the Men of the Unseen in Persian). This is apparently a Persian translation of the original Arabic text. Versions of this text exist in Persian, Turkish, and Arabic. MANUSCRIPTS: Süleymaniye Library (MS Süleymaniye 1028; MS Hüsrev Paşa 905), 49 {7}.
132. "*Ad'iyatu al-ayyāmi al-sab'ati*" (Prayers for the Seven Days [of the Week]), 49 {7}.
133. Same as above, 49 {8}.
134. "*Ḥirzu al-nabī -alayhi al-salāmu- wa-Ḥirzu 'Alī wa-awlādihi -raḍīya Allāhu 'anhum- wa-Ad'iyatu al-ayyāmi al-sab'ati bi-[al-]midādi al-dhahabi fī mujalladin wāḥidin*" (The Amulet of the Prophet AS; and the Amulet of 'Alī and His Progeny RA; and the Prayers for the Seven Days [of the Week], in Gilded Ink, Bound in a Single Volume), 49 {8–9}.
135. "*Du'ā'un sayfiyyun*" (The Prayer of the Sword Bearer), 49 {10}, same as no. 7 above.
136. Probably Aḥmad ibn 'Alī ibn Yūsuf al-Būnī (d. 1225), *Risālatun fī kayfiyyati al-'amali bi-al-ḥurūfi wa-al-asmā'i min qibali al-ad'iyati* (A Treatise on the Use of Letters and the Names [of God], Pertaining to Prayers), 49 {10–11}, possibly the same as no. 115 above.
137. "*Ad'iyatu al-ayyāmi al-sab'ati ma'a wirḍi al-Shaykh Ḥamīd al-Dīn—quddisa sirruhū* (Prayers for the Seven Days [of the Week] with the Invocation of Shaykh Ḥamīd al-Dīn—May His Mystery Be Hallowed), 49 {11–12}.
- 137a. Anonymous.
- 137b. Ḥamīd al-Dīn Ḥamīd ibn Mūsā Aqsarāi (d. 1402), may be the same as no. 67 above.

138. ‘Alī ibn Shihāb al-Dīn al-Hamadānī (d. 1385), *Awradun fathīyyatun li-Amīr Sayyid ‘Alī al-Hamadānī min al-ad‘iyati* (The Invocations of the Conquest by Amīr Sayyid ‘Alī al-Hamadānī), 49 {12}. See KZ, 1:201.
 139. “*Du‘ā’un sayfiyyun*” (The Prayer of the Sword Bearer), 49 {13}, same as no. 7 above.
 140. “*Awradu al-ṣubḥi wa-Du‘ā’u ‘Ukāshā -raḍīya Allāhu ‘anhu*” (The Invocations of the Morning and the Prayer of ‘Ukāshā RA), 49 {13}.
 - 140a. Anonymous.
 - 140b. A prayer attributed to ‘Ukāshā, one of the companions of the Prophet.
 141. “*Du‘ā’u al-ḥājati wa-Du‘ā’un sayfiyyun wa-risālatu al-aḥādīthi fī ḥaqqi al-Qur’āni al-‘aẓīmi*” (The Prayer to [fulfill] the Need [of the Supplicant]; and The Prayer of the Sword Bearer; and a Treatise Containing Hadith on the Truth of the Great Qur’an), 49 {14}.
 - 141a. Anonymous.
 - 141b. Same as no. 7 above.
 - 141c. Anonymous.
 142. “*Du‘ā’u al-ṣalāti ‘alā al-nabī wa-risālatun min qibali al-tafsīri*” (A Prayer to [?] the Prophet and a Treatise, Pertaining to [Qur’anic] Exegesis), 49 {15}. Both anonymous.
 143. Aḥmad ibn ‘Alī ibn Yūsuf al-Būnī (d. 1225) possibly?, “*Risālatu al-ḥijābi al-‘aẓīmi min al-āyāt wa-al-ad‘iyati*” (A Treatise on the Great Veil on [Qur’anic] Verses and Prayers), 49 {15–16}.
 144. “*Ad‘iyatu al-ayyāmi al-sab‘ati*” (The Prayer for the Seven Days [of the Week]), 49 {16}.
 145. “*Miftāḥu al-najāhi min du‘ā’i Amīr al-Mu’minīn ‘Alī -raḍīya Allāhu ta‘ālā ‘anhu*” (The Key of Success, [part] of the Prayer of the Commander of the Believer ‘Alī RA), 49 {16–17}.
 146. “*Da‘awātun*” (Supplications), 49 {17}.
 147. “*Du‘ā’un sayfiyyun wa-Sharḥu Chihil nām fī mujalladin wāḥidin*” (The Prayer of the Sword Bearer; and a Commentary on the Forty Names, Bound in a Single Volume), 49 {18}.
 - 147a. Same as no. 7 above. Commentary anonymous.
 - 147b. Seems to be the same as no. 92b above.
 148. “*Ad‘iyatu al-ayyāmi al-sab‘ati wa-mukhtaṣarun fī ‘ilmi al-akhlāqi fī mujalladin wāḥidin*” (Prayers for the Seven Days [of the Week] and an Abridgement of the Science of Ethics, Bound in a Single Volume), unidentified, 49 {18–19}.
 149. “*Du‘ā’un sayfiyyun ma’a sharḥihī*” (The Prayer of the Sword Bearer with Its Commentary), 49 {19}. Same as no. 7 above, with anonymous commentary.
 150. “*Ad‘iyatu al-ayyāmi al-sab‘ati wa-al-da‘awātu ba‘da al-ṣalāti fī mujalladin wāḥidin*” (Prayers for the Seven Days [of the Week]; and Supplications for after the Ritual Prayer, Bound in a Single Volume), 49 {19}–50 {1}.
- [50]
151. “*Sharḥu Chihil nām bi-al-fārisiyyati fī al-ad‘iyati*” (A Commentary on the Forty Names, in Persian, on Prayers), 50 {1}. May be the same as no. 92b above.
 152. “*Du‘ā’u hazār-yak nām*” (The Prayer of One Thousand and One Names), 50 {1–2}. Same as no. 8 above.
 153. “*Ad‘iyatu al-ayyāmi al-sab‘ati wa-Risālatu rijālī al-ghaybi fī mujalladin wāḥidin*” (The Prayers for the Seven Days [of the Week] and a Treatise on the Men of the Unseen, Bound in a Single Volume), 50 {2}.
 - 153a. Anonymous.
 - 153b. Same as no. 131 above.
 154. “*Juz’un fīhi ad‘iyatun*” (A Booklet Containing Prayers), 50 {3}.

155. "*Kitābun fī al-ad'iyati wa-ādābihā wa-sharā'īhā*" (A Book of Prayers, and Their Etiquette, and Their Conditions [for Valid Recitation]), 50 {3}.
156. *Kitābu al-tamīmī fī manāfi' al-Qur'āni al-'azīmi min qibali al-ad'iyati* (al-Tamimi's Book on the Benefits of the Great Qur'an, Pertaining to Prayers), 50 {3–4}. Same as no. 89a above.
157. "*Ad'iyatu al-ayyāmi al-sab'ati*" (Prayers for the Seven Days [of the Week]), 50 {4–5}.
158. "*Ad'iyatu al-thuluthi al-akhīri min al-layālī*" (Prayers for the Last Third of the Nights), 50 {5}.
159. "*Kitābu shamsi al-ma'ārifi li-l-Būnī fī al-ad'iyati*" (The Sun of Gnosis and Delicacies of Knowledge, Pertaining to Prayers), 50 {5–6}. Same as no. 99 above.
160. 'Alī ibn Shihāb al-Dīn al-Hamadānī (d. 1385), *Risālātun fī al-awrādi al-faḥḥiyyati wa-Risālātun fī al-da'awāti allatī ba'da al-ṣalāti fī mujalladin wāhidin* (A Treatise on the Conquest Invocation; and a Treatise on Supplications after the Ritual Prayers, Bound in a Single Volume), 50 {6–7}.
161. "*Kitābu awrādi Shaykh Wafā['] fī al-ad'iyati*" (The Book of Invocations of Shaykh Wafā'), 50 {7}. Same as no. 61 above.
162. Aḥmad ibn 'Alī ibn Yūsuf al-Būnī (d. 1225), *Kitābu mūdīhi al-ṭarīqi bi-asmā'i Allāhi ta'ālā li-l-Būnī min qibali al-ad'iyati* (The Book That Clarifies the Path on the Names of God, Most High, by al-Būnī, Pertaining to Prayers), 50 {7–8}. An alternate title is *'Alam al-hudā wa-asrār al-ihtidā' fī sharḥ asmā' Allāh al-ḥusnā*. See Gardiner, 422–24.
163. Aḥmad ibn 'Alī ibn Yūsuf al-Būnī (d. 1225), *Kitābu al-Būnī min qibali al-ad'iyati* (A Book by al-Būnī, Pertaining to Prayers), 50 {8–9}.
164. NOTES

1. The manuscript has a *kasra*, either for *izāfe* or reading: *yik*; also at 46 {3}, 47 {17}, 48 {2}, etc.
2. The definite article here is redundant, as it cannot come before a name.
3. Erroneous definite article, as both *midād* and *dhahab* are nouns.

THE *KALĀM* (RATIONAL THEOLOGY) SECTION IN THE PALACE LIBRARY INVENTORY

Upon the order of Bayezid II (r. 1481–1512), Khayr al-Din Khidr (Hayreddin Hızır), known by the epithet ‘Atufi,¹ undertook the task of overhauling the Topkapı Palace Library collection and cataloguing its books in 1502–3.² He identified the name of each book and determined its scholarly discipline, noted this information on the binding and the title page (*zahrīyya*) of each book, and recorded the same information in an inventory he completed in 1503–4.³

Taken together, ‘Atufi’s inventory and the notes he left in the books of the library are fruitful sources for researchers. They show that, at the time of cataloguing, the library consisted of the volumes Bayezid II had acquired over the course of his reign up until 1503–4 and during his earlier years as prince-governor in Amasya (1455–81), as well as the books that his father Mehmed II (r. 1444–46 and 1451–81) had already gathered in the palace library.⁴ An examination of the inventory allows us a glimpse into the Ottoman sultans’ preferences for collecting books and organizing them in a library. It also opens a window into the intellectual environment of the period by showing which books were in circulation and which books were esteemed in different branches of learning in the center of the Ottoman empire.

In this essay, I will focus on the works in the *kalām* (rational theology) section of the library.⁵ The list of the books in this section, titled “Section on the Principles of Religion, i.e., Rational Theology” (*Taḥṣīl Kutub ‘Ilm Uṣūl al-Dīn, ay ‘Ilm al-Kalām*, MS Török F. 59, 56–68), includes 188 volumes. Of these, 157 contain a single work, and 31 are compendiums (*majmū‘as*) consisting of multiple works, at least one of which treats topics related to *kalām*. I will first describe and comment on ‘Atufi’s efforts to organize and catalogue the books. Then I will

present my own observations on the variety of *kalām* works in the library; the use of Arabic, Persian, and Turkish in them; and the representation of the works by Ottoman scholars in this section. Afterward, I discuss different groups of books and make suggestions about their significance by considering the number of copies and their location within the *kalām* subsections. Finally, I will reflect on the purpose of the palace library and the uses of the books collected in it.

CATALOGUING AND ORGANIZING THE BOOKS

In his Turkish introduction to the inventory, ‘Atufi describes the principles he followed in arranging the books after he had determined their names and disciplines (see translation in Appendix IV). The task of categorizing the books by discipline required him to make some difficult choices, as many of the books could be categorized under more than one discipline, and the compendiums (*majmū‘as*) often included works from multiple separate disciplines. ‘Atufi appears to have attempted to ensure that locating these books would be as easy as possible. If there were multiple copies of a volume with connections to two disciplines, for example, one copy would be placed in the section of each discipline. In the same vein, if a *majmū‘a* included a rare copy of a book or a frequently requested book, then it would be placed in the section of the discipline of that particular book.⁶ In this way, ‘Atufi decided which books would be placed in which section. The fifth section of the library comprised *kalām* works.⁷

‘Atufi normally wrote the original title of each book as given by its author, or what could be surmised as such,

on the title page of the volume as well as in the inventory. In some cases, he gave the alternative titles popular at the time, either alone or together with the original title. For example, he recorded Siraj al-Din ‘Ali ibn ‘Uthman al-Ushi’s (d. 1179) creed in verse, *Bad’ al-Amālī* (The Beginning of the Dictations), as *Qaṣīda Yaḳūl al-‘Abd* (The Verse of “The Servant of God Says”), a popular alternative title drawn from a phrase at the beginning of the work.⁸ Similarly, ‘Atufi gave both *Sharḥ al-Hidāya* and *Mawlānāzāda* as titles for Mawlanazada Ahmad’s commentary (*sharḥ*) on Athir al-Din al-Abhari’s (d. 1265?) *Hidāya al-Ḥikma* (The Guidance to Wisdom).⁹ In some cases, however, ‘Atufi failed to determine the original or alternative titles of the books in the collection and instead gave them generic titles based on their disciplines, such as *Kitāb fī ‘Ilm al-Kalām* (A Book on the Science of *Kalām*), *Risāla min Qibal ‘Ilm al-Kalām* (A Treatise pertaining to the Science of *Kalām*), or *Kitāb Naḥṣ Mukhtasar fī ‘Ilm al-Kalām* (An Excellent Abridged Book on the Science of *Kalām*).¹⁰

‘Atufi appears to have been inconsistent in recording the names of authors. For example, he recorded Nasir al-Din al-Tusi (d. 1273) as the author of the two copies of *Matn al-Tajrīd* (The Text of the Abstraction),¹¹ but chose not to note Sa’d al-Din al-Taftazani (d. 1390) as the author of the six copies of *Matn al-Maqāṣid* (The Text of the Goals). In the case of multiple commentaries and supercommentaries (*ḥāshiya*) on the same text by several authors, it is often only possible to distinguish between the different works on the basis of the author’s name.¹² In such cases, ‘Atufi’s performance was uneven. Whereas he listed ‘Ali al-Jurjani, known as al-Sayyid al-Sharif al-Jurjani (d. 1413), as the author of six copies of *Sharḥ al-Mawāqif* (The Commentary on the Stations)¹³ and identified ‘Ala’ al-Din al-Qushji (‘Ali Kuşçu d. 1474) as the author of two copies of *Sharḥ al-Tajrīd* (The Commentary on the Goals),¹⁴ he recorded at least six supercommentaries on *Sharḥ al-Mawāqif* without naming their authors.¹⁵ Additionally, in one exceptional case ‘Atufi seems to have misidentified the author of *al-As’ila wa-l-Ajwiba al-Rashidiyya* (The Questions and Answers of Rashid) by Rashid al-Din Fadl Allah (d. 1318) as Nazam, who was probably the scribe of the copy in the collection.¹⁶

‘Atufi appears to have included two primary groups of books—at least as far as their scholarly disciplinary features were concerned—in the *kalām* section. The first group consists of books falling within the science of *kalām* (*fī ‘ilm al-kalām*). Apparently, these books followed the conventions of the science of *kalām* in terms of its mode of discourse and the selection of topics. Generally speaking, this science dealt with philosophical topics such as epistemology, metaphysics, and physics from an Islamic perspective. These topics were examined with a rational mode of argumentation such that the discourse was nearly indistinguishable in form from philosophical texts. The science of *kalām* also addressed questions concerning the godhead, prophethood, and eschatology. The discussion of these questions, which may arguably be called theology proper, was more clearly informed by scriptural sources (i.e., the Qur’an and the Sunna).¹⁷ At least 151 of the books (as single-work volumes or as sections in *majmū‘as*, multiple copies included) in the *kalām* section belong to this group. Among them are, for example, ‘Umar al-Nasafi’s (d. 1142) *Matn al-‘Aqā’id* (The Text of the Creed) and its commentary by Sa’d al-Din al-Taftazani; ‘Adud al-Din al-Ijī’s (d. 1355) *Mawāqif* (The Stations) and *Jawāhir al-Kalām* (The Jewels of Rational Theology); and Shams al-Din Muhammad al-Samarqandi’s (d. 1303) *al-Ṣaḥā’if* (The Pages).¹⁸

The second group can be characterized as works that took some of the methods of the science of *kalām* as a starting point but did not necessarily stay within its conventional boundaries in terms of topic and discourse. These are labeled “pertaining to the science of *kalām*” (*min qibal ‘ilm al-kalām*). Forty-one of the books (as single-work volumes or as sections in *majmū‘as*, multiple copies included) in the section are categorized as such. In the main, they deal with the refutation of the views of philosophers, debates among different Muslim groups, and polemics against Jews and Christians. For example, Abu Hamid al-Ghazali’s (d. 1111) *Tahāfut al-Falāsifa* (The Incoherence of Philosophers), which sought to refute some of the ideas of Muslim philosophers by showing their inconsistency, belongs to this group,¹⁹ as does his *al-Tafrīqa bayn al-Zandaqa wa-l-Īmān* (Distinguishing Heresy from Correct Faith), which aimed to delimit the boundaries of acceptable beliefs

and to identify heretics.²⁰ Also included in this group are *Al-Risāla al-Hādiya fī Ibtāl Ḥujaj al-Yahūd ‘alā al-Islām* (The Treatise that Guides to the Right Path on Undermining the Proofs of Jews against Islam) and *Risāla al-Ḥujaj ‘alā al-Naṣārā* (The Treatise of Proofs against Christians), whose titles reveal their goal of refuting the ideas of Jews and Christians, respectively.²¹

Aside from these two groups, ‘Atufi physically placed and catalogued several other books in the *kalām* section. For example, he included four volumes on the classification of sciences, in which the science of *kalām* (*‘ilm al-kalām*) is treated as the first science. These are Fakhr al-Dīn al-Rāzī’s (d. 1210) *Ḥadā’iq al-Anwār fī al-‘Ulūm al-Sittīn* (The Gardens of Light: Sixty Sciences),²² two copies of his *Jāmi‘ al-‘Ulūm fī Arba‘in ‘Ilman* (Compendium of Forty Sciences),²³ and Abu Hamid al-Ghazali’s *Yawāqūt al-‘Ulūm fī Thalāthīn ‘Ilman* (The Rubies of Thirty Sciences).²⁴ In addition, he placed Sadr al-Sharī‘a’s (d. 1346) *Ta’dīl al-‘Ulūm* (Rectifying Sciences) in this section and categorized it as a book of both logic and *kalām* (*fī al-manṭiq wa-l-kalām*).²⁵ Moreover, a *majmū‘a*, which consists of treatises on the subject matter of scholarly disciplines, was placed in this section and identified as combining features of both the science of *kalām* and philosophy (*min qibal ‘ilm al-kalām wa-l-ḥikma*).²⁶ Furthermore, some works categorized as belonging to various other sciences, such as Sufism, chemistry, astronomy, geometry, philosophy, logic, and medicine, have been placed in this section, as they were bound in a *majmū‘a* together with a *kalām* work.

SCOPE OF WORKS IN THE *KALĀM* SECTION

A cursory look at the *kalām* section reveals that it was not intended to be comprehensive. It neither represents the diverse history of Islamic *kalām* scholarship nor does it provide an all-inclusive collection of a particular school, period, or author. Many significant *kalām* works, such as Abu Mansur al-Maturīdī’s (d. 944) *Kitāb al-Tawḥīd* (The Book of Monotheism) or Jalal al-Dīn al-Dawwānī’s (d. 1502) *kalām* works, are not included in the section, even though Ottoman scholars were definitely aware of them from the copies in the other sections of this library inventory or in other libraries in

Istanbul and elsewhere.²⁷ But rather than dwelling on the question of what was not included in the library, I will limit my comments to some general observations on the variety of authors, periods of composition, languages, and schools in the works represented in the section under consideration.

The *kalām* section includes the works of more than forty authors. Some of these authors produced more than one work related to the discipline. For example, eleven of Abu Hamid al-Ghazali’s works and seven of Fakhr al-Dīn al-Rāzī’s works are represented in this section. Some of the books are listed in multiple copies. Among the authors with the highest number of works represented in this section are Sa’d al-Dīn al-Taftazānī (nineteen copies), Abu Hamid al-Ghazali (seventeen copies of eleven different works), al-Sayyid al-Sharīf al-Jurjānī (eight copies), Fakhr al-Dīn al-Rāzī (eight copies), ‘Adud al-Dīn al-Ijī (six copies), and Nasir al-Dīn al-Tusi (six copies).

As for the dates of composition of works in the *kalām* section, the oldest are probably Abu al-Hasan al-Ash‘arī’s (d. 935–36) *Maqālāt al-Islāmiyyīn* (Theological Opinions of Muslims),²⁸ Imam al-Haramayn al-Juwaynī’s (d. 1085) *al-Irshād* (The Guidance),²⁹ and Abu Hamid al-Ghazali’s works. All other *kalām* works—at least those for which a rough date of composition can be determined—were authored after the twelfth century.

In the *kalām* section, ‘Atufi lists eight authors from Ottoman-era Anatolia and the Balkans (the lands of *Rūm*), namely, Khayali Shams al-Dīn Ahmad (Hayali Şemseddin Ahmed, d. 1470–71), ‘Ala’ al-Dīn al-Qushjī (d. 1474), Hasan Çelebi (d. 1486), Khwajazada Muslih al-Dīn (Hocazade, d. 1487–88), Yusuf Kirmastī (d. 1494), Khatibzade Muhyi al-Dīn (Hatibzade, d. 1496), ‘Ala’ al-Dīn al-‘Arabi (d. 1496), and Kamal al-Dīn Isma‘il al-Qaramani. This section also includes some works of *Rūmī* authors whose identities ‘Atufi could not or did not determine. For example, he listed the author of *Ḥāshiya al-Mawāqif* (Supercommentary on the Stations) as “one of the *Rūmī* professors”³⁰ and recorded a *majmū‘a* as “consisting of treatises...of the dignitary scholars (*mawālī*) of *Rūm*.”³¹

It is possible to determine the language of most of the works in the *kalām* section. Although a great majority of them are written in Arabic—the primary language of

religious scholarly studies in the Islamic world—some works in the section are written in (or translated into) Persian or Turkish. Seventeen of the works in this section are in Persian. Eleven of these are categorized as directly related to the science of *kalām* (*fi 'ilm al-kalām* or *min qibal 'ilm al-kalām*), four of them are works on the classification of sciences, and the other two are a *Qaṣīda* (Poem) and *Sharḥ Qaṣīda-i Burda* (Commentary on the Poem of the Mantle), whose disciplines are not given in the inventory. There are also two works in Turkish in this section. Both are translations of *Bad' al-Amāli* (The Beginning of the Dictations) and are likely two copies of the same work.

As for the representation of the different *kalām* schools, the diversity of the library's collection in this regard is apparent. The majority of works in the section under consideration were authored by followers of the Ash'ari school, including Imam al-Haramayn al-Juwayni, Abu Hamid al-Ghazali, Fakhr al-Din al-Razi, Nasir al-Din al-Baydawi (d. 1286), 'Adud al-Din al-Iji, Sa'd al-Din al-Taftazani, and al-Sayyid al-Sharif al-Jurjani. A significant number of works, however, were written by authors associated with the Maturidi school, including Abu al-Mu'in al-Nasafi (d. 1115), 'Umar al-Nasafi, Siraj al-Din 'Ali ibn 'Uthman al-Ushi, and Sadr al-Shari'a. Moreover, the works of several authors known for their Isma'ili leanings, such as Nasir al-Din al-Tusi and Ibn Mutahhar al-Hilli, are also represented in this section.

To sum up, although this section does not represent a comprehensive collection of *kalām* works, it does include works from a variety of authors, languages, and schools. This would seem to indicate the existence of a scholarly interest in diverse approaches by authors from different periods and schools. In addition, this section showcases the willingness of scholars from Ottoman lands to contribute to the discipline of *kalām* and the recognition of their scholarship by the Ottoman sultans during the late fifteenth and early sixteenth centuries.

ARRANGEMENT OF WORKS IN THE *KALĀM* SECTION

One might inquire as to how the works 'Atufi catalogued were organized within their particular section. If there

was a plan, can we identify it? What does it tell us? The layout of the *kalām* section in the inventory indicates that a certain amount of planning did go into the arrangement of the books.³² It seems that those *kalām* works that were in wide circulation in the Ottoman centers of learning, and especially those that were taught as part of the madrasa curriculum, were given precedence.

As far as the location of books within the section is concerned, it is possible to divide the *kalām* works listed therein into two broad categories:

1. The 87 volumes that occupied the primary space included copies of one of the following seven works.³³ Each of these seven works formed a group, in some cases with subgroups of texts, commentaries, and supercommentaries. Each group and subgroup was distinguished from those that came before and after it with a blank space.
 - a. *Al-Maqāṣid* (The Goals): This was written by the famous Ash'ari scholar, Sa'd al-Din al-Taftazani, who subsequently wrote a commentary on his own work. Six copies of his original text are recorded first in the *kalām* section.³⁴ After a blank space, seven copies of his commentary on his own book and a copy of the partial supercommentary by a certain Sinan al-Din are listed.³⁵
 - b. *Al-Mawāqif* (The Stations): The author of this work is 'Adud al-Din al-Iji. Two copies of his text and an index of it (*Fihrist al-Mawāqif*) are recorded as a separate subgroup after the aforementioned *al-Maqāṣid* and its commentaries. Al-Sayyid al-Sharif al-Jurjani's commentary on al-Iji's text seems to have been very important. Six copies of this commentary and another commentary, whose author is not given, constitute a separate subgroup. In addition, thirteen copies of supercommentaries on various commentaries of *al-Mawāqif* are recorded as a distinct subgroup. The titles of supercommentaries show that some of them were partial; some included criticisms, and others were written to answer the criticisms.³⁶
 - c. *Al-Tajrīd* (The Abstraction): Its author is the Isma'ili scholar Nasir al-Din al-Tusi. In the

inventory, two compendiums, including copies of *al-Tajrīd*, constitute a subgroup. Three commentaries on *al-Tajrīd* by Shams al-Din al-Isfahani (d. 1349), Ibn al-Mutahhar al-Hilli, and ‘Ala’ al-Din al-Qushji (two copies) form another subgroup, as do six supercommentaries on various commentaries of *al-Tajrīd* by different authors.³⁷

- d. *Ṭawālī‘ al-Anwār* (The Appearances of the Lights): This work was composed by the Ash‘ari scholar Nasir al-Din al-Baydawi. In the inventory, four copies of his text and an abridgment (*mukhtaṣar*) of it constitute one subgroup. In addition, six commentaries and three supercommentaries each constitute subgroups.³⁸
- e. *‘Aqā’id al-Nasafi* (The Creed of al-Nasafi): The author of the text is the Maturidi scholar ‘Umar al-Nasafi. Two copies of the original text with a single copy of its versification by Tajzada (Tacizade) Sa‘di Çelebi (d. 1516) constitute a subgroup in the inventory. It seems that al-Nasafi’s work became famous after al-Taftazani wrote a commentary on it. Seven copies of commentaries, two of which were certainly written by al-Taftazani, and five volumes, including supercommentaries on *‘Aqā’id al-Nasafi*, each form separate subgroups.³⁹
- f. *Bad’ al-Amālī* (The Beginning of the Dictations): The author is the Maturidi scholar Siraj al-Din ‘Ali ibn ‘Uthman al-Ushi. In the inventory, five volumes, including two translations of al-Ushi’s text into Turkish and three commentaries on it, have their own group.⁴⁰
- g. *Tahāfut al-Falāsifa*: This famous book about the inconsistency and invalidity of some of the ideas of philosophers was written by Abu Hamid al-Ghazali. Four volumes, including copies of this book, constitute a separate group.⁴¹
2. The 100 volumes positioned in the secondary space in this section of the inventory include copies of *kalām* works other than the aforementioned seven

works and their commentaries. These volumes seem to have been organized in a somewhat erratic fashion on the basis of a varying set of criteria, alternating between author, genre, form, and particular work. No blank space is left between the different groups of works.

- a. Refutation of the ideas of philosophers and heretics (four volumes).⁴²
- b. *A majmū‘a*, consisting of correspondence between Sadr al-Din al-Qunawi (d. 1274) and Nasir al-Din al-Tusi (one volume).⁴³
- c. Refutation of the beliefs of Christians and Jews (seven volumes).⁴⁴
- d. *A majmū‘a*, consisting of two of Abu Hamid al-Ghazali’s works; a treatise whose author ‘Atufi does not identify; and *Hilya al-Abdāl* (The Jewel of Sufis), which was probably written by Muhyi al-Din ibn al-‘Arabi (d. 1240) (one volume).⁴⁵
- e. Two works by Fakhr al-Din al-Razi (two volumes).⁴⁶
- f. Works by Shams al-Din al-Samarqandi and commentaries on them (seven volumes).⁴⁷
- g. Works by Fakhr al-Din al-Razi and commentaries on them (five volumes).⁴⁸
- h. Works on the classification of sciences (four volumes).⁴⁹
- i. Various works on and pertaining to the science of *kalām* (*fī ‘ilm al-kalām* and *min qibal ‘ilm al-kalām*) for which the criteria of placement are hard to identify (twenty-one volumes). This group includes works by Nasir al-Din al-Tusi, Sadr al-Shari‘a, Fakhr al-Din al-Razi, Taj al-Din Muhammad ibn ‘Abd al-Karim al-Shahristani (d. 1153), ‘Adud al-Din al-Iji, Ala’ al-Din al-‘Arabi, Shihab al-Din al-Qarafi (d. 1285), Ahmad al-Kashi, and Imamzada Muhammad ibn Abi Bakr (d. 1177).⁵⁰
- j. Works by Sayf al-Din al-Amidi (d. 1233) (four volumes).⁵¹
- k. Various works that relate to the science of *kalām*, with the writings of Qutb al-Din al-Shirazi (d. 1311), Siraj al-Din Mahmud al-Urmawi (d. 1283), Fakhr al-Din al-Razi, Imam al-Haramayn al-Juwayni, ‘Adud al-Din al-Iji,

Rashid al-Din Fadl Allah, Abu al-Hasan al-Ash'ari, and Abu Hamid al-Ghazali placed one after another (thirty-eight volumes).⁵² I have failed to ascertain any particular rationale in the placement of these volumes.

1. *Majmū'as*, with at least one work related to *kalām* (seven volumes).⁵³

It is clear that the reason for the prime location of the seven books and their commentaries in the first category is not chronological sequence, number of copies, the reputation of the author, or the disciplinary features of the works themselves. The second category contains some works with older dates than the ones in the first category (such as Imam al-Haramayn al-Juwayni's *al-Irshād* from the eleventh century). The second category also contains a number of works with multiple copies (such as the six volumes of Shams al-Din Muhammad al-Samarqandi's *al-Ṣaḥā'if* and its commentary *al-Ma'ārif*), and the works of such luminaries as Fakhr al-Din al-Razi and Sadr al-Shari'a, which indicates that neither the number of copies of a work nor the reputation of its author served as the basis of the division between the primary and secondary categories. The distinction between *fi 'ilm al-kalām* and *min qibal 'ilm al-kalām*, relating to the disciplinary features of the works, also fails to explain the arrangement of the books within the section, as the second category includes examples from both.

It is plausible to suggest an alternative rationale that differentiates the first category from the second. This rationale rests on the relevance of these seven *kalām* works to the madrasa education system, which was sponsored and regulated by the Ottoman government; these works were thus frequently requested and consulted by professors and students. This factor might have led 'Atufi to place these seven titles in a more prominent position. He probably expected that new copies of these books would be added, which explains why he left blank spaces (in the inventory and thus in the library) between different groups and subgroups.

A closer look at these seven works and their circulation in the Ottoman capital(s) in the late fifteenth and early sixteenth centuries reveals that three of them—*al-Tajrīd*, *Ṭawālī' al-Anwār*, and *al-Mawāqif* (together with their commentaries and supercommentaries)—consti-

tuted essential parts of the curriculum of the madrasas associated with the Ottoman scholarly bureaucracy at the time.⁵⁴ We do not have conclusive evidence for the use of *'Aqā'id al-Nasafi*, *al-Maqāṣid*, or *Tahāfut al-Falāsifa* as textbooks in the madrasas,⁵⁵ but their popularity among the scholars of the time is obvious. For example, Khayali Shams al-Din Ahmad (d. 1470–71) wrote a supercommentary on al-Taftazani's commentary of *'Aqā'id al-Nasafi* and also wrote a supercommentary on *al-Maqāṣid*; Khatibzada Muhyi al-Din (Hatibzade Muhyiddin, d. 1495–96) wrote a commentary on *al-Maqāṣid*; and Tajzada Sa'di Çelebi (Tacizade) versified *'Aqā'id al-Nasafi*.⁵⁶ Several Ottoman scholars, including Khajazada Muslih al-Din, 'Ala al-Din al-Tusi (d. 1482), and Ibn Kamal (Kemalpaşazade, d. 1534), wrote commentaries on *Tahāfut al-Falāsifa*.⁵⁷ As for the seventh work in the category, *Bad' al-Amālī* was probably important for the teaching of *kalām* subjects at the pre-madrasa level and in non-madrasa institutions. The fact that the work was translated into Turkish suggests that it was used for teaching *kalām* topics to the public.⁵⁸

In short, the placement of the books in the library and in the inventory was probably carefully planned. The most widely circulated books among scholars were placed in a primary position within the library, while other works, including many important writings by outstanding scholars, occupied the secondary spaces.

PURPOSE OF THE PALACE LIBRARY

The foregoing account has shown that at the turn of the sixteenth century, the Topkapı Palace Library boasted a valuable collection of *kalām* works, including works in Arabic, Persian, and Turkish from the tenth to sixteenth centuries by scholars who followed different schools. 'Atufi examined all the books in the library to catalogue and divide them into different sections according to their disciplines. But what was the purpose of going to such lengths to catalogue and organize these books at the time? Did Bayezid II simply want to have an inventory of the books that were stored in his treasury, and thus assigned 'Atufi to prepare it? Or did Bayezid have some other purpose in mind? Here, I will reflect primarily on the *kalām* section in an attempt to reveal the goal

of devoting a separate section to *kalām* works and organizing them.

‘Atufi’s use of the expression “the possibility of a book’s being requested” (*istenmek / maṭlūb olmak*) several times in his introduction to the inventory indicates that people actively used the library and could request and consult the books within it (see Appendix IV).⁵⁹ The inventory was probably meant to facilitate library users’ access to the books. Who were these users? The available evidence does not indicate a definite answer to this question. We can, however, make some educated guesses in this regard, relying on our knowledge of the people in the Topkapı Palace and the scholarly world beyond it.

The sultan and his family members would have had access to any book in the palace library, whether for leisure reading or educational purposes, but it is highly probable that others also benefited from the library. This is indicated by the fact that there were multiple copies of certain books in the library, some of which lacked the decoration—gilding, illustrations, or embellishments—that would be expected of a book that had been prepared for members of the royal family.⁶⁰ The palace personnel included learned individuals with different needs and interests; one can well imagine a chief physician or astronomer taking an interest in one of the manuscripts, for example.⁶¹ In addition, the male and female servants of the sultan received training not only in the services they would provide for the sultan and his household, but also in such various fields as religion, military science, language, and music.⁶² They might also have consulted some of the *kalām* texts in the library. However, it is not plausible that multiple copies of advanced *kalām* texts like *Sharḥ al-Mawāqif* and *Ḥāshiya al-Tajrīd* were prepared for the occasional use of a limited number of learned personnel in the palace.

So, apart from the royal family, the palace personnel or servants, who else might have used the *kalām* section of the Topkapı Palace library? The answer to this question, it appears to me, lies in the fact that this section accorded a primary place to books that served as textbooks in the madrasas of the official scholarly system and to other books that were esteemed by the scholars in this system. This suggests that books in the *kalām* section were also intended to serve the needs of the madrasas and their scholarly personnel. For example, Bayezid

II probably sent some of the books in the palace library to the library of the complex he established in Edirne (1488).⁶³ He likely made similar donations to the libraries of his two other complexes in Amasya (1484) and Istanbul (1505).

In addition, considering the prevalence of the practice of reading, studying, and copying books inside madrasa libraries, as well as the existence of a system for lending books for use outside these libraries during the fifteenth and sixteenth centuries,⁶⁴ it would not be far-fetched to surmise that scholars outside the palace had the opportunity to consult at least some of the books in the palace library, although I have not found any specific evidence of a particular scholar having done so.

In short, the sources currently at our disposal do not provide direct information about the rationale for maintaining a palace library with a fairly large *kalām* section, the organization of the books within it, or how and by whom they were used. However, this analysis of ‘Atufi’s inventory and the evidence it provides about the order of the books in the palace library, together with external evidence regarding the use of books in Ottoman public libraries, suggests that some of the books in the palace library would likely have been accessible to scholars inside or outside the palace and donated to madrasa libraries. It would therefore be useful to study manuscripts in major collections codicologically in order to determine, on the basis of imperial seals, for instance, whether they were ever in the palace library, and if so, when.⁶⁵

NOTES

1. For a brief biographical sketch of ‘Atufi, see Ahmad Tashkobrizada *al-Shaqā’iq al-Nu‘māniyya fī ‘Ulamā’ al-Dawla al-Uthmāniyya*, ed. Ahmed Subhi Furat (Istanbul: İstanbul Üniversitesi Edebiyat Fakültesi Yayınları, 1985), 416–17.
2. For information on the establishment of the Topkapı Palace Library during Mehmed II’s reign (1451–81), see İsmail E. Erünsal, *Osmanlılarda Kütüphaneler ve Kütüphanecilik* (Istanbul: Timaş, 2015), 96–98.
3. Hungarian National Library, MS Török F. 59, 12 {11}.
4. There are two clues that can be used to determine whether a particular volume was present in the palace library in 1503–4: (1) Bayezid II’s almond-shaped seal on one of the first and/or last pages of the volume, and (2) the title of the work on the *zahrīyya* page and binding of the volume written in ‘Atufi’s distinctive handwriting. The note

- sancaktan gelen* (a book that came from the province) in a copy of *Kitāb Kashf al-Murād fī Sharḥ Tajrīd al-I'tiqād* (The Book of Discovering the Purpose: A Commentary on the Abstraction of the Faith), which bears Bayezid II's seal (SK, Ayasofya 2347), indicates that he acquired it when he was the governor of the province of Amasya. In addition, there are several volumes with Bayezid's seal that show a copying date during the reigns of his predecessors, who most probably had acquired them. For example, see TSMK, A. 1907, A. 1789. For a reference to a volume, which Murad II (r. 1420–44 and 1446–51) had once owned, see MS Török F. 59, 55 {13–14}.
5. I am disinclined to use “theology” as a translation for *kalām*, but in cases where I thought it necessary to translate the term, I use “rational theology.” On the problematic issue of rendering *kalām* in English, see Tim Winter, “Introduction,” in *The Cambridge Companion to Classical Islamic Theology*, ed. Tim Winter (New York: Cambridge University Press, 2008), 2–4.
 6. ‘Atufi gives the example of Abu Hamid al-Ghazali’s *Bidāya al-Hidāya* (The Beginning of the Guidance) as a book that could be classified under either jurisprudence (*‘ilm fiqh*) or Sufism (*taṣawwuf*). For this, see MS Török F. 59, 5 {15–19}, 6 {1–4}.
 7. The four preceding sections were devoted, respectively, to the scriptures (*al-maṣāḥif*), books of Qur’anic exegesis and variant readings of the Qur’an (*kutub al-tafāsīr wa-kutub ‘ilm al-qirā’a*), books of hadith and hadith reporters (*kutub al-aḥādīth wa-kutub asmā’ al-rijāl*), and books of prayers and those concerned with special attributes of the particular chapters of the Qur’an and talismans (*kutub al-ad’iya wa-kutub khawāṣṣ al-Qur’ān wa-kutub ‘ilm al-wafq*).
 8. MS Török F. 59, 62 {3–4}. For information about this work, see *Türkiye Diyanet Vakfı İslam Ansiklopedisi* (hereafter *TDVİA*), s.v. “el-Emālī,” by M. Sait Özervarlı.

 22. MS Török F. 59, 64 {16–17}. See SK, Ayasofya 1759.
 23. MS Török F. 59, 64 {17–19}. See SK, Ayasofya 2205.
 24. MS Török F. 59, 65 {1}. See SK, Ayasofya 4351.
 25. MS Török F. 59, 65 {2–3}.
 26. MS Török F. 59, 67 {16}, 67 {18}, 68 {1}. See SK, Ayasofya 2391.
 27. Mu’ayyadzada (Müeyyeddade) ‘Abd al-Rahman (d. 1516) studied under al-Dawwani in Shiraz and returned to the Ottoman capital around 1483. Mu’ayyadzada brought a multitude of books, probably including al-Dawwani’s works, to Istanbul. For Mu’ayyadzada’s study under al-Dawwani, see Judith Pfeiffer, “Teaching the Learned: Jalāl al-Dīn al-Dawānī’s *İjāza* to Mu’ayyadzāda ‘Abd al-Rahmān Efendi and the Circulation of Knowledge between Fārs and the Ottoman Empire at the Turn of the Sixteenth Century,” in *The Heritage of Arabo-Islamic Learning: Studies Presented to Wadad Kadi*, ed. Maurice A. Pomerantz and Aram A. Shahin (Leiden: Brill, 2015), 284–332. For Mu’ayyadzada’s library and its fate after his death, see Erünsal, *Osmanlılarda Kütüphaneler*, 123–24; also see Pfeiffer’s essay in this volume.
 28. MS Török F. 59, 67 {6}. The work referred to here is recorded as *Kitāb al-Maḳālāt al-Islāmiyya* (The Book of the Islamic Opinions) in the inventory but no author is given. Thus, it might be a different work than the one by al-Ash’ari.
 29. MS Török F. 59, 66 {16–17}. In the inventory, this work is registered under the title *Kitāb al-Irshād* (The Book of Guidance) but again no author is given. Thus, while it is likely that this is al-Juwayni’s *al-Irshād*, this is not certain.
 30. MS Török F. 59, 57 {16–17}.
 31. MS Török F. 59, 67 {18}, 68 {1}.
 32. In his Turkish introduction, ‘Atufi strongly implies that the order of books in the inventory somehow reflects the physical arrangement of the library: “*The Rule of the Repository* is

- that section headings (*tefāṣīl*) enumerated in the register's table of contents are written on top of each repository in exactly the same way" (*Ḳānūn-i maḥzen-i kütüb oldur ki her maḥzenün üzerinde defterde fihrist olan tefāṣīl bi-'aynihi yazılır*). MS Török F. 59, 9 {14–15}. For a translation of the introduction, see Appendix IV at the end of this volume.
33. As we have no information about the physical infrastructure of the library, it is not possible to delimit the mode of precedence of these volumes, i.e., whether they were placed on the top, bottom, right, or left shelves.
 34. After the copies of *al-Maqāṣid*, a single copy of *Tabṣira fi 'Ilm al-Kalām* is listed, but in different handwriting, which suggests it was a later addition to the inventory. Therefore, it is not considered in the categorization of *kalām* works according to their location in the inventory and thus in the library.
 35. MS Török F. 59, 56 {2–5}, 56 {8–13}. For more information about *al-Maqāṣid* as well as its commentaries and supercommentaries, see *TDVİA*, s.v. “el-Makāsīd,” by Mustafa Sinanoğlu.
 36. MS Török F. 59, 56 {17–19}, 57 {2–19}, 58 {1–6}.
 37. *Ibid.*, 58 {8–17}, 59 {3–9}.
 38. *Ibid.*, 59 {13–17}, 59 {18–19}, 60 {1–3}, 60 {5–7}.
 39. *Ibid.*, 60 {11–14}, 60 {18–19}, 61 {1–19}.
 40. *Ibid.*, 62 {3–9}.
 41. *Ibid.*, 62 {11–17}.
 42. *Ibid.*, 63 {6–9}.
 43. *Ibid.*, 63 {11–13}.
 44. *Ibid.*, 63 {13–19}, 64 {1}.
 45. *Ibid.*, 64 {1–4}. This *majmū'a* is probably the volume that bears Bayezid II's seal and is located in SK, Ayasofya 2200. If so, the treatise with the unidentified author is Abu Hamid al-Ghazali's *al-Munqidh min al-Ḍalāl*.
 46. MS Török F. 59, 64 {4–6}.
 47. *Ibid.*, 64 {6–12}.
 48. *Ibid.*, 64 {13–16}.

 54. Al-Sayyid al-Sharif al-Jurjani's *Hāshiya al-Tajrīd*, a supercommentary on Shams al-Din al-Isfahani's (d. 1349) commentary on *al-Tajrīd*, was a required textbook in some madrasas, which in turn became known as the madrasas of *Hāshiya al-Tajrīd*. For references to these madrasas using this nomenclature from ca. 1523, see TSMA, D. 8823.1, 1b, 2a, 5b, 8a, 9a, 20a. An imperial decree from 1537 mandated the study of Shams al-Din al-Isfahani's *Maṭālī' al-Anzār*, a commentary on Ṭawālī' *al-Anwār*. For this, see Ahmed Akgündüz, *Osmanlı Kanunnâmeleri ve Hukukî Tahlilleri*, 11 vols. (Istanbul: FEY Vakfı/Osmanlı Araştırmaları Vakfı, 1990–96), 4:667–69 and Yasemin Beyazıt, *Osmanlı İlmîyye Mesleğinde İstihdam (XVI. Yüzyıl)* (Ankara: Türk Tarih Kurumu, 2014), 36–37. 'Ali al-Jurjani's commentary, *Sharḥ al-Mawāqif*, was a required text in the Ottoman madrasas in the early sixteenth century. For Ahmad Tashkobrizada's study and pedagogical use of this text as well as the commentaries and supercommentaries on *al-Tajrīd* and Ṭawālī' *al-Anwār* in the madrasas, see his autobiography in *al-Shaqā'iq al-Nu'māniyya*, 552–60. For general observations on the textbooks of the Ottoman madrasas at different levels, see İsmail Hakkı Uzunçarşılı, *Osmanlı Devletinin İlmîye Teşkilâtı* (Ankara: Türk Tarih Kurumu Basımevi, 1965; repr. 1988), 19–31. See also Abdurrahman Atçıl, *Scholars and Sultans in the Early Modern Ottoman Empire* (Cambridge: Cambridge University Press, 2017), 172–74, 191–94; Shahab Ahmed and Nenad Filipović, “The Sultan's Syllabus: A Curriculum for the Ottoman Imperial Medreses Prescribed in a *Fermān* of Qānūnī I Süleymān, Dated 973 (1565),” *Studia Islamica* 98/99 (2004): 183–218.
 55. Uzunçarşılı cites *al-Maqāṣid* among the textbooks in use in the Ottoman madrasas. For this, see Uzunçarşılı, *İlmîye Teşkilâtı*, 26.

LIST OF ENTRIES

SECTION ON BOOKS ON PRINCIPLES OF RELIGION, I.E., RATIONAL THEOLOGY

(Taḫṣīṣu kutubi ‘ilmi uṣūli al-dīn ay ‘ilm al-kalāmi)

1. Sa’d al-Dīn al-Taftāzānī (d. 1390). *Kitābu matni al-maqāṣidi fī ‘ilmi al-kalāmi* (Goals), Arabic, 56 {2}. MANUSCRIPTS: TSMK, A. 1789 (with Bayezid II’s seal); TİEM, MS 1820 (with Bayezid II’s seal); SK, Carullah 1264 (with Bayezid II’s seal) includes al-Taftāzānī’s notes in his own handwriting and was once owned by ‘Abd al-Raḥmān b. ‘Alī al-Muayyad (d. 1516).
2. Same as 1, 56 {2–3}.
3. Same as 1, 56 {3}.
4. Same as 1, 56 {3–4}.
5. Same as 1, 56 {4}.
6. Same as 1, 56 {4–5}.
7. Abū al-Mu‘īn al-Nasafī (d. 1115). *Tabṣīratun fī ‘ilmi al-kalāmi* (Insight), Arabic, 56 {5}. EDITIONS: Abū al-Mu‘īn al-Nasafī. *Tabṣīrat al-Adilla fī Uṣūl al-Dīn: ‘Alā Ṭarīq al-Imām Abī Maṣṣūr al-Māturīdī*, ed. Claude Salamé. Damascus: Institut Français de Damas, 1990. Abū al-Mu‘īn al-Nasafī. *Tabṣīrat al-Adilla fī Uṣūl al-Dīn*, ed. Hüseyin Atay and Şaban Ali Düzgün. Ankara: Diyanet İşleri Başkanlığı, 2003.
8. Sa’d al-Dīn al-Taftāzānī (d. 1390). *Kitābu sharḥi al-Maqāṣidi fī ‘ilmi al-kalāmi* (Commentary of the Goals), Arabic, 56 {8}. MANUSCRIPT: SK, Carullah 1230, a copy in Khājjazāda Muṣliḥ al-Dīn’s handwriting; a seal on the ṣahīḥ page is scratched. EDITIONS: Sa’d al-Dīn al-Taftāzānī. *Sharḥ al-Maqāṣid: Maqāṣid fī ‘Ilm al-Kalām li Sa’d al-Dīn ‘Umar al-Taftāzānī*. [Istanbul]: [Maṭb.] al-Ḥājj Muḥarrām Efendi al-Bosnawī, 1887. Sa’d al-Dīn al-Taftāzānī. *Sharḥ al-Maqāṣid*, ed. ‘Abd al-Raḥmān ‘Umayra. Beirut: ‘Ālam al-Kutub, 1989.
9. Same as 8, 56 {9}.
10. Same as 8, 56 {9–10}.
11. Same as 8, 56 {10}.
12. Same as 8, 56 {10–11}.
13. Same as 8, 56 {11}.
14. Same as 8, 56 {12}.
15. Mawlānā Sinān al-Dīn. *Kitābu ḥāshiyati Sharḥi al-Maqāṣidi fī mabāḥithi al-nubuwwati wa-al-imāmati fī ‘ilmi al-kalāmi* (Supercommentary on the Commentary of the Goals: The Chapters of Prophethood and Leadership), Arabic 56 {12–13}.
16. ‘Aḍud al-Dīn al-Ījī (d. 1355). *Kitābu matni al-mawāqifi fī ‘ilmi al-kalāmi* (Stations), Arabic, 56 {17}. EDITIONS: ‘Aḍud al-Dīn al-Ījī. *Kitāb al-Mawāqif*. Cairo: Maṭba‘at al-Sa‘āda, 1907. ‘Aḍud al-Dīn al-Ījī. *Kitāb al-Mawāqif*, ed. ‘Abd al-Raḥmān ‘Umayra. Beirut: Dār al-Jīl, 1997.
17. *Majmū‘atun* (Compendium) containing:
 - 17a. ‘Aḍud al-Dīn al-Ījī (d. 1355). *Kitābu jawāhiri al-kalāmi fī ‘ilmi al-kalāmi* (Gems of Kalām), Arabic, 56 {17–18}.
 - 17b. ‘Aḍud al-Dīn al-Ījī (d. 1355). *Kitābu matni al-mawāqifi fī ‘ilmi al-kalāmi* (Stations), Arabic, 56 {18}.
18. “*Kitābu fihristi al-Mawāqifi fī ‘ilmi al-kalāmi*” (Index of the Stations), Arabic, 56 {19}.
19. ‘Alī Jurjānī (al-Sayyid al-Sharīf al-Jurjānī) (d. 1413). *Kitābu sharḥi al-Mawāqifi fī ‘ilmi al-kalāmi* (Commentary of the Stations), Arabic, 57 {2}. MANUSCRIPT: SK, Ayasofya 2329 (with Bayezid

- II's seal). EDITIONS: 'Alī Jurjānī (al-Sayyid al-Sharīf al-Jurjānī). *Şerhu'l-Mevâkıf: Mevâkıf Şerhi*, ed. and trans. Ömer Türker. Istanbul: Türkiye Yazma Eserler Kurumu Başkanlığı, 2015.
20. Same as 19, 57 {3}.
 21. Same as 19, 57 {3–4}.
 22. Same as 19, 57 {4–5}.
 23. Same as 19, 57 {5–6}.
 24. Same as 19, 57 {6}.
 25. Same as 19, 57 {7}.
 26. Khājazāda Muşlīh al-Dīn (d. 1488). *Kitābu ḥāshiyati Sharḥi al-Mawāqifi fi 'ilmi al-kalāmi* (Supercommentary of the Commentary on the Stations), Arabic, 57 {12–13}.
 27. Kamāl al-Dīn Ismā'īl al-Qaramānī. *Kitābu ḥāshiyati Sharḥi al-Mawāqifi fi 'ilmi al-kalāmi* (Supercommentary of the Commentary on the Stations), Arabic, 57 {13–14}.
 28. Ḥasan Çelebi (d. 1486). *Kitābu ḥāshiyati Sharḥi al-Mawāqifi fi 'ilmi al-kalāmi* (Supercommentary of the Commentary on the Stations), Arabic, 57 {14–15}. MANUSCRIPT: TSMK, A. 1914 (with Bayezid II's seal). EDITIONS: Ḥasan Çelebi. *Sharḥ al-Mawāqif li-l-Qādī 'Aḍud al-Dīn 'Abd al-Raḥmān al-Ījī*. Beirut: Dār al-Kutub al-'Ilmiyya, 1998 (together with other supercommentaries on *al-Mawāqif*). Ḥasan Çelebi. *Al-Mu'jam al-Mawḍū'ī li-Sharḥ al-Mawāqif wa-Ḥāshiyatay al-Siyāl-kūtī wa-al-Jalabī*. Qum: Markaz Abḥāth Dā'irat Ma'ārif al-'Ulūm al-'Aqliyya al-Islāmiyya, 2011 (together with the original text, al-Ījī's *Mawāqif*, and other supercommentaries on it).
 29. Same as 28, 57 {15–16}.
 30. Sinān al-Dīn Yūsuf 'Ajāmī. *Kitābu ḥāshiyati Sharḥi al-Mawāqifi fi 'ilmi al-kalāmi* (Supercommentary of the Commentary on the Stations), Arabic, 57 {16–17}. MANUSCRIPT: TSMK, A. 1823 (with Bayezid II's seal).
 31. "*Kitābu ḥāshiyati Sharḥi al-Mawāqifi fi baḥthi al-'illati wa-al-ma'lūli fi 'ilmi al-kalāmi*" (Supercommentary of the Commentary on the Stations: The Chapters of the Cause and the Caused), Arabic, 57 {17–18}.
 32. "*Kitābu ḥāshiyati Sharḥi al-Mawāqifi fi 'ilmi al-kalāmi*" (Supercommentary of the Commentary on the Stations), Arabic, 57 {19}. MANUSCRIPTS: SK, Ayasofya 2237 (with Bayezid II's seal); SK, Ayasofya 2241 (with Bayezid II's seal).
 33. "*Kitābu ḥāshiyati Sharḥi al-Mawāqifi fi 'ilmi al-kalāmi*" (Supercommentary of the Commentary on the Stations), Arabic, 57 {19}–58 {1}.
 34. "*Kitābu ḥāshiyati Sharḥi al-Mawāqifi fi 'ilmi al-kalāmi*" (Supercommentary of the Commentary on the Stations), Arabic, 58 {1–2}.
 35. "*Ḥāshiyatu Sharḥi ilāhiyyāti al-Mawāqifi fi 'ilmi al-kalāmi*" (Supercommentary of the Commentary on the Stations: The Chapter of Theology), Arabic, 58 {2}. MANUSCRIPT: SK, Ayasofya 2329 (with Bayezid II's seal).
 36. "*Majmū'atun min al-ḥawāshī fi 'ilmi al-kalāmi awwaluhā Ḥāshiyatu Sharḥi dibajati al-Mawāqifi*" (Compendium of Supercommentaries, the first of which is the Supercommentary on the Commentary of the Introduction of the Stations), Arabic, 58 {3}.
 37. "*Risālatu al-as'lati 'alā sharḥi al-Sayyid al-Sharīf li-l-Mawāqifi fi 'ilmi al-kalāmi*" (Treatise of the Questions for the Commentary on the Stations by al-Sayyid al-Sharīf), Arabic, 58 {4}.
 38. "*Risālatun fi al-aḥwibati 'an i'tirāḍāti Mawlānā Kastallu [Molla Kestelli] 'alā al-Mawāqifi wa-sharḥihī fi 'ilmi al-kalāmi*" (Treatise of the Answers to the Objections of Mawlana Kastallu to the Stations and Its Commentary), Arabic, 58 {5–6}.
 39. Naṣīr al-Dīn al-Ṭūsī (d. 1274). *Kitābu matni al-tajrīdi fi 'ilmi al-kalāmi* (Abstraction), Arabic, 58 {8}. EDITIONS: Naṣīr al-Dīn al-Ṭūsī. *Tajrīd al-'Aqā'id*, ed. 'Abbās Sulaymān. Alexandria: Dār al-

Ma'rifa al-Jāmi'iyya, 1996. Naşir al-Dīn al-Ṭūsī. *Tajrīd al-I'tiqād*, ed. Muḥammad Jawād Ḥusaynī Jalālī. Qum: Maktab al-ʿIlām al-Islāmī, 1986.

40. *Majmū'atun* (Compendium) containing:
 - 40a. Naşir al-Dīn al-Ṭūsī (d. 1274). *Kitābu matni tajrīdi al-'aqā'id fi 'ilmi al-kalāmi* (Abstraction of Creed), Arabic, 58 {8–9}.
 - 40b. Naşir al-Dīn al-Ṭūsī (d. 1274). *Kitābu qawā'id al-'aqā'id fi 'ilmi al-kalāmi* (Principles of Creed), 58 {9–10}. EDITION: Naşir al-Dīn al-Ṭūsī. *Risālat Qawā'id al-'Aqā'id*, ed. 'Alī Ḥasan Khāzim. Beirut: Dār al-Ghurba, 1992.
 - 40c. Abū Naşr al-Fārābī (d. 950). *Risālatu al-Fārābī fi al-ḥikmatī* (Treatise of al-Farabi), Arabic, 58 {10}.
41. Shams al-Dīn al-Isfahānī (d. 1349). *Kitābu sharḥi al-Tajrīdi al-mawsūmu bi-Tashdīdi al-qawā'id fi 'ilmi al-kalāmi* (Strengthening the Principles: A Commentary on the Abstraction), Arabic, 58 {14–15}. MANUSCRIPT: SK, Şehzade Mehmed 58 (with Bayezid II's seal). EDITION: Shams al-Dīn al-Isfahānī. *Sharḥ Tajrīd al-'Aqā'id*. Tabriz: As'ad Kitābfurūsh, 1883. (Together with Naşir al-Dīn al-Ṭūsī's *Matn al-Tajrīd*.)
42. Ibn al-Muṭahhar al-Ḥillī (d. 1325). *Kitābu kashfi al-murādi fi sharḥi Tajrīdi al-i'tiqādi fi 'ilmi al-kalāmi* (Discovering the Purpose: Commentary on the Abstraction of Creed), Arabic, 58 {15–16}. MANUSCRIPT: SK, Ayasofya 2347 (with Bayezid II's seal). EDITIONS: Ibn al-Muṭahhar al-Ḥillī. *Kashf al-Murād fi Sharḥ Tajrīd al-I'tiqād*, Taşnīf Naşir al-Dīn Muḥammad b. al-Ḥasan al-Ṭūsī. Beirut: Mu'assasat al-ʿIlāmī, 1988 (together with other supercommentaries on *Matn al-Tajrīd*). Ibn al-Muṭahhar al-Ḥillī. *Kashf al-Murād: Sharḥ-i Tajrīd al-I'tiqād*. Tehran: Kitābfurūshī-yi Islāmiyya, 1997 (together with other supercommentaries on *Matn al-Tajrīd*). Ibn al-Muṭahhar al-Ḥillī. *Tarjumah va-sharḥ-i Kashf al-Murād*, ed. and trans. 'Alī Shīrvānī. Qum: Dār al-'Ilm, 2004.
43. 'Alā' al-Dīn al-Qūshjī (d. 1474). *Kitābu sharḥi al-Tajrīdi fi 'ilmi al-kalāmi* (Commentary on the Abstraction), Arabic, 58 {16–17}. MANUSCRIPT: SK, Turhan Valide Sultan 196 (with Bayezid II's seal). EDITION: 'Alā' al-Dīn al-Qūshjī. *Hādhā Sharḥ Tajrīd al-kalām*. [Tabriz?], 1883.
44. Same as 43, 58 {17}.
45. 'Alī Jurjānī (al-Sayyid al-Sharīf al-Jurjānī) (d. 1413). *Kitābu ḥāshiyati al-Sayyid al-Sharīf 'alā sharḥi Shams al-Dīn al-Isfahānī li-l-Tajrīdi fi 'ilmi al-kalāmi* (Supercommentary by al-Sayyid al-Sharīf of the Commentary of Shams al-Dīn al-Isfahani on the Abstraction), Arabic, 59 {3–4}. MANUSCRIPT: TSMK, A. 1879 (with Bayezid II's seal); SK, Şehzade Mehmed 55 (with Bayezid II's seal).
46. Mawlānā Khaṭīb-zāda (d. 1496). *Kitābu ḥāshiyati Ḥāshiyati al-Sayyid al-Sharīf li-sharḥi al-Tajrīdi fi 'ilmi al-kalāmi* (Supercommentary of the Supercommentary of al-Sayyid al-Sharīf on the Abstraction), Arabic, 59 {4–5}.
47. Şadr al-Dīn al-Shīrāzī. *Kitābu ḥāshiyati Şadr al-Dīn 'alā sharḥi 'Alā' al-Dīn al-Qūshjī li-l-Tajrīdi fi 'ilmi al-kalāmi* (Supercommentary by Şadr al-Dīn of the Commentary of 'Alā' al-Dīn al-Qūshjī on the Abstraction), Arabic, 59 {5–6}. MANUSCRIPT: TSMK, A. 1889 (with Bayezid II's seal).
48. Al-Naşir al-Dīn al-Ḥillī (d. 1325?). *Kitābu ḥāshiyati al-Naşir al-Ḥillī 'alā sharḥi al-Tajrīdi li-l-Isfahānī fi 'ilmi al-kalāmi* (Supercommentary by al-Nasir al-Hilli of the Commentary on the Abstraction by al-Isfahani), Arabic, 59 {7}. MANUSCRIPT: TSMK, A. 1741 (with Bayezid II's seal).
49. "*Sharḥu dībājati Sharḥi al-Tajrīdi fi 'ilmi al-kalāmi*" (Commentary on the Introduction of the Commentary on the Abstraction), Arabic, 59 {8}.
50. "*Kitābu ḥāshiyati sharḥi al-Qūshjī li-l-Tajrīdi fi 'ilmi al-kalāmi*" (Supercommentary of the Commentary by al-Qushji on the Abstraction), Arabic, 59 {8–9}.

51. Al-Bayḍāwī (d. 1286). *Kitābu matni ṭawālī'i al-anwāri fi 'ilmi al-kalāmi* (Appearances of the Lights), Arabic, 59 {13}. MANUSCRIPT: SK, Ayasofya 2334 (with Bayezid II's seal). EDITIONS: al-Bayḍāwī. *Matn Ṭawālī' al-Anwār fi 'Ilm al-Mantiq wa-al-Ḥikma wa-al-Tawḥīd*. [Cairo]: Maṭba'at al-Mu'ayyad, 1991. Al-Bayḍāwī. *Tavāli'u'l-Envār = Kelam Metafizigi: (metin-çeviri)*, ed. and trans. İlyas Çelebi and Mahmut Çınar. Istanbul: Türkiye Yazma Eserler Kurumu Başkanlığı, 2014. Al-Bayḍāwī. *Nature, Man and God in Medieval Islam: 'Abd Allah Baydawi's Text, Tawālī' al-Anwar min Matalī' al-Anzar along with Mahmud Isfahani's Commentary Matalī' al-Anzar, Sharh Tawālī' al-Anwar*, ed. and trans. Edwin E. Calverley and James W. Pollock, 2 vols. Leiden: Brill, 2002.
52. Same as 51, 59 {13–14}.
53. *Majmū'atun* (Compendium) containing:
 - 53a. Al-Bayḍāwī (d. 1286). *Kitābu matni al-ṭawālī'i fi 'ilmi al-kalāmi* (Appearances of the Lights), Arabic, 59 {14}.
 - 53b. "Al-fannu al-thālithu min al-Muṭawwālī fi al-badī'i fi al-ma'ānī" (Third Chapter of the Comprehensive Book), Arabic, 59 {14–15}.
54. "*Kitābu al-nūri al-ṭālī'i mukhtaṣari al-Ṭawālī'i fi 'ilmi al-kalāmi*" (Rising Light: Abridgement of the Appearances), Arabic, 59 {15–16}.
55. *Majmū'atun min kutubi al-funūni awwaluhā Kitābu al-ṭawālī'i fi 'ilmi al-kalāmi* (Compendium containing Books on the Sciences, the first of which is the Appearances [by al-Bayḍāwī, d. 1286]), Arabic, 59 {16–17}.
56. Muḥammad al-Bukhārī (d. after 1382). *Kitābu sharḥi Ṭawālī'i al-anwāri fi 'ilmi al-kalāmi* (Commentary on the Appearances), Arabic, 59 {18}.
57. "*Kitābu sharḥi al-Ṭawālī'i fi 'ilmi al-kalāmi*" (Commentary on the Appearances), Arabic, 59 {19}.
58. Shams al-Dīn al-Iṣfahānī (d. 1349). *Kitābu maṭālī'i al-anzāri fi sharḥi Ṭawālī'i al-anwāri fi 'ilmi al-kalāmi* (Ascensions of the Ideas: Commentary on the Appearances), Arabic, 59 {19}–60 {1}. MANUSCRIPT: SK, Ayasofya 2294 (with Bayezid II's seal). EDITIONS: Shams al-Dīn al-Iṣfahānī. *Maṭālī' al-Anzār 'alā Ṭawālī' al-Anwār*. Istanbul: 1305/1887–88. Shams al-Dīn al-Iṣfahānī. *Hādihā Kitāb Sharḥ Maṭālī' al-Anzār*. Cairo: al-Maṭba'a al-Khayriyya, 1905. (Together with al-Bayḍāwī's *Matn Ṭawālī' al-Anwār*.)
59. "*Kitābu sharḥi al-Ṭawālī'i fi 'ilmi al-kalāmi*" (Commentary on the Appearances), Arabic, 60 {1–2}.
60. Same as 59, 60 {2}.
61. Same as 58, 60 {3}.
62. "*Kitābu ḥāshiyati sharḥi al-'Ibrī li-l-Ṭawālī'i fi 'ilmi al-kalāmi*" (Supercommentary of al-'Ibrī's Commentary on the Appearances), Arabic, 60 {5}.
63. Same as 62, 60 {5–6}.
64. Mawlānā Kirmāstī (d. 1495/96). *Kitābu lawāmi'i al-afkārī fi taḥshiyati Maṭālī'i al-anzāri li-Mawlānā Kirmāstī fi 'ilmi al-kalāmi* (Glittering Ideas: The Supercommentary of the Ascensions of the Ideas), Arabic, 60 {6–7}.
65. *Majmū'atun* (Compendium) containing:
 - 65a. 'Umar al-Nasafī (d. 1142). *Kitābu matni al-'aqā'id fi 'ilmi al-kalāmi* (Creed), Arabic, 60 {11}. EDITION: 'Umar al-Nasafī. *'Aqā'id al-Nasafī*. Istanbul: Hacı Muharrem Efendi Matbaası, 1847.
 - 65b. "*Risālatu ādābi al-baḥthī*" (Treatise on the Art of Disputation), 60 {11}.
 - 65c. "*Risālatun fi al-ṭibbī*" (Treatise on Medicine), 60 {11–12}.
66. *Majmū'atun* (Compendium) containing:
 - 66a. Umar al-Nasafī (d. 1142). *Kitābu matni al-'aqā'id fi 'ilmi al-kalāmi* (Creed), Arabic, 60 {12}.
 - 66b. Mawlānā-zāda. *Kitābu matni Mawlānā-zāda al-musammā bi-al-Hidāyati fi al-ḥikmatī*

(Guide to Wisdom), Arabic, 60 {13}. ('Aṭūfī seems to have made a mistake here, as Mawlānā-zāda is the author of *Sharḥ al-Hidāya*, not *al-Hidāya*.)

67. Al-Makhdūm Mawlānā Tāj-zāda Sa'dī (d. 1516). *Kitābu naẓmi matni al-'Aqā'id fi 'ilmi al-kalāmi* (Versification of the Creed), Arabic, 60 {14}. MANUSCRIPT: TSMK, A. 1777 (with Bayezid II's seal).
68. Sa'd al-Dīn al-Taftāzānī (d. 1390). *Kitābu sharḥi al-'Aqā'id fi 'ilmi al-kalāmi* (Commentary on the Creed), Arabic, 60 {18}. EDITIONS: Sa'd al-Dīn al-Taftāzānī. *Sharḥ 'Aqā'id al-Nasafī*. Istanbul: Matba'a-i Āmire, 1271. Sa'd al-Dīn al-Taftāzānī. *Sharḥ al-'Aqā'id al-Nasafīyya*, ed. Aḥmad Ḥijāzī al-Saqqā. Cairo: Maktabat al-Kulliyyāt al-Azhariyya, 1987. BOOKS ON ISLAMIC JURISPRUDENCE, SCHOOLS OF LAW, AND BIOGRAPHIES OF IMAMS FROM THE HANAFI SCHOOL

The preamble to the inventory of books donated by Sultan Mehmed II (r. 1444–46, 1451–81) to the madrasas of his mosque complex in Istanbul (now the “Fatih” collection in the Süleymaniye Library) illustrates fifteenth-century Ottoman dynastic ambitions, along with the concerns and goals of book collecting at the time. The author of the preamble, Muhammad bin Hidir bin el-Haj Hasan, encapsulates the prevailing attitudes of his time and milieu concerning books. The themes that he underscores—namely, preservation, founding institutions, allocating resources, and reviving books by reading—are similar to remarks made by ‘Atufi in the Arabic preamble to the inventory of the palace library during the reign of Mehmed II’s son, Bayezid II (r. 1481–1512), which also indicates the significance of books for learning as well as the patronage of Ottoman sultans as custodians of books (see Appendix V at the end of this volume). In his introduction ‘Atufi mentions “the Book,” i.e., the Qur’an, as a pillar for knowledge and certainty (*‘imādan li’l-‘ilm wa al-yaqīn*) and indicates qualities exemplified in the person of the Prophet Muhammad, “who combined the knowledge of those who went before and those who came later” (*jama’a ‘ulūm al-awwalīn wa al-ākhirīn*). ‘Atufi refers to the Ottoman sultan Bayezid II as “the most knowledgeable sultan,” as he “resolved to attend to the books of the religious sciences” and appointed “one of his slaves” to classify and catalogue every book in his “imperial treasury” (*khizānat al-‘āmira*).¹

The inventory of the books endowed by Mehmed II to his mosque-and-madrasa complex in Istanbul was prepared in 968 (1560–61) during the reign of Sultan Süleyman I (r. 1520–66). The preamble to this inventory is worth quoting in full:

Thanks and gratitude belong to God who made His Noble Book [i.e., the Qur’an] protected and well-preserved in a way that neither alterations nor corruption would harm it. Peace and blessings to His Messenger whose prophetic reports, not affected by forgery or alterations, reached us in an uninterrupted manner... Then, God Almighty made scholars of the past spend their utmost effort to comprehend the subtleties and deep meanings of His everlasting book, and to obtain the sources of the Prophetic reports. Then, they began establishing the foundational principles (*tamhīd al-uṣūl*), and establishing proofs and substantiating the legal matters, and recording the exemplary cases of law, perfecting the creed and strengthening the principles in a way that should suffice for what the Muslim community would have in terms of the exemplary events and normative rulings until the end of the world. Then, they began writing precious books on paper with the intention of ensuring their perpetuity among the people, and compiled books in every science, be it a Qur’anic commentary, prophetic tradition, legal theory, or substantive law. Similarly, they wrote ancillary books to these disciplines on the Arabic sciences and literary arts. They wrote books that were easy to understand and concise. Thereafter, the successor generation followed them in this path: With these books, the house of science and knowledge became well fortified, and the garden of arbitration of truth and falsehood was adorned from all sides. Thus, in this fashion, the affairs of learning will continue until the end of time. Therefore, it is required of us to preserve (*ri’āya*) the books and strive to collect them from every possible place in which they exist (*al-sa’y fi jam’ihā min mazānnihā wa iqtinā’ihā*) and allocate resources to obtain them, spending utmost effort in studying them, and making them alive through reading (*ihyā*). One should avoid abandoning and destroying them (*ta’ṭīlihā wa ifnā’ihā*), for reading revives religion, thus bringing many rewards for the hereafter. Therefore, every Muslim who wishes to do good deeds should adorn their accounts with these kinds of charitable acts to obtain bountiful rewards.

Among those who paid utmost attention in this regard is Sultan Mehmed bin Murad Khan...who collected precious books and exquisite copies of scriptures in a way that such a collection had never been assembled before. He entrusted them to his book treasury (*khizāna*) in the mosque that he built in Istanbul, still protected under the shade of his patronage. He endowed them to his madrasa, which the ear of time had never heard. Many other charitable people emulated the sultan, and endowed to this library their own books to have a share in the rewards in the hereafter. With these donations, the quantity of books reached high numbers, benefiting many people. Caretakers (*hafaza*), appointed and salaried by the order of the sultan, protected and preserved these books. Each one of them carried out required duties during their lifetime until the time of [appointment] of a certain Arab named al-Ḥāj Muḥammad. He himself toiled in this manner to maintain the books until he died.²

In terms of the number of books, the endowed library of Mehmed II, as listed in an earlier inventory prepared by Şah Çelebi İbnü'l Fenari around 907–18 (1501–12), had reached 1,241³ by the time of Bayezid II, in comparison to the roughly 5,700 volumes (7,200 titles) enumerated in 'Atufi's inventory. The palace library collection in general and the *fiqh* (jurisprudence) section in particular demonstrate the complex relationship of Ottoman imperial elites to books as custodians and collectors who enabled the preservation of the medieval Islamic legacy even if they also disregarded some aspects of that learning.

The history of books and libraries in the Ottoman empire has been a matter of scholarly concern for quite some time; yet we are still far from situating such books adequately in their historical contexts. The diffusion and circulation of legal books before they were ultimately deposited in the palace library needs further study in order to understand the formation of this particular collection. Conceptually, the royal library follows the established Islamic tradition, for it is referred to as a book "treasury" (*khizāna*).⁴ However, this term was not limited to the imperial library alone; it also refers to the libraries of viziers and others. For example, a copy of the *Nashāt al-şudūr* (Joy of Hearts), a significant book on schools of law by Muhyiddin al-Kafiyaji (d. 1474), a Hanafi Mamluk scholar of Rumi origins, was copied for the library (*khizāna*) of the grand vizier Mahmud Pasha (d. 1474).⁵

Major ways of acquiring books for the palace library included purchases, gifts, and copying for the personal study (*muṭāla'a*) of the sultan. The books that were copied for this library and those copied, presumably, for the sultan's personal study feature two different kinds of ex-libris notation, at least during the time of Mehmed II. For the palace library (*khizāna*), the ex-libris usually started with the expression of "by order of the treasury" (*bi-rasmi khizānati*), whereas books copied for the sultan's personal study have an ex-libris starting with the expression "by order for personal study" (*bi-rasmi al-muṭāla'ati*).

In the late medieval world, books were often recycled from previous libraries. Both Mehmed II and Bayezid II seem to have taken a serious interest in books that were associated with famous libraries. Some of the books that had been copied for other potentates, or that once belonged to a different royal library, ended up in the Topkapı Palace Library in Istanbul.⁶ Emigrant scholars seeking patronage often presented books as gifts to high-ranking dignitaries as well as to sultans. For instance, Shaykh 'Ali Muḥammad b. Mas'ud al-Shahrudi al-Bistami, popularly known as Musannifek (d. 1470), who was once in the circle of the Timurid ruler Shah-rukh (r. 1405–47), presented about sixty of his own works to Mehmed II. He eventually bequeathed his personal book collection to the library of this sultan's mosque-and-madrasa complex in Istanbul.⁷ Patronage, gifts, and readership patterns contributed to the production, circulation, and dissemination of books assembled in the palace library that Bayezid II inherited from his father, an already rich collection that he further expanded. Considering the large number and diversity of books on various branches of Islamic law, the following essay focuses primarily on a select number of legal books on substantive law (*furū'*), and highlights special aspects of the palace library collection. Some of the books, in both legal and other categories, have survived only in single copies thanks to this library.

In the post-formative era, the textual production of substantive law (*kutub al-fiqh*) in the Hanafi legal school continued in two major genres of legal writing. These two genres, which are intimately interrelated, served as the primary vehicles for the articulation of legal thought and discourse. This is not, however, to disregard the im-

portance of other types of legal writings such as legal theory (*uṣūl al-fiqh*), comparative legal studies of Islamic law, the science of legal disagreements and disputes (*ʿilm al-khilāf*, *ʿilm al-ikhtilāf*), and other sub-disciplines of substantive law, such as the etiquette of judges (*adab al-qāḍī*) and the science of legal writings (*ʿilm al-shurūṭ*). ʿAtufi lists some of these genres, but the bulk of the works in the inventory are either canonical legal books (*al-muṭūn*) or works of juridical opinions (*fatāwā*, *nawāzil*).

The legal books listed in ʿAtufi's inventory primarily concern the Hanafi school of law, the standard in the lands of Rum, which indicates that the collection probably had a practical dimension. Books belonging to the other schools of law are limited in number and were not collected systematically. Still, the inventory enumerates an impressive body of legal texts on diverse topics and other Sunni schools of law. For assessing the number and variety of books in the palace library, the collection of books in Mehmed II's mosque complex in Istanbul provides a useful comparative angle, but here I limit myself to the list recorded in ʿAtufi's inventory. Books on substantive law in this inventory generally reflect the post-twelfth-century process of canonization in the Hanafi school.

One may surmise a rough ordering of legal books in terms of textual hierarchy and chronology, yet ʿAtufi occasionally digresses from this apparent order and records books that do not necessarily fit into a chronological schema. This is particularly the case with regard to works by the early Hanafi jurists. For example, Imam Muhammad Shaybani's (d. 805) books come after the entries on al-Marghinani's (d. 1197) *al-Bidāya* (The Beginning), 83 {2–12}, and its commentary *al-Hidāya* (The Guidance), 83 {2–12}, and *Kitāb al-aṣl* (Book of Sources and Principles, 83 {13–14}) by Imam Muhammad al-Shaybani. While the *Mukhtaṣar* (Compendium, 84 {14}) of al-Karkhi (d. 952) is listed immediately after the books by al-Shaybani, the *Mukhtaṣar* (Compendium, 84 {15}) of al-Tahawi (d. 952) comes after two books on the etiquette of judges, which were written after this compendium. Otherwise, books that are commentaries on major texts, or that belong to a genre that includes many books, are typically listed together.

Legal books are cited generally by their abridged and well-known titles in legal scholarship. Authors are usually not mentioned unless the book bears a title that can possibly be misattributed or confused, such as *al-Bidāya* of al-Marghinani or al-Ghazali (d. 1111). In such cases, the author's name is not given in full but rather in an abridged form. Books by Ottoman scholars are generally listed with the author's name, again, in abridged form (such as Qadi Simawna), or using the honorific *al-Mawlā* (the master) and the first name. The language of a book is only specified if it was written in Persian or Turkish, because the norm is assumed to be Arabic. Similarly, books are also commonly identified by their school of law only if they are not from the Hanafi school. In two instances, ʿAtufi remarks on the copyists, since they were well-known figures in the Ottoman realm, the Timurid scholar al-Sayyid al-Sharif al-Jurjani (d. 1413) and the Ottoman scholar Hızır Shah al-Balati (d. 1449) (83 {9, 12}).

The legal books in the palace library exhibit geographical and intellectual connectivity, both diachronically and synchronically, across a wide region. The inventory demonstrates the interconnection of the Ottoman Hanafi legal tradition with the Hanafis of Iran, with Mamluk Cairo and its cultural hinterlands, and especially with the Persian-speaking populations of Central Asia, as well as medieval India. Works from these regions are the products of the scholarly milieu of Hanafis and Shafi'is before the advent of Safavid rule in Iran in 1501 and the establishment of Imami Shi'ism. The religio-legal history of medieval Iran, India, Anatolia, and Mamluk Cairo needs to be explored further through an intensive investigation of the links between these regions. Likewise, the textual production of scholars and the circulation of their works await more detailed studies based on the holdings of manuscript libraries. In the thirteenth and fourteenth centuries, texts were often disseminated from the eastern Islamic world to the West, including Anatolia, where significant numbers of books were written and translated. Among the inventory's legal books in Persian, the books *ʿUmdat al-Islām* (Buttress of Islam, 97 {11}) by a certain Abd al-Aziz⁸ and *Asās al-Islām*⁹ (Foundation of Islam, 98 {19}) by an anonymous author and their translations into old Anatolian Turkish are two examples that show the dissemi-

nation of Persianate Hanafism in fifteenth-century Anatolia. From this period, two legal books in Turkish enjoyed a wider and more prolonged readership and circulation, namely Abu Hafs al-Nasafi's (d. 1142) versified book on legal disagreements, *al-Khilāfīyāt* (90 {16}), as well as the *Muqaddima* (Prolegomena, 98 {17}) of Kutbeddin al-Izniki (d. 1418).¹⁰

EARLY HANAFI TEXTS FROM ABU HANIFA AND HIS CIRCLE

Although the early canonical texts of the Hanafi school¹¹ do not constitute the main strength of the palace library, some examples belonging to this category are represented in the inventory. Canon formation in the Hanafi school, as in other schools of Islamic law, started in the formative period and continued over a long expanse of time with various turning points and ruptures. The formation of textual canons began with the eponymous founders of the schools of law and their students.¹² What jurists called *masā'il* (questions, or exemplary legal cases) formed the basis of these early legal traditions. Within the context of legal deliberation and discussion, a number of texts gained canonical status, which jurists of the later period considered as arbiters of the various legal issues at hand. Of those eponymous figures, no text by Abu Hanifa (d. 767)¹³ has survived.

The legal positions of early Hanafi scholars are preserved through the works of Imam Muhammad al-Shaybani, who compiled a number of texts that contain the legal positions of Abu Hanifa and his circle. Al-Shaybani's *al-Aṣl* (The Book of Principles), which gained canonical status within the normative hierarchy of the Hanafi school, contains the most authoritative legal opinions, called *zāhir al-riwāya*, "legal opinions whose authenticity is undisputed." Atufi lists four of al-Shaybani's works, *Kitāb al-aṣl* (83 {13}), its abridgement titled *Mukhtaṣar al-Jāmi' al-kabīr* (Abridgement of the Comprehensive Compilation, 83 {3}),¹⁴ the *al-Jāmi' al-saghīr* (Minor Compilation), and *Sīyar al-kabīr* (The Book of International Conduct, 83 {13}).¹⁵ These were his major works, and they inspired a corpus of commentaries by ninth- and tenth-century jurists.¹⁶ Books by other founding jurists of the Hanafi school, such as Abu Yusuf

(d. 767), are not listed. Similarly, works by ninth-century jurists do not seem to have been available at the time.

The abridged legal compendium (*mukhtaṣar*) genre represents a much wider phenomenon of textual production in Islamic schools of law during the ninth and tenth centuries. Such compendiums represent a significant step in the canonization of the traditions of the Hanafi school, particularly through texts from the tenth¹⁷ and eleventh centuries. These works were produced for various reasons, including for teaching and disseminating the basic principles and preferred legal opinions of Hanafi doctrine on substantive matters. Abridged texts were often used as major vehicles for legal training in the early history of the Islamic schools of law. Among these, the compendium of Abu al-Husayn Ahmad b. Muhammad b. Jafar al-Quduri (d. 1037) was read and copied extensively and enjoyed great popularity until the twentieth century as one of the canonical texts of the Hanafi school. The inventory lists eight copies (87 {9–12}) of this compendium as well as a commentary on it (87 {16–17}).

In addition to the work of al-Quduri, two of the other major abridged compendiums are listed in the inventory, with a single copy of each (83 {14–15}): the *Mukhtaṣar* of Abu al-Hasan al-Karkhi (d. 952), and that of Abu Ja'far Ahmad b. Muhammad b. Salamah b. al-Tahawi (d. 933). These scholars are leading figures of Iraqi Hanafism.¹⁸ Since there is no extant copy of al-Karkhi's work, which is known only through commentaries, it is important to note that the palace library seems to have had a copy of it. If Atufi's attribution is correct, then the book survived at least in a single copy until the early sixteenth century. Further research might enable us to explain why this particular work was not reproduced in multiple copies. Perhaps al-Karkhi's affiliation with the Mu'tazili school of theology played a role in the reception of his works in general, given the limited number of surviving books by him. Even though there are several manuscripts that bear the title of *Mukhtaṣar* by al-Karkhi, a close examination of the existing manuscripts indicates their misattribution.¹⁹

As for al-Tahawi's compendium, it represents a strong methodological engagement with the Shafi'i school, given that the author was formerly a Shafi'i scholar who later adopted the Hanafi school and became a leading

Hanafi scholar of his time. In contrast, al-Tahawi's maternal uncle, al-Muzani, a former Hanafi who turned to the Shafi'i school, wrote a compendium on Shafi'i *fiqh*, of which the palace library of Bayezid II does not hold a copy.²⁰

Books by other founding figures, such as Abu Yusuf from the Hanafi school, or works representing other schools of law, are absent from the inventory. The absence of such books could be due to their lack of availability at that particular time, or to the fact that the transmission of legal discourses through later canonical texts relegated books by the founding figures to secondary positions. In any case, the palace library's collection of select works from early Hanafi legal production is a significant holding for the early sixteenth century. These early Hanafi works indicate, to a certain degree, a shift in the direction of legal education, textual production, and articulation of law in the post-tenth-century world. In the legal education and interpretation, canonical *mutūn* texts and the formation of the *nawāzil* (emergent legal cases) represent a new method. Texts of *nawāzil* constituted a novel canon of exemplary cases and legal precedents for the jurists of subsequent periods.

CANONICAL TEXTS AND THEIR COMMENTARIES

At the top of the list is *Kitāb al-bidāya* (Book of the Introduction, 83 {2}, two copies) and its commentary, *al-Hidāya* (The Guidance, 83 {2–12}, eleven copies) by Abu al-Hasan Burhan al-din 'Alī bin 'Abd al-Jalil al-Farghani al-Marghinani. For its clarity, presentation of legal cases, and skillful incorporation of legal disagreements into a textbook, *al-Hidāya* remained one of the most widely read books in the Hanafi tradition long after its compilation. One encounters notes of praise for this work on various manuscript copies of it. One such note, recorded on the margin of a manuscript, puns on the word "guidance" in the sense of leading aright, "the *Book of Guidance* leads aright its preserver and memorizer, so attend to it and memorize and preserve it."²¹ The famous Ottoman scholar Taşköprüzade (d. 1561) records that the *Book of Guidance* "abrogated what has been written before it on the science of law."²² It has remained one of

the most popular books on substantive law and was considered the major reference work for legal cases, being one of the first books ever translated into English in India.

The next books listed at the beginning of this section in 'Atufi's inventory are the four canonical texts (*mutūn al-arba'a*) and their commentaries. These four were written by Hanafi jurists of Central Asia, the second major geographical zone after Iraq for Hanafism. In fact, the Hanafi legal tradition, having roots in Iraq, eventually became associated primarily with various centers in Central Asia, such as Samarqand, Balkh, Bukhara, and other major cities of Transoxiana. The history of Hanafism in this vast terrain has yet to be written. The four canonical texts and their commentaries constitute a substantial portion of this section of the palace library. These are the *Mukhtār* (The Choices) by Abu al-Fadl Majd al-Din 'Abd Allah al-Mawsili (d. 1284); five copies of the *Majma' al-baḥrayn wa multaḡā al-nahrayn* (Conjunction of the Two Seas and Two Rivers) by Muzaffar al-Din Ahmad Ibn al-Sa'ati (d. 1295); five copies of *al-Wiqāya* (The Protection)²³ by Burhan al-Din Mahmud bin Sadr al-Shari'ah al-Awwal al-Mahbubi (d. 1346); and five copies of *al-Kanz al-daḡā'iq* (The Treasury of the Subtleties) by Abu al-Barakat 'Abd Allah bin Ahmad al-Nasafi (d. 1310). Not only Ottomans but also Hanafi scholars at large regarded these works as authoritative texts (*matn*) containing the preferred opinions of early Hanafi scholars. The commentaries provide contextual information on how canon formation in the Hanafi school developed according to changing circumstances, a process that involved adaptation, appropriation, transformation, and selection within the larger framework of *madhhab* (school of law) scholarship. Moreover, commentaries also introduce the reader to larger legal questions and methodological challenges concerning particular subjects. Many of these commentaries explain in detail the legal basis of a specific opinion attributed to early Hanafi scholars, and later developments within the school. Among these books, *al-Hidāya* and *al-Wiqāya* are the texts most frequently cited and commented on by fifteenth-century Ottoman scholars. The inventory contains major commentaries on the four texts that were available to those Ottoman scholars, as

well as commentaries written by the Ottoman scholars themselves. Indeed, all the major commentaries and glosses on *al-Hidāya* are found in the palace library inventory, and all of them adopt titles that rhyme with it, such as *al-Kifāya*, *al-Ghāya*, and *al-Nihāya* (84 {18–19}, 84 {1–6}). Likewise with the *Wiqāya* and its commentaries (84 {11–19}, 85 {1–19}, 86 {1–3}, thirteen copies).

While the library also reflects an interest in works produced by Ottoman scholars, not all of their known legal commentaries on the canonical texts are included in the inventory. Yet the palace library preserved several early Ottoman legal works that otherwise would have been lost. A case in point is *al-Kunūz al-anwār fī sharḥ rumūz al-asrār* (The Treasuries of the Illumination in Explanations of Symbols of the Secrets, 80 {4–5}), and *al-ʿInāya fī sharḥ al-wiqāya* (The Help in Explaining the Guidance, 84 {5–6}) by ‘Alī bin Khidr bin ‘Alī bin ‘Ala’ al-Dīn al-Karahisari al-Aswad, also known as Kara Hoca (d. 1397). These two books have survived only in single copies.²⁴ The copyist of *al-Rumūz* mentions that he saw al-Aswad’s commentary on *al-Wiqāya* in two volumes, which was well received. As for the original text of *Rumūz al-asrār*, it was written by a certain Abu Bakr bin Ibrahim, and it has survived only through the commentary by ‘Ala al-din al-Aswad. Kara Hoca commended Abu Bakr bin Ibrahim with the following accolades: “the Imam, the pious one, the verifier, a thorough scholar par excellence, crown of religion and religiosity, and the inheritor of prophets and messengers.” Furthermore, he praised *Rumūz al-asrār* as a book that “eyes have not seen a second of, and ears have not heard the likes of its construction in exquisite language, yet it is a high mountain whose summit is not reached by every climber, and a stronghold whose door will not yield to crashers, a battlefield where not everyone can win.”²⁵

‘Ala’ al-din explains that he wrote the commentary upon a request by “Sultān Murād Beg bin Sultān Orḡān” (i.e., the Ottoman Sultan Murad I, r. 1362–89), whom he glorifies as a universal sovereign. While such introductory remarks provide us with insights on the book, they were even more relevant to contemporaneous readers. The author writes:

I was ordered with the language of inspiration, not by a delusive imagination, to write a commentary which unveils

its obscurities, solves its difficulties, explains its subtle points, and explicates indications of its sentences. [...] I adorned the beginning of it with the titles of the divinely supported sovereign, exalted shah of shahs, the one who showers generosity and kindness [...] the leader of *ghazis*, *mujahids* ... Since it is the custom to approach kings and the great ones with a gift appropriate to their status, I deemed to make this commentary adorned with his noble name [in order for it] to remain till the end of the time.²⁶

The only existing manuscript of *al-Kunūz*, copied²⁷ in 1367, testifies to a vibrant textual production and sophistication of Ottoman scholarship in the late fourteenth century. Kara Hoca’s work was not an isolated text from this period. Mecdi Efendi (d. 1591), who translated the *Shaqā’iq al-Nu’māniyya* (Peonies of the Garden [of Abu Hanifa]), gives his biography in the second rank (*ṭabaqa*), namely among the scholars of the era of the Ottoman ruler Orhan Bey (d. 1362). The biography of ‘Ala’ al-din al-Aswad is recorded among that of five other scholars of the period who were leading figures of the burgeoning textual tradition in the Ottoman scholarly world.²⁸ The library inventory also lists other contemporary works by Ottoman and Anatolian scholars whose impact was much longer lasting than that of *al-Kunūz*.

In terms of scholarly impact and circulation of books, the Anatolian scholar Ibn Malak (d. 1395), who flourished in the principality of the Sons of Aydın (Aydınids) before it fell to the Ottomans, enjoyed a wide readership and scholarly reception. Not only his *Sharḥ al-manār* (Commentary on the Lighthouse), but also his *Sharḥu majma‘ al-baḥrayn* (Commentary on the Confluence of Two Seas) had an extensive longevity both within the Ottoman domains and beyond. These works by Ibn Malak, who was also known as Ibn Ferište (Ferişteoğlu), are among the highest achievements of the scholars of Rum as recognized by their wide readership until the modern era. Taşköprüzade notes that “his commentary on the conjoining of two seas is a fine commentary and beautiful explanation and combines many useful subtle points and is well-regarded in the lands of *Rūm*.”²⁹

Similarly, the oeuvres of the Ottoman scholars Shaykh Badr al-din (Bedreddin, d. ca. 1420) and Molla Khusraw (Hüsrev, d. 1480) traveled beyond the lands of Rum, as exemplified by three of their works, which were disseminated in a much wider terrain between Cairo and

India. In addition to the inherited Hanafi legacy, these new legal works by Ottoman scholars themselves became authoritative texts with the status of *mutūn* (authoritative legal manuals) and were used for instruction in law. Such works included *Mir'āt al-Uṣūl* (Mirrors for the Legal Theory) and *Durar wa Ghurar* (Pearls and Blazes), both by Molla Hüsrev, and the *Jāmi' al-Fuṣūlayn* (The Conjoiner of Two *Fuṣūls*) by Shaykh Badr al-Din al-Simawi, upon which many critical commentaries were written in the following centuries.

Commentaries comprise the bulk of canonical or authoritative texts in 'Atufi's inventory. There were various motives behind commentary writing, which are often indicated by the commentators (*muḥashshīs*). *Muṭūns* (canonical texts) as books of instruction required constant unpacking, according to the changing needs and circumstances of readers in later generations. Commentators also worked to improve the original text by adding new information that was omitted by the main author. Most of the commentators represented in the palace library inventory are from the era of Mehmed II, including Molla Niksari (d. 1495). Molla Niksari comments that "when Sadr al-Shari'a wrote his commentary on *al-Wiqāya*, he left out some of the legal matters without fully explaining them... Yet, it occurred to me that it is not some of the matters, but rather all of the text was in need of explanation. Therefore, I asked God to help me in my endeavor to explain each legal case (*mas'ala*) with the legal basis for it (*dalīl*)."³⁰ Such remarks, which can be found in abundance in the period, show the Ottoman scholars' competitiveness as well as their critical attitude toward received legal wisdom.

Canonical texts and their medieval and Ottoman commentaries were the main vehicles through which legal education was conducted and legal discourse articulated by the integrated interpretative community of the Hanafis. The members of this community were connected to their colleagues through discursive networks that extended beyond the Ottoman realm as well as to local representatives of the legal tradition. Existing legal commentaries in the library inventory also indicate the maturity and self-confidence of the Ottoman scholarly world in its own skills and achievements, as is amply attested in the introductions of their respective works.

CENTRAL ASIAN HANAFISM AND WORKS ON NEW LEGAL PROBLEMS (*NAWĀZIL*, *WĀQI'ĀT*) AND MAJOR COMPILATIONS (*AL-MABSŪṬ*)

One of the strengths of the palace library is its holdings of the major legal compilations (*mabsūṭ*) and works of *nawāzil* or *wāqi'āt*, namely compilations of the works of post-canonical legal scholars (88 {1–19}, 89 {1–19}, 90 {1–19}, 91 {1–19}, 92 {1–14}). These works were compiled in Central Asia, especially in two major centers of learning: Bukhara and Samarqand.³¹ Along with other fatwa compilations, *nawāzil* formed one of the bases of Ottoman legal thought, serving in particular as a set of precedents in emerging legal cases. "Well-regarded books" (*al-kutub al-mu'tabara*) is a term that refers largely to these legal compilations of fatwas as well as to other canonical texts in the Hanafi tradition.³² The inventory contains major fatwa collections such as *Fatāwā Qāḍikhān*, *Tatarkhāniyya*, and *Bazzāziyya*, among others, as well as al-Sarakhsi's *al-Mabsūṭ*.³³ The first ever compilation of the emergent legal opinions (*nawāzil*) is the work by Abu al-Layth al-Samarqandi (d. 983?), which is missing in the inventory. How much of the actual legal production of the jurists of Central Asia survived awaits further study, given the fact that existing Ottoman libraries contain many of them.³⁴ One striking book in the inventory is a Turkish translation of the *Fatāwā al-Tatarkhāniyya* (88 {13}), which is no longer extant.

BOOKS FROM THE MAMLUK REALMS

The inventory includes a small number of books written in the Mamluk domains. Al-Ruhawi's (d. ca. mid-fifteenth century) *al-Bihār* (The Seas) represents one of the best examples of instructional texts for the study of law. Since it is versified, it was perhaps expected that students would memorize the text in its entirety. The other well-known versified book is 'Abd al-Wahhab ibn Ahmad ibn Wahban's (d. 1367) *al-Manẓūmāt* (The Versified Instruction for Law). Abu'l-Mahasin Husam al-Din Abi 'Abd Allah Hasan bin Sharaf al-Ruhawi's (d. ca. end of the fifteenth century)³⁵ *Bihār*,³⁶ written in verse, was particularly geared towards teaching Hanafi *fiqh* to ma-

drasa students. Given that he relies on the Compendium of Quduri and the Versified Book of Legal Disagreements of al-Nasafi, as well as the *Majmaʿ al-Bahrayn*, this book must be from the early fifteenth century.³⁷ The author, also known as Husam al-Din, composed his book by putting in verse *Majmaʿ al-Bahrayn* with many of his own additions to it. *Al-Bihār* is also characterized by a distinctive use of symbols to indicate legal disagreements (*al-khilāf*) among Hanafi jurists. Husam al-Din al-Ruhawi adopted the meter of *al-Shātibiyya*, which is an important book on the science of Qurʾanic variations and reading (*Qirāʾāt*). Al-Ruhawi was a teacher of Abu Muhammad Mahmud bin Ahmad al-Ayni's (d. 1451), whose commentary, called *al-Durar al-zāhira*, was read and admired by Tashköprüzade.³⁸ The inventory does not contain this particular book by al-Ayni, but it does include his commentary on *Kanz al-Daqaʾiq* (86 {19}).

Gifts from scholars who lived outside the Ottoman dominions represent a small but significant constellation of books in the palace library. The reputation of Ottoman sultans, both as successful empire builders and as patrons of the arts and sciences, reached beyond their imperial realms and attracted the attention of scholars and literati in Iran as well as in the Mamluk domains. A case in point is the works of Nur al-Din ʿAli bin ʿAbdullah Ahmad al-Hasan al-Samhudi (d. 1509),³⁹ a well-known Shafiʿi scholar who resided in Mecca and Medina. In a professionally executed colophon in the Mamluk style, al-Samhudi indicates that with these books, he wished to render a service to Sultan Bayezid II, whom he refers to with lofty titles such as “Sultan of Islam and the Muslims, and Beacon of the Islamic Sultans” (*Sulṭān al-Islām wa-al-muslimīn, ʿalam al-sālaṭīn al-Islām*), as well as “Master of the Dominions of Rum and the Islamic States” (*Ṣāhib al-mamālik al-rūmiyya wa al-duwal al-islāmiyya*),⁴⁰ leaving out the Arabs from the title. He acknowledges that Bayezid II seized the well-deserved title of “Sultan of all Muslims” from other potentates by waging the obligatory jihad. Moreover, he affirms that Bayezid holds the power of discernment in the understanding of sciences both in their internal and external meanings. Not least, he adds that books receive the attention of the sultan. As al-Samhudi notes in the introduction, he wanted to secure the continuation of

the sultan's financial favors for himself and the four sons of his brother.

Other contemporary scholars from the Mamluk domains also refer to the Ottoman sultan Bayezid with universalizing titles. Among the small number of texts on the Shafiʿi school, Muhammad al-Azdi al-Shafiʿi's book *Kitāb al-iḍāḥ al-aghālīṭ al-mawjūda fī al-wasīṭ* (Explanation of Existing Errors in the Book of *al-Wasīṭ*) is a critical commentary on al-Ghazali's *al-Wasīṭ* (The Intermediate). The author mentions that he corrected fifty legal errors in *The Intermediate*. The unique copy of this work in the palace library may shed some light on the legal history of the Shafiʿi school and its early history in general. Such seemingly minor works could open up new lines of inquiry on the reception history of famous and well-known figures such as al-Ghazali, since they include critical engagement with such works.⁴¹

Although the palace library lacks a systematic collection of books from any school of law other than the Hanafi school, it still contains rare books such as the *Hilyat al-ʿulamāʾ* (Ornament of Scholars, 93 {3}) by the Shafiʿite scholar Qaffal al-Shashi (d. 976). Likewise, the encyclopedic legal work *al-Ḥawi* (The Comprehensive) by al-Mawardi (d. 1058) was also available. Rare books of discontinued schools of law survived thanks to the collection of the palace library. One such case is the single known copy in five volumes of *al-Muḥallā* (The Bejeweled) by Ibn Hazm (d. 1064), the renowned scholar of the *ẓāhirī* school from al-Andalus (95 {8–9}).⁴² The extant volumes of *The Bejeweled* in Istanbul libraries once belonged to the palace library, as attested by the notations of ʿAtufi.⁴³ However, Shiʿi schools of law are entirely missing from his inventory.

BIOGRAPHICAL DICTIONARIES (ṬABAQĀT) IN THE PALACE LIBRARY

The biographical dictionaries in the palace library inventory feature only a small number of books on Hanafi and Shafiʿi scholars. As far as the Shafiʿi school is concerned, the palace library only had Nawawi's (d. 1277) biographical dictionary along with Ibn Salah's (d. 1245) *Hilyat al-Imām al-Shāfiʿī* (97 {1–6}). Taj al-Din al-Subki's (d. 1370) major work on the biographies of Shafiʿi schol-

ars is missing from the inventory. His contemporary ‘Abd al-Qadir al-Qurashi’s (d. 1373) *al-Jawāhir al-muḍīyya* (Sparkling Jewelleries), which is the largest compilation of scholarly biographies on the Hanafi school, was available at the palace library (101 {10}). Yet no other biographical dictionary of Hanafi jurists is listed in the inventory, such as those written by Ibn Duqmaq (d. 1407) and Ibn Qutlubugha (d. 1475) from Cairo-based Mamluk scholars.

Among books in this category, the highlight of the palace library is a unique manuscript by a son of the famous scholar of Qur’anic recitation and reading variations, Muhammad Ibn al-Jazari (d. 1429). This unique manuscript by Ibn al-Jazari’s son, *Kitāb al-darajāt al-‘aliyya fi ṭabaqāt al-‘ulamā al-ḥanafīyya* (The Sublime Status on the Biographies of the Hanafi Scholars, 97 {14}) was copied for the library of the Timurid ruler Ulugh Beg (r. 1447–49).⁴⁴ The father of the author of the *Sublime Status* was taken captive by Timur after his victory over the Ottoman sultan Bayezid I (r. 1389–1402). Primarily known as a scholar of Qur’anic and the hadith sciences, Ibn al-Jazari represents one of the itinerant scholars of the Mamluk, Ottoman, and Timurid realms. In the introduction to this work, the author notes that he had seen a draft copy of the *Sparkling Jewelleries* of al-Qurashi and observes that the book contained many biographies of scholars who did not adhere to the Hanafi school, as well as some pseudo-Hanafis, while it left out many modern and ancient (*muta’akḥir wa mutaqaḍdim*) scholars of the Hanafi school. To this date, Qurashi’s biographical dictionary is the largest known compilation on Hanafi scholars of the medieval era. The library inventory carries none of the other known medieval biographical dictionaries of Hanafis, such as those of Ahmad Ibn al-Salt (ca. tenth century) and al-Saymari’s (d. 1045) *Akḥbār Abū Ḥanīfa* (Reports of Abu Hanifa). These two works survived only in limited numbers, and that of al-Saymari, which was copied in Baghdad, only became available in Istanbul in the eighteenth century.⁴⁵

The palace library contains nine copies of *Kitāb manāqib al-imām al-a’zam wa mashāyikhihi wa aṣḥābihi* (Book of Good Deeds of the Greatest Imam [Abu Hanifa] and His Companions and Scholars from His School) by Muwaffaq al-Din Muhammad bin Ahmad al-Kardari (d. 1173) and its abridged versions (101 {3–10}). These in-

clude five copies of the *Manāqib* and four copies of the abridgement⁴⁶ of al-Kardari’s work, which is the most comprehensive and popular biographical treatment of Abu Hanifa and his circles.

BOOKS ON ADAB AL-QĀDĪ (ETIQUETTE OF JUDGES)

Books on the etiquette of judges constitute a significant sub-genre of substantive law, which deals with issues of procedural law, the comportment of judges, and other matters related to law courts and judges. The palace library inventory lists six copies of exclusively Central Asian Hanafi works on this topic: *Fuṣūl al-usrūshaniyya* (*Ushrushanian* Decisive Arbiter, one copy) and *Fuṣūl al-‘imādiyya* (*‘Imāidian* Decisive Arbiter, five copies) by Majd al-Din al-Ushrushani (d. 1234) and Abu al-Fath al-‘Imadi (d. 1271), respectively. Despite their popularity, these two books have not yet received due attention by scholars of Islamic law. They constituted major manuals for judges until the beginning of, and perhaps even after, the fifteenth century as attested by the large number of available manuscripts.

The palace library did not own a copy of the mid-fifteenth century work *Mu‘īn al-ḥukkām* (Aid of Judges) by ‘Ala’ al-Din ‘Ali al-Tarablusi (d. 1445), a scholar from the Mamluk realms and a judge of Jerusalem, even though he presented his commentary on *al-Wiqāya* (titled *al-Istighnā* [The Indispensible]), to the Ottoman Sultan Murad II (r. 1421–44, 1446–51).⁴⁷ It might be the case that the book under consideration had not received a canonical status among the scholarly circles.

The towering Ottoman legal scholar of the early fifteenth century, Shaykh Badr al-Din ibn Simawna,⁴⁸ combined the two *Fuṣūls* mentioned above in a critical synthesis. He called it *Jāmi‘ al-fuṣūlayn* (Unification of Two *Fuṣūls*, 92 {17–19}, five copies), eliminating the repetitions and adding his own preferences (*ikhtiyārāt*). The *Jāmi‘ al-fuṣūlayn* achieved great success and popularity already during the author’s own time and triggered a number of critiques from sixteenth-century Hanafi scholars, who disagreed with his interpretative preferences. In any case, this work continued to receive a favorable readership in the large territories of the Ottoman empire and India, being printed several times in

the twentieth century. At the beginning of some copies of *Jāmi' al-fuṣūlayn*, 218 books and their abridgements are listed as the author's sources. It is not certain, however, whether Shaykh Badr al-Din consulted them all, or whether these were the references used by previous *Fuṣūl* writers. Even then, the list of books provides a comparative perspective on the Central Asian Hanafi books cited by 'Atufi. Two other legal books by Shaykh Badr al-Din, *Laṭā'if al-ishārāt* (The Subtleties of Indications) and *al-Tashūl fī sharḥ laṭā'if al-ishārāt* (The Facilitation on the Commentary of the Subtleties of Indications, 93 {6–8}), which is a commentary on his own work, are also recorded in Atufi's inventory, one of them being copied for the personal study of Mehmed II. Hence, the palace library collection documents the canonization process of this particular genre, which culminated in the already popular work of Shaykh Badr al-Din.

BOOKS ON LEGAL THEORY AND ON THE SCHOOLS OF LAW

Among the Mamluk scholars of Rumi origin, only Muhyiddin al-Kafiyaji (el-Kafiyeci) attracted the attention of the Ottoman ruling elite and scholarly world. Al-Kafiyaji, a prolific pamphleteer and an inventive scholar of his time, embarked upon a new project of studying the Islamic schools of law as an independent discipline detached from legal theory (*uṣūl al-fiqh*) and the lives of scholars (*ṭabaqāt*). These two well-established disciplines, among other topics, deal with *ijtihād* (legal reasoning) and *taqlīd* (adherence to a particular school of law). Al-Kafiyaji calls the new discipline the “science of the schools of law” (*‘ilm al-madhhab*), which no other scholar before him had conceived and conceptualized as such. His pamphlet on this topic, *al-Farah wa al-surūr* (The Happiness and Joy), which survived in only a few manuscripts, is not listed in the palace library inventory. Yet his remarkably long and sophisticated commentary on the same book, *Nashāt al-ṣudūr fī sharḥ al-farah wa al-surūr* (Activities of the Hearts on the Commentary of *The Happiness and Joy*), was available in Istanbul a year after its completion. Al-Kafiyaji remarked that he finished writing *Activities of the Hearts* on June 24, 1467 (5 Shawwal 867). It was copied by Yahya bin Muham-

mad al-Khatib on June 19, 1468 for Mahmud Pasha,⁴⁹ the grand vizier of Mehmed II.⁵⁰

The new discipline initiated by al-Kafiyaji, the “science of the schools of law,” examines late medieval theoretical approaches to the age-old discussions of legal reasoning versus adherence to specific schools, as well as epistemological questions regarding the truth value of juridical reasoning vis-à-vis God's knowledge and will. His book, *The Happiness and Joy*, seems to have been appropriated by a certain Ahmed Paşa bin Hızır, who called it *al-Taḥqīq wa al-tawfīq* (The Verification and Harmonization). This is a verbatim copy of the abovementioned book, except for the deletion of al-Kafiyaji's introduction. Even though Ahmed Paşa presented the same book to three Ottoman sultans, Mehmed II, Bayezid II, and Selim I, it does not seem to have received favorable attention. 'Atufi also lists a significant number of other works by al-Kafiyaji.

The palace library also held a single manuscript of Imam al-Haramayn al-Juwayni's (d. 1085) *Mughīt al-khalq fī tarjīḥ al-aḥaqq*⁵¹ (Abundant Rain for the Populace in Preferring the More Correct One, 97 {3}). “The More Correct One” in the title refers to the Shafi'i school, and the work includes a rebuttal by al-Babarti (d. 1384) concerning the superiority of the Hanafi school. Such polemical works on favoring a particular legal school over others constituted a fecund genre in the medieval era.

LEGAL PAMPHLETS (*RISĀLAS*)

Pamphleteering, an emerging genre in Ottoman legal writings in the fifteenth century, became very popular by the early sixteenth century, as oft-debated legal topics and newly emerging legal controversies prompted scholars to devise solutions either within the existing legal tradition or, in the absence of a clear precedent, with novel reasoning. The palace library held certain treatises on subjects that were hotly debated during Mehmed II's reign. Among them are age-old gender concerns in the legal arena, such as whether girls could be beneficiaries of endowments if the endowment charter only uses the word *awlād* (progeny, children). This debate provides clear evidence concerning gender issues and the status

of the female children of endowers. One of these treatises, titled *Risāla dukhūl al-walad al-bint taḥta kalimat al-awlād* (Treatise on Including the Daughters under the Word “Descendants” [as Beneficiaries of Endowments], 97 {19}), is listed in ‘Atufi’s inventory. A note by ‘Atufi indicates that the treatise had been copied from Molla Khusraw’s (Hüsrev) larger book of law, the *Ghurur al-aḥkām* (Pearls of Rulings). This work thus illustrates one of the various mechanisms by which larger texts fragmented into smaller texts, each with their own textual history and patterns of dissemination that were quite independent from the source texts.

The library inventory lists two compendiums (*majmū‘as*) that contain legal pamphlets and other topics (100 {9, 12–13}). Pamphlets also appear on other pages (between 97 and 100), which include 23 titles that start with the word “treatise” (*risāla*). The long-lasting controversy initiated by Molla Khusraw on the question of *walā*, namely, the clientage rights regarding manumitted slaves, is listed in the inventory. However, the responses to his work by contemporaries, such as Molla Ghurani (Gürani) and Hızır Shah Çelebi, as well as Molla Khusraw’s own rejoinder to them, are not recorded in ‘Atufi’s entries. Nevertheless, the library inventory provides ample testimony to the emerging legal genre of pamphleteering, even though its contents are not all-inclusive.

BOOKS ON INHERITANCE LAW

The majority of books on the topic of inheritance law were presented to Bayezid II. They generally consist of short texts, some of them versified, in Arabic, Persian, and Turkish (99 {15, 16, 17–18, 18–19}, 100 {1, 5, 7–11, 12–13, 13–14, 16}). ‘Atufi carefully identifies the language of books on inheritance law if they were written in Persian or Turkish. The extant copies of these books on inheritance contain a section that praises the Sultan Bayezid II. Some of the Persian texts were written by scholars that immigrated to the lands of Rum, one such example being a certain “‘Imād al-Dīn Yahyā b. Aḥmad al-Kāshī.” This scholar laments that even though he had been settled in the lands of Rum for quite some time, he still did not own a dwelling (*khāne*). Yet he remarks that, at

the time of Sultan Bayezid, no one among “the progeny of Adam” (*nasl-i ādam*) remained poor.⁵²

The anonymous author of a book on inheritance law in Turkish similarly praises the Ottoman sultan without mentioning his name. The sultan is referred to as the “Shah of Rum” (*Shāh-i Rūm*), who became a pillar of Islam (*islāma ‘imād oldı ol shāh*). The sultan is praised as the “refuge” (*penāh*) of Rumelia and Anatolia, and the “Shah of Ghazis.” The book provides a good example of the emerging vernacular Turkish in early fifteenth-century Anatolia. Similar to the common trope of early Anatolian Turkish writers, the author apologetically remarks that he wrote it in Turkish.⁵³ Such books may have been composed in response to pressing practical needs of the time. They exemplify a process of vernacularization in the lands of Rum, where Turkish and Persian were not necessarily set in competition but rather coexisted.⁵⁴

CONCLUSION

The palace library, in general, testifies to the ambitions of the Ottoman sultans Mehmed II and Bayezid II as patrons and custodians of books and learning. The inventory prepared by ‘Atufi suggests that the library made available to its readers major legal texts from the era of the foundation of the Hanafi school until the early sixteenth century. Through the library holdings, one may observe larger legal trends and developments of the Hanafi school across an expansive territory, as well as the interconnectedness of broader Hanafi legal and scholarly discourses. Similarly, the library preserves a good number of books on Persianate Hanafism, a legacy that otherwise would have been lost and that remains a field to be explored. Early Ottoman legal texts often survived in single copies through the custodial efforts of the Ottoman imperial elite.

The palace library also shows that from very early on in the fifteenth century, scholars who lived outside Ottoman domains sought patronage by presenting their books to the Ottoman sultan. The Ottoman court had already attracted well-known scholars from the East and would continue to represent an important center of learning and patronage in the subsequent era, with Istanbul as the capital city after 1453. Moreover, the

relatively large quantity of books by Ottoman scholars listed in the inventory testifies to an emerging interpretative community of the lands of Rum.

The palace library contains a significant number of rare items, which survived only in individual copies, as well as copies that were collated (*muqābala*) by the medieval scholars themselves. Collections of these edited and perfected manuscripts show that such copies were sought after and obtained if available. The materiality and material condition of the manuscripts may have played a role in the choice of collecting particular copies. Furthermore, the Ottoman royal book workshop generally enhanced the legibility and aesthetic qualities of legal manuscripts. This is particularly noticeable in books presented for the personal study of sultans.

In the inventory, Arabic is the major language of the legal books, but works in Persian and Turkish were also collected and preserved, which indicates the processes of vernacularization in Central Asia and the lands of Rum. The inventory's books of law suggest that the Ottoman legal landscape was shaped primarily by collecting works of the Hanafi school, which may have served the pressing needs of the Ottoman state and scholars of the time.⁵⁵ The imperial elite seems to have taken a keen interest in Ottoman scholarship in general and Ottoman legal scholarship in particular, which produced many significant works that would eventually acquire a canonical status in the lands of Rum and beyond.

NOTES

Author's Note: I would like to thank Professors Gülrü Necipoğlu and Cemal Kafadar, who read drafts of this paper and offered valuable criticisms. I dedicate this paper to the memory of my dear friend Dr. Shahab Ahmed, *askanahu Allāhu fi fasihi jinānihi*.

22. Tashkopruzāda Aḥmad b. Muṣṭafā, *Miftāḥ al-sa'āda wa miṣbāḥ al-siyāda fī mawḍū'āt al-'ulūm*, ed. al-Sayyid Sharaf al-dīn Aḥmad (Haydarabad, Deccan: Maṭba'at majlis dā'rat al-ma'ārif al-'uthmāniyya, 1400/1980), II:129.
23. SK, Ayasofya MS 1507; SK, Turhan Valide Sultan MS 140.
24. Kara Hoca, *al-'Ināya fī sharḥ al-wiqāya*, SK, Fatih MS 1383 and MS 1384; copied in 841/1437 by "Muḥammad bin Khalil."
25. 'Alā al-dīn al-Aswad, *Sharḥ rumūz al-asrār*, known as *Kunūz al-anwār*, Nuruosmaniye Library, 1334, fols. 3b–4a.
26. Ibid., fol. 3a.
27. Nuruosmaniye Library, MS 1334, fols. 1a–b. Katib Çelebi mentions that he also wrote a commentary on *al-Mughnī*, which is no longer extant: see Katip Çelebi, *Kashf al-Zunūn*, ed. Şerafettin Yaltkaya, Rifat Bilge (Istanbul: Maarif Matbaası, 1941–43), II, 1749a.
28. Mecdi Mehmed Efendi, *Ḥadā'iq al-shaqā'iq*, ed. Abdülkadir Özcan (Istanbul: Çağrı Yayınları, 1989).
29. Tashkopruzāda 'Iṣām al-Dīn Aḥmad, *al-Shaqā'iq al-nu'mā-niyyah fī 'ulāmā' al-dawlat al-'uthmāniyya*, ed. Ahmed Subhi Furat (Istanbul: Edebiyat Fakültesi Basımevi, 1985), 45.
30. Niksārī, *Hawāshī Ṣadr al-Sharī'ah* (TSMK, MS A. 991, fol. 1b).
31. For Central Asian Hanafism, see the seminal and pioneering article by Omeljan Pritsak, "Āl-i Burhān," *Der Islam* 30, no. 1 (1952): 81–96, as well as the articles by Wilferd Madelung in *Religious Schools and Sects in Medieval Islam* (London: Variorum, 1985). In Turkish, the studies of Kutlu Sönmez explore various aspects of the Maturidi school: Kutlu Sönmez, *İmam Maturidi ve Maturidilik: Tarihi Arka Planı, Hayatı, Eserleri, Fikirleri ve Maturidilik Mezhebi: Seçki* (Ankara: Kitabiyat, 2003). Most recently, Murteza Bedir has examined the emergence of *wāqī'āt* in the Bukhara scholarly circles; see his *Buhara Okulu: Vakıf Hukuku Bağlamında X-XIII. Yüzyıl Orta Asya Hanefi Hukuku Üzerine bir İnceleme* (Istanbul: İSAM Yayınları, 2014).
32. See Tashkopruzāda, *Miftāḥ al-sa'āda*, 61–231.
33. *Fatāwā Qāḍikhān* (Fatwa Collection of Qāḍikhān, five copies); *al-Fatāwā al-bazzāziyyah* (Fatwa Collection of al-Bazzāzī, two copies); *Khulāṣat al-fatāwā* (Digest of Fatwas), *Majma' al-fatāwā* (Collection of Fatwas, seven copies); *Khizānat al-fatāwā*, two copies, *al-Hidāya*, eleven copies.
34. Tashkopruzāda lists a good number of Hanafi legal books, in an order that is similar to those in 'Atufi's list. Yet Tashkopruzāda's list seems much more comprehensive than the list in the palace library inventory. Furthermore, he gives a short biography of the authors of these books and indicates their status in the textual hierarchy of the Hanafi school. See his *Miftāḥ al-sa'āda wa miṣbāḥ al-siyāda*, 61–231.
35. Carl Brockelmann, *Geschichte der arabischen Literatur* (Brill: Leiden; New York, 1996), Supplement, II, 90.
36. SK, Ayasofya MS 1621.
37. Most of the copies that exist are from the fifteenth century: for example, SK, Fatih MS 1499, copied in 810/1408, Fatih MS 1498, and Fatih MS 1495 with an original Mamluk binding and copied in 832/1429.
38. SK, Yeniciami MS 435.
39. Nūr al-Dīn 'Alī bin Nāsir al-Makkī, *Idrākāt al-waraqāt* (The Apprehension of the Pages), SK, Ayasofya MS 997, 80 {5–6}. The book was presented to the Ottoman sultan Bayezid II (*bi-rasmi khizānati mawlānā al-sultān al-'ālim Bāyezid bin 'Uthmān, wassa'a Allāhu mulkahu wa 'azza nasrahu*).
40. The title referring to Bayezid II is longer than my quote: SK, Ayasofya, MS 997, fols. 1b–2a.
41. Muḥammad al-Azdī, *Kitāb idāḥ al-ağālīt al-mawjūda fī al-wasīt*, SK, Ayasofya MS 1035, fol. 2a.
42. The single known copy of *al-Muḥallā* has survived in five volumes, which were copied by the same copyist and collated with other contemporaneous copies.
43. Ibn Ḥazm, *Al-Muḥallā fī sharḥ al-mujallā*, 95 {8–9}. Manuscripts: TSMK, Revan MS 604; SK, Ayasofya MS 1259 and MS 1260. The third volume, Ayasofya MS 1259, does not bear the seal of Bayezid II but contains 'Atufi's notation on fol. 1a. It was copied in 727, and was compared and collated with three other copies in 724. Similarly, Ayasofya MS 1260 was collated (*muqābala*) and copied in 789. The copyist mentions that it was badly collated and needed a new collation with a sound copy (*bi-nuskhatin ṣaḥīḥatin*). SK, Carullah Efendi MS 710. The second volume featuring 'Atufi's notation on fol. 318a was copied in 726 and was collated with two other manuscripts and the autograph of Ibn Ḥazm. The first volume (SK, Carullah Efendi MS 709) has no seal impression of Bayezid II but features 'Atufi's notation. Apparently, the copies at the library of Carullah Efendi (d. 1738) originated from the Topkapı Palace collection.
44. *Kitāb al-darajāt al-'aliyya mimmā ullifa bi-ismi al-Mawlā al-Sultān al-'Ālim al-'Ādil al-Mu'ayyad al-manṣūr muḥīth al-dunyā wa-dīn Ulugh Bigh—khallada Allāhu mulkahu wa saltānahu*, TSMK, H. MS 2831, fol. 1a.
45. Al-Şaymarī, *Kitāb Jawāhir al-naḥḥa fī akhbār Abī Ḥanīfa*, SK, Şehid Ali Paşa MS 1186. Before being donated to this library, the book was owned by a certain "Waḥdī Efendi." Abu al-Wafā' al-Afghānī, who edited the book, mentions another copy in Egyptian libraries without discussing the manuscripts and their histories. He chose the title *Akhbār Abī Ḥanīfa* (News of and Reports about Abu Hanifa) even though the manuscript bears the abovementioned title. Since the book was primarily concerned with the history of Iraqi Hanafis, this might be a reason for its limited circulation: Iraqi Hanafis generally inclined to the Mu'tazili creed, whereas Hanafis from Samarqand and other Central Asian centers seem to have disassociated themselves from the Mu'tazilites. For the theological and legal differences between Maturidi and Iraqi Hanafism, see Şükrü Özen, *Ebu Mansur el-Maturidi'nin Fıkıh Usulünün Yeniden İnşası* (Istanbul, 2001), 161–210. For the other theological affiliations of Hanafi scholars, see Wilferd Madelung, "The Early Murji'a in Khurasan and Transoxania and the Spread of Hanafism," *Der Islam* 59, no. 1 (1982): 32–39.
46. TSMK, A. MS 2814 and A. MS 2815 (with the seal of Bayezid II).

47. See *TDVİA*, s.v. “Alāeddin Trablusi,” by Abdullah Kahraman.
48. The name of Shaykh Badr al-Din was written in different ways by Ottoman scholars. ‘Atufi spells it as “Ibn Simāwuna” and “Ibn Simāwina” (97 {17–19}). For a discussion of the spellings of his name, see the introduction to the translation of *Jāmi‘ al-fuṣūlayn: Yargılama Usulüne Dair, Cāmiu’l-fusuleyn*, ed. Yunus Apaydın (Ankara: Kültür ve Turizm Bakanlığı, 2012), 7–8.
49. The multiple books that were copied for or dedicated to Mahmud Pasha require further study. In the existing copies of al-Kafiyaji’s work that were dedicated to Mahmud Pasha, the grand vizier is referred to with titles used in the language of the Mamluk chancery. Furthermore, the dedicatory notes indicate that the books were copied for his personal library. Perhaps these books were transferred to the Topkapı Palace Library after Mahmud Pasha’s execution in 1474.
50. Other books by al-Kafiyaji that bear the seal of Bayezid II and are listed in ‘Atufi’s inventory include the following copies: SK, Ayasofya MS 525, 2882, 3403.
51. Imām al-Ḥaramayn al-Juwaynī, *Mughīth al-ḥalq*, SK, Ayasofya MS 2194.
52. SK, Ayasofya MS 1625, fol. 26a.
53. *Türkçe nazm eyledüm yazdum ānı, bî-edeblik ittiliğin bu deni* (“I wrote it in rhymed prose in Turkish and acted in such an ill manner”): *Kitāb al-farāiz bi-al-turkiyyati al-manzūmati*, SK, Ayasofya MS 1620, fols. 3a–b.
54. Other books on inheritance that bear the seal of Bayezid II include the following: Muḥsin al-Qaysarī, ‘Abd al-Muḥsin b. Muḥammad Majd al-Dīn, *Jāmi‘ al-durar fī nazm al-farā’iz* (Combining of Pearls in Versifying the Book of Inheritance), SK, Ayasofya MS 1622/1, fols. 1a–11a; and 1621, in Arabic. The second book (Ayasofya MS 1621) is titled *Kitāb al-bihār al-zāhira fī al-fiqh*. Muḥyi al-Dīn Muḥammad b. ‘Alī al-Adirnavī (Edirnevī), *Hashiyya ‘alā sharḥ farā’iz al-sirājiyya li-al-sayyid*, copied in 904 (1498–99). It lacks Bayezid II’s seal but bears a notation by ‘Atufi. See also ‘Imād al-Dīn Yaḥyā b. Aḥmad al-Kāshī, *Iqdāḥ al-maqāsid li-farā’iz al-fawā’id*, dated 831 (1427–28), SK, Ayasofya MS 1620. Aḥmed bin Zakariyya b. Yaḥyā al-Ḥusaynī, *Nazm-i farā’iz bi-al-fārisiyya* (A Versified Book on Inheritance Law), copied in 896 (1490–91), SK, Ayasofya MS 1625. In ‘Atufi’s inventory the book referred to as *Kitāb fī ‘ilm al-farā’iz wa rasā’il fī al-hisāb* (The Book on Inheritance and Treatises on Arithmetic) could be the following text: *Nakth al-masā’il fī ‘ilm al-farā’iz*, by Kāmil bin Thābit al-Faraḍī al-Manṣūrī, copied in 783 (1381–82), SK, Ayasofya MS 2761, or *Kitāb nazm al-farā’iz bi-al-fārisiyya fī al-fiqh*, SK, Ayasofya MS 1623.
55. Shahab Ahmed and Nenad Filipović, “The Sultan’s Syllabus: A Curriculum for the Ottoman Imperial Medreses Prescribed in a *Fermān* of Qānūnī I Süleymān, Dated 973 (1565),” *Studia Islamica* 98–99 (2004): 183–218.

LIST OF ENTRIES

BOOKS ON ISLAMIC JURISPRUDENCE AND BIOGRAPHIES OF IMAMS

(*Tafṣīlu kutubi al-fiqhi wa-kutubi manāqibi al-a'immati*)

1. 'Alī b. Abī Bakr b. 'Abd al-Jalīl al-Marghīnānī (d. 1197). *Kitābu al-bidāyati ay matni al-Hidāyati allatī allafahā ṣāhibu al-Hidāyati* (Primer explicated in *The Guidance* by its author), 83 {2}. MANUSCRIPTS: SK, Ayasofya 1525, copied in 1071 (1660–61); SK, Hacı Mahmud Efendi 1129/1. EDITION: *Bidāyat al-mubtadī: al-Matn alladhī sharaḥahu mu'allifuhu fī kitāb al-Hidāya fī al-fiqh al-Ḥanafī* (A Classical Manual on the Hanafī Juridical School), ed. Saed Bakdash, London: Mu'assasat al-Furqān li-al-Turāth al-Islāmī, Markaz Dirāsāt al-Makhṭūṭāt al-Islāmiyya, 2016. One other copy listed:
2. Same as above with variant title: *Kitābu bidāyati al-mubtadī fī al-fiqhi* (Primer for a Novice), 83 {3}.
3. 'Alī b. Abī Bakr b. 'Abd al-Jalīl al-Marghīnānī (d. 1197). *Kitābu al-hidāyati fī sharḥi al-Bidāyati* (The Book of Guidance: A Commentary on *The Primer*) [in two volumes], 83 {5}. MANUSCRIPT: Manisa Yazma Eser Kütüphanesi, Hk. 509 (seal of Bayezid II), copied in 818 (1416). EDITIONS: *Al-Hidāya sharḥ Bidāyat al-mubtadī*, ed. Muḥammad Muḥammad Tāmir and Ḥafīz 'Āshūr Ḥafīz, Cairo: Dār al-Salām, 2000; *Al-Hidāya, The Guidance: A Translation of al-Hidāya fī sharḥ Bidāyat al-mubtadī, a Classical Manual of Ḥanafī Law*, trans. Imran Ahsan Khan Nyazee, 2 vols., Bristol, England: Amal Press, 2006–8; *Hidayah: Commentary on the Islamic Laws Sheikh Burhanuddin Abi al-Hasan al-Marghinani*, trans. Charles Hamilton, rev. and ed. Z. Baimtner, Karachi: Darul Ishaat, 2007.
4. Same as above [in one volume], 83 {5–6}.
5. Same as above [in one volume], 83 {6–7}.
6. Same as above [in one volume], 83 {7}.
7. Same as above [in one volume], 83 {8}.
8. Same as above with note identifying copyist: *Mawlānā Khidīr Shāh (Ḥızır Şāh) al-Balāṭī*, 83 {8–9}.
9. Same as above with the note *fī al-fiqhi*, 83 {10}.
10. Same as above with the note *fī al-fiqhi*, 83 {10–11}.
11. Same as above [shorter version with note on the copyist]: *Mujalladun ṣaghīrun min Kitābi al-hidāyati ruqīma fīhi bi-anna jamī'a ḥawāshīhi wa-i'jāmi matnihi [juz'āni] bi-khaṭṭi al-Sayyid al-Sharīf al-Niḥrīr al-Jurjānī -quddisa sirruhū- fī al-fiqhi* (Shorter Book of Guidance containing marginal glosses and compiling chapters copied by the hand of al-Sayyid al-Sharīf al-Jurjānī, the Learned—may his mystery be blessed), 83 {11–12}.
12. Muḥammad b. al-Ḥasan al-Shaybānī (d. 805). *Kitābu al-aṣli li-Imām Muḥammad* (The Book of [Major Legal] Principles [and Cases]), 83 {13}. MANUSCRIPTS: Discussed in the introduction of Boynukalın's edition. The following copies are in SK: Murad Molla 1041; Ayasofya 1026; Hamidiye 546; Aşır Efendi 87, 91, 89; Carullah 575–81. EDITIONS: *Kitāb al-aṣl*, ed. Mehmet Boynukalın, 10 vols., Beirut: Dār Ibn Ḥazm li-al-Ṭibā'a wa-al-Nashr wa-al-Tawzī', 2012.
13. Muḥammad b. al-Ḥasan al-Shaybānī (d. 805). *Mukhtaṣaru al-Aṣli* (Abridgment of *The Principles*), 83 {13}. This book is attributed to al-Shaybānī by 'Atufi, but the abridgement was made by al-Ḥākim al-Shahīd (d. 945).

14. Muḥammad b. al-Ḥasan al-Shaybānī (d. 805). [*Al-Ṣiyaru al-kabīri li-Imām Muḥammad* (Islamic Law of Nations: The Conduct of State Affairs), 83 {13}. MANUSCRIPT: SK, Ayasofya 1199; SK, Fatih 4403/2. EDITIONS: Türkiye Diyanet Vakfı, 1989–91; *The Islamic Law of Nations: Shaybānī's Siyar*, trans. Majid Khadduri, Baltimore: Johns Hopkins University Press, 1966. The book was also translated into Ottoman Turkish by Muḥammad Munib 'Ayntābī (d. 1823), SK, Ayasofya 1049 (printed in two vols., Istanbul, 1241).
15. Muḥammad b. al-Ḥasan al-Shaybānī (d. 805). [*Al-Jāmi'u al-ṣaghīri li-Imām Muḥammad* (Shorter Compilation). Transmissions of Abū Ḥanīfa's opinions on the authority of Abū Yūsuf, 83 {14}.
16. Abū al-Ḥasan 'Ubayd Allāh b. al-Ḥusayn al-Karkhī (d. 952). *Al-Mukhtaṣaru al-Karkhī* (The Compendium of al-Karkhī), 83 {14}.
17. Abū al-Faṭḥ Majd al-Dīn Muḥammad b. Maḥmūd al-Ḥusayn b. Aḥmad al-Ustrūshanī (al-Ustrūshanī) (d. 1240). *Fuṣūlu al-Ustrūshūnī* [sic] (The Judicial Discernments of al-Ustrūshanī), 83 {14}. MANUSCRIPTS: TSMK, A 821–23; SK, Fatih, 2423, 2426, 2433, 2435.
18. Abū al-Faṭḥ Abī Bakr b. 'Imād al-Dīn b. Abī Bakr b. 'Abd al-Jalīl al-Marghīnānī? (d. ca. 670/1271). *Fuṣūlu 'Imādiyyatin* (*The Judicial Discernments of al-'Imādī*) [= *Fatāwā fuṣūl al-iḥkām fī uṣūl al-aḥkām al-ma'rūf bi-fuṣūl al-'Imādī* (Judicial Discernments Fortifying the Principles of Judgment, known as *The Judicial Discernments of al-'Imādī*)],¹ 83 {14}. MANUSCRIPTS: SK, Murad Molla 1168, copied in 819 (1416–17); Beyazıt Devlet Kütüphanesi, Veliyüddin Efendi 1322, copied in 857 (1453); SK, Murad Molla 1172, copied in 908 (1502).
19. Abū Ja'far al-Ṭahāwī (d. 933). *Mukhtaṣaru Ṭahāwī* (Compendium of al-Ṭahāwī), 83 {15}. MANUSCRIPTS: Extant manuscript copies are later than the inventory; there is a commentary on this work, titled *Sharḥ Mukhtaṣar al-Ṭahāwī*, TSMK, A. 1075.
20. Jalāl al-Dīn Shams al-Dīn al-Kurlānī al-Khwarazmī (d. 1365). *Kitābu al-kifāyati fī sharḥi al-Hidāyati* (The Sufficient: Commentary on *The Guidance*) [in one volume], 83 {18}. MANUSCRIPTS: SK, Laleli 1077; SK, Mesih Paşa 23, 25; SK, Yeni Cami 509.
21. Same as above [in one volume], 83 {18–19}.
22. Qiwām al-Dīn Amīr Kātib b. Amīr 'Umar al-Itqānī (d. 1357). *Kitābu ghāyati al-bayāni fī sharḥi al-Hidāyati* (The Extreme Eloquence: Commentary on *The Guidance*) [= *Ghāyat al-bayān wa-nādirat al-zamān fī ākhir al-awān fī sharḥ al-Hidāya* (The Extreme Eloquence and Rarity of Time at the End of Time: Commentary on *The Guidance*)] [in six volumes], 83 {19}–84 {1}. MANUSCRIPTS: SK, Ayasofya 1320, 1321; SK, Ismihan Sultan 154, copied in 743/1342; SK, Süleymaniye 542 (seal of Bayezid II and note of 'Atufi), second volume, copied in 733/1332.
23. Abū 'Abd Allāh Tāj al-Sharī'a 'Umar b. Şadr al-Sharī'a al-Awwal 'Ubayd Allāh b. Maḥmūd al-Maḥbūbī al-Bukhārī (d. 1309). *Kitābu nihāyati al-kifāyati fī sharḥi al-Hidāyati* (The Book of the Ultimate, the Sufficient: Commentary on *The Guidance*) [in two volumes], 84 {1}. MANUSCRIPT: SK, Fatih 1993.
24. Jalāl al-Dīn 'Umar b. Muḥammad al-Khabbāzī (d. 1292). *Kitābu sharḥi al-Hidāyati bi-annahū li-l-Khabbāzī* (Commentary on *The Guidance*), 84 {2}. MANUSCRIPTS: SK, Turhan Valide Sultan 141, copied in 791 (1388–89); SK, Yeni Cami 406, copied in 710/1310.
25. Same as above, 84 {2–3}.
26. Same as 23 [in one volume], 84 {3}.
27. Same as above [first volume], 84 {4}.
28. Same as 20 [in two volumes], 84 {4–5}.
29. Akmal al-Dīn Muḥammad b. Maḥmūd al-Bābartī (d. 1384). *Kitābu al-'ināyati fī sharḥi al-Hidāyati* (The Book of Providence: Commentary on *The Guidance*) [in three volumes], 84 {5–6}. EDITION:

- Al-ʿInāya sharḥ al-Hidāya*, ed. Abū Maḥrūs ‘Amr b. Maḥrūs, 6 vols., Beirut: Dār al-Kutub al-‘Ilmiyya, 2007.
30. “*Kitābu ḥawāshī al-Hidāyati fī al-fiqhi*” (Commentaries on *The Guidance*), 84 {6}.
 31. Burhān al-Sharī‘a Maḥmūd b. Ṣadr al-Sharī‘a al-Awwal ‘Ubayd Allāh b. Maḥmūd al-Maḥbūbī al-Bukhārī (fl. 13th c.). *Kitābu al-wiqāyati fī al-fiqhi* (Book of Protection) [= *Kitāb al-wiqāya fī masā’il al-Hidāya* (Book of Protection on the Legal Cases in *The Guidance*)], 84 {11}. Copies abound.

 47. Same as above, 85 {3}.
 48. Same as above, 85 {3}.
 49. Ibn al-Malak ‘Abd al-Laṭīf b. Firīshte ‘Izz al-Dīn b. Amīn al-Dīn (d. ca. 1418). *Kitābu sharḥi al-Wiqāyati li-Ibn al-Malak* (Commentary on *The Protection*), 85 {4}.
 50. ‘Alā’ al-Dīn ‘Alī al-Aswad (Ḳara Hoca) (d. 1397). *Kitābu sharḥi al-Wiqāyati al-marqūmu bi-annahū li-l-Aswad ‘Alā’ al-Dīn* (Commentary on *The Protection*) [in two volumes], 85 {4–5}. MANUSCRIPT: SK, Turhan Sultan 140, only the second volume.
 51. “*Kitābu badri al-sharī‘ati fī sharḥi Ṣadr al-Sharī‘a fī al-fiqhi*” (The Book of the Moon of the Shari‘a on the Commentary of *Sadr al-Shari‘a*), 85 {10}.
 52. Husām-zāda, Muṣliḥ al-Dīn Muṣṭafā b. Ḥusām al-Dīn (d. ca. 1488). *Kitābu al-tashriḥi fī sharḥi Ṣadr al-Sharī‘a li-Mawlānā al-ma‘rūfi bi-Ḥusām-zāda (Ḥūsāmzāde) fī al-fiqhi* (Book of Explication on the Commentary of *Sadr al-Shari‘a*) [in two volumes], 85 {10–12}. MANUSCRIPTS: SK, Hamidiye 453; SK, Turhan V. Sultan 118 (seal of Bayezid II), second volume.
 53. “*Kitābu ḥawāshī Ṣadr al-Sharī‘a fī al-fiqhi*” (Marginal Glosses of *Sadr al-Shari‘a*), 85 {14}.
 54. Same as above with variant title: *Kitābu ḥāshiyati Ṣadr al-Sharī‘a* [in two volumes], 85 {14–15}.
 55. Same as above, 85 {15}.
 56. Same as above, 85 {16}.
 57. Muḥyi al-Dīn Muḥammad b. Ibrāhīm b. Ḥasan al-Niksārī (d. 1495). *Kitābu ḥāshiyati Ṣadr al-Sharī‘a ilā ākhiri bābi al-naḥaqati fī al-fiqhi* (Marginal Gloss of *Sadr al-Shari‘a* to the end of the Chapter on Alimony), 85 {16–17}. MANUSCRIPTS: SK, Bağdadlı Vehbi 536; SK, Kadızade Mehmed 133; SK, Ayasofya 1118; TSMK, A. 991 (seal of Bayezid II and ‘Atufi’s note on fol. 1a: *Ḥawāshī ṣadr al-sharī‘a ilā ākhir bāb al-naḥaqa*), copied in 889 (1484).

58. Muhyī al-Dīn Muḥammad b. Ibrāhīm b. Ḥasan al-Niksārī (d. 1495). *Kitābu ḥāshiyati Ṣadr al-Sharī'a ilā ākhiri manāsiki al-ḥajji li-Mawlānā al-Niksārī fī al-fiqhi* (Marginal Gloss of *Sadr al-Sharī'a* to the end of the Chapter on Rituals of Pilgrimage), 85 {17–18}.
59. Volume containing:
 - 59a. Mirim Çelebi Maḥmūd b. Muḥammad b. Qāḍizāda al-Rūmī (d. 1525). *Risālatun fī samti al-qiblati* (Treatise on the Direction of Prayer), 85 {19}. MANUSCRIPTS: SK, Ayasofya 2628 (written for Bayezid II who is mentioned on fol. 2a); SK, Ayasofya 2629; both copied in Bayezid II's era. Another book by Mirim Çelebi with Bayezid's seal and 'Atufi's note is Ayasofya 2697, *Sharḥ Zīj Ulugh Beg*, in Persian, copied in 904 (1498).
 - 59b. Sulaymān b. 'Alī al-Qaramānī (d. 1518). *Hāshiyatu Ṣadr al-Sharī'a li-Mawlānā Sulaymān al-Qaramānī fī al-fiqhi* (Marginal Gloss on *The Protection*), 85 {19}–86 {1}. MANUSCRIPTS: SK, Turhan Valide Sultan 110 (seal of Bayezid II and note of 'Atufi), contains two books by the same author. The first one, fols. 1b–8b, is on *Samt al-qibla* (The Direction of the Qibla) citing the name Bayezid II, fol. 1b; the second one, fols. 9b–241b, is titled *Hāshiyat Ṣadr al-Sharī'a* (Marginal Gloss on *Sadr al-Sharī'a*) and dated 902 (1496).
60. Akhizāda Yūsuf b. Junayd al-Toqādī (Aḥī Çelebi) (d. 1500). *Kitābu ḥāshiyati Ṣadr al-Sharī'a al-musammā bi-Dhakhīratī al-'uqbā li-Mawlānā Akhī fī al-fiqhi* (Provisions of the Hereafter: Marginal Gloss on the Commentary of *The Protection*), 86 {1–2}. MANUSCRIPTS: SK, Ayasofya 1114, 1115.
61. "*Hāshiyatun 'alā kitābi Ṣadr al-Sharī'a fī masā'ili al-ṣubḥi wa-al-dā'irati al-hindiyyati fī al-fiqhi*" (Marginal Gloss on the Book of *Sadr al-Sharī'a* on Issues Concerning the Morning and the Indian Circle), 86 {2–3}.
62. Ibn al-Sā'ātī, Abū al-'Abbās Muẓaffar al-Dīn Aḥmad b. 'Alī (d. 1295). *Kitābu majma'i al-baḥrayni fī al-fiqhi* (The Junction of the Two Seas and the Intersection of Crossroads), 86 {7}. EDITION: Muẓaffar al-Dīn Aḥmad b. 'Alī b. Tha'lab, al-ma'rūf bi-Ibn al-Sā'ātī al-Ḥanafī, *Majma' al-baḥrayn wa-multaqā al-nayyirayn fī al-fiqh al-Ḥanafī*, ed. Ilyās Qablān, Beirut: Dār al-Kutub al-'Ilmiyya, 2005.
63. Same as above, 86 {7}.
64. Same as above, 86 {8}.
65. Same as above, 86 {8}.
66. "*Kitābu naẓmi Majma'i al-baḥrayni fī al-fiqhi*" (The Versified Book of *The Junction of the Two Seas*), Turkish, 86 {9}.
67. Same as 62, 86 {9–10}.
68. Ibn al-Malak 'Abd al-Laṭīf b. Firishte 'Izz al-Dīn b. Amīn al-Dīn (d. ca. 1418). *Sharḥu Majma'i al-baḥrayni li-Ibn al-Malak fī al-fiqhi* (Commentary on *The Junction of the Two Seas*), 87 {12}. MANUSCRIPTS: TSMK, A. 713/1-2, A. 712, read and emended with corrections (*saḥḥaḥa*) by their owner Aḥmad b. Muḥammad al-'Umarī in 871 (1466).
69. Abū al-Barakāt Ḥāfiẓ al-Dīn 'Abd Allāh b. Aḥmad b. Maḥmūd al-Nasafī (d. 1310). *Kitābu kanzi al-daqa'iqi fī al-fiqhi* (The Treasury of Intricacies), 86 {14}. MANUSCRIPTS: SK, Mahmud Paşa 230, copied in 845 (1441); SK, Mehmed Ağa Camii 110, copied in 874 (1469–70); SK, Laleli 1143, copied in 865 (1460–61); SK, Serez 752, copied in 879 (1474–75) at the Imamiye madrasa in Tokat; SK, Serez 753, copied in 812 (1409). EDITION: *Kanz al-daqa'iq*, ed. Şalāḥ al-Dīn al-Ḥimşī, Damascus: Dar al-Beyrouti, 2009.
70. Same as above, 86 {14}.
71. Same as above, 86 {15}.

72. Same as above, 86 {15}.
73. Same as above, 86 {16}.
74. Same as above, 86 {16}.
75. "*Kitābu sharḥi al-Kanẓi fī al-fiqhi*" (Commentary of *The Treasury [of Intricacies]*), 86 {19}.
76. Shams al-Dīn al-Kardārī (d. ?). *Kitābu ramzi al-ḥaqā'iqi fī sharḥi Kanẓi al-daqa'iqi* (Sign of Truths on the Commentary of *The Treasury of Intricacies*), 86 {19}. MANUSCRIPT: SK, Süleymaniye 485 (seal of Bayezid II and 'Atufi's note), with attribution to Shams al-Dīn al-Kardārī on fol. 1b. Copied in Barda' in 896 (1490); this particular copy seems to be a unicum.
77. Bālī b. 'Isā Faqīh b. Sulaymān Faqīh al-Elmāluwī (Elmalılı) (d. 1487?). *Kitābu 'uyūni al-ḥaqā'iqi fī sharḥi Kanẓi al-daqa'iqi fī al-fiqhi* (Spring of Truths on the Commentary of *The Treasury of Intricacies*), 87 {1}. MANUSCRIPT: Çorlulu Ali Paşa 187, copied in 894 (1488), unicum. The author states on fol. 2a that he wrote the commentary while he was a judge and presented it as a gift to Bayezid II. There is a note by 'Atufi, but Bayezid II's seal was erased. The manuscript, endowed by Çorlulu Ali Paşa (d. 1711), bears his endowment note and seal.
78. Same as 75, 87 {1–2}.
79. "*Kitābi kashfi al-ḥaqā'iqi fī sharḥi Kanẓi al-daqa'iqi*" (Discovery of Truths on the Commentary of *The Treasury of Intricacies*) [*Mujalladun awwalu wa-mujalladun thālithun wa-lam yūjad mujalladun thānin minhu* (First and third volumes; second volume missing)], 87 {2–4}.
80. Same as 75 [second volume], 87 {4}.
81. Abū al-Ḥusayn Aḥmad b. Abī Bakr Muḥammad b. Aḥmad al-Qudūrī (d. 1037). *Kitābu al-Qudūrī fī al-fiqhi* (Book of al-Qudūrī), 87 {9}. MANUSCRIPT: SK, Turhan Valide Sultan, 155, copied in 870 (1465–66) for the library of Jānī Beg.
82. Same as above, 87 {9}.
83. Same as above, 87 {9–10}.

88. A compendium of the above with the title: *Kitābu mukhtaṣari al-qudūrī fī al-fiqhi* (The Compendium of al-Qudūrī), 87 {12}. MANUSCRIPTS: SK, Ayasofya 1421 (a Mamluk-period manuscript); SK, Ayasofya 1429, 1430. EDITION: *Le statut personnel en droit musulman hanéfite*, ed. and trans. G. H. Bousquet and L. Bercher, Tunis: Recueil Sirey, 1953.
89. Najm al-Dīn Mukhtār b. Maḥmūd b. Muḥammad al-Zāhidī (d. 1260). *Kitābu sharḥi al-Qudūrī li-l-Imām al-Zāhidī fī al-fiqhi* (Commentary on *The Compendium* of al-Qudūrī) [= *Al-Mujtabā sharḥ Mukhtaṣar al-Qudūrī* (The Chosen: Commentary on *The Compendium* of al-Qudūrī)], 87 {16}. MANUSCRIPTS: SK, Çorlulu Ali Paşa 209, copied in 890 (1485); SK, Damad İbrahim 545, copied in 864 (1459–60) by Hamza b. Qāsim b. al-Shihābī.
90. Same as above, 87 {16–17}.
91. "*Kitābu al-ḥāshiyati 'alā al-khulāṣati fī sharḥi al-Qudūrī fī al-fiqhi*" (Marginal Gloss on the Summary of the Commentary of al-Qudūrī), 87 {18}.
92. 'Alīm b. 'Alā' al-Anṣārī al-Andaraptī al-Dihlawī al-Hindī (d. 1384). *Kitābu al-fatāwā al-tātārkhānīyyati* (Fatwas of Tatārkhān) [in one volume], 88 {1}. EDITION: *Al-Fatāwā al-Tātārkhānīyya fī al-fiqh al-Ḥanafī*, ed. 'Abd al-Laṭīf Ḥasan 'Abd al-Raḥmān, Pakistan: Maktabah-i 'Umariyya, 2005.
93. Abū al-Maḥāsin Fakhr al-Dīn Ḥasan b. Maṣṣūr b. Maḥmūd al-Uzjandī (al-Uzkandī) al-Farghānī Qāḍikhān (d. 1196). *Kitābu fatāwā al-Awzajandī [al-Ūzjandī] al-ma'rūfi bi-Qāḍi Khān [fī madhhab*

imām al-aʿẓam Abī Ḥanīfa al-Nuʿmān] (Fatwas of Qāḍikhān in the School of The Greatest Imam, Abu Hanifa), 88 {5}. Copies abound, and printed several times. No critical edition.

94. Same as above, 88 {5–6}.
95. Same as above, 88 {6–7}.
96. Same as above [to the end of the Book on Testimony] with the note *fī al-fiqhi* [in three volumes], 88 {7–9}.
97. Same as above [in two volumes], 88 {9–10}.
98. Same as above [in one volume], 88 {10–11}.
99. Abū al-Maḥāsin Fakhr al-Dīn Ḥasan b. Maṣṣūr b. Maḥmūd al-Uzjandī (al-Uzkandī) al-Farghānī Qāḍikhān (d. 1196). *Kitābu mukhtaṣari al-Fatāwā al-khāniyyati al-mansūbati ilā Qāḍi Khān fī al-fiqhi* (Abridgement of the fatwas of Qāḍikhān), 88 {11–12}.
100. Akhizāda Yūsuf b. Junayd al-Toqādī (Aḥī Çelebi) (d. 1500). *Kitābu muntakhabi Fatāwā Qāḍi Khān fī al-fiqhi* (Selections from the fatwas of Qāḍikhān), 88 {12–13}. The name of Sultan Bayezid II is mentioned, and it is indicated that this selection was made for the library of the Sultan (*li-akh-duma bihi khidhāna man huwa nāṣir al-milla Bāyazid Khān*), fols. 1b–2a. MANUSCRIPTS: SK, Yozgat 317, possibly autograph, copied in 896 (1490).
101. “*Kitābu tarjamati al-Fatāwā al-khāniyyati fī al-fiqhi*” (A Translation of *al-Tatarkhaniyya*), Turkish, 88 {13}.
102. Burhān al-Dīn Maḥmūd b. Aḥmad b. ‘Abd al-‘Azīz ibn Māza al-Bukhārī (d. 1219–20). [*Kitābu al-muḥīṭi al-burhānī fī al-fiqhi* (The Ocean of Proofs —can also be read as “Burhan [al-Dīn]’s Comprehensive Book”— on [Hanafi] law) [*Asharatu mujalladātin min al-muḥīṭi ... wa-lam yūjad sā’iru mujalladātihī* / Ten volumes from *al-Muḥīṭ* and the other volumes do not exist], 88 {18}–89 {6}. EDITION: Maḥmūd ibn Aḥmad ibn ‘Abd al-‘Azīz ibn ‘Umar ibn Māzah al-Bukhārī, *Al-Muḥīṭ al-burhānī fī al-fiqh al-Nuʿmānī*, ed. Aḥmad ‘Izzū ‘Ināyah, 11 vols., Beirut: Dār Iḥyā’ al-Turāth al-‘Arabī, 2003.
- 102a. *Mujalladun minhā ghayru murtabiṭin [bimā ba’dahu, ṣaḥḥ] wa-huwa awwalu mujalladātihī fa-fīhi kitābu al-ṭahārati wa-kitābu al-ṣalāti* (First volume, containing the *Book on Purification* and the *Book on Prayers*, not connected to what comes after), 88 {18–19}.
- 102b. *Thal[ā]thu mujalladātin minhā ba’duhā murtabiṭun ma’a al-ba’di al-ākharī fa-awwalu mā fī hādhihī al-thalāthi kitābu al-rujū’i ‘an al-shahādāti wa-ākhiru mā fihā kitābu al-ikrāhi* (Three volumes, containing consecutive chapters, starting with the *Book on Return* and ending with the *Book on Coercion*), 88 {19}–89 {1–2}.
- 102c. *Khamsu mujalladātin minhā ba’duhā murtabiṭun ma’a al-ba’di al-ākharī fa-awwalu mā fī hādhihī al-khamṣi kitābu al-‘atāq wa-ākhiru mā fihā kitābu al-ijārati* (Five volumes, containing consecutive chapters, starting with the *Book on Manumission* and ending with the *Book on Rent*), 89 {2–4}.
- 102d. *Mujalladun minhā ghayru murtabiṭin bi-mā qablahū wa-huwa ākhiru mujalladātihī fa-fīhi kitābu al-shurūṭi* (Final volume, containing the *Book on Legal Writings*, not connected to what comes before), 89 {4–5}.
103. Abū ‘Abd Allāh Raḍī al-Dīn Burhān al-Islām Muḥammad b. Muḥammad al-Sarakhsī al-Tūsānī? (d. ca. 1174). *Kitābu al-muḥīṭi bi-masā’il al-kutubi al-mansūbu ilā al-Sarakhsī fī al-fiqhi* (The Ocean) [in one volume], 89 {11}. MANUSCRIPT: SK, Turhan Valide Sultan 152. Also attributed to Shams al-A’imma Muḥammad b. Aḥmad al-Ḥanafī al-Sarakhsī (d. 1090?).
104. Same as above [in two volumes with the note *lākin lā tawāfuqa bayna jildayhimā* (“but the two volumes do not agree with each other”)], 89 {12–13}.

105. Shams al-A'imma Muḥammad b. Aḥmad al-Ḥanafī al-Sarakhsī (d. 1090?). *Kitābu sharḥi Mukhtaṣari Mabsūṭi Muḥammad Ibn al-Ḥasan -raḥimahū Allāh- li-Shams al-A'imma al-Sarakhsī fi al-fiqhi* (Commentary on the Abridged *Summa* of Muḥammad b. Ḥasan [al-Shaybānī (d. 805)]) [in two volumes], 89 {18–19}. MANUSCRIPT: TSMK, A. 1142 (seal of Bayezid II).
106. Same as above [first volume], 89 {19}–90 {1}.
107. Same as above [second volume, summary], 90 {1–2}.
108. Same as above [second volume, summary], 90 {3–4}.
109. Mukhtār b. Maḥmūd al-Najm al-Dīn al-Zāhidī (d. 1259). *Kitābu qinyati al-munyati fi al-fiqhi* (Acquisition of Hope in the Completion of Property) [also known as *qunya*], 90 {8}. This book was abridged by Ibn al-Sirāj al-Qonawī in 770 (1368–69) in Cairo. MANUSCRIPTS: SK, Ayasofya 1353 (seal of Bayezid II), copied in 847 (1443); SK, Ayasofya 1349 (seal of Bayezid II and 'Atufi's note), copied in 777 (1375–76); SK, Ayasofya 1351 (seal of Bayezid II and 'Atufi's note), copied in 760 (1358–59). EDITION: *The Khwarezmian Element in the Qunyat al-munya*, ed. D. N. MacKenzie, trans. Hasan Amarāt and D. N. MacKenzie, London: School of Oriental and African Studies, University of London, 1990.
110. Same as above, 90 {8}.
111. Same as above, 90 {9}.
112. Same as above, 90 {9}.
113. Same as above, 90 {10}.
114. Same as above, 90 {10}.
115. Abū Ḥafṣ Najm al-Dīn 'Umar b. Muḥammad al-Nasafī (d. 1142). *Kitābu al-manzūmati fi al-fiqhi* (Versified Treatise on *The Debated Points* [of the Islamic schools of law]), 90 {13}. The work was translated into Ottoman Turkish ca. 731/1331 by the ruler of the city of Ḥama, Ibrāhīm b. Muṣṭafā b. 'Alīshīr al-Malīfdawī. MANUSCRIPTS: SK, Turhan Sultan 160 (seal of Bayezid II), copied in the mosque of Shaykhūna in Cairo in 755/1354. EDITIONS: The above-mentioned Turkish translation was edited by Milan Adamovic, *Die Rechtslehre des Imām an-Nasafī in türkischer Bearbeitung vom Jahre 1332*, Stuttgart 1990; Azmi Bilgin, *Naẓmu'l-Hilāfiyyāt Tercümesi*, Ankara, 1996.
116. Same as above, 90 {13}.
117. "*Kitābu sharḥi al-Manzūmati fi al-fiqhi*" (Commentary on *The Versified Treatise*), 90 {15}. Possibly: 'Alā' al-Dīn Muḥammad b. 'Abd al-Ḥamid al-Samarqandī al-Usmānī, *Sharḥ manzūmat al-Nasafī fi al-khilāfiyyāt* (Commentary on Nasafī's Versified Treatise on Debated Points). MANUSCRIPT: SK, Turhan Valide Sultan 132 (seal of Bayezid II and 'Atufi's note), copied in 805 (1402–3) by 'Ubayd Allāh b. 'Abd al-'Azīz b. Muḥammad al-Khwārazmī.
118. Same as above, 90 {15}.
119. Same as above, 90 {16}.
120. Abū al-Maḥamid Maḥmūd b. Muḥammad b. Dāwūd al-Lu'lū'ī al-Bukhārī al-Afshanjī (d. 1272). *Kitābu ḥaqā'iqi al-manzūmati fi al-fiqhi [fi sharḥ Manzūmat al-Nasafī fi al-khilāfiyyāt]* (Truths of *The Versified Treatise*), 90 {16}. MANUSCRIPT: SK, Turhan Valide Sultan 133 (seal of Bayezid II and 'Atufi's note), copied by Shāḥ Walī b. Sa'd al-Dīn b. Ilyās in 870 (1465).
121. Abū al-Faḍl Majd al-Dīn 'Abd Allāh b. Maḥmūd b. Mawdūd b. Maḥmūd b. Baldajī al-Mawṣilī (d. 1284). *Kitābu al-ikhtiyārī fi sharḥi al-Mukhtārī fi al-fiqhi [= al-Ikhtiyār fi ta'līl al-Mukhtār]* (The Book of Choice: Commentary on *The Chosen*) [in one volume], 90 {19}. MANUSCRIPTS: SK, Turhan Valide Sultan 127 (seal of Bayezid II and 'Atufi's note), copied in 806 (1403–4); SK, Turhan Valide Sultan 129 and 153. EDITION: *Al-Ikhtiyār li-ta'līl al-Mukhtār*, ed. Shu'ayb al-Arna'ūt, Aḥmad Muḥammad Barhum, and 'Abd al-Laṭīf Ḥirz Allāh, Beirut: Dār al-Risāla al-'Ālamiyya, 2007.

122. Same as above, 90 {19}–91 {1}.
123. Muḥammad b. ‘Ubbād b. Malak-dād al-Akhlāṭī al-Khilāṭī (Khallāṭī) (d. 1254). *Kitābu talkhīṣi al-jāmi‘i al-kabīri li-l-‘Attābī fi al-fiqhi* (The Epitome of *The Larger Compilation*), 91 {3}. MANUSCRIPT: TSMK, A. 730 (seal of Bayezid II; perhaps copied at the time of Mehmed II). This work by al-Khilāṭī seems to have been one of the commentaries of *al-Jāmi‘ al-kabūr*. Both al-Ghujduwānī (d. 1370) (see no. 128 below) and Akmal al-Dīn al-Bābartī (d. 1384) praised it.
124. Same as above, 91 {3–4}.
125. Abū al-Naṣr Zayn al-Dīn Aḥmad b. Muḥammad b. ‘Umar al-‘Attābī (d. 1190). *Mukhtaṣaru al-Jāmi‘i al-kabīri li-l-‘Attābī fi al-fiqhi* (Abridgement of *The Larger Compilation*), 91 {4}. MANUSCRIPT: SK, Süleymaniye 605 (seal of Bayezid II and ‘Atufi’s note), copied in 738 (1337). It was endowed by Sultan Süleyman to his mosque library.
126. Same as 123, 91 {4–5}.
127. Same as 123, 91 {5}.
128. Abū al-‘Iṣma, Maṣ‘ūd b. Muḥammad b. Muḥammad al-Ghujduwānī (d. 1370). *Kitābu al-tanwīri fi sharḥi Talkhīṣi al-Jāmi‘i al-kabīri li-l-Maṣ‘ūd al-Ghujdawānī fi al-fiqhi* (The Book of Illumination in the Commentary on the Epitome of *The Larger Compilation*) [in two volumes], 91 {5–8}. MANUSCRIPTS: TSMK, A. 734; SK, Ayasofya 1206 (seal of Bayezid II and ‘Atufi’s note); SK, Süleymaniye 459 (seal of Bayezid II). The book was erroneously attributed in the Süleymaniye Library catalogue to al-Khilāṭī. In the introduction, the author acknowledges al-Khilāṭī and his commentary, but the book is a commentary on him. SK, Ayasofya 1206, which was copied in 826 (1424) in Herat, might be the ur-text. Also see SK, Carullah 654, copied in 734 (1333) in Aleppo.
129. Same as above [in two volumes], 91 {7–8}.
130. Same as above [in two volumes with the note *lā tawāfuqa bayna jilday-himā* (“the two volumes do not agree with each other”)], 91 {8–9}.
131. *“Kitābu sharḥi al-Jāmi‘i al-kabīri fi al-fiqhi”* (Commentary on *The Larger Compilation*) [in two volumes], 91 {9–10}.

Aḥmad al-Ḥanafī al-Sarakhsī (d. 1090?). *Kitābu sharḥi al-Siyari al-kabīri fī al-fiqhi* (Commentary on *The Islamic Conduct of State and International Affairs*), 93 {10}. MANUSCRIPT: SK, Turhan Valide Sultan 116 (seal of Bayezid II, and ‘Atufi’s note), copied in 866 (1461–62) at the madrasa of Sultan Murad II in Edirne by Mawlānā Ibrāhīm b. Khwāja

Dāwud al-Isfahānī, known as al-Madjī. Copy with Mehmed II's ex-libris was made for his personal study.

166. Same as above, 93 {10–11}.
167. Same as above, 93 {11–12}.
168. Abū al-Ḥasan ‘Alī b. Muḥammad al-Māwardī (d. 1058). *Kitābu al-ḥāwī ‘alā madhhabī al-shāfi‘ī fī al-fiqhi* (*The Comprehensive Manual on law according to the Shafi‘i school*), 93 {14}. MANUSCRIPTS: SK, Ayasofya 1100-1108. EDITIONS: *Al-Ḥāwī al-kabīr fī fiqh madhhab al-Imām al-Shāfi‘ī: Wa-huwa sharḥ Mukhtaṣar al-Muzanī*, ed. ‘Alī Muḥammad Maṣ‘ūd et al., Beirut: Dār al-Kutub al-‘Ilmiyya, 1999. There is another book with the same title attributed to Zayn al-Dīn Abū Ḥafs ‘Umar b. al-Wardī.
169. Same as above, 93 {14–15}.
170. Same as above, 93 {15–16}.
171. Aḥmad b. Ḥasan al-Jārpardī (d. 1346). *Kitābu al-amālī fī Sharḥi al-Ḥāwī ‘alā al-madhhabī al-shāfi‘ī fī al-fiqhi* (*The Book of Dictations: Commentary on The Comprehensive Manual on law according to the Shafi‘i School*), 93 {16–17}. This book might be the commentary on *al-Ḥāwī al-ṣaghīr* of ‘Abd al-Ghaffār al-Qazwīnī (d. 1266–67); a copy of it exists in the Halis Efendi library at Istanbul University, A. 648.
172. ‘Umar b. al-Wardī (d. 1348). *Kitābu bahjati al-ḥāwī ‘alā madhhabī al-shāfi‘ī fī al-fiqhi* (*The Splendor of The Great Comprehensive Manual*), 93 {17}. MANUSCRIPT: SK, Ayasofya 1039 (seal of Bayezid II, with his ex-libris: *ṣāhibuhu al-sultān Bāyazīd khallada Allāhu mulkahu*), copied in 759 (1357–58). This is a versified legal text in the Shafi‘i school. EDITION: Printed on the margin of al-Māwardī, *al-Ḥāwī al-kabīr*, ed. Maḥmūd Muṣṭafā et al., Beirut: Dār al-Fikr, 1994.
173. Rukn al-Islām Abū Ishāq Ibrāhīm b. Yūsuf al-Firūzābādī (d. 1083). *Kitābun mukhtaṣarun ‘alā madhhabī al-shāfi‘ī fī al-fiqhi* (*A Digest on the Shafi‘i School of Law*) [= *Kitāb al-tanbīh* (*The Book of Awakening*)], 93 {19}. It seems that the title was assigned by ‘Atufi based on the first line. MANUSCRIPT: TSMK, A. 1218 (seal of Bayezid II).
174. Same as above, 93 {19}–94 {1}.
175. Maḥmūd b. al-Ḥasan b. ‘Abd al-Razzāq al-Sarwistānī al-Shīrāzī (d. ?). *Kitābu mukhtaṣari al-Muḥarrari ‘alā madhhabī al-shāfi‘ī fī al-fiqhi* (*Abridgement of The Recorded on the Shafi‘i School of Law*), 94 {1–2}. MANUSCRIPT: TSMK, A. 1062 (seal of Bayezid II). The author is not mentioned in the manuscript, which seems to contain only a section of the book. It includes two other short works: *Risālat al-ḥudūd* (*The Book of Definitions*), which defines terminologies of primarily Shafi‘i legal theory, and a commentary on *al-Waraqāt* of al-Juwaynī. All of these may have been penned by the author of *al-Muḥarrar* (TSMK, A. 1060). The manuscript was collated, corrected, and given contextualizing cases (*qūbila, ṣuḥḥiha wa-quyyida*) in the year 877 (1472) in Damascus (fol. 238b).
176. Same as above, 94 {2}.
177. “*Kitābun mukhtaṣarun ‘alā madhhabī Mālik bin Anas fī al-fiqhi*” (*A Digest on the Maliki School of Law*). 94 {3}.
178. Same as 18 with variant title: *Kitābu fuṣūli al-aḥkāmī fī al-fiqhi yuqālu lahū al-Fuṣūlu al-‘imādiyyatu* (*Judicial Discernments of Principles of Judgment*, also known as *The Judicial Discernments of al-‘Imādī*), 94 {6}. MANUSCRIPT: SK, Amcazade Hüseyin 218.
179. Same as above with variant title: *Kitābu fuṣūlin ‘imādiyyatin mawsūmun bi-Fuṣūli al-aḥkāmī fī al-fiqhi* (*The Judicial Discernments of al-‘Imādī, also known as Judicial Discernments of Principles of Judgment*), 94 {7}.

180. Same as above with variant title: *Kitābu fuṣūli al-aḥkāmi fī uṣūl al-aḥkāmi al-shahīru bi-al-Fuṣūli al-‘imādiyyati fī al-fiqhi* (Judicial Discernments Fortifying the Principles of Judgment, also known as The Judicial Discernments of al-‘Imādī), 94 {8–9}.
181. Same as above with variant title: *Kitābu al-fuṣūli al-‘imādiyyati fī al-fiqhi* (The Judicial Discernments of al-‘Imādī), 94 {10}.
182. Ḥāfiẓ al-Dīn Abū al-Barakāt ‘Abd Allāh b. Aḥmad b. Maḥmūd al-Nasafī (d. 1310). *Kitābu al-kāfi fī sharḥi al-Wāfi fī al-fiqhi* (The Sufficent: Commentary on *The Entirety*) [in one volume], 94 {11}. MANUSCRIPTS: SK, Fatih 1849, 1850, 1852, 1853.
183. Abū Ḥafṣ Ḥusām al-Dīn Ṣadr al-Shahīd ‘Umar b. ‘Abd al-‘Azīz al-Bukhārī? (d. 1141). *Kitābu sharḥi al-Jāmi‘i al-ṣaghīri li-l-Shaykh al-Bukhārī wa-huwa li-Muḥammad bin al-Ḥasan fī al-fiqhi* (Commentary on *The Shorter Compilation* of Muḥammad b. al-Ḥasan [al-Shaybānī (d. 805)]), 94 {13}.
184. Abū Ḥafṣ Ḥusām al-Dīn Ṣadr al-Shahīd ‘Umar b. ‘Abd al-‘Azīz al-Bukhārī? (d. 1141). *Kitābu sharḥi al-Jāmi‘i al-ṣaghīri ma‘a zawā’ida li-l-Shaykh Ḥusām al-Dīn al-Bukhārī fī al-fiqhi* (Commentary on *The Shorter Compilation* with additions by Shaykh Ḥusām al-Dīn al-Bukhārī), 94 {14–15}.
185. Abū Naṣr Aḥmad b. Muḥammad Zāhid al-Dīn? (d. 1190–91). *Kitābu sharḥi al-Jāmi‘i al-ṣaghīri li-l-Shaykh al-Zāhid ‘alā al-Bazdawī fī al-fiqhi* (Shaykh al-Zāhid’s Commentary on *The Shorter Compilation* following al-Bazdawī [d. 1089]), 94 {15–16}. MANUSCRIPT: Fatih Millet Library, Feyzullah 699.
186. “*Kitābu jawāmi‘ al-fiqari fī sharḥi manzūmi al-Jāmi‘i al-ṣaghīri fī al-fiqhi*” (The Book of the Collection of Subtleties: Versified Commentary on *The Shorter Compilation*), 94 {16–17}.
187. Badr al-Dīn Maḥmūd b. Aḥmad? *Kitābu al-wajīzi fī al-fiqhi* (A Concise Book on Law), 94 {18}. MANUSCRIPT: SK, Ayasofya 1501 (seal of Bayezid II).
188. “*Kitābu al-biḥāri fī al-fiqhi*” (The Book of Seas), 94 {19}.
189. Same as above, 94 {19}.
190. Shams al-Dīn Muḥammad b. Yūsuf b. Ilyās al-Qunawī (d. 1386). *Kitābu durari al-biḥāri fī al-fiqhi* (Pearls of the Seas), 95 {2}. MANUSCRIPTS: SK, Carullah 640; SK, Ayasofya 2244; SK, Reisülküttap 330; SK, Reşid Efendi 196; SK, Fatih 1628.
191. Same as above, 95 {2}.
192. “*Kitābu al-durari al-zāhirati fī sharḥi al-Bihāri al-zākhirati*” (Manifest Pearls: Commentary on *The Open Seas*), 95 {2–3}.
193. Same as above, 95 {3}.
194. Abū Ḥāmid Muḥammad b. Muḥammad al-Ṭūsī al-Ghazālī (d. 1111). *Kitābu al-wajīzi fī fiqhi al-shāfi‘ī* (The Concise Book on Shafī‘ī Law), 95 {5}. MANUSCRIPTS: SK, Carullah 978; SK, Fatih 2210; SK, Şehid Ali Paşa 1004.
195. Qiwām al-Dīn Muḥammad b. Muḥammad b. Aḥmad al-Kākī al-Ḥujandī al-Sinjārī (d. 1348). *Kitābu ‘uyūni al-madhāhibi fī al-fiqhi [al-Kāmili]* (Springs of the Schools of Law), 95 {7}. The book is dedicated to the Mamluk sultan, Sha‘bān b. Muḥammad al-Malik al-Kāmil (d. 1346), and the author mentions the title in the introduction as *‘uyūn al-madhāhib al-Kāmili*. MANUSCRIPTS: TSMK, A. 742; SK, Fatih 2034–2036; SK, Lala Ismail 96; SK, Mahmud Paşa 221, 240; SK, Mesih Paşa 2; SK, Reşid Efendi 236; SK, Şehid Ali Paşa 896; SK, Yeni Cami 519; Köprülü Library, Fazıl Ahmed Paşa 638; SK, Hacı Selim Ağa 370. The manuscript copy housed in the University of Michigan Library was wrongly attributed to Jalāl al-Dīn al-Khabbāzī.
196. Same as above, 95 {7}.
197. Abū Muḥammad ‘Alī b. Aḥmad b. Sa‘īd Ibn Ḥazm (d. 1064). *Sharḥu al-Mujallā al-marqūmu bi-anna ismahū al-Muḥallā* (Commentary of *The Mirror*, known by the title of Adornments) [only

four volumes], 95 {8–9}. MANUSCRIPTS: TSMK, R. 604; SK, Ayasofya 1259, 1260. Ayasofya 1259 is the third volume and does not bear the seal of Bayezid but contains ‘Atufi’s note; it was copied in 727 (1326), and was compared and collated with three other copies dated 724 (1323). Similarly, Ayasofya 1260, copied in 789, is a collated copy (*muqābala*). The copyist mentions that it was badly collated and that it needs a new collation with a sound copy (*bi-nuskha ṣaḥiḥa*). SK, Carullah 710 (the second volume, with ‘Atufi’s notation) was copied in 726 (1325) and collated with two other manuscripts and with the autograph of Ibn Ḥazm (fol. 318a). SK, Carullah 709, the first volume, has no seal but ‘Atufi’s notation. Apparently the copies in the library of Carullah Efendi originated from the palace library. No seal of Bayezid II exists on them now, but they contain ‘Atufi’s notation.

198. “*Kitābu irshādi al-adhhāni fī al-fiqhi*” (Guidance for Intellectuals), 95 {9}. A book with this title is attributed to the Shiite scholar Ibn al-Muṭahhar al-Ḥillī (d. 1326).
199. “*Kitābu al-rawḍati fī al-fiqhi wa-ghayrihi*” (The Book of the Garden), 95 {9–10}.
200. Fakhr al-Dīn Yaḥyā b. ‘Abd Allāh al-Mūdurnī [al-‘Ajāmī] (d. 1474). *Kitābu mushtamili al-aḥkāmi fī al-fiqhi* (The Repository of Rulings), 95 {10}. Copies abound.
201. *Fī mujalladin wāḥidin fī al-fiqhi* / one volume containing:
 - 201a. Mullā Khusraw (Ḥüsrev) (d. 1480). *Kitābu ghurari al-aḥkāmi* (The Finest Points of Rulings), 95 {11}. MANUSCRIPT: TSMK, A. 1032, copied for the personal study of Mehmed II.
 - 201b. Mullā Khusraw (Ḥüsrev) (d. 1480). *Risālatun fī uṣūli al-fiqhi* (Treatise on Legal Theory) [= *Mirqat al-wuṣūl* (The Ladder of Arrival)], 95 {11–12}.
202. Abū al-Naṣr Maṣ‘ūd b. Abī Bakr b. al-Ḥusayn al-Farāhī (d. 1242). *Kitābu dhātī ‘iqdayni fī al-fiqhi*, 95 {12}. MANUSCRIPTS: TSMK, A. 1191; SK, Fatih 2179.
203. Wājid Pāshā (Vācid Paşa) (d. ca. 1404). *Kitābu al-ikhtiyārāti fī sharḥi al-Niqāyati* [or *Nuqāyati*] *fī al-fiqhi* (Choices in the Commentary on *The Purity*), 95 {12–13}. MANUSCRIPTS: Maraş İl Halk Kütüphanesi Hafız Ali Efendi 17; Leipzig University Library, Cod. Arab. 79, https://www.islamic-manuscripts.net/rsc/viewer/IslamHSBook_derivate_00002176/cod_arab_79_003.jpg.
204. “*Kitābun mukhtaṣarun min al-fatāwā fī al-fiqhi*” (An Abridged Book of Fatwas), 95 {13}.
205. Maḥmūd b. ‘Umar al-mushtahir bi-Badr al-Toqādī (fl. 1392). *Kitābu sharḥi al-Qalā’idi fī al-fiqhi* (Commentary on *The Exquisite Poems of Law*) [in two volumes], 95 {14}. MANUSCRIPT: TSMK, A. 1220 (seal of Bayezid II and the notation of ‘Atufi), copied in Angūriya (Ankara) in 799 (1396), only the first volume.
206. Abū al-Layth, Naṣr b. Muḥammad b. Ibrāhīm al-Samarqandī (d. 983). *Kitābu al-mukhtalaḥ bayna al-aṣḥābi fī al-fiqhi* (The Book of Disputed Legal Issues among Scholars of Law), 95 {14–15}. MANUSCRIPT: TSMK, A. 1197 (seal of Bayezid II), copied in 754 (1344) by Yūsuf b. ‘Alī b. Muḥammad, known as Ṣalāḥ al-Su‘ūdī. The book, which was previously owned by Sūdūn Dāwud al-Sayfī Tanbak, a Mamluk amir, contains several notes by different readers and owners. EDITION: *Mukhtalaḥ al-riwāya*, ed. ‘Abd al-Raḥmān al-Faraj, Riyāḍ, 2005.
207. “*Kitābu al-fuṣūli fī masā’ili al-qaḍāyā wa-al-da’āwā*” (Chapters on Legal Issues concerning Judgeship and Legal Cases), 95 {15}.
208. Same as above, 95 {16}.
209. Shams al-A’imma Muḥammad b. Aḥmad al-Ḥanafī al-Sarakhsī (d. 1090?). *Kitābu adabi al-qāḍī fī al-fiqhi* (The Etiquette of Judges), 95 {16–17}. MANUSCRIPT: TSMK, A. 1016 (seal of Bayezid II).
210. Abū Ḥafṣ Ḥusām al-Dīn Ṣadr al-Shahīd ‘Umar b. ‘Abd al-‘Azīz al-Bukhārī? (d. 1141). *Kitābu sharḥi Kitābi adabi al-qāḍī fī al-fiqhi* (Commentary on *The Etiquette of Judges* by Shams al-A’imma), 95 {17–18}. MANUSCRIPT: TSMK, A. 1017 (seal of Bayezid II), copied in 870 (1465).

211. Muwaffaq al-Dīn ‘Abd Allāh b. Qudāma al-Maqdisī (d. 1223). *Kitābu al-kāfi fī al-fiqhi ‘alā madhhabī al-Ḥanbalī* (The Book of Sufficiency in Law According to the Hanbali School) [in two volumes], 96 {1}. EDITION: *Al-Kāfi fī fiqh al-Imām Aḥmad b. Ḥanbal*, ed. Muḥammad Fāris and Muṣ‘ad ‘Abd al-Ḥamīd al-Sa‘danī, Beirut: Dār al-Kutub al-‘Ilmiyya, 1414/1994.
212. Jalāl al-Dīn Abū Naṣr Aḥmad b. Rukn al-Dīn Muḥammad b. ‘Alī b. ‘Abd Raḥmān b. Ishāq al-‘Imādī al-Faṭḥabādī (d. 1100). *Kitābu ghurari al-shurūṭi fī al-fiqhi* (The Finest Points of Legal Writings), 96 {1–2}. MANUSCRIPT: TSMK, A. 1033 (seal of Bayezid II).
213. *Fī mujalladin wāḥidin* / one volume containing:
 - 213a. *Risālatun manẓūmatun fī al-fiqhi* (Treatise in verse), 96 {2}.
 - 213b. *Risālatun ma‘rūfatun bi-Yaqūlu al-‘abdu fī ‘ilmi al-kalāmi* (Treatise known as *The Servant of God Says*), 96 {2–3}.
 - 213c. *“Qaṣīdatun ma‘rūfatun bi-al-Burdātī”* (The Verse known as *Ode of the Mantle*), 96 {3–4}.
214. *“Kitābun mukhtaṣarun ‘ajībun fī al-fiqhi yu‘rafu min uslūbihi ‘ilmu al-‘arūḍi wa-al-tawārīkhu wa-al-naḥwu wa-al-qawāfī”* (An Unusual Abridged Book on Law Distinguished in Its Manner Following the Sciences of Prosody, of History, of Grammar and of Rhyme), 96 {4–5}.
215. Same as above, 96 {5–6}.
216. *Fī mujalladin wāḥidin* / one volume containing:
 - 216a. Same as above, 96 {7–8}.
 - 216b. Abū Bakr Muḥammad b. Ishāq al-Kalābādī (d. 990?). *Kitābu al-ta‘arrufi li-madhhabī al-taṣawwufi* (Book of Cognition of the Sufi school), 96 {8}.
217. Abū Ḥamid Muḥammad b. Muḥammad al-Ṭūsī al-Ghazālī (d. 1111). *Kitābu al-wasīti ‘alā madhhabī al-shāfi‘ī fī al-fiqhi* (The Intermediate), 96 {9}. EDITION: *Al-Wasīṭ fī al-madhhab*, ed. ‘Alī Muḥyi al-Dīn al-Qaradāghī, Beirut: Dār al-Bashā‘ir al-Islāmiyya, 2015.
218. *“Kitābu jawāhiri al-fiqhi fī al-fiqhi”* (The Book of Gems in Jurisprudence), Persian, 96 {9–10}.
219. *“Kitābun fī faḍā‘ili al-‘ibādāti fī al-fiqhi”* (Virtues of Worship), 96 {10–11}.
220. *“Kitābun fī al-aḥkāmi al-sulṭāniyyati ‘alā madhāhibi al-fuqahā‘i fī al-fiqhi”* (Book of Rulings on Rulership), 96 {11}. MANUSCRIPTS: Murad Molla 724, copied in 850/1446–47 (a Mamluk manuscript); SK, Ayasofya 1013, copied in 743 (1342–43).
221. *“Kitābun fī al-fiqhi ibtada’an bi-kitābi al-miyāhi”* (A Book on Law That Begins with the Chapter on [the Law of] Water), 96 {12}.
222. No note of *fī mujalladin wāḥidin* (“one volume containing”) but items separated with “wa- ~.”
 - 222a. *“Risālatun fī al-waṣiyyati”* (A Treatise on Wills), 96 {12}.
 - 222b. *“Kitābu asrāri al-waḥyi”* (The Book of the Secrets of Revelation), 96 {13}.
 - 222c. *“Kitābu al-farā‘idi ma’a taṣwīrāti al-masā‘ili fī al-fiqhi”* (Book on Inheritance Law, illustrated with relevant cases), 96 {13}.
223. Ibn ‘Abd al-Salām (d. ??). *Kitābi sharḥi li-kitābi Ibn al-Ḥājib ‘alā madhhabī Mālik Ibn Anas fī al-fiqhi* (Commentary on the book of Ibn al-Hajib in the School of Law of Malik b. Anas) [‘Atufi notes that three of eight volumes are missing, namely, volumes 3, 5, and 8], 96 {14–16}. MANUSCRIPTS: SK, Ayasofya 1230–1237.
224. Abū al-Naṣr Zayn al-Dīn Aḥmad b. Muḥammad b. ‘Umar al-‘Attābī (d. 1190). *Mujalladun min Kitābi sharḥi Fatāwā al-‘Attābī fī al-fiqhi* (A volume of The Commentary on *The Fatwas of al-‘Attābī*), 96 {17}.
225. *Fī mujalladin wāḥidin* / one volume containing:
 - 225a. Jamāl al-Dīn Muḥammad b. Muḥammad al-Aqsarāyī (d. ca. 1398). *Kitābu as‘ilati* (Book of Questions) [= *Al-As‘ila wa-al-ajwiba* (Questions and Answers)], Persian, 96 {17–18}. MANUSCRIPT: SK, Ayasofya 70–72, 1033 (seal of Bayezid II); SK, Fatih 99.

- 225b. “*Kitābun fī al-fiqhī*” (Book on Jurisprudence), Persian, 96 {18}.
226. “*Kitābu ḍaw’i al-lughati fī sharḥi al-lughati*” (The Light of Language in the Explication of the Lexicon), 96 {18–19}.
227. “*Al-Fatāwā ibtada’an bi-kitābi al-mafqūdi fī al-fiqhī*” ([A Collection of] Fatwas) [second volume only, starting with the chapter on Lost Items], 96 {19}–97 {1}.
228. *Fī mujalladin wāḥidin* / one volume containing:
- 228a. Taqī al-Dīn Abū ‘Amr ‘Uṭhmān b. ‘Abd al-Raḥmān al-Kurdī al-Shahrazūrī ibn al-Ṣalāḥ (d. 1245). *Kitābun fī ṭabaqāti al-fuqahā’i ‘alā madhhabī al-shāfi’i* (The Biographies of Scholars in the Shafi’i School of Law), 97 {1–2}. EDITION: Ibn al-Ṣalāḥ al-Shahrazūrī, Muḥyī al-Dīn Abū Zakariyyā’ al-Nawawī, and Yūsuf Ibn Al-Zakī ‘Abd Al-Raḥmān al-Mizzī. *Ṭabaqāt al-fuqahā’ al-Shāfi’iyyah*, ed. Najīb, Muḥyī Al-Dīn ‘Alī Dār al-Bashā’ir al-Islāmīyah, 1992.
- 228b. Muḥyī al-Dīn Abū Zakariyyā’ Yaḥyā b. Sharaf b. Murī al-Nawawī (d. 1277). *Kitābun mukhtaṣarun fī ṭabaqāti al-fuqahā’i wa-aḥwālīhim* (Abridgement of *The Biographies of Scholars and Their Circumstances*), 97 {2}. - 228c. Imām al-Ḥaramayn Abū al-Ma‘ālī Rukn al-Dīn ‘Abd al-Malik b. ‘Abd Allāh b. Yūsuf al-Juwaynī (d. 1085). *Kitābu mughḥithi al-khalqī fī tarjīhi madhahabi al-shāfi’i* (Aid for the People in Choosing the Shafi’i School of Law), 97 {2–3}. MANUSCRIPT: SK, Ayasofya 2194 (seal of Bayezid II). EDITION: Al-Juwaynī, *Mughḥith al-khalq fī tarjīh al-qawl al-ḥaqq*, Lahore: Maktaba Quddūsiyya, 1400 (1980).
- 228d. “*Risālatun fī aḥwālī sayyidinā Muḥammad -ṣallā Allāhu ‘alayhi- wa-aḥwālī aṣḥābihi*” (Treatise on the Circumstances of Muḥammad and His Companions), 97 {4–5}.
- 228e. “*Risālatu ḥilyati al-Imām al-Shāfi’i*” (Treatise on the Manners of Imam al-Shafi’i), 97 {5}.
- 228f. “*Risālatun fīmā yadda’hi al-nāsu min ‘ilmi al-ghaybi wa-ma’rifati al-ḥawādithi*” (Treatise on What People Claim about the Knowledge of the Unseen and Gnosis of the Events), 97 {5–6}.
229. “*Risālatun fī al-ta’arruḍi li-ba’ḍi mawāḍi’i al-kutubi al-fiqhiyyati*” (Treatise in Objection to Some Issues in the Books of Jurisprudence), 97 {6–7}.
230. *Fī mujalladin wāḥidin* / one volume containing:
- 230a. Abū al-Ḥasan Taqī al-Dīn ‘Alī b. ‘Abd al-Kāfi al-Subkī (d. 1355). *Kitābu shifā’i al-siqāmi fī ziyārati khayri al-anāmi -‘alayhi al-salāmu- fī al-ḥadīthi* (Healing of Sickness through Visiting the Best of Mankind), 97 {7–8}. MANUSCRIPT: TSMK, A. 324 (Karatay 2963), 775/1374 (seal of Bayezid II). EDITION: Ed. Ḥasan Muḥammad ‘Alī Shukrī, Casablanca, 2010.
- 230b. Abū al-Ḥasan Taqī al-Dīn ‘Alī b. ‘Abd al-Kāfi al-Subkī (d. 1355). *Kitābu al-sayfi al-maslūli ‘alā man sabba al-rasūli -ṣallā Allāhu ‘alayhi wa-sallama- fī al-fiqhī* (Drawn Sword upon Those Who Insult the Prophet [Muhammad]), 97 {8–9}. MANUSCRIPTS: SK, Şehid Ali Paşa 790; SK, Reisülküttap 161; possibly at the end of TSMK, A. 324. EDITION: Ed. İyād Aḥmad al-Ghawj, Amman, 2000.
231. “*Risālatun fī bayāni alfāzi al-kufri min qibali al-fiqhī*” (Treatise on Utterances of Unbelief), 97 {9–10}. MANUSCRIPTS: There are a number of texts with the same title. Two well-known examples are by Quṭb al-Dīn zāda Muḥyī al-Dīn Muḥammad b. Quṭb al-Dīn al-Iznīkī (SK, Ayasofya 2263) and Badr al-Rashīd Muḥammad b. Ismā’il b. Maḥmūd (SK, Ayasofya 1475/4).
232. *Fī mujalladin wāḥidin* / one volume containing:

- 232a. Abū Hāmid Muḥammad b. Muḥammad al-Ṭūsī al-Ghazālī (d. 1111). *Kitābu bidāyati al-hidāyati fī al-fiqhi* (Beginning of Guidance), 97 {10}. MANUSCRIPTS: SK, Ayasofya 1679, 1677 (seal of Bayezid II); SK, Ayasofya 1680, 1512, 1678/1 (copied in 824/1421).
- 232b. Abū ‘Abd Allāh Muḥammad b. ‘Abd Allāh b. ‘Umar b. Abī Bakr b. ‘Umar b. ‘Alī bin Hamza al-Nāshirī al-‘Adnānī al-Shāfi‘ī (d. 1418?). *Kitābu al-naṣā’ihī al-imāniyyati li-dhawī al-wilāyati al-sultāniyyati* (Instructions of Faith to Those Who Possess Sultanic Powers), 97 {11}. MANUSCRIPT: SK, Ayasofya 1678/2 (fols. 60a–153b), autograph copy, dated 825 (1421–22).
233. ‘Abd al-‘Azīz Fārisī (fl. 15th–16th centuries). *Kitābu ‘umdati al-islām fī al-fiqhi* (Reliance of Islam), Persian, 97 {11–12}. MANUSCRIPT: SK, Ayasofya 1332 (seal of Bayezid II).
234. Ibn al-Malak ‘Abd al-Laṭīf b. Firishte ‘Izz al-Dīn b. Amīn al-Dīn (d. ca. 1418). *Kitābu munyati al-ṣayyādīna fī al-fiqhi [fī ta’allum al-iṣṭiyād wa-aḥkāmihī]* (The Wish of Hunters [in Learning Hunting and Its Rulings]), 97 {12}. MANUSCRIPT: SK, Ayasofya 1464, copied for the library of al-Malik al-Ajall Amīr-Silāḥ Timrāz al-Zāhirī; wrongly attributed to Mīrim Çelebi in the Süleymaniye Library catalogue. TSMK, A. 869 (seal of Bayezid II). EDITION: *Munyat al-ṣayyādīn fī ta’allum al-iṣṭiyād wa-aḥkāmihī*, followed by Maḥmūd b. Muḥammad al-Ḥamzāwī, *Risālat fatwā al-khawāṣṣ fī ḥill mā ṣīda bi-al-raṣāṣ*, ed. Sa’īd Bakdāsh, Beirut: Dār al-Bashā’ir al-Islāmiyya, 1999.
235. Muḥammad b. Sulaymān al-Tankabawī (d. ?). *Kitābu badā’i’i al-aḥkāmī fī al-fiqhi* (Marvels of Rulings), Persian, 97 {12–13}. MANUSCRIPT: SK, Ayasofya 1037; copied by Muḥammad b. Shāhanshāh.
236. Abū al-Hasan Amīr ‘Alā’ al-Dīn ‘Alī b. Balabān b. ‘Abd Allāh al-Miṣrī al-Fārisī (d. 1339). *Kitābu tuḥfati al-ḥarīṣi fī sharḥi al-Talkhīṣi [al-jāmi’i al-kabīri] fī al-fiqhi* (Book of Gifts for the Desirous in the Commentary on the *Epitome* [of *The Larger Compilation*]) [in two volumes], 97 {13–14}. MANUSCRIPT: TSMK, A. 1065 (seal of Bayezid II).
237. Abū al-Khayr Muḥammad b. Muḥammad b. Muḥammad b. al-Jazarī al-Sulamī (d. 1429). *Kitābu al-darajāti al-‘aliyyati fī ṭabaqāti al-‘ulamā’i al-ḥanaḥfiyyati* (The Superior Ranks [Embodied] in the Biographies of Hanafi Scholars), 97 {14–15}. MANUSCRIPT: TSMK, A. 2831 is a unique manuscript copied for the library of Ulugh Bey (r. 1447–49), who is mentioned in the introduction. Karatay attributes the manuscript to Ibn al-Jazarī the Elder, who died in 1429; *Arapça Yazmalar*, vol. 3, 556 (no. 6455).
238. “*Kitābu tahdhībī ‘alā madhhabī Abī Ḥanīfa fī al-fiqhi*” (The Book of Adornment of the School of Abu Hanifa), 97 {15–16}.
239. Ismā‘īl b. Abī Bakr Ibn al-Muqrī (d. 1433). *Kitābun ‘ajībun mawsūmun bi-‘Unwāni al-sharafi fī al-fiqhi wa-al-ishārati ilā ‘ulūmin arba‘atin* (The Address of Honor in Law and Guide to the Four Sciences), 97 {16–17}. MANUSCRIPTS: SK, Ayasofya 1334 (seal of Bayezid II and ‘Atufi’s note); Ayasofya 1335 (copied for the library of the Mamluk sultan al-Amīr al-Sharaf al-Dīn Mūsā b. ‘Irāq Dawādār); Ayasofya 1336 (seal of Bayezid II and ‘Atufi’s note); Ayasofya 1337; Ayasofya 1338. EDITION: *Unwān al-sharaf al-wāfi fī ‘ilm al-fiqh wa-al-‘arūḍ wa-al-tārīkh wa-al-naḥw wa-al-qawāfi*, ed. ‘Abd Allāh Ibrāhīm al-Anṣārī, Beirut: al-Maktaba al-‘Aṣriyya, 1996.
240. Muḥammad Shīrīn b. ‘Izz al-Dīn al-Maghāribī? al-Bulgharī? (d. 1407). *Kitābu khazīnati al-‘ulamā’i [wa-zīnat al-fuqahā] fī al-fiqhi* (The Treasure of Scholars [and Adornment of Jurists]), 97 {17}. MANUSCRIPT: SK, Ayasofya 1777 (seal of Bayezid II and ‘Atufi’s notation, but *fī al-fiqh* is erased and the book is classified as a book on mysticism).
241. “*Risālatu ṣalāti al-raghā’ibi fī al-fiqhi*” (Treatise on the Prayer of al-Raghā’ib), 97 {17–18}.

242. Mullā Khusraw (d. 1480). *Risālatu mā nuqila min Ghurari al-aḥkāmī fi dukhūli waladi al-binti fi waladi al-waladi [awlādī] fi al-fiqhi* (Section from *The Finest Points of Rulings [Ghurar al-Aḥkām]* on the Consideration of Daughters under the Category of the Lexeme [awlād]), 97 {18–19}. Copies abound.
243. “*Kitābu masā’ili al-mu’āmalāti fi al-fiqhi*” (Legal Cases concerning Transactions), Persian, 97 {19}–98 {1}.
244. *Fī mujalladin wāḥidin* / one volume containing:
- 244a. ‘Alī b. Majd al-Dīn al-Shahrūdī, known as Muṣannifak (d. 1470). *Risālatu al-ḥudūdi* (The Epistle of Technical Definitions), 98 {1}. MANUSCRIPT: SK, Esad Efendi 668, completed in 873/1468 in Hayrabolu, autograph. EDITION: Imām ‘Alī b. Majd al-Dīn Muḥammad b. Maṣ’ūd al-Shahrūdī al-Biṣṭāmī, *Kitāb al-ḥudūd wa-al-aḥkām*, ed. Ilyās Qablān, Istanbul: Irshād, 2010.
- 244b. Abū Qāsim al-Faryābī (d. 1210?). *Kitābu khālīṣati al-ḥa[qa]’iqi fi al-taṣawwufi* (Purity of Truth), 98 {1–2}. MANUSCRIPTS: SK, Ayasofya 1774-1776 (seal of Bayezid II).
- 244c. Same as 231, 98 {2}.
245. Fakhr al-Islām Abū Bakr Muḥammad b. Aḥmad b. al-Ḥusayn al-Shāshī, also known as al-Mustaẓhirī (d. 1113). *Kitābun marqūmun bi-Hiḳyati al-‘ulamā’i fi madhāhibi al-fuqahā’i fi al-fiqhi* (The Adornment of Scholars in the Schools of Jurists), 98 {3}. According to the manuscript, this book is also known as *Kitāb al-Mustaẓhirī*. MANUSCRIPTS: SK, Ayasofya 1137, 1138, 1139.
246. Abū ‘Abd Allāh Raḍī al-Dīn Burhān al-Islām Muḥammad b. Muḥammad al-Sarakhsī al-Tūsānī (d. ca. 1174). *Wajīzu al-muḥīṭi fi al-fiqhi* (A Concise [Rendering] of *The Ocean*), 98 {3–4}. This book is an abridgement of *Muḥīṭ al-raḍawī* by the same author who previously wrote *al-Muḥīṭ* and *al-Wasīṭ*. In some of the manuscripts, the book is titled *al-Wajīz fi al-fatāwā*. MANUSCRIPTS: Beyazıt Devlet Kütüphanesi, Beyazıt 2545; SK, Bağdatlı Vehbi 398; SK, Fatih 2209; SK, Hekimoğlu 393; Köprülü Library, Fazıl Ahmed Paşa 684, 685; SK, Turhan Valide Sultan 161; SK, Süleymaniye 1003.
247. “*Kitābun fārisiyyun min qibali al-fiqhi*” (A Persian Book on Jurisprudence), 98 {4}.
248. Yūsuf b. Ḥusayn al-Kirmāstī (d. 1500). *Risālatu fi al-waqfi fi ‘ilmi al-fiqhi* (Endowment Law), 98 {5}. MANUSCRIPT: SK, Ayasofya 1176.
249. Naṣr b. Muḥammad Abū al-Layth al-Samarqandī al-Ḥanafī (d. 983). *Kitābu al-bustāni min qibali al-fiqhi* (The Book of the Garden) [= *Bustān al-‘arīfin* (The Garden of the Gnostics)], 98 {5–6}. MANUSCRIPTS: SK, Ayasofya 1686, copied in 557 (1161–62); SK, Ayasofya 1683/1 (seal of Bayezid and ‘Atufi’s note on fol. 1a).
250. “*Kitābu al-khulāṣati fi al-fiqhi*” (The Condensed Book), 98 {6}.
251. Ṣadr al-Sharī’a al-Thānī ‘Ubayd Allāh b. Maṣ’ūd b. Tāj al-Sharī’a ‘Umar b. Ṣadr al-Sharī’a al-Awwal ‘Ubayd Allāh b. Maḥmūd al-Maḥbūbī al-Bukhārī (d. 1346). *Kitābu al-niqāyati min al-wiqāyati [ay muntakhabun min al-wiqāyati] fi al-fiqhi* (Book of Purity: Selections from *The Protection*), 98 {7}. The abridgement for memorization of his grandfather and teacher Burhān al-Sharī’a’s *al-Wiqāya*. MANUSCRIPT: SK, Fatih 2218, copied in 758 (1356–57).
252. Same as 231 and 244c, 98 {7–8}.
253. “*Risālatun fi al-fiqhi ‘alā madhhabī Abī Ḥanīfa*” (A Treatise on Law in the School of Abu Hanifa), 98 {8–9}.
254. “*Kitābun jāmi’un fi al-khilāfiyyāti mawsūmun bi-al-ustuqsāti fi al-fiqhi*” (The Book on the Sciences of Legal Disputation), 98 {9–10}.
255. Nurbakhsh al-Ḥusaynī. *Kitābun mansūbun ilā al-Shaykh al-ma’rūfi bi-Nūr-bakhsh al-Ḥusaynī fi al-fiqhi* (A Book [attributed to Nurbakhsh al-Ḥusaynī] on Law), 98 {10–11}.

256. Abū Ḥamid Muḥammad b. Muḥammad al-Ṭūsī al-Ghazālī (d. 1111). *Kitābu mā lā budda fī al-ṭahārati wa-al-ṣalāti wa-al-ṣawmi* (What You Must Know on Purity, Prayer, and Fasting), Persian, 98 {11–12}.
257. “*Risālatun fī aḥwāl al-madhāhibi al-fiqhiyyati*” (Treatise on the States of Legal Schools), 98 {12–13}. Possibly *al-Faraḥ wa-al-surūr fī bayān al-madhāhib* by al-Kāfiyaji; see below no. 258.
258. Muḥyi al-Dīn Muḥammad b. Sulaymān al-Kāfiyaji (d. 1474). *Nashātu al-ṣudūri fī sharḥi al-Kitābi al-faraḥi wa-al-surūri fī bayāni al-madhāhibi fī furūʿi al-dīni min qibali al-fiqhi* (The Activity of the Heart in Commenting on the Book of Joy and Happiness in Explaining the Schools of Law), 98 {13–14}. MANUSCRIPTS: SK, Ayasofya 1477 (seal of Bayezid), copied for the library of Mahmud Paşa.
259. Mīrim Çelebi Maḥmūd b. Muḥammad b. Qāḍizāda al-Rūmī (d. 1525). *ʿUmdat al-ṣayyādina fī al-fiqhi* (The Support of Hunters), translated into Arabic, 98 {14–15}.
260. Yūsuf b. Ḥusayn al-Kirmāstī (d. 1500). *Risālatun fī masʿalati rahn al-dāri bidūni al-matāʿi wa-huwa fihā fī al-fiqhi* (A Treatise on the House as a Collateral without Any Belongings), 98 {15–16}.
261. *Fī mujalladin wāḥidin* / one volume containing:
- 261a. Quṭb al-Dīn al-Iznīkī (d. 1418). *Muqaddimatu fī al-fiqhi* (Prolegomena), Turkish, 98 {16–17}. ‘Atufi attributes this book to his son Meḥmed, known as Quṭb al-Dīn Zāda. Copies abound.
- 261b. “*Dīwānu ʿĀshiq*” (Collected Poems of ʿĀshiq), 98 {17}.
- 261c. “*Gulshan-i rāz*” (Rosegarden of Secrets), 98 {17}.
- 261d. “*Khurshīdnāma*” (The Book of Khurshīd), 98 {18}.
- 261e. “*Khusraw [u] shīrīn*” (Khusraw and Shirin), 98 {18}.
- 261f. “*Kitābu al-malhamati min qibali al-nujūmi*” (Book on Weather Prognostications), Turkish, 98 {18}.
262. “*Asāsu al-islāmi fī al-fiqhi*” (Foundation of Islam), Persian, 98 {19}. MANUSCRIPT: SK, Ayasofya 1017 (seal of Bayezid II).
263. “*Majmūʿatun*” (A Collection), which contains:
- 263a. “*Rasāʾilu fī ʿilmi al-ḥisābi wa-ʿilmi al-waḥḥi wa-fī awākhirihā kitābun yashtamilu ʿalā al-masāʾili al-dawriyyati al-wāqʿati fī al-aḥkāmi al-sharʿiyyati fī al-fiqhi*” (A compilation of treatises on arithmetic and magic squares, ending with a book containing issues of circulations related to legal rulings), 98 {19}–99 {2}.
- 263b. “*Risālatu al-waṣāyā fī al-fiqhi*” (Treatise on Inheritances), 99 {2}.
- 263c. “*Risālatu sharḥi al-masāʾili min Kitābi al-dawri fī al-fiqhi*” (Commentary on issues from *The Book on Circulations*), 99 {2–3}.
264. No note of *fī mujalladin wāḥidin* (“one volume containing”), but item names separated with “wa- ~.”
- 264a. “*Miṣbāḥu al-mubtadī fī al-fiqhi*” (Lamp of the Novice), 99 {3}.
- 264b. “*Risālatu al-ḥajji fī al-fiqhi*” (Treatise on the Pilgrimage), 99 {4}.
- 264c. “*Risālatu sharḥi al-durrati al-alfiyyati fī al-fiqhi*” (A Treatise [containing] a Commentary on the Pearls of [the Book titled] *al-Alfiyya*), 99 {4}.
- 264d. “*Risālatun wajīzatu fī al-ṣalāt*” (A Concise Book on Prayer), 99 {4–5}.
- 264e. “*Kitābu al-fiqhi*” (A Book on Jurisprudence), 99 {5}.
- 264f. “*Kitābu al-nikāḥi fī al-fiqhi*” (The Book of Marriage), 99 {5}.
- 264g. “*Rasāʾilu ukhrā*” (Treatises), 99 {5}.
265. No note of *fī mujalladin wāḥidin* (“one volume containing”), but item names separated with “wa- ~.”

- 265a. Şaḫī al-Dīn al-Hindī? (d. 1315). *Hāshiyatun ‘alā Kitābi al-kitābatī fī al-kāfi wa-al-hidāyati fī al-fiqhi* (Marginal Gloss on the Books *The Sufficent* and *The Guidance*), 99 {5–6}. MANUSCRIPT: Unique autograph manuscript, SK, Ayasofya 1121.
- 265b. Şaḫī al-Dīn al-Hindī? (d. 1315). *Kitābu al-ḥawāshī ‘alā Ṣadr al-Sharī‘a fī al-fiqhi* (Glosses on Ṣadr al-Sharī‘a), 99 {6–7}. MANUSCRIPT: Unique autograph manuscript, SK, Ayasofya 1121.
266. “*Kitābu al-rumūzi ‘alā ikhtilāfāti al-fuqahā’i fī al-fiqhi*” (The Book of Signs on the Disagreements of Jurists), 99 {7–8}.
267. “*Safīnatun fihā Kitābu al-shurūṭi fī ghāyati al-naḫāsati min qibali al-fiqhi*” (A “Ship” [i.e., an oblong volume] containing a book of legal writings), 99 {8–9}. With a rare remark by ‘Atufi that it is “extremely precious.”
268. “*Kitābu asāsi al-islāmi fī al-fiqhi*” (Foundations of Islam), Persian, 99 {9}. See above, no. 262. MANUSCRIPT: SK, Ayasofya, 1017.
269. *Fī mujalladin wāḥidin* / one volume containing:
- 269a. “*Kitābu al-muqaddimati fī al-fiqhi*” (The Prolegomena), 99 {10}. See above, no. 261a.
- 269b. Abū Ḥanīfa al-Nu‘mān b. Thābit (d. 767). *Risālatu al-fiqhi al-akbari li-Abī Ḥanīfa* (The Greatest Understanding), 99 {10}. See Atçıl’s list for two copies of a commentary, possibly by Ilyās b. Ibrāhīm al-Sinobī (d. 1486?), on this work [67 {10–11}, 67 {11}].
270. “*Kitābu al-farā’idi fī al-fiqhi*” (Book on Inheritance Law), 99 {15}.
271. *Fī mujalladin wāḥidin* / one volume containing:
- 271a. “*Kitābun fī ‘ilmi al-farā’idi*” (A Book on the Science of Inheritance Law), 99 {15}.
- 271b. “*Rasā’ilu fī al-ḥisābi*” (Treatises on Arithmetic), 99 {15–6}.
272. *Fī mujalladin wāḥidin* / one volume containing:
- 272a. Abū Ḥafṣ Najm al-Dīn ‘Umar b. Muḥammad Al-Nasafi (d. 1142). *‘Aqā’idu al-nasafi fī ‘ilmi al-kalāmi* (The Creed), 99 {16}.
- 272b. “*Kitābu al-farā’idi fī al-fiqhi*” (Book on Inheritance Law) [Same as 270?], 99 {16–17}.
- 272c. Abū Muḥammad Jalāl al-Dīn ‘Umar b. Muḥammad al-Khabbāzī (d. 1292). *Kitābu al-mughnī fī uṣūli al-fiqhi* (Sufficient on Legal Theory), 99 {17}. MANUSCRIPTS: SK, Ayasofya 1007, 1008; SK, Turhan Valide 95 (seal of Bayezid II).
273. “*Risālatu farā’idi al-mukallafina fī al-fiqhi*” (Treatise on the Obligations of the Responsible Ones), Persian, 99 {17–18}.
274. “*Kitābu al-farā’idi al-manzūmati min qibali al-fiqhi*” (Versified Book on Inheritance Law), Turkish, 99 {18–19}.
275. No note of *fī mujalladin wāḥidin* (“one volume containing”), but item names separated with “wa- ~.”
- 275a. Same as above, Arabic, 99 {19}.
- 275b. “*Risālatu ḥikami aḫḫālī al-ṣalātī*” (A Treatise on the Wisdom of Prayer), 99 {19}–100 {1}.
276. No note of *fī mujalladin wāḥidin* (“one volume containing”), but item names separated with “wa- ~.”
- 276a. “*Kitābu al-farā’idi al-manzūmu*” (Versified Book on Inheritance Law), 100 {1}.
- 276b. “*Kitābu al-bihāri fī al-fiqhi*” (Book of Seas), 100 {1–2}.
277. “*Kitābu sharḥi al-Farā’idi*” (Commentary on *Inheritance Law*), 100 {5}.
278. *Fī mujalladin wāḥidin* / one volume containing:
- 278a. Sirāj al-Dīn Abū Ṭāhir Muḥammad al-Sajāwandī (d. ca. 1203). *Kitābu sharḥi al-Farā’idi li-Sirāj al-Dīn fī al-fiqhi* (Commentary on Sirāj al-Dīn’s *Inheritance Law*), 100 {5}.
- 278b. Abū Ḥamid Muḥammad b. Muḥammad al-Ṭūsī al-Ghazālī (d. 1111). *Kitābu minhāji al-‘ābidina fī al-taṣawwufi* (The Course of Worshipers), 100 {6}.

279. "*Kitābu zayni al-shurūḥi fī sharḥi matni al-Farā'idī min qibali al-fiqhi*" (Adornment of Commentaries: Commentary on the Text of *Inheritance Law*), 100 {7}.
280. Muḥyi al-Dīn Muḥammad b. 'Alī al-Adirnawī al-'Ajāmī (d. 1508–9?). *Ḥāshiyatun 'alā sharḥi al-Sayyid al-Sharīf li-l-Farā'idī al-sirājiyyati fī al-fiqhi* (Marginal Gloss on the Commentary of Sayyid Sharif on *Inheritance Law* of Sirāj [al-Dīn]), 100 {7–9}. MANUSCRIPTS: Beyazıt Devlet Kütüphanesi, Veliyüddin Efendi 1590, 1601; SK, Ayasofya 1612 (seal of Bayezid II).
281. "*Majmū'atun fihā arba'atun wa-'ishrūna kitāban awwaluhā Farā'idu al-sirāji fī al-fiqhi*" (Compendium containing fourteen books, beginning with Sirāj al-Dīn's *Inheritance Law*), 100 {9–10}.
282. Same as 280, 100 {10–11}.
283. *Fī mujalladin wāhidin* / one volume containing:
 - 283a. "*Sharḥu al-Arba'ina ḥadithan*" (Commentary on Forty Hadith), 100 {11}.

291. "*Majmū'atun nafīsatun*" (An Exquisite Collection), which contains:

292. Same as 285, 101 {9–10}.
293. Abū al-Wafā al-Qurashī, ‘Abd al-Qādir b. Muḥammad (d. 1373). *Kitābu al-jawāhiri al-muḍiyyati fī ṭabaqāti al-ḥanafīyyati min ‘ulamā’i al-islāmi* (The Book of Shining Jewels among the Biographies and Rankings of Scholars of the School of Abu Hanifa), 101 {11–12}. EDITION: *Al-Jawāhir al-muḍiyya fī ṭabaqāt al-Ḥanafīyya*, ed. ‘Abd al-Fattāḥ Muḥammad al-Ḥulw, Giza: Hajr li-al-Ṭibā‘a wa-al-Nashr wa-al-Tawzī‘ wa-al-I‘lān, 1993.

NOTE

1. Also see nos. 178–81 below, where ‘Atufi gives both of the above titles for this work. Brockelmann, however, attributes “*Fuṣūl al-‘imādiyya*” to Jamāl al-Dīn b. ‘Imād al-Dīn al-Ḥanafī (d. 1253?), and treats “*Fuṣūl al-‘imādiyya*” and “*Fuṣūli al-aḥkāmī*” as two separate works that are often confused with one another (Brockelmann S II 496).

BOOKS ON ISLAMIC LEGAL THEORY (*UŞÛL AL-FIQH*)

The term *uṣūl al-fiqh* can be translated into English as “Islamic legal theory,” “jurisprudence,” “legal philosophy,” or “legal methodology.”¹ As a discipline, it aims to explain how Islamic normativity works out the relationship of divinely ordained rules expressed in the Qur’an and Sunnah of the Prophet to the mundane details of daily human life. Throughout this essay, I will refer to the discipline as “Islamic legal theory” or, simply, “jurisprudence.” The science or discipline of *uṣūl al-fiqh* emerged towards the end of the second century of Islam (in the late eighth and early ninth centuries) as the Islamic polity organized itself under the Abbasids. From the early seventh century CE onward, nascent legal and political requirements gave rise to the basic question of how Islamic norms, as expounded by the Prophet Muhammad between 610 and 632, were to be translated into law following his death. This brought about the emergence of various legal methodologies. Throughout the second century of Islam, the schools of Hijaz (Mecca and Medina) and Iraq (Kufa, Basra, and Baghdad), together with the schools of Egypt and Yemen, inaugurated a program of expounding Islamic norms vis-à-vis the changing times and circumstances. They systematically wove together a body of rules that would later be called *madhhab*, that is, a school of law. The schools of law aspired to provide a comprehensive scheme of Islamic normativity—religious, ethical, and legal—covering everything that a believing person would need to know and practice throughout his or her lifetime. The fact that such schools of law were intended to represent a complete program for Islamic life made it necessary for each school’s expounders to prove and explain the superiority of their scheme to the alternative schemes,

which generated various theoretical expositions of how the Qur’an and Sunnah are to be read, and how the revealed principles and rules should be adapted to the cases that emerged following the death of the Prophet Muhammad. Islamic legal theory assumes that the rules and principles taught by the Prophet are valid until the Last Day and that all human acts are subject to divine evaluation, which can only be known through the Revelation received by the Prophet. Thus, the whole endeavor of *‘ilm uṣūl al-fiqh* is nothing but an attempt to explain the relationship between the revealed truths and the mundane circumstances of human life.

Although both classical and contemporary scholars of law have debated the identity of the first work of *uṣūl al-fiqh*, it is certain that the earliest extant work dealing with the initial phases of the problems related to this discipline is *al-Risāla* (The Epistle) of Muhammad b. Idris al-Shafi‘i, the founder of one of the living schools of Islamic law, who lived between 767 and 820 (150–204). The survival of *al-Risāla* was accidental, as many of the works written at that time and up to a century and a half later have not come down to us. The earliest work in this field that survives in a nearly complete form is *al-Fuṣūl fī-l-uṣūl* (The Chapters in Jurisprudence) by Abu Bakr al-Razi al-Jassas (d. 981). Between al-Shafi‘i and al-Jassas, numerous works were written on *uṣūl al-fiqh*, which are mentioned in the sources but have only survived piecemeal, through quotations preserved in later works. Both *al-Risāla* and *al-Fuṣūl fī-l-uṣūl* survived in a single manuscript; had they not survived, we would have very little material to enlighten us about the history of this discipline from its inception to its maturation in the tenth century.²

TWO LITERARY TRADITIONS OF *UŞŪL AL-FIQH*

Islamic legal theory takes its theoretical inspiration from philosophical theology (*‘ilm al-kalām*), while the norms of religion (*al-ahkām al-shar‘iyyah*, or *furū‘ al-fiqh*) constitute its practical referential framework. Along with Arabic linguistics, these two foundational disciplines contributed to the development of both the method as well as the content of the discipline of *uṣūl al-fiqh*. That *‘ilm al-kalām* and *‘ilm al-fiqh* (more specifically *furū‘ al-fiqh*) were the main resources from which *uṣūl al-fiqh* drew is reflected in the scholarly works produced in this discipline from the eleventh century onward. According to the account given by Ibn Khaldun (d. 1406), who surveyed the history and condition of the scholarly disciplines of Islamic civilization up until his own lifetime, there are two genres of *uṣūl al-fiqh*: the juristic genre and the theological genre. The former began with the work *Taqwīm al-adillah* (Rectification of the Arguments) by the Bukharan Hanafi jurist Abu Zayd al-Dabusi (d. 1038), who kept the content of his account of *uṣūl al-fiqh* within the limits of substantive law (*furū‘ al-fiqh*), avoiding as much as possible the theological implications of the concepts and questions discussed in this discipline. Thus, the juristic genre conceives of legal theory as a kind of bare legal activity that mostly cites examples from substantive law and only rarely refers to their theological or philosophical implications pertaining to the field of *kalām*. By contrast, the theological genre considers legal theory as an extension of philosophical theology, and seeks to elaborate its concepts and arguments in theological abstraction. This genre therefore includes long chapters and discussions on issues that have no direct relevance to law. The juristic genre is also known as the Hanafi genre of *uṣūl al-fiqh*, since it was mainly adopted and developed by the Transoxanian (Central Asian) Hanafi jurists of the eleventh through fourteenth centuries. The other, theological genre seems to be modeled on the work *al-Mu‘tamad* (The Approved One) of Abu’l-Husayn al-Basri (d. 1044), a Basran Mu‘tazili theologian. Though initiated by the Mu‘tazili school, which was eventually considered unorthodox by the Sunnis, this genre was also adopted and further developed by the Ash‘ari school of theologian-jurists from the eleventh century onward.

Until the thirteenth century, the juristic style was restricted to eastern Iran and Transoxiana, while the theological genre prevailed in such central lands as Iraq, Damascus, Egypt, and North Africa, where Ash‘ari theology influenced the Shafi‘i and Maliki schools of law. The Hanafi theologian-jurists in these centers either adopted Ash‘arism, which is a rare phenomenon, or more generally espoused the alternative by developing the Maturidi theology of Transoxanian origin. However, in the field of *uṣūl al-fiqh* the Hanafis preserved their loyalty to the juristic genre from the thirteenth century onward. The Mongol invasion triggered massive population movements from Transoxiana to other Islamic lands, which brought the Hanafi legal tradition of Central Asia face-to-face with other Muslim traditions. An eclectic (*mamzūj*) genre was born out of this encounter, and the scholarly works from that period onward combined the juristic and theological genres of scholarship.

The palace library inventory of Sultan Bayezid II prepared by ‘Atufi reflects this historical account of scholarly development in its section on the discipline of *uṣūl al-fiqh* (73–80). Ottoman scholarship naturally inherited the legacies of previous Islamic states, in particular the Hanafi legacy of Central Asia, as well as that school’s new syntheses in Ayyubid (ca. 1171–1260) and Mamluk (1250–1517) Syria-Egypt. Before the emergence of the Ottomans (ca. 1299), intellectual life in the eastern Islamic lands was deeply influenced by Ash‘arism with a Ghazalian and Razian flavor (al-Ghazzali, d. 1111; al-Razi, d. 1210). The first group of works listed in the library inventory therefore belongs to this eclectic genre of *uṣūl al-fiqh* with its strong Hanafi emphasis: Sadr al-Shari‘a ‘Ubayd Allah b. Mas‘ud’s (d. 1346 or 1347) *al-Tawdīḥ fi uṣūl al-fiqh* (Elucidation in Jurisprudence, 73 {2–6}).

Sadr al-Shari‘a, a Bukharan Hanafi theologian and jurist who lived in Bukhara and Herat in the post-Mongol period, attempted to synthesize the prevalent Ash‘ari theological tradition with the Central Asian Hanafi juristic tradition. He focused in particular on the Hanafi *Uṣūl* work of al-Pazdawī (d. 1089), on the one hand, and the two most influential theological works of the period, the *al-Mukhtaṣar* (The Abbreviated) of Ibn al-Hajib (d. 1249) and *al-Maḥṣūl* (The Harvest) of al-Razi, on the other. Many commentaries were written on Sadr al-Shari‘a’s work, *al-Tawdīḥ*, itself a commentary

on *al-Tanqīh* (The Revision) by the same author. One such commentary, *al-Tabwīh* (The Alluding) by Sa'd al-din al-Taftazani (d. 1390), was so successful that it gained unrivaled prestige in *uṣūl al-fiqh* within the Ottoman intellectual circles up until modern times. The Central Asian Sa'd al-din al-Taftazani may be regarded as one of the most influential scholars within the Ottoman milieu. His works in three fields—rhetoric (*balāgha*), philosophical theology (*kalām*), and legal theory (*uṣūl al-fiqh*)—set the standard in Ottoman higher education. From the inception of the Ottoman madrasa until its closure in 1924, *al-Tabwīh* remained part of the syllabus at the most advanced stages.

Though *al-Tabwīh* was itself a complete super-commentary, many Ottoman and other scholars wrote super-commentaries on it, most of which are recorded in the library inventory's second group of entries under this title (74 {5–12}). These super-commentaries were usually composed by young scholars to demonstrate their learning. Among such super-commentaries, that of the renowned Ottoman scholar Molla Hüsrev (Maw-lana Khusraw, d. 1480) was highly popular (74 {5–6}).³

The third main group of entries in the library inventory of Bayezid II is *Fuṣūl al-badā'i* (Magnificent Chapters) by the influential Ottoman scholar Molla Fenari (d. 1431). This work belongs definitively to the eclectic school whose concern was to create a discourse combining the theological and juristic genres of *uṣūl al-fiqh* (74 {18}). At the same time, *Fuṣūl al-badā'i* also reflects the features of post-classical *uṣūl al-fiqh* works, which placed a particular emphasis on logic in their formulations of the subject matter as well as the arguments of the discipline. Molla Fenari's work on jurisprudence was particularly renowned for its sophistication, which mainly stemmed from the vast knowledge he acquired in various intellectual disciplines, including law, jurisprudence, philosophy, and Akbari-Qunawi Sufism, deriving from a synthesis of Ibn al-ʿArabi's (d. 1240) and Sadr al-Din al-Qunawi's (d. 1274) mystical works. *Fuṣūl al-badā'i* was not a textbook and hence was not widely circulated among madrasa students, but it won a high level of renown among scholars of the following centuries and was published in the early period of Ottoman printing during the nineteenth century.

The fourth group of entries in the inventory again lists a highly influential and extremely popular textbook, but this time one belonging to the theological genre of jurisprudence: Ibn al-Hajib's *al-Mukhtaṣar* (75 {4}). This work is, in fact, a summary of another work in the same tradition by the famous Shafi'i-Ash'ari theologian-jurist Sayf al-Din al-Amidi (d. 1233). According to Ibn Khaldun, al-Amidi was one of the two leading post-classical figures of the theological genre (the other being al-Razi). He contributed immensely to the reformulation of jurisprudence by later scholars (*muta'akhhirīn*) with attention to the Greek tradition, a period in which Greek philosophy and thought played a direct role in the field of legal theory, unlike its indirect role in the classical period. Ibn al-Hajib's *Mukhtaṣar Muntahā al-uṣūl wa-l-amal fī 'ilmay al-uṣūl wa'l-jadal* (Ultimate Temptation and Ambition on the Sciences of Jurisprudence and Art of Disputation) marks the start of a summary genre in the history of *uṣūl al-fiqh*. Such summaries in the post-classical era of Islamic scholarship aimed at expressing, in a formulaic manner, a discipline that had benefited from centuries-long developments and accumulations of expertise. Al-Amidi himself first expressed his ideas on *uṣūl al-fiqh* in his magnum opus titled *al-Iḥkām* (Fortification of the Sources of Laws; see below), and then composed a summary of this work, probably as a textbook intended for novices. Ibn al-Hajib's summary and *al-Mukhtaṣar* belong to the same tradition and represents an even more erudite summary. *Al-Mukhtaṣar* is certainly the most renowned textbook of *uṣūl al-fiqh*, as revealed by the commentaries made on this work by representatives of almost all the schools of law and theology. Despite the fact that Ibn al-Hajib was a Maliki-Ash'ari theologian-jurist, his *al-Mukhtaṣar* became the subject of works by Mamluk and Ottoman Hanafis, such as al-Babarti (d. 1384), al-Sayyid al-Sharif al-Jurjani (d. 1413), and Hocazade Muslih al-Din Mustafa (d. 1488). Al-Sayyid al-Sharif and Hocazade wrote super-commentaries on 'Adud al-Din al-Iji's (d. 1355) commentary on *al-Mukhtaṣar* (see below).

Among the commentaries on Ibn al-Hajib's *Mukhtaṣar al-Muntahā* recorded in the library inventory, one is particularly noteworthy: the abovementioned commentary by al-Iji (75 {9–10}), as it was subject to many super-commentaries. Al-Sayyid al-Sharif

al-Jurjani's super-commentary on al-Ijī's commentary is particularly notable, and the two works were published together several times.⁴ In the inventory, nine copies of al-Ijī's commentary and four copies of al-Sayyid al-Sharīf's super-commentary on it are recorded (76 {11–15}). There are also anonymous super-commentaries, most of which may have been by al-Sayyid as well. Another super-commentary that substantially impacted later jurisprudential thought was that of al-Taftazani, of which several copies are listed in the inventory (76 {8}). It is also noteworthy that these two jurists both competed in the same two fields of post-classical intellectual thought—namely, jurisprudence and philosophical theology, which had a significant influence in their lifetime and in subsequent centuries. Moreover, it is interesting to note that both were known for being commentators on two works by the same author, 'Adud al-Din al-Ijī.

The cataloguer 'Atufi next turns to the juristic genre of jurisprudence. The most influential works in this tradition are the *al-Uṣūl* by al-Pazdawī (d. 1089) and *al-Uṣūl* by al-Sarakhsī (d. 1090). The respective authors of these two works were contemporary jurists and colleagues in the circle of al-Halwani (d. 1060). They produced almost identical works, though al-Pazdawī's is more formal and concise, while al-Sarakhsī's is more voluminous and comprehensive. Several copies of *Uṣūl al-Pazdawī* are catalogued in MS Török F. 59 (77 {13–18}), but Sarakhsī's *al-Uṣūl* is missing, perhaps by some accident, as it was known and catalogued in many later Ottoman collections. *Uṣūl al-Pazdawī* became so prominent that it was taken to epitomize the classical Hanafi ideas on jurisprudence. Many commentaries were written on it, along with many abridgments. Al-Nasafi's (d. 1310) *al-Manār* (The Road-Star) and al-Akhsikati's (d. 1246–7) *al-Muntakhab* (The Selected), for example, are abridgments of this work. Likewise, the *Kashf al-asrār* (Discovery of the Secrets) of 'Abd al-'Aziz al-Bukhari (d. 1330), which is classified in the inventory immediately after al-Pazdawī's work (77 {11}), is the best known among the numerous commentaries. Copies of *al-Manār* by al-Nasafi come next in the inventory (78 {1–9}). This work, probably composed as a textbook for beginners in *uṣūl al-fiqh*, was widely circulated and well-received immediately after its composition. In his *Kashf al-zunūn*

(The Clearing of Suspicions), a multi-volume, mid-seventeenth-century bio-bibliographical compendium, Katip Çelebi (d. 1657) notes more than 80 works on *al-Manār*, either commentaries, abridgements, or poetic versions of the work.⁵ For example, one of the entries in the inventory is a versified version of *al-Manār* (78 {3}); the one that follows is a commentary on *al-Manār* by Ibn al-Malak, a fifteenth-century Ottoman jurist of the Anatolian town of Tire (78 {6}). The subsequent entry is also a commentary by the author of *al-Manār* himself, namely al-Nasafi, titled *Kashf al-asrār sharḥ al-musannif 'alā al-Manār* (Discovery of the Secrets: The Author's Own Commentary on the Road-Star), 78 {7–8}). *Al-Manār* is largely a summary of *Uṣūl al-Pazdawī* and has been used to instruct novices in Hanafi jurisprudence since its first composition.

The next entry in the inventory is another textbook summary of a larger classical text in the juristic genre of jurisprudence which, as mentioned above, is itself not included in the inventory: *Uṣūl al-Sarakhsī* (78 {12–16}). Its summary by al-Khabbazi (d. 1292), called *al-Mughnī fī uṣūl al-fiqh* (The Enricher in Jurisprudence), though widely known and circulated, did not reach the same level of popularity as *Uṣūl al-Pazdawī* and *al-Manār* in the post-classical period.

The other important abridgment of the juristic genre is *al-Muntakhab* by al-Akhsikathi. This work is missing from the inventory but was included as the subject of two commentaries: one by 'Abd al-'Aziz al-Bukhari, *al-Tahqīq fī sharḥ al-Muntakhab fī uṣūl al-madhhab* (Verification in the Commentary of the Selected Work according to the Jurisprudence of the School, 78 {18–19}, 79 {1–2}); and the other, *Miftāḥ al-uṣūl* (Key to Jurisprudence), by an unknown author (79 {2–3}).

'Atufi then turns to the famous work of jurisprudence by the Ottoman scholar Molla Hüsrev (Mawlana Khusraw) called *al-Mirqāt* (A Stairway), and its commentary *al-Mir'āt* (The Mirror) by the same author (79 {6–8}). Upon its composition, the work began to circulate in the Ottoman lands and soon became a textbook, translated into Ottoman Turkish and eventually also into Modern Turkish. Molla Hüsrev's *al-Mir'āt* is an eclectic work, though its emphasis is on the juristic genre. It has all the characteristics of the *muta'akkhirīn* period, including its particular concern with logical argumentation.

The next group of items in the inventory enumerates works related to the theological genre of jurisprudence, in particular al-Badakhshi's (d. 1517) commentary on *Minhaj al-uṣūl* of al-Baydawi (d. 1286, 79 {9}), which was a successful and well-known summary of the theological genre of jurisprudence and subject to many commentaries. Both al-Badakhshi and al-Baydawi belong to the post-classical period, but the following entry in the inventory cites one of the great classics of the theological genre: *al-Mustaṣfā min 'ilm al-uṣūl* (Selections from the Discipline of Jurisprudence) by al-Ghazzali (79 {10–11}). Al-Amidi's *al-Iḥkām fī uṣūl al-aḥkām* (Fortification of the Sources of Laws) follows next, on which we have already commented above and shall consider again further below (79 {11–14}).

The subsequent work in the inventory is by a certain Yahya b. Ilyas, about whom there is no information, but who must have been an Ottoman jurist, as the work was composed during the reign of Bayezid II. The book is not in fact a work of *uṣūl al-fiqh*, but one on *furū' al-fiqh* (substantive law, 79 {15–16}). Since it places a special emphasis on the jurisprudential arguments that lie behind substantive laws, however, it can be classified as a work belonging to the genre of *Takhrīj al-furū' alā al-uṣūl* (Exposition of Substantive Law according to Jurisprudence).⁶ Another work of jurisprudence by an Ottoman jurist, this time a known one, al-Kirmasti (d. 1494), is listed next with the title of *Risāla fī uṣūl al-fiqh* (79 {16–17}). Al-Kirmasti in fact wrote three works on *uṣūl al-fiqh*, two of which are small treatises not cited here. The next entry is on a widely discussed topic concerning the relationship between reason and revelation, titled *Risāla muta'alliqa bi-l-ḥusn wa-l-qubḥ al-aqliyyayn al-madkūrayn fī uṣūl al-fiqh* (A Small Treatise on the Issue of Rational Good and Evil Discussed in Jurisprudence) by an unidentified author; another copy is recorded below after three works (79 {17–18}, 80 {3–4}). The subsequent entry is a commentary by Ibn Qawān (d. 1484) called *al-Taḥqīqāt fī sharḥ alā Waraqāt fī uṣūl al-fiqh* (Examinations, Being a Commentary on the Pages in Jurisprudence, 79 {19}, 80 {1}) on a well-known short treatise on jurisprudence by al-Juwayni (d. 1085). There is another copy of this work, recorded a few lines later, by al-Makki titled *Idrākāt al-Waraqāt* (Apprehensions of the Pages) (80 {5–6}).

Like Ibn Khaldun, encyclopedists and historians of the Islamic sciences usually regarded the science of the art of disputation (*'ilm al-jadal*) as an exercise for students of *kalām* and *uṣūl al-fiqh*. The book that comes next in the list concerns the art of disputation, and was written by an unknown author: *'Ayn al-nazar fī sharḥ Muqaddima al-naẓar wa-sharḥihā fī 'ilm al-jadal al-muta'alliq bi-'ilm uṣūl al-fiqh* (The Book of the Essence of Contemplation, Being a Commentary on *Muqaddimah al-naẓar* and Its Commentary on the Science of the Art of Disputation Related to Jurisprudence, 80 {1–2}).

One of the turning points in the theological genre of *uṣūl al-fiqh* is exemplified by *al-Maḥṣūl* (The Harvest) of al-Rāzī, who not only deeply impacted this tradition but also inspired subsequent developments in the juristic genre. *Al-Maḥṣūl* was subject to commentary and summary in a number of works, one of which is *Taḥṣīl al-uṣūl min Kitāb al-Maḥṣūl* (simply known as *al-Taḥṣīl*) by Siraj al-Din al-Urmawī (d. 1283 in Konya). The entry that comes next in the inventory is a commentary on this work by Badr al-Din Muhammad b. As'ad al-Tustari (d. 1332), titled *Kitāb Ḥall 'aqd ('uqad) al-taḥṣīl fī sharḥ al-Taḥṣīl* (The Book of the Release of the Knot of Attainment, Being a Commentary on *al-Taḥṣīl*) (80 {2–3}). There is also a copy of *al-Taḥṣīl* itself within a compendium later in the list (80 {8–9}).

The following volume in the inventory is a collection of two works (80 {6–8}), one of which is titled *Muntahā al-su'l wa-l-amal fī 'ilmay al-uṣūl wa-l-jadal* (The Ultimate Temptation and Ambition on the Sciences of Jurisprudence and Art of Disputation). However, it should be the *Mukhtaṣar* (The Summary) of that work because 'Atufi identifies the author as Ibn al-Hajib, not al-Amidi. The second work in the same volume is *Sharḥ Taṣrīf al-Miftāḥ* (A Commentary on the Morphology Part of the Key), most probably the section on morphology from *Miftāḥ al-'ulūm* (The Key for the Sciences) of al-Sakkaki (d. 1289; see the inventory's linguistic section). The next volume is also a collection (80 {8–10}); it contains three works, the second of which, *al-Taḥṣīl*, is about jurisprudence. Though it is coined as a commentary of *al-Maḥṣūl*, the work is in fact an abridgement. The first work in the volume is on theology, while the third is on

logic. This grouping seems to make sense for a particular course of study.

The sixteenth-century Ottoman jurist al-Kirmasti is mentioned for a second time in the compendium with a commentary on an unknown work called *al-Nāfi'* (80 {10–11}). The subsequent entry is again an unidentified work on jurisprudence, called *Risāla al-Īrādāt al-bahthiyyah fī uṣūl al-fiqh* (A Treatise on the Discursive Advances on Jurisprudence). The next volume in the inventory is also a collection, but the cataloguer records only the first entry, which is another copy of *al-Taḥṣīl Muktaṣar Kitāb al-Maḥṣūl* by al-Urmawī (80 {12–13}; see above). The following volume contains two works (80 {13–14}), one of which is probably a super-commentary by an unknown author on al-Jurjani's famous commentary on the commentary written by Qutb al-din al-Razi on Siraj al-Din al-Urmawī's work on logic, titled *Maṭālī' al-anwar* (The Rising Places of the Lights). The other work in the same volume is a super-commentary on *al-Talwīḥ* by Ibn Sa'd al-Taftazani on jurisprudence (he must be the grandson of al-Taftazani, known as Hafid al-Taftazani). The cataloguer then records another volume containing two works (80 {15–16}), both of which are abridgments by Fakhr al-Din ar-Razi: one on the discipline of *kalām* and the other on *uṣūl al-fiqh*. These two works are known as *al-Ma'ālimayn* (The Two Milestones). The final volume also contains two works (80 {17–18}) without naming the author, one on *kalām* and the other on jurisprudence (80 {17–18}). The second work in the volume must be by the famous Shi'i jurist Ibn al-Mutahhar al-Hilli (d. 1325), as the only classical *uṣūl al-fiqh* work recorded with the title of *Mabādī al-wuṣūl ilā 'ilm al-uṣūl* (The Book of Principles for the Attainment of the Discipline of Jurisprudence) is ascribed to him in the library catalogues as well as in the biographical/bibliographical works.⁷

CONCLUDING REMARKS ON THE LEGAL THEORY SECTION OF THE INVENTORY

The entries of 'Atufi include many of the standard works on jurisprudence current in the scholarly circles of the eastern and central Islamic lands. The works, which belong to the two main genres of jurisprudence and eclec-

tic traditions, are well represented here. The inventory's focus is on the post-classical period, as it includes more works by the *muta'akhhirūn* (later scholars) than by the *mutaqaddimūn* (earlier scholars). Almost all of the standard textbooks are present in the inventory, including *al-Tawḍīḥ*, its commentary *al-Talwīḥ*, as well as the super-commentaries on the latter. Also listed are *Mukhtaṣar Ibn al-Hajīb* and the popular *al-Manār*, along with their respective commentaries. Similarly, popular Ottoman texts, such as the *al-Mirqāt* and *al-Mir'āt* of Molla Hüsrev and *Fuṣūl al-badā'ir* of Molla Fenari, are recorded. The fact that the summary textbooks are represented by several copies indicates that the palace library was principally furnished for teaching rather than research, although many classical works are also present.

Nevertheless, some of the early classical texts are conspicuous for their absence. The earliest work on jurisprudence, *al-Risāla* of al-Shafi'i, for example, has not been catalogued, nor has the *al-Fuṣūl* of al-Jassas. Similarly, Abu Zayd al-Dabusi's *Taqwīm al-adillah*, which instigated the juristic tradition of *uṣūl al-fiqh*, is not included in the inventory despite the fact that the work has survived in many manuscripts, most of which are preserved in Ottoman libraries. One of the pioneering works of the theological genre of jurisprudence is also missing, namely *al-Mu'tamad* by Abu al-Husayn al-Basri. Al-Juwayni's influential work *al-Burhān* is not listed, though his small treatise *al-Waraqāt* is represented by its two commentaries. More surprising is the absence of the *Uṣūl* work of al-Sarakhsi, the most influential Hanafi jurist. However, since the libraries of Istanbul and Turkey preserve several copies of many of these missing works, it is possible that the holdings of Bayezid II's palace library primarily functioned as a kind of school collection, rather than being a comprehensive collection for scholars. Of course, this is a tentative observation based only on the jurisprudence section of the inventory. Another feature supporting the hypothesis that the palace library was a teaching collection, however, is the absence of works by non-Sunni legal schools, the only exception being the last entry in the inventory, *Kitāb Mabādī' al-wuṣūl ilā 'ilm al-uṣūl al-fiqh* by the well-known Shi'i author, Ibn al-Mutahhar al-Hilli (d. 1325). This stands in contrast to prominent research libraries

such as Ahmed III, Fatih, Millet, and many others, which did include such works.

NOTES

1. For a general overview of *uṣūl al-fiqh* (Islamic legal theory), see Wael B. Hallaq, *A History of Islamic Legal Theories: An Introduction to Sunnī uṣūl al-fiqh* (Cambridge: Cambridge University Press, 1997).

Works on *al-Talwīḥ*

The title *Ḥāshiyat al-Talwīḥ*, when used without ascription, may refer either to that of al-Taftāzānī himself or to one of the numerous super-super commentaries written on that work, for in the years following its composition, complete or partial commentaries were already being written on *al-Talwīḥ*.

- 2.10. Molla Hüsrev (Mawlānā Khusraw), Hüsrev Mehmed Efendi (d. 1480), *Ḥāshiyat al-Talwīḥ* (Super-Commentary on the Alluding), Arabic, 74 {5–6}. EDITIONS: Published in the margins of Şadr al-Sharī‘a, *Sharḥ al-Tawḍīḥ ‘alā al-Tanqīḥ*, 3 vols., Cairo: Maṭba‘at al-Khayriyya, 1322.
- 2.11. Hüsamzade (Husāmzāda, or Ibn Husām), Muṣliḥ al-Dīn Muṣṭafā b. Husām al-Dīn (d. ca. 1488), *Ḥāshiyat al-Talwīḥ* (Super-Commentary on the Alluding), Arabic, 74 {6–7}. MANUSCRIPTS: Süleymaniye, Amcazade Hüseyin Paşa 153; Carullah 458; Laleli 2225. EDITIONS: None.
- 2.12. “*K. Ḥāshiyat al-Talwīḥ*” (Super-Commentary on the Alluding), Arabic, 74 {7}.

In the same volume:

- 2.12.1. “*Ḥāshiyat al-Talwīḥ*” (Super-Commentary on the Alluding), Arabic, 74 {7–8}.
- 2.12.2. “*Sharḥ Ādāb al-baḥṭh*” (Commentary on the Theory of Disputation), Arabic, 74 {8}.
- 2.12.3. “*Risālat al-Ṣalāt*” (Epistle on Prayer), Arabic, 74 {8}.
- 2.12.4. “*Ḥāshiyat Sharḥ al-Shamsiyya li-l-Sayyid*” (Super-Commentary on a Commentary on the *Shamsiyya* of al-Sayyid), Arabic, 74 {8–9}.
- 2.12.5. “*Matn Khulāṣa fī al-ḥadīth*” (The Summary Text in the Science of Prophetic Tradition), Arabic, 74 {9}.
- 2.12.6. “*Ḥāshiyat Sharḥ Talkhīṣ al-Miftāḥ*” (A Super-Commentary on the Commentary on the Abridgment of the Key), Arabic, 74 {9–10}. See the section on Rhetoric (*‘Ilm al-Ma‘ānī*), Arabic, 270–74.
- 2.13. ‘Alā’ al-Dīn al-Ṭūsī, *K. al-Dhukhr/al-Dhākhirah fī Radd Madhhab al-Falāsifa* (Stock for Refuting the School of Philosophers), Arabic, 74 {10}.

In the same volume:

- 2.13.1. *Ḥāshiyat al-Talwīḥ* (Super-Commentary on the Alluding), Arabic, 74 {11}.
- 2.13.2. *Ḥāshiyat Ḥāshiyat al-Sayyid ‘alā Sharḥ al-Mukhtaṣar fī Uṣūl al-Fiqh* (A Super-Commentary on the Super-Commentary on the Commentary of the Summa on Jurisprudence), Arabic, 74 {11–12}.
- 2.13.3. *Ḥāshiyat Sharḥ al-Mawāqif fī ‘Ilm al-Kalām* (A Super-Commentary on a Commentary on the Stations in the Science of Philosophical Theology), Arabic, 74 {12}.
3. Molla Fenari (al-Fanārī), Shams al-Dīn Muḥammad b. Ḥamza b. Muḥammad (d. 1431), *K. Fuṣūl al-Badā’i’ fī Uṣūl al-Sharā’i’* (Book of Magnificent Chapters on the Sources of Islamic Rulings), Arabic, 74 {18}. MANUSCRIPTS: TSMK, A. 1231. Also Istanbul, Damad Ibrahim, 475 (it was read to the author: *al-maqrū‘a ‘alā al-muṣannif*); Hacı Beşir Ağa, 202 (also read in the presence of the author and copied by his disciple Molla Şa‘īd Qirimī). EDITION: Istanbul: Şeyh Yahya Efendi Matbaası, 1872.
- 3.1. Same as above, 74 {19}.
- 3.2. Same as above, 74 {19}–75 {1}.
- 3.3. Same as above, 75 {1}.
- 3.4. Same as above, two volumes, 75 {2–3}.
4. Ibn al-Ḥājjib, Abū ‘Amr Jamāl al-Dīn ‘Uthmān b. ‘Umar b. Abī Bakr (d. 1249), *Mukhtaṣar Muntahā al-Sūl wa-al-Amal fī ‘Ilm al-Uṣūl wa-al-Jadal* (The Summary of the Ultimate Temptation and Ambition on the Sciences of Jurisprudence and Art of Disputation), known simply as *al-Mukhtaṣar* or *Mukhtaṣar Ibn al-Ḥājjib*; this widely known textbook on which there are many

- commentaries is a summary of another, longer work by the author himself. Arabic, 75 {8}. MANUSCRIPTS: TSMK, A. 1243 (copied in 870/1466); there are seals at the beginning and the end). Since it is a popular textbook that cuts through almost all of the Sunni legal traditions, it has hundreds of manuscript copies throughout the world. EDITIONS: Many editions have been made since the beginning of print, the earliest of which is probably the Istanbul edition of 1307/1888, Ḥasan Ḥilmi Rizevî, which was published with İjî's commentary, for which see below. A modern edition was prepared by Nadhîr Ḥamādû, Beirut: Dâr Ibn Ḥazm, 1427/2006.
- 4.1. Same as above, 75 {8–9}.
 - 4.2. Same as above, 75 {9–10}.
 5. Works on *al-Mukhtaṣar*
 - 5.1. Quṭb al-Dîn al-Shirâzî, Maḥmûd b. Mas'ûd b. Muṣliḥ (d. 710/1311), *Sharḥ Mukhtaṣar al-Muntahâ* (Commentary on the Summary of the Ultimate), Arabic, 75 {13}. MANUSCRIPTS: TSMK, A. 1310 (there are seals at the beginning and the end; the draft date: 676/1278, final revision: 677/1279). EDITIONS: 'Abd al-Laṭîf b. Su'ûd, Riyad: Jâmi'at al-Imâm Muḥammad b. Su'ûd al-Islâmiyya, 1435/2012.
 - 5.1.1. Same as above, 75 {13–14}.
 - 5.1.2. Same as above, 75 {14–15}.
 - 5.2. 'Aḍud al-Dîn al-İjî, Abu al-Faḍl 'Abd al-Raḥmân b. Aḥmad b. 'Abd al-Ghaffâr (d. 756/1355), *Sharḥ Mukhtaṣar al-Muntahâ*, Arabic, 75 {15–16}. MANUSCRIPTS: This is the most popular commentary of *al-Mukhtaṣar*; hence, hundreds of manuscripts exist worldwide. TSMK, A. 1233 (copied in 884/1479), 1331 (copied in 876/1471) (seals at the beginning and the end of the vol.), 1337 (copied in 777/1375) (seals at the beginning and end); there are three works in this volume: first, *Sharḥ al-Mukhtaṣar*; second, a three-page *Risâla* (Epistle) by the same author; and, third, *al-Mawâqif* (The Stations) again by the same author. EDITIONS: The earliest edition is that of Ḥasan Ḥilmi Rizevî, Istanbul, 1307/1888.
 - 5.2.1. Same as above, 75 {16–17}.
 - 5.2.2. Same as above, 75 {17}.
 - 5.2.3. Same as above, 75 {18}.
 - 5.2.4. Same as above, 75 {18–19}.
 - 5.2.5. Same as above, 75 {19}–76 {1}.
 - 5.2.6. Same as above, 76 {1–2}.
 - 5.2.7. Same as above, 76 {2–3}.
 - 5.2.8. Same as above, 76 {3}.
 - 5.3. 'Abd al-'Azîz b. Muḥammad b. 'Ali al-Ṭûsî (d. 706/1306), *Kāshif al-Rumûz wa-Muḥhir al-Kunûz fî Sharḥ Mukhtaṣar al-Muntahâ* (Discoverer of the Symbols and Revealer of the Hidden Treasures Being a Commentary on *Mukhtaṣar al-Muntahâ*), Arabic, 76 {4}. MANUSCRIPTS: TSMK, A. 1232 (seals at the beginning and end). EDITIONS: There are many dissertations editing the work but none has been published yet.
 - 5.4. Same as 5.2, but there are a few missing pages from the beginning, 76 {5–6}.
 - 5.4.1. Same as above, 76 {6–7}.
 6. Works on *Sharḥ al-'Aḍud*
 - 6.1. Sa'd al-Dîn al-Taftâzânî, Mas'ûd b. 'Umar (d. 792/1390), *Hāshiya 'alâ Sharḥ 'Aḍud Mukhtaṣar al-Muntahâ* (A Super-Commentary on the Commentary of 'Aḍud al-Dîn al-İjî on *Mukhtaṣar al-Muntahâ*), Arabic, 76 {11}. MANUSCRIPTS: It was a popular super-commentary; hence there are

many copies. EDITIONS: The Istanbul 1307/1888 edition, cited above, includes the super-commentary of al-Taftāzānī. It seems that there is no other modern edition of it.

6.1.1. Same as above, 76 {12}.

6.1.2. Same as above, 76 {13}.

- 6.2. Sayyid al-Sharīf al-Jurjānī, Abu al-Ḥasan ‘Alī b. Muḥammad al-Ḥusaynī (d. 816/1413), *Ḥāshiyat ‘alā Sharḥ ‘Aḍud ‘alā Mukhtaṣar al-Muntahā* (A Super-Commentary on the Commentary of ‘Aḍud al-Dīn al-Ījī on *Mukhtaṣar al-Muntahā*), Arabic, 76 {14}. This is an even more popular super-commentary on Ibn al-Ḥājjib’s *al-Mukhtaṣar* than that of al-Taftāzānī. MANUSCRIPTS: TSMK, A. 1332 (copied in 870/1466) (seals at the beginning and the end); there are more than one hundred copies in Turkish libraries alone. The copy of Ayasofya 965 contains the Bayezid II seals. EDITIONS: The Istanbul 1307/1888 edition, cited above, also includes the super-commentary of al-Jurjānī.

6.2.1. Same as above, 76 {15}.

6.2.2. Same as above, 76 {16–17}.

6.2.3. Same as above, 76 {17–18}.

Super-Super Commentaries

- 6.3. Molla Efdalzāde, Ḥamīd b. Afḍal al-Dīn al-Ḥusaynī (d. 908/1502), *K. Ḥāshiyat ‘alā al-Ḥāshiyat ‘alā al-Sharḥ al-‘Aḍudī* (Super-Commentary on the Super-Commentary on the Commentary by ‘Aḍud al-Dīn), Arabic, 76 {18–19}. MANUSCRIPTS: TSMK, A. 1343 (the title is given as *Īdāh al-Mushkill wa-Ḥall al-Muqaffal*, no seal). EDITIONS: None.
- 6.4. *Kitāb Ḥāshiyat Sharḥ ‘Aḍud al-Dīn li-Sa’d al-Dīn fi Uṣūl al-Fiqh* (al-Taftāzānī’s Super-Commentary on the Commentary of al-Ījī), Arabic, 76 {19}–77 {1}.
- 6.5. *K. Ḥāshiyat al-Ḥāshiyat ‘alā Sharḥ ‘Aḍud al-Dīn li-l-Mukhtaṣar fi Uṣūl al-Fiqh* (Super-Commentary of the Super-Commentary on the Commentary of ‘Aḍud al-Dīn on *al-Mukhtaṣar* in Jurisprudence), Arabic, 77 {1–2}.
- 6.6. *K. Ḥāshiyat ‘alā al-Ḥawāshī ‘alā Sharḥ ‘Aḍud al-Dīn* (Super-Commentaries on the Commentary of ‘Aḍud al-Dīn on *al-Mukhtaṣar* in Jurisprudence), Arabic, 77 {2–3}.
- 6.7. Molla Hüsrev (Mawlānā Khusraw), Hüsrev Mehmed Efendi (885/1480), *K. al-Aswila wa-al-ajwiba* (The Book of Questions and Answers). In one volume with above title. Arabic, 77 {3–4}.
- 6.8. *K. Ḥāshiyat Sharḥ ‘Aḍud al-Dīn* (A Super-Commentary on al-Ījī’s Commentary); al-Abharī Sayf al-Dīn Aḥmad ‘Uthmān (d. ca. 800/1397) was marked as the author. Many copies exist in Turkish manuscript libraries. It was composed in 777/1375, Arabic, 77 {4–5}. MANUSCRIPTS: The copy in Süleymaniye Library, Fatih Collection 1295 contains Bayezid II’s seal on the last page. EDITIONS: None.
- 6.9. *Ḥāshiyat al-Sayyid ‘alā Sharḥ al-‘Aḍud* (A Super-Commentary by al-Jurjānī on al-Ījī’s commentary). See above 6.2, Arabic, 77 {5}.
- 6.10. *Ḥāshiyat ‘alā Ḥāshiyat Sharḥ al-‘Aḍud* (A Super-Commentary on al-Ījī’s Commentary), Arabic, 77 {5–6}.
- 6.11. *Ḥāshiyat Sharḥ al-‘Aḍud* (A Super-Commentary on al-Ījī’s Commentary), Arabic, 77 {6–7}.
- 6.12. *Ḥāshiyat al-Mukhtaṣar fi ‘Ilm al-Ma‘ānī* (A Super-Commentary on al-Taftāzānī’s *al-Mukhtaṣar* on the Science of Rhetoric), Arabic, 77 {7}. In one volume with above title. For the latter work, see section on Rhetoric (*‘ilm al-ma‘ānī*), Arabic, 274–75.
7. al-Pazdawī, Abu al-‘Usr Abu al-Ḥasan ‘Alī b. Muḥammad (d. 482/1089), *Uṣūl al-Pazdawī* (Pazdawī’s Work on Jurisprudence), Arabic, 77 {13}. MANUSCRIPTS: This is a well-known classic work of Hanafī jurisprudence; hence, hundreds of copies are available worldwide. It is wrongly

known as *Kanz al-Wuṣūl ilā Maʿrifat al-Uṣūl*, and is recorded as such in many libraries. EDITIONS: There are several editions of the work, most of which were published with its commentaries, especially the most famous commentary of ʿAbd al-ʿAzīz al-Bukhārī. The earliest print edition was that of Istanbul, 1307/1890, with *Kashf al-Asrār* of al-Bukhārī, vols. I–IV. Two separate editions exist: one is that of Karachi (no date) and the other a more recent one, Mecca and Medina, 2014.

- 7.1. Same as above, 77 {14}.
- 7.2. Same as above, 77 {14}.
- 7.3. Same as above, 77 {15}.
- 7.4. Same as above, 77 {15}.
8. ʿAbd al-ʿAzīz al-Bukhārī, ʿAlāʾ al-Dīn ʿAbd al-ʿAzīz b. Aḥmad (730/1330), *Kashf al-Asrār fī Sharḥ Uṣūl al-Pazdawī* (Discovery of the Secrets Being a Commentary on the Jurisprudence of al-Pazdawī), Arabic, 77 {16}. This was probably added later by a different copyist who also added another title, either *K. al-Aḥkām* or *al-Iḥkām* (the author was not identified).
- 8.1. “*K. Sharḥ al-Pazdawī*” (Commentary on the Jurisprudence of al-Pazdawī); the author is unnamed, so it is not clear whether this is the same title as above, Arabic, 77 {18}.
9. Abu al-Barakāt Ḥāfiẓ al-Dīn ʿAbd Allah ʿAbd Allah b. Aḥmad al-Nasafī (d. 710/1310), *Manār al-Anwār fī Uṣūl al-Fiqh* (Road-Star of the Sacred Lights in Jurisprudence), Arabic, 78 {1}. MANUSCRIPTS: This is the most popular intermediate-level textbook of Hanafi jurisprudence, and there are hundreds of copies worldwide. It is strange that there are only three copies in this collection and one poetic version. EDITIONS: Several editions were made either separately or with one of its commentaries, especially that of Ibn Malak. The earliest publication is that of the Ottoman Imperial Printhouse in 1292/1876 with the Commentary of Ibn Malak; a more recent publication with the commentary of the author himself was made in 1979 in Beirut.
- 9.1. Same as above, 78 {1–2}.
- 9.2. Same as above, 78 {2}.
- 9.3. *K. al-Mughnī*, 78 {2–3}. See below no 11; this title is in one volume with the previous.
- 9.4. *K. Naẓm al-Manār fī Qaṣīda Lāmiyya maʿa Sharḥihī* (The Poem Version of *al-Manār* in the Form of a Qaṣīda Lāmiyya with Its Commentary).
10. Ibn Malak, ʿIzz al-Dīn ʿAbd al-Laṭīf b. ʿAbd al-ʿAzīz (821/1418), *Sharḥ al-Manār fī Uṣūl al-Fiqh* (Commentary of Ibn Malak on *al-Manār*), Arabic, 78 {6}. MANUSCRIPTS: A widely used commentary of *al-Manār*, and hundreds of copies are available worldwide. TSMK, A. 1268, 1275, 1281 (copied in 888/1481). EDITIONS: There are many editions, the earliest of which is Istanbul: Matbaʿa-i ʿAmire, 1292 (1876).
- 10.1. Abu al-Barakāt Ḥāfiẓ al-Dīn Abdullah b. Aḥmad al-Nasafī (d. 710/1310), *Kashf al-Asrār Sharḥ al-Muṣannif ʿalā al-Manār* (Discovery of the Secrets: The Author’s Own Commentary on *al-Manār*), Arabic, 78 {6–7}. MANUSCRIPTS: TSMK, A. 1278 (copied in 712/1312), 1279, 1280 (copied in 752/1351). EDITIONS: Two vols., Cairo: Bulaq, 1316; 2 vols., Beirut: Dār al-Kutub al-ʿIlmiyya, 1986.
- 10.2. Same as above, 78 {7–8}.
- 10.3. “*K. Sharḥ al-Manār fī Uṣūl al-Fiqh*” (A Commentary on *al-Manār* in Jurisprudence), no information on author, 78 {8–9}.
11. al-Khabbāzī, Abū Muḥammad ʿUmar b. Muḥammad (691/1292), *al-Mughnī fī Uṣūl al-Fiqh* (The Enricher in Jurisprudence), Arabic, 78 {12}. MANUSCRIPTS: Many copies; TSMK, A. 1261. EDITIONS: Mecca: Jāmiʿat Umm al-Qurā, 1983.
- 11.1. Same as above, 78 {12}.

- 11.2. Another book in the same volume with the previous entry, 78 {13}.
12. Abū Muḥammad Maṣṣūr b. Aḥmad al-Khawārizmī al-Qa'ānī (d. 775/1373), *Sharḥ al-Mughnī fī Uṣūl al-Fiqh* (The Commentary of the Enricher in Jurisprudence), Arabic, 78 {15}. MANUSCRIPTS: 29 copies in ISAM catalogue alone. TSMK, A. 1262 (copied in ca. 800/1397); Köprülü, Fazıl Ahmet Paşa 507. EDITIONS: 2 vols., Mecca: al-Maktaba al-Makkiyya, 1426/2005.
- 12.1. Same as above, 78 {15–16}.
13. al-Bukhārī, ‘Abd al-‘Azīz b. Aḥmad b. Muḥammad (d. 730/1329), *K. al-Taḥqīq fī Sharḥ al-Muntakhab fī Uṣūl al-Madhhab* (The Book of Verification in the Commentary of the Selected Work according to the Jurisprudence of the School) (also known as *Ghāyat al-Taḥqīq* [Utmost Verification]), Arabic, 78 {18}. MANUSCRIPTS: TSMK, A. 1226 (copied in ca. 850/1446), 1227 (copied in 835/1432), 1298 (copied in 868/1464). EDITIONS: There is only an old edition: Lucknow: Maṭba‘at al-‘Alī, 1293/1876.
- 13.1. Same as above, 78 {18}.
- 13.2. Same as above, 78 {18–19}.
- 13.3. Same as above, 78 {19}–79 {1}.
- 13.4. Same as above, 79 {1–2}.
- 13.5. *K. Miftāḥ al-Uṣūl fī Sharḥ al-Akhsikathī fī ‘Ilm al-Uṣūl al-Fiqh* (The Key for Jurisprudence Being a Commentary on the Jurisprudential Work of al-Akhsikathī), Arabic, 79 {2–3}. MANUSCRIPTS: Süleymaniye, Laleli 744, contains Bayezid II’s seals at the beginning and end.
14. Molla Hüsrev (Mawlānā Khusraw), Muḥammad b. Farāmurz b. ‘Alī (885/1480), *Mirqāt al-Wuṣūl ilā ‘Ilm al-Uṣūl* (A Stairway to Jurisprudence). A very popular Ottoman textbook on jurisprudence, Arabic, 79 {6–7}. MANUSCRIPTS: Many copies. Köprülü, Fazıl Ahmet Paşa 528; Süleymaniye, Fatih 3367, 5369. EDITIONS: Several editions with its commentary, *al-Mir’āt*; the earliest is that of Istanbul: Matba‘a-i Amire 1267/1850. A recent edition was published in Beirut: Dar al-Kutub al-‘Ilmiyya, 1433/2012.
- 14.1. Same as above, 79 {7}.
- 14.2. Also in the same volume: Molla Hüsrev (Mawlānā Khusraw), Muḥammad b. Farāmurz b. ‘Alī (885/1480), *K. Mir’āt al-Uṣūl fī Sharḥ Mirqāt al-Wuṣūl* (The Mirror of Sources Being a Commentary on a Stairway to Jurisprudence), Arabic, 79 {7–8}. MANUSCRIPTS: Many copies, e.g., Köprülü, Fazıl Ahmet Paşa 527. EDITIONS: It has been published several times with the text of *Mirqāt al-Wuṣūl*, the earliest of which is Istanbul: Matba‘a-i Amire, 1267/1850.
15. Muḥammad b. Ḥasan al-Badakhshī (d. 923/1517), *Manāḥij al-Uqūl fī Sharḥ Minhāj al-Uṣūl* (The Methods of Intellects Being a Commentary on the Method of Jurisprudence), also known as *Sharḥ al-Badakhshī* (The Commentary of al-Badakhshī), Arabic, 79 {9}. The work is a commentary on a well-known textbook in the Shāfi‘ī school called *Minhāj al-Wuṣūl ilā ‘Ilm al-Uṣūl* by al-Qāḍī al-Bayḍāwī (d. 685/1286). MANUSCRIPTS: Süleymaniye, Damad İbrahim Paşa 472. EDITIONS: 3 vols., Beirut: Dār al-Kutub al-‘Ilmiyya, 1405/1985.
16. al-Ghazālī, Abū Ḥāmid Muḥammad b. Muḥammad, Hujjat al-Islām (d. 505/1111), *al-Mustasfā min ‘Ilm al-Uṣūl* (Selections from the Discipline of Jurisprudence), Arabic, 79 {10–11}. MANUSCRIPTS: TSMK, A. 1256 (copied in 596/1200), 1258 (copied in 617/1220); Süleymaniye, Fatih 1465. EDITIONS: Many editions, the earliest of which is Bulaq, Cairo 1322 in 2 vols.; a recent edition is that by Hamza b. Zuhayr Hafiz, 4 vols., Jeddah: Sharikat al-Madīna al-Munawwara li al-Tibā‘a, 1413 AH.
17. Ibn al-Sā‘ātī, Muẓaffar al-Dīn Aḥmad b. ‘Alī al-Baghdādī, *Badī‘ al-Niẓām al-Jāmi‘ bayna Kitābay al-Pazdawī wa-al-Iḥkām* (Marvelous System Combining the Books of al-Pazdawī and *al-Iḥkām*),

known simply as *al-Badī*, Arabic, 79 {11}. MANUSCRIPTS: TSMK, A. 1241 (copied in ca. 800/1397), 1306 (the seals at the beginning and the end, copied in 768/1367). EDITIONS: There is a single edition (2 vols.) with the title of *Nihāyat al-Wuṣūl ilā ʿIlm al-Uṣūl* (Ultimate Destination for Jurisprudence), Mecca, 1419.

18. al-Āmidī, Abu al-Ḥasan Sayf al-Dīn ‘Alī b. Muḥammad (631/1233), *al-Iḥkām fī Uṣūl al-Aḥkām* (Fortification of the Sources of Laws), Arabic, 79 {11–12}. MANUSCRIPTS: TSMK, A. 1303 (copied in 714/1315), 1304, 1305 (679/1281). EDITIONS: 2 vols., Cairo: Dar al-Kutub al-Khidiwiyya, 1332/1914; 2 vols., Cairo: Muḥammad ‘Alī Subayh, 1968.
- 18.1. Same as above, 79 {12–13}.
- 18.2. Same as above, 79 {13–14}.
19. Yaḥyā b. Ilyās, *Natā’ij al-Uṣūl ma’a Sharḥihī Uṣūl al-Natā’ij ‘alā Tartīb al-Furū’ fī ʿIlm al-Fiqh wa-Masā’il al-Uṣūl* (The Results of the Sources with Its Commentary, The Sources of the Results according to the Arrangement of the Science of Law and the Topics of Jurisprudence), Arabic, 79 {15–16}. MANUSCRIPTS: TSMK, A. 1352 (the seals exist). Note: no other manuscript is identified. The book is in fact a *furū’* text starting with *K. al-ṭahāra*, containing 23 chapters ending with *al-waṣāyā*, 254 fols. Yaḥyā b. Ilyās was named as the author in the colophon; the book was composed on Monday, Safar 900/November 1494; the copy was made on Friday, Jumada II 900/January 1495, two months later.
20. al-Kirmastī, Yūsuf b. Ḥusayn (d. 900/1494), *Risāla fī Uṣūl al-Fiqh* (A Small Treatise on Jurisprudence), Arabic, 79 {16–17}. MANUSCRIPTS: TSMK, A. 1270 (copied in 893/1488); *Zubdat al-Wuṣūl ilā ʿUmdat ʿIlm al-Uṣūl* (The Best Way of Attaining the Foundation of Jurisprudence). No seal here; the name *Zubda* is specified. EDITIONS: Beirut: Dār Ṣadr, 1428/2008.
21. “*Risāla Mutaʿalliqā bi-al-Husn wa-al-Qubḥ al-Aqliyyayn al-Madhkūrayn fī Uṣūl al-Fiqh*” (A Small Treatise on the Issue of Rational Good and Evil as Discussed in Jurisprudence). Author is unknown; Arabic, 79 {17–18}. MANUSCRIPTS: The copies in Süleymaniye, Ayasofya: 972 and 973 contain Bayezid II’s seal at the beginning and the end.
22. Molla Hüsrev (Mawlānā Khusraw), Muḥammad b. Farāmurz b. ‘Alī (885/1480), *K. Mir’āt al-Uṣūl fī Sharḥ Mirqāt al-Wuṣūl* (The Mirror of Sources Being a Commentary on a Stairway to Jurisprudence), 79 {18–19}.
23. Ibn Qāwān, Ḥusayn b. Aḥmad b. Muḥammad al-Kilānī al-Shāfi‘ī (d. 889/1484), *al-Taḥqīqāt fī Sharḥ al-Waraqāt fī Uṣūl al-Fiqh* (Examinations Being a Commentary on *al-Waraqāt* [the Pages] in Jurisprudence), Arabic, 79 {19}–80 {1}. MANUSCRIPTS: TSMK, A. 1344, copied in 1466 CE. This seems to be the only known copy in the world. EDITIONS: al-Sharīf Sa’d b. ‘Abd Allāh b. Ḥusayn, ed., Amman: Dār an-Nafā’is, 1419/1999.
24. Shams al-Dīn Muḥammad b. Ashraf al-Ḥusaynī al-Samarqandī (d. 702/1303), *ʿAyn al-Nazar fī Sharḥ Muqaddimat al-Nazar wa-Sharḥihā fī ʿIlm al-Jadal al-Mutaʿalliq bi-ʿIlm Uṣūl al-Fiqh* (The Book of the Essence of Contemplation Being a Commentary on *Muqaddimat al-nazar* and Its Commentary on the Science of the Art of Disputation Related to Jurisprudence), 80 {1–2}. This is not on *uṣūl al-fiqh*. The title of the work in the volume in TSMK, A. 1259 has only *al-Uṣūl*, not *uṣūl al-fiqh*. MANUSCRIPTS: TSMK, A. 1259: There are seals on fl. 2b and on the last page of the volume. However, unlike this entry, the volume of 1259 contains two works, both of which are commentaries on *Sharḥ al-Muqaddima* (The Commentary of the Introduction), on the discipline of dialectics and art of disputation by Burhān al-Dīn Muḥammad b. Muḥammad al-Nasafī (d. 687/1289). The first one is *ʿAyn al-nazar* by Muḥammad b. Somay (?) al-mawsūm bi-al-Shihāb al-Khassī (copied on Wednesday, 6 Rajab 716/September 23, 1316; the other is by ‘Abd al-Raḥīm

- b. Maḥmūd b. Muḥammad al-Katli/Kili/al-Kirmānī; written in Jumādha I 799/March 1397 in Baghdad. For the latter, see the section on philosophy, logic, and disputation, 343 {7–9}.
25. al-Tustarī, Badr al-Dīn Muḥammad b. Asʿad (d. 732/1332), *K. Hall ʿAqd al-Taḥṣīl fī Sharḥ al-Taḥṣīl* (The Book of the Release of the Knot of Attainment Being a Commentary on *al-Taḥṣīl*), 80 {2–3}. MANUSCRIPTS: TSMK, A. 1334 (copied in Dhu'l-Hijja 705, Tabriz; the seals exist).
 26. “*Risāla fī al-Ḥusn wa-al-Qubḥ al-Aqliyyayn fī Kutub al-Uṣūl*” (A Treatise on the Issue of Rational Good and Evil Discussed in Jurisprudence), 80 {3–4}. See no. 21 above.
 27. *K. Rumūz al-Asrār fī Uṣūl al-Fiqh* (The Book of Symbols of Secrets in Jurisprudence), 80 {4–5}. MANUSCRIPTS: There is a unique manuscript copy in Nuruosmaniye Library 1334, whose title is recorded by the copier on the title page as *K. Sharḥ Rumūz al-Asrār fī al-Uṣūl al-Musammā bi-Kunūz al-Anwār* (The Book of the Commentary on the Symbols of Secrets in Jurisprudence, which is known as Treasuries of the Lights) by ʿAlaʾ al-Dīn al-Aswad (Kara Hoca) ʿAlī b. ʿUmar b. ʿAlī. The author of the original work is recorded in the preamble as Abū Bakr b. Ibrāhīm who is associated with the sultan’s court.
 28. al-Makkī (al-Hijāzī), ʿAlī b. Nāṣir al-Shāfiʿī (d. ca. 915/1509), *Idrākāt al-Waraqāt* (Apprehensions of the Pages), Arabic, 80 {5–6}. MANUSCRIPTS: Süleymaniye, Ayasofya 997 (this is probably an autograph copy dated to the beginning of the tenth century, and is probably the only copy; seals at the beginning and end).
 29. Ibn al-Ḥājjib, Abū ʿAmr Jamāl al-Dīn ʿUthmān b. ʿUmar b. Abī Bakr (d. 646/1249), *Muntahā al-Sūl wa-al-Amal fī Ilmay al-Uṣūl wa-al-Jadal* (The Ultimate Temptation and Ambition on the Sciences of Jurisprudence and the Art of Disputation), Arabic, 80 {6–7}. For this see *al-Mukhtaṣar* of Ibn al-Ḥājjib mentioned in 4 above. MANUSCRIPTS: TSMK, A. 1333 (seals exist); 1254 (seals exist, copied in 895/1490).
 - 29.1. In the same volume: al-Muʾadhdhinī, Husām al-Dīn Ibrāhīm b. Muḥammad al-Khwārizmī, *Sharḥ Taṣrīf al-Miftāḥ* (A Commentary on the Morphology Part of *al-Miftāḥ*), Arabic, 80 {7–8}. MANUSCRIPTS: Süleymaniye, Fatih 4686.
 30. Shams al-Dīn Muḥammad b. Ashraf al-Ḥusaynī al-Samarqandī (702/1303), *al-Ṣaḥāʾif al-Ilāhiyya* (The Divine Pages), Arabic, 80 {8}. MANUSCRIPTS: Millet, Feyzullah Efendi 1169 (fols. 1–102). EDITIONS: Aḥmad ʿAbd ar-Rahmān al-Sharīf, ed., Kuwait: Maktabat al-Falāḥ, 1405/1985.
 - 30.1. In the same volume: al-Urmawī, Sirāj al-Dīn Maḥmūd b. Abī Bakr b. Aḥmad (d. 682/1283), *Taḥṣīl al-Uṣūl min Kitāb al-Maḥṣūl* (Attainment of Jurisprudence from the Book of the Harvest), Arabic, 80 {8–9}. MANUSCRIPTS: Millet, Feyzullah Efendi 1169 (fols. 108–260). EDITIONS: 2 vols., Beirut: Muʾassasat al-Risāla, 1408/1988.
 - 30.2. In the same volume: Shams al-Dīn Muḥammad b. Ashraf al-Ḥusaynī al-Samarqandī (702/1303), *Sharḥ al-Qistās fī ʿIlm al-Miqyās* (Commentary of the Criterion on the Science of Logic), Arabic, 80 {9–10}. MANUSCRIPTS: Millet, Feyzullah Efendi 1169 (fols. 264–444). EDITIONS: *al-Qistās* (The Criterion) was translated into Turkish and published.
 31. al-Kirmastī, Yūsuf b. Ḥusayn (d. 900/1494), *Sharḥ al-Nāfiʿ* (Commentary of *al-Nāfiʿ*), Arabic, 80 {10–11}.
 32. *Risālat al-Īrādāt al-Baḥthiyya fī Uṣūl al-Fiqh* (A Treatise on the Discursive Advances on Jurisprudence), Arabic, 80 {11–12}.
 33. A Compilation (*Majmūʿa*): The first work is *Taḥṣīl al-Uṣūl Mukhtaṣar K. al-Maḥṣūl*; see above 30.1., Arabic, 80 {12–13}.
 34. *Ḥāshiya ʿalā Ḥāshiyat al-Sayyid al-Sharīf ʿalā Sharḥ al-Maṭālīʿ* (A Super-Commentary on the Super-Commentary of al-Sayyid al-Sharīf al-Jurjānī on the Commentary of *al-Maṭālīʿ*), 80 {13–14}.

- 34.1. In the same volume: *Hāshiyat al-Talwīḥ li-Ibn Sa'd al-Taftāzānī fī Uṣūl al-Fiqh* (Super-Commentary of *al-Talwīḥ* by Ibn Sa'd al-Taftāzānī on Jurisprudence), 80 {14–15}.
35. al-Rāzī, Fakhr al-Dīn Muḥammad b. 'Umar (d. 606/1209), *Mukhtaṣar fī 'Ilm al-Kalām al-mawsūm bi-al-Ma'ālīm fī Uṣūl al-Dīn* (A Summa in the Science of Philosophical Theology [*Kalām*], known as Milestones in Islamic Theology), Arabic, 80 {15}. MANUSCRIPTS: TSMK, A. 1302 (seals at the beginning). EDITIONS: Cairo: 1323/1905; Samiḥ Dughaym, ed., Beirut: Dār al-Fikr, 1992.
- 35.1. al-Rāzī, Fakhr al-Dīn Muḥammad b. 'Umar (d. 606/1209), *al-Ma'ālīm fī Uṣūl al-Fiqh* (Milestones in Jurisprudence), Arabic, 80 {15–16}. MANUSCRIPTS: TSMK, A. 1301 (the seal is at the end), copied in 609/1207. EDITIONS: Alī Muḥammad 'Awaḍ and 'Ādil Aḥmad 'Abd al-Mawjūd, eds., Cairo: Dār al-Ma'rifa, 1414/1994.
36. "*Risālat Muqaddimat 'Ilm al-Kalām*" (A Treatise on the Introduction of the Science of Philosophical Theology), Arabic, 80 {17}.
37. Ibn al-Muṭahhar al-Ḥillī, Jamāl al-Dīn al-Ḥasan b. Yūsuf (d. 726/1325), *Kitāb Mabādī al-Wuṣūl ilā 'Ilm al-Uṣūl* (The Book of Principles for the Attainment of the Discipline of Jurisprudence), Arabic, 80 {17–18}. MANUSCRIPTS: Amasya Bayezid İl Halk, no. 519, fols. 163b–187b (TMSK, A. 1271 is another work by al-Ḥillī called *Nihāyat al-Wuṣūl ilā 'Ilm al-Uṣūl*, no seals). EDITIONS: A. M. 'Alī Baqqāl, ed., 2nd pr., Beirut: Dār al-Aḍwā', 1986.

BOOKS ON SUFISM, LIVES OF SAINTS, ETHICS, AND SERMONS

The section on Sufism—with lives of saints, ethics, and homiletics also nested in it—constitutes the largest single classification in the palace library inventory, without even considering several dozen relevant works listed in other sections of the inventory by Bayezid II's librarian 'Atufi. Among the twenty sections (*tafşils*) or fields of learning that constitute the grid in which 'Atufi struggles to situate each and every volume in its appropriate discipline, Sufism takes pride of place in terms of numbers. The 1,084 titles in this section account for fifteen percent of the more than 7,200 works listed in the inventory as a whole.¹ By 1502–4, in other words, Sufism had arrived, at least in the lands of Rum and arguably also in many corners of the broader geography of Muslim communities in the Afro-Eurasian oikoumene.

The prominence of Sufism in the inventory is not simply a matter of numbers. For 'Atufi, or for Bayezid, who was presumably the prime audience for this text, there was obviously a touch of affection worth expressing toward certain authors in this otherwise dry list of titles, names, and subjects. Of the standard phrases of fond remembrance and wishes used for the deceased, “may his tomb be radiant” (*tāba tharāhu*) occurs regularly for members of the Ottoman imperial family and otherwise only fifty-two times in the whole text, thirty-nine of which (namely, three-quarters) appear in the Sufism section. The two names that dominate this section, Imam al-Ghazali (d. 1111) and Ibn al-'Arabi (d. 1240), receive the highest number of invocations with that phrase, eleven and eight times respectively.

The quantitative and qualitative prominence of Sufism must be considered in the context of its rising significance as a deep intellectual and social current in the post-Mongol world with sinews reaching into many dif-

ferent layers of life, including forms of popular entertainment like the shadow puppet theater, densely imbricated as it was with neoplatonic Sufi undergirdings. That process had clearly reached a certain maturity circa 1500, in a curious parallel to the unmistakable trend toward vernacularization in various spheres, including but not limited to language.² The library collection inventoried by 'Atufi boldly reflects some vibrant aspects of that trend. At the same time, like all collections, even this gigantic one is selective and partial. The absences, also to be discussed below, tell us that the court was not the crucible, or privileged site, where vernacular pieties woven around Sufism found an obvious platform for all milieux.

The inclusion of books on ethics (*akhlāq*) in this section of the inventory, and the treatment of ethics as a subcategory of Sufism, only enhances this sense of the expanding capaciousness of Sufism. In other words, 'Atufi was informed by the late-fifteenth-century attitude toward *taṣawwuf* as a vast body of and conduit for knowledge. The famous ethicist-philosopher Ibn Miskawayh (d. 1030) is well represented in this section, with his *Tahdhīb al-naḥs* (Purity in Perfecting the Soul), in four copies;³ his *Jāwidān-khirad* (Perennial Wisdom) in eight copies (without a language designation, hence presumably in Arabic), and a Persian translation, almost all of which are listed as “pertaining to Sufism” (*min qibali al-taṣawwufi*).⁴ Two of them (137 {19}, 141 {4}) are “selections,” and one of those two (137 {19}) is classified as being “on advice” (*fī al-naṣā'ihi*). As part of the same epistemological calculus, Ibn Miskawayh appears only twice in the section on philosophy with his *al-Fawzu al-aṣgharu* (The Lesser Felicity), a systematic work on metaphysics (360 {13}, 361 {18}).⁵

Nasir al-Din al-Tusi's (d. 1274) *Akhlāq-i Nāṣiri* (Nasirean Ethics), one of the most popular and influential books on ethics in Islamic history, is also well represented in the palace library and receives a similar classificatory treatment. Of its nine copies, six⁶ are classified under *min qibali al-taṣawwufi*, while one (136 {18}) is designated as being *min qibali al-naṣīḥati wa-al-taṣawwufi* (pertaining to advice and Sufism); another (140 {3}) is recorded simply as being in Persian, and one (146 {3}) is *fi al-naṣā'ihi*. In the case of Jalal al-Din Dawwani's (d. 1502–3) *Akhlāq-i Jalālī* (Jalalian Ethics), here given with the title *Makārim al-akhlāq* (The Book of Noble Character), each of the six copies is explicitly designated as being “in Persian” and *min qibali al-taṣawwufi*.⁷ Dawwani's work, which would quickly enjoy an enthusiastic reception in Ottoman lands and make a long-lasting impact on ethical and political thought there, is indeed deeply informed by Sufi ideas and ideals of the Late Middle period, including illuminationism, as implied in the full title of the book, *Lawāmi' al-ishrāq fi makārim al-akhlāq* (Lusters of Illumination on the Noble Virtues).⁸

Many other titles in this section, such as the pseudo-Aristotelian “advice for Alexander” (two copies, 145 {11}, 145 {11–12}, the latter identified as a Persian translation), or the *Pandnāma* (Book of Advice) attributed to the Sasanian emperor Anushirwan, might have been just as convincingly classified under other categories like advice for rulers, sermons, or philosophy, some of which would be closer to the expectations of the modern reader.⁹ Atufi even places al-Shayzari's well-known *Nihāyatu al-rutbatī fi ṭalabī al-ḥisbatī* (The Utmost Authority in the Pursuit of Ḥisba [namely, enforcing the Qur'anic injunction of “enjoining the right and forbidding the wrong”]) in this section, presumably because it, too, deals with morals, namely the morality of the marketplace and of public spaces like mosques (147 {9}).

ON SUFISM, STRICTLY SPEAKING

Having decided to list the books on Sufism (*taṣawwuf*), ethics (*ilm al-akhlāq*), homiletics (*naṣīḥa / maw'izā*), and hagiography of saintly figures (*manāqib al-mashāyikh wa al-awliyā'*) all together, Atufi clearly did not attempt to sort the books in this composite category

into discreet sections and instead simply cited them indiscriminately. It is possible that the organization of books on shelves, or their size, i.e., some criteria independent of their content, informed Atufi's decisions. It is, of course, also likely that he was at times genuinely fuzzy about the proper designation for particular works or was limited by the categories with which he was working, particularly if he started to pay less attention as he got weary of handling the books. In this laborious process, Atufi must have also been frustrated with volumes that contained several titles falling into different categories, of which there are a good many in this section of the inventory, as well as with many other works that defied his attempts to identify either the title or the author, which he proceeded to describe in the most general terms (“a work on Sufism”). Also, Atufi did pay some attention to the question of language, specifically by identifying works written in Persian and Turkish (though he sometimes noted Arabic as well, in only eleven instances, for no apparent reason), but it is not possible to know how consistent he was in this regard. It appears that if he did not indicate the language at all (the majority of cases), then the work in question was in Arabic, though there are occasions in which he neglects to designate certain works as Persian, even though they most certainly were. Evidently, he was more careful with Turkish, presumably because overall there were very few works on Sufism in Turkish, to be discussed below.

EARLY SUFISM (BEFORE THE ELEVENTH CENTURY)

Predictably, the earliest phase of Sufi history, roughly from the early or mid-ninth century until the appearance of the first major Sufi manuals in the mid-tenth century, is not represented in the inventory at all, with the sole exception of a short selection: the last chapter, titled *Bustān al-ma'rifa* (The Garden of Gnosis, 133 {10–11}), from the famous work of al-Husayn b. Mansur al-Hallaj (d. 922), *Kitāb al-ṭawāsīn* (The Book of *Ṭawāsīn*).¹⁰ The almost total absence of works from this early phase in the palace library collection is not surprising, primarily because the manuscript evidence for that period of Sufism, which is very thin today, was evidently already scarce even in pre-Ottoman times. This silence

extends well into the eleventh century, and it is broken only by the presence of six copies of what is quite possibly the most popular “classical” Sufi manual of all time in Islamic history, Abu’l-Qasim al-Qushayrī’s (d. 1072) *Risāla* (Treatise).¹¹ The same author’s Qur’ān commentary, *Laṭā’if al-ishārāt* (Subtleties of Signs), is also present in a single copy.¹² There is only one other manual from the formative period of Sufi tradition in the tenth and eleventh centuries, al-Kalabadhi’s (d. 990s) *Kitāb al-ta’arruf li-madhhab ahl al-taṣawwuf* (Book of Introduction to the Way of the People of Sufism).¹³ However, ‘Atufi does not cite the author’s name in either of its two mentions, and one suspects that this work found its way into the collection not on its own merit, as it were, but because it was bound together with another work in both cases, one of them with a very popular manual from a slightly later time, namely, ‘Awārif al-ma’ārif (Gifts of Spiritual Knowledge, 108 {14–15}) by Abu Hafs ‘Umar al-Suhrawardi (d. 1234), discussed below. Another seminal work of early Sufi thought, Hujwiri’s (d. between 1073 and 1077) *Kashf al-mahjūb* (The Unveiling of the Veiled, 179 {5}), also appears as part of a multi-text volume and is listed without an author’s name. Noticeably absent are other now-famous early manuals and biographical compilations such as al-Sarraj’s (d. 988) *Kitāb al-luma’ fī al-taṣawwuf* (Book of Light Flashes on Sufism), al-Makki’s (d. 996) *Qūt al-qulūb* (Nourishment of Hearts), and al-Sulami’s (d. 1021) *Ṭabaqāt al-ṣūfiyya* (Generations of Sufis).

‘ABDULLAH ANSARI, THE GHAZALI BROTHERS, AND SUHRAWARDI AND KUBRAWI LINEAGES

Three prominent figures from the eleventh century, all from Khorasan, are well represented in the collection: ‘Abdullah Ansari (d. 1089), Abu Hamid al-Ghazali (d. 1111), and Ahmad al-Ghazali (d. 1126). Five copies of Ansari’s short Arabic work, *Manāzil al-sā’irīn* (Stations of Wayfarers), and a few commentaries on it, most notably *Mir’āt al-nāẓirīn* (Mirror for Observers), are accompanied by his Persian *Munājāt* (Intimate Conversations [with God]).¹⁴ Apart from some selections of Ansari’s preaching, another Persian work titled *Ṭabaqāt al-mashāyikh* (Generations of Shaykhs, 113 {8–9}), which

might have been the *Ṭabaqāt al-ṣūfiyya*, a biographical compendium compiled by Ansari’s circle, is represented in the inventory; *Zād al-‘arīfīn* (Provisions of Gnostics) attributed to Ansari in manuscripts after the fourteenth century, also makes an appearance in three copies.¹⁵

As one would expect, the prolific writer and authoritative thinker Abu Hamid al-Ghazali is front and center in the inventory. His name is always preceded by the honorific title *imām* and followed by a pious eulogy such as “may his tomb be radiant” (*ṭāba tharāhu*) or “may his mystery be blessed” (*quddisa sirruhu*). His renowned Arabic masterpiece *Ihyā’ ‘ulūm al-dīn* (Revival of Religious Sciences), which foregrounds practical Sufi piety, and the Persian synopsis of this work, *Kīmīyā-yi sa‘ādat* (Elixir of Happiness), are both present in multiple copies: nine (including one condensed and one incomplete version) and eleven, respectively, which appear at the very top of the list as the first nine entries (between 105 {17} and 106 {6}) and then from the nineteenth to the twenty-ninth entries (between 107 {14–15} and 108 {3–4}), interrupted by the works of the other dominant figure in this section, i.e., Ibn al-‘Arabi (see below). Many of al-Ghazali’s other works also feature in the collection, but it is difficult to single them out as exclusively or even primarily Sufi in any way. Yet it may be revealing that ‘Atufi includes them in this section; evidently, Abu Hamid’s name was, at least for ‘Atufi, essentially associated with Sufism.

Abu Hamid al-Ghazali’s younger brother Ahmad, who was a key figure in the development of Sufi lineages, is also well represented. His treatise on the metaphysics of love titled *Sawāniḥ* (Auspicious Signs, 142 {8–9}) is present in a single copy, but there are at least two, possibly three, untitled and anonymous commentaries on this work, including *Kitābu sharḥi kalimāt Aḥmad al-Ghazālī fī al-‘ishqī* (Commentary on Ahmad al-Ghazali’s Discourse on Love, 125 {4–5}), as well as four copies of his theological treatise *Kitāb al-tajrīd fī kalimat al-tawḥīd* (Commentary on the Profession of God’s Unity, 118 {1–2}, 120 {2–3}, 120 {7}, 129 {10–11}). Ahmad al-Ghazali, too, receives a good share of supplications for his afterlife. Ahmad’s most celebrated disciples, ‘Ayn al-Qudat al-Hamadani (d. 1131) and Abu Najib al-Suhrawardi (d. 1168), are mentioned by name. ‘Ayn al-Qudat, who faced charges of heresy and was brutally

executed at the age of thirty-three by order of the Saljuq sultan Mahmud (r. 1118–31), is listed as the author of the now-famous Persian work *Zubdat al-ḥaqāʾiq* (Essence of Truths, 113 {7–8}), better known as *Tamhīdāt* (Facilitations), and a collection of treatises also attributed to him is categorized as “pertaining to homiletics” (141 {1–2}). In addition, one or more of the several works cited without attribution under the title *Lawāʾih* (Lights) might also be copies of ‘Ayn al-Qudat’s Persian *Risāla-yi lavāyih*.¹⁶ Clearly, heretics of another time and place could be admired, even lionized, under new circumstances, even if their legacy remained controversial, as in the case of al-Hallaj.

Abu Najib Suhrawardi, often regarded as the initiator of the Suhrawardi lineage of Sufis linked to each other across generations through chains of transmission of authority descending from the first master, is duly included with five copies of his popular treatise on Sufi etiquette, *Ādāb al-murīdīn* (Etiquette of Disciples).¹⁷ His nephew and disciple Abu Hafs ‘Umar al-Suhrawardi (d. 1234), an energetic promoter of Sufi causes during the reign of the ‘Abbasid caliph al-Nasir li-din Allah (r. 1180–1225), authored one of the most definitive manuals of Sufism titled *‘Awārif al-ma‘ārif*, which appears in the inventory in six copies of the original Arabic and one Persian translation unidentified either by title or translator.¹⁸ There is also a short epistle on poverty by Abu Hafs ‘Umar al-Suhrawardi, *Risāla fī sharḥ al-faqr* (120 {4–5}), as well as a collection of treatises that include one or more of his works.

The main Suhrawardi lineages thrived mostly in South Asia from the late thirteenth century onwards, and their literary heritage is largely invisible in the inventory aside from the works of the uncle and nephew Suhrawardis, as well as two titles by Amir Husayni Sadat al-Ghuri al-Harawi (d. after 1329), a second-generation disciple of Abu Hafs ‘Umar. Amir Husayni Sadat’s *Nuzhat al-arvāḥ* (Invigoration of Souls, in five copies) and *Qalandarnāma* (Book of Wandering Dervishes, possibly two copies) are recorded;¹⁹ on one of those occasions, the author is referred to in familiar terms as simply “Husayn.”

The Kubrawi line, on the other hand, a major offshoot of the original Suhrawardi core, occupies a very prominent place in the collection, bearing the legacy of Najm al-Din Kubra (d. 1221), a most influential master who was connected to Abu Najib via his own spiritual director

‘Ammar al-Bidlisi (d. between 1194 and 1207–8). Kubra’s own well-known works, *Fawāʾih al-jamāl wa fawātiḥ al-jalāl* (Scents of Beauty and Signs of Majesty, one copy, 114 {8}), *Risāla ilā al-hāʾim al-khāʾif min lawmat al-lāʾim* (Epistle for the Perplexed and Fearful of the Blamers’ Reproach, two copies, 114 {8–9}, 131 {18}), and his Qurʾan commentary (recorded as *Tafsīru Najm al-dīn Kubrā*),²⁰ are accompanied by a book of prayers (46 {17}) and four untitled collections by him.²¹ Works of Kubra’s leading disciples also appear in the collection: Majd al-Din Baghdadi’s (d. 1219) *Tuḥfat al-barara fī masāl al-‘ashara* (Reverent Gift in Answer to Ten Questions, two copies, 112 {14–15}, 120 {11–12}), Sa’d al-Din Hamuya’s (or Hamuwayi, d. 1252) *Miṣbāḥ fī al-taṣawwuf* (The Lantern on Sufism, one copy, 139 {3}), as well as his *Kitāb al-maḥbūb* (Book of the Beloved, two copies, 110 {19}–111 {1} and 111 {9–10}, all three of which are listed without the author’s name), and most importantly, because of its popularity in the lands of Rum, Najm al-Din Razi Daya’s (d. 1256) seminal *Mirṣād al-‘ibād* (The Path of God’s Bondsmen) in Persian (in no less than five copies).²² Aziz Nasafi (d. after 1282), a second-generation disciple of Kubra via Sa’d al-Din Hamuya who was also highly influential in Anatolian Sufi thought, has a conspicuous presence as well with several of his Persian works: *Kashf al-ḥaqāyiq* (Unveiling of Truths, three copies, 113 {12–13}, 129 {14}, 138 {5–6}, only one identified as Persian), *Maqṣad-i aqṣā* (four copies, 116 {3}, 119 {19}–120 {1}, 130 {6–7}, 135 {11–12}; only one identified as Persian), *Mabūd va ma‘ād* (Origin and Return, two copies in Persian, 118 {1} and 68 {9–10}, the second listed under *‘ilm al-qalām*; perhaps also 121 {12–13}).

Later Kubrawi-affiliated Sufis from the fourteenth and fifteenth centuries do not have much of a presence in the inventory. Of these, the noteworthy ones include ‘Ali Hamadani (d. 1385) with several treatises,²³ and ‘Ala’ al-Dawla al-Simnani (d. 1336), also with several treatises.²⁴

Also significant is the presence of Muhammad Nurbakhsh (d. 1465) with two treatises (124 {6–7} and 125 {11–12}, the latter on physiognomy) and a cryptic listing of a *Risālatun nurbakhshiyyatun fī al-taṣawwufi* (a Nurbakhshi treatise on Sufism, 120 {18}). His disciple Muhammad al-Lahiji (d. 1506) appears with a commentary on *Gulshan-i Raz* (Rose Garden of Secrets, 111 {7–8}).

Although ‘Abdullah Ansari, the Ghazali brothers, and the earliest cores of the Suhrawardi and Kubrawi

lineages dominate the scene of eleventh- and twelfth-century Sufism in the inventory, it should be noted that there are also some signs of other less popular, albeit not insignificant, figures from this formative period. Ahmad-i Jam (d. 1141), an early Hanafi Sufi from Khorasan who left behind a rich legacy of eight works in Persian as well as a major shrine cult, is mentioned, admittedly only once, but with his full name, as the author of an untitled Persian treatise (117 {16–18}). This confirms the impression that the early Hanafi Sufism of Khorasan and Central Asia remained largely obscured from view for subsequent generations in central and eastern Iran as well as in Anatolia. Rashid al-Din Maybudi's (d. after 1126) famous Persian Qur'an commentary, *Kashf al-asrār wa 'uddat* [curiously misspelled by 'Atufi as *'umdat*] *al-abrār* (Unveiling of Secrets and Provision for the Righteous), which preserves a rich layer of Sufi exegesis, is present in three full copies.²⁵

Shams al-Din Daylami Abu Thabit Muhammad (d. ca. 1197), who appears to have drifted to Sufism later on in life from his erstwhile grounding in philosophy, is not mentioned by name, but his *Ghāyat al-imkān fī dirāyat al-makān* (The Limits of Possibility in the Comprehension of Space) is recorded twice by 'Atufi (131 {13–14}, 132 {16–17}), once identified as *fī al-tawhīdī*, and once as *fī al-taṣawwufī*. The idiosyncratic visionary and prolific author Ruzbihan Baqli (d. 1209), also not cited by name, is represented by his Persian treatise on mystical love, *'Abhar al-'āshiqīn fī aḥwāl al-'ishq* (Lovers' Jasmine on Love's States, 126 {5–6}), as well as his *Risālat al-quḍs li-ahl al-uns* (Sacred Treatise for the People of Intimacy, 121 {8}) and *Kitāb Sayr al-arwāḥ* (A Treatise on the Conduct of Spirits, 120 {2}, spelled as *siyar al-arwāḥ?*). None of these three figures, today recognized as major Sufi authors, was ever embedded in later Sufi lineages. This may explain their obscured, oblique presence in the palace library collection. To be sure, Baqli was a Kazaruni, and this lineage did have a presence in Anatolia, particularly during the fifteenth century under the name *Ishāḳī*, but it did not leave behind a literary legacy there.

Also noteworthy is 'Atufi's classification of no less than seven works, some with multiple copies, by "Shaykh al-Ishraq" (Illumination) Shihab al-Din Suhrawardi (d. 1191) as belonging to Sufism, even though he categorizes some other works by this prominent figure as "wisdom" (*ḥikma*) and lists them under the category of

philosophy. The shaykh is also known as *Maqtūl* (The Executed), and is thus mentioned in the inventory on several occasions. His works cited in the chapter on Sufism include *Ṣaḡīr-i Sīmurgh* (The Song of the Griffin, three copies, 126 {7}, 128 {19}–129 {1}, 148 {14–15}), *Munājāt* (Supplications, 126 {3}), *Alwāḥ al-'imādiyya* (Tablets of 'Imad ad-Din Qara Arslan [the Artuqid prince who was Suhrawardi's patron at the time], 130 {8–9}), *Hayākil al-nūr* (Edifices of Light, 130 {9}), *Mūnis al-'ushshāq* (Lovers' Companion, 143 {3–4}), *Risālatun fī ṭarīqi al-sulūki* (Treatise on the Path to [Good] Conduct, 126 {2–3}), and *Ma'ārij al-albāb* (Rising Places of Hearts, in four copies, 121 {3–4}, 131 {9–10}, 133 {8–9}, 134 {10–11}). 'Atufi's placement of Suhrawardi's "illuminationist" school of thought somewhere in between philosophy and Sufism is indicative of the wide reach that illuminationism had in both philosophical and Sufi circles after the twelfth century.

IBN AL-'ARABI AND AKBARIANS

It would be fair to state that the most prominent position in the collection belongs to works by Ibn al-'Arabi—the singularly influential Andalusian Sufi whose extensive travels took him to Seljuk Konya where he resided for a while—and more substantively, to works penned by an ever-growing community of his disciples and commentators, representing a deep and sprawling intellectual tradition called Ibn al-'Arabian or Akbarian. 'Atufi always uses the name Muhyi al-Din al-'Arabi to refer to the great mystic, also known by the epithet al-Shaykh al-Akbar, "supreme shaykh," and, as in the case of Abu Hamid al-Ghazali, routinely tags his name with a pious eulogy. 'Atufi lists many works of Ibn al-'Arabi, from the well-known *al-Futūḥāt al-Makkiyya* (Meccan Revelations, twelve full or partial copies) and *Fuṣūṣ al-ḥikam* (Bezels of Wisdom, four copies) to numerous unidentified or partially identified collections of treatises, including entries like *Thalāthūna kitāban aktharuhā li-l-Shaykh Muhyi al-Dīn al-'Arabī fī al-taṣawwufī fī mujal-ladīn wāḥidīn* (Thirty books on Sufism in one volume, most of them by Shaykh M., 131 {16–17}).²⁶

The "supreme shaykh's" main disciple and adoptive son Sadr al-Din al-Qunawi (d. 1274), a native of Konya who attempted to place Ibn al-'Arabi's teachings on a

more explicitly philosophical footing, is well represented with his own works and later commentaries on them, particularly commentaries on his *al-Nuṣūṣ* (Texts, five copies) and *Miftāḥ al-ghayb* (Key to the Unseen, three copies).²⁷ The latter was Qunawi's key work, which elicited much attention from commentators in Anatolia, including commentaries by the later famous Ottoman scholars Molla Fenari (d. 1431) and Kutbeddinzade Izniki (d. 1480), both of which are recorded in the inventory (two and three copies, respectively).²⁸ Qunawi's own students, Fakhr al-Din 'Iraqi (d. 1289), Mu'ayyad al-Din al-Jandi (d. ca. 1300), and Sa'id al-Din Muhammad al-Farghani (d. 1300), also make their appearance: Iraqi with eleven copies of his *Lama'āt* (Divine Flashes), al-Jandi with two copies of his commentary on *Fuṣūṣ* (109 {3–4} [summary], 109 {19}–110 {1}), and al-Farghani with one copy each of his *Manāḥij al-'ibād* (The Paths of God-Servants, 112 {5–6}) and *Mashāriq al-darār* (Rising Places of Glittering Stars, 138 {4–5}).²⁹ 'Iraqi's *Lama'āt* clearly enjoyed a special place in the deep and long-lasting currents of thought and attitude inspired by Shaykh al-Akbar.

Yet, in the representation of Akbarian thought in the collection, the works of Qunawi's students are matched by those of 'Abd al-Razzaq al-Kashani (d. ca. 1330) and his student, Dawud al-Qaysari (d. 1350), who was a native of Kayseri in Anatolia. 'Abd al-Razzaq's popular works on Akbarian terminology, his *Iṣṭilāḥāt al-ṣūfiyya* (Sufi Terminology) in three or perhaps five copies, and its expanded version, *Rashḥ al-zulāl* (Splash of Fresh Water), are in the inventory.³⁰ Also listed are the definitive commentaries on Ibn al-'Arabi's *Fuṣūṣ* that 'Abd al-Razzaq and his scholarly student Dawud al-Qaysari, who received his higher education in Cairo and in Tabriz and returned to Anatolia to become müderris in the first Ottoman madrasa in Iznik in 1336, produced in quick succession (both are also in the collection).³¹ These works contributed greatly to the construction and spread of an expansive body of Akbarian mystical-philosophical writing in Muslim intellectual and spiritual circles during the fourteenth century. Other works in the collection that fall into this category include 'Abd al-Karim al-Jili's (d. 1428) *Marātib al-wujūd* (Stages of Being, 127 {6})³² and the great Persian Sufi poet 'Abd al-Rahman Jami's (d. 1492) Ibn al-'Arabian *Ashi'atu*

Lama'āt (Gleams of the Flashes, commentary on 'Iraqi's *Lama'āt*, 114 {11–13}), *Naqd al-Nuṣūṣ* (Critical Examination of Texts, a Persian commentary on the *Fuṣūṣ*, 109 {10}, 120 {17–18}), and at least one (possibly more) copies of his *Lavāyih*. 'Atufi attributes one copy of *Lavāyih* (139 {9}) to Jami but lists several other anonymous copies with the same title.³³

More literary manifestations of the burgeoning Akbarian upsurge, of which 'Iraqi's *Lama'āt* can be considered a prime example, proliferated in this period. Mahmud Shabistari's (d. 1337) concise masterpiece *Gulshan-i rāz* (Rose Garden of Secrets, in four copies in this section and seven more under Persian literature)³⁴ and its commentaries, notably *Mafātiḥ al-i'jāz* (Keys of Wonder, 111 {7–8}) by Muhammad al-Lahiji (d. 1506), adequately testify to an uptick in Akbarian literary production in Persian. On the other hand, the many *sharḥs* or commentaries (some in multiple copies, more than a dozen altogether) on *qaṣīdas* of Ibn al-Farid (d. 1235) stand witness to the urge to appropriate the famous Arab Sufi poet's voice for Akbarian causes.³⁵ Many prominent Ibn al-'Arabi enthusiasts composed such commentaries through Ibn al-'Arabian lenses. Even though 'Atufi does not cite the names of the commentators, he does identify Dawud al-Qaysari as the author of a commentary on *Naẓm al-durr* (Verse of Pearls, 113 {4–5}). Many of the anonymous Ibn al-Farid commentaries in the inventory were likely ones penned by such Akbarian figures as Sa'id al-Din al-Farghani and 'Afif al-Din al-Tilimsani (d. 1291), as well as Jami (whose *Lawāmī*, a commentary on the "Wine Poem," 126 {8–10}, 128 {9}, however, is listed with the author's name).

PERSIAN "LITERARY" SUFISM

Starting around the twelfth century, Sufism became mainstream, then grew increasingly popular in Muslim communities and polities in the eastern Mediterranean basin and southwest Asia. Sufi identities began to proliferate, and it became ever more difficult to differentiate "professional," full-time Sufi adepts from "amateur" part-timers and supporters who cultivated the Sufi mode of piety to some level in their lives. In literature, this state of affairs was reflected by the growth, on the

one hand, of a specialized corpus of texts that catered to the needs of the core inner group of Sufi practitioners (practically all of the titles discussed so far fit into this category) and, on the other hand, of literary compositions inspired by and infused with Sufi thought and practice. The latter were often produced by professional writers and poets and addressed to a broad audience. This development was especially conspicuous in Persian, eventually to be paralleled in Turkish and other vernaculars of the Islamic world, with many major poets adopting or affecting Sufi or Sufi-inflected personas in their literary careers, starting most notably with Majdud b. Adam Sana'i (d. 1131) and continuing in the thirteenth, fourteenth, and fifteenth centuries with such prominent poets as Farid al-Din 'Attar (d. 1221 or 1229), Muslih al-Din Sa'di (d. 1291), Muhammad Hafiz (d. ca. 1390), and the aforementioned Jami. 'Atufi rightly lists works of such professional *littérateurs*, especially their *divans*, under "Persian Literature," but a few of these poets and writers were first and foremost practicing Sufis, and as such they should be noted here briefly.

Fakhr al-Din 'Iraqi has already been mentioned in relation to his Akbarian work *Lama'at*, but two other thirteenth-century Persian figures who spent much of their lives in Anatolia deserve particular attention: "Mawlana" Jalal al-Din Rumi (d. 1273) and Awhad al-Din Kirmani (d. 1237–38). The latter, a prominent thinker in the thirteenth century, is known for his *rubā'īs* (quatrains), which are represented in the collection in one copy (243 {13–14}), and his *Miṣbāḥ al-arwāḥ* in two copies (Lamp of Souls, 243 {19}–244 {1}).³⁶

Rumi, who is of course one of the most famous Anatolian Sufi poets of all time, has a large footprint in the palace library, with nineteen copies, five "selections," and four partial commentaries of his magisterial *Maṣnavī*.³⁷ The fact that almost all of the selections and commentaries are not identified by author signals the enormous popularity of this work as opposed to the more limited circulation of Rumi's *Dīvān*, recorded in only one copy.³⁸ A collation of the sayings of Rumi's enigmatic partner Shams-i Tabrizi (d. ca. 1247) is also included (118 {17–18}), as well as *Tarjī' nafīs* (Precious Strophic Poem).³⁹ 'Atufi does not tire of eulogizing Rumi with the phrase *quddisa sirruhu* upon almost each mention of his *Maṣnavī*. Remarkably, however, there is no

sign of the Mevlevi lineage that took shape around the life and legacy of Mawlana, except for the *dīvān* and an unidentified work (110 {14–15} and 110 {15–16}, respectively) of his son Sultan Walad (d. 1312).⁴⁰ Not to be overlooked, though, is a hagiography of Rumi that remains anonymous (149 {3–4}; see below).

One final name that comes up only in the Persian literature section but should be mentioned here is Qasim-i Anvar (d. ca. 1433), a second-generation disciple of the progenitor of the Safavid lineage, Shaykh Safi al-Din (d. 1334). He is noted for his *Anīs al-ʿarīfīn* and *Anīs al-ʿāshiqīn* (Companion of Gnostics and Lovers).⁴¹

NAQSHBANDI AND ZAYNI WORKS

The lineages of the Naqshbandi and Zayni Sufi orders emerged through the activities of Baha al-Din Naqshband (d. 1389) and Zayn al-Din al-Khvaḥi (d. 1435), respectively, in Central Asia and Khorasan. Both began to take root in Anatolia during the second half of the fifteenth century. The first Naqshbandi establishment in Istanbul dates to 1490 during the reign of Bayezid II, whereas the presence of Zaynis was already more extensive in Ottoman Anatolia and Istanbul during the time of Mehmed II. Not surprisingly, therefore, some prominent Naqshbandi and Zayni figures of the fifteenth century are represented in the collection.

Baha al-Din Naqshband (d. 1389) is not known to have composed any works, but some of his "utterances" are the subject of three entries: *Risāla fī nafā'is kalimāt al-shaykh al-ma'rūf bi-Naqshband* (Book of Precious Sayings of the Shaykh known as Naqshband), *Majmū'atun min kalimāti al-shaykh al-ma'rūf bi-Naqshband* (Compilation of Sayings of the Shaykh known as Naqshband), and *Wāridāt* (Inspirations); 122 {13–14}, 125 {10–11}, 136 {17}, respectively.⁴² Muhammad Parsa (d. 1420), one of the chief disciples of Baha al-Din and a key early Naqshbandi author, is not cited by name, but his important texts *Risāla-yi qudsiyya* (Sacred Treatise; 118 {4}, 118 {9}, 132 {11–12}) and *Faṣl al-khiṭāb* (Definitive Judgment; 118 {5–6}, 118 {6–8}, 118 {8–9}) appear in three copies each, twice bound together in a single volume. Khvaja 'Ubaydullah Ahrar (d. 1490), a second-generation disciple who was one of the most socially consequential Sufi figures

of his time, makes only a cameo appearance with his untitled commentary (138 {11–12}) on the meaning of the *rubāʿīs* (quatrains) attributed to Abu Saʿid Abū l-Khayr (d. 1049).

As for ʿAbd al-Rahman Jami, the famous Naqshbandi Persian poet and author whose Ibn al-ʿArabian works have already been discussed above, two other titles of his are cited: his hagiographical compendium *Nafaḥāt al-uns min ḥazarāt al-quds* (Fragrances of Intimacy from the Gardens of Sanctity, 150 {15–16}, 150 {18–19}), and a commentary on the *Maṣnavī* of Rumi in three copies (136 {3}, 145 {9–10}, 147 {6–7}). One of these is simply titled *Sharḥu mushkilāt-i maṣnavī* (Commentary of the Difficulties of the *Maṣnavī*), which was likely a copy of Jami's *Naynāma* (Book of the Reed Flute). Just as significant is an item conspicuous by its absence in the inventory. The work Jami composed at the request of Mehmed II as an adjudication of the views of Sufis, theologians, and philosophers, titled *al-Durrah al-fākhira* (The Precious Pearl), would certainly make for fascinating reading, then or now, but it likely never arrived at the palace. Taşköprülüzade (d. 1561) relates, on the authority of his colleague Muhyiddin Fenari (d. 1548), that it was Kadiasker ʿAlaeddin ʿAli Fenari (d. 1497?), Muhyiddin's father, who whispered the name of Jami into the sultan's ear as the ideal author of such a book. Before it was completed in Herat and sent to "Rūm," however, the sultan passed away, and the book seems to have been delivered to the elder Fenari, in whose hands it remained for some time.⁴³

The book recorded as *Risālatu ʿAraḍiyyatin bi-al-fārisiyyati li'l-Shaykh al-Ilāhī* (Treatise on Accidentals by Shaykh al-Ilahi, in Persian, 122 {1–2}) could have been penned by ʿAbdullah-i Ilahi (d. 1491), the first prominent Naqshbandi figure of Anatolia who was instrumental in establishing that lineage in Ottoman territories and who, unlike his chief disciple Emir Buhari—another well-known Naqshbandi of the same period (d. 1516) in Anatolia and Istanbul—left behind a robust written legacy in Arabic, Persian, and Turkish. None of his known works bears that title, however. It is also possible that the work under consideration could have been written by Ahmed-i Ilahi (d. after 1481), another Naqshbandi figure of the same era, who too is known for some Persian treatises. One of the latter, a commentary on

Gulshan-i Raz, is certain to have been included in the inventory (111 {8–9}), but without the author's name.⁴⁴

Zayn al-Din al-Khvafi (d. 1435), the grand master of the Zayni lineage, is represented by his major works *Waṣāyā* (Counsels, in four copies)⁴⁵ and *Silsila al-ṣūfiyya* (Genealogies of Sufis, 117 {14–15}). ʿAbd al-Latif Qudsi (d. 1452), a disciple of Zayn al-Din's who traveled to Anatolia twice from his native Jerusalem and died in Bursa, must be the author of a work recorded as *Risālatu ʿAbd al-Laṭīf quddisa sirruhu fī al-ṭarīqat al-ṣūfiyya al-zayniyya* (The Treatise of ʿAbd al-Laṭīf—may his mystery be blessed—on the Sufi Path of impressive *Zayniyya*, 145 {13}), as well as of *Wāhib al-mawāhib* (The Giver of Gifts, 133 {8}, with perhaps a second copy, 129 {7}, listed as *Kitābu tuḥfati al-wāhibi*). ʿAtufi's characterization of ʿAbd al-Latif's treatise deserves to be underlined since it constitutes the singular instance of the designation of a specific Sufi order in the whole inventory, i.e., the impressive Zayniyya that would, ironically, be overtaken by other orders in the course of the sixteenth century in terms of significance and eventually be absorbed by them.

ʿAbd al-Latif Qudsi's disciple Muslihuddin Mustafa, known as Şeyh Vefa/Vefazade (d. 1491), emerged as a key figure in the establishment of the Zayniyya order in Ottoman Istanbul. He was a major inspirational figure for many prominent intellectuals of his time, who seem to have turned to Sufism under his influence. ʿAtufi records his Turkish divan and his litanies (*awrād*) in several copies, as well as his Turkish work *Sāz al-irfān* (The Long-Necked Lute of Gnosis, in two copies).⁴⁶ Şeyh Vefa's disciples among Ottoman statesmen and intellectuals included the scholar and vizier Sinan Paşa (d. 1486), whose *Taẓarruʿnāme* (Book of Supplication), which became an early classic in Turkish, is cited in the inventory in one copy and in this section (143 {13}).

MANĀQIB AND TADHKIRAS

The inventory records various biographical accounts and hagiographies of Sufi figures, but in no particular order as usual. Well-known examples include the *Tadhkirat al-awliyā* (Memorial of Saints) of ʿAttar in multiple copies and the two copies of *Nafaḥāt al-uns*

(Fragrances of Intimacy) by Jami already noted above.⁴⁷ Others, described in generic terms or by titles that are otherwise unknown, remain obscure. *Manāqib Bahā' al-Dīn* (The Vita of Baha' al-Din, 151 {2}) is one such title. Neither Baha al-Din Naqshband nor Rumi's father Baha al-Din Valad, the two figures by that name who immediately come to mind for their relevance in Anatolia, are known to have had dedicated biographies, and it is impossible to determine the subject of this work. *Kitāb asrār manāqib al-abrār* (Book of Secrets on the Feats of the Pious, 119 {18–19}) is another enigmatic title. Could this have been a copy of *Manāqib al-abrār wa mahāsīn al-akhyār* (Feats of the Pious and Charms of the Devout) by Majd al-Din al-Mawsili (d. 1157)?⁴⁸ And what exactly is the work described by 'Atufi as the *Manāqib Mawlānā Jalāl al-Dīn* (149 {3–4})? Could it be the *Risāla* of Faridun Sipahsalar (d. ca. 1312), or the better-known *Manāqib al-ārifīn* (Feats of Gnostics) of Shams al-Din Aflaki (d. 1360), or yet another hagiography of Rumi that is lost to us today (even though this third possibility is rather unlikely)? Such titles remain cryptic for us.

Finally, if the work titled *Kitābu manāqibi al-Shaykh Ṣafī al-Dīn* (227 {15–17}) and listed in the section on literature refers to the eponym of the Safavids—and it seems difficult to attribute it to anyone else—we might note that there is also a copy of Safi al-Din's (d. 1334) vita in the inventory, curiously tucked in the middle of a compilation containing works on poetry and "other treatises." If so, the shaykh, whose descendants would engage in a bitter rivalry with the Ottomans soon after the compilation of our inventory, is respectfully remembered by 'Atufi with wishes for his mystery to be blessed (*quddisa sirruhu*). The palace library eventually included at least two copies of the well-known hagiography of the shaykh, titled *Ṣafvat as-Ṣafā* (The Quintessence of Purity), but this manuscript is not necessarily one of those; it is not even clear that we are dealing with the same work.⁴⁹

Some of the other hagiographic titles listed in this section call for brief comment:

Manāqib Abī Zayd Bisṭāmī (The Vita of Abi Zayd Bisṭami, 137 {5–6}), noted only with this generic title and with no indication of authorship, was possibly Abu al-Fadl al-Sahlaji's (d. 1083) biographical monograph devoted to Abu Yazid (Bayazid) al-Bisṭami (d. 875), entitled

al-Nūr fī kalimāt Abī Ṭayfūr (The Light in the Words of Abu Ṭayfur).

Tadhkira Ibrāhīm Adham (The Biography of Ibrahim Adham, 150 {16–17}), also recorded without any further specification of title or language, was likely not in Arabic (no such work in Arabic is known to us) but probably a hagiographical narrative in Persian or Turkish.

Sīratnāma li-al-Shaykh al-Kabīr (The Life of the Great Shaykh, 114 {10}) was possibly the hagiography of the early Sufi Ibn Khafif (d. 982) titled *Sīrat-i Ibn Khafif* in its Persian translation; the Arabic original is not extant.

The collection of treatises in Persian and Turkish on the vita of "al-Sayyid Ahmad al-Kabīr" (141 {19}–142 {1}) was likely about Ahmad al-Rifa'i (d. 1182); if so, this is one of only two reflections of al-Rifa'i in the collection.

What is listed by 'Atufi as the hagiography of Abu Ishak Ibrahim b. Shahriyar Kazaruni (d. 1033), without title or language specification (111 {12}), is now identified also as a vita of al-Rifa'i, written by somebody with the nisba al-Kazaruni, which must have confused our librarian.⁵⁰

Ibn 'Ata Allah al-Iskandari's (d. 1309) *Laṭā'if al-minan fī manāqib al-Shaykh Abū'l-'Abbās wa-Shaykhihi* [Abū'l-Ḥasan] (Subtleties of Divine Favors in the Feats of the Shaykh Abu'l-'Abbas and His Shaykh [Abu'l-Ḥasan], 139 {1}) is a rare Shadhili work in the collection. The inventory is otherwise largely devoid of any signs of Egyptian and Maghribi Sufism, except perhaps for a piece that might be attributed to Ibn Sahl al-Ishbili (d. 1251), the famed Andalusian poet and convert from Judaism to Islam, tucked in the middle of various works by Ibn al-'Arabi, the ultimate gift of the Maghrib to Sufism everywhere (134 {8–9}).

TURKISH AND RUMI/ANATOLIAN WORKS

Altogether, there are a total of thirteen Turkish works in this section, which lists more than one thousand titles. The inventory as a whole includes a few other relevant Turkish titles that could also be considered as belonging to the category of Sufism but are listed in other sections, primarily under "Turkish divans and versified literature."⁵¹ This low count does not increase by much if we expand our criterion from strictly Turkish to Rumi/

Anatolian in order to include those authors who wrote exclusively or primarily in Arabic or Persian even though they were born Rumi, or had become “naturalized” in the geography that was coming fully under the sway of the Ottomans (“Ottomanizing,” to use the term Cornell Fleischer so aptly coins in his introduction to this volume) during ‘Atufi’s lifetime. The most prominent authors in Turkish have already been mentioned: they are the Zayni figures Şeyh Vefa and Sinan Paşa; the former is also cited with his Arabic *awrād* in three copies.⁵² The well-known intellectuals and Sufis of the lands of Rum, some of whom did write in Turkish even though their Turkish works are not recorded in the palace library collection, include the famous Bayrami Sufi scholar Muhammed b. Hamza Akşemseddin (d. 1459), some of whose Arabic writings appear in the inventory: *Risāla fī taḥqīq al-madhhab al-ṣūfiyya wa daḥ al-maṭā’in fihi* (Treatise Authenticating the Sufi Path and Refuting Accusations against It, 127 {17–18}); *Risāla al-nūrīyya* (Luminous Treatise, 117 {6–7}); and a generic *Risāla fī t-taṣawwuf* (117 {18–19}), where he is explicitly called *al-Shaykh al-Rūmī* and is remembered with the phrase *ṭāba tharāhu*. Bedreddin b. Qadi al-Simavni (d. 1416?) is also mentioned, though his name is not accompanied by any remarks, with an Arabic treatise titled *Risāla ‘alā khilāf taṣawwuf* (Treatise on Divergent Views in Sufism, 119 {10–11}, possibly his well-known *Wāridāt*).

The Ottoman scholars Molla Fenari and Kutbeddinzade Izniki have already been noted above for their (Arabic) commentaries on Sadr al-Dīn al-Qunawī’s *Miftāḥ al-ghayb*. ‘Atufi seems to have had particular reverence for Kutbeddinzade, who appears in several sections of the inventory for his learned works in different areas and almost always receives a pious wish for his afterlife; in fact, he is one of the most visible Ottoman-Rumi authors in the inventory. His name also appears in the only entry that is highlighted by the use of red ink (148 {19}–149 {3}). ‘Atufi wants to make sure that the reader knows who this is: he writes that the work titled *Risālatun fī aḥwāl al-ṣā’imi* (On the States of the One Who Fasts) is by “Muḥammad bin Quṭb al-Dīn al-Izniqī” and adds parenthetically, with a note in the same hand written upside-down on the top of the line, that “he is known as Shaykh Qutb al-Din-zada—may his mystery be blessed” (*wa-huwa al-ma’rūfu bi-Shaykh Quṭb al-Dīn-*

zāda -quddisa sirruhu). Kutbeddinzade is also mentioned in this section on Sufism as “Ibn Mawlānā Quṭb al-Dīn al-Izniqī” with reference to his work “in Turkish” on *tarāwīḥ* (Special Night Prayers in Ramadan, 127 {10–11}) in a compendium. Other traces of this author in the inventory include his book of prayers and a work on oneirocriticism.⁵³

If the title *Awrād al-Shaykh Ḥamīd al-Dīn* (preserved in three copies) belongs to Şeyh Hamidüddin Aksarayı known as Somuncu Baba (d. 1412), who is widely assumed to be the master of Hacı Bayram (d. 1430), this would be one more key Anatolian figure represented in the collection.⁵⁴ Yet another trace of the Bayrami school in the inventory is the poetry of Akbıyık (d. 1455–56), the ecstatic dervish said to have taken part in the siege and conquest of Istanbul, who is cited with his *mathnawīyyāt* in Turkish (263 {13}).⁵⁵ Considering this item together with the likes of Şeyh Vefa’s “Long-Necked Lute of Gnosis” and several other titles listed among Turkish divans, we can well imagine that Turkish literature was experiencing a transformation similar to, if somewhat later than, the one observed above with respect to Persian “literary” Sufism.

On the flip side, mention can be made of two Persian works that are definitely Rumi/Anatolian but whose authors remain elusive; both had previously been erroneously attributed to Sadr al-Dīn al-Qunawī: *Tabṣirat al-mubtadī wa tadhkirat al-muntahī* (Clarifications for Beginners and Reminders for the Advanced, in six copies) and *Maṭālī‘ al-īmān* (Rising Places of Faith, 125 {19}–126 {1}).⁵⁶

CONCLUDING THOUGHTS

How was Sufism reflected in the palace collection as a whole? Putting aside questions related to ‘Atufi’s own conception of his categories (“how did he conceptualize Sufism?”) and working only with the titles themselves, it is possible to make a few general observations.

First, the inventory is very thin on pre-twelfth-century materials. Major figures of the earliest phase of Sufism are totally absent: missing are names such as Sahl al-Tustari (d. 896), Abu Sa’id al-Kharraz (d. 899 or slightly earlier), Abu’l-Husayn al-Nuri (d. 907), Junayd

al-Baghdadi (d. 910), al-Hakim al-Tirmidhi (d. between 905 and 910), al-Sarraj (d. 988), Abu Talib al-Makki (d. 386/996), and Abu 'Abd al-Rahman al-Sulami (d. 1021). Early works of Sufism are simply not represented but for the very few examples mentioned above. As noted before, this state of affairs is not really surprising. There appears to have been a clear hiatus between the formative era of Sufism in the tenth and eleventh centuries and its flourishing during the thirteenth century, with the result that the first major Sufi works never entered into wide circulation, even among Sufis themselves, until their rediscovery by modern scholars. The Ottomans were not exempt from this rupture in cultural transmission.

Second, as documented above, the eleventh century is marked in the collection mainly by the literary output of a few high-profile individuals (in particular, 'Abdullah Ansari and the Ghazali brothers). For the twelfth, thirteenth, and fourteenth centuries the Suhrawardi, Kubrawi, and Akbarian works are most prominent, while titles by Naqshbandi and Zayni figures rise to the surface for the fifteenth century. This suggests that, apart from the homegrown Ibn al-'Arabian legacy they cherished and avidly cultivated, the Ottoman Sufi/intellectual circles were nourished mostly from an easterly direction with works coming in from Iran and Central Asia. By contrast, leaving aside some of the obvious Suhrawardi and Akbarian connections, there are practically no detectable signs in the inventory of Sufi works produced in Syria, Palestine, Egypt, or Arabia during the fourteenth and fifteenth centuries. This lack of connectivity with Arabic-speaking lands is also not surprising, especially since effective Ottoman control of south, central, and eastern Anatolia was still unfolding at the time 'Atufi compiled his inventory. Connections with the religious cultures of predominantly Arab environments, while not inconsiderable (and even significant, in the case of several top scholars), were on the whole never as extensive as ties with Iran.

Third, it is worth pointing out that, considered as a whole, the collection bears no signs of what might be called "tariqa consciousness." To state the obvious, the inventory was not organized according to Sufi affiliation, nor did 'Atufi arrange his entries in a way that could

be construed as demonstrating any awareness on his part that Sufi collectivities called *tariqas* existed, were it not for that one reference to the Zayniyya and a cryptic mention of the Nurbakhshiyya (120 {18}). Indeed, with the exception of the litanies of Şeyh Vefa and possibly of Şeyh Hamidüddin Aksarayi, as well as a few later *manā-qib* works, there is precious little in the collection that could be called *tariqa* literature, that is to say, textual production devoted to the construction and preservation of a collective identity. This is a timely reminder that it would be a mistake to view the history of Sufism in general and Ottoman Sufism in particular before the sixteenth century through the prism of later, post-fifteenth-century *tariqa* identities. As a matter of fact, many of these identities are conspicuous only by their absence in the inventory: there is no sign of Bayrami, Bektashi, Khalveti, Qadiri, Mevlevi, Naqshbandi, or Rifa'i affiliations as such.

Fourth, the inventory only partially reflects the growing Sufi literature in the western Turkish vernacular, which came into its own in Anatolia and western Iran during the fourteenth and fifteenth centuries. Today, household names of this early period of Sufi-inflected Turkish literature include Gülşehri, Yunus Emre, 'Aşık Paşa, brothers Ahmed and Mehmed Yazıcızade, and Eşrefoğlu, but these key figures and their works do not appear in the inventory of the palace library. Perhaps some of this is to be explained by the fact that the burgeoning Sufi corpus in Turkish was cultivated mostly in Anatolian provinces that remained beyond Ottoman control until the reign of Mehmed II. Moreover, even when such works were produced in Ottoman towns (as in the case of the books composed by the Yazıcızade brothers in Gelibolu in the 1450s and 1460s), this literary production was normally patronized not by prominent figures in the court but by second- and third-tier members of the Turkish-speaking political class, who threw in their lot with the Ottomans during the reign of Murad II or later. Perhaps equally important was the fact that the Turkish vernacular had not yet fully attained cultural and intellectual respectability; the higher register of Ottoman Turkish, which was to assume imperial status during the first half of the sixteenth century, was still in its formative stage. Under these circumstances, Sufi

works in Arabic and Persian would have naturally carried more prestige than their homegrown Turkish counterparts.

Finally, there is in the inventory no sign of the *babas* and *dedes* of Islamizing Turkish populations or the “dervish piety” they epitomized. Turkish-speaking popular saints of Anatolia and the Balkans are not in evidence, either directly (say, through the works of Kaygusuz Abdal) or indirectly (through the *manāqib* literature devoted to the lives of leading popular saints such as Abdal Musa, Koyun Baba, and Otman Baba). The one exception, *Tarjuma kalimāt Shaykh Barāq*, which is most likely the learned Persian commentary on some of Baraq Baba’s (d. 1307–8) ecstatic expressions in Kipchak Turkish, written by a certain Qutb al-‘Alavi in 1355, only serves to confirm the rule that the Ottoman court was rather removed from the “heady” world of vernacular Turkish Islam already at the end of the fifteenth century (118 {3–4}). While *abdālān-i Rūm* (the *abdāls* of the lands of Rum) constituted a distinct layer of the dervish milieu in medieval Anatolia and Rumelia, as represented in the popular names of several charismatic figures and poets, the word *abdāl* appears only in the titles of two books and never as part of someone’s name: Ibn al-‘Arabi’s popular short treatise, *Ḥilyat al-abdāl* (The Adornment of the Spiritually Transformed, in four copies)⁵⁷ and *Kitābu Badhīghūrūs fī abdāli al-adwiyati* (The Book of Pythagoras on Substitute Drugs, 153 {13}), a medical work. None of the actual *abdāls* of the lands of Rum is mentioned in an entry.

Popular Turkish saints were by all accounts ubiquitous in urban and rural settings alike in late-fifteenth-century Ottoman society, and they had certainly struck deep roots among Turkish speakers of all social strata. But these saints and their cults were evidently not welcome at the palace, where, one suspects, proper imperial decorum and courtly piety of the scholarly type conspired to block out undesirable elements of popular Turkish religiosity. The Ottomans had come a long way from their modest origins in the small-town northwestern Anatolia of the early fourteenth century, and in keeping with the dynasty’s ever-growing imperial ambitions, the palace library harbored mostly academically-vetted works on Sufism.

Yet, it would be erroneous to imagine that the emerging courtly and madrasa-educated elites were categorically removed from the currents of cultural life that were weaving vibrant popular traditions. One of the most precious items in the palace collection, in terms of combining these various trends in learned but still surprisingly demotic Turkish, is the exquisite text *Taẓarru’nāme* (Book of Supplication) of Sinan Paşa, whose family of jurists and scholars was believed to descend from none other than Nasreddin Hoca (allegedly fl. thirteenth century in central Anatolia), the central character of an ever-growing corpus of immensely popular humorous tales. If there is one author who anticipated Sinan Paşa’s famously unpretentious rhymed prose, it must be Kaygusuz Abdal (d. 1444?), whose work of compelling affective range and depth Sinan may have encountered in his family setting or in Sufi circles. In any case, ‘Atufi evidently did not hesitate to place Sinan Pasha’s *Taẓarru’nāme* among books on Sufism, even if today one may not necessarily characterize it as a Sufi text, or as a book of ethics, even though it contains elements of both and much more. Sinan Paşa’s description of his own book is worth bearing in mind here: “Its base is struck with the principles of the shaykhs of the Truth and its edifice is placed on the tenets of the people of the (Sufi) path.”⁵⁸ The word “path” is still used generically here, but soon after ‘Atufi completed his inventory, it would quickly acquire specific connotations within clearly designated Sufi orders.

NOTES

1. The number 7,200 is an approximation reached by Miklós Maróth, “The Library of Sultan Bayazıt II,” in *Irano-Turkic Cultural Contacts in the 11th-17th Centuries*, ed. Éva M. Jeremiás, Acta et Studia I (Piliscsaba, Hungary, 2003), 111–32, at 112. As Gülru Necipoğlu indicates in her introduction to this volume, the actual number of titles is higher, since some compilations include many more works than those listed by ‘Atufi. The same is true for the section on Sufism. For instance, the current catalogue of the Süleymaniye Library lists 42 items under Ayasofya 3857, while ‘Atufi gives only one title (the *Khamsa* of Nizami) for that specific manuscript and then summarizes the contents of the rest of the volume as “virtuous treatises in its middle and noble ghazals and rubais of the great ones at its end” (120 {1}). This is a compilation that includes some Sufi-izing poetry as

- well as certain classics of Sufism such as the *Ilāhī-nāmāh* of ‘Attār; for this work, see H. Ritter, *Ilahi-Name: Die Gespräche des Königs mit seinen sechs Söhnen. Eine mystische Dichtung von Faridaddin ‘Aṭṭār*, Bibliotheca Islamica 12 (Leipzig and Istanbul, 1940). Moreover, there is at least one missing folio in MS Török between pages 129 and 130 (folios 63b–64a), implying that there must have been several dozen additional titles in this section of the inventory. The larger proportion of books on Sufism is already noted by Maróth.
2. The contribution by Ferenc Csirkés in this volume deals directly with the theme of linguistic vernacularization.
 3. 122 {15–16}, 122 {17–18}, 123 {1–2}, 140 {11–12}; only the last one is recorded with its better known name as *Tahdhīb al-akhlāq*. ‘Atufi uses that phrase as part of the title for al-Nawawī’s (d. 1277) *Riyāḍ al-ṣāliḥīn min kalām Sayyid al-mursalīn* (The Gardens of the Righteous from the Speech of the Master of the Messengers), listed in the section on hadith; see the list by Göktaş in this volume.
 4. 111 {2–3}, 111 {4}, 111 {5}, 122 {19}–123 {1}, 123 {3}, 137 {19}, 141 {4}, 145 {3}; the Persian translation is on 111 {3–4}.
 5. See the list of entries by Dimitri Gutas in this volume. Critical edition by A. F. A. Fuad (Benghazi, 1974), and another by Ṣāliḥ ‘Uzayma (Tunis, 1984); English trans. in John W. Sweetman, *Islam and Christian Theology* (London, 1945), 93–185. See the article by Mehmet Bayrakdar, *TDVİA*, s.v. “İbn Miskeveyh.”
 6. 112 {10–11, 11, 12, 12–13}, 113 {1}, 114 {1–2}.
 7. 114 {2–7}. This work is better known by its full title: *Lawāmi‘ al-ishrāq fī makārim al-akhlāq* (Lusters of Illumination on the Noble Virtues). On the fifteen or more books with the title *Makārim al-aḥlāq*, mostly in Arabic, some of which are not extant, see the introduction in Bilal Orfali and Ramzi Baalbaki, *The Book of Noble Character: Critical Edition of Makārim al-akhlāq wa-maḥāsīn al-ādāb wa-badā‘i‘ al-awṣāf wa-gharā‘ib al-tashbihāt, Attributed to Abū Maṣṣūr al-Tha‘ālibī* (d. 429/1039) (Leiden and Boston: Brill, 2016). Of Naysaburi’s (d. 1204?) Persian work known by the title *Makārim al-akhlāq*, which had once been considered lost, three copies were found by the editor of the text, but this cannot be our author; the only one located in Turkish libraries is in Burdur; see Raḡī al-Dīn Abū Ja‘far Muḥammad Nishābūrī and Naṣīr al-Dīn Muḥammad ibn Muḥammad Tūsī, *Du Risāla dar akhlāq*, ed. Muḥammad Taqī Dānishpazhūh (Tehran, 1962).
 8. *TDVİA*, s.v. “Devvani,” by Harun Anay. For a full discussion of Dawwani’s oeuvre and thought, see Anay’s brilliant but, sadly, unpublished work, “Celaleddin Devvani, Hayatı, Eserleri, Ahlak ve Siyaset Düşüncesi” (PhD diss., Istanbul University Institute of Social Sciences, 1993).
 9. Several of those titles have been covered in the essays and lists of other writers in this volume; see the contributions by Sooyong Kim, Hüseyin Yılmaz, and Abdurrahman Atçıl in particular. By the same token, there are several relevant books listed in other sections of the inventory, such as the one on history, that include some hagiographic and biographical materials related to Sufism; see the essay and list by Fleischer and Şahin in this volume. On the attributions to Aristotle and Anushirwan, see F. C. W. Doufikar-Aerts, “Aristotle and Alexander: The Never-Ending Question(s),” and G. R. van den Berg, “Wisdom Literature in the *Safina-yi Tabriz*: Notes on the *Pandnāma-yi Anūshirvān*,” in *The Treasury of Tabriz: The Great Ilkhanid Compendium* (Amsterdam, 2007), 245–55 and 171–83, respectively. Also see the seminal article by Garth Fowden, “Pseudo-Aristotelian Politics and Theology in Universal Islam,” in *Universal Empire: A Comparative Approach to Imperial Culture and Representation in Eurasian History*, ed. Peter Fibiger Bang and Dariusz Kolodziejczyk (Cambridge, England, 2012), 130–48.
 10. *Ṭawāsīn* is the plural of *Ṭā* and *Sīn*, the first two letters of the Qur’anic verse 27, surah *Naml*. On prominent figures and books of the early period of Sufism, see Ahmet T. Karamustafa, *Sufism: The Formative Period* (Edinburgh, 2007).
 11. 108 {10}, 108 {11}, 110 {2–3}, 111 {11}, 120 {1}, 143 {16}.
 12. See 142 in the list by Goudarzi.
 13. In two copies: 108 {15–16} and 96 {7–8}; the latter is bound together with a volume on *fiqh* and listed in that section. There is also a work of hadith by al-Kalabadhi, 40 {12–13}, where the author is mentioned by name.
 14. 118 {10–11}, 130 {5}, 135 {14–15}, 135 {19}–136 {1–2}, 137 {7}; the commentaries are on 113 {3}, 114 {14–15}, 122 {10–11}, 130 {5–6}; *Munājāt* is on 127 {12}, 138 {1–2}. On *Mir‘āt al-nāẓirīn*, see GAL-S, 1:77.
 15. 115 {19}–116 {1}, 126 {12–13}, 129 {3}.
 16. 109 {12}, 120 {16}, 122 {6–7}, 125 {4}, 128 {1–2}, 128 {3–4}, 130 {16}, 131 {5–6}, 143 {18}; but these may instead be copies of a work with the same title by ‘Abd ar-Rahman Jami (d. 1492), who is well represented in the inventory (see below).
 17. 118 {11–12}, 120 {5–6}, 134 {6–7}, 135 {17}, 144 {14–15}.
 18. 108 {14–15}, 108 {17–18}, 108 {18}, 110 {4–5}, 133 {2–3}, 136 {7}, 136 {10–11}; Persian trans. 108 {16–17}. By the late fifteenth century, there were already more than one Persian translation of this work, perhaps the most well known being ‘Izz ad-Dīn Mahmūd ibn ‘Alī al-Kāshānī’s (d. 1335) *Miṣbāḥ al-hidāya wa-miftāḥ al-kifāya*; see GAL-S, 1:789.
 19. 128 {17–18}, 137 {13}, 141 {8}, 141 {9}, 144 {13}; for the *Qalandarnāma*, see 141 {13–14}, 145 {2}.
 20. See 171 in the list by Goudarzi; the attribution to N. Kubra is questioned.
 21. 120 {6}, 128 {6–7}, 132 {18–19}, 134 {3–4}); the three latter collections, one of which is identified as *Risālatun naḥṣatun li-l-Shaykh Najm al-Dīn fī al-sulūki wa al-taṣawwufi* (Shaykh N.’s Precious Treatise on Comportment and Sufism, 128 {6–7}), are likely copies of Kubra’s *Ādāb al-ṣūfiyya* (Sufi Rules of Conduct).
 22. 108 {8}, 108 {8–9}, 108 {9–10}, 113 {15–16}, 138 {6–7}.
 23. 117 {19}–118 {1}, 120 {9–10}, 120 {19}–121 {1}, 124 {8–9}, 131 {2}, 140 {15}, 141 {11}, 145 {16–17}, 146 {5}, 120 {19}–121 {1}; these are not always well identified, making it difficult to distinguish them from one another.
 24. 121 {11–12}, 122 {3}, 122 {3–4}, 122 {4}, 122 {4–5}, 122 {5}, 122 {5–6}.
 25. Items 92, 93, and 94 in the list by Goudarzi.

26. The full text of the *Futūḥāt*, or parts thereof, are identified in twelve entries: 106 {14–15}, 106 {15–16}, 106 {16–17}, 106 {17–18}, 106 {19}–107 {1}, 107 {1–3}, 107 {3–4}, 107 {5–6}, 107 {6–7}, 130 {18–19}, 139 {11}, 149 {4–5}; for *Fuṣūṣ*, see 109 {1–2}, 109 {5}, 121 {2–3}, 142 {13}, including one summary.
27. Nuṣūṣ: 109 {6–7}, 109 {9–10}, 125 {18}, 126 {14–15}, 142 {6–7}, and *Miftāḥ al-ghayb*: 110 {5–6}, 139 {17–18} (with commentary by Fenari), 142 {5–6}.
28. For Fenari's text, see 110 {10–11}, 139 {17–18}; for that of Kutbuddinade, see 110 {6–7}, 11 {14–15}, 110 {15–16}.
29. For copies of *Lama'at*, see 114 {18}, 123 {18–19}, 127 {2}, 130 {7}, 130 {12}, 134 {4–5}, 137 {10–11}, 143 {7}; and three copies in the list by Kim.
30. 118 {16–17}, 118 {19}–119 {1}, 124 {10–11}?, 130 {19}?, 140 {10}; and 118 {14–15}, 131 {7–8}, respectively.
31. 109 {2–3}, 109 {18–19}, and 109 {16}, 119 {9–10} (only introduction), respectively.
32. 'Atufi does not record the name of the author; perhaps al-Jili was not well known in Ottoman lands at the time.
33. 109 {12}, 120 {16}, 122 {6–7}, 125 {4}, 128 {1–2}, 128 {3–4}, 130 {16}, 131 {5–6}, 143 {18}.
34. 119 {11–12}, 131 {14}, 134 {5–6}, 135 {9}; also see list by Kim.
35. 109 {11}, 109 {11–12}, 111 {12–13}, 111 {13–14}, 111 {14–15}, 111 {16}, 111 {17}, 111 {18–19}, 111 {19}–112 {1}, 112 {1–2}, 112 {2–3}, 112 {9–10}, 117 {7–8}, 119 {8–9}, 120 {15–16}, 126 {8–10}, 133 {9–10}, 136 {2}, 137 {7–8}, 143 {19}–144 {1}.
36. Items 60 and 59, respectively, in the list by Kim.
37. Items 140–43 in the list by Kim.
38. Item 139 in the list by Kim.
39. Item 348 in the list by Kim. Shams's sayings are here titled *Mujalladun min kalāmin fārisiyyin marqūmun bi-annahū min kalimāti Mawlānā Sh[amsi] Tabrīzī fī al-taṣawwufi*; this is the same work that is now known under the name *Maqālāt* (Sayings).
40. Items 71 and 72 in the list by Kim.
41. Item 280 in the list by Kim.
42. The first two may have been about the “eight—later eleven—principles” of the Naqshbandi path that were sometimes recorded in the form of Baha al-Din's conversations.
43. Taşköprülüzade, *Eş-şekā'īku'n-nu'māniyye fī ulemā'i'd-Devleti'l-'Osmāniyye*, ed. A. Subhi Furat (Istanbul, 1985), 262. Hamid Algar, who uses a different edition of the text, correctly underlines the uncertainty in the biographer's account, as one of the key sentences starts with *'azunnu*, but this only concerns the whereabouts of *al-Durra* at the “now” (*al-'ān*) of the conversation between Taşköprülüzade and Muhyiddin Fenari. The previous sentence asserts: “that *risāla* remained with my father,” referring to the moment of Mehmed II's demise. Algar's speculation that 'Alī Fenari turned the work over to his son and that “it may have passed into the possession of Bāyezīd II when he assumed the throne” is not convincing since Muhyiddin was an infant at the time of that sultan's accession. See p. 72 and note 33 in Algar, “Jāmī and the Ottomans,” in *Jāmī in Regional Contexts: The Reception of 'Abd al-Rahmān Jāmī's Works in the Islamicate World*, ca. 9th/15th–14th/20th Century, ed. Thibaut d'Hubert and Alexandre Papas (Leiden and Boston, 2019), 63–135. Jāmī's expanded version of this work is known and edited: *The Precious Pearl = al-Jāmī's al-Durrah al-fākhiraḥ: Together with His Glosses and the Commentary of 'Abd al-Ghāfir al-Lārī*, ed. and trans. Nicholas Heer (Albany, NY, 1979). The inventory contains two copies of another work with that title in the sections on epistolography and lexicography, respectively: *Kitāb mawsūm bi-al-durra al-fākhiraḥ fī al-amthāl al-sā'ira* (A Book Entitled “The Precious Pearl on Other Proverbs”), 220 {11–12} (see item 64 in list by Markiewicz) and 294 {17–18}).
44. For a biography of 'Abdullah-i İlahi, a survey of his works, and the texts of his works in Turkish, see Abdürrezzak Tek, *Nakşiliğin Osmanlı Topraklarına Gelişi: Molla Abdullah İlahi* (Bursa, 2012). Could *Risālatu araḍiyyati* be a mistaken rendering of his *Risālatu aḥadiyyati*, known to have been written in Persian? On Ahmed-i İlahi, see A. Tek, “Tekkeler Kapatılmadan Önce Nakşiliğin Bursa'daki Tarihi Süreci,” *Uludağ Üniversitesi İlahiyat Fakültesi Dergisi* 16 (2007): 211–40. One of the manuscripts in the palace library (TSMK, R. 474), the relevant commentary by Ahmed-i İlahi, is clearly the copy 'Atufi handled, judging by the presence of the two seals of Bayezid II as well as the perfect match between the entry in the inventory and the title given both on page 1a of the ms. and the sticky label on the binding.
45. 117 {15–16}, 133 {12}, 134 {2–3}, 137 {8–9}.
46. Items 37 and 39 in the list of Turkish and Turkic *dīwāns* by Csirkés.
47. For copies of 'Attar's book, see 150 {14} in verse, 150 {15}, and four copies in Persian: 150 {17}, 150 {18}, 150 {19}–151 {1}, 151 {1}. Jāmī's work is on 150 {15–16}, 150 {18–19}. The contiguity of these manuscripts in our list cannot be coincidental.
48. GAL, 1:434.
49. The full entry (227 {15–17}) is given as follows: *~ Ḥadā'iqu al-ḥaqā'iqi fī 'ilmi al-'arūdi wa- ~ Anīsu al-'ushshāqi min qibali 'ilmi al-shi'ri wa- ~ Kitābu manāqibi al-Shaykh Ṣafī al-Dīn -quddisa sirruhu- wa-rasā'ilu ukhrā fī mujalladin wāḥidin*. Neither of the two known copies of *Ṣafvat as-Ṣafa* from the age of Bayezid II, both in the Süleymaniye Library (Ayasofya 2123 and Ayasofya 3099), fits this description. For more on those manuscripts, which do not appear in the inventory, see the introductory essay by Kafadar.
50. This hagiographic work by al-Kazaruni is now known as *Shifā al-askām*, and the copy that 'Atufi misidentified is the one at the Süleymaniye library (Ayasofya 3461). The presence of the order of Kazaruniyye in Bursa, and the legacy of Shaykh Abu Ishak Ibrahim b. Shahriyar Kazaruni (d. 1033) must have been known to 'Atufi and confused him. See Arberry, “The Biography of Shaikh Abu Ishaq al-Kazaruni,” *Oriens* 3 (1950): 163–82; and M. F. Köprülü, “Abū İshāk Kāzrūnī ve Anadolu'da İshāki Dervişleri,” *TTK Belleten* 33 (1969): 225–36.
51. 113 {11}, 113 {12}, 124 {2–3}, 127 {10–11}, 138 {18}, 139 {18–19}, 141 {19}–142 {1}, 143 {4}, 143 {13}, 146 {11–12}, 146 {18}, 147 {2}, 147 {12–13}.
52. Items 61, 77, and 161 in the list by Burak.

53. 50 {19} (see item 174 in the list by Burak); and another one on oneirocriticism: 302 {13}, 302 {14}.
54. Items 67, 69, and 137 in the list by Burak.
55. Item 43 in the list by Csirkés.
56. *Tabşıra* in six copies: 116 {11–12}, 116 {12}, 123 {13}, 125 {18–19}, 133 {1}, 148 {10–11}. For both of these texts and the question of attribution, see William Chittick, *Faith and Practice of Islam: Three Thirteenth Century Sufi Texts*, SUNY Series in Islam (Albany, NY, 1992). Mikail Bayram has argued that the *Tabşıra* is by Ahi Evren; see Bayram, *Ahi Evren: Tasavvufi Düşüncenin Esasları* (Ankara, 1995).
57. 269a=122 {11}, 376d=130 {12–13}, 387k=132 {7–8}, and 579g=146 {1}; the last one seems to be mistakenly attributed to Imam Ghazali.
58. “*esâsı ‘uşûl-i meşâyih-i hakîkat üzerine vurulupdur ve binâsı*

kavâ'id-i ehl-i tarikat üzerine konulupdur.” This is Sinan Paşa’s own description of his *Tazarru’nâme* in a later work of his: *Ma’ârifnâme*, ed. Mertol Tulum (Ankara, 2013), 64. His descent from the line of Nasreddin Hoca is questionable, but it was deemed credible already in the early sixteenth century, as attested in the collection of humorous tales by the learned and popular Sufi, Lami’i Çelebi (d. 1531). For discussions of the evidence, see Pertev Naili Boratav, “Nasreddin Hoca’nın Gerçek Kişiliğini Saptama Yolunda Girişilen Denemeler Üzerine,” in idem., *Nasreddin Hoca* (Istanbul, 1996), 17–20; and Mustafa Duman, *Nasreddin Hoca ve 1555 Fıkrası* (Istanbul, 2008), 38–43. Mustafa Said Yazıcıoğlu, in his *TDVİA* entry on “Hızır Bey,” Sinan Paşa’s father, simply asserts: “Information on his mother as the daughter of Nasreddin Hoca is dubious.”

LIST OF ENTRIES

CO-AUTHORED BY EDA ÖZEL

SECTION OF BOOKS ON SUFISM, BOOKS OF ADVICE AND COUNSEL, AND HAGIOGRAPHIES OF SHEIKHS AND SAINTS—MAY THEIR SECRETS BE SANCTIFIED—AND ON THE SCIENCE OF ETHICS

(*Taḥṣīl kutubi al-taṣawwufi wa-kutubi al-naṣā'ihī wa-al-mawā'izi wa-kutubi al-manāqibī al-mashāyikhī wa-al-awliyā'i -quddisa sirruhum- wa-kutubi 'ilmi al-akhlāqī*)

Notes for the readers:

1. When authorship could not be ascertained, titles are given in quotation marks.
2. Generic titles, such as *Risālatun fī al-taṣawwufi*, are not designated “same as” if they can be attributed to several different authors.

1. Abū Ḥāmid Muḥammad b. Muḥammad al-Ṭūsī al-Ghazālī (d. 1111). *Kitābu ihyā' 'ulūmi al-dīni fī al-taṣawwufi* (Revival of Religious Sciences), 105 {17}. MANUSCRIPTS: TSMK, A. 1448 (Karatay: A 4713) (seal of Bayezid II); Süleymaniye Fatih 2552 (seal of Bayezid II). EDITIONS: *Ihyā' 'ulūm al-dīn*, ed. 'Abd Allāh al-Khālīdī, 5 vols. (Beirut: Dār al-Arqam, 1998); *Revival of Religion's Sciences*, trans. Mohammad Mahdi al-Sharif, 4 vols. (Beirut: Dār al-Kutub al-'Ilmiyah, 2011).
2. Same as above, 105 {18}.
3. Same as above, 105 {18–19}.
4. Same as above, 105 {19}–106 {1}.
5. Same as above [summary edition, also known as *Talkhīṣi al-ihyā' fī al-taṣawwufi*], 106 {1–2}.
6. Same as above, 106 {2–3}.
7. Same as above [selections], 106 {4}.
8. Same as above [volume one (of two) until the fifth book of the third quarter: *Rub' al-muhlikātī* (The Ways to Perdition)], 106 {4–5}.
9. Same as above [volume two (of two)], 106 {6}.
10. Muḥyi al-Dīn Abū 'Abd Allāh Muḥammad b. 'Alī al-Ḥātimī al-Ṭā'ī ibn al-'Arabī (d. 1240). *Kitābu al-futūḥāt al-makkiyyati fī al-taṣawwufi* (Meccan Revelations), 106 {14–15}. EDITION: *Al-futūḥāt al-makkiyyah*, ed. 'Abd al-'Azīz Sulṭān al-Manṣūb (Yemen: Wizārat al-Thaqāfah, 2010).
11. Same as above [selections], 106 {15–16}.
12. Same as above [chapter on *waṣāyā*], given as *Kitābu al-waṣāyā fī al-taṣawwufi* (Book of Counsel), 106 {16–17}. EDITION: *Al-waṣāyā* (Damascus: Dār al-Imān, 1988).
13. Same as above [from the 363rd chapter until the end of the book], 106 {17–18}.
14. Same as above [from the 392nd chapter until the end of the book], 106 {19}–107 {1}.
15. Same as above [from the 62nd chapter until the end of the 269th chapter], 107 {1–3}.
16. Same as above [from the 270th chapter until the end of the 362nd chapter], 107 {3–4}.
17. Same as above [from the 497th chapter until the end of the book], 107 {5–6}.
18. Same as above (except with the note *min qibali al-taṣawwufi* instead of *fī al-taṣawwufi*) [from the 560th chapter until the end of the book], 107 {6–7}.
19. Abū Ḥāmid Muḥammad b. Muḥammad al-Ṭūsī al-Ghazālī (d. 1111). *Kitābu kīmīyā'-i sa'ādat fī al-taṣawwufi* (The Alchemy of Happiness), Persian, 107 {14–15}. MANUSCRIPTS: TSMK, K. 881

- (Karatay: F 33) (seal of Bayezid II); TSMK, H. 240 (Karatay: F 34) (seal of Bayezid II); TSMK, E.H. 1304 (Karatay: F 36) (seal of Bayezid II). EDITION: *Kīmiyā-i Sa'adat*, ed. Hoseyn Khadiv Jam, 2 vols. (Tehran: Intiṣārāt-i 'ilmī wa farhangī, 2004).
20. Same as above, Persian, 107 {15}.
 21. Same as above, Persian, 107 {16}.
 22. Same as above, Persian, 107 {16–17}.
 23. Same as above, Persian, 107 {17–18}.
 24. Same as above, Persian, 107 {18–19}.
 25. Same as above, Persian, 107 {19}.
 26. Same as above [in two volumes], Persian, 108 {1}.
 27. Same as above, Persian, 108 {2}.
 28. Same as above, Persian, 108 {2–3}.
 29. Same as above (except no note of *bi-al-fārisiyyati*), 108 {3–4}.
 30. Abū Bakr 'Abd Allāh b. Muḥammad b. Shāhāwar Asadī Najm al-Dīn Dāya Rāzī (d. 1256). *Kitābu mirṣādi al-'ibādi fī al-taṣawwufi* (The Path of God's Bondsmen from Origin to Return), Persian, 108 {8}. EDITION: *Mirṣād al-'Ibād min al-Mabda' ilā l-Ma'ād*, ed. Ḥusayn Shams 'Urafā (Tehran: Mīr Kamālī, 1958).
 31. Same as above, Persian, 108 {8–9}.
 32. Same as above, Persian, 108 {9–10}.
 33. Abu al-Qāsim 'Abd al-Karīm b. Hawāzin al-Qushayrī (d. 1072). *Risālatu al-Qushayrī fī al-taṣawwufi* (Al-Qushayrī's Epistle on Sufism) [in two volumes], 108 {10}. MANUSCRIPTS: TSMK, A. 1390 (Karatay: A 5023) (seal of Bayezid II); TSMK, A. 1445 (Karatay: A 5026) (seal of Bayezid II); SK, Ayasofya 1819 (seal of Bayezid II). EDITION: *Al-risālah al-Qushayrīyah fī 'ilm al-taṣawwufi* (*wa-bi-hāmishihi khulāṣat Sharḥ Shaykh al-Islām Zakarīyā al-Anṣārī t 926 H wa-al-Imām al-'Amrūsī t 1293 H*), ed. Abū Sahl Najāh 'Awaḍ Ṣiyām (Cairo: Dār al-Muqattam, 2009).
 34. Same as above, 108 {11}.
 35. "*Kitābun fārisiyyun 'alā 'asharati abwābin fī al-taṣawwufi*" (Persian Book in Ten Chapters on Sufism), 108 {11–12}.
 36. Abu al-Qāsim al-Ḥusayn b. Muḥammad b. al-Mufaḍḍal al-Rāghib al-Iṣfahānī (d. 1108). *Kitābun fī muḥāḍarāti al-udabā'i wa-muḥāwarāti al-bulaghā'i min qibali al-naṣā'ihi* (Littérateurs' Rīpostes and Poets' and Eloquent Men's Rejoinders), 108 {12–13}. EDITION: *Muḥāḍarāt al-udabā' wa-muḥāwarāt aṣ-ṣu'arā' wa-'l-bulaghā'*, 4 vols. (Beirut: Dār Maktabat al-Ḥayāh, 1980).
 37. Mubārak al-Badrī al-Mawṣilī (d. after 1284–85). *Kitābu ādābi al-dārayni min qibali al-taṣawwufi* (Etiquette of the Two Worlds), 108 {13–14}. MANUSCRIPT: TSMK, A. 1402 (Karatay: A 5210) (seal of Bayezid II). EDITION: *Al-Mubārak ibn Khalīl Urmawī, Ādāb al-mulūk bi-al-'adl wa-tabyīn al-ṣādiq al-karīm al-rafi' bi-al-'aql min al-munāfiq al-la'īm al-waḍī' bi-al-jahl*, ed. Sayyid Kasrawī Ḥasan (Beirut: Dār Al-Kutub Al-'Ilmiyah, 2009).
 38. Abū al-Qāsim Maḥmūd b. Aḥmad b. Abī al-Qāsim al-Fāriyābī (d. 1210). *Kitābu khālīṣati al-ḥaqā'iqi min qibali al-taṣawwufi* (The Pure Truth), 108 {14}.
 39. Multi-text volume.
 - 39a. Shihāb al-Dīn Abū Ḥaṣḥ 'Umar al-Suhrawardī (d. 1234). *Kitābu 'awārifi al-ma'ārifi fī al-taṣawwufi* (Gifts of Spiritual Knowledge), 108 {14–15}. EDITION: *'Awārif al-ma'ārif*, ed. Adīb al-Kamdānī and Henry W. Clarke, 2 vols. (Mecca: Al-Maktabah Al-Makkīyah, 2001).
 - 39b. Abū Bakr Muḥammad b. Iṣḥāk al-Kalābādhī (d. 990?). *Kitābu al-ta'arrufi li-madhhabī ahli al-taṣawwufi* (Introduction to the Way of the People of Sufism of the Sufi School), 108 {15–16}.

- EDITIONS: *Kitab al-ta'arruf li-madhhab ahl-al-tasawwuf* (Cairo: Typ. Issa el-Baby el-Halaby, 1960); *The Doctrine of the Šūfis = Kitāb al-ta'arruf li-madhhab ahl al-taṣawwuf*, ed. and trans. A. J. Arberry (Cambridge; New York: Cambridge University Press, 1977).
40. Same as 39a, in translation with the title *Kitābu tarjamati 'Awārifi al-ma'ārifi fi al-taṣawwufi*, Persian, 108 {16–17}.
 41. Same as above, 108 {17–18}.
 42. Same as above, 108 {18}.
 43. Maḥmūd b. Maḥmūd al-Gulistānī al-Ḥasanī (d. ?). *Kitābu anīsi al-waḥdati min qibali al-taṣawwufi* (The Companion of Unity), 108 {18–19}.
 44. Nūr al-Dīn al-Wāsiṭī (d. ?). *Kitābun ismuhū Unsu al-waḥīdi min qibali al-taṣawwufi* (The Intimacy of the Unique One), 108 {19}–109 {1}.
 45. Ibn al-'Arabī. *Kitābu al-fuṣūṣi fi al-taṣawwufi* (Bezels of Wisdom), 109 {1–2}. MANUSCRIPT: TSMK, A. 1506 (Karatay: A 5090) (seal of Bayezid II). EDITION: *Fusus Al-Hikam*, ed. Abu al-'Ilā 'Afīfī, 2 vols. (Beirut: Dar al-Kitab al-'Arabi, 1966).
 46. 'Abd al-Razzāq Kamāl al-Dīn b. Abū al-Ghanā'im al-Qāshānī (d. 1329–35). *Kitābu sharḥi al-Fuṣūṣi al-marqūmu bi-annahū li-l-Qāshānī fi al-taṣawwufi* (Al-Qāshānī's Commentary on Ibn al-'Arabī's *Fuṣūṣ*), 109 {2–3}. EDITION: *Sharḥ al-ustādh al-fāḍil wa-al-'ālim al-kāmil al-Shaykh 'Abd al-Razzāq al-Qāshānī 'alā Fuṣūṣ al-ḥikam* (Beirut: Manshūrāt al-Jamal, 2017).
 47. Abū 'Abd Allāh Mu'ayyad al-Dīn b. Maḥmūd b. Sā'id al-Jandī (d. ca. 1300). *Kitābun mukhtaṣarun fi sharḥi al-Fuṣūṣi fi al-taṣawwufi* (Summary of al-Jandī's Commentary on Ibn al-'Arabī's *Fuṣūṣ*) [summary of 60, below], 109 {3–4}. EDITION: *Sharḥ Mu'ayyid al-Dīn al-Jandī al-Mutawaffā Sanat 691 H 'alā Fuṣūṣ al-ḥikam li'l-Shaykh al-akbar Muḥyī al-Dīn Ibn 'Arabī*, ed. 'Āṣim Ibrāhīm al-Kayyālī al-Ḥusaynī al-Shādhilī al-Darqāwī (Beirut: Dār al-Kutub al-'Ilmiyah, 2007).
 48. "*Kitābu sharḥi al-Fuṣūṣi fi al-taṣawwufi*" (Commentary on Ibn al-'Arabī's *Fuṣūṣ*), Persian, 109 {4–5}.
 49. Multi-text volume.
 - 49a. Same as 45, 109 {5}.
 - 49b. Ṣadr al-Dīn Muḥammad b. Ishāq b. Muḥammad b. Yūnus al-Qunawī (d. 1274). *Kitābu al-fukūki fi sharḥi al-Fuṣūṣi fi al-taṣawwufi* (The Book of Solutions in Commenting on [Ibn al-'Arabī's] *al-Fuṣūṣ*), 109 {5–6}. EDITIONS: *Kitāb al-fukūk*, ed. Muḥammad Khvājavi (Tehran: Intisharat-i Mawlā, 1992–93); also printed on the margin of Qāshānī, *Sharḥ manāzil al-sā'irīn* (Tehran, 1315/1897–98).
 - 49c. Ṣadr al-Dīn Muḥammad b. Ishāq b. Muḥammad b. Yūnus al-Qunawī (d. 1274). *Kitābu al-nuṣūṣi fi al-taṣawwufi* (Texts), 109 {6–7}. EDITIONS: *Risālat al-nuṣūṣ*, ed. Jalāl al-Dīn Āshṭiyānī (Tehran, 1983); appended to Qāshānī, *Sharḥ manāzil al-sā'irīn* (Tehran, 1315/1897–98); and appended to Ibn Turka, *Tamhīd al-ḥawā'id* (Tehran, 1897–98).
 - 49d. "*Risālatun fi al-asmā'i al-ḥusnā fi al-taṣawwufi*" (Treatise on the Beautiful Names [of God]), 109 {7}.
 50. 'Abd al-Razzāq Kamāl al-Dīn b. Abū al-Ghanā'im al-Qāshānī (d. 1329–35). *Kitābu sharḥi al-Nuṣūṣi al-marqūmu bi-annahū li-l-Qāshānī [Kāshānī] fi al-taṣawwufi* (Al-Qāshānī's Commentary on al-Qunawī's *Nuṣūṣ*), 109 {8}.
 51. "*Kitābu sharḥi al-Nuṣūṣi fi al-taṣawwufi*" (Commentary on al-Qunawī's *Nuṣūṣ*), Persian, 109 {8–9}.
 52. Same as 49c, 109 {9–10}.
 53. Multi-text volume. MANUSCRIPT: SK, Fatih 4045 (seal of Bayezid II).

- 53a. Abū al-Barakāt Nūr al-Dīn ‘Abd al-Rahmān b. Aḥmad al-Jāmī (d. 1492). *Kitābu naqdi al-nuṣūṣi fī sharḥi Naqshi al-fuṣūṣi* (Critical Examination of Texts in Commenting on Ibn al-‘Arabī’s *Naqsh al-Fuṣūṣ*), 109 {10}. EDITION: *Naqd al-Nusus fī Sharḥ Naqsh al-Fusus*, ed. William C. Chittick (Tehran: Mu’asses Pazhohish-i Hikmat wa Falsafa-i Iran, 1991).
- 53b. Al-Jāmī. *Risālatu sharḥi al-Qaṣīdati al-mūmiyyati fī al-taṣawwufi* (Commentary on Ibn al-Fāriḍ’s Poem Rhyming in M), 109 {11}. EDITION: *Lavami’, sharḥ-i qasidah-i khamriyah Ibn Farid*, ed. Āqay Hikmat Āl Āqā (Tehran: Bunyād Mahr, 1962).
- 53c. Al-Jāmī. *Sharḥu al-Qaṣīdati al-tā’iyyati li-Ibn al-Fāriḍ fī al-taṣawwufi* (Commentary on Ibn al-Fāriḍ’s Poem Rhyming in T), 109 {11–12}.
- 53d. Al-Jāmī. *Risālatu al-lawā’ihī fī al-taṣawwufi* (Epistle of Lights), 109 {12}. MANUSCRIPT: Another copy at SK, Fatih 4062 (seal of Bayezid II).
- 53e. Al-Jāmī. *Risālatu sharḥi al-Rubā’iyyāti fī al-taṣawwufi* (Commentary of Quatrains), 109 {12–13}.
- 53f. Al-Jāmī. *Raṣā’ilu ukhrā* (Other Treatises), 109 {13}.
54. Pīr Muḥammad b. Quṭb al-Dīn b. Ḥasan al-Khawa’inī/al-Khūyī [Pīrī Khalifa] (d. 1460?). *Kitābu zubdati al-taḥqīqi fī sharḥi al-Nuṣūṣi fī al-taṣawwufi* (Essence of Inquiry in Commenting on al-Qunawī’s *Nuṣūṣ*), Arabic, 109 {14}. MANUSCRIPT: TSMK, A. 1425 (Karatay: A 5117) (seal of Bayezid II).
55. Mas’ūd bin ‘Abd Allāh Bayḍāwī Shīrāzī [Bābā Rukn al-Dīn] (d. 1367). *Kitābu nuṣūṣi al-khuṣūṣi fī sharḥi al-Fuṣūṣi fī al-taṣawwufi* (Special Texts in Commenting on Ibn al-‘Arabī’s *Fuṣūṣ*), Persian, 109 {14–15}. MANUSCRIPT: TSMK, A. 1507 (Karatay: F 43) (seal of Bayezid II). EDITION: *Nuṣūṣ al-khuṣūṣ fī tarjumat al-Fuṣūṣ (sharḥ-i Fārsī-i Fuṣūṣ al-hikam)*, ed. Ḥāmid Nāji, 3 vols. (Tehran: Intishārāt-i Sukhan, 2016).
56. Dāwud b. Maḥmūd al-Qayṣarī (d. 1350). *Kitābu sharḥi al-Fuṣūṣi fī al-taṣawwufi* (Commentary on Ibn al-‘Arabī’s *Fuṣūṣ*), Arabic, 109 {16}. MANUSCRIPT: TSMK, A. 1510 (Karatay: A 5095) (seal of Bayezid II). EDITION: *Sharḥ Dāwūd Ibn Maḥmūd al-Qayṣarī ‘alā Fuṣūṣ al-Hikam li’l-Shaykh al-Akbar Muḥyī al-Dīn Ibn al-‘Arabī* (Tehran: Intishārāt-i Bīdār, 1984).

NOTES

- 1 Manuscript has what looks like a dagger *alif* above the *rā*, as in *mir’āti*, but it would seem that the reference is to a learned woman, i.e., Sitt al-‘Ajam bt. al-Nafīs, who wrote this *sharḥ* on Ibn al-‘Arabī.
- 2 Vocalized in text as *Maskūyah* here and in the following two mentions.
- 3 Manuscript has a *kasra* under the *zā*’ here and in l. 18.
- 4 The catchword is *al-taṣawwuf*, but the following folio begins with *li-l-Shaykh*.
- 5 Manuscript has vocalized *al-tarājumi*.
- 6 Hava q.v.: “water flowing upon the surface of the earth.”
- 7 Q 15:29.
- 8 Manuscript has al-Kubrā’.
- 9 Manuscript has a *kasra* as case ending for al-‘arabiyya and al-fārisiyya (no case ending for al-Abyāt), but it would seem that wa-al-Abyāt ..., which begins a new entry, must be in the nominative.
- 10 Manuscript has a *fathā* above the *dāl* for the dual.
- 11 Manuscript has a *kasra* under the *shīn*, to read *mashīkha*.
- 12 Manuscript has an erasure, as if *ilm* had been written erroneously; it looks to have been corrected to read *‘ālim* (including a *fathā* above the *‘ayn*).
- 13 Manuscript has a *kasra* below the *nūn* (but I think it should be in the nominative case, unless it is part of a title).
- 14 Manuscript has corrected (a still legible) *-hu* to *-hā* in *bi-annahā*.
- 15 The plural *rasā’il* would seem to be in error; the counted element after fifteen should be singular: *risālatan*.
- 16 Manuscript seems to have a *yā*’, but this is in error.

- 17 Manuscript has vocalized the name as Ibn Maskuwayh.
- 18 Vocalized with a *kasra* under the *ʿayn*, but title is unknown if meant to be one of al-Ghazālī's works.
- 19 Manuscript has *ḍamma* (or *sukūn*) above the *rāʾ*, but a *kasra* in next line.
- 20 Manuscript has a *kasra* for *kullihā*.
- 21 Thus in manuscript; in Persian, Buzurgmihr.
- 22 Manuscript has a *hamza* above the *hāʾ*, as if a Persian *izāfe*.
- 23 Thus in manuscript (unless the sign above is a dagger *alif*), but should be al-Ḥārith.
- 24 This interpolation in square brackets was added by the same hand upside down on top of the line.

BOOKS ON ETHICS AND POLITICS: THE ART OF GOVERNING THE SELF AND OTHERS AT THE OTTOMAN COURT

In our time, kings ignored libraries and only built madrasa libraries as usual except for the library of our great sultan—who honored our time with his presence and shadow. It is reported that there is no book, be it religious or non-religious (*sharʿī wa ghayr sharʿī*), or Arabic or Persian, which cannot be found in this library, all beyond the reach of the madrasa students' hands. May Allah continue the rule of this sultan and extend his life till the end of times.¹

The above statement by the Ottoman scholar Taşköprülüzade (d. 1561) concerning Sultan Süleyman's (r. 1520–66) library does not appear to be an exaggeration, considering the sheer number and diversity of books cited in his encyclopedia of sciences, *Miftāḥ al-Saʿāda wa Mişbāḥ al-Siyāda fī Mawḍūʿāt al-ʿUlūm* (The Key of Happiness and Light of Nobility in Objects of Science). In this work, which features about 2,000 titles representing some 350 disciplines, Taşköprülüzade considers the imperial library of Süleyman as a successor to the three great caliphal libraries of the Abbasids, the Fatimids, and the Andalusian-Umayyads. Before Süleyman, at least since the time of Mehmed I (r. 1412–20), book collecting had been a family tradition among the Ottoman sultans, and Bayezid II (r. 1481–1512) was no exception. Although we do not have a full catalogue of Süleyman's books, the inventory of Bayezid II's imperial library, which lists 7,200 titles, certainly justifies Taşköprülüzade's praise.

As far as works on ethics and politics are concerned, the inventory of Bayezid's library presents as much mystery as it does information about the identity of books listed in it and how they are classified. The abundance of anonymous titles offers a puzzle that may never be entirely solved, even after exhaustive research has been undertaken on the matter. As a diligent cataloguer,

ʿAtufi may simply not have had enough information to identify the authors of a large number of works which probably circulated under such generic titles as *Naṣīḥa al-Mulūk* (Advice to Kings). Moreover, many other works seem to have been listed according to their perceived content, such as *Akhlāq* (Ethics) and *Siyar al-Mulūk* (Manners of Kings), rather than by their actual titles. Yet a shortage of information cannot account for some of the most conspicuous omissions in Bayezid's library. A good example is the Aqqoyunlu scholar Dawani's (d. 1502) *Lawāmiʿ al-ʿIshrāq fī Makārim al-Akhlāq* (Lights of the Rising Sun on Ethical Virtues), better known as simply *Akhlāq-i Jalālī* (Jalalian Ethics). Given Dawani's fame at the Ottoman court and the even greater fame his work on ethics acquired among the learned, it is highly unlikely that Bayezid did not know who wrote this work. Without mentioning the author, ʿAtufi lists six anonymous copies of *Makārim al-Akhlāq*, all in Persian, under the category of *taṣawwuf* and describes them as *min qibali taṣawwuf* ("pertaining to Sufism").² These copies are listed right after those of Nasir al-Din al-Tusi's (d. 1274) *Akhlāq-i Nāṣirī* (The Nasirean Ethics), a predecessor to Dawani's book on ethics. Yet, among his large corpus of well-known works, the only one attributed to him in the inventory is the *Sharḥ al-Rubāʿiyāt* (Commentary on Quatrains), which Dawani dedicated to Bayezid II.³ If we can assume that the *Makārim al-Akhlāq* was the one by Dawani, the omission of his name is puzzling, unless perhaps the identity of the author was considered to be too obvious to mention.

On the topic of ethics and politics, Bayezid's library boasts an impressive array of sources across different languages and genres, from all phases and geographies of Islamicate culture spanning from Spain to India.

Besides the specific works that can easily be identified as pertaining to ethics, politics, or both, a large number of other works ranging from chronicles to books on theology are included in this section because they contain substantial discussions of these subjects. To make things more complicated, there is an even larger pool of works represented here that are not on these topics per se, but that were widely used as principal texts on proper morality and governance, such as wisdom literature, animal parables, and didactic poetry. These include such works as Zamakhshari's (d. 1144) *Rabī al-Abrār wa Fuṣūṣ al-Akhhbār* (The Spring of the Virtuous and Bezels of Histories), Ibn 'Abd Rabbih's (d. 940) *al-ʿIqd al-Farīd* (The Unique Necklace), Sa'di's (d. 1292) *Bustān* (Garden) and *Gulistān* (Rose Garden), as well as the *Kalīla wa Dimna*, *Marzbān-nāme* (The Book of Marzbān), and *Jamasb-nāma* (The Book of Jamasb), which are listed in other sections of the inventory.

Despite holding a surprisingly high number of Turkish language texts, particularly on the topics of history, literature, and Sufism, Bayezid's library on ethics and politics is clearly biased towards Persian works. For example, in addition to being represented in Arabic versions, Ghazali's (d. 1111) *al-Tibr al-Masbūk fī Naṣīḥa al-Mulūk* (Ingots of Gold on Advice to Kings), Turtushi's (d. 1126) *Sirāj al-Mulūk* (The Lamp of Kings), and the *Kalīla wa Dimna* were all available in Persian as well. By the time the inventory was compiled, a number of well-known texts on ethics and politics were also available in Turkish that seem to have enjoyed a wide readership, including *Mirṣād al-ʿIbād* (The Path of God's Bondsmen) by Najm al-Din Daya (d. 1256), *al-Tibr al-Masbūk* by Ghazali, and the *Qābusnāma* (The Book of Qābūs) of Kaikawus (d. after 1082). In addition, a few Turkish works on ethics had already reached fame in this period, such as Eṣrefoğlu Rumi's (d. 1469–70) *Müzekki'n-Nüfūs* (Purifier of Souls), Musa İzniki's (d. 1434–35) *Münebbihu'r-Rākidīn* (Admonisher of the Languid), and Şükrullah's (d. after 1464) *Enīsü'l-Mülūk* (Companion of Kings). Unless they are listed under different titles, we can cautiously conclude that these Turkish works were not available in Bayezid's library. One notable exception, however, is Sinan Paşa's (d. 1486) *Taḍarru'nāma* (The Book of Humility), a text written in an exceptionally refined literary Turkish, which may have made it

appealing to the learned readership of Bayezid's court, of which the author was a respected member.⁴

In a process that started with the reign of Mehmed II (r. 1451–81) and lasted for about a century, Ottoman literary culture became more exposed to Persian thinking on ethics, politics, Sufism, and literature, which overshadowed the earlier revival of vernacular Turkish. Persian was dethroned with the rise of Arabic, following the conquest of the Arabic-speaking south and the gradual rise of literary Turkish as the administrative language of the empire in the mid-sixteenth century. Reflecting this linguistic shift, Taşköprülüzade felt compelled to append the phrase "but it is in Persian" in his encyclopedia to books he described on any given discipline, including *al-ʿilm al-siyāsa* (The Science of Governance).⁵ Apart from the Ottoman rulers' infatuation with the Persian language, the reigns of Mehmed II and Bayezid II witnessed the influx of a large contingent of bureaucrats and Sufis from the East whose principal language of literary articulation was Persian. A representative example of such Persianate literati is Musannifek (d. 1470), who composed two works on politics in Persian: *Tuḥfa al-Wuzarā* (The Gift of Ministers) and *Tuḥfa al-Mulūk* (The Gift of Kings).⁶ Fifteenth-century Ottoman ruling elites were well aware of the Timurid renaissance in arts and letters and engaged in a courtly competition to attract scholars and artists. This was hardly the case with the Arabic-dominated Mamluk domains of the south. The Ottomans did not seem particularly eager to follow the equally fascinating Mamluk renaissance in letters or to attract the learned from Egypt and Syria, even though students from the Ottoman world frequently studied in Cairo and Damascus. The fifteenth-century Mamluk realm was exceptionally prolific in terms of political and ethical works, but most of these titles were brought to Istanbul libraries only in the later sixteenth century, following the 1517 conquest of Egypt.

As shown by the multiple copies of Sufi classics by such famed authors as Ibn al-ʿArabi (d. 1240), Najm al-Din Daya, and Hamadani (d. 1385), Bayezid's library heavily favored works on ethics and politics written from a distinctly Sufistic perspective. Juristic works, however, mostly written in Arabic and circulating in Mamluk domains, were clearly not favored, even those representing the most authoritative texts of medieval

Islam. One notable exception is *al-Aḥkām al-Sultāniyya*; 'Atūfi cites the title without an author, which could be Mawardi (d. 1058) or Abu Ya'la (d. 1066).⁷ Besides Bayezid II's own well-documented interest in Sufism, his library holdings perfectly reflect the spirit of the times, which was characterized by the broader sway of Sufism on Islamic thought and practice in the post-Abbasid world, more so to the east of the Nile. Thanks to the eclecticism and inclusivism of Sufism, Sufi authors turned it into an authoritative discipline that incorporated and reinterpreted all other branches of learning, from mathematics to jurisprudence, in order to redefine humankind's existential position, morality, and political organization. It was commonplace that even the most prominent jurists and scientists had strong Sufi affiliations. From the decline of the Seljuks until the rise of a new bureaucratic consciousness, Sufi writing on politics became common in the Ottoman Empire. The most influential authors on government in this period, from 'Abdurrahman Bistami (d. 1454) to Idris-i Bidlisi (d. 1520), treated government as part of a broader Sufistic cosmology. The shift was even more visible in the area of ethics, to the extent that *taṣawwuf* and *'ilm-i akhlāq* could be used interchangeably. Thus, it is not surprising that *taṣawwuf* and *'ilm-i akhlāq* are considered as part of the same category in 'Atufi's inventory: *Taḥṣīlu Kutub al-Taṣawwuf wa-Kutub al-Naṣāyih wa-al-Mawā'iz wa-Kutub al-Manāqib al-Mashāyikh wa-al-Awliyā'*

Quddisa Sirruhum wa-Kutub 'Ilm al-Akhlāq (List of Books on Sufism, and Counsels and Admonitions, and Miraculous Deeds of Shaykhs and Friends of God, may God bless their secrets, and the Science of Ethics).⁸

What is remarkable is the classification of books. Not only are most books on ethics and politics listed under this heading, but some obviously non-Sufistic works, such as Tusi's *Akhlāq-i Nāṣirī*, Ibn Miskawayh's (d. 1030) *Tahdhīb al-Akhlāq* (The Refinement of Character), and Mawardi's *Adab al-Dīni wa al-Dunyā* (Refinement of Religion and the World) were specifically described as *min qibali taṣawwuf* (On Sufism).⁹ If we take Islamic encyclopedic works as representative, we can see that this approach was the product of a broader post-Abbasid reconceptualization in epistemology. Fakhr al-Din al-Razi's (d. 1210) early encyclopedia of sciences, *Jāmi' al-'Ulūm* (Compendium of Sciences), for example, de-

scribes sixty sciences, including *siyāsa*, *akhlāq*, and *ādāb al-Mulūk*, but not *taṣawwuf*. However, more elaborate later encyclopedias, both Fenari's (d. 1431) *Anmūzaj al-'Ulūm* (Classification of Sciences) and Bistami's *Fawā'ih al-Miskīyya fī Fawātiḥ al-Makkiyya* (Perfumes of Musk on the Meccan Openings), present *taṣawwuf* as a separate discipline in addition to the other sciences.¹⁰ But even considering the introduction of *taṣawwuf* as a new branch of learning, 'Atufi's classification still reflects a markedly Sufistic outlook. Taşköprülüzade, writing a few decades later, also presents *taṣawwuf* as a distinct discipline but lists Tusi's *Akhlāq* under *al-'ilm al-siyāsa* rather than under Sufism, as 'Atufi did.¹¹

Given that 'Atufi lists a large number of titles on ethics and politics under various categories across the inventory, this essay will be limited to the examination of a select group of works that had a lasting impact on Ottoman thought and that may be arranged under three broad categories: Sufism, mirrors for princes, and philosophy. This inevitably leads us to exclude a considerable number of works dispersed under various other disciplines, including jurisprudence, theology, and occult sciences. We also do not discuss literary works, which are often full of ethical and political teachings. Given that works of literature pose a specific set of questions to address, from style to language, it may be more appropriate to analyze them separately. Suffice it to say that literary works, especially didactic verse and prose, such as the *Kalīla wa Dimna*, *Marzbannāma*, and *Jamasbnāma*, constitute an indispensable component of Ottoman ethical and political thinking and are impressively well-represented in Bayezid's library.

SUFISM

Apart from the many copies of *Fuṣūṣ al-Ḥikam* (Bezels of Wisdom) and *Futūḥāt al-Makkiyya* (Meccan Openings), which are loaded with political images and which continuously inspired Sufi-minded political authors, 'Atufi lists three copies of Ibn 'Arabi's *al-Tadbīrāt al-Ilāhiyya fī Mamlaka al-Insāniyya* (Divine Governance in Reforming the Human Kingdom).¹² Despite being overshadowed by his *Fuṣūṣ* and *Futūḥāt*, this lesser known work by Ibn 'Arabi is one of the principal texts that

channeled his mystical philosophy into the broader stream of Ottoman political thought. *Al-Tadbīrāt* was one of his earliest books, written in Sevilla around 1194, when he was 29.¹³ The intended purpose of the book is not government per se, but the administration of the self. More specifically, it is an allegorical treatise on the ontology of humans, whose constitution is explained by reference to a body politic. In *al-Tadbīrāt*, Ibn ‘Arabi considers the operation of the body politic, as explained in the pseudo-Aristotelian text, *Sirr al-Asrār* (Secret of Secrets), as a metaphor for governing the self. The work elaborates on the physical composition and function of humans as part of creation and divine government. Yet conversely, *al-Tadbīrāt* can also be read as a treatise on government, explained through the metaphor of the body. This is what makes the work unique and equally appealing to rulers as a handbook of leadership, and to Sufi disciples as a manual of self-exploration and way-faring. As he makes abundantly clear in his later works, Ibn ‘Arabi conceives the rule of one’s self and the rule of society to be part of the same cosmological pattern, which rests on the conviction that divine government is a manifestation of God’s names and attributes. The first two chapters of the book explain in detail the nature and status of the spirit as the caliph of the human body. This concept of the caliphate is no different from the view of the caliphate as God’s vicegerent over creation, which Ibn ‘Arabi discusses extensively in his *Futūḥāt*.

Unlike Ibn ‘Arabi, Najm al-Din Daya never gained an authoritative status in Ottoman Sufism as a master Sufi. Yet his *Mirṣād al-Ibād* was one of the most influential texts on broader Ottoman thought. All five copies of the work in Bayezid II’s library were in Persian.¹⁴ In form and content, this work is similar to Ghazali’s *Iḥyā’ al-‘Ulūm al-Dīn*, but gives a more specifically Sufistic treatment of ethics, piety, social organization, and rulership. Najm al-Din Daya fled to Anatolia from the Mongol onslaught and met with the Seljuk ruler ‘Ala’eddin Keykubad (r. 1220–37). He composed *Mirṣād al-Ibād* in Anatolia and dedicated it to ‘Ala’eddin in 1223, but never received due attention from the sultan or his learned circle. He departed from Anatolia rather disappointed, but left a work behind him that would soon become a manual for many Sufi orders and royal courts, including that of the Ottomans. From China to Egypt, the work

quickly turned into one of the most studied texts on the Sufi way of life.¹⁵ Besides being represented by numerous copies in Persian, the text was translated into Turkish multiple times. Its fifth part on rulership was reproduced in large numbers and was circulated as a separate work, in both Persian and Turkish versions. Şeyhoğlu (d. 1414) translated the first four chapters of the fifth part in 1401 under the title *Kenzü’l-Küberā* for an Ottoman statesman, Paşa Ağa.¹⁶ Şeyhoğlu’s partial translation and additions to the text and his omission of any reference to the original text made the work appear to be an original composition, even to modern scholars.¹⁷ Kasım b. Mahmud el-Karahisari (d. 1486) translated the full text for Murad II in 1441, and this became the definitive rendering of the work into Turkish until modern times, with numerous copies preserved in Ottoman libraries.¹⁸ Kasım Çelebi (d. 1518), a shaykh from the Halveti order and the spiritual master of the more famous Bali Efendi (d. 1553), translated the work into Turkish for Mehmed II, but this translation failed to gain the same currency as that of Karahisari.

Hamadani’s (d. 1385) *Zakhīrat al-Mulūk* (The Treasury of Kings), of which ‘Atufi lists two copies, is similar to the *al-Tadbīrāt* or the *Mirṣād*, but focuses specifically on rulership.¹⁹ Unlike the *Mirṣād*, whose influence waned somewhat after the fifteenth century, *Zakhīrat al-Mulūk* gained in popularity throughout the sixteenth century and afterwards, becoming one of the most influential Sufi texts on Ottoman political thought. Since Hamadani established the Hamadaniyya branch of the Kubrawiyya order, his teachings attained a cult status in and around the Indian subcontinent, while only gradually gaining currency in the Ottoman realm.²⁰ His synthesis of Ibn al-‘Arabi and Najm al-Din Kubra, clearly visible in his *Zakhīrat*, made Hamadani’s teachings particularly welcome to Ottoman ulema, Sufis, and their disciples among the ruling elite.²¹ In composing *Zakhīrat al-Mulūk*, Hamadani also relied heavily on Ghazali’s *Iḥyā’ al-‘Ulūm al-Dīn* and *Kimyā-i Sa‘ādat* (The Chemistry of Happiness), two works that were held dear by most Ottoman learned men at all times.²² Further, Hamadani’s use of Davud-i Kayseri (d. 1350) in elaborating on Sufistic conceptions of the caliphate brought attention and fame to Kayseri’s teachings.²³ *Zakhīrat al-Mulūk* was translated three times over the course of

the sixteenth century: Süruri Efendi (d. 1561–62) translated it for Prince Mustafa (d. 1553), Zihni for Selim II, and Mustafa Katib for Murad III in 1577.²⁴ Süruri was a disciple of Taşköprülüzade, who made extensive use of *Zakhīrat al-Mulūk* in composing his treatise *Asrār al-Khilāfa*.²⁵

MIRRORS FOR PRINCES

There are nine works in the inventory that are attributed to the last Sasanian king, Anushirwan, and these can all be considered within the broader field of ethics and politics. Since at least the time of Ibn Muqaffa, Anushirwan had appeared in advice literature as a role model for rulership. Examples of hadith attributed to the Prophet Muhammad that praise this king as a just ruler facilitated his favorable reception in all later dynasties. Alongside the overall rise of the Persian language and Iranian models of government and courtly life, Anushirwan's fame and authoritative status increased continuously since early Abbasid times. For Ottomans too, Anushirwan (along with Ardashir) was a favorite character for illustrating foundational principles of government, such as justice. Anushirwan was commonly believed to have written an advice book, also referred to as a testament, which circulated as a separate volume and was quoted at length in histories, advice books, and works of literature. In addition to *Kitāb Tāj fī Sīra Anushirwān* and *Karnāmag-i Anushirwān*, both of which were attributed to Ibn Muqaffa, a number of medieval authors, including Tha'alibi, Tabari, and Ibn Qutayba, extensively quoted the narratives of Anushirwan. Bayezid's library seems to have held a representative sample of various editions of these texts, which were attributed to Anushirwan. In 'Atufi's inventory, four of these texts are entitled *Naṣīhatnāma* and two are called *Pandnāma*, in line with their common titles, whereas two copies have the word *kunkura* ("crown ornament") added to the title. Among these, three are said to be in verse; they may well be extracts from Firdawsī's *Shāhnāma* or Sa'di's *Bostān*.²⁶

Also written as a testament was Kaykawus's *Qābusnāma*, which caught the attention of the Ottomans from early on. The book is one of the most sophisticated ex-

amples of Persian mirrors for princes that reflect the experience of a smaller dynasty surrounded by larger ones at a time when the fragmented Abbasid empire became a battleground for many regional houses of power. Kaykawus, an otherwise little-known ruler of the small Ziyarid dynasty, composed the *Qābusnāma* for his son Gilan Shah in 1082–83.²⁷ This work, which is also known by such titles as *Andarznāma*, *Pandnāma*, *Naṣīhatnāma*, and *Kitāb al-Naṣīḥa*, is a comprehensive manual for the development of a ruler who is virtuous, just, competent, and sound in body and soul. The work seems to have been popular among the Turkish principalities of early fifteenth-century western Anatolia, who had much in common with the Ziyarid dynasty of eleventh-century western Persia. There are six known translations of this text from the late fourteenth and early fifteenth centuries under different titles.²⁸ It is possible that the earliest of these translations was an anonymous one that seems to have been completed between 1370 and 1386.²⁹ Another anonymous translation, preserved in the British Library, displays characteristics of early western Anatolian Turkish and conveys the original text only selectively.³⁰ Şeyhoğlu Sadreddin translated the *Qābusnāma* for the Germiyanid ruler Süleyman Shah between 1361 and 1387; a copy of this translation is preserved in the Cairo National Library.³¹ Soon after, Akkadioğlu translated the work for an obscure vizier in service of the Ottoman prince, Emir Süleyman, who lost his long struggle for the throne in 1411.³² In 1427 Bedr-i Dilşad composed a work in verse, *Murādnāme*, using the *Qābusnāma* as his primary source text, and dedicated it to Murad II.³³ By far the most popular of these early translations was undertaken by Mercümeke Ahmed (d. after 1431–32) upon the request of his patron Murad II, of which numerous copies are preserved in manuscript libraries.³⁴ Apart from translations, the original Persian text of the *Qābusnāma* was also extensively copied, quoted, and circulated among the Ottoman readership. Of the three copies of the *Qābusnāma* listed in the inventory, 'Atufi places two in the categories of *al-istilāḥāt al-ṭibbiyya* (medical terms) and *al-tawārikh* (history), but does not specify their language. Given the primacy of Persian at the Ottoman court at this time, it is possible that these two texts are in Persian. The third copy is already listed under *al-dawāwīn al-farisiyya*.³⁵

Contemporaneous with the *Qābusnāma* is a work by the Seljuk vizier Nizam al-Mulk (d. 1092), the *Siyāsatnāma*, of which three copies are listed: two under *taṣawwuf* titled *Siyar al-Mulūk*, and one under *tawārīkh* titled *Umūr al-Saltāna* (On Affairs of Rulership).³⁶ With a reputation as an illustrious and wise vizier, Nizam al-Mulk is an oft-quoted figure in historical and political literature, especially in Persian and Turkish traditions. From a modern scholarly perspective, his *Siyāsatnāma* is considered to be a prime example of the *Fürstenspiel* genre in Persian literature and is treated as a benchmark when examining any other Persian work on rulership. Yet this canonization is largely a product of the modern era. Despite Nizam al-Mulk's fame as an exemplary vizier, his work gained popularity and authoritative status only gradually. One simple reason for this may be that replicating the vizierate as conceived and instituted by Nizam al-Mulk would have been a risky endeavor in post-Seljuk polities until the rise of bureaucratic empires in the early modern era. In the second half of the fifteenth century, Mehmed II's institutionalizing reforms and the rise of *devshirme* statesmen in administration made Nizam al-Mulk's manual of government relevant again. Because of the low profile of the vizierate in the Ottoman state prior to the conquest of Constantinople, not much had been written on the governance of viziers. Although the *Siyāsatnāma* was not translated into Turkish until the eighteenth century, it became an authoritative source of inspiration for a new generation of Ottoman bureaucrat-authors who wrote on the vizierate and government from the sixteenth century onward.

The remarkably long and sophisticated work on the vizierate by Musannifek (d. 1470) titled *Tuhfa al-Wuzarā* (The Gift of Ministers) was written in 1456 and dedicated to Mehmed II's most outstanding grand vizier, Mahmud Paşa (d. 1474). This work stands as a testament to the rising profile of grand viziers and the institution of the vizierate in the Ottoman empire.³⁷ Musannifek was already a prolific scholar in Herat before he moved to Konya in 1436, where he taught at a madrasa and trained a number of high-profile students including Mahmud Paşa's protégé, the grand vizier Karamani Mehmed Paşa (d. 1481).³⁸ As a mystic affiliated with the Zayniyya order and an accomplished scholar on con-

ventional disciplines of Islamic learning, Musannifek's lifelong pursuit was to reconcile Sufism with theology and jurisprudence while adopting a less accommodating attitude towards philosophy. He later joined the Ottoman court at the request of Mahmud Paşa and composed two short treatises on rulership before writing *Tuhfa al-Wuzarā*.³⁹ These texts, one on the vizierate and the other on the sultanate, are formulaic summaries of political wisdom written in a textbook style for reference or memorization. Organized in ten chapters, *Tuhfa al-Wuzarā* is a moral treatise written from a distinctly Sufistic perspective, stressing the position and significance of the vizier in government but not its institutional aspects. Musannifek situates the vizierate within the broader framework of Sufi cosmology, where he defines the sultan as God's caliph and the vizier as the sultan's caliph.⁴⁰

Another canon of Persian mirrors from the eleventh century is Ghazali's *al-Tibr al-Masbūk*, better known simply as *Naṣiḥa al-Mulūk*. The inventory lists six copies of this work under three titles: three as *Naṣiḥa al-Mulūk*, two as *Siyar al-Mulūk*, and one as *Tuhfa al-Mulūk*.⁴¹ The actual number of copies may be higher, however, because there are about a dozen other works with these titles listed without an author. Ghazali's work is less focused on government per se than on the Sunni creed of the ruler and his morality. Written at a time when the executive leadership of the caliphate had passed to the Seljuks, Ghazali seems more concerned with countering the spread of the Isma'ili faith than with principles of good government. *Al-Tibr al-Masbūk* consists of two parts; the first on creed, and the second on good governance, with a focus on justice illustrated by anecdotes. Although composed in Persian, its Arabic translation quickly turned into a manual of faith and governance across the post-Abbasid dynasties. Later, the work was translated back into Persian. Its first part was translated and reworked by the Ottoman scholar Amasi in a book titled *Mir'ātu'l-Mulūk*, which he dedicated to Mehmed I in the early fifteenth century.⁴² As the many references, reworkings, and abridgements of *al-Tibr al-Masbūk* show, the Arabic version became increasingly popular among the Ottoman ruling elite. Although we do not know whether another translation of the work was undertaken before or during the reign of Bayezid II, later

Ottoman scholars rediscovered *al-Tibr al-Masbūk* in the context of the Ottoman-Safavid rivalry in the sixteenth century, during which at least three different translations into Turkish were made.⁴³ The Ottoman infatuation with this text never faded, as indicated by many later translations.⁴⁴

Added to Bayezid's collection on ethics and politics are two well-known texts composed by authors from the West of the Mediterranean: al-Turtushi's (d. 1126) *Sirāj al-Mulūk* (The Lamp of Kings) and Ibn Zafar's (d. 1169) *Sulwān al-Muṭā'fi 'Udwan al-Atba'* (Consolation for the Ruler during the Hostility of Subjects). The Andalusian scholar Turtushi's *Sirāj al-Mulūk* had long served as a master text of political thought before entering the Ottoman intellectual milieu with four copies listed in Bayezid's library, two under *taṣawwuf* and two under *tawārīkh*.⁴⁵ Reflecting the text's canonical status, Taşköprülüzade cites it in his *Miftāḥ al-Sa'āda* as one of two works on "the science of manners of rulership" (*'ilm ādāb al-mulūk*) along with Ibn Zafar's *Sulwān al-Muṭā'*.⁴⁶ Turtushi composed *Sirāj al-Mulūk* in Egypt in 1122 and dedicated it to the vizier Ibn al-Bata'ihī.⁴⁷ This work is an anecdotal narrative highlighting principles of government taken from various strands of Islamic thought, from jurisprudence to philosophy. It was later translated by Vusuli for the Ottoman sultan Selim II as *Şems-i Hidāyet* (Sun of Guidance) in 1584.⁴⁸ Apart from the wide circulation of the work in Arabic, Turkish, and Persian, *Sirāj al-Mulūk* served as a source text from which numerous other authors derived stories to illustrate political ideas. As for Turtushi's student Ibn Zafer, the inventory lists three copies of his work, two under *taṣawwuf* and one under *tawārīkh*, with a slightly different title.⁴⁹ Born in Sicily under Norman rule, Ibn Zafar is better known as a philologist who had an adventurous life around the Mediterranean. With clear influences from Turtushi's *Sirāj al-Mulūk*, Ibn Zafar composed his work in Sicily in 1159 and dedicated it to his patron and friend, Amir al-Qureshi. The book was later rendered into verse and was translated into Persian in the fourteenth century.⁵⁰ The work was spared the translation frenzy of the sixteenth century and was only rendered into Turkish in the nineteenth century. Unlike many other mirrors, this one was specifically written for a prince under intense political and social pressure, which

makes it particularly suitable to the reign of Bayezid, who was facing similar challenges at the time.⁵¹

PHILOSOPHY

In political and ethical philosophy, Bayezid's library features works from a wide range of traditions, including Greek, Arabic, Persian, and Indian. A cursory look reveals that the *ishrāqī* (illuminationist) strain of Islamic political philosophy is better represented than the *mashshai* (peripatetic) school. Among the notable works, two by Plato are listed: *al-Ādāb al-Mulūkiyya wa-al-Akhlāq* (The Manners of Kingship and Ethics) under *taṣawwuf*, and *al-Siyāsa al-Madaniyya* (Government of Cities) under *hikma*. Both are indicated as being collections of the philosopher's dialogues.⁵² Considering the classification of these works, we can only surmise that the former may include Plato's *Politicós*, while the latter may contain his *Politeia*, which Hunayn b. Ishaq translated as *Kitāb al-Siyāsa* (The Book of Rulership).⁵³ In the same tradition, the inventory lists four texts by Farabi under *taṣawwuf*, all generically titled *al-Akhlāq wa-al-Taṣawwuf* (Ethics and Sufism). This could refer to any one (or a compilation) of the many works Farabi (d. 950) authored on politics and ethics. It is equally difficult to identify the four similar titles that are listed without an author. Two copies of *Taqwīm al-Siyāsa al-Mulūk* are listed under *taṣawwuf*.⁵⁴ In various manuscript collections, *Taqwīm* is recorded as being a compilation of the works of Plato by Farabi. So are the other four similar titles of *al-Ādāb al-Mulūkiyya wa-al-Akhlāq al-Ikhtiyāriyya* that are listed under *taṣawwuf* in the inventory.⁵⁵ Whether or not they were compiled by Farabi, these texts are pseudo-Platonic.⁵⁶ A manuscript copied in 863 (1459) and now preserved in the Köprülü Library in Istanbul is entitled *Taqwīm al-Siyāsa al-Mulūkiyya wa Akhlāq al-Ikhtiyāriyya wa Ma'āsh Tabi'iyya* (Rectification of the Governance of Kings and Voluntary Ethics and Natural Livelihood).⁵⁷ The introduction indicates that the work is a compilation of Plato's treatises by Farabi that concludes with Aristotle's advice to Alexander the Great.

It is no less problematic to identify the eight works that are attributed to Aristotle. Six of these titles

indicate that the work contains Aristotle's advice to Alexander, or Dhu al-Qarnayn, his epithet in Islamic sources.⁵⁸ These texts may well belong to the genre of short apocryphal testaments that are commonly appended to advice books, similar to those attributed to Anushirwan. Although it is unlikely, they could also be copies of Aristotle's *Ethics*, a work known to exist in Arabic, unlike Aristotle's *Politics*. Among the listed works, we can safely identify only one title: *Tarjuma Kitāb al-Siyāsa fī Tadbīr al-Riyāsa al-Ma'rūf bi Sirr al-Asrār* (Translation of the Book of Rulership on Governance titled the Secret of Secrets), which is placed under *tawārīkh*.⁵⁹ *Tarjuma Kitāb Aristatalis li-Hunayn bin Ishaq fī 'Ilm al-Firāsa* (Translation of the Book of Aristotle by Hunayn b. Ishaq on the Science of Physiognomy), listed under *firāsa*, is probably another copy of this work.⁶⁰ This pseudo-Aristotelian text was first penned by Yahya ibn al-Bitriq (d. 815) and underwent various renditions in later centuries.⁶¹ Better known as *Sirr al-Asrār*, the work was one of the most widely circulated and translated texts in all Muslim polities and in Europe alike. It would be surprising if there were only two copies of this wildly popular text in the palace library at a time when occult sciences had become mainstream. In its various renditions, *Sirr al-Asrār* served as a master text for Sufis and occult specialists alike, particularly those closely connected with courtly life. Given the marked interest in occult sciences shown by Bayezid II and his courtiers, we might surmise that many more copies of the work were represented in the inventory under the anonymous titles on *firāsa*. In Ottoman thought, *Sirr al-Asrār* served as a popular source text that compiled political treatises and, beginning with the translation of Ferdi in the sixteenth century, it was translated into Turkish several times.⁶²

Among the more recognizable works on ethics and politics, the library held multiple copies of Ibn Miskawayh's two canonical works on ethics: *Tahdhīb al-Akhlāq* (Purification of Morality) and *Jāwidān Khirad* (Perennial Wisdom). Despite having received as much blame as praise from his contemporaries and from later scholars, Ibn Miskawayh's legacy in the realm of ethical thought is second to none. All four copies of his *Tahdhīb* are listed under *taṣawwuf*.⁶³ The work is generally credited as being the first and, arguably, the most authorita-

tive treatment of ethics as a distinct discipline in the Islamic philosophical tradition. The *Tahdhīb* reconciles not only Platonic and Aristotelian doctrines but also traditions of Islamic morality and the Persianate wisdom. It served as a master text for virtually all major works on ethics that followed, most notably, for those composed by Tuṣi and Davani. Ibn Miskawayh's emphasis on Platonic cardinal virtues for the inculcation of the righteous man as well as his ideas on the mutability of human nature had a lasting impact on all later strains of ethical thought, especially on Sufi-minded authors. Ibn Miskawayh's lesser known work, *Jāwidān Khirad*, which he compiled long after the *Tahdhīb*, was obviously more popular at the Ottoman court, where nine copies existed, all listed by the librarian under *taṣawwuf*.⁶⁴ Ibn Miskawayh, himself a librarian at the Buyid court, composed the work after his extensive quest through the vast philosophical literature to which he had access.⁶⁵ *Jāwidān Khirad* takes its title from the apocryphal text attributed to the legendary Persian ruler Houchang, which is also included in the work.⁶⁶ It is an eclectic compendium of philosophical wisdom from Indian, Persian, Greek, and Islamic sources. 'Atufi does not associate Ibn Miskawayh's name with any of the copies of this work, however, and he specifies only two as being in Persian, and two as being selections from *Jāwidān Khirad*. Although we cannot definitively identify which specific versions of *Jāwidān Khirad* were held in the library, the fact that some copies are mentioned alongside *Tahdhīb* leads us to surmise that most, if not all, of these texts were compiled by Ibn Miskawayh.⁶⁷ The popularity of the text may be partly a result of humanistic endeavors during the reign of Mehmed II, who relentlessly sought to recast the state he inherited in the image of great ancient empires. He thus went to great lengths to collect texts of ancient learning and to support authors who were conversant in them. But apart from the personal interests of this ambitious sultan, texts such as *Jāwidān Khirad* conventionally served as repertoires of wisdom and illustration for any author writing on ethics and government, or any tutor training princes in the art of rulership.

One work that lent Ibn Miskawayh's ethical teachings even greater currency was Nasir al-Din al-Tusi's *Akhlāq-i Nāṣirī*, which offered a broad and authoritative

exposition of the discipline of ethics in language that was more accessible to readers west of the Nile. Bayezid's library lists ten copies of the work, of which seven are specifically labeled as *taşawwuf*.⁶⁸ The inventory attributes one additional title to Tusi, called *Sīra al-Mulūk*, which is listed under *ḥikma* and which may well be just another copy of *Akhlāq-i Nāṣirī*.⁶⁹ Having founded the Maragha School of astronomy under Ilkanid rule, this versatile scholar and his disciples were well known to the Ottomans from the very beginning.⁷⁰ The first textual engagement with Tusi's *Akhlāq* by the Ottomans that we have on record is Amasī's aforementioned Turkish *Mir'āt al-Mulūk*, the second half of which is based entirely on Tusi's text. Whether directly or indirectly, the influence of *Akhlāq-i Nāṣirī* is clearly visible in major Ottoman works on ethics as well.⁷¹ Tursun Beg (d. 1499), a historian during the reign of Bayezid II, used *Akhlāq-i Nāṣirī* in composing the introduction to his chronicle where he summarizes the science of government.⁷² Tusi's synthesis of philosophy, Islamic theology, and Sufism made this text the definitive treatment of politics and ethics in the Persianate world. Dawani's and Kashifi's more distinctly Sufistic rendering of *Akhlāq-i Nāṣirī* made Tusi's text even more appealing to the Ottomans from the sixteenth century onwards. Taşköprülüzade's lengthy commentary on the *Akhlāq* by the fourteenth-century theologian Adud al-Din al-Iji (d. 1355) relies heavily on the work of Tusi.⁷³ The *Akhlāq-i Nāṣirī* is also one of the three major sources for Kınalızade 'Alī's (d. 1572) *Ahlāk-ı 'Alā'ī* (Alaian Ethics), which became the standard Ottoman canon of ethics soon after its composition in 1565.

Besides these classics of ethics and politics, Bayezid's library boasts sixteen copies of Suhrawardi's (d. 1191) controversial *Ḥikma al-Ishrāq* (The Philosophy of Illumination), nine of which are commentaries on this work that one would expect to see in any courtly library in the Ottoman and eastern dynasties. Although there is no indication of the identity of the commentators, two authoritative commentaries were known to the Ottomans: those by Shahrazuri (after 1288) and Qutb al-Din Shirazi (d. 1311), who both produced professional editions of the text and commented extensively on it.⁷⁴ This founding text of the philosophy of illumination is not a work on politics or ethics per se, but it may well be considered as

such because of its coverage of these subjects, and its later impact on Ottoman political thought. Written in the twelfth century, *Ḥikma al-Ishrāq* served as the main inspiration for the mystical conception of the caliphate, which was later infused with more sophistication by Ibn al-'Arabi and his disciples.⁷⁵ Ahmed Bican, for example, used the work in his popular Turkish commentary on the *Fuṣūṣ*. Likewise, Musannifek cited Suhrawardi as one of his sources in his compendium on Sufism, *Ḥal al-Rumūz wa Kashf al-Kunūz* (Solving Mysteries and Discovering Treasures), which he dedicated to Mehmed II, who owned his own copy of *Ḥikma al-Ishrāq*.⁷⁶ Given Bayezid's spiritual inclinations as well as the presence of many Sufi-minded scholars in his court, it appears this text was uniquely suited to the intellectual and political environment of the era. The most noticeable adherent of Suhrawardi's political thought at Bayezid's court was none other than Idris-i Bidlisi (d. 1520). His *Hasht Behisht* (Eight Gardens), a comprehensive history of the Ottoman dynasty from its beginning up to the end of this sultan's reign, interprets history in a way that is markedly illuminationist. Similarly, Bidlisi's later political work, *Qanūn-i Shahenshāhī* (The Law of the King of Kings), also promotes the idea of a mystical caliphate as envisioned by Suhrawardi.

CONCLUSION

Besides reflecting Bayezid II's own inclinations and tastes, as well as the scholarly and literary interests of his entourage, this sultan's library testifies to the political ambitions of a rising empire, as envisioned by his father Mehmed II. The library offers a good collection of works on ethics and politics that were held in high regard among the learned and conveyed the experience of empires from antiquity to the time of the Ottomans, including advice to and testaments of legendary rulers, from Alexander to Anushirwan. Though it certainly built on Mehmed II's book collection, Bayezid II's library shows a clear break with the reading tendencies of the Ottoman court from the first half of the fifteenth century. Although we do not have an inventory for the libraries of Mehmed I and Murad II, we know that much of what they commissioned or received as dedicated

works were Turkish translations of well-known classics on ethics and politics. This practice of reading in Turkish seems to have shifted markedly in favor of reading in Persian during the latter half of the fifteenth century. The influx of learned men from the East and the active acquisition of books meant that the Ottoman court was continuously fed with Persian works, some of which were written by those immigrant or refugee scholars themselves. On the other hand, the sway of Sufism on Ottoman thought appears to have not only continued but further solidified at this time. Sufism mediated among different branches of knowledge in the broader Islamic tradition, but also served to appease its revolutionary currents, such as the Hurufis, by promoting strains of Sufism that fully reconciled esotericism with mainstream theology and jurisprudence. Many Sufistic works on ethics and politics were at the same time works on true faith, such as Ghazali's popular *al-Tibr al-Masbūk*, which as mentioned above is a work that focuses on rectifying the ruler's faith rather than providing guidance on rulership.

The inventory of books on ethics and politics also suggests that the Ottoman court was more closely connected to the Persianate political culture that dominated the successor states to the Abbasids in the East (particularly after the Mongols) than it was to the Mamluk south, where the Arabic language and jurists dominated the literary landscape. The Ottoman ruling elite were better attuned to the artistic and scholarly achievements in the East, as they engaged in a vigorous competition to attract outstanding learned men to their court. The Ottomans succeeded in attracting such luminous scholars as Musannifek, Şükrullah, 'Ali Kushji (d. 1474), and Bidlisi but they failed, for example, in the case of Abdurrahman Jami (d. 1492). The linguistic affinity of Persian and Turkish, and the spread of many Sufi orders with branches in both Ottoman and eastern polities, facilitated the formation of artistic and scholarly networks that included Bayezid II's court.

Finally, the diversity and multiplicity of titles on ethics and politics reflect the growing demand for the education of the ruling elite at the Ottoman court. When the Ottomans were defeated by Timur in 1402, they responded by commissioning the translation of political works, most of which were Persian, into Turkish. This

was followed by Murad II's broader translation project that endeavored to make textbooks in various disciplines available for the inculcation of a new learned class in administration. This process gained momentum under Mehmed II, who had the privilege of receiving an exceptional education thanks to his father's unprecedented patronage of learning. With Mehmed's newly conceived bureaucratic empire and *devshirme*-dominated ruling class, education became more competitive and more specialized, which only increased the significance of libraries, both personal and institutional, including the one in the imperial palace. Although each book that ended up in Bayezid's library has a history of its own, the overall collection must at least partly reflect the scholarly and ideological preferences of the learned men who were attracted to the Ottoman court.

BOOKS ON MEDICINE: MEDICAL KNOWLEDGE AT WORK

At the turn of the sixteenth century, when an otherwise little-known Ottoman scholar, Khayr al-Din Khidr 'Atufi (d. 1541), set out to catalogue some seven thousand titles held in the Ottoman palace collection, he might well have shared the frustration that his Swiss counterpart, Conrad Gesner, would express about a half century later when he complained about a “confusing and harmful abundance of books.”¹ Unlike Gesner, however, 'Atufi was working primarily with non-print, manuscript material; yet both bibliographers evidently shared concerns about how to compile an inventory and how to organize a large number of books. This was no easy feat, not only because there were so many books at hand but also because there was not yet a standard model to follow in cataloguing them. In the absence of an existing convention, 'Atufi had to invent his own system to order and categorize the book titles. We are fortunate to be able to observe the way he responded to this challenge, since his categorization sheds light on how knowledge was classified, organized, and used at the time. Hence, 'Atufi's inventory is a remarkable source for studying Ottoman intellectual history, the classification of sciences and knowledge, and the history of the book and libraries at the turn of the sixteenth century.

While Gesner's famed *Bibliotheca universalis* granted him recognition as the “father of bibliography” in the modern history of bibliography,² 'Atufi's *Defter-i kütüb* (Register of Books) remained unknown for a long time. The recently discovered single-copy manuscript of the inventory (MS Török F. 59), completed in 909 (1503–4), documents one of the largest book collections in the early modern world. The present essay focuses on the section of the inventory devoted to medical books. Listing nearly four hundred titles in medicine and allied

sciences, this section offers a unique lens on the production, organization, and consumption of medical knowledge.

Moreover, the medical section has a special significance within the inventory. Constituting nearly six percent of the total volume of the 365-page inventory, this is one of the longest sections, apart from the religious sciences. The medical collection may have been of particular interest to 'Atufi. Even though we have limited information about his career before he came to the Ottoman court, his name is mentioned as one of the physicians who was trained in the hospital (*darüşşifa*) of Amasya. In an article published in 1935, the Turkish medical historian Süheyl Ünver mentions a physician by the name of 'Atufi from Merzifon who appears to be our bibliographer.³ If 'Atufi was trained in medicine, then it should come as no surprise that he possessed familiarity with and interest in the subject. 'Atufi lists three medical titles that he authored: two on prophetic medicine (a genre that includes recommendations on hygiene, diet, and treatment based on the hadith) and one on preventive medicine, which were bound together in a single volume (151 {14–17}); another copy of the latter work is also listed separately (166 {10}) in this section of the inventory.⁴

This was a time when medical books enjoyed sultanic patronage. 'Atufi's patron, Sultan Bayezid II (r. 1481–1512), personally commissioned a number of medical titles. The Turkish historian of science Ekmeleddin İhsanoğlu has observed that the number of medical works dedicated to Bayezid II was much higher than those offered to any other individual in early modern Ottoman history, including other Ottoman sultans and elite patrons of intellectual life. Whereas seventeen

medical titles were dedicated to Bayezid II, seven were dedicated to his father Mehmed II (r. 1451–81); six to Selim I (r. 1512–20); five to Selim II (r. 1566–74); and only three to Süleyman (r. 1520–66).⁵ Hence, both the patron and the cataloguer seem to have maintained a special interest in medical books, which further underscores the importance of this section.

Indeed, a close investigation of this section of the inventory promises invaluable insights into little-known aspects of Ottoman medical knowledge and its uses. In particular, the multiple medical titles that are bound together in single volumes deserve attention. For instance, in some cases one finds a title on medical poetry placed in a volume with a treatise on fevers. Investigating why seemingly disparate medical genres were bound together into single volumes helps us to understand the pedagogical and practical purposes that lie behind the organization of these volumes, and their most likely use in medical education. In addition, identifying which books were checked out from this collection, who borrowed them, and which books were borrowed together could also shed light on the uses of medical knowledge. As a matter of fact, documents from the Topkapı Palace Museum Archives provide further information regarding the readership of medical books. Thus, it is possible to trace the circulation of some medical texts among the Ottoman learned circles and to reflect on their possible influence on the broader profession and scholarship of medicine.

This takes us to the larger question of how the inventory and the book collection should be situated within the history of Ottoman medical knowledge. If the medical works mentioned in the inventory served the Ottoman scholarly community in some way, this gives us yet another reason to study it carefully. These titles may have been studied in Ottoman madrasas, and books from this collection that were borrowed, circulated, copied, and commented on would have informed scholars and their disciples. Hence, this core collection may well have influenced the education, curriculum, research, writing, and practice of medicine. With this in view, we might reflect on the role of the book collection, not only as *canonical* but also as *canonizing* for the history of Ottoman medical knowledge. To clarify, the medical collection recorded in the inventory encapsu-

lates the medical canon of the classical Greco-Islamic tradition, as well as the newly emerging works of the late medieval era that mostly consist of commentaries on earlier works. However, an “Ottoman” medical canon, based on earlier ones but expanded and adapted, probably did not take form until at least the end of the sixteenth century. Even though it is difficult to identify precisely when a canon emerged in Ottoman medicine, the significant number of relevant works composed, translated, and commented on by Ottoman authors starting in the second half of the sixteenth century must have eventually contributed to its formation.

This essay will put forward some preliminary observations and insights on the section on medical books. I shall first highlight some general features of the material, then share observations about the nature and organization of what is included in the list, and finally I will address some questions regarding the significance of the collection for the production and consumption of medical knowledge in Ottoman learned circles. My goal here is not to offer an exhaustive discussion of every title in the inventory; such an effort would lie beyond the scope of this essay. Neither do I intend to trace the origins and pedigree of individual titles and explore how they came to be part of this collection. Rather, my intention here is to introduce this source, offer an overview of its content, structure, and organization, and comment on its significance within the learned medical traditions in early modern Ottoman society. Ultimately, my hope is to draw attention to the inventory and underline its importance as a noteworthy source for the history of Ottoman medicine.

OVERVIEW

Within the larger inventory, the medical section comes just after books on Islamic religious sciences (*Qurʾān*, *tafsīr*, *ḥadīth*, *kalām*, *fiqh*, *taṣawwuf*) and before the sections on biography, history, and the literature on wonders. The system followed here thus appears to represent a rather sharp departure from preceding and contemporary Arabic and Persian classifications of sciences (sing. *tasnīf al-ʿulūm*), in that it lists medicine (and agriculture) in the midst of the traditional (*naqlī*) sciences

rather than among the rational (*‘aqlī*) sciences.⁶ By virtue of the section's length (i.e., the size of the book collection to which it corresponds) and its unusual place in the inventory (i.e., separated from the natural and mathematical sciences), this section seems to reflect a prestigious and lively area of intellectual activity when ‘Atufi compiled the inventory.

The medical section spans eleven folios (twenty-two pages) in the manuscript, with some blank spaces scattered throughout the text.⁷ It lists 319 bound volumes and at least 380 titles (some titles are simply noted as “other treatises”). In addition, there are seventeen medical titles that appear in other sections of the register. In total, the list includes 397 different medical titles contained in 340 bound volumes. The overwhelming majority of titles in this section is written in Arabic—the lingua franca of medicine in the Islamicate world in the medieval and early modern eras. There are eighteen titles in Persian, and five in Turkish. Only works written in Persian and Turkish are specified as such.

The section of the inventory on medicine and allied sciences includes a wide variety of genres and types of books, ranging from multi-volume medical encyclopedias to medical monographs, and from treatises to multi-title collections of works bound together. Among them, some are original works; others are translations, summaries, commentaries, and supercommentaries. The title of each book and the name of the author is specified for the majority of works. Autograph copies are also clearly marked. There are, however, a number of entries that do not mention the name of an author or a title. In such cases, what one finds instead is simply a general remark about the subject of the work.

This section of the inventory is loosely organized around subject matter. It starts with medical works, and is followed by works in related fields, such as toxicology, zoology, physiognomy, cosmetics, as well as sex manuals. In addition, it lists a small number of works on geomancy, logic, mathematics, engineering, astronomy and astrology, alchemy, mineralogy, botany, and agriculture, at the very end of the section.⁸ The medical works cover a broad spectrum of areas, ranging from prophetic medicine to medical therapeutics, pharmaceuticals, works on dietetics and regimen, medical poetry, and medical monographs devoted to specific subjects (e.g., diagnos-

tics, anatomy, surgery, gynecology and obstetrics, cardiology, and ophthalmology). Among the medical treatises that focus on specific subjects, there are works on fevers, pulse, colic, urine, joint pains, incisions, venesection (phlebotomy), gout, leontiasis, and plague.

The inventory contains numerous principal texts of medieval Islamicate medicine. These include translations of Greek medical works and commentaries written on them. Works by Hippocrates (d. ca. 370 BCE), Dioscorides (d. ca. 90 CE), and Galen (d. ca. 216 CE) figure prominently. A large majority of these titles are translations of Galen's works and commentaries written on them. Considering the powerful influence of Galen on medieval Islamicate medicine (which was far greater than any other author of antiquity and the late antique era), this is hardly surprising.⁹ In several instances, ‘Atufi attributes translations to the famed translator Hunayn ibn Ishaq (d. 873). Among the most frequently recurring authors of medieval Islamicate medical texts in the inventory are, first and foremost, Ibn Sina (d. 1037), al-Razi (d. 925), Ibn al-Nafis (d. 1288), Najm al-Din al-Shirazi (d. 1330), Najib al-Din Samarqandi (d. 1222), al-Zahrawi (d. 1013), Ibn Butlan (d. 1066), Ibn al-Baytar (d. 1248), and Zayn al-Din al-Jurjani (d. 1136).

The most important medieval Islamicate reference works listed in the inventory are medical compendia, such as Ibn Sina's *Kitāb al-Qānūn fī al-ṭibb* (Canon of Medicine), al-Razi's *Kitāb al-Hāwī fī al-ṭibb* (The Comprehensive Book on Medicine), Ibn al-Nafis's *Kitāb Mūjaz fī al-ṭibb* (The Epitome of Medicine), al-Majusi's *Kitāb Kāmil al-ṣinā‘a al-ṭibbiyya* (The Complete Book of the Medical Art), to name a few. Also listed in the inventory is a significant number of commentaries (approximately forty titles, or one tenth of the collection) written on medical compendia. In addition, the inventory includes lexicons of medical terminology as well as biographical dictionaries related to medicine. Since the inventory lists the fundamental works of medieval Islamicate medicine and medical education, one can expect to find a number of these titles in any comprehensive medical book collection. Among them are many works that have been copied numerous times over centuries across the Islamicate world.

Although the inventory consists largely of medieval Islamicate medical texts, it includes a small number of

works produced by contemporary Rumi authors from Ottoman Anatolia and the Balkans. Among these are works written by 'Atufi himself, as well as by Jamal al-Din al-Aqsarayi (Cemaleddin Aksarayi) (d. ca. 1388), Jalal al-Din Khidr bin 'Ali (Hacı Paşa) (d. ca. 1425), al-Fanari (Molla Fenari) (d. 1431), 'Ali al-Qushji (Ali Kuşçu) (d. 1474), and Mawlana Ahi Chalabi (Ahi Çelebi) (d. 1523).¹⁰ The inventory also includes a copy of the *Jarrāḥiyya al-khāniyya* (Royal Book of Surgery) by Şerafeddin Sabuncuoğlu (d. 1468), without mentioning the name of its author. It is significant that the inventory incorporates select examples of commentaries that represent an important paradigmatic transition in late medieval Islamic medicine, in particular, a critique of Galenic cardiovascular anatomy, as discussed in the works of Ibn al-Nafis and his commentators.¹¹ In order to better understand the significance of medical books among the Ottoman learned circles at the turn of the sixteenth century, we now turn to take a closer look at the collection itself.

THE COLLECTION

Despite the large number of medical titles in the inventory, 'Atufi follows a straightforward organization. He starts the section by listing works produced by contemporary Rumi authors, including the three titles of his own mentioned above. Here we find the names of such authors as al-Fanari, 'Ali al-Qushji, and Jalal al-Din Khidr bin 'Ali, known as Hacı Paşa, who has three titles listed: *Kitāb al-Shifā' al-asqām wa-dawā' al-ālām* (The Cure of Illnesses and Remedy of Maladies, 152 {7}), *Kitāb al-Ta'lim fī 'ilm al-ṭibb* (Teaching in the Science of Medicine, 152 {9}), and *Kitāb al-Farīda fī dhikr al-aghdhīya* (Peerless Discourse on Dietary Treatments, 152 {9–10}). Possibly a fourth work by Hacı Paşa, *Kitāb al-Tashīl fī al-ṭibb* (Facilitation of Medicine; in Turkish), is listed (165 {8–9}) without attribution to him.¹² It is not entirely clear why 'Atufi positioned the works of Rumi authors at the top of his list; perhaps it was to give these works more visibility. It is also possible that it is because these works were consulted more frequently in the palace.

Following this Rumi group, the inventory lists fundamental reference works of medieval Islamic medicine. Covering about nine pages, these core texts constitute nearly half of this section of the inventory, which testifies to the central role they played in late medieval and early modern medical knowledge. Here we find medical encyclopedias, listed either as complete sets or as individual volumes, along with several copies of their translations, abridgments, commentaries, and supercommentaries. After the period of translations of Greek medical works into Arabic in the ninth century, Islamicate scholars started to produce comprehensive medical works that followed a very systematic organization. The most renowned examples of these "great systematizers" are well represented in the inventory.¹³ Among them, we find *Kitāb al-Ḥawī fī al-ṭibb* by Abu Bakr Muhammad ibn Zakariya' al-Razi (d. 925); *Kitāb al-Qānūn fī al-ṭibb*, the magnum opus of Abu 'Ali al-Husayn ibn 'Abdallah Ibn Sina (d. 1037); *Zakhīra-i Khwārazm-shāhī* (The Treasure of the Shah of Khwārazm) by Zayn al-Din al-Jurjani (d. 1136); and *Kitāb Kāmīl al-ṣinā'a al-ṭibbiyya* by 'Ali ibn al-'Abbas al-Majusi (d. ca. 994). Perhaps most importantly, because of their widespread use, we find several copies of Ibn al-Nafis's commentaries on Ibn Sina's *Qānūn*, as well as his famous *Kitāb al-mūjaz fī al-ṭibb*—the most widely read of all abridgments of the *Qānūn*. The *Mūjaz* (or *Mūjiz*) was so popular in its own right that several copies are listed here along with a Persian translation and al-Aqsarayi's commentary in Arabic. Scattered between these titles, but not necessarily in a systematic order, one finds translations of works by ancient Greek authors, predominantly Galen and Hippocrates.

This section is followed by medical miscellanea, comprising a wide array of topics and genres ranging from lexicons to biographical dictionaries of physicians, from works on preventive medicine to treatises on specialized topics, such as on coition (*al-bāh*), fevers, diagnostics, pulse, physiognomy, zoology, geomancy, occult sciences, and alchemy. Also included are treatises devoted to special diseases or ailments, such as gout, joint pains, leontiasis, and plague. Medical titles in Persian and Turkish, including the works of other Rumi authors, appear in different parts of this section, though not all names are properly cited. The inventory then moves on

to list works of *materia medica* and medical formularies. Among notable examples, we find works by Dioscorides (d. 90), al-Kindi (d. ca. 873), and Ibn al-Baytar (d. 1248). Closing the section are titles devoted to the study of animals (zoology), food, gemstones, poisons and dangerous odors, and agriculture. Titles in zoology, botany, and dietetics and regimen, as well as those on poisons, antidotes, and minerals are typically classified as part of the medical corpus. A handful of works on agriculture and husbandry appear at the very end of the section, with generic titles (*Kitāb al-filāḥa*), which makes it difficult to identify them.¹⁴

We know that the inventory corresponds to a physical reality, i.e., the 340 medical volumes that were kept in the Ottoman palace library. But what did it mean to have a collection of 340 medical volumes? How can one assess the size and significance of the collection? Was this an overwhelmingly large number of medical books, as I have claimed above? Even though it is difficult to answer these questions, one can still comment on the size of the medical collection under question by comparing it to other collections. The first point of comparison is a list of 65 books checked out in the 1570s by the chief physician of the Topkapı Palace, where the library was located. As will be discussed in greater detail below, these books seem to have remained in the possession of the chief physician until his retirement, whereupon they were handed over to his successor. If these books were kept by the chief physician throughout his tenure in the office, it seems they served as his library, which may have been supplemented by his own books as well as others he might have checked out from the few available lending libraries. Assuming the library of the chief physician can be considered a core collection that met the needs of a top-ranking Ottoman physician, then the total size of the medical collection recorded by 'Atufi, which is about five times larger, does not appear to be exceptionally large. However, the collection used by the chief physician, by virtue of his having access to the book collection of the palace, was probably not representative of other physicians' private libraries. Presumably, most other Ottoman physicians did not enjoy such privileges; hence, comparing the overall size of the collection of medical works as represented in the inven-

tory to individual physicians' libraries might offer a better comparison.

This takes us to the question of how many medical books a typical Ottoman physician might have owned in this period. Even though we do not have a precise answer to that question, the probate records of individual physicians (and non-physician book collectors) offer some information. For example, the probate inventory of the physician Taceddin bin Yahya from Bursa (dated 1467) lists only four medical books (more on these titles below), as part of his library of 31 volumes.¹⁵ Another private library from the late fifteenth century was the 210-volume collection that belonged to Hacı Muslihiddin, a storyteller and entertainer in the court of Bayezid II. Despite his sizeable collection for that era, Muslihiddin owned only nine books on medicine.¹⁶ Given that the collector was not a physician, this number might still be considered significant for the late fifteenth century, since an eighteenth-century Ottoman bibliophile, Carullah Efendi, owned only six medical titles in his private collection of about 3,500 books.¹⁷

The small number of medical books owned by individuals—physician or not—might reflect the limited number of medical books in circulation in the Ottoman market in general. A study of probate records from sixteenth-century Bursa shows that, of the 2,098 books mentioned in these records, only 58 were on medicine, which is less than three percent of the total compared to the six percent represented in our inventory. Of the books circulating in Bursa, many more were devoted to Islamic religious sciences, ethics, and language and literature.¹⁸ It is helpful to keep in mind that most private libraries in early modern Istanbul had a relatively small number of medical books, with only very few possessing more than 100 medical titles.¹⁹ The relatively low number of medical books circulating outside the court stands in stark contrast with the holdings of the palace library, which further underscores the critical importance of Bayezid II's collection.

In addition to considering the size of the collection, studying its contents affords important insights. It is helpful to note that titles appearing in multiple copies in the inventory were evidently considered essential to medical knowledge. For example, Ibn al-Nafis's *Mūjaz* and its commentaries, represented in the inventory with

multiple copies, seem to have been widely circulated titles in Ottoman learned circles. Evidence that these titles were staples of a typical physician's personal library is also supported by probate inventories. For example, the aforementioned physician Taceddin bin Yahya from Bursa owned a commentary of Ibn al-Nafis's *Mūjaz*, along with another abridged version of Ibn Sina's *Qānūn*, and Ibn al-Baytar's famous *materia medica*, known as *al-Mughnī*.²⁰ A study of medical books that circulated in sixteenth-century Bursa suggests four titles as staples of medical knowledge: Ibn Sina's *Qānūn*, Ibn al-Nafis's *Mūjaz*, Ibn al-Baytar's *Mufradāt*, and Hacı Paşa's *Tashīl fī al-tibb*.²¹ The fact that these books appear more commonly than any other medical title might suggest that they were used for purposes of medical education, training, and as reference books.

Despite its strengths, the collection is underdeveloped in some areas. Specifically, there are only a few medical books in vernacular Turkish. Several works of the medical corpus that were composed, translated, compiled, or commented on by Rumi authors of the fourteenth and fifteenth centuries are missing from this collection. For example, one would expect to find works by such Rumi authors as Geredeli İshak bin Murad, İbn Şerif, and 'Abdülvehhab el-Mardani, which are not mentioned in the inventory.²² Rumi vernacular medical works were informed by the classical Greco-Islamic corpus but also incorporated important observations drawn from local health problems, illnesses endemic to Anatolia and surroundings, as well as methods of treatment most suited to the "humors" of the locals.²³ The vernacularization of medical knowledge, a process that begins to appear in these early works, would mature in the later sixteenth century. At that time, Ottoman medical authors thoroughly questioned the efficacy of medical treatments and substances recommended in the classical Greco-Islamic corpus, which was composed in geographical and climatic conditions far removed from the Ottoman lands and thus reflected the particularities of other regions.²⁴ Equally absent from the inventory is medical literature composed in Europe; except for one title recorded as "belonging to Christian medicine" (163 {19}), there is no trace of Latin or European vernacular texts.

THE MAKING OF THE INVENTORY

As a historical artifact, the inventory can offer us insights beyond simply indicating which medical books were held in the Ottoman palace collection. At first glance, it is easy to mistake this document for a still image of the Ottoman intellectual landscape at the turn of the sixteenth century. In fact, considering the inventory simply as a collection of book titles does great injustice to the important source we have at hand. A close investigation reveals that it can be read as an exercise of categorization, classification, and organization of knowledge. Studying how 'Atufi made certain decisions in preparing the inventory, how he arranged both the collection and the corresponding list, and what changes he adopted reveals signs of an organic and experimental growth.

There is good reason to believe that 'Atufi had a certain level of familiarity with medieval Islamicate medical literature and very likely possessed a working knowledge of organizing books in this field on the basis of subject matter. It is clear that he followed some basic rules of organization, which were loosely based on the importance of the books and their hierarchical arrangement in accordance with their reputation. Yet each section in itself occasionally reveals signs of disorder, or surprises to the modern reader. Even though the cataloguer followed the convention of arranging different disciplines according to a hierarchy, we can also observe a balance between classification according to subject matter and classification based on other factors, such as the familiarity of books, as well as their value, size, use, and the like. For instance, as I have suggested above, the medical section starts with a short selection of books that are not "classic" titles of Islamicate medicine, but rather are vernacular medical works produced by Rumi authors of the fourteenth and fifteenth centuries, among which are listed works by 'Atufi himself. Did 'Atufi organize the inventory in this way because he considered himself to belong to a new era of intellectual blossoming, which was distinct from the way of thinking represented in the medieval Islamicate medical corpus? Did he want to promote his own works (and the works of others with whom he associated himself) to make them more visible, prominent, and worthy of attention? Or is it possible that those vernacular medical works—

perhaps believed to encapsulate vernacular knowledge on illnesses as well as their treatment—were consulted more often than other titles in the collection? It is difficult to answer these questions on the basis of the inventory alone.

This leads us to question whether there may have been other factors that contributed to ‘Atufi’s decisions in arranging the titles in the inventory. For example, the physical reality of the books may have played a role. Is it possible that larger books were placed first on the horizontally stacked shelves, which might have factored into the arrangement of the list? The exact physical arrangement of the books, however, is no longer accessible to us. What we have at hand is only a list, which does not preserve the knowledge that was accessible and comprehensible to our bibliographer at the time he compiled this inventory. It is not entirely implausible that the physical reality of the books themselves and the reality of the physical space in which they were kept also shaped ‘Atufi’s decisions in preparing the inventory.²⁵ Needless to say, without knowledge of the physical aspects of the books and the physical space of the library, some of these suggestions remain impossible to confirm.

Notwithstanding these considerations on the rationale behind the organization and structure of the inventory, we may need to reconsider the purpose for which it was prepared. Given modern notions of cataloguing that privilege access to books in library collections, it is tempting to assume that ‘Atufi’s primary motivation was likewise to facilitate access to the books. While it appears that the inventory documented the physical layout of the books in the collection, more information is needed to confirm whether the books were arranged in a manner that facilitated finding and retrieving them.

‘Atufi was clearly concerned with issues of classification and taxonomy of the books according to subject, along with matters of readership, ease of locating the books, their use, as well as their size and importance. Especially worthy of note in this context are the occasional blank spaces left in the text between different categories of genres, perhaps because our bibliographer predicted that more books would be added to the collection in these sections through future acquisitions. This might also be indicative of the collection’s growth

while the inventory was under preparation, or the possibility that other copies of the same title might be discovered in bound volumes that had not yet been catalogued. Likewise, for popular titles, ‘Atufi lists different copies one after the other, but cautiously leaves room for more copies. For example, early in the inventory, he lists four copies of the aforementioned *Zakhīra-i Khwārazm-shāhī* (152 {1–3}) by Zayn al-Din al-Jurjani, a renowned eleventh-century Persian medical encyclopedia, which is followed by some blank spaces (152 {3–6}), presumably in case more copies of the same work might be added later on.

‘Atufi took care to produce an inventory that was as accurate as possible. He generally recorded books with full titles and the name of the author. This was a particularly strenuous task as far as bound volumes containing multiple titles were concerned. ‘Atufi’s inventory clearly suggests that he had seen each individual volume and perused them one by one during the process of preparing his list. Accuracy seems to have been particularly important for ‘Atufi’s purposes, considering that only generic book titles are typically provided in such collections as probate inventories. In the absence of clearly identifiable author names or full book titles, it is impossible to identify individual items. In the case of a small number of titles, ‘Atufi does not list full titles or author names; we might assume that these titles were deemed by ‘Atufi to be of ephemeral value and importance.

It is helpful to consider the problems faced by the librarian in the classification process. The attempt to adhere to a strict categorization based on subject was often complicated by bound volumes containing multiple titles. Because those volumes could include titles on different subjects, ‘Atufi had to employ other organizational criteria. In such cases, it appears he relied more heavily on the use and readership of the volumes, rather than their subject, assessing how books were read (especially in conjunction with each other) as well as their practical and pedagogical value. His method of organization is evident in the way he clustered works of certain genres and how he placed them in relevant sections of the inventory. An example is a group of books on veterinary medicine (a genre generally known as *farasnāma* or *bayṭarnāma*), hunting manuals (*bāznāma*,

which sometimes include discussions of animal diseases, care, and treatment), and books on dogs (*sagnāma*), which is placed not among the medical books but in the following section, with books on biography and history. Yet the medical section does include copies of a lexicon of zoology as well as bestiaries. One might speculate that this organizational decision was motivated by use and readership: 'Atufi knew that hunting manuals and books on veterinary medicine were considered part of the "art of governance" and were consulted as such.²⁶ Such interventions by our bibliographer speak to his insight on the consumption of knowledge, which might give us more information concerning the circulation of books, their uses, and influences.

MEDICAL KNOWLEDGE AT WORK: CIRCULATION, USE, AND INFLUENCE

As for the use of books, there is some evidence regarding the circulation of these titles both within the palace and beyond it. The register notes that seven medical titles were requested from the collection. Although this is a small number of books, they appear to have served a practical purpose in times of need. At least two documents from the Topkapı Palace Museum Archives demonstrate that medical books could be requested from the Inner Treasury where the library was kept, and that they could be checked out to chief physician. The first document indicates that sixty-five volumes were checked out to the chief physician (*Hekimbaşı*) Molla Kasım in 1575–76, and records a detailed list of the book titles.²⁷ The same document also suggests that after Molla Kasım retired from his post, the books were handed over to the new chief physician, İsa Çelebi, in September 1580, which implies that the books remained "checked out" for five years. The second document, undated, "recalls" the medical books that were still in the possession of İsa Çelebi. Even though it does not list the titles of the books requested, it refers to the "books mentioned," which may be a reference to the books previously transferred to İsa Çelebi. The document implies that the books kept by the latter were "overdue" (*te'hîre konulmuş imiş*). Even though it is not clear where the books were supposed to be returned, this document in-

dicates that the books could be "recalled" even years later, when they were needed.²⁸

On the basis of this limited evidence, it may be observed that the borrowing of books was not entirely exceptional, although it is not easy to determine whether the books were sent outside the palace. The first document clearly notes that the books were handed over (*teslīm olunan*) to the chief physician.²⁹ However, the second document indicates that the books are to be "sent over" (*irsāl buyurasız*), which might suggest sending them outside the palace. It is difficult to establish the identity of these physicians; neither Molla Kasım nor İsa Çelebi are named as chief physician of the Ottoman court in other documents. The historian Ali Haydar Bayat expresses doubt as to whether either Molla Kasım or İsa Çelebi ever served in that capacity. He suggests instead that they might have served as chief physicians in a hospital (*darüüşşifa*).³⁰ While this is possible, it should be kept in mind that appointments as court physicians and to similar posts at a hospital were quite fluid.³¹ In fact, some evidence from archival records helps to establish the early career of İsa Çelebi, whose appointments demonstrate the fluidity between posts in the court and those in the hospitals during the second half of the sixteenth century.³² In either case, without establishing the identity of the individuals involved and their location, it is difficult to speculate further about the nature of these book transactions.

Whether within the palace or outside it, medical books presumably circulated among a rather limited circle of people. Eighteenth-century evidence from Carullah Efendi's library, however, indicates that the small number of medical books he owned changed hands several times, before and after his ownership.³³ This might suggest that medical titles served a greater number of readers than previously believed. Hence, these books may have had some reception beyond the readership of their original owners, even if they were not nearly as popular to be read aloud as other genres, such as entertaining storybooks.³⁴ A careful examination of surviving copies of medical books listed in the inventory and those bearing the seal of Bayezid II might offer further evidence concerning the afterlife of the books, how they changed hands, who read them, and how their readers responded to them. Hence, further research is needed

to elaborate on the role of this medical collection in the history of Ottoman medical knowledge.

NOTES

Author's note: I followed modern Turkish spelling for names of authors who lived in Turkish-speaking areas, except for those mentioned in MS Török F. 59, which are given between parentheses.

1. Conrad Gesner, *Bibliotheca universalis* (Zurich, 1545), sig. *3v, quoted in Ann Blair, "Reading Strategies for Coping with Information Overload ca. 1550–1700," *Journal of the History of Ideas* 64, no. 1 (2003): 11–28, at 11.
2. The first to use the epithet "father of bibliography" for Gesner was probably the Danish-American librarian and bibliographer Jens Christian Bay in the early twentieth century. See Jens Christian Bay, "Conrad Gesner (1516–1565): The Father of Bibliography: An Appreciation," *Papers of the Bibliographical Society of America* 10 (1916): 53–88; Hans H. Wellisch, "Conrad Gessner: A Bio-Bibliography," *Journal of the Society for the Bibliography of Natural History* 7, no. 2 (1975): 151–247.
3. A. Sühely Ünver, "Amasya Darüşşifası 1308," *Tedavi Kliniği ve Laboratuvarı Dergisi* (1935): 29–34, at 32. Even though Ünver gives 'Atufi's date of death as 1561, this must be a mistake. There is good reason to believe this is the same person. 'Atufi was from Merzifon and he studied with scholars in Amasya in his youth. He may have worked in the Amasya hospital before he received an appointment in the court of Bayezid II. There may be other corroborating evidence to support 'Atufi's connections to Amasya. It is possible that he acquired a copy of Şerafeddin Sabuncuoğlu's *Jarrāhiyya al-khāniyya* (Royal Book of Surgery) for the Ottoman palace library—a title that is listed in the inventory (see below); one of the three extant copies of the manuscript carries the seal of Bayezid II.
4. 'Atufi was the author of two other medical works that are not listed in the inventory. One is *Aqrabādhīn* (Medical Formulary), the other, *Kitāb al-ūṭās fī al-naḥl li-jamī' al-nās* (Book on Sneezing for the Benefit of the People), both in Turkish. For these titles, see Ekmeleddin İhsanoğlu et al., eds., *Osmanlı Tıbbi Bilimler Literatürü Tarihi* (History of the Literature of Medical Sciences during the Ottoman Period), 4 vols. (Istanbul: IRCICA, 2008), 1:128–31; Ramazan Şeşen, ed., *Catalogue of Islamic Medical Manuscripts (in Arabic, Turkish and Persian) in the Libraries of Turkey* (Istanbul: IRCICA, 1984), 293–94.
5. İhsanoğlu et al., eds., *Osmanlı Tıbbi Bilimler Literatürü Tarihi*, 1:xvii, clxvi–clxviii.
6. Note, however, that 'Atufi's classification schema is implicit rather than explicit. For a detailed discussion of classifications of sciences in the Islamic learned traditions see, for example, Osman Bakar, *Classification of Knowledge in Islam: A Study in Islamic Philosophies of Science* (Cambridge: Islamic Texts Society, 1998); Jean Jolivet, "Classifications of the Sciences," in *Encyclopedia of the History of Arabic Science: Technology, Alchemy, and Life Sciences*, ed. Roshdi Rashed, 3 vols. (London: Routledge, 1996), 3:1008–25; Živa Vesel, *Les encyclopédies persanes: Essai de typologie et de classification des sciences* (Paris: Editions Recherche sur les Civilisations, 1986); Matthew Melvin-Koushki, "Powers of One: The Mathematicalization of the Occult Sciences in the High Persianate Tradition," *Intellectual History of the Islamicate World* 5 (2017): 127–99. For medicine in particular, see *EI2*, s.v. "Ṭibb" (Medicine in the Islamic world), by Emilie Savage-Smith; and Emilie Savage-Smith, "Medicine," in *Encyclopedia of the History of Arabic Science*, 3:903–62.
7. MS Török F. 59, 151–72.
8. Some of these books are placed in this section because they include titles relevant to medicine or they address some general aspect of the healing arts. For works on botany and agriculture, see the essay of Aleksandar Shopov in this volume.
9. For Galen's influence on Islamicate medicine, the classic work is Owsei Temkin, *Galenism: Rise and Decline of a Medical Philosophy* (Ithaca, NY: Cornell University Press, 1973). For the Galenic corpus in Arabic translation, see Manfred Ullmann, *Die Medizin im Islam* (Leiden: Brill, 1970), 35–68. For a concise account of the transmission of Galen's work to the Islamicate world, see Susan P. Mattern, *Prince of Medicine: Galen in the Roman World* (New York: Oxford University Press, 2013), 279–84; Peter E. Pormann and Emilie Savage-Smith, *Medieval Islamic Medicine* (Washington, DC: Georgetown University Press, 2007), 9–15, 24–35; Manfred Ullmann, *Islamic Medicine* (Edinburgh: Edinburgh University Press, 1978), chapter 2. For an exploration of the influence of Galen on Islamicate medicine as a way to explain its divergence from Western medicine, see Hormoz Ebrahimnejad, "Galen as Read and Perceived by Medieval Islamic Medicine," *Istoriya meditsiny* (History of Medicine) 2, no. 1 (2015): 27–39.
10. On medical works written in fourteenth- and fifteenth-century Anatolia, see Sara Nur Yıldız, "From Cairo to Ayasuluk: Hacı Paşa and the Transmission of Islamic Learning to Western Anatolia in the Late Fourteenth Century," *Journal of Islamic Studies* 25, no. 3 (2014): 263–97.
11. For the significance of Ibn al-Nafīs's novel physiology and anatomy, see Nahyan A. G. Fancy, *Science and Religion in Mamluk Egypt: Ibn Al-Nafīs, Pulmonary Transit and Bodily Resurrection* (Milton Park, Abingdon, Oxon: Routledge, 2013); for commentaries as a medium of knowledge production, see Nahyan A. G. Fancy, "Medical Commentaries: A Preliminary Examination of Ibn Al-Nafīs's *Shurūḥ*, the *Mūjaz* and Subsequent Commentaries on the *Mūjaz*," *Oriens* 41, no. 3–4 (2013): 525–45.
12. For the works of Hacı Paşa, see Yıldız, "From Cairo to Ayasuluk."
13. Savage-Smith, "Medicine," 913–27.
14. See note 8 above.

15. Bursa Şeriyeye Sicili, A 2/2, 41a-b, published in Coşkun Yılmaz and Necdet Yılmaz, eds., *Osmanlılarda Sağlık*, 2 vols. (Istanbul: Biofarma, 2006), 2:21.
16. It should be remembered that probate inventories only reflect an individual's possessions at the time of death; it is possible that some books may have been gifted by the owner while alive. İsmail Erünsal, *Osmanlı Vakıf Kütüphaneleri: Tarihi Gelişimi ve Organizasyonu* (Ankara: Türk Tarih Kurumu Yayınları, 2008), 124.
17. Berat Açıl, ed., *Osmanlı Kitap Kültürü: Cârullah Efendi Kütüphanesi ve Derkenar Notları* (Ankara: Nobel, 2015).
18. Ali İhsan Karataş, "Tereke Kayıtlarına Göre XVI. Yüzyılda Bursa'da İnsan-Kitap İlişkisi," *Uludağ Üniversitesi İlahiyat Fakültesi Dergisi* 8, no. 1 (1999): 317–28, at 324.
19. Muzaffer Gökman, *İstanbul Kütüphaneleri ve Yazma Tıp Kitapları* (Istanbul: İstanbul Matbaası, 1959). These figures are comparable to those in early modern Ottoman Aleppo and Cairo. For a discussion of the personal library of an eighteenth-century physician in Aleppo, see for example Feras Krimsti, "The Lives and Afterlives of the Library of the Maronite Physician Ḥannā al-Ṭābib (c. 1702–1775) from Aleppo," *Journal of Islamic Manuscripts* 9 (2018): 190–217; for further discussion on the number of books owned by Cairo's middle class (from the sixteenth to the eighteenth centuries), see Nelly Hanna, *In Praise of Books: A Cultural History of Cairo's Middle Class, Sixteenth to the Eighteenth Century* (Syracuse, NY: Syracuse University Press, 2003), 84–85.
20. Bursa Şeriyeye Sicili, A 2/2, 41a–b, published in *Osmanlılarda Sağlık*, 2:21.
21. Ali İhsan Karataş, "XVI. Yüzyılda Bursa'da Tedavüldeki Kitaplar," *Uludağ Üniversitesi İlahiyat Fakültesi Dergisi* 10, no. 1 (2001): 209–30. All of these titles are also listed in 'Atufi's inventory.
22. For medical works in Turkish, see Yıldız, "From Cairo to Ayasuluk"; Mahmut Tokaç, "Osmanlı Dönemi Türkçe Tıp Yazmaları," in *Osmanlılarda Sağlık*, 1:165–73.
23. For a discussion of the medical works of Hacı Paşa in this transitional context, see Yıldız, "From Cairo to Ayasuluk."
24. For further discussion of the vernacularization of Ottoman medical knowledge (with respect to plague and its treatment), see my "Between Local and Universal: Translating Knowledge in Early Modern Ottoman Plague Treatises," in *Knowledge in Translation: Global Patterns of Scientific Exchange, 1000–1800 CE*, ed. Patrick Manning and Abigail Owen (Pittsburgh, PA: University of Pittsburgh Press, 2018), 177–90.
25. For the typical arrangement of books being piled horizontally on top of one another in decreasing size, see the sixteenth-century Ottoman paintings of libraries reproduced and discussed in Gülrü Necipoğlu's essay in this volume, where she considers physical realities that informed the inventory.
26. 'Atufi carefully noted that the books could fall into two separate categories by adding "pertaining to medicine and affairs of governance." I am grateful to Kaya Şahin for sharing his insights about why those works appear in the section of the inventory devoted to biography and history.
27. TSMA, D. 8228, dated 983 (1575–76), and Şaban 988 (September 1580), published in *Osmanlılarda Sağlık*, 2:78–81. The list includes reference works, such as major medical compendia (e.g., *Qānūn* of Ibn Sīnā), as well as their commentaries and supercommentaries, *materia medica* (e.g., by Ibn al-Bayṭar) and medical formularies (*aqrābādhīn*), as well as more specialized works such as on medical ethics. Book titles are typically given in abbreviated forms in this document (rather than giving full titles and authors), which might suggest that the use of the list was limited to specialists. For multi-volume works, the document carefully notes volume numbers. Most of the books listed here are already part of 'Atufi's inventory. For books borrowed by chief royal physicians in 1575 and 1580, see Aykut Kazancıgil, "Fatih Devri İlim Hayatı içinde Tıp Eğitimi ve Tababet," in *İstanbul Armağanı* 1 (1995): 253–63, at 256; Ali Haydar Bayat, *Osmanlı Devleti'nde Hekimbaşılık Kurumu ve Hekimbaşılar* (Ankara: Atatürk Kültür Merkezi Başkanlığı Yayınları, 1999); Erünsal, *Osmanlı Vakıf Kütüphaneleri*, 156.
28. TSMA, E. 6642, undated, published in *Osmanlılarda Sağlık*, 2:24–25. This document must have been issued sometime after 1580 because of the reference to "medical books checked out to" the physician İsa Çelebi. The document also refers to some other books whose delivery had been delayed and notes that they are needed urgently.
29. TSMA, D. 8228, 1a.
30. Bayat, *Osmanlı Devleti'nde Hekimbaşılık Kurumu ve Hekimbaşılar*, 44. Likewise, Erhan Afyoncu expresses doubt as to whether they were chief court physicians. See Erhan Afyoncu, "Osmanlı Hekimbaşıları ve Hassa Hekimler," in *Osmanlılarda Sağlık*, 1:85–97.
31. Nil Sarı et al., *Tarihi Sağlık Kurumlarımız: Dariüşşifalar* (Istanbul: Sanovel, 2010), 81.
32. There is some information about the early career of İsa serving as a third-ranking physician in the Süleymaniye mosque complex before his promotion to the second-ranking physician in the Haseki *dariüşşifa* in 1560. Başbakanlık Osmanlı Arşivi, Mühimme Defteri 4/164/1696 (8 Rebiülevvel 968 / 27 Nov. 1560). İsa must have been granted a post as a court physician before he was promoted to the rank of the chief physician for Murad III in 1574. Başbakanlık Osmanlı Arşivi, Mühimme Defteri 24/284/766 (3 Safer 982 / 24 May 1574); Mühimme Defteri 25/145/1506 (1 Safer 982 / 22 May 1574).
33. Açıl, ed., *Osmanlı Kitap Kültürü*.
34. Tülün Değirmenci, "Bir Kitabı Kaç Kişi Okur? Osmanlı'da Okurlar ve Okuma Biçimleri Üzerine Bazı Gözlemler," *Tarih ve Toplum, Yeni Yaklaşımlar* 13 (2011): 7–43.

LIST OF ENTRIES

SECTION ON BOOKS OF MEDICINE AND WHAT IS RELATED TO MEDICINE WITH RESPECT
TO BOOKS ON TOXICOLOGY AND AGRICULTURE

(*Tafşılı al-kutub al-ṭibbiyyati* [wa-mā yata‘allaqu bi-al-ṭibbi bi-jihatin min al-jihāti ka-kutubi
al-sumūmi wa-kutubi al-falāḥati])

1. *Kitāb ṭibb al-nabī ‘alayhi al-salām* (Book of Prophetic Medicine), Arabic, 151 {14}.
2. Volume containing:
 - 2a. Khayr al-Dīn Khidr ‘Aṭūfi (d. 1541). *Kitāb rawḍ al-insān fī al-ṭibb al-nabawī* (Gardens of Man), on prophetic medicine, Arabic, 151 {14–15}.
 - 2b. Khayr al-Dīn Khidr ‘Aṭūfi (d. 1541). *Risālat dhukhr al-‘aṭshān fī al-ṭibb al-nabawī* (Treasury for the Desirous), on prophetic medicine, Turkish, in verse, 151 {15}.
 - 2c. Khayr al-Dīn Khidr ‘Aṭūfi (d. 1541). *Risālat ḥifẓ al-abdān* (Preservation of Bodies), Arabic, in verse, 151 {15–16}.
3. Volume containing:
 - 3a. “Abū al-Qāsim ‘Abd al-Raḥmān b. ‘Alī b. Abī Ṣādiq al-Nīshābūrī (11th century).” *Risāla fī al-ṭibb al-nabawī* (Treatise on Prophetic Medicine), Arabic, 151 {18}.
 - 3b. Shams al-Dīn Muḥammad b. Ḥamza al-Fanārī (d. 1431). *Sharḥ Īsāghūjī* (Commentary on the *Isagoge*), Arabic, 151 {18}. MANUSCRIPT: Süleymaniye Kütüphanesi (Hereafter SK), Ayasofya 2567/2, 28a–54a, ca. 1470 (seal of Bayezid II).
 - 3c. Abū al-Qāsim ‘Alā’ al-Dīn ‘Alī b. Muḥammad al-Qūshjī (d. 1474). *Risāla fathīyya fī al-hay’a* (Victory Treatise), on astronomy, Arabic, 151 {18–19}. MANUSCRIPTS: SK, Ayasofya 2639, ca. 1480, Persian (seals of Bayezid II, Selim I, and Mahmud I); SK, Ayasofya 2640/1, 862 H./1458, Persian (seal of Bayezid II); SK, Ayasofya 2733/1, 1b–70a, 871 H./1466 (seal of Bayezid II).
 - 3d. Abū al-Qāsim ‘Alā’ al-Dīn ‘Alī b. Muḥammad al-Qūshjī (d. 1474). *Risāla muḥammadiyya fī al-ḥisāb* (Muḥammadan Treatise), on arithmetic, Arabic, 151 {19}. MANUSCRIPT: SK, Ayasofya 2733/2, 71a–168b, 877 H./1473, autograph copy (seal of Bayezid II).
4. Zayn al-Dīn Ismā‘īl b. Ḥasan al-Jurjānī (d. 1136). *Dhakhīra-i khwārazmshāhī* (Treasury of the Khwarazmshahs), Persian, 152 {1}. MANUSCRIPTS: SK, Ayasofya 3620, ca. 1470 (seal of Bayezid II); Topkapı Palace Museum Library (Hereafter TSMK), A. 1963 (Karatay F 271) (seal of Bayezid II).
5. Same as above, 152 {1–2}.
6. Same as above, 152 {2}.
7. Same as above, 152 {2–3}.
8. Jalāl al-Dīn Khidr b. ‘Alī Ḥājjī Pāshā (Hacı Paşa) (d. ca. 1425). *Kitāb al-shifā’* [sic] *al-asqām wa-dawā’ al-ālām* (Curing Illnesses and Remediating Maladies), Arabic, 1380, autograph copy, 152 {7}. MANUSCRIPT: TSMK, A. 2070 (Karatay A 7347) (seal of Bayezid II).
9. Jalāl al-Dīn Khidr b. ‘Alī Ḥājjī Pāshā (Hacı Paşa) (d. ca. 1425). *Kitāb al-ta‘ālīm fī ‘ilm al-ṭibb* (Book of Teachings on Medicine), Arabic, 1369, autograph copy, 152 {9}.
10. Jalāl al-Dīn Khidr b. ‘Alī Ḥājjī Pāshā (Hacı Paşa) (d. ca. 1425). *Kitāb al-farīda fī dhikr al-aghḍhiya* (The Matchless List of Foods), Arabic, 1370, autograph copy, 152 {9–10}.
11. Yūsuf b. Ismā‘īl b. al-Kutubī (13th–14th centuries). *Kitāb mā lā yasa‘u* [al-ṭabīb jahlahu] (What No Physician Can Afford to Be Ignorant of), Arabic, 1311, 152 {10–11}.

12. Abū Sahl ʿĪsā b. Yaḥyā al-Masīhī (d. ca. 1000). *Kitāb al-miʿa fī al-ṭibb* (Book of a Hundred [Questions]), on medicine, Arabic, 152 {11}. MANUSCRIPT: TSMK, A. 2053 (Karataş A 7224) (seal of Bayezid II). EDITION: Edited by Floréal Sanagustin. Damascus: Institut français d'études arabes de Damas, 2000.
13. Abū Bakr Muḥammad b. Zakariyyā al-Rāzī (d. ca. 925). *Kitāb al-ḥawī fī al-ṭibb* (The Comprehensive Book), on medicine, in five volumes, Arabic, 152 {13–14}.
14. Same as above, book 10, 152 {14–15}.
15. Same as above, book 11, 152 {15–16}.
16. Same as above, book 20, 152 {16–17}.
17. Volume containing:
 - 17a. al-Sayyid al-Sharīf al-Jurjānī. *Al-Risāla al-shawqiyya* (Treatise of Longing), Arabic, 153 {1}.
 - 17b. Abū Bakr Muḥammad b. Zakariyyā al-Rāzī (d. ca. 925). *Risāla fī al-ṭibb* (Treatise on Medicine), Arabic, 153 {1}.
 - 17c. Two treatises, 153 {2}.
18. Abū Bakr Muḥammad b. Zakariyyā al-Rāzī (d. ca. 925). *Kitāb al-tajārib* (Casebook), Arabic, 153 {2}. MANUSCRIPT: TSMK, A. 1975 (Karataş A 7214) (seal of Bayezid II). EDITION: *Kitāb al-tajārib: maʿa dirāsa fī manḥaj al-baḥth al-ʿilmī ʿinda al-Rāzī*, edited by Khālid Aḥmad Ḥarbī. Alexandria: Dār al-Wafāʾ li-Dunyā al-Ṭibāʿa wa-al-Nashr, 2006.
19. Abū Bakr Muḥammad b. Zakariyyā al-Rāzī (d. ca. 925). *Kitāb al-fākhir fī al-ṭibb* (The Glorious Book), on medicine, Arabic, in two volumes, 153 {3}.
20. Volume containing:
 - 20a. Hippocrates (d. ca. 370 BCE). *Kitāb al-fuṣūl* (Aphorisms), Arabic, 153 {5}.
 - 20b. Abū Bakr Muḥammad b. Zakariyyā al-Rāzī (d. ca. 925). *Kitāb fī al-qūlanj* (On Colic), Arabic, 153 {5–6}. EDITION: Edited by Şubḥī Maḥmūd Ḥammāmī. Aleppo: Jāmiʿat Ḥalab, Maʿhad al-Turāth al-ʿilmī al-ʿArabī, 1983.
 - 20c. “*Kitāb fīmā yaḥtāju ilayhi al-mutaṭabbib min ʿilm al-nujūm*” (Medical Student’s Manual of Essential Astrology), Arabic, 153 {6–7}.
 - 20d. “*Kitāb al-luʿluʿa fī tadbīr al-ṣiḥḥa*” (The Pearl: On the Management of Health), Arabic, 153 {7}.
 - 20e. “*Kitāb fī al-khadar*” (On Langor), Arabic, 153 {7–8}.
 - 20f. Seventeen medical books, 153 {7–8}.
21. Hippocrates (d. ca. 370 BCE). *Kitāb taqdimat al-maʿrifa* (Prognostics), translated by Ḥunayn b. Iṣḥāq, Arabic, 153 {8–9}.
22. Volume containing eleven books by Hippocrates on medicine, 153 {10}.
23. Commentary on Hippocrates’s *Kitāb al-fuṣūl* (Aphorisms), Arabic, 153 {10–11}.
24. Volume containing:
 - 24a. Hippocrates (d. ca. 370 BCE). *Kitāb al-ahwiya wa-al-buldān* (On Airs, [Waters,] and Places), translated by Ḥunayn b. Iṣḥāq, Arabic, 153 {11–12}.
 - 24b. Galen (d. ca. 216). *Maqālat Jālīnūs* (Galen’s Discourse), translated by Ibn Sīnā, Arabic, 153 {12}.
 - 24c. “Pythagoras.” *Kitāb fī abdāl al-adwiya* (On Substitute Drugs), Arabic, 153 {13}.
25. Volume containing:
 - 25a. Same as 20a, 153 {14}.
 - 25b. Hippocrates (d. ca. 370 BCE). *Kitāb qaḍāyā* (Book of Premises)¹, Arabic, 153 {14}.
 - 25c. Ibn Sīnā (d. 1037). *Kitāb al-urjūza fī al-ṭibb* (Medical Poem), Arabic, 153 {15}.

26. Volume containing:
 - 26a. Same as 20a, 153 {15–16}.
